- GaAs IR emitters efficiency due to semiconductor material band structure 06 p0894 A69-17248
- Impurities effect on electron energy spectrum in semiconductors at zone boundary and arbitrary doping levels, using Green function 09 p1554 A69-21467
- Alkali halide single crystals disintegration by laser radiation differs as function of crystal physicochemical properties and band structure 10 p1745 A69-23322
- Band structure and reflection spectra of vanadium dioxide and pentoxide single crystals, noting changes in metal-semiconductor phase transition 12 p2145 A69-26724
- Solid state physics applications to fracture problems and structure of solids, considering crystallography, lattice vibrations, defects, electron bands, alloys and surface physics 13 p2316 A69-27221
- GaS, GaSe and InSe crystals band structure from analyzing reflection spectra, noting sensitivity to visible, IR and hard radiation 13 p2317 A69-27883
- Conduction band structure in GaSb noting temperature dependence 13 p2319 A69-27899
- Burstein-Moss effect observed in studying n-GaAs crystals electrical reflection spectra with large free carrier concentration at two temperatures and low energy levels 15 p2666 A69-30060
- X pocket Fermi surface of ferromagnetic Ni, considering magnetic breakdown effects 15 p2668 A69-30687
- Impurities effect on electron energy spectrum in semiconductors at zone boundary and arbitrary doping levels, using Green function 15 p2669 A69-30712
- Impurity levels in semiconductors with multiconduction bands, noting impurities influence on photoluminescence, laser action and Gunn effect 19 p3385 A69-36514
- Band structure and optical constants of InSb, InAs and GaSb, calculating linear momentum matrix elements and state density with spin-orbit effects included 19 p3385 A69-36515
- Band structure for narrow energy gaps of GeTe and SnTe by perturbation model, noting constant free path and relaxation time 19 p3385 A69-36516
- Combined resonance transition in n-type InSb by IR radiation, plotting intensity against magnetic field for different carrier concentrations to infer band structure 19 p3385 A69-36520
- Narrow band gap alloys and ferromagnetic semiconductors, using transport properties for characterization 19 p3385 A69-36541
- Low temperature energy band gap in n-type single semiconductor crystals of In-Sb-Bi alloys analyzed by measuring Hall constant and optical absorption coefficient 19 p3390 A69-36552
- Band structure and reflection spectra of vanadium dioxide and pentoxide single crystals, noting changes in metal-semiconductor phase transition 21 p3781 A69-39137
- Thermal EMF in cadmium arsenide specimens with various electron concentrations determined to verify parabolic subband structure of conduction band 22 p3993 A69-40607
- BANDPASS FILTERS**
- NT CRYSTAL FILTERS
- NT TRACKING FILTERS
- Multistub filter for microstripline using shorted and open stubs 01 p0041 A69-10200
- Filter uncertainty for time or frequency resolution in analysis of waveform, decomposing characteristic functions and determining least uncertain realizable filter 02 p0226 A69-12306
- Conventional TWT theory modified to include interaction between beam and two spatial harmonics, investigating TWT stability near edges of pass band 03 p0407 A69-13976
- Tunable ferrimagnetic bandpass filter using magic T configuration to permit low magnetic field strength and retain nonstacked configuration advantages 04 p0573 A69-14343
- Narrow bandpass filters based on ripple adjustment in response of low or high pass prototype 04 p0574 A69-14345
- Recirculator with sign variable feedback coefficient for delay line passband increase 04 p0575 A69-14464
- Active RC low pass filters sensitivity to component changes, discussing effect of below minimum limit value 04 p0578 A69-15070
- Digital filter design with complex coefficients for analytic signals and complex envelopes 04 p0579 A69-15460
- Instrument profile of birefringent Lyot filter for H alpha line determined from photographic spectra with grating spectrograph 04 p0664 A69-15524
- Diagrams for power transfer parameters between double tuned bandpass filters with arbitrary coupling 05 p0729 A69-15964
- Five layer thin film band elimination filters amplitude and phase frequency characteristics 05 p0729 A69-16088
- Waveform distortions of trapezoidal wave passing through Gaussian filter in pulse transmission, discussing ideal filter effects on degradation 05 p0719 A69-16296
- Broadband LC filters having prescribed amplitude response and constant group delay, emphasizing IF filters for radio relays 05 p0732 A69-16343

Harmonic ion cyclotron waves shown to possess stop and passband characteristics, supporting quasi-static ion cyclotron mode theory

06 p0970 A69-17953

Frequency modulated signal envelope passage through bandpass filter of inductively coupled circuits described by differential equation

07 p1100 A69-18555

Statistical analysis of cascade of bandpass limiter, ideal phase detector and video filter for mathematical modeling of coherent communication systems

07 p1084 A69-19147

Frequency transformation allowing comb-line filters of narrow and wide bandwidth, using resonance type filters with lumped elements

07 p1108 A69-19487

Pseudoexact Chebyshev response curves for bandpass filter design, discussing phase response and time delay characteristics

08 p1283 A69-20227

Chebyshev filter with flat group delay obtaining transfer function, noting cascade synthesis and extended bisection theorem

08 p1299 A69-21169

Equal element elliptic function filters, noting lower dissipation loss when applied to bandpass and bandstop filters

08 p1300 A69-21175

Cut-off coupled microwave bandpass filters for use in dielectric filled waveguide systems

09 p1466 A69-22447

Pseudoexact bandpass filter response curves and electrical characteristics based on ripple Chebyshev responses

09 p1470 A69-22794

Digital sampled data spectra conditioning, deriving linear functions for low pass, bandpass and band rejection numerical filters and spectrum shaping

10 p1654 A69-23292

Chebyshev filter design problems including minimum highest dissipation loss, bandwidth, resonators, etc

10 p1665 A69-23875

Wideband RF amplifier manufacturing problems, comparing operation of vacuum triodes and pentodes in passband circuits

11 p1849 A69-24958

Transmission characteristics of narrow band microwave bandpass filters with power cascade and Chebyshev behavior

11 p1857 A69-25677

Electronic switching circuits controlled by binary counter triggers for variable passband filters

12 p2040 A69-26489

Coupling coefficients for common-base/common-base circuits of bandpass filters in two circuit selective transistor amplifier

13 p2226 A69-27219

Chebyshev polynomial of even order used in synthesis of equally terminated low pass lumped and distributed filters of even order

13 p2233 A69-28068

Multiband frequency conversion in filters or correcting circuits with four terminal networks, noting prototypes

13 p2235 A69-28519

FM measurements of angle distortion introduced by single pole bandpass filters compared to theoretical distortion

14 p2416 A69-29552

Negative resistance amplifier with stabilizing resistor in compensating circuit for operation in microwave duct mismatched beyond amplifier passband range

15 p2573 A69-30118

Wideband multiplexers design with directional filters, discussing operational characteristics

15 p2581 A69-31524

Pseudoexact bandpass filter design, presenting graphs for passband loss, voltage standing wave ratio and time delay as function of frequency

15 p2581 A69-31526

Stepped digital narrow band bandpass microwave elliptic function filters design and construction

16 p2759 A69-31939

Microwave bandpass linear phase filters design and synthesis for simultaneous flat amplitude and delay response

16 p2759 A69-31941

Holographic method of a posteriori restoration of images formed by coherent and incoherent light by spatial frequency retrieval

19 p3304 A69-35603

Transient phenomenon analysis and filtering based on stage separation tests in vacuum chamber, with emphasis on selective integration method [ONERA-TP-684]

19 p3293 A69-35747

Coherent phase locked loop receiver as carrier and modulation loops combination with parallel bandpass filter for ranging signal reception and FM demodulation

19 p3274 A69-36277

Multiple filter technique for seismic multimode dispersed signals, checking time and frequency resolution by diagnostic diagram

22 p3934 A69-39872

Microwave bandpass step filters, listing structural dimensions and design parameters

23 p4139 A69-41947

Q multiplier UHF device as preselection filter for closely spaced channel signals, discussing channel interference reduction

23 p4141 A69-42220

Noise elimination by filtering in high power microwave transmitters, noting practical design tradeoffs

23 p4142 A69-42235

BANDWIDTH

NT BROADBAND

NT SPECTRAL LINE WIDTH

Automatic phase control effective bandwidth determined by asymptotic method, presenting computer calculated dependence on circuit parameters

01 p0030 A69-10590

Piecewise analysis of large structures, showing incompatibility of minimum computer storage and minimum number of multiplication requirements through bandwidth schemes

01 p0169 A69-10637

Delay line bandwidth reduction for video or digital information, noting radar tracking application

03 p0392 A69-13251

Impulse bandwidth measurement error determination by trapezoidal numerical integration

03 p0398 A69-13902

Conventional TWT theory modified to include interaction between beam and two spatial harmonics, investigating TWT stability near edges of pass band

03 p0407 A69-13976

Bandwidth effect on wave recordings cross spectra interpretation from spatially separated sites, deriving relationship between propagation velocity and velocity bandwidth

05 p0756 A69-16272

Log-periodic circuits for application to microwave amplifiers in antenna design, noting bandwidth

05 p0739 A69-16554

CW laser mode steady excitation and narrow bandwidth obtainable by highly stable pumping and stable temperature of active element

06 p0934 A69-17681

Harmonic ion cyclotron waves shown to possess stop and passband characteristics, supporting quasi-static ion cyclotron mode theory

06 p0970 A69-17953

Laser small signal step response measured, deducing medium bandwidth [IEEE PAPER G-9]

07 p1151 A69-19056

Bit probability of PCM/FM for receiver with IF bandwidth equal to or greater than data rate, limiter-discriminator detection and postdetection filter

07 p1082 A69-19106

Finite IF filter bandwidth degradation of SNR of receiver for biphasic modulated signals using integrate and dump filter

08 p1270 A69-19851

Center feed system for broadening frequency bandwidth in X-band edge slotted waveguide array antenna

08 p1286 A69-20836

Minimum bandwidth of M real equal energy signals with specified code or correlation matrix, noting optimum waveforms

09 p1452 A69-21313

Noniterative wideband amplifiers having single pole transfer functions overall gain bandwidth product optimization, deriving rigorous conditions for maximum

09 p1469 A69-22606

Automatic phase control effective bandwidth determined by asymptotic method, presenting computer calculated dependence on circuit parameters

10 p1653 A69-23105

Simultaneous transmission of information signals and pseudonoise synchronization waveforms in common bandwidth [IEEE PAPER 67-TP-1173-COM]

10 p1655 A69-23532

Intracavity acoustooptic devices based on isotropic and anisotropic acoustic Bragg diffraction, discussing efficiency, bandwidth and acoustic column width

10 p1697 A69-23871

Chebyshev filter design problems including minimum highest dissipation loss, bandwidth, resonators, etc

10 p1665 A69-23875

Mechanical damping and electrical matching effects on bandwidth of piezotransducer in ultrasonic flaw detection equipment

10 p1697 A69-24073

Upper bounds for increment of band limited signal in sampling interval by increasing integral expressions of increment

11 p1834 A69-24551

Tunnel diode self excited SHF oscillators synchronization, deriving single frequency generation conditions

11 p1849 A69-24955

Bandwidth potential increase of parametric amplifier obtained by adding active filter elements to signal circuit, noting satellite communication band

12 p2039 A69-26380

Two idler parametric amplifiers bandwidth properties investigated using equivalent circuit, noting role of idler circuit design

13 p2233 A69-28066

Wave propagation and bandwidth characteristics of rectangular waveguide loaded with H plane lossless dielectric slab

13 p2222 A69-28075

Microwave cavity bandwidth determined from reflection coefficient measurements, considering reflection magnitude and phase

13 p2223 A69-28606

Linear mean square estimator for restoration of images degraded by system with bandlimited spread function

15 p2611 A69-31032

Stepped digital narrow band bandpass microwave elliptic function filters design and construction

16 p2759 A69-31939

Bandwidth requirement of single channel monopulse limiter, discussing signals conversion to IF

16 p2761 A69-32471

Energy criteria inconsistency in evaluating frequency band changes attributed to simultaneous narrowing and broadening of different signal power bands

19 p3278 A69-36716

Recording devices for storing bandwidth data in time sequence, studying design parameters using light beam recorder implemented with CRT for read-in process

20 p3540 A69-37640

Discrete delay line measuring FM noise, discussing special case of narrow band cavity resonator method

23 p4137 A69-41606

M-ary noncoherent signal structures requiring less transmission bandwidth than conventional FSK, deriving SNR

23 p4122 A69-41773

Hologram electronic transmission, obtaining required bandwidth reduction by differential recording of image and scene diffraction pattern

24 p4317 A69-43761

BANG-BANG CONTROL

U OFF-ON CONTROL

BANKING FLIGHT

U TURNING FLIGHT

BARANY CHAIR

Vestibular analyzer role in spatial orientation under weightlessness conditions during aircraft flights, discussing underestimations of rotation angle of Barany chair

08 p1262 A69-19840

BARDEEN APPROXIMATION

U BARRIER LAYERS

U ELECTRICAL PROPERTIES

U SURFACE PROPERTIES

BARDEEN-COOPER-SCHRIEFFER THEORY

U BCS THEORY

BARIUM

Lanthanum isotopes beta decay, analyzing excitation of near spherical daughter nuclei of barium isotopes

01 p0122 A69-10100

Artificial visible plasma clouds in space interacting with electric and magnetic fields around earth

01 p0151 A69-10533

Absorption oscillator strengths of Ba 2 lines in UV and visible spectral regions, using cascade arc in argon with barium vapor

02 p0242 A69-11872

Barium plasma density measurements by Langmuir, microwave probes and resonance fluorescence scattering compared in Q device
02 p0288 A69-12172

Barium, oxygen and BaO adsorption influence on Mo and Ti thin films conductivity and work functions
06 p0978 A69-16900

Continental diabases and oceanic tholeiites in light of rare earth and barium abundances and partition coefficients indicating fusion process
08 p1310 A69-20945

Fast Ba ion filament cloud injection into ionosphere using explosive shaped charge technique, noting application to ionospheric electric field measurement
09 p1539 A69-21752

Space electric fields research by artificial clouds of vaporized barium launched by rockets, noting neutral atmosphere and ionospheric results
09 p1492 A69-22800

Barium vapor effect on converter materials, examining metals-ceramics compatibility at high temperatures
14 p2467 A69-29215

Thermal emission converter, using Cs-Ba mixture in low voltage arc mode, detailing construction
14 p2403 A69-29247

Electric field variations in vicinity of auroral forms from motions of Ba vapor clouds released from Nike-Tomahawk rockets
18 p3128 A69-34935

Ca-rich achondrites genesis implied from rare earth and Ba absolute and relative concentrations
19 p3409 A69-36091

Stony meteorite barium isotopes and iron meteorite and terrestrial silicate inclusions analyzed using double spike method for laboratory fractionation correction
19 p3425 A69-36422

Density, ion temperature, electron temperature and ion drifts in Ba or Ba doped plasmas determined by resonance fluorescence and optical pumping
22 p3962 A69-40532

BIARIUM COMPOUNDS

Nonlinear optical properties of barium sodium niobate in ferroelectric tetragonal phase above room temperature, noting spontaneous parametric emission
09 p1515 A69-21354

Ground and metastable state photoionization cross sections of BaI to explain artificial Ba clouds, using many channel quantum defect method
18 p3177 A69-35238

BIARIUM OXIDES

Emission spectra of BaO during barium release compared with computed spectra for upper atmosphere temperatures evaluation
09 p1488 A69-21664

Oxide coated thermionic cathodes, noting semiconductor properties of alkaline earth oxides, particularly barium oxide and adsorption and optical properties
09 p1470 A69-22700

BIARIUM TITANATES

Dielectric constants of barium titanate single crystals as function of electric field intensity at different frequencies
01 p0139 A69-10889

Ferroelectric transition of barium titanates doped in OH or oxygen vacancies, using pyroelectric method
03 p0491 A69-14059

Nonadjustable Fabry-Perot scanning interferometer for gas laser spectra analysis, using barium titanate piezoceramic elements
04 p0598 A69-14854

Repolarization processes in barium titanate single crystals by variable sinusoidal voltage pulses
05 p0808 A69-16215

Domain structure of barium titanate single crystals during polarization reversal by sinusoidal AC field
06 p0981 A69-17893

Microwave oscillation and amplification in long bulk GaAs with barium titanate sheets on surface due to differential negative resistance across terminals
07 p1197 A69-18452

Observation of photocurrents generated in Schottky barrier diodes on barium titanate, suggesting practical utility of photon-to-electron conversion efficiencies
07 p1104 A69-18905

Microwave absorption by free carriers in c domain barium titanate crystals inserted in waveguide during polarization reversal
08 p1374 A69-21189

Nonadjustable Fabry-Perot scanning interferometer for gas laser spectra analysis, using barium titanate piezoceramic elements
15 p2608 A69-30246

Dielectric constants of barium titanate single crystals as function of electric field intensity at different frequencies
18 p3182 A69-34720

Microwave absorption by free carriers in c domain barium titanate crystals inserted in waveguide during polarization reversal
18 p3183 A69-35158

Repolarization processes in barium titanate single crystals by variable sinusoidal voltage pulses
20 p3584 A69-37785

Impurities effect on domain structure of barium titanate single crystals grown from solution in KF melt determined by inner stresses
21 p3783 A69-39559

Piezoelectric characteristics of surface layers of Ba titanate single crystals, using static and dynamic electromechanical methods
22 p3995 A69-41156

Dielectric constant and IR spectra of Ba titanate single crystals doped with hydroxyl, showing dependence on temperature and crystal thickness
22 p3995 A69-41157

Waveguide-resonance investigation of temperature dependence of dielectric constant and paraelectric dispersion of Ba and Sr titanate single crystals at millimeter wavelengths
22 p3995 A69-41158

Defect structure of ceramic Ba titanate doped with Cr ions, evaluating visible, IR and EPR spectra
22 p3996 A69-41160

Ba titanate modifiers, classifying cations replacing Ti and Ba ions
22 p3996 A69-41161

Temperature dependence of heat capacity of Ba and Sr titanate solid solutions in ferroelectric phase transition region
22 p3996 A69-41162

Dielectric polarization of barium titanate and barium strontium titanate in pulsed fields in paraelectric phase, analyzing coefficient B in free energy function and equilibrium state
22 p3996 A69-41165

Electric properties and domain structure changes of polycrystalline Ba titanate and other ferroelectrics characterized by high dielectric nonlinearity
22 p3996 A69-41166

BIARIUM ZIRCONATES

Electron emitters tested for gas laser operations, discussing nonreactive and reactive gases cases, matrix structures containing BaSrO and barium zirconate cathodes
23 p4172 A69-41394

BAROCLINIC WAVES

Symmetric baroclinic instability role in Jupiter equatorial acceleration
03 p0508 A69-13347

Long and ultralong waves in baroclinic zonal current, investigating current stability and wave perturbation characteristics by applying linearized perturbation equations to multilayer model
10 p1682 A69-23325

Atmospheric motions on Jupiter, considering highly symmetric flow, baroclinic waves and red spot
15 p2694 A69-30856

Horizontal shear effect on structure of growing baroclinic waves by two layer model, assuming small radius of deformation, compared to planetary scale
17 p2960 A69-33150

Instability theory of baroclinic vortices in incompressible and inviscid fluid, investigating symmetric meridional motions time evolution by numerical integration of hydrodynamic equations
23 p4153 A69-42346

BAROCLINITY

Weather forecasting, discussing atmospheric models and computer operations for long range forecasting based on hydrodynamic theory and statistics
01 p0108 A69-10398

Taylor column existence in compressible atmosphere, discussing baroclinicity and stratification effects in earth and Jupiter atmospheres
02 p0326 A69-12697

Unsteady baroclinic planetary atmosphere boundary layer turbulent states with various pressure and temperature gradient distributions, using boundary layer model
10 p1722 A69-23973

Unsteady baroclinic planetary atmosphere boundary layer turbulent states with various pressure and temperature gradient distributions, using boundary layer model
21 p3760 A69-39659

Steady state baroclinic boundary layer over two dimensional terrain in f plane, noting layer thickness dependence on stability and terrain slope
24 p4347 A69-43356

BAROMETRIC PRESSURE U ATMOSPHERIC PRESSURE

BAROTRAUMA

Gangrene and caisson disease due to diving accidents, discussing emergency treatment with hyperbaric oxygen
17 p2911 A69-33775

Barotrauma during hyperbaric oxygenation at flight descent or reentry into caisson, including ear trauma symptoms and use of paracetamol
17 p2911 A69-33776

BAROTROPIC FLOW

Barotropic instability analyses by method of jet stream like fields and energy transport from zonal current to wave disturbances based on vorticity equation
02 p0276 A69-12758

Planetary Rossby waves vertical propagation through weak westerly wind wave guides, using adiabatic linear model
03 p0460 A69-13335

Asymptotic similarity in neutral barotropic planetary boundary layers, solving Ekman flow by singular perturbation methods
03 p0460 A69-13336

Large scale disturbances in summertime stratosphere observed from high level balloon, discussing diurnal wind patterns and planetary traveling waves
03 p0461 A69-13343

Validity of finite difference approximations for barotropic instability of zonal currents
09 p1537 A69-22298

Characteristics method for solution of differential equations representing time changes of wind and pressure fields in divergent barotropic channel flow
11 p1911 A69-24585

Stability of barotropic perturbations superimposed on wind velocity profile of basic currents in geostrophic multilayer models
11 p1911 A69-24586

Potential triple traveling space waves in barotropic gas with arbitrary equation of state, analyzing adjacent and three dimensional self similar flows
12 p2061 A69-25889

Stability theorems for barotropic vorticity equation integrated within limited region for flow through boundary without existing physical boundary conditions
13 p2294 A69-28494

Air mass analysis, discussing homogeneity, quasi-barotropic fluids, noise elimination to arrive at smooth flow pattern, etc
15 p2647 A69-30193

Horizontal shear flow effect on linear geostrophic adjustment in unbounded barotropic fluid, discussing gravity waves, vorticity equations, available energy, etc
15 p2648 A69-30217

Finite difference schemes for barotropic fluid free surface model primitive equations tested for numerical integration stability and accuracy
17 p2997 A69-33691

Model calculations for movement of barotropic and initially symmetric vortices in rotating fluids with Coriolis parameter or fluid depth varying horizontally
17 p3000 A69-33761

Linear dynamic modeling of barotropic fluid in rigid circular tube, presenting axial velocity profile by confluent hypergeometric function with complex arguments
[ASME PAPER 69-FLCS-18]

20 p3516 A69-37982

BAROTROPISM

Dynamic meteorology quasi-stable problems solved using sequential approximations solution for barotropic model of Euler equations
14 p2476 A69-29821

Error sources in forecasts for heights of isobaric surfaces obtained by numerical integration of prognostic equations of equivalent barotropic models
19 p3361 A69-35770

BARRICADES

U BARRIERS

BARRIER LAYERS

Electrical properties of gold-gallium arsenide n-type junctions investigated for influence of crystallographic orientation of surface and charge carrier density
01 p0138 A69-10432

Beam-lead fabrication on dual Schottky barrier diodes for low noise integrated microwave mixers
02 p0222 A69-12474

Potential distribution approximations for junction semiconductor devices, noting application to barrier layers and electron tunneling

03 p0408 A69-14107

Electron emission into vacuum from forward biased Schottky barrier consisting of cesiated thin layer of Pt on n-type ZnS

03 p0493 A69-14186

Shot noise in Si Schottky barrier diodes for frequencies between 100 Hz and 50 kHz

05 p0734 A69-16564

Potential barrier curvature influence in aluminum trioxide tunnel junctions, noting ionic space-charge effect on shape

07 p1196 A69-18243

Barrier capacitance of semiconductor diodes for exact temperature measurement, discussing application to temperature to frequency converters

07 p1100 A69-18556

Gunn effect for cathode contacts with interface resistance, developing control characteristic boundary condition concept for explaining cathode fall and other phenomena

07 p1199 A69-18649

Epitaxially grown guard rings for GaAs p-n junction and Schottky barrier avalanche diodes

08 p1284 A69-20368

Magnetoelectric characteristics of inversion layers below gate region in transistors, noting Hall mobility

08 p1372 A69-20460

Destructive breakdown in Schottky barrier diodes by evaporating contact metal through mask onto silicon, showing local heating by thin wax layer

08 p1286 A69-20860

Field effect transistors with Schottky-barrier gates using epitaxial layers of silicon on substrates and gallium arsenide on seminsulating substrates

08 p1286 A69-20863

Forward volt-ampere characteristics and differential resistance peak of Schottky barrier diode on doped Si

09 p1557 A69-21744

Trapping state effect on tunneling probability in Schottky barriers, discussing current-voltage characteristics

09 p1557 A69-21748

Schottky barriers on n-type GaAs, measuring forward current characteristics for various electron concentrations and temperatures

10 p1745 A69-23358

Gallium phosphide Schottky barrier diodes, discussing construction and metals used, barrier height relationships to impurity concentration and temperature, rectifying characteristics and internal quantum efficiency

16 p2757 A69-31613

Tunnel junctions with low background currents made by reacting active gas layer adsorbed on Nb film surface with Pt upper film to form barrier

17 p3016 A69-33788

BARRIERS

Stopping barriers for jet aircraft landing design and operation

11 p1862 A69-24354

Reflecting or reradiating obstacle proximity as cause of siting errors in azimuth radio measurements, discussing omnidirectional obstacles effect

15 p2651 A69-31090

Capillary barriers to provide propellant positioning, expulsion capability and slosh dampening for spacecraft propulsion systems during rotational maneuvers

[AIAA PAPER 69-529]- 16 p2868 A69-32713

Knife-edge obstacle diffraction of nonisotropic transmitter analyzed via isotropic source model propagation path noting accuracy

17 p2917 A69-32847

BARS

NT ELASTIC BARS
NT PRISMATIC BARS

Nichrome bars production dispersion hardened by alumina and zirconia inclusions, noting extrusion temperature influence

01 p0085 A69-10397

Torsion of variable cross sectional thin walled bars using shell theory equations

02 p0337 A69-11559

Stress-strain relationship of composite bars consisting of single glass fiber with thin metal coating layer and under axial load

07 p1235 A69-19385

Axially loaded viscoelastic constrained bar instability for large deformation

07 p1235 A69-19440

Stress intensity magnification factors in surface flawed tension plates and notched round tension bars, evaluating fracture toughness

10 p1797 A69-23080

Thickness and drilled holes effects on notch toughness of Charpy V notch bars over wide temperature range

10 p1798 A69-23087

Flat bar optimal cross section under tensile stress applied to minimize stress in large structural components using elasticity theory

11 p1986 A69-25203

Dynamic plastic response of finite bar subject to axial impact load noting reflected waves, stress-strain time histories and residual strain

11 p1991 A69-25512

Acrodynamic energy dissipation during vibrations of bars in airstreams characterized by energy loss per cycle and logarithmic decrement

17 p3066 A69-33948

Autocorrelation function for unsteady temperature and stress fields in bar located in gas stream leaving combustion chamber

19 p3440 A69-36685

Natural torsional-flexural vibrations of bars with single symmetry, using matrix equations of equilibrium, displacements and natural coupled vibrations

22 p4043 A69-40456

BARYCENTER

U CENTER OF GRAVITY

BARYONS

NT COLD NEUTRONS
NT FAST NEUTRONS
NT HYPERONS
NT K-MESONS
NT MESON RESONANCES
NT MESONS
NT MUONS
NT NEUTRONS
NT PHOTONEUTRONS
NT PIONS
NT PROTONS
NT SOLAR PROTONS
NT THERMAL NEUTRONS

Cosmic ray penetrating component properties identical to muon component at mountain level, indicating baryon passive nuclear state nonexistence

13 p2331 A69-28400

Baryon passive nuclear state nonexistence indicated by above and below ground calorimetric telescope method of nuclear cascade observation

13 p2331 A69-28401

Quarkian core substance in superstars of great masses, discussing existence as primordial state forming baryon and nuclei and origin in stellar gravitational contraction

19 p3401 A69-35912

Harrison primordial inhomogeneity postulate concerning baryon numbers distribution in universe, precluding possibility of considering cosmic rays bulk as universal

21 p3810 A69-39469

BASALT

Surveyor 6 magnet experiment following lunar landing, noting presence of magnetic material in Sinus Medii indicating basaltic composition

02 p0317 A69-12015

Magnetic paleointensity studies in basalts from Flagstaff, Arizona, noting oxidation effect on magnetic strength after heating

02 p0244 A69-12018

Excess radiogenic argon in deep sea basalts from crest of East Pacific Rise, noting relation to glass content

02 p0244 A69-12568

Friction resistance between steel and ground basalt in ultrahigh vacuum, showing increase by adhesion

13 p2298 A69-28014

Chemical composition of basaltic achondrites /eucrites and howardites/, indicating dominant role of physical process over magmatic differentiation

24 p4382 A69-42928

BASE FLOW

Plane supersonic base flows studied using integral analysis of turbulent reattachment, noting prediction of wall pressure distribution

03 p0361 A69-12990

Axisymmetric hypersonic near wake with base injection, discussing zero injection case, jet-plume interaction and mixing region

[AIAA PAPER 69-66] 06 p0914 A69-18115

Thermal and pressure environments analysis in Saturn S-1C stage base during flight tests, noting base gas flowfield and heating

[AIAA PAPER 69-318] 09 p1611 A69-22383

Turbulent base flowfields in multinozzle configurations, considering adiabatic flow and determining base pressure distribution from reverse jet impingement

[AIAA PAPER 69-570] 16 p2733 A69-32751

Separated flow patterns in base flow at body recesses, emphasizing shock wave boundary layer interaction, laminar flow and flow in front of recess

17 p2949 A69-33124

Base flow component of total drag for axisymmetric supersonic afterbody with single exhaust jet, considering turbulent mixing

[AIAA PAPER 69-650] 17 p2956 A69-33485

BASE HEATING

Telemetry technique utilizing thermocouple sensors for base heating determinations on free flight blunt cone in shock tunnels, noting electrical noise reduction

[AIAA PAPER 68-407] 04 p0604 A69-15514

Short duration tube wind tunnel supersonic testing, noting Saturn S-1C base heating and solid propellant rocket base burning tests

[AIAA PAPER 69-335] 13 p2242 A69-28271

BASE PRESSURE

Cylindrical afterbodies at free stream Mach 2 with hot argon gas ejection, discussing flow rate influence on base pressure

02 p0190 A69-12533

Sting diameter and cylindrical protuberance length effects on base pressure of axisymmetric body in turbulent supersonic flow

05 p0697 A69-15712

Stagnation pressure losses of adiabatic flow of compressible fluids through abrupt area expansion and contraction in subsonic range, discussing base pressure

[ASME PAPER 68-WA/FE-46] 05 p0750 A69-16113

Turbulence hypothesis for velocity of laminar fluid flow at dividing line, considering base pressure and adiabatic mixing zones

06 p0910 A69-17330

Base pressure calculation in initial turbulent boundary layer of supersonic flow about two dimensional backward facing step, using mass conservation conditions

07 p1119 A69-18747

Hypersonic missile interceptor vibration characteristics in lower atmosphere, noting role of base pressure excitation

09 p1614 A69-21890

Base pressure fluctuations behind cone in supersonic gas flow, noting complicated superposition of harmonics associated with various factors

09 p1431 A69-22327

Turbulent base flowfields in multinozzle configurations, considering adiabatic flow and determining base pressure distribution from reverse jet impingement

[AIAA PAPER 69-570] 16 p2733 A69-32751

Multichannel pressure telemetry system for base pressure measurements on small wind tunnel models, considering proximity effects on transducer-telemetry units

19 p3305 A69-35727

Drop test method to obtain subsonic terminal velocity and base pressure data for planetary entry probe configurations

19 p3238 A69-35959

Transition in near wake, from study of base pressure on circular cylinders in incompressible flow

19 p3242 A69-36809

Free flight telemetered base pressure test data correlation for high Mach numbers, noting facilities and instrumentation

20 p3458 A69-37196

Base pressure of peripheral jet ground effect machines in heaving motion, discussing flow patterns

22 p3866 A69-40817

Free flight telemetry base pressure measurements on slender cones and domed afterbodies in hypersonic laminar flow, using shock tunnel test facility

[AIAA PAPER 68-698] 24 p4249 A69-43675

BASES [CHEMICAL]

Polymeric Schiff bases synthesis, thermal stability and nature of pyrolytic decomposition of polyazines and derived polystylenes

07 p1074 A69-18628

Cross-linked polymers obtained by direct reaction of aryl polycarbonyls with aryl polyamines, studying char yields effect

08 p1269 A69-21059

Cross-links effect on char yields of azomethine polymers produced by aryl diamines with aryl diketones

08 p1269 A69-21060

- Schiff base cross-links effect on synthesis of polymeric azomethines produced by bis exchange reactions, carbonyl and amine
08 p1269 A69-21061
- Pyrimidine and purine bases analysis by time of flight mass spectrometry and paper chromatography
11 p1832 A69-24738

BASES [FOUNDATIONS]

U FOUNDATIONS

BATCH PROCESSING

- Network analysis for systems application program /NASAP/ in FORTRAN for batch and on-line analysis of electronic circuits
21 p3856 A69-39662

BATHS

U SALT BATHS

BATHYMETERS

- Airborne pulsed lasers for near shore bathymetric measurements, discussing feasibility results
15 p2609 A69-30459

BATHYMETRY

U BATHYMETERS

BATTERIES

U ELECTRIC BATTERIES

BAUSCHINGER EFFECT

- Energy dissipation and fatigue in metals under cyclic static loads, determining logarithmic decrements of vibrations and Bauschinger effect
12 p2181 A69-26612

- Stress-strain state of elastoplastic material subjected to quasi-static uniaxial tension and compression, considering Bauschinger type effects by scalar parameters
18 p3222 A69-34909

- Metals plastic behavior including strain hardening and Bauschinger effect
21 p3832 A69-38466

BAYARD-ALPERT IONIZATION GAGES

- Bayard-Alpert type ionization gage for low pressures with and without modulation, discussing role of electron oscillations
20 p3464 A69-37407

- Bent beam ionization gage linearity from calibrated nude Modulated Bayard-Alpert /MBA/ gage, discussing buried collector and tabulated magnetron gages
22 p3950 A69-41216

BAYES THEOREM

- Bayesian method for optimizing controlled plant characteristics using self adaptive model
02 p0223 A69-11566

- Bayes estimator in decision directed adaptive detection problem, noting allowance for decision errors
05 p0740 A69-16583

- Bayesian reliability growth model with random variable parameters, discussing multimode failures
09 p1504 A69-21912

- Algorithm for calculating Bayes estimates for unsteady Gaussian signals separation in presence of unsteady Gaussian noise by least squares method
11 p1833 A69-24443

- Bayes theory and nonclassical variation method to solve optimal energy distribution available for identifying weak signals in background noise
14 p2410 A69-28817

- Bayesian theory to determine maximum a posteriori estimation algorithms for optimum bit synchronization in digital communication systems
14 p2413 A69-29496

- Probability diagnosis and prognosis for buffeting zones based on Bayes formula, determining clear air turbulence zones
15 p2648 A69-30645

- Algorithm for calculating recognition error by applying pattern vectors having two multivariate Gaussian distribution to optimum Bayes classifier
15 p2572 A69-31113

- Gas turbine components life prediction, using Weibull distribution and Bayes theorem to estimate probability of crack initiation
19 p3394 A69-36004

- Bayesian reliability demonstration tests for predetermining sample size producer and consumer risks for equipment with exponential and binomial failure distributions
19 p3327 A69-36039

- Sequential Bayes procedure demonstrating mean time to failure exceeding acceptable value with given confidence coefficient
19 p3327 A69-36040

- Bayesian confidence limits for systems reliability, considering exponential and unspecified life distribution subsystems
19 p3328 A69-36041

- Bayesian estimate of individual truck maintenance costs based on optimum replacement maintenance age
23 p4241 A69-41577

- Adaptive multicategory pattern classification system, using independent samples to form mean-square approximations to Bayes discriminant functions
24 p4285 A69-43134

BAYESIAN STATISTICS

U BAYES THEOREM

BBGKY HIERARCHY

- Modified truncation for BBGKY hierarchy for plasma, obtaining kinetic equation identical with Balescu-Lenard equation
08 p1360 A69-19990

BCC LATTICES

U BODY CENTERED CUBIC LATTICES

BCS THEORY

- BCS theory application to metallic modification of hydrogen for obtaining high temperature superconductor
04 p0642 A69-14680

- White dwarfs transfer to superconducting state, using BCS theory for superconducting transition temperature dependence on electron density
08 p1391 A69-20546

BE B

U EXPLORER 22 SATELLITE

BEACON EXPLORER B

U EXPLORER 22 SATELLITE

BEACON SATELLITES

NT EXPLORER 22 SATELLITE

- Ionospheric absorption measurements using beacon satellite emission compared to Kazantsev results
02 p0246 A69-12742

- Radio waves behavior along paths between satellites and earth, studying preferred frequency bands for spacecraft transmitters used as beacons
09 p1451 A69-21293

- Acoustic waves in ionosphere relation to electron content fluctuations detected from beacon satellite BE-B signals
12 p2065 A69-26104

- Radio waves behavior along paths between satellites and earth, studying preferred frequency bands for spacecraft transmitters used as beacons
15 p2570 A69-31227

- Electrooptical/photomultiplier/ detection of satellite beacon flashes, establishing time of flash and measuring pulse shape and energy received
17 p2919 A69-33083

BEACONS

NT RADAR BEACONS

NT RADIO BEACONS

- Multiple beam electronically steerable retrodirective antenna array with automatic inertialess compensation for altitude or beacon location
02 p0212 A69-12816

BEADS

- Free stream dispersion without permeation using nonporous glass beads and solutes, examining flow rate, particle size distribution, solute diffusivity, etc
22 p3894 A69-39873

BEAM COLUMNS

U BEAMS [SUPPORTS]

U COLUMNS [SUPPORTS]

BEAM CURRENTS

- High voltage mercury electron bombardment ion thruster power efficiency
[ECS PAPER 170D]
05 p0812 A69-16233

- Beam transmission in electron guns having single apertured control grid, studying ratio of target current to cathode current
05 p0734 A69-16566

- Plasma electron beam for welding, deriving beam current from secondary emission by ion bombardment, discussing gas pressure, equipment and applications
19 p3320 A69-35555

BEAM PLASMA AMPLIFIERS

- Interaction between surface waves propagating along plane plasma boundary and parallel low density electron beam, noting wave amplification and excitation
03 p0480 A69-14135

- Coupling electromagnetic power to beam plasma amplifiers without use of helices and cavities, discussing modes of interaction, gap coupling and Cerenkov coupling
09 p1463 A69-21805

- Parametric amplification in beam plasma system, analyzing amplification of electron current component dependent on second order terms of velocity and charge density
10 p1740 A69-23791

- Beam-plasma interactions by nonlinear Vlasov equation, describing amplification of longitudinal waves
14 p2493 A69-29692

BEAM SPLITTERS

- Glan-Thompson and Rochon prisms modified by replacing one of two calcite halves of cemented oriented birefringent crystals with glass
02 p0280 A69-11924

- Static beam deflection in beam foil spectroscopy for determining parent ionization stage of emitting ions
04 p0595 A69-14279

- Holograms volume depth increased by reference beam splitting or by photographing holograms on same plate in sequence
05 p0761 A69-15651

- Picosecond structure of low power laser signals using calcite beam splitter and potassium diphosphate second harmonic generator
09 p1516 A69-21742

- Holograms on photochrome films by split beam He-Ne laser using special mirror system
11 p1881 A69-24631

- Equal inclination interference fringes effects on laser beam reflection from plane parallel glass plates, evaluating angular distance between adjacent fringes
11 p1896 A69-24840

- Photodetector requirements for autocollimators with beam splitters, considering spectral characteristics, photoresponse, time constant, positioning, etc
14 p2447 A69-29326

- Holograms volume depth increased by reference beam splitting or by photographing holograms on same plate in sequence
16 p2791 A69-32508

- Multiple index high contrast holographic contouring technique compared with analogous multiple frequency system
23 p4164 A69-41628

BEAM SWITCHING

- Phase, frequency and amplitude scanning, noting array design and applications
01 p0049 A69-11348

- Phased array radar antennas emphasizing beam steering of transmitting linear array with number of phase shifters
01 p0049 A69-11390

- Electronic multibeam switching X band antenna system design with separate transmitting and receiving antennas for use on continuous wave surveillance radar
08 p1289 A69-20967

- Feed shift beam switch for radiometric measurements of astronomical objects emission at millimeter wavelengths
11 p1836 A69-24996

- Laser beam discrete deflection method using Wollaston prism and electro-optical switch for changing polarization plane
14 p2459 A69-29391

BEAM WAVEGUIDES

- Multiple beam waveguide and optical delay line capacity increase by transmitting Gaussian beams clearly resolved at receiver
04 p0579 A69-15446

- Characteristic waves in gas-dielectric beamguides, calculating attenuation dependence on frequency
05 p0736 A69-16783

- Diffractional crosstalk in optical beam waveguide during simultaneous multibeam transmission arising from beam coupling by aperture diffraction
07 p1100 A69-18648

- Brewster angle lenses for low cost low loss laser beam transmission system
07 p1148 A69-18863

- Beam wave scattering by small sphere, discussing dielectric constant and difference from plane wave
08 p1273 A69-20028

- Fabry-Perot resonator and beam waveguide systems for laser beams, noting mode coupling and separation in laser optical systems
09 p1518 A69-22125

- Light waves transmission and beam guidance, analyzing solid lens type guide and automatic light path stabilizer
09 p1518 A69-22130

- Algorithm for mean energy transmission coefficient of fundamental mode in beam guide with given inhomogeneities, discussing mode conversions
09 p1469 A69-22629

- Mean losses in quasi-optical communication lines due to random irregularities in performance of waveguide phase correctors connected in series, noting random phase aberrations effect
10 p1658 A69-23954

Radio wave field distortions by dielectric prisms in lens waveguides, discussing beam transformation, noting both geometrical optics effects and diffraction role
11 p1833 A69-24436

Limiting frequencies of inhomogeneously filled lossless rectangular waveguides and field states, using Maxwell equations
11 p1855 A69-25620

Focusing power of hyperbolic gas lens for light beam waveguides, noting temperature distribution measurements and pole separation
12 p2107 A69-26392

Electromagnetic field in idealized medium of uniformly curved gas lens for light beam waveguide, describing lens radius effects on incident beam spot
13 p2270 A69-27181

Low pass quasi-optical waveguide filters, using metal strips in dielectric material to obtain broad stopband and low dissipation loss
13 p2229 A69-27675

Iris beam waveguide transmission loss as function of irises alignment, iris frame width and guide axis curvature
13 p2233 A69-28070

Wave propagation in open periodic two dimensional iris waveguide and beam reconstruction by diffraction, considering existence and character of modal fields
16 p2753 A69-32394

Multibeam transmission in optical beam waveguides by simulation, discussing intensity profiles phase fronts and cross scattering
17 p2974 A69-33400

Space charge wave propagation induced by electron beam moving in annular waveguide, considering radiated field and current redistribution
23 p4124 A69-42034

BEAMS

Stability loss of beams analyzed under compression allowing for various creep conditions in loading and unloading regions, calculating time to failure
22 p4039 A69-39917

BEAMS [RADIATION]

NT ATOMIC BEAMS
NT ELECTRON BEAMS
NT GAMMA RAY BEAMS
NT ION BEAMS
NT LIGHT BEAMS
NT MOLECULAR BEAMS
NT NEUTRAL BEAMS
NT PARTICLE BEAMS
NT PHONON BEAMS
NT PHOTON BEAMS
NT PION BEAMS
NT PROTON BEAMS
NT RADAR BEAMS

Beam laser as frequency standard, considering wavelength and molecular transfer constraints imposed by technology limitations and frequency stability requirements
03 p0440 A69-13715

Current distribution in scanning rectangular array with all-directional constant sidelobe and narrowest beamwidth
04 p0570 A69-14302

Directivity and beamwidth determination of large scanning Dolph-Chebyshev arrays
04 p0570 A69-14303

Butler matrix-fed circular array for continuous 360 degree beam scanning
04 p0573 A69-14329

Lossless multiple beam forming device operational principles, noting parallel plate radial transmission line network construction
04 p0576 A69-14768

Parabolic antenna beam scanning by defocusing, calculating relationship between reflector and beam tilt angles
07 p1089 A69-18248

Capture of parametrically coupled waves by pulses and beams of pumping radiation in case of different group velocities directions
10 p1705 A69-23956

Fluctuations of beam wave propagating through locally homogeneous medium, considering amplitude and phase correlation and structure functions
12 p2032 A69-26855

Laser beam light pressure bending of incompressible liquid surface leading to beam self focusing in linear medium
14 p2461 A69-29674

Theory of field distribution in antenna aperture extended to scanning with desired shape beam
15 p2578 A69-30634

Electromagnetic beam propagation in anisotropic media, discussing quasi-optical beam divergence
17 p2925 A69-33845

Beam shape loss /BSL/ for electronically steerable array in search mode, determining optimum search beam locations from BSL computations
20 p3506 A69-37717

Transverse wave-beam interaction propagation in fast wave structure in finite homogeneous magneto-static field, deriving wave-beam equation for non-relativistic beams
21 p3672 A69-38435

Charged particles beam penetration effects produced in atmosphere, determining particle diffusion and trajectory using Spencer moments and Monte Carlo methods
21 p3709 A69-38502

Circular antenna arrays radiation pattern synthesis in moving medium relative to main beam, noting medium motion influence on pattern changes
22 p3915 A69-40706

Beam wave propagation in conducting hollow circular cylinder applied to shielding cylinders design for aperture antenna transmission
24 p4282 A69-42987

BEAMS [SUPPORTS]

NT BOX BEAMS
NT CANTILEVER BEAMS
NT CURVED BEAMS
NT I BEAMS
NT RECTANGULAR BEAMS

Structural analysis by direct moment distribution, Volume 1, covering statistically indeterminate structures formed of prismatic members
01 p0165 A69-10156

Interlayer slip in layered wood beams with nail joints analyzed in terms of small deflection theory
01 p0169 A69-10638

Discrete model for investigating beam vibration under various end conditions, determining natural frequency dependence on degrees of freedom
02 p0336 A69-11462

Dynamic behavior of elastoplastic beam column model with one degree of freedom subjected to axial compressive force
02 p0337 A69-11717

Optimal thin walled cross section of hollow beam for pure bending, taking into account stability requirements
02 p0340 A69-12054

Upper and lower bounds for eigenvalues of differential problem connected with transverse vibrations of wedge shaped simply supported beam
02 p0272 A69-12193

Timoshenko beam theory accuracy, defining deflection and rotation in terms of average values over cross section
04 p0675 A69-14593

Beam vibration problems with mixed response-excitation input information solved by recasting equations of motion
04 p0676 A69-14711

Rayleigh-Ritz finite element method for approximate solution of nonlinear energy functional describing large deflection bending behavior of uniform beam under point loads
05 p0833 A69-15711

Equation governing transverse vibration of beams with exponentially varying properties, expressing solution in terms of Bessel functions
05 p0835 A69-15873

Plastic moments calculation of continuous steel beams under various loading patterns
05 p0837 A69-16035

Resonant beam tuned vibration damping device, noting weight saving potential
[ASME PAPER 68-WA/GT-2]
05 p0837 A69-16138

Generation of crack propagation data on notched rotating beam specimens by interrupted stressing techniques
[ASME PAPER 68-WA/MET-3]
05 p0838 A69-16148

Impulse loaded elastic-plastic beam response approximate solutions based on uniqueness proof
[ASME PAPER 68-WA/APM-23]
05 p0840 A69-16188

Free vibrations of plates and beams of pyrolytic graphite type materials, analyzing transverse shear deformation and rotary inertia
[AIAA PAPER 69-55]
06 p1027 A69-18070

Transverse motion of embedded or free semiinfinite beam with given initial displacement and velocity, using potentials leading to integral equations
[ONERA-TP-653]
07 p1230 A69-18264

Linearized simple beams and columns theory for anisotropic materials, discussing flexural and extensional effects coupling in tension test
07 p1171 A69-18727

Thin walled symmetrical angle section beam stability under bending moment by section deformation or torsional buckling
08 p1410 A69-19892

Nonhomogeneity effect on transverse vibrational frequency of uniform beams
08 p1413 A69-20413

Transverse vibration of beam rigidly fastened at one end, using series expansion in terms of set of eigenfunctions
08 p1414 A69-20445

Conformal mapping method for flexure function determination, discussing shear coefficients for arbitrary cross section beams in Timoshenko beam theory
09 p1612 A69-21611

Uniform gravity load effect on buckling of beam continuously supported by soft foundation and subjected to uniform lateral load
09 p1615 A69-21927

Stress formulation of thermoelasticity in simply connected body, noting uniform temperature change influence on stress components
09 p1617 A69-22007

Forced vibrations of elastic beam covered by viscoelastic layer subjected to transverse harmonic excitation
10 p1800 A69-23241

Experimental evidence of validity of shear coefficient in Timoshenko beam theory
10 p1801 A69-23538

Transverse reinforcing straps effects on torsional stiffness and bending behavior of open cross section profile thin walled prismatic beams
10 p1802 A69-23890

Frequency response dynamics of beam type periodic structures on elastic supports typical in flight vehicle designs
[ASME PAPER 69-VIBR-17]
10 p1804 A69-24150

Damped steady state response of elastic foundation beam subjected to cyclic moving loads to determine load movement frequencies for natural frequency excitation
[ASME PAPER 69-VIBR-13]
10 p1806 A69-24166

Nonlinear large amplitude vibrations of flexible beam with pinned ends supported simply on rigid base noting frequencies, modes, waveforms and stress distribution
[ASME PAPER 69-VIBR-43]
10 p1807 A69-24181

Validity limits of formulas for critical buckling load for oscillating continuous beams found to be elastic buckling
11 p1969 A69-24349

Transverse beam natural vibration frequency evaluation method from Timoshenko theory
11 p1970 A69-25481

Vibration problem of supported beam elastically restrained against rotation at both ends solved by Hermitian and linear differential operators
11 p1976 A69-24794

Nonlinear free vibration of beams with clamped and supported ends subjected to axial load, considering symmetric and antisymmetric modes
11 p1983 A69-25024

Dynamic stability of elastic beam type structures, using electronic simulation based on finite element approach
11 p1986 A69-25344

Electric analogy technique for torsion and flexure functions of uniform beams with terminal loads, considering Neumann boundary value problem
11 p1995 A69-25649

Bending of weightless thin elastic beams clamped to circular template by external force
12 p2181 A69-26572

Dynamic stability of flexural free transverse vibrations of supported thin walled elastic beam with initial velocity distribution and parametric excitation
13 p2369 A69-28353

Orthonormal aspect on vibration modes for nonuniform beams, evaluating normalization for end conditions by using Rayleigh technique
14 p2534 A69-29319

Beam deflection equations having different rigidity moduli on each half span
15 p2705 A69-30417

Natural frequencies and modes of complex structures composed of beam elements, considering hysteretic damping for response and transmissibility
15 p2706 A69-30431

Deformation functions for finite beam analysis allowing continuity at nodes and accurate eigenvalues
15 p2710 A69-30869

Elastoplastic strains in thin walled beams subjected to oblique bending by mobile loads of coupled concentrated forces, calculating deflections and plastic region distribution
15 p2711 A69-30971

Oscillating beams lateral buckling allowing for torsional stress in determining critical load
15 p2712 A69-31015

Power spectral density response of uniform beams to random pressures, evaluating joint acceptance of systems with pressure field
[ASA PAPER SVT2]
15 p2713 A69-31143

Krylov functions determined by distribution theory and operational calculus, discussing deformations and statics of straight beams
15 p2715 A69-31475

Stress and deformation in cross section of beam during complex loading using steepest-descent method
16 p2873 A69-32132

Bending oscillations of semiinfinite beam with periodically changing length
16 p2876 A69-32298

Prestressed beams, columns and plates nonlinear response, statistical behavior and transverse cracking under axial compression, describing strength and stiffness
17 p3060 A69-33568

Equations in series form to describe composite beams behavior under nonuniform torsion
18 p3211 A69-34343

Sandwich beams optimal design determined for case of constraint on elastic deflection and for load factor at plastic collapse
18 p3218 A69-34623

Beam torsion nodal line displacement dependence on flexural and torsional bending frequency
18 p3223 A69-34998

Tension, bending and buckling torsion in thin walled beams described by extended beam model considered as one dimensional continuum
18 p3224 A69-35296

Vibration response approximation of three layer sandwich beam with nonlinear viscoelastic material core during flexural vibrations
20 p3619 A69-36910

Monograph on beam impact force and bending stresses during transverse impact, noting Bernoulli and Hertz theories application
20 p3628 A69-37922

Axial forces effects on dynamic load factors of beams under transverse impulsive loads, considering various end conditions
20 p3629 A69-38113

Natural oscillations of end-hinged solid beam with variable parameters and concentrated masses, determining natural frequencies
21 p3833 A69-38575

Natural frequency equations for torsional vibration of fixed/fixed and fixed/simply supported uniform thin walled beams of open section based on energy method
22 p4040 A69-39935

Sandwich beams interlaminar shear stress calculations, considering roles of moduli of elasticity and layers thickness relative to beam
22 p4041 A69-40080

Variational method using Hamilton principle and calculus of variations to determine elastic curve and internal forces in static or dynamic loaded beam
22 p4043 A69-40459

Elastic curve shape effects on volume of minimum weight uniformly strong beam under combined longitudinal and transverse bending
23 p4225 A69-41421

Minimum weight and optimal cross sections design for statically determinate and indeterminate shell and H beams, using variational method
23 p4225 A69-41421

Prismatic beam stress-strain state under steady temperature field, deriving stresses, displacements and elastic curve equations
23 p4227 A69-41708

Field transfer matrices for simultaneous treatment of free and forced vibrations and buckling through axially loaded Timoshenko beam
23 p4234 A69-42400

Central transverse impacts of sphere on free-free beams, investigating maximum strains variation with impact velocity by narrow band tuned circuit filter
23 p4235 A69-42455

Adhesive joints design with uniform shear stress for prestressing wood beams
24 p4323 A69-43425

BEAMSHAPING U COLLIMATION

BEARING [DIRECTION]

Bearing deviation in model HF transionospheric propagation with three dimensional electron density variation and no magnetic field
04 p0559 A69-15209

Expression derived for correlation function and power spectrum of bearing of set of point radiators, taking into account receiver internal noise
05 p0719 A69-16219

Earth dipole magnetic field effect on bearing deviation in HF transionospheric propagation analyzed by computer ray tracing
07 p1086 A69-19224

Ionospheric electron content gradients from Faraday rotation observations of radio beacon satellites for direction finding of HF radio waves
11 p1837 A69-25004

Spatial direction determination from simultaneous photographs of Echo 2 at Nikolaev and Helwan stations, using circle of simultaneity
12 p2068 A69-26427

Optimal direction finding systems based on bearing angle representation in multidimensional Markov process, considering white and interference noise
13 p2219 A69-27254

Bearing errors reduction in vertical loop HF direction finders for ionospherically propagated signals in dual channel system
14 p2413 A69-29493

Position determination from radio bearings using complex numbers, noting application to reconnaissance flight path
14 p2479 A69-29499

Bearing errors from radio beacons with rotating or multilobe radiation patterns
15 p2567 A69-30343

Geometric conditions selection in directions determination in satellite and rocket aided triangulation, deriving formulas for chords directions of earth ellipsoid
15 p2689 A69-30572

Space direction by compensation method of cosmic triangulation network, using laser and optical observations of artificial satellites
15 p2699 A69-31377

Direction defining radio beacons performance, discussing signal amplitude and phase comparison systems and Doppler techniques
17 p2918 A69-33028

Scale determination in spatial direction networks, using polygonal transverse measured along continental surfaces and Secor method over water surfaces
18 p3131 A69-35196

Cramer-Rao and split-beam tracker techniques compared for optimum bearing error attainable with linear passive sonar array in spatially incoherent noise environment
20 p3576 A69-37322

BEARING ALLOYS
Erosion damage of bearing alloy lining in thin lubricating oil film, considering Cu-Pb alloy and tin base white metal
01 p0094 A69-10313

Plain and rolling metal bearings manufacture and use, discussing materials structure and properties, operating conditions, lubrication, etc
11 p1903 A69-24517

BEARINGS
NT ANTIFRICTION BEARINGS
NT BALL BEARINGS
NT FOIL BEARINGS
NT GAS BEARINGS
NT JOURNAL BEARINGS
NT ROLLER BEARINGS
NT THRUST BEARINGS

Hollow rolling elements for reducing centrifugal load on high performance bearings, discussing production, fatigue life, etc
01 p0085 A69-10294

Forced oscillations of unbalanced rotor on elastic bearings with nonlinear characteristics investigated for resultant forces and amplitude using motion equations
01 p0170 A69-10824

Idealized slider bearings with Maxwell liquid as lubricant, analyzing elasticity effects on pressure, load capacity and friction
02 p0253 A69-12413

Amplitude-frequency characteristics of rotor mounted on hydrostatic bearings calculated by equations of dynamic compliance method
03 p0432 A69-12961

Hydrostatic bearings, hydraulic drive system and hydraulic braking system for radio telescope with 2550 tons moving weight
[ASME PAPER 68-WA/PEM-2]
05 p0743 A69-16147

Three dimensional reinforcement composites for gear and bearing applications with improved interlaminar shear strength, thermal and wear properties
08 p1340 A69-25059

Hypersonic slipper bearing problem in rocket boosted sleds, discussing flow model consisting of laminar stagnation region and boundary layers
[AIAA PAPER 68-736]
09 p1477 A69-22003

Operational errors of floating gyroscopes with hydrostatic unloading of bearings, establishing eccentricity tolerances, axes misalignment and temperature field nonuniformity
09 p1497 A69-22103

Centering force and initial rigidity of magnetically suspended bearings of integrating floating gyroscope with allowance for mutual inductance of exciting coils
09 p1497 A69-22104

Rational shape selection for magnetoconductors of centering elements of magnetically suspended bearings, studying effects on initial rigidity
09 p1497 A69-22105

Bearing deposition test for evaluating degradation characteristics of aircraft gas turbine engine lubricants
10 p1700 A69-24070

Hydropendulum bearing linear horizontal vibration effect on vertex vibration, analyzing zero initial phase using precession theory
10 p1697 A69-24086

Radial hydrostatic bearing parameters calculated by pressure distribution diagram in bipolar coordinates, obtaining equations of motion
11 p1892 A69-25341

Friction and wear characteristics of ceramics and cermets as bearing materials, with tabulation of room temperature hardness and maximum service temperatures
13 p2284 A69-27232

Asymptotic analysis for stability and vibration response of spherical squeeze-film hybrid bearing, obtaining perturbation solutions
[ASME PAPER 68-LUBS-37]
13 p2267 A69-27281

Critical rotation rates of homogeneous shaft with two bearings under tension, considering shaft mass, stretching force magnitude and console disk gyroscopical effect
13 p2269 A69-28323

Magnetic suspension device replacing mechanical bearings of inertial guidance systems gyro rotors, evaluating device strength and stability
14 p2479 A69-29492

Face seals for jet engine mainshaft bearing compartments, emphasizing oil film and gas film seals
[ASLE FICFS PREPRINT 28]
15 p2620 A69-30487

Analytical method for designing pressure circular bearings verified by experiments concerning loading capacity
16 p2792 A69-31560

Multipad externally pressurized spherical bearing fed with incompressible fluid for satellite attitude control systems tests
16 p2793 A69-31728

MHD pivoted slider bearing with convex pad surface under azimuthal magnetic field
21 p3733 A69-39744

Rigid shaft dynamics in hinged and elastic bearings, eliminating inaccuracy by limiting analysis to forced vibration
23 p4171 A69-42483

BEAT
U SYNCHRONISM
BEAT FREQUENCIES

Negative Faraday effect and Doppler line width measurements for He-Ne IR gas laser tube by producing beat frequencies in ring laser system
01 p0088 A69-10028

Laser longitudinal oscillation modes beat frequencies measurement by grouping photocurrent velocities by HF field containing photomultiplier cathode
03 p0440 A69-13265

Output and beat frequency of carbon dioxide laser with various resonator configurations realizing single mode operation
07 p1156 A69-19157

Helium-Ne laser beat frequencies between neighboring axial modes shifting linearly with inserted cavity loss
07 p1156 A69-19412

Carbon dioxide rotational constants from CW beat measurement in bulk GaAs mixer between carbon dioxide vibrational-rotational laser lines
12 p2105 A69-26311

Laser output power amplitude fluctuations effect on beat frequency stability for traveling waves in annular laser with broadened Doppler emission line
12 p2107 A69-26541

Submillimeter wave generated in ZnTe by difference frequency mixing of Q switched ruby laser, discussing beat power
[IEEE PAPER B-4] 14 p2457 A69-28927

Gas laser secondary modes emission and beat frequency spectrum widths, using results of Lamb lasers theory
15 p2633 A69-30121

Fluid flow velocity measurements by Doppler shift of laser light scattered from moving fluid, determining beat frequencies
15 p2616 A69-31291

Beat frequency measurements in far IR due to harmonic mixing of klystrons, discussing noise role
17 p3006 A69-33674

Automatic frequency control circuit for stabilizing beat emissions of coupled multifrequency gas lasers
21 p3738 A69-39079

Human response to visual beat phenomena by combining intermittent stimuli, considering brightness estimation
22 p3884 A69-40889

BED REST

Basal metabolism in humans restricted to prolonged bed rest, noting decreased oxygen consumption rates
02 p0197 A69-11497

Prolonged bed rest effect on brain bioelectrical activity from EEG reactions of subjects to acoustic signals followed by light signals
05 p0710 A69-16520

Physiological response of human skeleton to hypogravity and hypodynamics studied by bed rest experiments, suggesting disuse atrophy of bone
06 p0873 A69-17019

Human organism reaction to prolonged limitation of muscular activity during weightlessness simulated by bed rest, noting hypokinetic component of weightlessness
08 p1262 A69-19837

Prolonged bed rest effect on human myogenic tonus and proprioceptive reflexes, comparing test subjects with and without physical exercises
10 p1646 A69-23583

Combined effect of prolonged bed rest and acceleration exposure on human blood circulation, noting increased heart rate and arterial blood pressure
10 p1646 A69-23584

Neurological changes in men due to hypokinesia, analyzing tremor data, EEG recordings and stabilography fluctuations
10 p1647 A69-23585

Bed rest effect on orthostatic tolerance of patients with acute myocardial infarction and without heart failure
10 p1648 A69-24189

Motion coordination capacity of persons subjected to 40 days bed rest studied by dynamographic technique, discussing nature of slackening
17 p2906 A69-32937

Prolonged hypokinesia effect on human resistance to physical stress, noting prophylactic influence of physical exercises
17 p2907 A69-32939

Bedrest as analog of weightlessness, evaluating role of extravascular dehydration in postrecumbency orthostatism
17 p2909 A69-33179

Prolonged bed rest effect on brain bioelectrical activity from EEG reactions of subjects to acoustic signals followed by light signals
18 p3096 A69-34739

BEDS

Viscous liquid layer flow down inclined plane under boundary conditions, taking into account drag and penetration at porous bed surface
02 p0234 A69-12774

BEDS (PROCESS ENGINEERING)

Digital computer program for heat and mass transfer characteristics of spacecraft carbon dioxide adsorption beds, discussing surface pressure of adsorbent material
[AICHE PAPER 19C] 09 p1446 A69-21931

BEER LAW

Transfer equation and Bouguer-Lambert-Beer equation application to multiple light scattering in plane medium
14 p2487 A69-29663

BETTERES

Flour beetle under irradiation and weightlessness during space flight, analyzing effects on somatic wing development, germ cells and pupal period
06 p0876 A69-18177

Circadian rhythm in dermestid beetles *Trogoderma glabrum* Herbst as response to compulsory constant light and temperature conditions
15 p2557 A69-31469

X irradiation and temperature effects on flour beetle *Tribolium confusum* pupae, noting wing abnormalities and pupal stage duration
17 p2910 A69-33748

Physiological and somatic effects on insects of radiation source onboard biosatellite 2, discussing wing abnormalities in flour beetle
20 p3476 A69-37619

BEHAVIOR

NT DECONDITIONING

NT HUMAN BEHAVIOR

Hypothalamic motivational systems and stimulation, discussing behavior patterns and plasticity
09 p1444 A69-21310

Monkey behavior in high atmosphere under weightless conditions, discussing problems connected with biological measurements, logic systems and vibration protection
09 p1447 A69-22722

Squirrel monkeys escape behavior under centrifuge simulated gravity in excess of earth gravity
21 p3665 A69-39174

Abnormal biologic rhythm in rhesus monkeys associated with behavioral stress, noting brain temperature periodicities sensed with implanted extradural thermistor
24 p4261 A69-42708

Behavioral patterns and physiological parameters of medical leech *Hirudo medicinalis* determined in natural environment prior to biological experiment in space
24 p4268 A69-43402

BELGIUM

Secondary radar system chosen by EUROCONTROL Agency for civil air traffic control at Shannon and Brussels airports
15 p2571 A69-31501

BELL AIRCRAFT

U UH-1 HELICOPTER

U X-22A AIRCRAFT

BELL MILITARY AIRCRAFT

U MILITARY AIRCRAFT

BELLMAN THEORY

Differential pursuit games solved by integrating Bellman equation for value function and determining set of possible positions in game with prescribed duration
05 p0788 A69-16536

Cauchy problem for Bellman dynamic programming equation in automatic control time minimization
14 p2426 A69-29478

BELLOWS

Bel lows sealed valve for measurement of fluorine thermodynamic properties at moderately high pressures
09 p1493 A69-21428

Longitudinal vibrations induced by internal flow in metal bellows resembling vortex shedding excitations of elastically restrained cylinders, discussing spring mass mechanical model
[ASME PAPER 69-VIBR-5] 10 p1805 A69-24163

Syphon geometry influence on rigidity and strength determined using integrating Meissner type differential equations with finite difference schemes
19 p3358 A69-35849

BENARD CELLS

Relation between Rayleigh and dynamic Richardson numbers in atmospheric boundary layer in presence of cellular convection
09 p1491 A69-22709

Benard convective flow as function of Rayleigh and Taylor numbers in thin variable rotating silicone oil layer determined by flow photographs
13 p2377 A69-28172

Relation between Rayleigh and dynamic Richardson numbers in atmospheric boundary layer in presence of cellular convection
16 p2808 A69-32488

Benard convection cells analyzed by Boussinesq approximation and Schmidt-Liapunov method, obtaining boundary value problem branching solution
19 p3301 A69-36791

Radar observations of convective pattern types in clear atmosphere consisting of thermal- and Benard-like convection cells
20 p3573 A69-38059

BENCHES

U SEATS

BENDING

NT ELASTIC BENDING

Boundary value bending problem for anisotropic shells of revolution under asymmetrical loading solved by finite difference technique
01 p0165 A69-10088

Bending of micropolar plates using differential equations, considering transverse displacement and microrotation vector
01 p0167 A69-10324

Orthotropic plates bending and thermal stress, analyzing basic equations
01 p0168 A69-10416

Optimal thin walled cross section of hollow beam for pure bending, taking into account stability requirements
02 p0340 A69-12054

Elastic springback and residual stress distribution in sheet metal formed by bending determined as function of radius sheet thickness and stress-strain characteristics
08 p1319 A69-20005

Transverse reinforcing straps effects on torsional stiffness and bending behavior of open cross section profile thin walled prismatic beams
10 p1802 A69-23890

Elastic-plastic bending of rectangular plates with asymmetrically inhomogeneous material in plastic range, using modified Ritz method
14 p2533 A69-28984

Bending problem of anisotropic /nonorthotropic/ plates solved by method of small parameter
16 p2875 A69-32294

Buckling stresses in thin walled box girder under bending determined using stationary potential energy criterion
18 p3224 A69-35344

Keyway stresses in shafts under tension, bending and torsion, using frozen stress photoelastic technique
19 p3445 A69-36827

Rectangular plates bending boundary value problems, deriving formulas for plates with free edges
20 p3630 A69-38291

BENDING FATIGUE

Low cycle fatigue life of aluminum alloy in reversed biaxial bending
01 p0093 A69-10116

Stress peak distribution effects on random load fatigue investigated for one and two degree of freedom systems
01 p0172 A69-11355

Plastic fatigue life of steel under rotary bending, proposing fracture criterion based on strain amplitude for low cycle stress levels
02 p0346 A69-12421

Fracture toughness of Ni maraging steel weldments, using bending tests
[AIAA PAPER 68-507] 03 p0450 A69-13910

Fatigue strength reduction of structural steels fatigued in rotating bending after tensile deformation
03 p0450 A69-13916

Localized microstructural changes and fatigue crack propagation in cantilever type notched specimens of austenitic stainless steel under cyclic bending at constant load
06 p0943 A69-17237

Flexural fatigue of glass-reinforced thermoplastics as function of various parameters, discussing test for autogenous dissipative heating
08 p1337 A69-20481

Aluminum plates bending fatigue tests, discussing mechanical properties, structural failure, grain size, strain hardening, stress-strain-time relations, heat treatment, etc
10 p1711 A69-23356

Surface temperature rise of solution treated austenitic steel measured during double repeated rotating bending fatigue tests at room and elevated temperatures
10 p1711 A69-23393

Device for elastic-plastic circular bending with constant bending moment and angular strain for low cycle fatigue testing
15 p2583 A69-30207

Rotating bending fatigue tests on aluminum alloys based on statistical analysis for material strength
17 p3052 A69-32979

Analytical-statistical weight prediction to derive and apply correlation expression, illustrated with bending stress equation applied to aircraft wing group
[SAWE PAPER 810] 18 p3221 A69-34900

- Fatigue life testing apparatus with computerized simulation of random load maxima and minima, describing rotating bend test application
19 p3434 A69-35777
- Plane strain fracture toughness of high strength steels and Ti alloy from precracked notched bend test method
19 p3346 A69-36436
- Bending creep tests on fabricated Al alloy box beams under constant load and temperature using continuous deflection and strain measurement
21 p3842 A69-39309
- Rotational bending fatigue strength of plain and notched conventional and maraging steels, evaluating gas nitriding effects
24 p4335 A69-43802
- ### BENDING MOMENTS
- Thin curved circular tube under in-plane bending [ASME PAPER 68-PVP-12]
03 p0523 A69-12999
- Calculation method for surface aircraft structures by treating normal forces and bending moments as unknown values
04 p0677 A69-14839
- Pointwise limitation of field dislocation and bending moments in elastic plates
05 p0831 A69-15599
- Stress-strain state of shell having one end clamped and other under concentrated bending moments and concentrated force acting along generatrix solved by integral equation
05 p0843 A69-16681
- Post-wrinkling nonlinear behavior of conical shell of revolution subjected to bending loads [AIAA PAPER 69-90]
06 p1027 A69-18074
- Heat resistance of Ti-Al-Mo-Zr alloys analyzed by bend tests, discussing phase diagrams
07 p1163 A69-18779
- Thin walled symmetrical angle section beam stability under bending moment by section deformation or torsional buckling
08 p1410 A69-19892
- Plastic crack propagation in nonstrain hardening doubly grooved bending specimens with two surface slip, discussing crack angles, crack ductilities and fatigue striations
10 p1797 A69-23077
- Bending creep vacuum testing device for brittle materials at high temperatures, noting load variation capability
10 p1696 A69-23851
- Moment stresses effect on stress concentration in plates with common type hole, considering uniaxial and triaxial bending and torsion
11 p1971 A69-24646
- Elastic bending moments and shear forces uniformly loaded flat plate structures with rectangular symmetry, using collocation technique and complex variable methods
11 p1986 A69-25241
- Stress concentration near circular hole in plate during bending, showing dependence on material constant
12 p2178 A69-25999
- Clamped edge anisotropic elliptical plate bending under varying loads, assuming torsional rigidity bearing constant ratio to geometric mean of bending rigidities
12 p2180 A69-26269
- Lateral bending and two dimensional thermal stress in rectangular orthotropic plates, considering alternating direction implicit method
12 p2188 A69-27100
- Infinite cylindrical shell stability under circular load solved by linearization about bending moment stress state and Galerkin method
14 p2531 A69-28808
- Cylindrical shell bending subjected to internal pressure and force uniformly distributed on round section solved by numerical integration of differential equations
15 p2653 A69-31195
- Analogy between Timoshenko plate theory and moment theory of elasticity achieved by reducing Timoshenko equations to biharmonic and Helmholtz equation
15 p2715 A69-31205
- Strains in elastoplastic curved beam under bending obtained from approximating stress-strain diagram by parabola
17 p3056 A69-33192
- Buckling loads of homogeneous anisotropic plates of composite materials with simply supported boundary conditions, noting Kirchhoff-Love nondeformable normal hypothesis
20 p3628 A69-37776
- Plastic bending of thin walled pipes taking into account cross section flattening
21 p3835 A69-38868
- Photoclastic technique of stress-freezing and slicing to determine bending stresses in transversely loaded plate supported at corners
22 p4045 A69-40900
- Hinged circular cylindrical shells reinforcing ribs effect on deflection and bending moments, assuming external pressure application
23 p4229 A69-42001
- ### BENDING THEORY
- Equations of linear theory of anisotropic elastic plates including Reissner-Green bending equations
01 p0168 A69-10387
- Variable thickness circular annular disk bending in centrifugal force field, establishing dependence between angular velocity and axial pressure intensity
01 p0168 A69-10401
- Sheba family of shell elements for matrix displacement method applied to problems of thin shells under membrane and bending action
01 p0170 A69-10865
- Deflection of orthotropic sandwich plates with unequal facing thickness with edges subjected to uniform and concentrated loading
01 p0172 A69-11270
- Predeformations of thin walled elastic isotropic spherical shells analyzed using Vlasov shell bending theory
02 p0336 A69-11555
- Bending of freely supported plates of polygonal planforms under transverse load with aid of R functions
02 p0341 A69-12140
- Creep buckling of circular cylindrical shells under axial compression and bending, using Al alloy test specimens
03 p0523 A69-12995
- Thin curved circular tube under in-plane bending [ASME PAPER 68-PVP-12]
03 p0523 A69-12999
- Elastoplastic bending of plates with nonlinear stress-strain diagram
04 p0667 A69-14269
- Thermal stress determination in two dimensional problem of theory of elasticity, using stress simulation by thin plate bending
04 p0668 A69-14272
- Thin cantilevered plate theory extended to large inextensional deflections to account for geometry changes in bending moments [ASME PAPER 68-APM/BB]
04 p0670 A69-14401
- Conically bent plate cross section distortion analysis employing von Karman large deflection theory, noting effect of tapering [ASME PAPER 68-APM/Y]
04 p0670 A69-14402
- Timoshenko beam theory accuracy, defining deflection and rotation in terms of average values over cross section
04 p0675 A69-14593
- Plate thickness effect on bending of elastic plate with crack, investigating stress distribution
04 p0678 A69-14890
- Plate bending in presence of unsteady creep and with zero stress-strain state in middle surface solved by variational method
04 p0679 A69-14923
- Bending of rectangular plate with partial clamping, obtaining solution by superposition method
04 p0681 A69-15289
- Symmetrical bending of laterally loaded circular micropolar plates
04 p0682 A69-15291
- Bending theory for sandwich plates with layers having different elastic properties using asymptotic integration of three dimensional equations
04 p0684 A69-15534
- Rayleigh-Ritz finite element method for approximate solution of nonlinear energy functional describing large deflection bending behavior of uniform beam under point loads
05 p0833 A69-15711
- Bending equations for shallow elastic three layer asymmetric shell with different isotropic layers and transversely isotropic rigid filler at various temperatures
05 p0840 A69-16197
- Large displacement bending of rods for constant deformation cross section, negligible shearing forces and exponential stress-strain relation
05 p0843 A69-16682
- Stability of rectangular transversely isotropic plate hinged at three sides under uniform pressure applied to two opposite hinged sides
06 p1021 A69-17178
- Bending general instability of stiffened shallow orthotropic cylindrical shells, noting buckling stress and application to shell design for various loadings
06 p1022 A69-17369
- Power law taperings for minimizing peak to trough deflection of cross section of strip bent longitudinally into cylindrical surface
06 p1023 A69-17374
- Small bending stiffness effect on inflated torus and cylindrical shells under radial load for determining large space structure stiffness
06 p1024 A69-17607
- Antisymmetric cross ply and angle ply laminated plates deflection under transverse loading with coupling between bending and middle-plane extension
07 p1231 A69-18711
- Fundamental problems of plane elastostatics with stress couples reduced to solution of integral equations, noting uniqueness theorem in plate bending theory
07 p1233 A69-19328
- Stability and bending of flexible plates and shallow shells obeying hereditary relations solved by singular kernel functions
08 p1413 A69-20335
- Plane and three dimensional stress concentration studies involving asymmetrical stress tensors, noting contributions to moment theory of elasticity
08 p1419 A69-21177
- Axisymmetric elastoplastic bending theory for cylindrical shell by applying Saint Venant plasticity conditions, determining stress distribution
08 p1419 A69-21179
- Governing equations for bending of fixed isotropic circular sandwich plate subjected to eccentric concentrated load
09 p1615 A69-21926
- Two point boundary value problems solution for parameter dependent nonlinear differential equations, noting application to hinged rod bending
10 p1718 A69-22846
- Linear viscoelastic bending of anisotropic plates based on equation for Voigt plate, considering elliptic and rectangular plates
10 p1793 A69-22881
- Crack propagation in plates and shells subjected to bending and direct loading, noting plate analysis modification for crack touching on compression side
10 p1795 A69-23061
- Infinitesimal bending oscillations and/or responses of thin rotating disks applied to thin disk galaxies, discussing Magellanic Cloud passage near galactic center
10 p1786 A69-24110
- Three dimensional bending problem for thick isotropic plate with curvilinear hole and normal and tangential stress applied to edge of hole
11 p1973 A69-24657
- Two dimensional elasticity and plate bending theories for calculating elastic isotropic panels and thin reinforced plates
11 p1974 A69-24664
- Stress concentrations in bending of thin perforated plates, considering potential and vortex stresses due to edge effect
11 p1976 A69-24784
- Semiinfinite circular cylindrical shell buckling under axial load, computing forces, moments and displacements by thin shell equation
11 p1979 A69-24818
- Bending theory for truncated multilayer anisotropic conical shells, defining relations between displacements and external forces
11 p1984 A69-25141
- Bent plates elastoplastic stress-strain state determination by elastic solution and finite differences, considering linear strengthening under uniform distribution of load
11 p1985 A69-25175
- Maximum stress under bending for thin walled circular cylindrical shell stiffened with uniform stringers
11 p1987 A69-25380
- Bending of half strip rigidly fastened along short edge, constructing integral equation for normal stress at clamping, investigating corners singularities
11 p1996 A69-25734
- Bending of weightless thin elastic beams clamped to circular template by external force
12 p2181 A69-26572
- Mathematical bending theory for three layer elastic plates containing light or rigid fillers
12 p2182 A69-26678

Buckling loads for anisotropic fiber reinforced composite plates with strong bending membrane coupling terms
12 p2186 A69-26840

Bending state of shells of revolution due to edge effects using nonlinear stress strain relation
13 p2362 A69-27921

Theory, function generator routine and testing for six node 18 degree of freedom triangular element for plate bending
15 p2706 A69-30430

Stiffness matrix for refined triangular plate bending finite element, considering Kirchhoff theory
15 p2706 A69-30434

Stress concentration near circular nonreinforced hole at bending of transversely isotropic rectangular plate analyzed in terms of transverse shear theory
15 p2707 A69-30580

Bending theory of orthotropic plates with variable elastic modulus under transverse loads, utilizing stress-strain relations and Kirchhoff-Love hypothesis
15 p2708 A69-30661

Boundary layer solution in three dimensional bending for plate with curvilinear hole to study stress-strain state at hole and over entire plate
15 p2708 A69-30662

Equations for bending of elastic cantilever plate with parallelogram shape in oblique angle coordinate system, constructing functions satisfying Poisson conditions at contour
15 p2710 A69-30861

Stiffness matrix of polygonal finite plate bending element derived using assumed stress distribution
15 p2710 A69-30867

Linear bending theory of elastic anisotropic sandwich plates with strong and weak cores
15 p2713 A69-31025

Bending surface of shells under crosswise load analyzed by moiré method, considering rotating cylindrical surfaces
15 p2713 A69-31056

Bending theory for two layer plate made of isotropic material under sinusoidal load obtained by elasticity and classical theory based methods
15 p2714 A69-31198

Analogy between Timoshenko plate theory and moment theory of elasticity achieved by reducing Timoshenko equations to biharmonic and Helmholtz equation
15 p2715 A69-31205

Bending method for unfolded honeycomb cores shaping for curvilinear sandwich structures
16 p2794 A69-32006

Parabolic and cardioid plates bending under uniform load by using point matching technique
16 p2874 A69-32166

Transverse bending of asymmetric sandwich plates with rigid filler taking into account stresses and strains in filler
17 p3055 A69-33129

Fatigue crack propagation in thin aluminum alloy plates under plane bending using microscopic surface observation and electron fractography, noting role of aging conditions
17 p3061 A69-33677

Error estimation in thin elastic plate bending problem approximate solution by equal deflection lines method, constructing two sided bound for boundary value problems
17 p3062 A69-33713

Side force problem for shallow helicoidal shell, shown as static geometric analogy of pure bending problem, solved by applying analogy
[ASME PAPER 69-APM-11]
18 p3213 A69-34387

Uniform thickness rectangular plates bending with rigidly clamped or freely hinged edges solved by refined version on digital computer
18 p3215 A69-34535

Bending of rigid freely supported plastic plates under local axisymmetric dynamic load, discussing rectangular pulse effects and velocity fields
18 p3217 A69-34593

Pure plastic bending of wide strip, determining stress strain state and plastic strain energy during constrained bending, noting application to corrugated panels
19 p3324 A69-35833

Plate material Poisson ratio determined by application of holographic interferometry to plate pure bending deformation contour lines
19 p3312 A69-36206

Bending of normally loaded simply supported rectangular plates in large deflection range solved by nonlinear differential equations and minimum potential energy principle
19 p3445 A69-36828

Rectangular plate bending element corresponding to finite difference method use, deriving stiffness matrix from strain energy approximation
20 p3619 A69-36949

Clamped uniformly loaded rectangular plate large deflection elastic behavior approximate analysis, using perturbation method
20 p3620 A69-36998

Flat rectangular plates large deflection due to uniform lateral pressure and compressive edge loading analyzed through partial differential equations, difference equations and computer program
20 p3620 A69-37000

Acoustic and internal dampings in freely supported uniform beams of circular and rectangular section, showing frequency dependence and vacuum effect
20 p3620 A69-37062

Swept cantilever thin elastic plates bending analyzed by power series representing deflection in oblique coordinate system
20 p3621 A69-37207

Composite laminates in cylindrical bending, discussing classical laminated plate theory limitations by comparing boundary value problems to corresponding theory of elasticity solutions
20 p3626 A69-37760

Unbalanced cross-ply elliptic laminated plates with bending membrane coupling, analyzing membrane boundary conditions with clamping assumed
20 p3626 A69-37762

Transverse shear deformation effect on bending of laminated rectangular plates, obtaining solutions for bending deflections, flexural vibration frequencies and buckling loads
20 p3627 A69-37770

Monograph on beam impact force and bending stresses during transverse impact, noting Bernoulli and Hertz theories application
20 p3628 A69-37922

Soviet book on thin plates and shells bending and stability during creep covering analytical and numerical solutions for various structural elements
20 p3630 A69-38207

Plate bending theory modified for applying successive linear conjugates method to partially clamped isotropic plate and plate with circular hole
21 p3834 A69-38721

Multiple support wing deformations, obtaining bending equations solutions by matrix methods
21 p3835 A69-38872

Bending of circular plate into shell, using stress-strain relation in finite strain, solving differential equations and boundary conditions
21 p3836 A69-39005

Strain distribution on surface of adhesive bonded box beam in simple bending, using water based brittle coating and self adhesive strain gages
21 p3844 A69-39325

Natural frequency of thin plate subject to cylindrical bending, analyzing panel flutter by three mode approximation for large buckling deflection
22 p4045 A69-40821

Cylindrical shells bending by finite element /cylindrical strips/ method, considering shells of arbitrary shape and variable thickness
22 p4046 A69-40968

Curved rectangular elements stiffness matrices derived for finite element analysis of cylindrical shells bending
22 p4046 A69-40969

Ambartsumian deflection theory applied to axisymmetric bending problem for transversely isotropic circular plates
22 p4049 A69-41278

Vlasov thin shell theory extended for undamped bending, transforming partial differential equations and stress function into integral equation solvable by successive approximations
23 p4225 A69-41407

Warping of doubly supported submerged wings, calculating stress and strains due to bending and constrained torsion
23 p4225 A69-41423

Inflation effect on circular cylindrical cantilever beam subsequent response to bending loads, using theory of small deformations superimposed on large deformations
23 p4227 A69-41881

Green formula and fundamental solution for determining displacements and stresses in contour integral form for plate bending problems
23 p4230 A69-42002

Three layer plate transverse bending in linear presentation, reducing problem to two displacement functions determination
24 p4395 A69-42594

Circular plates axisymmetric nonlinear bending, using variational method to derive equilibrium equations and boundary conditions
24 p4399 A69-42989

Triangular plate bending element using Herrmann variational method, deriving matrices for finite elements
24 p4404 A69-43591

Single series solution for rectangular plate deflection under arbitrarily located concentrated load, considering monolithic slab beam connection case
24 p4404 A69-43593

BENDING VIBRATION

Forced flexural vibrations of elastic truss systems with allowance for hysteresis friction
03 p0432 A69-12953

Damping properties of glass fiber reinforced plastics measured by flexural vibrations
03 p0454 A69-13824

Natural frequencies and mode shapes of coupled bending vibrations of pretwisted rectangular cross section beams determined by Rayleigh-Ritz energy method
03 p0529 A69-13989

Bending-torsion mode of rotating tapered twisted turbomachine blade, analyzing coupled flexural and torsional vibrations effect on natural frequency
[ASME PAPER 68-WA/GT-6]
05 p0838 A69-16141

Resonant frequencies for beam type bending oscillations of thin walled rib-reinforced circular cylindrical shell freely supported at outermost ribs
05 p0841 A69-16204

Longitudinal structural vibration and lateral bending response mass and spring coupling in Saturn AS-502 during boost with longitudinal excitation by pogo effect
[AIAA PAPER 69-58]
06 p1019 A69-18204

Anomalous spacecraft OGO-D motion explained by open section boom thermally induced oscillations, discussing corrective measures
07 p1231 A69-18331

Hingeless fiberglass rotary wings dynamics, discussing effects of in-plane bending to flapping frequency ratio
[AIAA PAPER 69-204]
07 p1054 A69-19548

Rotatory inertia and shear deformation effects on natural frequency and bending mode shape in equations of motion of rotating turbomachine blade
[ASME PAPER 69-VIBR-50]
10 p1804 A69-24148

Supersonic flutter solutions using finite elements, analyzing rectangular plate bending elements, square simply supported and clamped panels, low aspect ratio configurations, etc
11 p1991 A69-25516

Sine series solution for flexural vibration of rectangular isotropic plates applied to free vibration of orthotropic plates
13 p2363 A69-28128

Dynamic characteristics of Clough-Tocher triangle for natural frequency of simply supported plate, noting bending elements
13 p2365 A69-28246

Flexural vibrations of unstiffened doubly symmetric cylindrical tubes, obtaining natural frequencies of simply supported rectangular tube
15 p2703 A69-30210

Calculation of natural twisting and bending vibrations of beam with characteristics varying along length
16 p2873 A69-32130

Bending vibratory motion instability of rotor on elastic shaft with uniform mass distribution along axis, using variational methods
16 p2875 A69-32249

Bending oscillations of semiinfinite beam with periodically changing length
16 p2876 A69-32298

Axisymmetric bending oscillations of thin circular plates of constant thickness with allowance for energy dissipation in material, analyzing resonance and phase amplitude characteristics
17 p3064 A69-33919

Stationary liquid under pressure effect on energy dissipation of rectilinear pipelines under pure bending
17 p2904 A69-33930

Damping properties of turbine blade materials subjected to transverse bending vibrations in vacuum and at high temperatures, including Ti alloys
17 p2990 A69-33932

Damping properties of multilayer coatings for aircraft structures analyzed on duralumin samples subjected to bending at room, elevated and low temperatures
17 p2993 A69-33941

Beam torsion nodal line displacement dependence on flexural and torsional bending frequency

18 p3223 A69-34998

Crack analysis in stiffened vibrating plate based on dynamic stress distribution, showing high bending stresses at intersection

18 p3223 A69-35168

General system of equations derived for nonaxisymmetric oscillations of elastic spherical shells, obtaining expressions for oscillations from torsion, tension and bending

21 p3839 A69-39199

Differential equations of motion and associated boundary condition for axisymmetric flexural vibration of cylindrically anisotropic circular plate, using variational calculus

23 p4228 A69-41911

Flexural vibrations of simply supported lipped I section of cylindrical tubes, considering free-edge boundary conditions

23 p4233 A69-42350

Iterative weighted least squares method for reconstructing time history of coupled rotation and flexural oscillations of Radio Astronomy Explorer satellite

24 p4394 A69-43291

Flexural vibrations of rectangular cross sectioned rings, solving characteristic value problem for finite circular cylindrical shell

24 p4404 A69-43629

BENDS [PHYSIOLOGY]

U DECOMPRESSION SICKNESS

BENZENE

Benzene quadrupole moment estimates from second virial coefficient data with polarizability in intermolecular potential function and from molecular susceptibility anisotropy

01 p0124 A69-10687

Benzene anion radical in solid solution ESR spectrum, noting removal of orbital degeneracy at 4.2 degrees K

03 p0382 A69-13379

Molecular benzene emission spectra excited by electron beams in RF modulated source, tabulating lifetime measurements

15 p2562 A69-30468

Cyclohexane and benzene anodic oxidation at fuel cell electrodes, noting cathodic desorption products as function of potential and reactant [ECS PAPER 330]

15 p2562 A69-31540

BERENICE ROCKET VEHICLE

Hypersonic flight test data of Berenice missile compared to wind tunnel test data, discussing in-flight flow separation, Mach-Reynolds torque, etc

10 p1632 A69-23842

BERGMAN OPERATOR

Bergman integral operator to solve second order differential equations with two independent variables

03 p0527 A69-13742

BERNOULLI THEOREM

Plasma equation of motion in external electromagnetic field analyzed as generalization of Bernoulli equation in relativistic MHD

03 p0476 A69-13385

BERNSTEIN ENERGY PRINCIPLE

Upper bounds for Bernstein-Kolmogoroff multidimensional inequalities, analyzing independent random vectors

11 p1910 A69-25698

Stability analysis of Kippenhahn-Schluter model of solar corona filaments against arbitrary perturbations treated in MHD approximation using Bernstein energy principle

20 p3588 A69-37544

BERYL

Cosmic radiation and hibernation physiopathology of human organism, noting beryl as radiation resisting agent in spacecraft design

06 p0874 A69-17645

BERYLLIUM

Hydrostatic pressure effects on mechanical properties of hot pressed, extruded and rolled polycrystalline beryllium sheet

01 p0092 A69-10059

Chemical vapor deposition of beryllium metal coatings noting thickness, purity and processing effects on surface properties

01 p0097 A69-10644

Beryllium propellants for space applications, considering composite solid propellant with powdered Be as fuel

02 p0303 A69-11763

Electron beam welding of beryllium, discussing procedures, weld quality and tensile strength efficiencies

02 p0252 A69-11863

Friction induced plastic deformation of Be-Co-Zn single crystals with HCP structure

02 p0254 A69-12627

Beryllium reflector distortion in Plum Brook Reactor due to neutron embrittlement and gas formation, noting material surveillance, replacement, etc

03 p0465 A69-13131

Beryllium assemblies for aerospace and nuclear requirements, emphasizing braze joining structural components and effective manufacturing methods [SAE PAPER 680651]

03 p0433 A69-13454

Beryllium chemical and mechanical machining in quantity production, examining salvage and safety precautions

[SAE PAPER 680649]

03 p0434 A69-13455

Beryllium aerospace applications, considering advantages vs disadvantages in systems engineering [SAE PAPER 680648]

03 p0444 A69-13456

Beryllium nondestructive tests, discussing eddy current inspection, ultrasonics, film radiography and scintillation

[SAE PAPER 680652]

03 p0444 A69-13456

Beryllium properties, metallurgy, alloys, fabrication and applications in guidance components, aerospace structures and nuclear reactors

04 p0614 A69-14586

Deformation and fracture of Be bicrystals grown by seeding and floating zone melting method from Be single crystal

06 p0942 A69-17225

Beryllium abundance in solar atmosphere from spectra observed at Oslo Solar Observatory

06 p1010 A69-17971

Polycrystalline beryllium specimens fabricated from powders, discussing initial powder particle size and distribution effects on microyield strength

07 p1168 A69-19598

Chemical conversion coatings and low temperature enamels preventing corrosive attack on beryllium parts in environments containing moisture, chloride ions and/or high temperature oxidizers

07 p1169 A69-19762

Solution annealing and aging time and temperature effects on precipitation in quenched and aged beryllium

08 p1330 A69-20008

Grain-size refinement of beryllium castings and extrusions after compression in pressure chamber, determining effect on ductility

08 p1330 A69-20013

Strong p-type conductivity of silicon doped with beryllium by thermal diffusion, giving electrical and optical measurements

09 p1556 A69-21652

Forging techniques for forming Be into cylinders, rings, shafts and disks, investigating controlled texture forging for turbine engine components

09 p1504 A69-22073

Electron fractographic study of fatigue cracks in wrought beryllium sheet, noting transgranular and intergranular modes on fracture surface

09 p1500 A69-22324

Specific heat dependence of beryllium at low temperatures on sample impurities, considering Debye temperature

09 p1527 A69-22399

Cepheid variable and F and G stars observed for neutral lithium line, searching for resonance lines of ionized beryllium in similar stars

09 p1604 A69-22402

Metal composites of Ni or Mo fibers in Be matrix, discussing chemical compatibility in terms of reactions, solid solubility and diffusion at various temperatures

10 p1707 A69-22991

Model explaining intergranular crack initiation parallel to pulling axis in samples of spun beryllium broken under pressure

10 p1708 A69-22996

Electronic properties of beryllium doped silicon studied with IR absorption spectroscopy and electrical measurements, describing Be thermal diffusion

10 p1747 A69-23989

Early F stars Li/Be abundance ratios estimation from change in solar Be abundance, discussing stellar Li isotopes ratios

10 p1785 A69-24099

Beryllium properties and processing including magnesian reduction, powder purity, oxygen content, grain size and temperature effects on mechanical properties

11 p1904 A69-24897

Refractory cone models made of copper and Co coated Be for force tests in high enthalpy hypersonic arc tunnels at high simulated attitudes

12 p2059 A69-26796

Beryllium single crystals c axis compression behavior at three purity levels under hydrostatic pressures

13 p2279 A69-27760

Book on oxidation and shielding of beryllium in gas media for nuclear and aircraft technology

13 p2280 A69-27927

Adsorption of N, H, O and CO on thick vapor deposited Be films at room temperature

13 p2322 A69-28017

Rolled sheets from beryllium scrap converted into vacuum cast ingots, discussing preparation techniques

13 p2281 A69-28160

Electrolytic and mechanical polishing techniques for metallographic specimens of beryllium

13 p2281 A69-28161

High purity beryllium dynamic tests, determining Hugoniot equation of state, shock profile and spall threshold/onset of microcracking/for elastic pulses [AIAA PAPER 69-360]

13 p2283 A69-28293

Be billets fabrication from powders by cold hydrostatic pressing and pressureless sintering, noting hardness, density and grain size dependence on temperature

14 p2465 A69-29681

Plasma electron temperature determination by line intensity ratio of beryllium-like ions, noting excitation functions

14 p2496 A69-29789

Corrosion prevention in beryllium, testing conversion coatings and low fired porcelain enamels under various humidity and temperature conditions

14 p2466 A69-29939

Beryllium brake disks use on C-5A aircraft, comparing size, weight and peak temperature with steel structure

15 p2639 A69-30591

Beryllium production, properties and technology, discussing ductility, welding and soldering problems, temperature effects, etc

16 p2793 A69-31788

Combustion of pulse heated single Al and Be particles in various oxidizers [WSCI PAPER 69-2]

16 p2830 A69-32343

Creep tests on polycrystalline Be and Be alloy at various temperatures and stresses

17 p2986 A69-32912

Book on high purity beryllium metallurgy for nuclear reactor applications covering physical properties, crystallography, thermodynamics, production methods, etc

17 p2986 A69-32952

Full circle Be brake disks in C-5 aircraft, discussing properties at elevated temperature and fastening of friction lining

18 p3095 A69-35424

Beryllium wire reinforced Al composites, discussing layup techniques and coated filament advantages

19 p3340 A69-35508

Beryllium bonding, evaluating various surface preparations and adhesives

19 p3320 A69-35561

Be and BeAl alloy stress corrosion behavior in aqueous NaCl solution, discussing metallography and electron fractography

19 p3341 A69-35572

Be diffusion during vapor phase saturation of W, Mo, Nb and Ta, noting time and temperature dependence of layer thickness

20 p3549 A69-37364

Neutron activation analysis for oxygen determination in Be by gamma emission intensity from nitrogen 16, noting bound oxygen

20 p3544 A69-37811

Galvanostatic anodic and cathodic currents effect on stress corrosion of Be sheet in aerated synthetic sea water at 72 F

21 p3747 A69-39436

Forged corrosion in aqueous salt environment at various temperatures in unstressed and stressed conditions, considering Be usability in turbomachinery

21 p3749 A69-39493

Stellar lithium and beryllium, discussing production and destruction processes in stellar atmospheres and abundance in various stars

21 p3810 A69-39505

Plane strain fracture toughness of S-200 grade Be for 77-533 K temperature range, noting effects of loading, heat treatment and neutron irradiation

23 p4178 A69-42450

Surface chemistry effect on physical properties of pressure sintered Be metal, suggesting surface alloying approach by powder metallurgical techniques
24 p4332 A69-42963

Beryllium R and D emphasizing brittleness and fracture toughness for safe working stress levels of structurally loaded components
24 p4332 A69-43208

BERYLLIUM 7

Beryllium diffusion coefficients in Zr and Ti bcc phases, using radioactive beryllium 7 at high temperatures
18 p3157 A69-35251

Be 7 stability in galactic cosmic radiation, noting lifetime dependence on electron density around nucleus
18 p3189 A69-35482

BERYLLIUM 10

Cosmic ray produced Be 10 in iron meteorites for terrestrial age determination, considering Cl 36 and rare gas analysis
19 p3412 A69-36104

BERYLLIUM ALLOYS

Metallographic and radiographic analysis of zirconium corner in Zr-Be-Nb system, discussing phase transformation during quenching
02 p0262 A69-11843

Beryllium properties, metallurgy, alloys, fabrication and applications in guidance components, aerospace structures and nuclear reactors
04 p0614 A69-14586

VTOL aircraft materials for improved lightness, durability and cost, noting Be alloys, filamentary composite materials and future problems
05 p0702 A69-15962

Beryllium base cermets corrosion resistance increased in moist carbon dioxide at 700 C
10 p1711 A69-23338

Lightly loaded truss structures fabricated from Be, Be-Al alloy and uniaxial B filament reinforced epoxy tubing for unmanned spacecraft applications
19 p3340 A69-35504

Be/Al cast duplex alloy with Be embedded as discrete particles in Al matrix, detailing fabrication techniques and mechanical properties
19 p3340 A69-35524

Be and BeAl alloy stress corrosion behavior in aqueous NaCl solution, discussing metallography and electron fractography
19 p3341 A69-35572

Structural aerospace materials development with emphasis on Be and Ti alloys, discussing material combinations and composites
19 p3345 A69-36319

BERYLLIUM COMPOUNDS

NT BERYL

Beryllium cermet compositions, discussing beryllium oxide content, mechanical strength and elastic and shear moduli
10 p1711 A69-23334

BERYLLIUM FLUORIDES

Beryllium fluoride heat of formation from heat of combustion of Be-polytetrafluoroethylene mixture in fluorine
21 p3853 A69-39703

BERYLLIUM HYDRIDES

Linear combination of atomic orbitals-molecular orbitals self consistent fields calculation on beryllium dihydride, using Gaussian basis functions
05 p0811 A69-15910

BERYLLIUM ISOTOPES

Be I and Be II lines in solar spectra show no evidence for Be 7 and Be 10 in solar atmosphere
04 p0655 A69-14666

Formation cross sections of Li, Be and B isotopes produced from oxygen 16 spallation via high energy protons related to astrophysics and cosmic ray physics
14 p2512 A69-28968

Nonresonant and resonant cross sections for gamma ray transitions involving isobaric-spin mixed states in Be 8
22 p3987 A69-41043

BERYLLIUM OXIDES

Optical absorption index for molten beryllium oxide based on measurements of small beryllium/ solid propellant rocket motor exhaust plumes
08 p1351 A69-20149

Tensile deformation properties of copper single crystals strengthened by fine dispersions of BeO particles
08 p1334 A69-20575

Beryllium base cermets corrosion resistance increased in moist carbon dioxide at 700 C
10 p1711 A69-23338

Thermal conductivity of polycrystalline beryllium oxide as function of temperature and pressure in argon or helium atmosphere, discussing heat transfer mechanism
11 p1906 A69-25225

Beryllium oxide semiconductor thermistor for temperatures to 2500 K, discussing construction materials and test results
12 p2092 A69-26478

Polycrystalline BeO sound velocities determined as function of pressure and temperature using pulse superposition method
16 p2802 A69-32338

BESSEL FUNCTIONS

NT HANKEL FUNCTIONS

Tearing mode instability in Bessel function model preliminary to study of tearing mode in diffuse pinches
05 p0799 A69-15615

Equation governing transverse vibration of beams with exponentially varying properties, expressing solution in terms of Bessel functions
05 p0835 A69-15873

Asymptotic computation and graphical display of imaginary mu-zeros of combinations of cross product Bessel functions
05 p0836 A69-15874

Analytic integration of Langmuir equation for spherical space charge flow obtained in terms of Airy equation or Bessel functions solution
07 p1115 A69-18864

Stokes phenomenon, considering continuity solution of differential equations across Stokes lines
07 p1174 A69-19220

Horizontally moving body wake scattering cross section calculated with allowance for sphericity of incident and scattered radio waves, using Bessel functions
12 p2031 A69-26699

Electromagnetic step-function plane waves propagation in ionosphere using Fourier transform and Bessel functions
12 p2034 A69-27132

Book on Bessel functions with physical applications covering solution of Bessel and associated equations, integral representations, Fourier-Bessel series, Hankel transforms, etc
15 p2643 A69-30037

Neumann-Lommel formula generalization for obtaining Bessel functions product sums illustrated with FM wave distortion calculation in multichannel system
18 p3101 A69-34625

Bessel functions new addition theorem suggested from mathematical investigation of ideal discriminator output voltage
19 p3266 A69-35767

Bessel function applied to unsteady axisymmetric problem of heat conduction in thermally controlled coaxial cylinders with different physical properties
19 p3448 A69-35981

Stochastic motion in linear lattice of coupled harmonic oscillators analyzed by Schroedinger coordinates and Bessel functions for time behavior, energy flow and impurity effect
19 p3374 A69-36752

Approximation of linear unsteady dynamic systems at finite time interval expressed in Bessel or degenerate hypergeometric functions
22 p3917 A69-40616

BETA PARTICLES

Magnetic field effect on neutron beta decay rate, considering calculations applicability to elementary particle production
15 p2690 A69-30694

Low level beta, X and gamma radiation detector incorporating Geiger, proportional and scintillation counting features in various modes suiting radionuclide decay scheme
17 p2975 A69-33747

Silicon junction radiation detectors applications in cryogenics, measuring junction response to beta particles at low temperatures
20 p3546 A69-38275

Air ionization and beta and gamma dose rate measurements for natural radiation from cosmic rays compared to nuclear weapons tests fallout, considering biological effects
22 p4007 A69-40915

BETATRONS

Betatrions for nondestructive quality control for materials and products under special conditions
18 p3136 A69-34779

BIAS

NT RESPONSE BIAS

Red, blue and no bias light effects on spectral response of copper sulfide-cadmium sulfide cell, using model incorporating photoconductive layer
05 p0808 A69-16358

Substrate bias influence on AC characteristics of MOS transistors used in variable resistor region
07 p1102 A69-18860

Self biasing influence on tunnel diode amplifiers dynamic range, determining limiting conditions for amplitude characteristics
09 p1469 A69-22633

Bias elimination in intensity pattern of incoherent holograms by introducing narrow band time modulation of light
11 p1885 A69-24846

Bias circuit LF oscillations in short Gunn devices, analyzing sinusoidal and relaxation oscillations and stable bias in terms of terminal I-V characteristics
12 p2041 A69-26628

Ring laser bias in angular rotation measurement using optical phase shifters
21 p3735 A69-38651

Thermistor radiation detectors bias condition defined from equations and optimized in terms of responsivity, time constant and noise
21 p3727 A69-39782

Minimum bias criteria for selecting data fitting curves, allowing for unknown true equation in improving data predictability
22 p3975 A69-40332

[AIAA PAPER 69-950]

BIBLIOGRAPHIES

Optimal structural design since 1962
01 p0170 A69-10814

IR reflection and transmission properties of various semiconductor compounds, rubidium halides, strontium titanate, BN and Te
01 p0139 A69-10840

Satellite geodetic literature in U.S.S.R., discussing space triangulation geometric method and dynamic method for earth parameters and gravitational field
01 p0067 A69-10951

Bibliography of interstellar travel and communication
03 p0510 A69-13397

Bibliography on applications satellites covering communication satellites, technology, astronautical science, photography, etc
03 p0535 A69-13429

Stability derivative estimation at subsonic speeds for preliminary design engineer
05 p0700 A69-15545

Subject classification bibliography for thermal contact resistance
[ASME PAPER 68-WA/HT-18]
05 p0847 A69-16122

Bibliography on Gunn effect theory, experimental results and applications
05 p0810 A69-16565

Book on fluidics applications analyzing world literature dealing with fluidic devices
06 p0869 A69-17171

Heat transfer bibliography covering boundary layer, phase flow, conduction, liquid metals, low density, measurement techniques, natural convection, radiation, thermodynamic and transport properties, etc
06 p1033 A69-17558

Bibliography of astronomical literature, Volume 67
09 p1602 A69-22223

Supplementary bibliography of papers on metal insulator semiconductor theory and technology
10 p1743 A69-23169

Heat and humidity endurance limits in man
10 p1645 A69-23494

Alphabetical listing of references and abstracts of papers on acoustical holography
10 p1696 A69-23552

Bibliography of reports and papers on space sciences and research activities of national institutions of COSPAR members/1966-1967/
10 p1784 A69-24001

World literature on boundary lubrication for machine design, giving 2711 abstracts and extensive bibliographies
11 p1891 A69-24925

Bibliography of books and periodicals concerning heat transfer classified under applications, boundary layer, channel flow, conduction, liquid metals, MHD, etc
13 p2379 A69-28341

Bibliographies for aeronautics and astronautics /AIAA/ technical disciplines
14 p2542 A69-29510

Bibliography on laser applications in plasma physics covering plasma diagnostics and production
14 p2498 A69-29842

Bibliography of Soviet books and articles on heat and mass transfer covering thermodynamics, heat conduction, convection and radiation, etc
14 p2540 A69-29900

Dynamic seals literature review covering contact, mechanical, fixed clearance, film riding and elastomeric seals, systems and materials
[ASLE FICFS PREPRINT 29]
15 p2620 A69-30490

Lubrication and lubrication systems literature including compressible and incompressible fluid films, automotive, bearing, gear, friction, wear and boundary lubrication, seals and sealing systems
15 p2628 A69-30900

Soviet bibliography of heat and mass transfer covering thermodynamics, aerohydrodynamics, MHD, transfer processes in various media, etc
16 p2878 A69-31960

Laser induced gas breakdown covering breakdown mechanism and plasma expansion and decay, with bibliography
17 p2980 A69-33026

BICARBONATES U CARBONATES

BICRYSTALS

Slip band continuity across grain boundaries in aluminum bicrystals reexamined for geometrical criteria
01 p0095 A69-10607

Deformation and fracture of Be bicrystals grown by seeding and floating zone melting method from Be single crystal
06 p0942 A69-17225

Creep behavior of oriented Al bicrystals, emphasizing intergranular creep types and crystal orientation
17 p2985 A69-32906

Aluminum oxide relative grain boundary energy and surface diffusion coefficient, considering thermal grooving of bicrystals with symmetrical tilt boundaries
17 p2993 A69-34191

BIHARMONIC EQUATIONS

Digital computer method for Navier-Stokes equation in prototype cavity flow problems, noting applications to biharmonic problems
08 p1305 A69-20831

Partial derivatives of harmonic and biharmonic functions at surface of cylinder for three dimensional problem in elasticity theory, considering displacement vector
11 p1976 A69-24777

Stress in elastic cylinder under thermal expansion with one end clamped expressed by series expansion of biharmonic function using least squares method
14 p2534 A69-29284

Infinite strip plane elastic problem reduced to Hilbert problem by employing multiply connected region and biharmonic solutions
15 p2707 A69-30625

BILLETS

Be billets fabrication from powders by cold hydrostatic pressing and pressureless sintering, noting hardness, density and grain size dependence on temperature
14 p2465 A69-29681

BIMETALS

Temperature distributions and thermal stresses in bimetallic I-beam structures with dissimilar materials for skins and webs and with kinetic heating inputs
06 p1024 A69-17610

Compressor inlet temperature /CIT/ sensors, describing bimetal strip and liquid expansion aspirated types
[ASME PAPER 69-GT-18]
09 p1571 A69-22499

Screw dislocation interaction with partially bonded bimetallic interface, using isotropic elastic continuum approximation
10 p1802 A69-24027

Arc welding aluminum to steel using bimetal transition insert piece
11 p1891 A69-24929

Transition zone structure and phase composition in Ti/stainless steel bimetal as function of rolling conditions and heat treatment
13 p2283 A69-28490

Solid rocket motor ignition system based on exothermic alloying of bimetallic wire constituents
[AIAA PAPER 69-425]
16 p2832 A69-32653

Molten iron plane melt flow duration and mass in bimetallic castings production determined using nomogram
18 p3149 A69-35289

Annealing effect on transition zone cohesion strength in two layer steel-titanium sheet, investigating role of TiC formation
18 p3159 A69-35450

Fatigue resistance of bimetallic sheets of steel and Al alloys by fatigue resonant machine, analyzing lifetime distribution and failure probability
21 p3835 A69-38773

BINARY ALLOYS

Field ion microscope study of imaging solute atoms of dilute Pt-based W, Pd, Co, Ni and Au alloys
01 p0092 A69-10055

Thermoelectric properties of Ge-Te-GaTe system, analyzing phase diagrams, solid solution formation, substitutions and zone structure influence
01 p0138 A69-10404

Metastable phases of binary zirconium-niobium system, defining decomposition of solid solution in cooling
05 p0781 A69-16614

Ion nitrided binary iron alloys and steels electron microscopic studies reveal particle formation during hardenings
06 p0942 A69-17224

Austenitic Fe-Ti alloys sulfur solubility and internal sulfidation rate computed, noting stronger Ti-S interaction with temperature decrease and sulfur diffusion role
06 p0942 A69-17226

Transmission electron microscopy used to study phase transformations in Ti-Mo and Ti-V alloys, determining crystal structures
06 p0943 A69-17230

Corrosion resistance and mechanical properties of Ti-Mo alloy, developing processing methods for forgings, bars and sheets
07 p1163 A69-18781

Components relationships in binary phase diagrams of III a and VI a transition metals on basis of electronic structure
08 p1331 A69-20191

Binary vanadium alloys property change regularities using alloying elements
08 p1333 A69-20439

Carbidothemic production of metals and binary and ternary alloys, discussing eutectic properties
09 p1514 A69-22731

Omega phase transformation in binary and ternary Zr alloys after water quenching from within /alpha plus beta/ phase region
10 p1707 A69-22988

Transgranular stress corrosion crack propagation in thin sheet single phase magnesium-aluminum alloy
10 p1710 A69-23086

Silicon particle sizes in Al-Si system investigated for interactions with dislocations as function of strain and for effect in dispersion hardening
10 p1714 A69-23980

Vacuum deposition of Cr-Al film on Ni-Mo alloys, describing operating pressure, temperature and film thickness
10 p1715 A69-24013

Solid solution decomposition effect on binary Mg alloys recrystallization temperature containing Al and Nd, using X ray and microstructural analysis
11 p1902 A69-24272

Wetting and sessile drop contact angles between liquid binary Al alloys and solid Be, boron carbide and graphite under vacuum and in He
[ACS PAPER 15-C-68F]
12 p2114 A69-26301

Alloying effect on surface oxides determined from photoelectric polarization measurements for Ti- Nb and Ti-Ni
13 p2275 A69-27292

Martensite transformation in Ti-Cr binary alloys by thin foil electron microscopy, noting crystallographic theory
13 p2276 A69-27369

Gamma prime phase coherent equilibrium solubilities in Ni alloys of Al, Si and Ti from magnetic studies of particle coarsening and electron metallographic observations
13 p2276 A69-27370

Cleavage plane in stress corrosion cracking of alpha phase Ti-Al alloys
13 p2283 A69-28189

Homogeneous NbC and TiC specimens physical properties, discussing current carrier density and mobility dependence on composition
14 p2462 A69-28976

Monograph on mechanical behavior of crystalline solids at elevated temperatures, discussing creep properties of metals, solid solutions and two phase alloys
14 p2465 A69-29749

Co base high temperature binary alloys microstructure, investigating diffusion coefficients, stacking faults, vacancies, etc
14 p2465 A69-29890

Mu phase lattice constants and cell volume in Nb-Zn system
15 p2636 A69-30086

Crystal structures of intermediate phases in La-Co and Nd-Co systems by powder X ray diffraction technique
15 p2667 A69-30087

Chromium-cerium phase diagram determined by differential thermal, metallographic and X ray structural analysis
15 p2640 A69-30666

CR-B binary system phase diagram including lattice parameters, temperature of peritectic decomposition and characteristics of alloys
15 p2641 A69-31185

Electrical conductivity and thermoelectromotive force of bismuth telluride and bismuth telluride-bismuth selenide alloys obtained by sintering, hot pressing and annealing
15 p2670 A69-31248

Orientation relationships between phases in Co- TaC pseudobinary eutectic alloy, discussing Co fcc-hcp allotropic transformation
[ONERA-TP-714]
17 p2988 A69-33395

Thermionic emission parameters for faces of W- Re, Mo-Re and Ta-Mo single crystals determined by Richardson method of straight lines
17 p3015 A69-33630

Be/Al cast duplex alloy with Be embedded as discrete particles in Al matrix, detailing fabrication techniques and mechanical properties
19 p3340 A69-35524

Heat treatment effects on mechanical properties of Ti-Fe and Ti-Fe-Al alloys
19 p3344 A69-36151

Glassy semiconductors from metallic alloy binary and ternary systems of sulfide, selenide and telluride noting properties
19 p3392 A69-36641

Elements substitution for Al in gamma prime of Ni-Al alloy to change aged hardness by gamma prime mismatch and coherency strains
20 p3558 A69-36963

Autoradiographic methods for diffusion and phase transformation in Fe-Cr alloys by application of photographic emulsion with tracer element on metal surface
20 p3561 A69-37416

Crystallographic relations between mother gamma phase and bulk martensitic structure of Fe-Ni alloys with less than 20 percent Ni, using radioisotopes
20 p3562 A69-37781

WC-Co alloys microstructure and microproperties, considering individual phase behavior and grain-solid solution interactions
20 p3564 A69-38246

Ti emission and absorption K spectra in Ti-Al intermetallics, suggesting hypothesis concerning long wave and fundamental subbands origin
21 p3749 A69-39787

V systems applications and phase diagrams, discussing binary metallic systems, Kurnakov law, alloy properties dependence on composition, superconductivity, melting point, etc
22 p3968 A69-39887

Recovery process observation in pure binary Al-Cu alloy and commercial Al-Cu-Mg-Pb alloy, noting electron microscope applicability
22 p3968 A69-40062

Ellipsometer measurements for oxidation rates of binary Ti-Al alloys in vacuum and in pure and premixed gases, using in situ test cell
24 p4316 A69-43322

BINARY CODES

Serial BCD binary coder design, using Karnaugh diagrams to minimize synchronous and asynchronous counter stages
09 p1467 A69-22579

Decoding procedure for error locating binary code indicating location of single subblock containing errors in code word, employing feedback shift registers
11 p1857 A69-24549

Compression capabilities of combined frequency and phase shift keying in radar and sonar pulse modulation using binary noise codes
15 p2568 A69-30628

Algorithm for assigning binary codes to inputs, internal states and outputs for sequential machines by threshold logic
18 p3105 A69-34618

Optimum receiver design for binary coded data detection in two channel space communication system,
18 p3105 A69-34618

discussing phase error distribution and optimum decision function

19 p3275 A69-36286

BINARY DATA

Regenerative digital transmission system error, representing memory of binary regenerative channel with Markov model

01 p0027 A69-10249

Reliability of binary message in Gaussian noise impaired by amplitude limiting in case of evaluation by integration

01 p0031 A69-10736

Noncoherent binary communication detector for slow selective fading channel with additive quasi-stationary noise based on mathematical procedure of nonparametric classification

03 p0390 A69-13215

Shift and add property for majority combined binary composite codes with linear maximal sequences

03 p0391 A69-13229

Upper and lower bounds on mean reduced error of pulse code telemetering systems operating by binary code

03 p0396 A69-13687

Optimum conditions for signal analysis determined for symmetrical binary communications channel with unknown signal phase

04 p0556 A69-14492

Phase locked loop demodulator with quadrature channel modified for decision feedback to detect binary phase shift keyed signals

08 p1270 A69-19859

Electronic switching circuits controlled by binary counter triggers for variable passband filters

12 p2040 A69-26489

Fourier analysis of pseudorandom binary sequences, noting relation of sequence sampling properties to interchange of phase angles of sequence harmonic components

13 p2287 A69-27245

Deep space telemetry bit errors increased by reference signal phase noises and partial RF signal suppression, calculating equivalent signal to noise ratio degradation

13 p2223 A69-28609

Binary error investigation in noncoherent FSK communication link with nonselective fading, noting Doppler shift

14 p2414 A69-29498

Digital receiver of radar signals for performing binary quantization of input data with subsequent processing by digital computer

15 p2563 A69-30136

Algorithm for processing binary-quantized echo signal packets, obtaining useful and noise signals relation

15 p2571 A69-30331

Binary-quantized signal packet center for target azimuth determination, discussing antenna radiation pattern role

15 p2566 A69-30332

Direction finding accuracy of pulsed radar with binary-quantized detector signals, discussing azimuth minimum variance and quantization threshold optimization

15 p2566 A69-30333

Robust detection of binary signal in additive noise, using extreme value theory /EVT/ to estimate probability density function and system error and threshold

17 p2944 A69-33624

Optimum receiver design for binary coded data detection in two channel space communication system, discussing phase error distribution and optimum decision function

19 p3275 A69-36286

Binary storage system operation during binary quantization of signal, applying results to storage efficiency improvement

19 p3278 A69-36597

Optical information rates for photocount detection systems based on coherent field model, considering binary channels with or without Gaussian noise

20 p3485 A69-36923

Optimum and suboptimum synchronizers for extracting bit synchronization from binary data, showing performance dependence on pertinent system parameters

21 p3673 A69-38923

Partially coherent PSK-modulated binary detection, deriving noisy phase reference by narrow band tracking filter, analyzing bit output error as function of SNR

23 p4122 A69-41772

Error probability bounds for self synchronized binary PSK communication systems, simulating decision feedback, phase doubling and maximum likelihood systems

23 p4128 A69-42501

BINARY DIGITS

Primitive trinomials of high degree for use in pseudorandom sequence generation of zeros and ones

03 p0455 A69-13373

Trigonometric and arithmetic functions for reducing size of MOS read-only memories to reduce required bit count, discussing cost, structure and applications

07 p1089 A69-19778

Nonlinear filter theory applied to digital telemetry binary processes, using continuous time stochastic process

19 p3274 A69-36281

BINARY FLUIDS

Volatile liquid pressurization, discussing pressurants, heat sources and system design

02 p0232 A69-12382

Laminar flow of isotropic binary gas mixture in circular cylindrical tube with porous walls, determining concentration field variation with wall suction Reynolds number

05 p0744 A69-15618

Binary gas flow past curved body for stationary problem studied by solving Boltzmann equations in form of matched asymptotic expansions

11 p1867 A69-24753

Thermomechanical theory for nonreacting binary fluid mixtures, discussing free energy function, entropy flux vector, equations of motion, constraints, etc

12 p2191 A69-26927

Heat and mass transfer coefficients in binary laminar boundary layer during natural convection, taking into account enthalpy and thermal diffusion effects

13 p2378 A69-28312

Two temperature gasdynamics for binary gas mixtures of differing molecular weight components, analyzing ultrasound and shock wave propagation

13 p2250 A69-28447

BINARY INTEGRATION

Binary block codes for correction of substitution and synchronization errors

09 p1452 A69-21316

BINARY MIXTURES

NT EUTECTIC ALLOYS

NT EUTECTICS

Thermistor assembly apparatus for measuring coefficient of thermal conductivity of pure and binary mixture of gases

05 p0845 A69-15616

Two stage thermal treatment inhibiting influence on swelling and porosity linked to Kirkendall effect during sintering of Fe-Ni powder mixtures

05 p0782 A69-16616

Gas mixture separation in supersonic jet, noting results for hydrogen-nitrogen mixture and diffusion flux

06 p0911 A69-17553

Ignition of binary mixtures of hydrocarbons at high and minimum ignition temperatures of components

06 p1035 A69-17935

Monograph on shock wave structure in binary gas mixtures covering gas kinetics and shock tube measurements of heavy component density distribution

08 p1304 A69-20711

Two fluid kinetic model for analyzing shock wave structure in binary mixtures of monatomic inert gases, noting no overshoot in velocity profiles

08 p1304 A69-20813

Variational calculation of coefficients of viscosity, thermal conductivity, thermal diffusivity and diffusion in binary mixture

11 p1997 A69-24285

Transport coefficients for almost Lorentzian mixture, computed as perturbation to coefficients for true Lorentzian mixture, compared to Chapman-Enskog method results

11 p1997 A69-24286

Gravitational effects on thermodynamic variable equilibrium composition of liquid-vapor binary mixtures near critical point, discussing changes in phase with altitude

11 p1999 A69-24914

Air-hydrogen supersonic mixing and combustion, characterizing hot hydrogen jet discharging into supersonic concentric air stream at atmospheric pressure

13 p2378 A69-28275

Convective heat and mass transfer in binary turbulent vertical boundary layer

13 p2378 A69-28311

Thermal ignition of methane-oxygen mixture, observing flame propagation

13 p2380 A69-28459

Dielectric constant of liquid hydrogen and hydrogen-helium mixtures measured with resonance method

14 p2487 A69-29668

Two component heat pipe operating characteristics on basis of thermodynamic phase equilibrium for binary mixtures

[AIAA PAPER 69-631] 17 p3071 A69-33268

Energy balance equation for two phase liquid-gas mixture ignition process, deriving formula for speed of combustion zone movement

18 p3231 A69-35123

Heat loss from cylinders at low Reynolds numbers in N-He and N-Ne binary mixtures

21 p3848 A69-38706

Nitrogen and water vapor effects on hydrogen-oxygen system recombination, using shock tubes for design of exhaust nozzles for hypersonic flow vehicles

21 p3669 A69-38801

Numerical analysis of plane Couette flow of rarefied binary gas mixture using relaxation type kinetic model equations, discussing slip velocity, friction coefficient, etc

22 p3931 A69-40778

Binary gas mixtures transport coefficients approximated by self consistent matrix procedure based on Chapman-Cowling expressions

24 p4352 A69-43135

BINARY STARS

NT ECLIPSING BINARY STARS

Pulsars features explained by model based on binary system of neutron stars, discussing associated stellar plasmas as directional HF radio wave source

01 p0156 A69-10981

Position of binary stars in photometric diagrams at Geneva observatory, discussing sequence profile of HR diagram

03 p0517 A69-14094

Light and radial velocity changes in close binary systems, including limb and gravity darkening of distorted stars in analysis of spectroscopic effects

04 p0653 A69-14612

Mass exchange and evolution of close binaries /Main Sequence stars/

04 p0653 A69-14614

Photographic plates based parallax determinations of nearby stars weights, relative and absolute values, probable error and observation interval

04 p0663 A69-15381

Spectra of close binary systems, analyzing abundance anomalies, noting metallicity results

05 p0822 A69-15854

Evolution of close spectroscopic binaries and Am stars

05 p0822 A69-15855

Origin of binaries from angular momentum vectors orientation and separation distribution

05 p0822 A69-15856

Spectroscopic binary 16 Piscium, showing unusual period of 47.25 days

07 p1214 A69-18662

Photometric effects of UVB color indices ineffective in detecting double stars in Galaxy

07 p1216 A69-18854

Stars of higher multiplicity, discussing numerical membership and gravitational binding of star clusters and binary stars

07 p1219 A69-19295

Lines displacement in binary star spectrum due to blending, presenting graphs displaying magnitude of effect under various conditions

07 p1223 A69-19624

Frequency and radial velocity for various cepheid binaries, discussing hot companions detection through photometry

07 p1223 A69-19627

UV emission spectrum of double star Boss 1985, excitation potential effect on Fe II lines and table identifying emission lines

08 p1385 A69-20060

Orbital elements of visual double star and O-C residuals, noting dynamical parallax and ephemerides

08 p1393 A69-20568

Binary stars systems with same total mass calculated for evolution from main sequence stage through mass exchange to white dwarfs

08 p1393 A69-20569

Close binaries evolution and Algol type systems origin, discussing hydrogen exhaustion in center

08 p1395 A69-20633

Nonisotropic mass ejection from components of close binary system effects on orbital elements for small initial eccentricity case

08 p1395 A69-20634

Gas flows in close binary systems of dwarf stars

08 p1396 A69-20648

Stars closer than five parsecs including binary systems, luminosity, spectral type and mass
08 p1407 A69-21130

Pulsar NP 0532 identified with Baade south preceding star in Crab Nebula, noting pulsed optical radiation
09 p1592 A69-21458

Radial velocities of stars near cluster NGC 7380, discussing discovered stars, double lined spectroscopic binaries and photometric information
09 p1597 A69-22060

Low mass close binary systems evolution, describing components inside critical Roche lobe in initial detached phases
10 p1777 A69-23310

Delta Cepheid blue companion /delta Cep C/ rapid radial velocity variations, noting spectral proximity between delta Cep A and C
11 p1957 A69-24405

Evolutionary stages of visual binary components based on magnitudes and color indices
11 p1962 A69-25111

Dynamical effects of mass exchange in close binary systems ejection modes from point of view of orbital elements evolution
11 p1962 A69-25113

Optical flashes recorded from Crab Nebula M1 close to central double star with periodicity equal to radio pulses discovered earlier
11 p1962 A69-25250

Least squares iterative program, deriving orbits for O binaries HD 93403 and HD 135240
11 p1963 A69-25257

Micrometric and photometric measurements of coude spectra of magnetic variable HD 125248, showing spectroscopic binary nature and computing orbital elements
11 p1963 A69-25264

Close binaries evolution and mass exchange for stars of 5 solar masses with very short periods, using modified Henyey method
11 p1964 A69-25414

Statistical data for visual binary systems with known spectral classes or colors and one component near main sequence
12 p2159 A69-26666

Spectroscopic and eclipsing binaries in zodiac tabulated for photometric studies at lunar occultations
12 p2171 A69-27152

Book on astrophysics and stellar astronomy covering stellar radiation, binary and variable stars, positions, magnitudes, galaxies, cosmologies, etc
13 p2337 A69-27463

Parallax and mass ratio of visual type K6 dwarf binary system, ADS 1865, BD plus 30339
13 p2349 A69-27811

Parallax and orbital motion of spectroscopic binary Tau Persei determined from Sproul refractor photographs
13 p2349 A69-27812

Relative parallax, fractional mass and luminosity of visual binary 1785 determined from photographs taken with Sproul refractor
13 p2349 A69-27814

Visual binary star parallax, motions and mass ratio determined using photographic data
13 p2349 A69-27815

Shock heated gas radiation frequency dependence and UB and B-V color indices determination, studying role in close binary systems luminescence
13 p2350 A69-27860

Sec-Cen B stars radial velocities, determining spectroscopic binaries
14 p2519 A69-29136

Lacerta OB 1 B spectroscopic binaries periods and orbital elements, noting limits for secular variation
14 p2519 A69-29137

Metallic line /Am/ stars Zeeman observations, showing 16 Ori as spectroscopic binary, dubious binary nature of 15 Vul and doubtful presence of magnetic fields
15 p2692 A69-30775

Spectral Pt II lines in Ap stars of Hg class observed during analysis of double lined spectroscopic binary HR 4072
15 p2695 A69-30891

Close binary system components approximated by two nonsimilar ellipsoids, obtaining interpretation of light curves
15 p2695 A69-30957

Close visual binaries separations for checking large aperture telescope resolution, listing binaries, orbits and ephemeris
16 p2855 A69-31662

Photoelectric visible radiation observations of binary star AH Vir
16 p2858 A69-32215

DQ Herculis photometric measurements synchronized with white dwarf component pulsation, discussing equipment, eclipse curve and binary period dependence on time
16 p2862 A69-32373

Motion of two rigid spheroids with mutual gravitational attraction based on Hamilton-Jacobi theory applicable to binary stars
16 p2863 A69-32402

Planetary systems interrelationship with binaries and rotating stars, emphasizing occurrence frequency study based on stellar angular momentum orientation
17 p3032 A69-33105

Light changes caused by distortion of binary components, computing theoretical brightness variations by numerical integration of emerging atmospheric intensities over visible surface
17 p3044 A69-34179

Mean rotational velocity of finite width gaseous ring in close binary system from rotational velocity measured on spectrograms
17 p3044 A69-34180

Physical nature of HZ 22 short period hot subdwarf binary, noting arguments against normal B type binary hypothesis
17 p3044 A69-34181

Curve of growth analysis for close binary HR 5317 indicating Mg, Mn, Ca and Sr overabundance respecting standard star 110 Her
18 p3191 A69-34297

Masses of visual binaries above main sequence with published orbits determined as function of position in H-R diagram, using spectroscopic parallaxes
18 p3195 A69-34429

HD 30353 He binary star invisible component suggested as KO type supergiant from IR photometric data
18 p3203 A69-35348

Geometric determination of visual binary orbits, noting inadequacy of graphical method based on apparent orbit eclipse properties
19 p3403 A69-35968

Forbidden emission transition probabilities in high excitation symbiotic stars, novae, Cygni stars and peculiar binaries
19 p3423 A69-36227

Visual binary star ADS 12447 orbit elements calculated using Zwiers method
20 p3598 A69-37466

Orbital elements of visual binaries Don 91 and ADS 9756 derived graphically, tabulating observations with ephemerides
20 p3600 A69-37480

Right ascension and flux density of source in Crab Nebula measured at meter wavelengths, evaluating spectrum and relative position to binary star center
20 p3607 A69-38040

Book on white dwarf formation through mass exchange covering binary star system, primary star mass losses and evolution into white dwarf
22 p4021 A69-40421

VV Cephei type binaries cool and hot primary stars light variations, discussing duration, orbital cycle correlation, mass loss, etc
24 p4386 A69-43346

Temperature distribution on surfaces of close binary stars as basis for predicting variation of monochromatic reflection effect
24 p4387 A69-43350

Blue component of HD 237006 and VV Cephei spectra, suggesting greater luminosity of blue star in late type supergiant
24 p4387 A69-43353

Delta Cepheid blue companion /delta Cep C/ rapid radial velocity variations, noting spectral proximity between delta Cep A and C
24 p4391 A69-43795

BINARY SUMMATORS

U ADDING CIRCUITS

BINARY SYSTEMS [DIGITAL]

U DIGITAL SYSTEMS

BINARY SYSTEMS [MATERIALS]

NT EUTECTIC ALLOYS

NT EUTECTICS

High temperature research on systems formed by zirconium dioxide with samarium and gadolinium sesquioxides near melting point
01 p0101 A69-10044

Time dependent viscoelastic stress distribution in two phase composite material, using plane stress model for approximation
02 p0348 A69-12540

Nonlinear constitutive equations for mixture of two elastic solids linearized, assuming small displacements and subsequent temperature changes
03 p0529 A69-14063

Bainite beta to alpha transformation in titanium-oxygen system, using high temperature metallography techniques
04 p0613 A69-14559

Solid solutions of O in Ti and Zr, noting superstructure formation and physical properties
04 p0618 A69-15078

Vanadium-carbon and niobium-carbon binary systems revised phase diagrams, noting effect of sublattice order transformations
05 p0779 A69-15988

Binary mixture condensation on cooled vertical plate, formulating predictive theory based on conservation laws and other physical principles
[ASME PAPER 68-WA/HT-21]
05 p0847 A69-16124

Two phase self lubricating composite materials for high temperature, detailing impact strength, friction and wear tests
[IME PAPER 12]
07 p1137 A69-18560

Thermodynamic properties of binary and ternary liquid metal systems, noting electromotive force and vapor pressure measurements
07 p1165 A69-18939

Ductile fracture behavior of two phase stainless steel examined by straining smoothed and notched tensile and Charpy impact specimens
08 p1333 A69-20574

Correlation between interfacial tension in binary and ternary systems and reciprocal solubility of bulk phases, assuming concentration as function of thickness
09 p1448 A69-21909

Concentration changes in binary metal-gas solutions during simultaneous degassing kinetics and metal evaporation
09 p1528 A69-22732

Pd-D resistivity variation with D concentration at room and liquid He temperatures, discussing structural resistivity
10 p1745 A69-23357

X ray investigation of niobium, aluminum and niobium-aluminum systems to obtain K-spectra and L-spectra
14 p2508 A69-29664

Binary Nb-Hf system phase diagram below solidus line noting lattice parameters and oxygen and nitrogen effects on phase equilibrium boundaries
18 p3157 A69-35247

InSb-InAs, InSb-GaSb, InP-GaAs and InP-GaP quasi-binary systems solid solutions optical and electrical properties, determining energy gap change as function of composition
19 p3390 A69-36554

Phase analysis of systems Mn-S, Mn-Sc and MnS-MnSc by X ray diffraction techniques, revealing homogeneity ranges
20 p3485 A69-38286

Diffusion layers and elasticity-dependent interdiffusion coefficients of Ti binary systems, using X rays
21 p3745 A69-38954

Soviet book on liquid binary systems covering physicochemical analysis and quantitative methods
21 p3670 A69-39529

BINDERS [ADHESIVES]

U ADHESIVES

BINDERS [MATERIALS]

NT PROPELLANT BINDERS

NT SOLID ROCKET BINDERS

Tungsten replacement by chromium or molybdenum in heavy metals shown possible for binding material of group 6A metals
05 p0780 A69-15991

Unidirectional fibrous materials stability, finding characteristic equation in form of infinite determinant by solving three dimensional stability of reinforcing fibers in binder
11 p1985 A69-25172

Shrinkage and heat release of polyglycol maleinate binder during gamma radiation consolidation compared with thermochemical consolidation
12 p2117 A69-25991

Microfibrous boehmite as binder for molybdenum disulfide in formation of ductile water resistant dry lubricant films
[ASLE PAPER 68-LC-14]
15 p2642 A69-30606

Silico-organic liquid water repellent coatings for increasing binder adhesion to glass fiber in glass fiber reinforced plastic materials of aircraft components
21 p3752 A69-38876

Cement materials to attach thermocouple to stainless steel tubing in nuclear rocket engine nozzle, considering thermal conductivity, bond and tensile and compressive strengths
21 p3753 A69-39699

BINDING
Binding of lysine-rich proteinoids to organismic or thermally synthesized polynucleotides, noting polyanhydroamino acid interactions with polynucleotides
07 p1074 A69-18635

BINOCULAR VISION
Depth distortions in binocular visual fields from misleading size cues
21 p3653 A69-38900
Holographic photogrammetry compared with conventional holography in monocular and binocular parallax reconstruction and stationary stability of objects
22 p3944 A69-40044
Eye movement control mechanisms during binocular fixation used to determine corrective roles of flicks and drifts
22 p3883 A69-40876

BINOMIAL COEFFICIENTS
Lunar gravitational potential and lunar surface radius vector binomial series coefficients determination from Luna 10 data used for lunar surface shape calculations
20 p3596 A69-37308

BIOACOUSTICS
Interspecific synthetic signals research for effective bioacoustic bird scaring techniques including optical signals
17 p2914 A69-33364

BIOASSAY
Analytical techniques for in-flight monitoring of aerospace water supplies for potability, emphasizing rapidity, sensitivity and reproducibility
01 p0019 A69-11339
Biological monitoring during assembly of Technological Feasibility Spacecraft /Mars lander/ to evaluate thermal control techniques and microbiological burden prior to sterilization
02 p1201 A69-11774
Technology Feasibility Spacecraft /TFS/ sterilization and bioassay program during assembly, analyzing sampling and cleaning procedures
09 p1446 A69-22358
Sterilization assembly development laboratory /SADL/ quality assurance program for microbiological monitoring according to NASA planetary quarantine requirements
15 p2559 A69-31123
Pre and postflight leukocyte chromosome aberration analyses of Gemini astronauts
17 p2908 A69-33173
Lignin presence in New Zealand moss gametophytes observed for characteristic color reaction and UV spectra, noting contrast with north temperate species
17 p2912 A69-34176
Biocrystallography of organic form and structure emphasizing liquid crystals, polymers, epitaxy, inclusion compounds, electrical properties, prelife compounds, etc
21 p3656 A69-38922

BIOASTRONAUTICS
Automatic life support system tried on leeches for space applications
01 p0021 A69-11080
Analytical techniques for in-flight monitoring of aerospace water supplies for potability, emphasizing rapidity, sensitivity and reproducibility
01 p0019 A69-11339
Automatic bioprobe life support system for long duration interplanetary space flight, discussing blood leech as suitable research animal
02 p0199 A69-11828
Membrane vapor diffusion for water reclamation from urine and wash water on space missions
03 p0379 A69-12992
Weightlessness effect on blood circulation system of human beings and animals during suborbital/ orbital space flight
03 p0376 A69-14194
Flour beetle under irradiation and weightlessness during space flight, analyzing effects on somatic wing development, germ cells and pupal period
06 p0876 A69-18177
Reactions of respiratory and cardiovascular system of dogs in biocompartment of ballistic missiles, discussing biopotential of myocardium, arterial pressure, etc
07 p1060 A69-18576

Oculomotor activity of cosmonauts during orbital flight, analyzing electrooculograms taken during vestibular tests
07 p1063 A69-18594
Plants growth from seeds exposed to space environment onboard Cosmos 110 biological satellite compared with control plants
07 p1064 A69-18972
Enzymes in simulated Martian environment exhibit higher resistance than in earth atmosphere at 4 C
07 p1065 A69-18974
Permissible irradiation doses established for spacecraft crews making short and long flights, considering roles of life span, somatic effects, leukemia and genetics
07 p1069 A69-19618
Clinical report on Apollo 7 and 8 mission medical data, discussing preflight preventive medical activities, inflight treatment, radiation levels, etc
09 p1446 A69-22542
Automatic computer processing of physiological data during space flights, discussing choice of computers and computer programs
10 p1649 A69-23509
Space travel and lunar exploration medical problems
13 p2210 A69-27909
Weightlessness, increased gravitational fields and radiation effects on biological systems at organismal, cellular and subcellular levels, discussing biosatellite experiments
14 p2406 A69-29097
Aerospace biomedical technology transfer analysis, discussing spinoff, popular interest, transfer barriers, etc
18 p3236 A69-35104
Plants growth from seeds exposed to space environment onboard Cosmos 110 biological satellite compared with control plants
20 p3479 A69-38220
Enzymes in simulated Martian environment exhibit higher resistance than in earth atmosphere at 4 C
20 p3479 A69-38222
NASA Lunar Receiving Laboratory functional areas and physical, chemical, biological and quarantine activities for crew and lunar samples
21 p3690 A69-38896
S-4 human blood experiment during Gemini 2 flight, studying spaceflight ionizing radiation interaction effects on single and multiple break chromosome aberrations
23 p4085 A69-41600
Space physiology, describing laboratory and onboard experiments
23 p4086 A69-41686
Behavioral patterns and physiological parameters of medical leech *Hirudo medicinalis* determined in natural environment prior to biological experiment in space
24 p4268 A69-43402

BIOCHEMISTRY
NT BACTERIOLOGY
NT ENZYMOLOGY
NT PHYSIOCHEMISTRY
Space technology contributions to medical problems, discussing organization and achievements of biochemical application program of NASA [UN PAPER 68-95417]
01 p0020 A69-10471
Molecular mechanisms leading to mineralization of organic tissues, noting role of protein and glycoprotein matrices
04 p0555 A69-14888
Psychochemical research theory and methodology, relating biochemical phenomena to human brain function
04 p0553 A69-14976
Bioadhesive investigation in echinoderms extended to class Holothuroidea, using electron microscope with correlative light microscopy for tube feet of sea cucumbers
05 p0708 A69-15984
Binding of lysine-rich proteinoids to organismic or thermally synthesized polynucleotides, noting polyanhydroamino acid interactions with polynucleotides
07 p1074 A69-18635
Inhibition of gamma ray induced DNA degradation by infection with bacteriophage
07 p1069 A69-19709
Hypothermia induced alterations in biochemical processes studied with isolated rat liver perfused at low temperature
10 p1642 A69-23119
Preferential shifts in consumption of metabolic fuels following exposure to hydrazine or monomethylhydrazine, considering biochemical and physiological responses
14 p2407 A69-29303

Electrokinetic converter of biochemical parameters for diagnosis and control of organism behavior, noting biomechanical utility
14 p2409 A69-29471
Dynamic differential thermal analysis with He flow performed on biological specimens, proteins and starches, showing discrete decomposition peaks monitoring pyrolysis process
16 p2747 A69-31807
Cell-like structures containing biochemicals as inevitable event under various hypothetical primitive earth conditions
23 p4085 A69-41479
O-hemoglobin dissociation curve shape effect on O affinity of hemoglobin
23 p4095 A69-42086
Psychological, psychophysiological and biochemical effects of prolonged sleep deprivation in human males, noting transient ego disruption
23 p4099 A69-42195

BIOCLIMATOLOGY
Circadian rhythm effect between individuals of separate twin pairs, noting application to physiological research in medical genetics and human biometeorology
04 p0553 A69-15152

BIOCONTROL SYSTEMS
Biological systems optimal control theory, considering various control structures and energetic and informational bases of optimization
22 p3893 A69-40786

BIODYNAMICS
X ray study of biomechanics of respiratory act under long term acceleration stresses
05 p0710 A69-16522
Viscoelastic rod model of human spine subjected to accelerations
07 p1072 A69-19725
Electrokinetic converter of biochemical parameters for diagnosis and control of organism behavior, noting biomechanical utility
14 p2409 A69-29471
Human locomotion analysis, measuring metabolic expenditure and mechanical energy levels of principal body segments during walking
15 p2558 A69-30587
X ray study of biomechanics of respiratory act under long term acceleration stresses
18 p3096 A69-34741
Change in weight, plasma volume, urine flow and hematocrit in man before and after immersion up to chin in thermally neutral bath
23 p4096 A69-42087

BIOELECTRIC POTENTIAL
Flexible printed circuitry electrode arrays fabrication for surface cortical potentials recording in animals
02 p0204 A69-12601
Prolonged bed rest effect on brain bioelectrical activity from EEG reactions of subjects to acoustic signals followed by light signals
05 p0710 A69-16520
Prolonged bed rest effect on brain bioelectrical activity from EEG reactions of subjects to acoustic signals followed by light signals
18 p3096 A69-34739
Mapping of biological potentials evoked in primary somatosensory fields by electrical signals on dorso-lateral surface of brain cortex of cats
22 p3886 A69-41121
Topography of potentials induced by acoustic clicks in auditory cortex of dogs, including ectosylvian gyrus distribution
22 p3888 A69-41269
Cortical biopotentials in cats induced by strychnine under acoustic click stimuli of increasing intensity
22 p3888 A69-41270
Oscillatory electric field disturbances monitored near human body concurrent with heart beat and respiration, showing signals unrelated to blood flow or streaming potentials
23 p4101 A69-41449
Dependence of cochlear microphonics and summating potential on endocochlear potential
23 p4085 A69-41574
Electroretinogram and visually evoked cortical potential as response potentials in human visual system
24 p4271 A69-42644

BIOELECTRICITY
Decrease in bioelectric activity of skeletal muscles in animals and man during intermittent acceleration and weightlessness
07 p1062 A69-18591

Synaptic configurations in neuropil of planarian *Dugesia dorotocephala* brain, discussing neurotransmitters at phyletic level
16 p2741 A69-31555

Miniaturized FM telemeter for transmitting electrical activity of single nerve cells in brain of awake and unrestrained animal
19 p3261 A69-36270

Neuron activity simulation applied to vestibular neurons electrical activity analysis, discussing feedback circuitry and cathodic depression
20 p3471 A69-37256

Stimulus correlated with neuronal discharge periodicities in colliculus inferior, deriving structure models, discussing acoustic channel below geniculatum mediale
23 p4096 A69-42089

Radioisotopic determination of haemodynamic and bioelectric disturbances of rat striated muscles subjected to acceleration and hypokinesia
24 p4268 A69-43409

NT ELECTRORETINOGRAPHY

NT PLETHYSMOGRAPHY

Biological problems in prolonged space voyages including oxygen replacement, water supply and food regeneration
01 p0020 A69-11075

Allelopathy, discussing application to gas liberating activity of edible plants as ingredients of space flight life support systems
02 p0198 A69-11509

Hard space suit for use on planetary surfaces and extravehicular activity, discussing design, fabrication and mobility
03 p0379 A69-12993

Data sampling and statistical verification in large scale sterilization procedures, discussing biological indicator /*Bacillus stearothermophilus*/ and incubation time
05 p0714 A69-15952

Standardization requirement for laboratory and field research into vibration effects on humans, stressing subjective rating and performance measurements
13 p2213 A69-28091

Internal and external heat transfer instrumentation and equipment bioengineering, listing thermal conductivity and diffusivity of biological materials
13 p2213 A69-28150

Flow mechanics applications to medicine, discussing vascular and technical systems and measuring equipment adaptation to human organisms
17 p2915 A69-33771

Life support system sterilization maintenance problem for biosatellite experiment over one year
20 p3477 A69-37624

Bicycle ergometer combined with induction clutch, investigating effect of eccentric dynamic work with arms and legs
21 p3663 A69-38902

Collection of papers on biomedical engineering and medical physics covering cardiac pumps, neural models, control theory, telemetry and laser applications, etc
22 p3893 A69-40784

BIOGENESIS

U BIOLOGICAL EVOLUTION

BIOGENY

Optical activity measurement for exobiology applications, considering polarimetry, gas-liquid chromatography, mass spectrometry and radioactivity detection
23 p4213 A69-41622

BIOINSTRUMENTATION

NT BIOTELEMETRY

Man as main component of future spacecraft or planetary station closed ecological system, discussing spacecrew physiological monitoring for biological cycles optimization
01 p0020 A69-11076

Respiratory pressure recording with tracheal cannulae applied on cats to obtain pneumograms and oscillograms of respiratory neurons
07 p1131 A69-18538

Internal and external heat transfer instrumentation and equipment bioengineering, listing thermal conductivity and diffusivity of biological materials
13 p2213 A69-28150

Pyroelectric conductor sensors permitting continuous measuring and recording of air inhaled during chosen time intervals
15 p2559 A69-31230

Peak amplitude selector for electrophysiological phenomena analysis, describing memory schemes, threshold crossing detectors and display, input and output circuits, timing, etc
15 p2612 A69-31266

Aeromedical developments by NASA biomedical applications program applied to general medical equipment including cardiac sensors, surgical sterilization, ballistocardiograph, etc
16 p2882 A69-32430

Diathermy instrument using solid state circuits to provide square wave pulses, discussing operating parameters for bipolar coagulation and advantages over spark gap instruments
18 p3134 A69-34537

Rapid component of nystagmus using photostagnography, noting dependence on afferent pulse of ampullar apparatus
20 p3481 A69-37272

Electronystagmographic method of eye movement recording, noting applications to vestibular and visual analysis and study of oculomotor nuclei- vegetative centers relations
20 p3481 A69-37273

Equipment with minimum semicircular canals stimulation for vestibular analyzer studies
20 p3481 A69-37274

Biological material flow phenomena, discussing rheological approach, microcirculation, macrocirculation, instrumentation and mathematical model for quantitative observation
20 p3473 A69-37602

Biomedical electrical signals analysis by optical data processing, discussing conversion, SNR and filtering techniques
21 p3666 A69-39440

Low noise physiological recording with dry electrodes, discussing material, construction, preamplifier design and experimental data in electrocardiography
21 p3666 A69-39441

Flash lamp for biological applications, discussing control unit circuitry, pulse duration, frequency and color, flash-dark ratio, etc
23 p4110 A69-42054

Electric potential measuring device for frog isolated skeletal muscle fiber mounted on micromanipulator
23 p4111 A69-42058

Central nervous, cardiovascular and metabolic data of *Macaca nemestrina* during simulated Biosatellite flight, testing data acquisitions systems
24 p4260 A69-42703

Pressure wave transmission in liquid filled tubes, determining attenuation and phase shift for hemodynamics applications
24 p4279 A69-43798

BIOLOGICAL ACTIVITY

U ACTIVITY [BIOLOGY]

BIOLOGICAL ANALYSIS

U BIOASSAY

BIOLOGICAL CELLS

U CELLS [BIOLOGY]

BIOLOGICAL EFFECTS

NT RELATIVE BIOLOGICAL EFFECTIVENESS [RBE]

Surface dose rate and depth dose distribution for materials used for space vehicle and biological tissue protection from cosmic and internal radiation [UN PAPER 68-95260]
01 p0144 A69-10477

UV and visible light interaction effect on biological activity of *Paramecia unicellular infusoria*, noting cell division rates and cell deaths
01 p0017 A69-11085

Lethal effect of solar UV radiations on dried *Coliphage* T-1 exposed to space at sounding rocket altitudes
01 p0017 A69-11086

Pituitary-adrenocortical axis and neuro-endocrine functions in animals maintained in oxygen atmosphere, discussing norepinephrine and epinephrine excretion values, etc
01 p0019 A69-11343

Chronic gamma radiation biological damage in rats exposed to maximum nonlethal to minimum lethal doses for various periods
02 p0197 A69-11494

Deuteron microbeam for simulating biological effects of ionization by heavy cosmic ray particles
03 p0373 A69-13493

Biological effects of proton irradiation of monkeys investigated to provide improved protective shield design data with minimum weight penalty
03 p0373 A69-13496

Acute somatic effects in monkeys irradiated with protons of various discrete energies representing significant portions of space proton spectrum
03 p0374 A69-13497

Biological effects on rhesus monkeys of high energy protons compared to effects of cobalt 60 gamma radiation
03 p0374 A69-13498

Biological effects in man due to heavy particles emission during major solar cosmic ray events, noting protective effect of human body
03 p0374 A69-13500

In vivo hyperbaric hyperoxia effect on erythrocytes unsaturated fatty acid composition alterations of tocopherol deficient mice
03 p0375 A69-14070

Weightlessness effect on blood circulation system of human beings and animals during suborbital/ orbital space flight
03 p0376 A69-14194

Cardiovascular system, respiratory system and metabolism of cosmonauts on three man flight of Vostok, noting physiological and biochemical studies
03 p0377 A69-14195

Circadian rhythms disruption during long distance flights, discussing adverse effects on pilot and passenger performance
03 p0378 A69-14260

Asthmatic attacks in military air crews, discussing flight stress factors including altitude, ventilation and insecurity as possible causes
05 p0710 A69-16624

Cerebral circulation under longitudinal acceleration, discussing rheoplethysmographic measurements of heart rate
05 p0710 A69-16625

Biological effects of VHF electromagnetic radiation from radar antennas
05 p0715 A69-16701

Biological systems response to inertial environment, escape from earth gravity, planetary gravity and artificial gravity
06 p0872 A69-17011

Soviet monograph on UV radiation of sun and sky emphasizing biological effects
07 p1221 A69-19506

Biological effects of laser radiation on mammalian retina, noting thermal injury [AGARDOGRAPH-111]
08 p1266 A69-20676

Soviet book on space radiobiology, discussing somatic effects, influence of flight factors, relative biological effectiveness of various radiations and radiation safety
11 p1827 A69-24263

Biological effects of cosmic ionizing radiation in supersonic commercial aircraft at high altitudes, showing spatial distribution based on balloon experiments
11 p1830 A69-24865

Biological radiation doses and protection from galactic, solar particle and trapped radiation in space, noting secondary radiation and bremsstrahlung in absorber
11 p1831 A69-24866

Space biological tests performed on lower animals and vegetables relating to higher organisms reactions during prolonged manned space flights, reviewing Nasa experiments
12 p2019 A69-26494

Earth contamination by returned lunar or Martian material, discussing extraterrestrial biota survival on earth
13 p2210 A69-28467

Biological effects of low magnetic field environments studied by physiological, visual and psychological tests on animal, plant and human subjects
13 p2211 A69-28596

Shield facility and Helmholtz coil system used to investigate chronic effects on man of zero magnetic field regulated to cancel geomagnetic field variations
15 p2586 A69-30382

Weightlessness and vibration effects on soft red winter wheat seedlings
15 p2557 A69-31368

White rats diet containing alcohol-soluble fraction of *Chlorella* and *Scenedesmus* biomass, noting changes in adrenal cortex and renal glomerus
17 p2906 A69-32930

Drug action on decompression sickness in rats compared with action on nitrogen narcosis and oxygen toxicity
17 p2913 A69-33172

Biological effects of radioactivity and X rays irradiation of whole body and cells, considering DNA degradation
19 p3257 A69-35978

Noble gases effect at low pressures on O consumption by mammalian tissue, noting Xe, Kr, N and nitrous oxides effect on rat liver
19 p3258 A69-36454

Vestibular stimulation effect on human blood composition during rocking test indicating blood eosinophile content as function of hypophysis and adrenal cortex reactions
20 p3473 A69-37268

Biological effects of cosmic radiation on crewmen and protection measures, noting ground radiobiological and medical hygienic investigations
20 p3478 A69-37628

Muscular strength dynamometric measurements in subjects during prolonged inactivity with restricted caloric and protein intake, showing decrease in strength
21 p3653 A69-38901

Biological responses to weightlessness prediction, considering gravity perception mechanisms, cellular metabolism, etc
21 p3656 A69-38921

Photographic and photometric study of absorption and reflection of ruby laser light incident on biological objects
21 p3665 A69-39060

Somatic radiation effects on human organism related to manned space flights
21 p3660 A69-39172

Manned relativistic space flight limitations dependence on biomagnetic levitation of human body in inhomogeneous magnetic field to compensate inertial forces during acceleration
22 p3889 A69-39906

Nutritive value of mycelium of *Cantharellus cibarius* mushroom on rats compared with eggs and fresh and sour milk
22 p3892 A69-40273

Diffusion in biological systems by random walks with emphasis on gaseous diffusion in lung, noting probabilistic tree model
22 p3885 A69-40978

D-amphetamine effect on single tectal neurons activity of cat optimum recorded by steel microelectrodes before and after intravenous injection
23 p4084 A69-41466

Biological effects by cosmic ray heavy ions and solar flares, using direct correlation between damages caused and trajectories
23 p4089 A69-41831

Insect gametes response to space flight and radiation in reduced gravity including plants and microorganisms
23 p4091 A69-42050

Spinal cord temperature effect on stretch responses of muscle spindles of triceps surae, anterior tibialis and extensor digitorum longus in anesthetized cats
23 p4093 A69-42067

Radio and microwaves biological effects, discussing differences between U.S. and Soviet assessments of radiation hazards
23 p4099 A69-42516

Microwave radiation effects on biological systems, discussing categories according to radiation protection guide /RPG/ numbers, tissue properties and interactions
24 p4270 A69-42579

Biological and physiopathological effects of UHF electromagnetic radiation of radar antennas, reviewing localized effects
24 p4273 A69-42996

Hyperventilation effect on flight personnel, discussing oxygen and carbon dioxide partial pressures, symptoms and clinical signs
24 p4269 A69-43410

BIOLOGICAL EVOLUTION
NT ABIOTIC GENESIS

Space environment barriers to man due to biological evolution and transition from land to space in single generation, noting orientation problems
03 p0380 A69-14067

Molecular mechanisms leading to mineralization of organic tissues, noting role of protein and glycoprotein matrices
04 p0555 A69-14888

Experimental research concerned with origin of life, studying synthesis of precursor polymers and self assembly into protocells
10 p1641 A69-23035

Axiomatic explanation of complete self reproduction, noting logical mathematical biological reasoning and evolution theories
10 p1645 A69-23385

Simulated weightlessness used in determining ontogenesis of otolith organ in tadpoles and eggs as function of acceleration forces
10 p1647 A69-24021

Protein and nucleic acid building blocks sequence differences influence on evolutionary relationship of living organisms, comparing fish and mammal globins
11 p1828 A69-25456

Abiogenic synthesis of prebiological membranes under assumed primitive earth conditions by UV radiation of alkanes on phosphate and Mg ions aqueous solutions
11 p1828 A69-25462

Origin of life data, discussing self ordered polymers, propagative cell-like systems, protenoids, cellular evolution, etc
12 p2018 A69-25781

Book on genesis and evolutionary development of life covering carbon compounds, protobionts and evolutionary biochemical investigations of present living organisms
12 p2019 A69-26300

Life origin and organic-inorganic systems, emphasizing protein colloids-mineral salts interactions at protocell stage
14 p2408 A69-29632

Life detection for space missions based on detecting optical asymmetry in biogenic molecules by gas chromatography involving diastereomeric esters synthesis
15 p2556 A69-31315

Soviet book on theories of origin, nature and evolution of life from viewpoint of dialectic materialism, covering evolution trends, cell differentiation, etc
19 p3259 A69-36746

Sediments and crude oils analyzed for fatty acids, considering abiological or bacterial origin of acids
20 p3523 A69-37538

Probability of biological development leading to human life on another planet
21 p3652 A69-38786

NonDarwinian evolution of protein and DNA, comparing expectations of evolution models for protein and amino acid changes
22 p3871 A69-40060

Cell-like structures containing biochemicals as inevitable event under various hypothetical primitive earth conditions
23 p4085 A69-41479

Biochemical evolution role in porphyrin synthesis forming hemoproteins base, discussing assimilation of carbon dioxide in early earth atmosphere
23 p4088 A69-41814

BIOLOGICAL MODELS
U BIONICS

BIOLOGICAL RHYTHM
U RHYTHM [BIOLOGY]

BIOLOGY

Respiratory system control processes hypotheses experimental verification
01 p0019 A69-10209

Respiratory system control processes hypotheses experimental verification
14 p2408 A69-28745

BIOLUMINESCENCE

Biochemiluminescent luminol-peroxide reaction to detect iron porphyrin proteins in microorganisms for extraterrestrial life search, discussing reaction kinetics
15 p2556 A69-31325

Adenosine triphosphate /ATP/ content of terrestrial soils, based on firefly bioluminescent reaction, for Mars soil problems
20 p3473 A69-37567

NT PLETHYSMOGRAPHY

Physiological measurements onboard Soviet bioprobes and biosatellites including electrocardiography, phonocardiography, sphygmography, seismocardiography and pneumography
01 p0015 A69-10947

Neural buoyancy microelectrode for prolonged recording from single nerve units
02 p0202 A69-11865

Mechanical model of human body used to study response to vibration, impact, blast and decompression loads
04 p0552 A69-14470

Bloodless heart flow measurement methods, noting simultaneous external recording of carotid and femoral pulses and impedance plethysmography
09 p1448 A69-22730

Neurological changes in men due to hypokinesia, analyzing tremor data, EEG recordings and stabilography fluctuations
10 p1647 A69-23585

Arterial tone and human muscular activity limitations, analyzing hypodynamic effects on aorta, arm and leg vessels constriction
10 p1647 A69-23586

Graphical method for plotting electrophysiological observations, showing hodographs application in biopotential studies of cortical reactions
11 p1829 A69-24540

Digital computer program for physiological measurements, outlining interpolation of mathematical functions describing signals time variations
17 p2912 A69-32941

Brain weight and cholinesterase activity in rats after exposures to acoustic and light stimuli
21 p3662 A69-39627

BIONICS

Cardiovascular system simulation using computer models transport and perturbation methods
03 p0380 A69-13855

Simulation of regulatory function of cardiovascular system during weightlessness
03 p0376 A69-14193

Learning model of brain stem reticular formation based on nonlinear probabilistic hybrid computer concepts
05 p0711 A69-15802

Cybernetic problems in bionics - Conference, Dayton, May 1966
07 p1069 A69-18380

Analytical model for frog retinal bug detector cell to make possible signal measurement in frog optic fibers
07 p1070 A69-18383

Mathematical model of spike activity of auditory neurons constructed from functional point of view
07 p1070 A69-18384

Cybernetic structural model for learning and mentation comprehending symbol systems, languages, homeostatic mechanisms, etc
07 p1070 A69-18385

Computer simulations, comparing self adaptive /neurotron/ control of spacecraft energy allocation subsystem to programmed control
07 p1058 A69-18389

Analog computer modeling of human systemic arterial tree, based on lump parameter circuit approximation
07 p1072 A69-19727

Mathematical model of closed biological cycle regenerating part of life support products, incorporating astronaut, storage and regenerating waste disposal units
10 p1649 A69-23580

Analytic model resembling thick walled ellipsoid of revolution incorporating three dimensional shape of human left ventricle and ventricular wall thickness effects
12 p2022 A69-26235

Linear passive electrical analog model of human systemic arterial tree, discussing artery segment modeling, vessels input impedance, wave travel, etc
17 p2908 A69-33007

Digital simulation of biological model for visual images classification derived from human visual system aspects
17 p2911 A69-34094

Human ear frequency discrimination, discussing nonlinear functional modeling systems
18 p3097 A69-35440

Book on simulation in biology and medicine covering mathematical models, blood circulation, pulmonary ventilation, etc
19 p3260 A69-35894

Transfer function in pulmonary ventilation and O tension in arterial blood analyzed by automatic control
19 p3260 A69-35897

Book on neurocybernetics and neurobionics covering mathematical and physiological models, artificial neurons, image recognition theories, biological control systems, etc
19 p3263 A69-36747

Two body mechanical system operating within dynamics laws simulating backward and forward bending motions of falling cat
19 p3259 A69-36832

Cerebral circulation arterial system pulsatile flow flexible vessel digital simulation models distribution
19 p3264 A69-36867

Multilevel mathematical model of oculomotor apparatus using neuron networks and complex activators, including computer analysis
20 p3470 A69-37245

Neuron activity simulation applied to vestibular neurons electrical activity analysis, discussing feedback circuitry and cathodic depression
20 p3471 A69-37256

Biological clocks, discussing circadian rhythms of organisms using animal experiments and physical oscillator model
21 p3653 A69-38895

Model for lateral inhibitory interaction in human retina, providing systematic account of simultaneous brightness contrast
21 p3653 A69-38898

Multiple cues in paired comparisons, discussing mathematical model of psychological process in information extraction and combination
21 p3664 A69-38970

Cardiac and arterial change frequency among young people, describing hydraulic model for morphological variations of carotidogram appearing with age, arterial hypertension and arteriosclerosis
21 p3661 A69-39272

NonDarwinian evolution of protein and DNA, comparing expectations of evolution models for protein and amino acid changes
22 p3871 A69-40060

Biological model describing spacecraft operator sensorimotor activity in response to various spacecraft control stimuli, outlining computer algorithm
22 p3892 A69-40281

Sensory and logic behavior model of sequence selection based on received information, considering perception, sense, desire, concept and criteria levels
23 p4109 A69-41976

Learning model of motor behavior in brain cortex of higher animals and man, discussing M automaton, information reception, correlation, memory, emotions, desires and actions
23 p4109 A69-41977

Nerve and muscle tissues subthreshold reactions on analog model, discussing transient characteristics under various excitations
23 p4109 A69-41980

Model of nerve elements, discussing subthreshold processes parameter system and analog investigation of transient processes for various stimuli at model input
23 p4110 A69-41981

Mathematical model for information processing of biological memory as cybernetic system
23 p4110 A69-41982

Cybernetic approach to memory, proposing model characterized by hierarchical structural order and sequence to study physiological rhythms
23 p4110 A69-41983

Mathematical model construction to simulate light adaptation in human vision based on Maxwell disk experimental results
23 p4110 A69-41985

Model for human hemoglobin dissociation into subunits taking into account molecular explanation of oxygen dissociation curves
23 p4097 A69-42096

Paradoxical inhibition negative feedback principle in oscillatory systems, using mathematical model of nerve membrane
23 p4112 A69-42444

Brain and machine model of pattern recognition, pattern synthesis, memory, learning and speech, using concept of similarity, context and signal analysis
24 p4273 A69-42909

S-RETIC vertebrate command model, discussing computer simulation of reticular formation Golgi anatomy capable of habituation, conditioning, extinction, generalization and error discrimination
24 p4273 A69-42910

Steady state model for human respiratory system analysis, discussing controlled and controlling parts
24 p4276 A69-43272

Adaptive model of human operator control strategy in response to sudden changes in plant dynamics and transient disturbances
24 p4276 A69-43325

BIOPHYSICS

Extraterrestrial vestibular research, discussing human otolithic apparatus regulation subjected to change from geocentric to heliocentric orientation [UN PAPER 68-95389]
01 p0014 A69-10508

Objective evaluation of metabolic reactivity of organism based on biophysical model compared with experimental individual
06 p0874 A69-17595

Blood vessel model in form of cylindrical shell filled with liquid for studying cardiovascular system dynamic and static problems
12 p2018 A69-25989

Consecutive reaction equations for idealized soil column solved for nitrifying metabolite concentrations as functions of time and depth
19 p3264 A69-35606

Book on simulation in biology and medicine covering mathematical models, blood circulation, pulmonary ventilation, etc
19 p3260 A69-35894

Collection of papers on biomedical engineering and medical physics covering cardiac pumps, neural models, control theory, telemetry and laser applications, etc
22 p3893 A69-40784

BIOREGENERATION

U REGENERATION [PHYSIOLOGY]

BIOSATELLITE 2

Radiobiology of Tradescantia clone orbited in Biosatellite 2, analyzing space effects on spontaneous and radiation induced mutation and cytological changes
15 p2556 A69-31321

Radiation effects on microorganisms and plants during space flight on Biosatellite 2 and Gemini 11 missions
20 p3476 A69-37617

Physiological and somatic effects on insects of radiation source onboard biosatellite 2, discussing wing abnormalities in flour beetle
20 p3476 A69-37619

BIOSATELLITES

NT BIOSATELLITE 2

Physiological measurements onboard Soviet biosatellites and biosatellites including electrocardiography, phonocardiography, sphygmography, seismocardiography and pneumography
01 p0015 A69-10947

Phonocardiograms, EKGs, sphygmograms, heart and respiration rates, body temperature and motor activity recorded/transmitted by TV during canine confinement in Soviet biological capsules
07 p1061 A69-18578

Plants growth from seeds exposed to space environment onboard Cosmos 110 biological satellite compared with control plants
07 p1064 A69-18972

Biomedical experiment onboard Cosmos 110 concerning nonpathological changes
08 p1261 A69-19827

Weightlessness, increased gravitational fields and radiation effects on biological systems at organismal, cellular and subcellular levels, discussing biosatellite experiments
14 p2406 A69-29097

Biosatellite attitude control systems design development and flight test results for payload perturbing effects, discussing simulation activity
18 p3210 A69-35094

Geotropic response reciprocity in oat seedlings grown in two axis clinostat compared with acceleration constraints of biosatellites, considering imposition of centrifugal force
20 p3477 A69-37620

Life support system sterilization maintenance problem for biosatellite experiment over one year
20 p3477 A69-37624

Plants growth from seeds exposed to space environment onboard Cosmos 110 biological satellite compared with control plants
20 p3479 A69-38220

BIOSENSORS

U BIOINSTRUMENTATION

BIOSIMULATION

U BIONICS

BIOSPHERE

U EARTH HYDROSPHERE

U LOWER ATMOSPHERE

BIOSYNTHESIS

Hypoxia exposure effect on RNA synthesis in rat anterior pituitary cultured in vitro
01 p0015 A69-10923

Pharmacological tools in autonomic nervous system research, discussing norepinephrine biosynthesis, storage, release and inactivation in mammals
02 p0200 A69-12722

Amino acid biosynthesis control in microorganisms by end product/feedback/inhibition of enzyme action
06 p0876 A69-18238

Uptake, metabolism and enzymatic synthesis of adrenaline in mammalian brain
07 p1066 A69-19260

Degree of organization in bacterial cell, discussing pool size and DNA synthesis
07 p1069 A69-19505

Hypokinesia effects on rats noting body and organ weights, liver glycogen and N content and tissue proteolysis of skeletal muscles
08 p1262 A69-19928

Origin of life in terms of polymers synthesis under thermodynamic and geological conditions
12 p2017 A69-25764

Defective bacteriophage PBSh in *Bacillus subtilis* after mitomycin C treatment, showing DNA synthesis and marker frequency change
15 p2555 A69-30446

BIOT METHOD

Biot variational principle applied to combined conduction and radiation heat transfer
04 p0685 A69-14734

Completeness of Biot solution in theory of thermoelectricity, discussing Mindlin theorem and Boussinesq-Papcovich solution
07 p1236 A69-19470

Transient one dimensional temperature distribution determined for bodies with internal heat generation and nonlinear boundary condition, using Biot variational method [ASME PAPER 68-HT-6]
13 p2374 A69-27775

Algorithm using Biot-Savart law for determining induced velocity of curved vortex lines in aerodynamics, noting required line integration method
20 p3458 A69-37169

BIOTECHNOLOGY

Chlorella and *Scenedesmus* unicellular algae mixture tested for biological protein value in humans for possible food source
01 p0021 A69-11079

Automatic devices to count bacterial colonies Petri dishes consisting of culture plate scanner and data processor
02 p1201 A69-11773

Biological aspects of space exploration, analyzing human response to artificial environment in prolonged space missions [UN PAPER 68-95715]
06 p0873 A69-17035

Thermal problems in biotechnology - ASME Conference, New York, December 1968
06 p0879 A69-17084

Transient method for measuring thermal properties of biological materials, concerning thermal conductivity, inertia and blood flow rate
06 p0879 A69-17086

Ergonomics and aviation medicine, discussing biotechnological aspects of information in man machine systems and observation tasks
17 p2915 A69-33770

He speech processor for aerospace applications, discussing He speech distortion nature
17 p2911 A69-34095

Biotelemetry system as candidate prototype of generalized system for clinical applications
19 p3262 A69-36272

Device producing step-like output representing amplitude of ECG R-wave on beat by beat basis
21 p3667 A69-39443

Flight indicators monitoring by pilots, describing physiological and psychotechnical criteria for dials and clocks arrangement to improve efficiency
23 p4108 A69-41827

Ergonomic study of experimental tests design for comparing equipments efficiency with man
24 p4275 A69-43023

BIOTELEMETRY

Telemetric system for in-flight measurements of jet pilot heart and circulatory system to determine flight stresses leading to pilot failure
05 p0715 A69-16707

Space and immersion suits physiological evaluation by pulse duration multiplexing telemetry, using commercial FM receiver
06 p0883 A69-17845

Tape recorder for simultaneous double channel recording of physiological experiments, describing circuit modifications and additional circuits
07 p1131 A69-18640

Telemetering aortic blood pressure and heart rate from dogs under various physical activities and emotional stress
07 p1071 A69-19133

Miniaturized transmitter for single channel biotelemetric system to transmit electromyograms incorporating thin film components
08 p1265 A69-19836

Psychic stress effect on physiological parameters of helicopter pilots during critical flight situations, considering biotelemetric examination of heart and circulatory systems
11 p1829 A69-24347

Biotelemetry of human physiological processes in space for assuring physiopsychological control and immediate intervention for emergencies, discussing application in Mercury and Gemini projects
12 p2023 A69-26491

EEG monitor helmet for aircraft or flight simulator programs, discussing sensing and transmitting system
12 p2023 A69-26553

Multichannel telemetry system for chronic implantation in animals to monitor physiological parameters
15 p2559 A69-31044

Telemetry techniques, based on pulse rate measurements, permitting continuous examination of humans under natural working conditions
15 p2559 A69-31228

Blood pressure telemetry of pilot during flight including determination of psychophysical relations
15 p2559 A69-31229

Lightweight sensor for telemetering oxygen partial pressure in respiration air
15 p2559 A69-31231

Computer analysis of EEG recording, presenting model studies under rest and performance conditions
15 p2560 A69-31232

EEG and pilots flight performance relations, discussing in-flight telemetric measurements from ground station
15 p2560 A69-31233

Oscillator without reactive components for integrated circuit biotelemeter, noting transmission in AM broadcast band
19 p3261 A69-36244

EEG monitoring during decompression illness /bends/ treatment by hyperbaric procedure using small multichannel telemetry pack
19 p3261 A69-36268

Wireless telemetry system design for physiological signals in human diagnosis, discouraging casual use of wireless transmission
19 p3261 A69-36269

Miniaturized FM telemeter for transmitting electrical activity of single nerve cells in brain of awake and unrestrained animal
19 p3261 A69-36270

EKG signal transmission to hospital during cardiac patient transportation by emergency vehicle, noting prototype system construction and tests
19 p3262 A69-36271

Biotelemetry system as candidate prototype of generalized system for clinical applications
19 p3262 A69-36272

Automated computer network analyzing electrocardiograms, using telephone lines for bidirectional communications between cardiac data acquisition stations and computer center
19 p3262 A69-36273

EEG with combined multichannel radiotelemetry and telephone for onward data transmission
21 p3664 A69-38978

Low noise physiological recording with dry electrodes, discussing material, construction, preamplifier design and experimental data in electrocardiography
21 p3666 A69-39441

Real time metabolic rate analysis of suited astronaut using heart rate and O methods during thermal vacuum and extravehicular mobility tests
22 p3893 A69-40371

Telemetry in medicine and biology, describing applications and operation of various systems
22 p3893 A69-40787

Single channel pressure telemetry unit with magnetic latching or RF switch for chronic implantation
23 p4100 A69-41295

Heart rate measurements in ski jumpers with radio telemetric system revealing tachycardia during climbing and emotional stress
23 p4078 A69-41313

Telemetered heart rate response to progressively increased distance swimming competition compared with equidistance running events for change patterns, magnitude and recovery
23 p4100 A69-41444

Oscillatory electric field disturbances monitored near human body concurrent with heart beat and respiration, showing signals unrelated to blood flow or streaming potentials
23 p4101 A69-41449

EKG data telemetry from personnel to receiver located within same closed metallic chamber, discussing FM/AM and FM/FM systems
23 p4103 A69-41766

Orbital biomedical laboratory for in-flight measurement to assure human safety and optimize astronauts performance in extended space mission
23 p4223 A69-41801

Equal bandwidth multichannel FM/FM EEG telemeter system using subcarrier frequencies and HF modulation via varactor diodes
23 p4106 A69-41802

Jet pilot blood pressure response during positive acceleration in actual flight measured by telemetry compared with centrifuge test
23 p4089 A69-41822

BIPLANES
Soviet book on practical aerodynamics of An-2 aircraft covering aerodynamic characteristics, equilibrium, stability and control for various flight conditions, including icing
18 p3090 A69-34340

BIPROPELLANTS
U LIQUID ROCKET PROPELLANTS

BIRDS
NT CHICKENS
NT HOMEOTHERMS
NT PIGEONS

Aircraft safety hazards due to birds, discussing radar role in plotting bird migrations
11 p1837 A69-25247

Radar application to meteorology, entomology and ornithology, discussing clear air turbulence detection and flight tracking of birds and insects
12 p2034 A69-27004

Birds as pests - Conference, London, September 1967
17 p2898 A69-33362

Aircraft designers and operators problems with danger and damage caused by bird strikes, considering warning devices and protective windshield panels
17 p2899 A69-33363

Interspecific synthetic signals research for effective bioacoustic bird scaring techniques including optical signals
17 p2914 A69-33364

Airfield bird scaring methods including Very pistol shell cracker firing and broadcast calls on civilian and military airfields
17 p2915 A69-33365

Radar cross section of bird represented as unit density dielectric spheroid for bird hazard monitoring, discussing meteorological, insect and bird echoes
17 p2919 A69-33366

Bird warning and forecast systems based on radar data covering 50 mile radius from airport
17 p2899 A69-33367

Habitat modification for airport bird population control, discussing draining of wet areas, waste control, etc
17 p2915 A69-33368

Bird impact resistance of polyurethane foam filled tailplane
17 p2901 A69-33648

Bird hazard in aviation, discussing aircraft/bird collisions in France, protective measures and airport environment control against nesting and breeding
18 p3090 A69-34695

BIREFRINGENCE
Quantum theory of electrical birefringence of noninteracting diamagnetic molecules /Kerr effect/ subjected to static electric field and polarized plane wave
02 p0279 A69-11538

Glan-Thompson and Rochon prisms modified by replacing one of two calcite halves of cemented oriented birefringent crystals with glass
02 p0280 A69-11924

Rayleigh scattering from circularly birefringent media generalized for medium with no preferred internal axes
04 p0609 A69-14291

Instrument profile of birefringent Lyot filter for H alpha line determined from photographic spectra with grating spectrograph
04 p0664 A69-15524

Wideband multichannel optical signals nonlinear distortions during transmission by electrooptical modulators using Pockels effect
05 p0718 A69-15655

Optical investigation of defects in crystal lattices on stress induced birefringence basis, describing stress visualization results for Si and glass
11 p1887 A69-25199

Electromagnetic wave propagation in rectangular waveguide containing uniaxial anisotropic birefringent medium, deriving field equations
11 p1853 A69-25350

Polymers stress-strain behavior and corresponding birefringence within limited temperature range and strain rates
15 p2642 A69-30678

Wideband multichannel optical signals nonlinear distortions during transmission by electro-optical modulators using Pockels effect
16 p2754 A69-32512

Nonlinear analog of conical refraction in biaxial crystals, considering birefringence in piezoelectric uniaxial crystals and laser beam propagation
19 p3330 A69-35604

Linear limit uniaxial stresses for stress-strain and stress-birefringence in photoelastic and mechanical model materials
20 p3628 A69-37777

Poincare sphere properties representing birefringent behavior of materials and qualitative measurement technique for elliptically polarized light
21 p3844 A69-39318

Lummer-Gehrcke plate type polarizer made of birefringent material for Nd glass laser, discussing reflection coefficients in quartz crystals
21 p3739 A69-39541

Thermostatic electronic control device of birefringent filter in Wroclaw Observatory coronagraph during prominence observations
22 p3943 A69-40000

Photoelastic behavior in amorphous solids, proposing microstructural mechanism for deformation birefringence
22 p3972 A69-40081

Birefringent element within Fabry-Perot cavity for identification of direction of electron density change in z-pinch discharge
22 p3946 A69-40438

Babinet compensator with birefringent wedges made of stress frozen photoelastic material rather than quartz
22 p4042 A69-40442

BIREFRINGENT COATINGS
Birefringent coatings application to plane stress in orthotropic glass-fiber reinforced plastic materials noting stress-strain relations
11 p1995 A69-25647

Stress concentration on circular holes and notches in anisotropic oriented glass fiber reinforced plastics determined by using photoelastic birefringent coatings
15 p2713 A69-31053

BIRTH
Stillbirth and neonatal death in stressed rats exposed to mild and acute gravitational loads in automobile ride and aircraft flight
24 p4266 A69-43381

BISMUTH
Electrical properties of vacuum deposited Bi, noting association of negative temperature coefficient of resistance in Bi thin films with grain-boundary effects
02 p0296 A69-11878

Thermoelectric and thermomagnetic properties of bismuth at low temperatures, assuming thermal EMF due to phonon capture of carriers
03 p0488 A69-13885

Electrical conductivity and Hall effect in thin evaporated bismuth films under vacuum using three point method in variable temperature cryostat
09 p1557 A69-21692

Thermoelectric and thermomagnetic properties of bismuth at low temperatures, assuming thermal EMF due to phonon capture of carriers
11 p1938 A69-25686

Low resistance Bi thin film complex electrical impedance in IR range, stating methods and equivalent circuits for determining impedance
13 p2322 A69-28011

Electrode surface bismuth coating selected for reducing electrostatic analyzers photocurrents
14 p2446 A69-29048

BISMUTH ALLOYS

Low temperature energy band gap in n-type single semiconductor crystals of In-Sb-Bi alloys analyzed by measuring Hall constant and optical absorption coefficient

19 p3390 A69-36552

BISMUTH COMPOUNDS

Phase diagram, dielectric and magnetic properties of Bi manganate/Pb titanate solid solutions of perovskite structure, showing dependence on composition and temperature

22 p3996 A69-41163

BISMUTH OXIDES

Bismuth oxide introduction into Y and Y-Al garnets, noting effect on formation and properties

13 p2320 A69-27998

BISMUTH TELLURIDES

Phase diagram of BiTeI degenerate semiconductor crystals synthesized by heat treatment, discussing crystallization methods and physical properties

02 p0294 A69-11540

Bismuth selenide inhomogeneous distribution effect on thermoelectric properties of bismuth telluride alloy

04 p0644 A69-15265

Electrical conductivity and thermoelectromotive force of bismuth telluride and bismuth telluride-bismuth selenide alloys obtained by sintering, hot pressing and annealing

15 p2670 A69-31248

BISTABLE AMPLIFIERS

U FLIP-FLOPS

BISTABLE CIRCUITS

Optically bistable operation of continuous wave GaAs p-n junction laser at 20 K

01 p0090 A69-10565

Bistable zones in series oscillator circuit consisting of inductor and nonlinear p-n junction capacitance subjected to DC and AC voltage sources

04 p0575 A69-14463

Bistable fluid device utilizing Coanda effect along convex surface for wall attachment [ASME PAPER 68-WA/FE-27]

05 p0749 A69-16101

Mathematical model for voltage step-down DC to DC converter with hysteretic bistable trigger circuit regulating output voltage

06 p0904 A69-17941

Bistable zones in series oscillator circuit consisting of inductor and nonlinear p-n junction capacitance subjected to DC and AC voltage sources

14 p2418 A69-28834

BISTATIC REFLECTIVITY

Bistatic radar cross sections of simple shapes calculated based on optics and resonance region, noting forward, nonforward and Rayleigh scattering

03 p0384 A69-12906

Hologram form of forward scatter bistatic radar or sonar

07 p1078 A69-18866

Inverse scattering technique for electromagnetic bistatic scattering by expressing field produced by incident plane wave as sum of incident field and Fourier transform

16 p2754 A69-32569

Bistatic radar scattering cross sections for reentry vehicle with ionized wake

23 p4116 A69-41593

BIT SYNCHRONIZATION

Maximum likelihood bit synchronizer for baseband PCM signals in Gaussian noise, stressing system noise performance analysis and measurements

07 p1105 A69-19093

PCM bit synchronizer/signal conditioners performance characteristics and specification

07 p1106 A69-19120

Bit error probability estimation of NRZ PCM synchronizer and detector operating in presence of fluctuating data frequency source

07 p1083 A69-19121

Binary block codes for correction of substitution and synchronization errors

09 p1452 A69-21316

Optimum timing extraction/bit synchronization/pulse code transmission, analyzing probabilistic structure by statistical parameter estimation and deriving system

09 p1455 A69-22115

Bayesian theory to determine maximum a posteriori estimation algorithms for optimum bit synchronization in digital communication systems

14 p2413 A69-29496

Nonlinear filter theory application to PCM bit synchronization, relating bit error rates to SNR and timing jitter

19 p3270 A69-36245

Absolute value type of early-late gate bit synchronizer phase noise performance determined by Fokker-Planck method, comparing results with different circuits performance

19 p3270 A69-36246

High bit rate signal conditioning, bit and group synchronization of NRZ PCM, considering gain and power bandwidth limitations and delays

19 p3271 A69-36247

PCM bit synchronizer signal to noise ratio measurement by input video signal zero crossings counting

19 p3271 A69-36248

PCM bit synchronizer models, discussing phase errors gate and differentiating devices

19 p3271 A69-36249

Optimum and suboptimum synchronizers for extracting bit synchronization from binary data, showing performance dependence on pertinent system parameters

21 p3673 A69-38923

Digital transition tracking symbol synchronizer for low SNR coded telemetry systems, discussing phase locked loop analysis and phase detector simulation by Monte Carlo method

23 p4130 A69-42513

BITERNARY CODE

Bandwidth restriction effect on performance of linear codes for digital communication with space vehicles, noting bit and word error probabilities

08 p1276 A69-20597

BITS

Bit reduction in digital transfer functions with LF poles in sampled data systems using zero order hold function

04 p0584 A69-15464

Computer simulation of unbiased digital recording composed of sequential computations intended for various bit densities [IEEE PAPER 3.3]

09 p1461 A69-22562

High speed ten-bit analog to digital converter with medium scale integration (MSI) elements, considering conversion accuracy and time

11 p1845 A69-24520

BITUMENS

Construction practice for hot-mix bituminous pavements covering production, composition, application and quality control

01 p0057 A69-11276

BLACK BODY RADIATION

Two element interferometer observing Saturn, Uranus and Neptune at 3.12 cm, determining equivalent black body disk temperature

01 p0148 A69-10052

Aerial radiation temperature measurement, damping factor of atmosphere and determination of ground and water surface temperatures by radiometry

01 p0110 A69-10693

Far IR rocket observations of night sky background radiation

01 p0121 A69-11249

Solid body surface roughness influence on radiative properties, deriving expressions relating radiative properties to surface roughness parameters

02 p0350 A69-11575

Radiative heat transfer through transmission layers sandwiched between black bodies with variable blackness spectra

02 p0350 A69-11578

Metagalaxy temperature brightness explained from radio sources combined radiation with inversion spectra

02 p0313 A69-11632

Thermal noise from passive linear multiports, noting influence of temperature and absorption coefficients

02 p0211 A69-12443

Threshold conditions for laser pumping with emission of perfect black body

03 p0442 A69-14220

Moving isotropic black body radiation, discussing effect on energy flux and earth velocity measurement through 3K cosmic background radiation

04 p0649 A69-15150

Intergalactic continuum study showing universe behavior like black body with 2.7 K radiation temperature, noting cosmological and cosmogonic importance

05 p0827 A69-16593

Black body radiation coherence properties characterization by stochastic Gaussian scalar potential correlation function

05 p0795 A69-16819

Black body cavity radiation distribution as seen by observer in arbitrary uniform motion with respect to radiation mass center

08 p1380 A69-19784

Inverse Compton effect and universal black body radiation from less energetic radio photons of galactic and metagalactic origin

08 p1381 A69-19786

Early evolution of universe related to present upper bound of primordial black body gravitational radiation temperature

09 p1601 A69-22210

Sco X-1 optical spectrum magnitude and color changes, proposing variable black body model

09 p1601 A69-22213

Small microwave antenna calibration by method of two black bodies exposed to different temperatures, reducing influence of cloudiness and humidity

11 p1844 A69-24450

Relativistic coherence theory of black body radiation in transparent medium, deriving expressions for second order correlation tensors by phenomenological quantum electrodynamics

11 p1920 A69-25563

Specularly vs diffusely reflecting cylinders for cavity type sources of approximately black body radiant energy, noting ray tracing of cones

12 p2130 A69-26245

Isotropic 3 K black body radiation implications for hot cosmological model, formation of galaxies, existence of superdense bodies and density nonuniformity during prestellar stage

12 p2167 A69-27047

Two channel IR radiometer for 1969 Mariner mission measuring equivalent black body surface temperature

17 p2972 A69-33085

Thermal emission and spectral degree of blackness of W derived from electron motion equation

18 p3156 A69-34715

Threshold power, gain, output power and radiation energy during optical pumping of Q switched molecular laser by black body radiation

20 p3554 A69-37722

Force fields to establish nature and position of remotely located conditions, discussing radiated power, electromagnetic waves, black body radiation, etc

20 p3494 A69-37747

Radio background radiation produced by Galaxy, considering energy, isotropy of radiation and black body character

21 p3790 A69-38821

Radiative transfer in interior of two concentric spheres in motion assuming low density of residual gas

22 p4031 A69-40907

Planck law for black body radiation spectrum theoretically derived on basis of classical Lorentz-invariant electromagnetic radiation at absolute zero temperature without quantum assumption

22 p3982 A69-41001

Black body radiation at very high temperatures, discussing pion-nucleon interaction in pion gas in thermal equilibrium

23 p4238 A69-41358

Diffuse cosmic X rays from Compton collisions between galactic leakage electrons and extragalactic background photons to verify microwave blackbody radiation properties

24 p4368 A69-43202

Transmission functions probabilistic model for solving radiative transfer problems in spherical shell medium surrounding emitting black core or point source, using integrodifferential equations

24 p4415 A69-43637

BLACK BRANT 2 SOUNDING ROCKET

High altitude observations of luminous wake behind Black Brant 2 rockets by mounted dual wavelength spatially scanning photometer

06 p0918 A69-17511

Aerodynamic failure investigation of Black Brant 2 single stage sounding rockets

15 p2703 A69-31545

BLACK KNIGHT ROCKET VEHICLE

Gamma type 2 rocket engine for second stage of Black Arrow satellite launcher

01 p0143 A69-10834

Black Arrow space vehicle uprating, considering engines burning kerosene with HTP and turbopumping systems

01 p0143 A69-10835

Increased payload in orbit capability for future versions of Black Arrow vehicle, discussing propellant

02 p0335 A69-12681

Facilities at High Down Test Site for testing Black Arrow launch vehicles, discussing mechanical and electrical equipment test procedures 04 p0585 A69-15041

Black arrow rocket vehicle flight path computer programming, discussing geographical restrictions on design 09 p1593 A69-21616

Structure, equipment and weight breakdown of Black Arrow X3 spacecraft 13 p2357 A69-28478

Propellant pressurization system for British Black Arrow composite vehicle, describing valve design and performance 14 p2509 A69-29629

Control system design for Black Knight test vehicle system 14 p2530 A69-29630

Black Arrow third stage velocity increment vector accuracy, considering attitude errors due to spin-up and spring separation systems, separated stages interactions, light-up impulses, etc 23 p4209 A69-41301

BLACKBURN B-103 AIRCRAFT
U BUCCANEER AIRCRAFT

BLACKOUT [PROPAGATION]
NT ATMOSPHERICS
NT COSMIC NOISE
NT DAWN CHORUS
NT ELECTROMAGNETIC NOISE
NT HISS
NT IONOSPHERIC CROSS MODULATION
NT IONOSPHERIC NOISE
NT IONOSPHERICS
NT POLAR RADIO BLACKOUT
NT SHOT NOISE
NT SUDDEN ENHANCEMENT OF ATMOSPHERICS
NT THERMAL NOISE
NT WHISTLERS

Radio frequency signal transmission between orbiting spacecraft and vehicle entering VM-10 model atmosphere, examining near wake approximations and plasma-electromagnetic interaction 09 p1455 A69-22002

Amplitude modulation of electromagnetic waves by modulated magnetic fields for communications through rocket exhausts and reentry plasma sheaths during blackout 14 p2417 A69-29591

Mars entry capsule ionized wake producing circularly polarized antenna radiation null region, noting effect on communication blackout time 22 p3914 A69-40701

BLADDER
Pressure garments weight reduction methods, comparing partial pressure systems equipped with bladder, capstan, airpipe or foam rubber 06 p0884 A69-18037

BLADE TIPS
Self excited rotor blade oscillation at high subsonic Mach numbers during flight tests of Sikorsky NH-3A compound helicopter 07 p1053 A69-18870

Rotor dynamics of stowed rotor aircraft, analyzing blade stiffness in wind tunnel [AIAA PAPER 69-207] 07 p1057 A69-19578

BLADES
Potential flow past plane array of thin blades, analyzing perturbed dynamic behavior 21 p3696 A69-39243

BLANKING [CUTTING]
Ti alloy blanks production technology and quality control, noting rolling of sectional profiles 07 p1161 A69-18765

Electromagnetic shaping of metallic parts using equations describing magnetic and electric field intensity as function of blank profile and cylindrical blank wall thickness 18 p3151 A69-35456

BLASIUS EQUATION
Blasius-Chaplygin formula for generalizing Kutta-Joukowski theorem concerning jet profiles, calculating resultant of hydrodynamic forces 11 p1867 A69-24355

Compressible laminar boundary layer behind shock or thin expansion wave past moving flat plate solved by transforming governing equations into Blasius equation 24 p4305 A69-43596

BLASIUS FLOW
MHD boundary layer equations in Blasius problem reduced to differential equations and solved by Laplace transform 01 p0127 A69-10337

Inviscid hypersonic flow of uniform equilibrium gas past axisymmetric blunt body 04 p0542 A69-14723

Boundary layer over impulsively started flat plate, describing flow transition from unsteady /Rayleigh/ to steady /Blasius/ state by iterative methods 16 p2769 A69-31812

BLAST LOADS
Mechanical model of human body used to study response to vibration, impact, blast and decompression loads 04 p0552 A69-14470

Structures response to explosive blast, discussing damage criterion in terms of blast wave impulse and critical time 04 p0671 A69-14476

Effective slip systems in hexagonal close packed magnesium alloy under static and hydroexplosive loading, examining flow mechanism for fine structure formation 04 p0615 A69-14639

Finite inelastic deformations under transverse impulsive loading of clamped thin rectangular planform shells idealized as membranes, using incremental plasticity theory 09 p1616 A69-21939

Compression waves observed ahead of luminous discharge plasma below Mach 12-15 in electric shock tube, describing shock structure by blast wave theory 16 p2768 A69-31664

Blast response of model structures fabricated from material differing from prototype structures, testing in dynamic, impulsive and quasi-static loading realms 16 p2874 A69-32164

Hot dense plasma used as driver gas producing plane stable current-free high Mach number shock fronts resembling plane blast waves 24 p4359 A69-43647

Permanent deformation of axial rod subjected to blast load predicted using partial differential equation in conjunction with stress-strain relationship 24 p4406 A69-43699

BLASTOFF
U ROCKET LAUNCHING

BLEACHING
Bleaching of absorption hologram diffraction gratings for improved light efficiency, discussing bleaching materials results 04 p0596 A69-14284

BLEED-OFF
U PRESSURE REDUCTION

BLEEDING
Bleed air environmental system utilizing air to air jet pumps as flow multipliers for cabin pressurization air supply in commercial turboprop aircraft [SAE PAPER 690331] 11 p1941 A69-24494

BLENDS
U MIXTURES

BLIND LANDING
Jumbo jet instrument landing difficulties, suggesting specific improvements in aircraft and airport equipment 15 p2549 A69-30189

Monograph on low visibility landing in civil aviation, considering visibility determination methods and equipment and IR sighting devices 20 p3574 A69-38064

All-weather landing in civil air operations, discussing ground/air systems in tracking, visual reference and aircraft performance required for safe landing capability 20 p3574 A69-38119

Kalman filter simulation for estimating aircraft position and velocity from airborne digital computer data in zero-zero landing system [AIAA PAPER 69-944] 22 p3978 A69-40327

BLINDNESS
NT FLASH BLINDNESS

Retinal burn resulting from prolonged viewing of sun, laser or thermonuclear explosion, noting effects on choroid, receptors and pigment cells 08 p1267 A69-20680

Visual systems of hamster brain, discussing relative visual localization and discrimination blindness produced by ablation of cortical or tectal areas 08 p1265 A69-20685

Human visual response to moving spatially periodic patterns, analyzing critical frequencies, dependence on stimulus area and period, phase blindness and pattern reversal 22 p3880 A69-40850

BLISTERS [PROTUBERANCES]
U PROTUBERANCES

BLOCH BAND
Two band model for determining linear and non-linear electromagnetic responses of small band gap semiconductors in magnetic field 03 p0487 A69-13753

Electron states at deep levels in InSb by deriving equations for Bloch wave functions of conduction and valence bands 09 p1556 A69-21508

BLOCKING
Thermal protection by ablation calculated, emphasizing blocking phenomenon and effectiveness of laminated and reinforced resins 02 p0351 A69-11890

Blocking processes synchronous development involving atmospheric circulation disturbances in Northern and Southern Hemispheres, noting localization in Pacific and Atlantic oceans 13 p2292 A69-27840

Jet stream blocking process simulation using geostrophic system of equations, considering effects of orography and contrast heating due to land-sea distribution 16 p2809 A69-32602

Blockage effects of flat plates and solid bluff bodies in closed wind tunnels compared concerning drag coefficient values 17 p2890 A69-33245

Sotalol and propranolol cardiovascular effects, comparing toxicity and blocking action against circulatory and cardiac effects of catecholamines 23 p4080 A69-41403

BLOOD
NT EOSINOPHILS
NT ERYTHROCYTES
NT LEUKOCYTES
NT LYMPHOCYTES
NT RETICULOCYTES

Insignificant or recoverable changes observed in blood acetylcholine content and cholinesterase activity of rabbits subjected to 8 g acceleration 02 p0197 A69-11491

Diffusion coefficients for oxygen transport in whole blood, discussing effects of intact red cell concentration 02 p0200 A69-12479

Biochemical indicators of pilot reactions to flights complicated by unexpected autopilot failures, using postflight chemical analysis of blood and urine 05 p0710 A69-16525

Regional uptake of melatonin from blood or cerebrospinal fluid by rat brain 09 p1444 A69-21466

Decreased antidiuretic activity measured in blood of chronically centrifuged rats, noting role of antidiuretic hormone /ADH/ 14 p2407 A69-29301

Glucose disappearance rate from dogs blood at simulated 27,000 ft altitude compared with tolerance at ground level, discussing chlorpromazine administration effect 14 p2408 A69-29305

Biochemical indicators of pilot reactions to flights complicated by unexpected autopilot failures, using postflight chemical analysis of blood and urine 18 p3096 A69-34744

Pathological effects of single 120 Mev proton doses on rats blood in rotating cylinder, discussing leukopenia and benign and malignant tumors development 21 p3658 A69-39058

Blood oxygen content measured by oxygen tension after release by carbon monoxide without lysing cells 22 p3873 A69-40203

Yield stress of normal human blood related to endogenous fibrinogen concentration as function of total protein concentration, proposing fibrinogen adsorption and coupling model 22 p3874 A69-40223

Digital computer program for determining avascular and capillary blood gas compositions corresponding to ventilation-perfusion values, considering dissolved oxygen and inert gas exchange 22 p3875 A69-40230

Oxygen supersaturation in unstirred blood under temperature effects, noting tension loss during stirring 23 p4077 A69-41296

S-4 human blood experiment during Gemini 2 flight, studying spaceflight ionizing radiation interaction effects on single and multiple break chromosome aberrations 23 p4085 A69-41600

Human blood viscosity measurement over wide range of shear rates, obtaining rheological data, suggesting osmotic red cell crenation role
23 p4095 A69-42078

BLOOD CIRCULATION

NT BRAIN CIRCULATION

NT CORONARY CIRCULATION

NT PULMONARY CIRCULATION

Hypokinesia and transverse accelerations combined effect on human cardiovascular system and regional blood circulation
02 p0197 A69-11495

Cardiovascular system simulation using computer models transport and perturbation methods
03 p0380 A69-13855

Weightlessness effect on blood circulation system of human beings and animals during suborbital/ orbital space flight
03 p0376 A69-14194

Changes in blood circulation, external respiration and gas exchange rates in humans during prolonged hypodynamia
03 p0377 A69-14204

Combined effect of prolonged bed rest and acceleration exposure on human blood circulation, noting increased heart rate and arterial blood pressure
10 p1646 A69-23584

Blood oxygen metabolism, analyzing content and volume circulation in dogs under oxygen partial pressure decrease in inhaled air
12 p2019 A69-26346

Compensative adaptational reactions to weightlessness, discussing blood supply to thorax area, external respiration, gas exchange and energy loss during parabolic and orbital flights
17 p2909 A69-33384

Ultrasonic detection of gas bubbles in blood, discussing device with bubble chamber attached to circulating liquid and receiver crystal harmonics
18 p3098 A69-34821

Statistical relations between minute blood circulation volume, O capacity and consumption rate in tissues of men and dogs
19 p3260 A69-35896

Linearized wave propagation digital simulation models to predict arterial blood flow characteristics and impedance, comparing phase velocity and transmission per wavelength
19 p3264 A69-36868

Biological material flow phenomena, discussing rheological approach, microcirculation, macrocirculation, instrumentation and mathematical model for quantitative observation
20 p3473 A69-37602

Bubble size and blood perfusion effect on gas bubbles absorption in tissues, noting decompression sickness
21 p3651 A69-38389

Rheography of blood circulation of forearm after tightening with pneumatic cuff, analyzing amplitude increase and information about vascular system
21 p3653 A69-38838

Left ventricular function in intact anesthetized dogs analyzed during graded hypovolemia produced by lower body negative pressure
22 p3874 A69-40225

Whole body LF mechanical vibration effects on anesthetized dogs peripheral circulation and vascular smooth muscle
22 p3875 A69-40228

Arterial and deep venous blood from human forearm analyzed following rest and rhythmic exercise on ergometer in hyperbaric oxygen chamber
22 p3878 A69-40834

Heart beat rate, arterial pressure, blood volume and peripheral blood pressure increase observed in dogs running 7 min at 10 km/hr
22 p3885 A69-40966

Flow profile effect on signal of Doppler ultrasonic flowmeter, noting limited application to quantitative blood circulation measurements
23 p4166 A69-42085

Venous tone, peripheral venous pressure, skin and muscle blood flow, alterations of heart rate and respiration in men during leg exercise
23 p4096 A69-42090

Receptor and adrenergic blockade effects on blood loss, tolerated period and metabolic sequels of hypotension in dogs
23 p4098 A69-42102

Blood flow, volume and venous pressure measurements in right hand at low and high altitudes in residents and newcomers
23 p4098 A69-42106

Central circulatory responses of humans to rapid skin temperature changes during continuous exercises
24 p4258 A69-42633

Blood viscosity as possible key factor in physiology and pathology of circulation, suggesting causes of myocardial infarction and coronary occlusion
24 p4261 A69-42725

BLOOD COAGULATION

Dogs blood coagulation system functional state after 22 day space flight onboard Cosmos 110
08 p1262 A69-19830

Blood coagulation in animals under acute hypoxia at exposures to pressure corresponding to 5000 m altitude, noting blood morphology
12 p2019 A69-26348

Hypokinesia and nutrition deficiency effect on blood coagulation, noting combination with accelerations may lead to hypocoagulation
13 p2212 A69-28625

Arterial occlusion effects on retinal structure in cats, describing degrees of cell degeneration
22 p3884 A69-40883

BLOOD FLOW

Blood volume in rats exposed to high altitude and deacclimated at ambient pressure, noting changes and control level restoration
01 p0015 A69-10922

High energy X ray irradiation of head of *Macaca mulatta*, determining effect on cerebral blood flow and blood pressure
03 p0376 A69-14075

Transient method for measuring thermal properties of biological materials, concerning thermal conductivity, inertia and blood flow rate
06 p0879 A69-17086

Oxygen saturation in outflowing and inflowing renal blood in dogs under normal and hypoxic conditions, assessing cannula technique
14 p2406 A69-28916

Cardiac output determined simultaneously in adult male humans by thoracic impedance changes and radioisotope dilution
14 p2408 A69-29304

Gastric perfusion rate in restrained animals determined by Rb 86 clearance technique
17 p2908 A69-33170

Flow rate in ascending aorta, stroke volume and cardiac output determination by ballistocardiography, calculations based on Hagen-Poiseuille theory
17 p2915 A69-33772

Sheet geometry of lung blood vessel system, discussing histological evidence and fluid dynamic consequences of sheet flow
19 p3263 A69-36656

O conductance nonlinear equation solution applied to O uptake at sea level and at altitude, noting blood transport problems
21 p3654 A69-38906

Decompression gas emboli detection while moving in flow streams of arteries and veins using ultrasonic Doppler shift principle and square-wave electromagnetic flowmeter
21 p3663 A69-38914

Critical closing phenomenon in dog gracilis muscle, using pressure flow measurements and tissue staining techniques, detecting sudden vessel closure in microcirculation
22 p3873 A69-40202

Blood sheet flow velocity distribution and pressure gradients in pulmonary alveolar septa determined, allowing for system elasticity
22 p3874 A69-40216

Unilateral hypoventilation effect during bronchspirometry on human pulmonary blood flow
22 p3875 A69-40229

Pulsatile blood flow physical characteristics in short vascular segments
22 p3878 A69-40785

Carbon dioxide washout during square wave hyper-ventilation in man, postulating blood flow factor
22 p3885 A69-40975

Gilson cuvette densitometer used for blood flow measurement in canine forelimb and human forearm and hand during constant intrabrachial arterial dye infusion
23 p4077 A69-41294

Stratified blood flow distribution in lung lobule from analyzing breath-holding changes on expired Ar and nitrous oxide tension plateaus during rest and exercise
23 p4078 A69-41315

Pulmonary capillary blood flow, stroke volume and heart rate measured in tilted and supine subjects during

respiration, discussing tourniquets and intravenous atropine effects
23 p4082 A69-41445

Pump system to obtain indocyanine green dye dilution curves without blood loss in small animals and infants
23 p4101 A69-41450

Coronary vessel lumen changes under oligemic hypotension resulting from circulating blood volume decrease in anesthetized cats, discussing constrictory coronary vessel responses
23 p4084 A69-41470

Acceleration effect on greyhound cardiac output and regional blood flow from Saprirstein radioisotope uptake technique, studying blood, skin, skeletal muscle, etc
23 p4089 A69-41823

Forearm skin capacity vessels tonus as function of intrapulmonary pressure during positive and negative pressure breathing
23 p4093 A69-42068

Microrheological property of blood measured with microglass fiber viscosimeter, noting sensitivity to intercellular friction of erythrocytes
23 p4098 A69-42100

Pulsatile flow in coronary arteries simplified model compared with experiment in anesthetized dogs
23 p4098 A69-42103

Sinus outflow relationship to oxygen content in anterior cardiac vein blood and right ventricle systolic pressure
23 p4098 A69-42105

Hemolysis rates in various blood flows, considering effects on energy dissipation
23 p4100 A69-42533

Alaska sled dogs cardiovascular performance and flow distribution during cross country runs
24 p4256 A69-42624

Pulmonary capillary blood flow pulse of healthy men in supine position recorded by nitrous oxide/plethysmograph and phonocardiogram
24 p4259 A69-42638

Stewart-Hamilton formula for cardiac output measurements and regional blood flow determination
24 p4271 A69-42784

BLOOD PLASMA

P32 distribution in protein of blood serum, liver and brains of rats bombarded with high energy protons
02 p0198 A69-11507

Sonic boom effect on corticosteroid level in human blood, noting no changes
03 p0378 A69-14209

Identity between growth hormone degrading activity of pituitary gland and plasmin
06 p0873 A69-17105

Sympathetic neurohormones measurement in plasma of race car drivers
07 p1067 A69-19424

Acetate carbon 14 utilization in centrifurats rats, analyzing metabolism by measuring plasma glucose, FFA and lipids synthesis
07 p1067 A69-19429

Microwave radiation effects on body weight and peripheral blood hemograms of mice, discussing maximum safe exposure related to generator output
08 p1266 A69-20678

Monomethylhydrazine /MMH/ toxic effects on cornea and blood aqueous barrier studied in vivo on dogs
09 p1447 A69-22547

Repeated blood sampling effect on plasma cholinesterase, acid phosphatase, alkaline phosphatase and hematocrit ratios in domestic chickens
10 p1644 A69-23158

High altitude acclimatization effects on cardiovascular system, external respiration, blood composition, optical and vestibular analyzers in human subjected to various stresses
13 p2212 A69-28623

X ray radiation damage to white mice blood serum proteins disappearing following intraperitoneal administration of imidazole or benzimidazole
23 p4077 A69-41300

Physical and psychic stress effects on phosphatidyl glycerol and related phospholipids concentration in human and rat blood plasma
23 p4088 A69-41815

Change in weight, plasma volume, urine flow and hematocrit in man before and after immersion up to chin in thermally neutral bath
23 p4096 A69-42087

Respiratory effects of body temperature changes separation from blood osmolarity changes in dehydrated man
23 p4097 A69-42094

Stewart-Hamilton theorems for total input-output analysis of body cholesterol in man
24 p4259 A69-42639

BLOOD PRESSURE
NT HYPERTENSION
NT HYPOTENSION
NT SYSTOLIC PRESSURE

Human systolic and diastolic blood pressure measuring apparatus and method
01 p0079 A69-10296

Cardiac output during space flight based on rebreathing method for estimation of gas tension in mixed venous blood and Fick equation [UN PAPER 68-95746]
01 p0151 A69-10527

Ocular motor failures in pilots due to convergent and divergent strabismus, discussing low pressure chamber tests and blood pressure effects on cranial nerve
03 p0370 A69-13470

High energy X ray irradiation of head of Macaca mulatta, determining effect on cerebral blood flow and blood pressure
03 p0376 A69-14075

Astronauts increased heart beat, respiration rates and higher blood pressure subsides during repeated weightlessness tests
07 p1061 A69-18582

Telemetering aortic blood pressure and heart rate from dogs under various physical activities and emotional stress
07 p1071 A69-19133

Blood pressure fluctuations in multiple extra systoles during tilt table studies for flying fitness of pilot
10 p1645 A69-23379

Dogs orthostatic tolerance and resistance to transverse acceleration after 14-day hypodynamia, studying tachycardia and arterial pressure
10 p1645 A69-23499

Bed rest effect on orthostatic tolerance of patients with acute myocardial infarction and without heart failure
10 p1648 A69-24189

Single channel pressure telemetry unit for chronic implantation into cardiac chambers or major blood vessels in unrestrained animals for measuring ventricular pressure
11 p1831 A69-25642

Acceleration component in pelvis to head direction found influencing hyperemia of brain at various g forces
13 p2212 A69-28626

Blood pressure telemetry of pilot during flight including determination of psychophysical relations
15 p2559 A69-31229

Intravascular pressure and sound measured in anesthetized dogs and humans using fiberoptic pressure catheter
17 p2917 A69-34172

Vestibular analyzer function relation to arterial pressure during otolith stimulation experiments on subjects susceptible and nonsusceptible to motion sickness
20 p3472 A69-37264

Pulmonary arterial pressure for perfusion of excised dog lungs after inflation not due to shunt channels through atelectasis areas
21 p3651 A69-38386

Heart beat rate, arterial pressure, blood volume and peripheral blood pressure increase observed in dogs running 7 min at 10 km/hr
22 p3885 A69-40966

Static pressure-diameter measurements on small pulmonary blood vessels of frogs, analyzing capillary septal area as function of intravascular pressures noting high compliance
22 p3885 A69-40974

Cardiovascular effects of hypoxia in conscious and anesthetized dogs in environmental chamber, discussing artery pressure, tachycardia, stroke volume and cardiac output
23 p4078 A69-41314

Arterial pressure and heart rate responses to increased intrapulmonary pressure in anesthetized dogs via simulated Valsalva tests
23 p4078 A69-41365

Mathematical formulation for relative values of cardiac output and peripheral resistance as two contributing factors to arterial pressure change
23 p4085 A69-41473

Physiological response to steady state hypoxia from exposure to 12 percent oxygen atmosphere, noting minimal heart rate and blood pressure changes
23 p4085 A69-41673

Jet pilot blood pressure response during positive acceleration in actual flight measured by telemetry compared with centrifuge test
23 p4089 A69-41822

Aortic pressure effect on left ventricular function, emphasizing effect of heart rate hematocrit and oxygen consumption
23 p4092 A69-42061

Sinusoidal pressure electric stimuli frequency effects in isolated carotid sinus on canine peripheral blood pressure, determining dynamic characteristics from observation data
23 p4092 A69-42062

Diurnal rhythms of heart rate and blood pressure reactions to posture changes on tilt table, finding orthostatic lability maxima
23 p4094 A69-42072

Portal blood pressure decrease effects on diuresis in unanesthetized rats, discussing osmotic diuresis
23 p4094 A69-42074

Human arterial pressure reflex regulation during sleep, assessing baroreflex sensitivity
24 p4257 A69-42626

Gravitational stress effect on heart and venous system, discussing digital computer model simulating pressure changes under head-up and down tilt
24 p4271 A69-42783

BLOOD VESSELS
NT AORTA
NT ARTERIES
NT CAPILLARIES [ANATOMY]
NT VEINS

HF pressure waves dispersion in blood vessels ascribed to viscoelastic behavior of walls
02 p0204 A69-12602

Thermal radiation effects on cutaneous vasomotor and sudomotor control of human organism [AGARDOGRAPH-111]
08 p1265 A69-20672

Small eye movements measurement and retinal image stabilization based on tracking edge of blood vessel in optic disk
09 p1446 A69-21908

Arterial tone and human muscular activity limitations, analyzing hypodynamic effects on aorta, arm and leg vessels constriction
10 p1647 A69-23586

Sheet geometry of lung blood vessel system, discussing histological evidence and fluid dynamic consequences of sheet flow
19 p3263 A69-36656

Ultrasonic Doppler flowmeter for detection of circulating gas emboli of animal blood vessels during decompression
21 p3663 A69-38915

Critical closing phenomenon in dog gracilis muscle, using pressure flow measurements and tissue staining techniques, detecting sudden vessel closure in microcirculation
22 p3873 A69-40202

Alveolar and mixed venous carbon dioxide pressure during absence of gas exchange across mammalian lung
22 p3885 A69-40976

Coronary vessel lumen changes under oligemic hypotension resulting from circulating blood volume decrease in anesthetized cats, discussing constrictory coronary vessel responses
23 p4084 A69-41470

BLOWDOWN WIND TUNNELS
NT LOW DENSITY RESEARCH

Blow-down facility for hypersonic testing of air breathing engines, describing test cell, air heating system, exhausters and data system
02 p0227 A69-11756

Blowdown wind tunnel designed for studying closed cycle MHD converters, describing subsystems
10 p1673 A69-23474

Toshiba blowdown MHD test facility experiments on nonequilibrium ionization, using K seeded He for working gas
10 p1673 A69-23477

Error analysis for pressure measurements in blowdown supersonic tunnel
19 p3292 A69-35728

Supersonic blowdown wind tunnel operating at Mach numbers obtained by fixed nozzles for aerodynamic optimization of wings and bodies
20 p3510 A69-37422

Panel flutter testing in supersonic blowdown wind tunnels, analyzing model and test chamber layout
21 p3847 A69-39859

BLOWING

Determining influence of blowing various gases into boundary layer on friction and heat and mass transfer when external flow velocity varies according to power law
02 p0234 A69-12581

Hypersonic boundary layer on flat plate with strong hypersonic viscous interaction and uniform surface blowing distribution
04 p0588 A69-14722

Lift augmentation by lateral blowing over lifting surface, discussing wind tunnel pressure tests on wings, flaps and stabilizers [AIAA PAPER 69-193]
07 p1051 A69-19554

Laminar boundary layer control by combined blowing and suction, analyzing surface roughness influence concerned with underwater vehicle skin friction reduction [AIAA PAPER 69-387]
15 p2591 A69-30477

Supersonic flow past cone in presence of blowing normal to cone surface, calculating flow field parameters behind conical shock wave
15 p2548 A69-31175

Laminar boundary layer control on two dimensional body by combined blowing and suction in presence of roughness, noting skin friction reduction [AIAA PAPER 68-641]
17 p2957 A69-34015

Circulation control by blowing and application to stopped rotor aircraft, discussing data from model scale blade experiments
19 p3248 A69-36767

Blowing effect on surface friction coefficient and heat transfer in turbulent boundary layer in compressible fluid with pressure gradient
21 p3643 A69-38636

Steady constant density two dimensional flow in laminar boundary layer over permeable curved surfaces, showing effects of suction or blowing
23 p4153 A69-42399

Mass injection by strong blowing across Couette-Poiseuille shear flow
24 p4301 A69-43554

Similarity solutions to massive blowing problem, discussing inviscid flow model compatible with no-slip condition
24 p4305 A69-43658

BLUE GREEN ALGAE

Fatty acids in blue-green algae related to phylogenetic position
05 p0707 A69-15751

Gas vacuoles development in blue green algae by cell transfer from defined medium to distilled water
10 p1644 A69-23184

Microstructure of Proterozoic nanofossils bracketed by dated granitic events compared with living Eucapsis of blue green Chroococcaceae algal family
22 p3936 A69-40059

Blue green alga Anabaena flos-aquae A-37 growth limitation by absence of K or Na from culture medium
23 p4079 A69-41386

BLUFF BODIES

Model for asymptotic separated flow in wake behind broadside of bluff body, discussing separation point, interaction, reattachment, base flow and near wake
02 p0188 A69-11986

Equivalent cross section theory relating air resistance of randomly tumbling bluff objects to resistance of equivalent spheres
09 p1431 A69-22000

Nitrogen dilution low pressure simulation technique for subsonic flow flame stabilization of bluff bodies
09 p1624 A69-22614

Two dimensional stratified flow over obstacle in finite height channel, noting lee waves and drag increase with decreasing speed
11 p1869 A69-24892

Turbulent jet theory, thermal ignition theory and flameout characteristics of bluff body flame stabilizers
16 p2879 A69-32141

Blockage effects of flat plates and solid bluff bodies in closed wind tunnels compared concerning drag coefficient values
17 p2890 A69-33245

Laminar separation in incompressible fluid flowing past bluff body at high Reynolds number, investigating shock wave interaction with laminar boundary layers
18 p3122 A69-34918

Spanwise velocity correlations of turbulent vortices shed by two dimensional bluff body of D section with different aspect ratios, noting end plates effect
23 p4234 A69-42397

Turbulence characteristics of flow influence on critical flameout conditions of disk shaped flame stabilizer, circulation zone length and combustion efficiency by bluff body
24 p4408 A69-43078

BLUFFS [LANDFORMS]
U CLIFFS

BLUNT BODIES

Supersonic air flow around blunt body studied near critical line with allowance for viscosity, thermal conductivity and radiant energy transfer, assuming thermodynamic equilibrium

01 p0006 A69-10378

Ablation rate optical measurement near stagnation point of Teflon cylinder models, noting effect of nose curvature and temperature at supersonic speed

01 p0006 A69-10758

Hypersonic gas flow past blunt body problem solved by integral correlation method, taking into account radiation effects and gas dynamic parameter distribution in shock wave layer

02 p0188 A69-11651

Rarefied merged stagnation shock layer of hypersonic body, considering chemical reactions of nonequilibrium dissociative relaxation of air

02 p0189 A69-12521

Downstream radiation flux distribution calculated for blunt entry bodies, considering self absorption effects

02 p0354 A69-12547

Supersonic flow past blunt body with convex corner calculated to establish sonic point on body

03 p0362 A69-13406

Nosetip cooling system based on discrete subsonic forward liquid injection through ablative nosetip opening of blunted reentry vehicle

[AIAA PAPER 68-1141] 03 p0532 A69-13559

Reentry shock layer radiative heat transfer to surface of blunt superorbital vehicle

[AIAA PAPER 68-1151] 03 p0532 A69-13560

Blunt and conical body optimum heat shield shapes for Jupiter atmospheric entry, noting shallow flight path

[AIAA PAPER 68-1150] 03 p0520 A69-13565

Scaling laws for nose bluntness effects on hypersonic aerodynamics of bodies of revolution

[AIAA PAPER 68-1158] 03 p0362 A69-13566

Soviet book on hypersonic flow past truncated cones at various angles of attack with allowance for physicochemical equilibrium transformations

03 p0362 A69-13633

Problem of viscous supersonic flow past blunt bodies based on Navier-Stokes equations formulated and solved numerically with explicit difference scheme

03 p0363 A69-13653

Supersonic flow region about blunt body calculated on basis of gasdynamic equations for steady flow of inviscid nonheat conducting gas

03 p0363 A69-13658

Ideal gas flow near stagnation line for blunt bodies, applying van Dyke series truncation method to numerical solution

03 p0364 A69-13660

Heat input influence on hypersonic flows past sphere and circular cylinder

[DVL-844] 03 p0364 A69-13663

Numerical algorithm for supersonic gas flow past blunt bodies with shock wave separation, using Dorodnitsyn method of integral correlation

04 p0587 A69-14621

Cone tip blunting effect on cone local laminar heat transfer rate noting cone configuration, semivertex cone angle and Mach number

04 p0542 A69-14721

Inviscid hypersonic flow of uniform equilibrium gas past axisymmetric blunt body

04 p0542 A69-14723

Blunt cone hypersonic roll damping derivative, using Mach number distribution and graphical integration

04 p0542 A69-14739

Telemetry technique utilizing thermocouple sensors for base heating determinations on free flight blunt cone in shock tunnels, noting electrical noise reduction

[AIAA PAPER 68-407] 04 p0604 A69-15514

Hypersonic laminar and transitional heat transfer rate distribution on spherically blunted cones

05 p0696 A69-15707

Blockage correction for blunt based bodies of revolution in wind tunnels at low Mach numbers

05 p0699 A69-16395

Nonequilibrium supersonic flow calculation of detonating mixture past blunt bodies applied to flow of hydrogen-oxygen mixture past sphere

06 p0859 A69-17343

Aircraft aerodynamic characteristics determination from numerical computer solution of supersonic gas flow past blunt body with broken generatrix

06 p0859 A69-17582

Dynamic behavior of shock layer of supersonic rarefied gas flow past disk and sphere

06 p0861 A69-17812

Laminar near wake flow field of two dimensional adiabatic circular cylinder with surface mass transfer

[AIAA PAPER 69-67] 06 p0862 A69-18044

Chemical nonequilibrium, mass transfer and viscous interaction effects on spherically blunted cones at hypersonic conditions, emphasizing stagnation point

[AIAA PAPER 69-168] 06 p0862 A69-18047

Electron density shock layer profiles measured by Langmuir probe in hypersonic tunnel on blunt body for air flows and gas densities

[AIAA PAPER 69-81] 06 p0863 A69-18101

Time dependent technique for inviscid blunt body flows to analyze viscous rarefied shock layer regime, using Navier-Stokes equations

[AIAA PAPER 69-139] 06 p0865 A69-18173

Effects of multidimensional flow through porous matrices in mass transfer cooling, analyzing one dimensional model for blunt axisymmetric surfaces

[AIAA PAPER 69-149] 06 p1038 A69-18179

Dynamic stability derivatives of large angle blunted conical spacecraft near transonic speed in simulated Mars environment for various angles of attack

[AIAA PAPER 69-104] 06 p1019 A69-18210

Laminar boundary layer on axisymmetric blunt body in dissociated air taking into account nonequilibrium homogeneous chemical reactions

07 p1050 A69-18734

Hypersonic flow past blunt body near stagnation point, noting surface layer characterized by increased density and decreased entropy of gas

07 p1050 A69-18755

Solar wind flow past earth and magnetosphere correspondence to external aerodynamics of round nosed bodies in supersonic stream

07 p1128 A69-19360

Partially ionized argon plasma stagnation flow past blunt body using multifluid theory, obtaining flow profiles

08 p1369 A69-20817

One strip method of integral relations applied to inviscid supersonic blunt body problem

09 p1430 A69-21972

Fluid injection into flowfield from porous forward portion of blunt body in stagnation region flow, determining reservoir pressure and mass flow rate

09 p1430 A69-21973

Hypersonic drag and shock wave characteristics of blunt bodies including cones, spherical nose and concave nose bodies

09 p1433 A69-22568

Spherically blunted 15 degree semivertex angle cone flow field parameters at Mach 8.6, measuring pitot pressure and shock shape

11 p1818 A69-25143

Supersonic air flow past blunt body of revolution in presence of nonequilibrium chemical reactions, ionization and molecular excitation

11 p1820 A69-25474

Supersonic and hypersonic flow of rarefied gas around blunted cylinders at various angles of attack, noting pressure distribution on model surface

11 p1821 A69-25478

Supersonic air flow around blunt body studied near critical line with allowance for viscosity, thermal conductivity and radiant energy transfer, assuming thermodynamic equilibrium

12 p2012 A69-26669

Flow field instability over concave bodies in supersonic free stream computed by integration of gasdynamic equations, noting application to supersonic parachutes

[AIAA PAPER 68-946] 13 p2199 A69-28228

Angle of attack and blunting effect on aerodynamic lift and drag coefficients of flat plates in hypersonic flow at low Reynolds number

13 p2200 A69-28358

Supersonic wake recirculation flow over rearward facing two dimensional steps and blunt bases

14 p2389 A69-29031

Shock wave and blunt faced cylinder interaction in supersonic gas flow in two chamber shock tube observed with high speed photography

14 p2390 A69-29467

Supersonic gas flows in shock layer past blunt bodies taking into account selective radiation and radiative transfer in continuum, applying method of characteristics

14 p2390 A69-29477

Heat transfer at gas flow stagnation point past blunt body under radiation from air layer in shock wave wake, using gray gas model

14 p2390 A69-29614

Spatial supersonic ideal gas flows past blunt bodies analyzed by numerical finite difference methods, discussing flow fields and entropy

14 p2390 A69-29616

Laminar and turbulent hypersonic wakes trailing blunt bodies studied by finite difference method, taking into account pressure gradients and nonequilibrium chemical reactions effects

14 p2391 A69-29618

Boundary layer physical and chemical processes effect on dynamic parameters of high temperature hypersonic gas flow past blunt bodies

14 p2391 A69-29620

Hypervelocity reentry simulation problems for slender and blunt bodies, defining significant parameters

15 p2681 A69-30376

Godunov finite difference method modified for steady or unsteady flowfields about planar axisymmetric blunt bodies, presenting body pressures and shock shapes

16 p2732 A69-31886

Aerodynamic characteristics of cone/cylinder and cone/cylinder/cone configurations with blunted cones in hypersonic flows at small angles of attack

17 p2889 A69-33122

Mach number, cone angle, bluntness and wall to recovery temperature ratio effects on slender cones boundary layer transition measurements at hypersonic speeds

17 p2890 A69-33250

Nongray equilibrium radiative heat transfer in viscous radiating shock layer around blunt body entering high temperature nonisothermal carbon dioxide-nitrogen atmosphere

[AIAA PAPER 69-636] 17 p3070 A69-33258

Shock layer properties, radiative and convective heat transfer about two hypersonic blunt bodies at zero angle of attack in assumed Martian atmosphere

[AIAA PAPER 69-634] 17 p2891 A69-33281

Nongray absorption and radiation cooling on smooth symmetric blunt bodies included in modified Maslen flow field method for radiation and large blowing

[AIAA PAPER 69-637] 17 p2891 A69-33290

Hypersonic boundary layer transition on blunt slender cones at M equal 10 obtained independent Reynolds number

[AIAA PAPER 69-705] 17 p2954 A69-33455

Surface pressure and heat transfer over blunt conical body in hypersonic flow with uniform mass addition of various gases

[AIAA PAPER 69-716] 17 p2891 A69-33463

Nonequilibrium multicomponent ionization calculations for stagnation merged shock layer of hypersonic blunt body by successive accelerated replacement

[AIAA PAPER 69-655] 17 p2892 A69-33469

Electrical characteristics of equilibrium plasma sheaths at stagnation point of blunt body in high speed air, considering current collection regimes

[AIAA PAPER 69-702] 17 p3011 A69-33473

Cone boundary layer transition location and Reynolds number as function of nose bluntness combined effect with Ar, air and He mass injection

[AIAA PAPER 67-706] 17 p2955 A69-33476

Precursor plasma electron number densities calculations for blunt reentry vehicles, analyzing extreme UV radiation emanating from bow shock

[AIAA PAPER 69-718] 17 p2893 A69-33487

MGD hypersonic shock layer at spherically blunted body analyzed by utilizing induction equation including Hall effect

[AIAA PAPER 69-722] 17 p3012 A69-33494

Flow field study of merging between bow shock and viscous layer upstream of highly cooled axisymmetric blunt body in rarefied hypersonic stream

[AIAA PAPER 69-656] 17 p2893 A69-33498

Flow measurements about high Mach number low Reynolds number laminar wake behind spherically blunted cones, including surface and wake flow field data, radial wake profiles, etc

[AIAA PAPER 69-714] 17 p2894 A69-33500

Three dimensional incompressible wake behind blunt obstacle at leading edge of flat plate compared with mathematical model by Oseen linearization

18 p3083 A69-34403

Flow structure in wake of blunt bodies placed perpendicular in parallel airstream determined from hot-wire anemometry

[AIAA PAPER 69-746] 18 p3084 A69-34409

Radiative energy emission by blunt vehicle shock layer under severe entry conditions, discussing flow properties and radiative transfer coupling

[AIAA PAPER 69-719] 18 p3084 A69-34416

Aerodynamic characteristics of sphere and blunt cone in highly rarefied gas flow, noting molecular collision effect

18 p3086 A69-34708

Rarefied gas dynamics for continuous medium and discrete molecules assemblage, discussing flow over blunt model and free jet flow from sonic orifice
18 p3122 A69-34812

Transport processes effect in shock wave on hypersonic flow past blunt body in neighborhood of stagnation point, noting heat transfer
18 p3086 A69-34910

Rarified gas dynamics of blunt and sharp-pointed slender bodies in supersonic stream and free jet sonic expansion into high vacuum
18 p3123 A69-34924

Integral relation method analysis of supersonic gas flow past blunt body of revolution
18 p3086 A69-35051

Heat exchange in stagnation point region of blunt body, using shock test simulation of high speed flight
18 p3086 A69-35118

Systematic mathematical ordering of knowledge concerning three dimensional flow patterns around blunt bodies, emphasizing high speed computers role
18 p3089 A69-35269

Drag measurements for sharp and blunt-nosed bodies shot into wind tunnel supersonic gas counterflows, discussing shock waves for different configurations
19 p3239 A69-36401

Nose bluntness effect on hypersonic flow for slender blunt bodies with arbitrarily shaped lateral surfaces at small attack angle
19 p3239 A69-36402

Supersonic flow past segmented and blunt bodies, investigating flow characteristics
19 p3242 A69-36783

Stagnation point heating in hypersonic gas flow past blunt bodies, considering radiative transfer effects on shock wave temperature and density distribution, wave separation, etc
20 p3457 A69-36981

Hypersonic gas flow past blunt bodies valid for any optical thickness of gas, allowing for absorption coefficients dependence on temperature, pressure and frequency
20 p3457 A69-36993

Electron density distribution in laminar air boundary layer on sharp wedges and cones predicted by reducing chemical kinetic model to ordinary differential equations [AIAA PAPER 68-733]
20 p3458 A69-37181

Generalized series solutions of boundary layer flows over pointed and blunt nosed axisymmetric bodies, noting general potential flow extending Mangler transformation usefulness
20 p3514 A69-37211

Gaseous injection effect on laminar boundary layer hypersonic flow around transpiration-cooled blunt bodies analyzed by integral method and Newtonian model
21 p3644 A69-39014

Radiation self absorption effects on heating loads of blunt body during hyperbolic entry
21 p3644 A69-39040

Axisymmetric and two dimensional flows over blunt bodies at high Mach numbers by integral relations method
21 p3645 A69-39790

Dynamic stability derivatives of large angle blunted conical spacecraft near transonic speed in simulated Mars environment for various angles of attack
22 p4036 A69-40550

Piston motion influence on gaseous motion set up by constant energy explosion, applying to steady high Mach number flow past blunt nosed object
22 p3931 A69-40892

Transient flow resulting from plane shock diffraction by analytic blunt body, basing analysis on Taylor series expansions in space and time variables
22 p3860 A69-40895

Semianalytic solution for axisymmetrical supersonic inviscid flow near stagnation region of spherically blunted body with detached shock waves
22 p3861 A69-41178

Axisymmetric supersonic flow around spherically blunted body at small angles of attack, deriving equations for shock deformation perturbations and surface pressure
22 p3861 A69-41179

Radiative transfer effects in low Reynolds number or merged layer regime of hypersonic flow about axisymmetric blunt bodies, including thin shock layer theory
23 p4059 A69-41885

Blunt body stagnation point air ionization by chemical nonequilibrium thin viscous shock layer analysis, predicting electron density
23 p4060 A69-41917

Detachment in incompressible turbulent flows around thick body analyzed to predict base pressure, vortex volume, etc
24 p4299 A69-42674

Nonlifting blunt axisymmetric hypersonic shape determination to maximize pressure drag for given convective heat transfer, diameter and free-stream conditions
24 p4244 A69-42960

Supersonic flows past blunt bodies, formulating approximate similarity law for shock layers in subsonic regions
24 p4246 A69-43495

Reentry shock layer radiative heat transfer to surface of blunt superorbital vehicle [AIAA PAPER 68-1151]
24 p4414 A69-43567

Mass injection effects on viscous hypersonic low Reynolds number shock layer downstream and at stagnation point in blunt forebody region analyzed for non-reacting gas
24 p4249 A69-43663

Pressure distribution correlation over blunted slender cone at various angles of attack by tangent cone method, describing hypersonic wind tunnel tests
24 p4249 A69-43681

BLUNTNESS
U ELLIPTICITY

BLURRING
Image deblurring and aperture synthesis using a posteriori processing by Fourier transform holographic spatial filtering
21 p3722 A69-38793

Motion-distorted photograph deblurring method using extended range holographic Fourier transform division
22 p3944 A69-40020

BMEWS
U BALLISTIC MISSILE EARLY WARNING SYSTEM

BO-105 HELICOPTER
BO-105 helicopter design, testing and characteristics noting four bladed rigid rotor [AHS PAPER 200]
07 p1052 A69-18869

BODIES
Distribution of steady state solutions for equations of helical motion of body in infinite fluid, noting coaxial control surfaces
11 p1868 A69-24782

Kinematic equations of motion of body about fixed point, considering Steklov solution
11 p1918 A69-24791

BODIES OF REVOLUTION
NT CELESTIAL SPHERE
NT CONICAL BODIES
NT CYLINDRICAL BODIES
NT PARABOLIC BODIES
NT POINCARÉ SPHERES
NT ROTATING CYLINDERS
NT ROTATING SPHERES
NT SLENDER CONES
NT SPHERES
NT TORUSES

Boundary value bending problem for anisotropic shells of revolution under asymmetrical loading solved by finite difference technique
01 p0165 A69-10088

Sonic flow at large distance and behind shock wave for axisymmetric body of revolution of finite dimensions in inviscid fluid
01 p0058 A69-10160

Exact solution of shallow shells of revolution equations governing linear deformation compared with asymptotic integration procedure
01 p0166 A69-10234

Galerkin method for solving dimensionless Reissner equation for symmetrically loaded thin nonshallow shells of revolution
01 p0168 A69-10380

Critical internal pressure induced plastic instability in membrane shells of revolution determined by graphical numerical method
02 p0338 A69-11719

Complex revolution vessels and multilobed structures analyzed by electronic computers, considering doubly stressed state of shells and bending moments from external forces
02 p0339 A69-11894

Geometric optics inverse scattering method for smooth conducting convex bodies of revolution, demonstrating bounds on size and shape
02 p0280 A69-11929

Matrix displacement method for nonlinear elastic analysis of shells of revolution under symmetrical and asymmetrical loadings
02 p0346 A69-12511

Minimum drag configurations with low heat transfer for hypersonic bodies of revolution, noting performance at supersonic speeds
02 p0191 A69-12578

Photographic flow patterns of separated flows with vortex formation obtained in wind tunnel for different aerodynamic configurations of revolution
02 p0191 A69-12586

Finite difference schemes for axisymmetric oscillations of shells of revolution filled with liquid
03 p0523 A69-12951

Supersonic flow past blunt body with convex corner calculated to establish sonic point on body
03 p0362 A69-13406

Scaling laws for nose bluntness effects on hypersonic aerodynamics of bodies of revolution [AIAA PAPER 68-1158]
03 p0362 A69-13566

Computer method calculating stressed state of elliptical bottom of cylindrical pressure vessel based on differential bending equations for shell of revolution
04 p0668 A69-14275

Aerodynamics of bodies of revolution in nonplanar motion using nonlinear functional analysis of moments for motion about center of gravity [AIAA PAPER 68-20]
04 p0542 A69-14714

Stability of circular cylindrical viscoelastic and elastic shells with local effects due to radial load on circumference or thermally induced tangential stress
04 p0680 A69-14928

Point matching method for analysis of stress in incompressible solids of revolution, noting application to solid propellant rocket charges
04 p0683 A69-15518

Reissner nonlinear equations for nonshallow symmetrically loaded shells of revolution
04 p0684 A69-15538

Exact geometrical equations and internal equilibrium for elastoplastic deflections of orthotropic shells of revolution using thin shell theory
05 p0831 A69-15680

Stress-strain state of thin elliptical shell of revolution under rapidly varying cyclic edge loads
05 p0832 A69-15686

Ductile creep rupture of thin walled membrane shell of revolution subjected to time dependent internal pressure and strain hardening [ASME PAPER 68-WA/MET-15]
05 p0838 A69-16153

Asymmetrically loaded systems composed of shells of revolution, developing digital computer algorithm for solution of statics problems
05 p0840 A69-16201

Blockage correction for blunt based bodies of revolution in wind tunnels at low Mach numbers
05 p0699 A69-16395

Finite elastic-plastic deflections of orthotropic shells of revolution, deriving exact geometrical relations and equilibrium equations
05 p0842 A69-16642

Stress calculation for internal pressure in moment-less shell of revolution
05 p0843 A69-16690

Stability loss of shells of revolution under effect of axial compression and radial pressure with no restrictions on generatrix curvature, using strain energy method
06 p1021 A69-17179

Wall temperature and Mach number effect on heat flux distribution at spreading line of flow for supersonic gas on ellipsoid of revolution
06 p0858 A69-17331

Automatic data processing method for analyzing multiply connected elastoplastic shells of revolution
06 p1025 A69-17614

Ellipsoids of revolution in viscous flow at very low Reynolds number, determining optimum shapes and minimum resistance values
06 p0911 A69-17780

Computer program for axisymmetrically deformed shells of revolution and combinations of such shells
06 p1026 A69-18019

Post-wrinkling nonlinear behavior of conical shell of revolution subjected to bending loads [AIAA PAPER 69-90]
06 p1027 A69-18074

Geometrically exact finite element for thin shells of revolution, using approximation to predict boundary layer stress distribution during vibration [AIAA PAPER 69-56]
06 p1029 A69-18193

Boundary layer approximation for steady laminar flow of viscous incompressible fluid past paraboloid of revolution, obtaining vorticity distribution
07 p1120 A69-18812

Steady rotation of insulating body of revolution in unbounded electrically conducting fluid permeated by applied axial magnetic field

07 p1190 A69-18814

Rotating incompressible liquid drop held together by surface tension noting spheroidal and toroidal shapes, energies and case of surrounding denser medium

07 p1120 A69-19267

Rupture times in analysis of creep tensile instability in uniformly pressurized thin walled membrane shells of revolution, comparing two criteria

07 p1234 A69-19378

Local stability of thin walled elastic shells of revolution subjected to external pressure

07 p1237 A69-19686

Approximate equations for transonic viscous heat conducting gas flow past finite body of revolution

08 p1251 A69-20322

Transformation of laminar stationary incompressible boundary layer equations for body of revolution in incident flow, using difference method

08 p1252 A69-20703

Static axisymmetric deformation of elastic paraboloid of revolution, using integration of equilibrium equation in Lamé displacement

09 p1613 A69-21631

Symmetrical body rotational motion with asymmetrical mass distribution about center of mass, determining minimum initial value of angular velocity

09 p1595 A69-21762

Finite difference method computer programs for calculation of velocities and streamlines on blade to blade surface of revolution of turbomachine

09 p1432 A69-22495

Pressure coefficients determination on slender body surface to estimate effects of quadratic terms, considering body of revolution with thin cruciform lifting surfaces

10 p1632 A69-22911

Book on statics of thin walled shells of revolution covering stress-strain analysis for geometrical shapes

10 p1800 A69-23197

Bodies of revolution in sonic flow of ideal gas, showing same perturbational effect of source and dipole on flow before shock front

10 p1632 A69-23364

Strength analysis of revolving shallow shell with jumpwise thickness variations under axisymmetric distributed load, considering rigidity and plastic deformation

11 p1968 A69-24318

Scattering of spherical electromagnetic wave emitted by electric and magnetic dipoles with equal moments at truncated infinitely thin ideally conducting paraboloid of revolution

11 p1846 A69-24614

Second approximation of asymptotic damping of disturbances in viscous heat conducting gas supersonic flow about solid of revolution at critical velocity

11 p1817 A69-24627

Boundary value problem for gravity induced wave motion of ideal fluid in axisymmetric vessel with annular ribs, noting application to bodies of revolution

11 p1868 A69-24769

Finite deformation equations for flat annular membranes deduced from equations for thin shells of revolution, discussing displacement equations and fixed edge forces

11 p1979 A69-24813

Symmetrically loaded weak moment shells of revolution made of materials with different moduli of elasticity

11 p1980 A69-24819

Elastic two cavity revolving hyperboloid deformation by arbitrary forces solved by spherical functions

11 p1984 A69-25169

Aerodynamic forces causing deformation and breakup of liquid droplet with ellipsoid of revolution form in constant velocity gas flow

11 p1875 A69-25466

Supersonic air flow past blunt body of revolution in presence of nonequilibrium chemical reactions, ionization and molecular excitation

11 p1820 A69-25474

Interference between bodies of revolution and wings in supersonic flow, using Volterra method for calculation

11 p1820 A69-25476

Bending and membrane stresses determination in shallow thin shells of revolution under large axisymmetric deflections, using normal and radial displacements relationship

11 p1995 A69-25651

Theorem for integral expansion applied to boundary value problems of mathematical physics and elasticity theory for single sheet hyperboloids of revolution

11 p1910 A69-25731

Nonstiffness of nonshallow spherical dome using asymptotic method, applying nonlinear Reissner equations to finite symmetric deformation of thin shells of revolution

11 p1996 A69-25733

Axisymmetric detached flow past slender solid of revolution by ideal incompressible fluid at zero angle of attack and with small cavitation numbers

11 p1877 A69-25741

Analytic model resembling thick walled ellipsoid of revolution incorporating three dimensional shape of human left ventricle and ventricular wall thickness effects

12 p2022 A69-26235

Conformal transformation reducing transverse thermal resistance of cylinder of revolution to thermal resistance of semiinfinite medium

12 p2190 A69-26292

Galerkin method for solving dimensionless Reissner equation for symmetrically loaded thin nonshallow shells of revolution

12 p2182 A69-26679

Nose bluntness effect on hypersonic unsteady aerodynamics of flared and conical bodies of revolution

[AIAA PAPER 68-889]

12 p2012 A69-26794

Complex two layered shell of revolution under static and dynamic axisymmetric loads analyzed using SABOR/DRASTIC computer codes

12 p2184 A69-26811

Axisymmetric elastic stresses in ring stiffened segmented shells of revolution, noting finite difference method for nonlinear analysis and computer program

12 p2185 A69-26818

Large deflection elastic-plastic analysis of axisymmetric shells of revolution indicating role of plastic yielding in buckling pressure reduction

12 p2186 A69-26839

Bending state of shells of revolution due to edge effects using nonlinear stress strain relation

13 p2362 A69-27921

Motion of slender axisymmetric bodies in rotating fluid, relating Long hypotheses to flow reversal and dipole distribution effects on lee waves

13 p2248 A69-28170

Residual field in inner airspace of magnetostatic shielding thin walled stretched ellipsoids of revolution

13 p2237 A69-28610

Elastoplastic deformations of thin axisymmetric shells of revolution with variable thickness, exemplifying shell with piecewise constant thickness

14 p2533 A69-28982

Integral representation of p -analytic functions of complex variable, applying axisymmetric boundary value problems of elasticity theory for cylindrical surfaces and paraboloid of revolution

15 p2714 A69-31191

Exact solution for motion of conducting solid of revolution rotating in infinite conducting viscous fluid, describing magnetic field

16 p2817 A69-31666

Torsional stability of shallow shells of revolution, solving eigenvalue problem obtained from perturbation of nonlinear equations by finite differences

16 p2871 A69-31879

Eigenvalues of truncated orthotropic shells of revolution with degenerate poles and various rigidities and geometries

16 p2873 A69-32133

Elastic spheroidal shell of revolution under external pressure described by buckling and postbuckling theory

16 p2874 A69-32162

Stress-strain rate of glass fiber reinforced plastic pressure vessels under internal pressure, determining optimal fiber pattern

17 p3057 A69-33195

Approximate equations for transonic viscous heat conducting gas flow past finite body of revolution

17 p2891 A69-33312

Strain displacement and compatibility equations of finite symmetrical deflections of thin shells of revolution

[ASME PAPER 69-APM-14]

18 p3214 A69-34391

Differential equations of shells of revolution theory assuming rotationally symmetric stress and strain in thin elastic shells

18 p3215 A69-34549

Local stability of viscoelastic shells of revolution under axisymmetric loads, discussing asymmetric snaphthrough of dome

18 p3216 A69-34573

Stability loss of shells of revolution under axial tension and radial pressure, considering shells of Gaussian curvature, calculating critical force

18 p3222 A69-34976

Integral relation method analysis of supersonic gas flow past blunt body of revolution

18 p3086 A69-35051

Limiting equilibrium of variable thickness shallow spherical and conical shells of revolution under axisymmetric loads, assuming rigid plastic shell material

18 p3225 A69-35370

Fredholm integral equation solution of circularly axisymmetric stress state for bodies of revolution

18 p3226 A69-35375

Equations of motion for axisymmetric elastic deformation of inhomogeneous body of revolution subjected to torsion and steady oscillations

19 p3436 A69-35845

Asymptotic form of axisymmetric solution with Dirichlet integral for Navier-Stokes equations applied to flow past bodies of revolution with smooth surfaces

19 p3298 A69-36143

Three dimensional laminar boundary layer on conical body of revolution in low Reynolds number compressible fluid flow

19 p3241 A69-36762

Shells of revolution bearing capacity under axisymmetric loads determined by linear programming and finite difference method

20 p3622 A69-37326

Nonlinear theory based on Euler-Bernoulli hypotheses for axisymmetric deformations of heterogeneous orthotropic shells of revolution under rotationally symmetric mechanical and thermal loads

20 p3625 A69-37592

Perturbed motion of solid body containing axisymmetric cavities partially filled with ideal incompressible fluid, solving boundary value problems of fluid oscillations

20 p3518 A69-38296

Coordinate transformation of Euler equations governing precession and nutation of self gravitating bodies of viscous fluid in inertial coordinates

21 p3797 A69-38539

Inertial motion of body produced by revolving uniformly deformed configuration, showing constant semiaxes without kinetic energy losses

21 p3772 A69-39620

Electromagnetic radiation and scattering from conducting bodies of revolution, obtaining formulation in integrodifferential equation from potential integrals and boundary conditions

22 p3899 A69-40014

Nonlinear shallow shell theory of stress and strain formulated via shell of revolution problem

22 p4048 A69-41198

Inviscid transonic flow past circular arc bodies of revolution, applying Hosokawa technique to pressure distribution solution

23 p4059 A69-41899

Aerodynamic characteristics of moving and rotating bodies of revolution in free molecular rarefied gas flow, assuming Maxwellian thermal velocity distribution and diffuse specular interaction

24 p4243 A69-42583

Subsonic wind tunnel balance and holders investigated for effects on lift, drag and stability of models of body of revolution

24 p4297 A69-43084

BODY CENTERED CUBIC LATTICES

Point defects in body centered cubic transition metals, discussing thermal equilibrium, irradiation cold work, high and low temperature recovery, etc

03 p0447 A69-13817

Localized umklapp scattering effect on galvanomagnetic properties of nearly free electron bcc metal with spherical Fermi surface

03 p0493 A69-14240

Heterodiffusion of metallic impurities in body centered phases of doped zirconium and titanium, determining diffusion coefficients via radioactive isotopes

04 p0613 A69-14557

X ray diffraction studies of deformation effects on bcc niobium alloys in terms of particle size, strain, faulting probability and dislocation density

04 p0618 A69-15202

Dislocation distributions in cold worked fcc, bcc and hcp metals, discussing dislocation structures in deformed single crystals and work hardening theories

05 p0778 A69-15754

Vacancy relaxations in bcc crystals using energy dependence on radial displacements from defect of nearest neighbor sets, discussing crystal size and shape
05 p0809 A69-16529

Slip geometry in bcc metals, discussing slip-line observations by light and electron microscopy techniques
05 p0781 A69-16537

High pressure high temperature synthesis and superconducting properties of yttrium sesquicarbide, noting effect of ambient pressure annealing
07 p1201 A69-19600

Structure and properties of high heat resistant alloys based on high melting point metals with bcc lattice explained by electron theory
09 p1525 A69-22139

Beryllium diffusion coefficients in Zr and Ti bcc phases, using radioactive beryllium 7 at high temperatures
18 p3157 A69-35251

Creep behavior of dispersion strengthened Nb base bcc alloy, studying temperature and stress effects on steady state creep rate
19 p3343 A69-35924

Alloy softening in bcc Fe-N and Fe-Ni, discussing causes of thermal stress component reduction in interstitial and substitutional alloys
22 p3969 A69-40164

Solid solution softening in bcc alloys, discussing alloy atoms intervention in low temperature deformation process
22 p3969 A69-40165

Bcc metals strengthening and alloy softening mechanisms, studying temperature and additives effects
22 p3970 A69-40166

Single crystal Ta and Ta base bcc solid solution strengthening and weakening as function of temperature and strain rate
23 p4178 A69-42358

BODY COMPOSITION [BIOLOGY]

Transensor implantation, sham implantation, no implantation and lighting effects on rat body composition, noting fat and water content
12 p2020 A69-26557

Body composition of USAF flying personnel, evaluating obesity by using radioactive potassium /K-40/ method
14 p2409 A69-29295

Centrifugation effects on body composition and growth of mice
17 p2910 A69-33746

BODY FLUIDS

NT BLOOD

NT CEREBROSPINAL FLUID

NT EOSINOPHILS

NT ERYTHROCYTES

NT LEUKOCYTES

NT LYMPH

NT LYMPHOCYTES

NT SWEAT

NT URINE

Changes in organism during sudden decompression, analyzing pressure equalization, dissolved gases transformation and body fluids vaporization
01 p0020 A69-10753

Renal excretion response to blood fluid volume shift resulting from altered orientation within gravity or from absence of gravity
06 p0873 A69-17015

Heart rate and bodily fluid changes in aestivating desert anurans, discussing weight loss and metabolism reduction
11 p1827 A69-24923

Respiratory effects of body temperature changes separation from blood osmolarity changes in dehydrated man
23 p4097 A69-42094

BODY KINEMATICS

Hypokinesia and transverse accelerations combined effect on human cardiovascular system and regional blood circulation
02 p0197 A69-11495

Human nervous system and vestibular and auditory analyzers functional changes under combined hypokinesia and radial accelerations effects
02 p0197 A69-11496

Physiological, cytochemical and histological effects on muscular activity, nervous system, adrenal and thyroid glands and liver of mice during 30 day hypokinesia
02 p0198 A69-11502

Hypokinesia and acceleration effects on human organism immunity and resistance to inflammatory diseases in 62 day test
02 p0198 A69-11513

Data acquisition program for Apollo crew motion disturbances experiment consisting of ground simulations and orbital experiment establishing mathematical model of human body
02 p0201 A69-11759

Changes in blood circulation, external respiration and gas exchange rates in humans during prolonged hypodynamia
03 p0377 A69-14204

Human motor activity under hypodynamia and increased carbon dioxide, discussing positive effects of prescribed physical exercises
03 p0377 A69-14205

Vectorometric EKG analysis of cardiac activity during hypokinesia with and without exercise and medication
05 p0710 A69-16519

Collection of papers on hypodynamia and hypogravics, physiology of inactivity and weightlessness
06 p0872 A69-17010

Subjects sensory reactions to weightlessness during parabolic flight, studying coordination of writing, eating and drinking motions
07 p1060 A69-18575

Arbitrary human motions coordination in reorganization phases determined during weightlessness for cyclographic analysis of adjustment time
07 p1065 A69-18979

Damping flywheel to stabilize permanent rotation of weightless solid body moving by inertia, obtaining differential equations of motion
07 p1183 A69-19678

Human organism reaction to prolonged limitation of muscular activity during weightlessness simulated by bed rest, noting hypokinetic component of weightlessness
08 p1262 A69-19837

Hypokinesia muscular activity deficit in males confined to bed rest compensated for by physical exercise, noting orthostatic resistance, acceleration endurance, immunity, etc
08 p1263 A69-19932

Dogs orthostatic tolerance and resistance to transverse acceleration after 14-day hypodynamia, studying tachycardia and arterial pressure
10 p1645 A69-23499

Hypokinesia effects on human neurology on extended space flights simulated by 72-day bed rest
10 p1646 A69-23506

Space flight hypokinesia simulation experiments to study oxygen balance in man
10 p1646 A69-23507

Hypokinesia effect on dynamics of metabolic processes in athletes muscular system by comparison of diuresis, creatinine excretion and cutaneous fat layer indices
10 p1646 A69-23582

Thin deformable body motion in disturbed potential flow of ideal incompressible fluid
11 p1876 A69-25488

Motion of heavy body with gyroscope, using coordinate system to reduce problem to linear second order differential equation
11 p1920 A69-25746

Equations of motion of body with fixed point, deriving solutions representable as segments of trigonometric series in variable related to time differentially
11 p1920 A69-25748

Solid body motions containing cavity filled with viscous fluid under influence of gravity, formulating motion equations for fluid and body
12 p2061 A69-25884

Hypokinesia effects on transversostriated muscle fibers of mice, noting changes in myofibrillar apparatus, mitochondria and sarcoplasm
13 p2212 A69-28616

Calcium isotopes tracer migration in caged rats in metabolism study
13 p2212 A69-28618

Three dimensional thermal laminar boundary layer around body moving with constant acceleration in incompressible fluid, considering wall temperature and Prandtl number
13 p2380 A69-28631

Quasi-steady state supersonic gas flow past two closely spaced coaxial separating bodies at different velocities, showing dependence on separation rates
14 p2391 A69-29617

Soviet book on partially liquid filled solid body dynamics from viewpoint of space and aircraft applications
14 p2530 A69-29815

Integrable cases of equations of motion of solid body around fixed point located in potential field of elastic supports
15 p2653 A69-31194

Motion coordination capacity of persons subjected to 40 days bed rest studied by dynamographic technique, discussing nature of slackening
17 p2906 A69-32937

Stable motions determination of solid bodies with liquid filled cavities and satellites motions stability in central Newtonian force field
17 p3005 A69-33228

Dynamic model of bodies with microstructure and nondissipative energy motion, discussing action steadiness, invariance conditions and Galilean relativity
17 p3067 A69-34149

Fixed point reaction force in mobile system of solids coupled kinematically, examining zero dynamic components
18 p3172 A69-34590

Vectorometric EKG analysis of cardiac activity during hypokinesia with and without exercise and medication
18 p3096 A69-34738

Two body mechanical system operating within dynamics laws simulating backward and forward bending motions of falling cat
19 p3259 A69-36832

Arbitrary human motions coordination in reorganization phases determined during weightlessness for cyclographic analysis of adjustment time
20 p3479 A69-38227

Real time servo driven simulator of human body in zero-g activity used to study self induced rotation and astronaut mobility under thruster forces
21 p3664 A69-39034

Rodrigues formula derivation procedure and summation formula derivation for finite rotations of solid body, noting simplifications from kinematic considerations
21 p3772 A69-39183

Time-similar and isotropic geodetic curves simulating paths of test bodies in Riemann space corresponding to gravitational field
21 p3772 A69-39621

Motion of body with cavity completely filled with viscous fluid about center of mass in potential mass-force field, applying small parameter method
22 p3980 A69-40109

Boundary layer development on body accelerating in viscous incompressible fluid, using straight lines approximation and asymptotic expansions
22 p3929 A69-40110

Saint Venant principle of elastic equivalence of kinematically equivalent displacement systems at small surface area of elastic body
22 p4048 A69-41276

Sphere set in motion at constant velocity by impulsive force submerged in incompressible fluid in half space
24 p4298 A69-42585

Inertial motions, equipotential surfaces and Coriolis forces on earth ellipsoid, discussing pendulum-like oscillations
24 p4346 A69-43156

BODY MEASUREMENT [BIOLOGY]

NT ELECTROPLETHYSMOGRAPHY

Nomogram for estimating body fat and specific gravity from height and weight, considering two component model of body composition and lean body weight
07 p1067 A69-19428

Acceleration injury noting water immersion effect on cat lung due to intense body vibration, suggesting restraint as practical solution
17 p2913 A69-33009

Centrifugation effects on body composition and growth of mice
17 p2910 A69-33746

Physical exercise effect on adolescent males, comparing oxygen uptake, heart volume and height in training and nontraining groups
23 p4077 A69-41312

BODY SIZE [BIOLOGY]

Nomogram for estimating body fat and specific gravity from height and weight, considering two component model of body composition and lean body weight
07 p1067 A69-19428

White mice gastrocnemius muscle wet mass, dry mass and noncollagen-nitrogen /NCN/ content, noting /NCN/ content dependence on body mass
23 p4080 A69-41406

BODY SWAY TEST

Human perception in space as function of nervous relationships involving optic, kinesthetic, vestibular and other analysors
08 p1263 A69-19938

BODY TEMPERATURE

Critical body temperature for intracranial self stimulation in white rats
03 p0375 A69-13897

Conduction equations for conduction cooling of human body solved by finite difference method
06 p0880 A69-17088

Oxygen intake and body temperature of basal and sleeping Andean natives at high altitude
06 p0874 A69-17835

Human body cold tolerance and relation to BMR seasonal variation
06 p0876 A69-18024

Thermoregulatory reactions of human body to sharp increase of ambient radiant temperature [AGARDOGRAPH-111]
08 p1264 A69-20670

Skin and subcutaneous temperature during exposure to intense thermal radiation, discussing estimation of subcutaneous temperature from skin temperature data [AGARDOGRAPH-111]
08 p1264 A69-20671

Human body heat loss control during water immersion, discussing insulative garments and technologies of energy conversion systems [AGARDOGRAPH-111]
08 p1267 A69-20681

Learned behavior performance failure in hypothermia as temperature dependent phenomenon using rat, guinea pig, chinchilla, mouse, gerbil and hamster
10 p1643 A69-23124

Human body temperature regulating factors in low temperature environment, studying metabolism, lung ventilation and onset of shuddering
10 p1648 A69-23298

Hamsters responses to helium-oxygen and nitrogen-oxygen at ambient temperatures, comparing respiration rates, weights and body temperatures
10 p1646 A69-23564

Altitude effects on body chilling rate in rats noting hypoxia role in inducing hypothermia
13 p2210 A69-28532

Combined hypoxic hypoxia and high ambient temperature found relieving strain on humans by increasing heat release by evaporation
13 p2212 A69-28628

Light effects on circadian rhythms in monkeys, describing changes in deep body temperature and locomotor activity phase relationships
15 p2556 A69-31336

Diurnal pressure cycles found as zeitgeber to entrain body temperature endogenous circadian rhythm in pocket mice under constant environmental temperature and light
16 p2745 A69-32447

Oxygen consumption and rectal temperature in male mice confined in nitrogen and helium diluted hyperoxic atmosphere at specific temperature and humidity ranges
17 p2906 A69-32932

Vestibular reactions in rats under hypothermal conditions by measuring postrotatory nystagmus beats number and duration, respiration rates and rectal temperature
17 p2906 A69-32934

Desynchronization and resynchronization of human circadian rhythms of activity, body temperature and urine excretion during isolation in underground bunker in various conditions
21 p3660 A69-39173

Circadian variations in human temperature regulation, measuring peripheral and rectal temperatures and peripheral heat and arterial blood flows in clothed resting males
22 p3872 A69-40201

Thermoregulatory responses to cooling in spinal man, discussing deep temperature sensitive structures and relationship between skin and central regulatory structures
22 p3873 A69-40209

Rat survival rate after prolonged gradually decreased body temperature without motion restraint or kept in fixed position
22 p3877 A69-40278

Hyperventilation induced hemolysis in dogs measured as function of exposure time, body temperature and blood pH
22 p3887 A69-41192

Severe heat stress effects on respiratory frequency, rectal temperature, blood gases and pH of conscious dog
23 p4081 A69-41432

Human thermal regulatory mechanism using analog simulation compared with experimental results of resting subjects responses to climatic chamber
23 p4111 A69-42079

Respiratory effects of body temperature changes separation from blood osmolality changes in dehydrated man
23 p4097 A69-42094

Spinal cord temperature influence on stretch response of tonic and phasic alpha-motoneurons by filament recordings from ventral roots in anesthetized cats
23 p4098 A69-42099

Calorimetry-thermometry discrepancy during prolonged exercise in hot dry environment, measuring rectal temperature with increasing exposure time
23 p4098 A69-42104

Circadian rhythm phase relationships between photoperiodism and heart rate, locomotor activity and deep body temperature/DBT/ in unrestrained monkeys
24 p4260 A69-42706

Barometric pressure affecting convective heat transfer from human body in air, deriving empirical formula as function of air density, speed and temperature
24 p4267 A69-43384

BODY TEMPERATURE REGULATION
U THERMOREGULATION

BODY VOLUME [BIOLOGY]

Leg volume changes in response to lower body negative pressure due to blood redistribution
17 p2908 A69-33171

Volume prediction of human body exposed to vacuum based on animal skin elasticity and anatomical features
19 p3258 A69-36456

BODY WEIGHT

Vertical vibration stimulation of growth of onion bulbs and mice body weights
01 p0014 A69-10584

Nomogram for estimating body fat and specific gravity from height and weight, considering two component model of body composition and lean body weight
07 p1067 A69-19428

Hypokinesia effects on rats noting body and organ weights, liver glycogen and N content and tissue proteolysis of skeletal muscles
08 p1262 A69-19928

Microwave radiation effects on body weight and peripheral blood hemograms of mice, discussing maximum safe exposure related to generator output
08 p1266 A69-20678

Hamsters responses to helium-oxygen and nitrogen-oxygen at ambient temperatures, comparing respiration rates, weights and body temperatures
10 p1646 A69-23564

Vertical vibration stimulation of growth of onion bulbs and mice body weights
15 p2555 A69-30754

Caucasian and Bantu males oxygen consumption at different work rates, gross body weight accounted for 70 percent of differences between individuals
21 p3655 A69-38911

Effects of oxygen saturation variations of blood on rates of weight gain in isolated perfused canine lung, noting pulmonary edemogenesis
22 p3887 A69-41189

Astronaut weight loss during space flight related to mission duration, noting dehydration and catabolism roles
23 p4100 A69-41303

White mice gastrocnemius muscle wet mass, dry mass and noncollagen-nitrogen/NCN/ content, noting /NCN/ content dependence on body mass
23 p4080 A69-41406

Body weight and organ sizes in hibernating cold and warmth adapted golden hamsters, discussing lungs, heart, kidney, pancreas and liver weight increases
23 p4084 A69-41462

Change in weight, plasma volume, urine flow and hematocrit in man before and after immersion up to chin in thermally neutral bath
23 p4096 A69-42087

Oxygen consumption, ventilation and cardiac frequency relationship to body weight during submaximal exercise in normal human beings
23 p4099 A69-42169

BODY-WING AND TAIL CONFIGURATIONS

Wing-body combinations analysis and design at supersonic and subsonic speeds by aerodynamic influence coefficients method [AIAA PAPER 68-55]
01 p0006 A69-11016

Unsteady aerodynamic forces on coplanar lifting surfaces in subsonic flow induced by wing/ horizontal tail interference
04 p0543 A69-14819

Tandem airfoils wing-tail interaction flutter analysis, using three dimensional vortex lattice aerodynamic theory [AIAA PAPER 69-57]
06 p1028 A69-18105

Critical flutter behavior of variable geometry aircraft with wing of 70 degree leading edge sweep, noting wing-tail interference
11 p1991 A69-25517

High order conical motions past cruciform wing-body and tail-body systems, reducing problem to flow past cruciform wing
15 p2548 A69-31023

Supersonic inviscid flow past wing-body configuration, determining pressure distribution
20 p3458 A69-37099

Modified tailed delta configuration selection for U.S. SST, discussing power plant installation choice [RAES PAPER 17]
22 p3863 A69-40496

BOEING AIRCRAFT

NT B- 52 AIRCRAFT

NT CH- 46 HELICOPTER

NT CH- 47 HELICOPTER

NT VZ- 2 AIRCRAFT

Boeing SST designs, discussing performance, flying qualities and operational characteristics of configurations
06 p0868 A69-17830

Concorde and Boeing supersonic transport overland sonic booms, discussing social, political and legal reactions
06 p0868 A69-17899

Helicopter design, discussing blade deicers, landing gear, vibration absorbers, cargo capacity, etc
13 p2202 A69-27836

BOEING MILITARY AIRCRAFT
U MILITARY AIRCRAFT

BOEING 2707 AIRCRAFT

Boeing 2707-300 Mach 2.7 supersonic transport, discussing flight controls, hydraulic system, environmental controls, operational characteristics, flight deck and instrumentation
07 p1052 A69-18271

BOEING 707 AIRCRAFT

All-weather landing flight director systems and fault warning display simulator studies of Boeing 707-720B aircraft in Category 3-C environment
01 p0010 A69-10455

Air Transport Total In-Flight Simulator-707 /AT/TIFS-707/ concept for pilot training, stressing airframe and major flight systems [SAWE PAPER 747]
18 p3118 A69-34884

BOEING 747 AIRCRAFT

Boeing 747 characteristics for passenger and cargo service noting economic gain, operational performance, control cabin, engine, etc [AIAA PAPER 67-397]
01 p0010 A69-10636

Boeing 747 performance, propulsion, structural and circuit characteristics, mass production and airport passenger installations
01 p0011 A69-11067

Forming and processing facility for producing one million titanium alloy parts per month for Boeing 747 aircraft
09 p1504 A69-22063

Giant landing gear steel parts fabrication for Boeing 747 aircraft, discussing material and processing problems including Cr and Cd-Ti coatings application
09 p1434 A69-22064

High recovery inlet design for Boeing 747 high bypass ratio fan engine, considering throat Mach number, lip losses and auxiliary passage losses [ASME PAPER 69-GT-41]
09 p1570 A69-22482

Cost-profit sharing agreement with aerospace manufacturing companies involved in Boeing 747 construction, detailing final assembly building
09 p1514 A69-22713

Boeing 747 aircraft, discussing weight and cost reduction, flap design, structural philosophy, powerplants, fuel system, flying controls, power systems, etc
09 p1435 A69-22714

Fueling procedures for Boeing 747 aircraft, discussing design and operation of large capacity fuel trucks
10 p1674 A69-23631

Fueling procedures for Boeing 747 aircraft, discussing design of high rate mobile fuel dispensers
10 p1674 A69-23633

Boeing 747 operational and economic considerations including capacity, airport constraints, noise factors, landing gear, compatibility, etc
13 p2201 A69-27340

Weight and cost control program for Boeing 747 aircraft through combined value and weight engineering methods
13 p2383 A69-28096

Boeing 747 problems including noise and automatic landings in CAT-II conditions
16 p2734 A69-31631

Large subsonic transport aircraft effect on economics of air operations with emphasis on airport facilities for Boeing 747
17 p3077 A69-34205

Aircraft structural weight optimization based on design consideration of grouped related elements, noting application to Boeing 747 trailing edge flap drive [SAWE PAPER 757]
18 p3220 A69-34881

Boeing 747 design and development, discussing aircraft characteristics, performance, inertial navigation system, production costs, etc [SAWE PAPER 746]
18 p3091 A69-34907

Boeing 747 design, fitting to operation, airline planning for flight training, airport facilities, ground equipment, service functions, etc [RAES PAPER 12]
22 p3864 A69-40621

B-747 safety assurance program, discussing organization, management, hazard sources, accident statistics, night visual approach and maintainability
22 p3867 A69-41135

Boeing 747 safety engineering program, discussing organization, design review, system safety, systems design-analysis and tests
22 p4054 A69-41136

Boeing 747 exhaust reverser design and control, discussing stopping distance, cascades, materials, etc [SAE PAPER 690409]
23 p4200 A69-41637

JT9D engine fuel and vane control systems for Boeing 747, noting computing system positioning of throttle valve for fuel flow control [SAE PAPER 690405]
23 p4201 A69-41658

BOGOLIUBOV THEORY

Bogoliubov transformations effect on quasi-free translationally invariant states of fermion fields, using Clifford algebra based on Hilbert space
03 p0455 A69-13364

Finite formulation of field theory applied to quantum electrodynamics, assuming Bogoliubov causality and TCP invariance of S operator
07 p1181 A69-18957

Parametric variations of nonlinear system moving in medium with nonlinear drag, using Bogoliubov-Krylov asymptotic method
18 p3171 A69-34564

Bogoliubov averaging method of perturbation in wave mechanics for radiation and matter interaction, considering monochromatic and broad spectral incident wave for resonance study
18 p3175 A69-35483

Bogoliubov method of partial averaging for nonlinear integral equations, noting application to automatic gain control theory
23 p4181 A69-41731

BOHR MAGNETON

Penfield-Haus solution to magnetodynamic effect problem as inertial effect of orbital angular momentum, deriving Bohr magneton formula from Einstein equivalence principle
11 p1919 A69-25098

BOILERS

Fatigue strength tests of steels simulating boiler installation operating conditions, reproducing corrosion characteristics of water
19 p3347 A69-36741

Freon boiler designed for Rankine cycle heater fired on hydrocarbons with over 2000 F flame front temperature, considering radiant/convective heat transfer
23 p4068 A69-42239

BOILING

NT FILM BOILING
NT LEIDENFROST PHENOMENON
NT NUCLEATE BOILING

Heat transfer procedure and equipment during boiling under short term weightlessness
01 p0177 A69-11313

Pressure induced variations in stability constant characterizing bubble structure in two phase boundary layer of several liquids during boiling with natural convection
03 p0534 A69-14149

Experimental apparatus for measuring heat transfer coefficients into boiling K in tubes, investigating vapor-liquid mixtures hydrodynamic and electrical properties
03 p0534 A69-14150

Safety problems associated with transient boiling of liquid metals in fast nuclear reactors, emphasizing behavioral differences between liquid metals and water
08 p1420 A69-20101

Heat pipe boil-off control system for reducing cryogenic boil-off during long term space storage
12 p2191 A69-26793

Oxygen boiling point studied via calibration of capsule type platinum resistance thermometers
14 p2540 A69-29888

Graph analytical method for calculating heat transfer in diathermic exchangers during boiling together with critical thermal loads
24 p4408 A69-43080

BOLIDES

Bolide fireball radiation maximum efficiency from observed spectra, using monochromatic radiation efficiency data for rarefied atoms and ions in meteor comas
03 p0512 A69-13692

Vilna meteorite bolide observation with all-sky camera noting seismic and analytic records
13 p2334 A69-27189

Eyewitness data concerning bright bolide observed over Dzhaus/Uzbek SSR, tabulating estimations for occurrence time, light duration, color, sound and trajectory azimuths
18 p3196 A69-34536

Spectral and orbital evidence of connection among fireballs with orbit inclination, comets and carbonaceous meteorites
23 p4208 A69-41285

BOLKOW AIRCRAFT
U BO-105 HELICOPTER

BOLKOW BO-105 HELICOPTER
U BO-105 HELICOPTER

BOLOGRAMS
U BOLOMETERS

BOLOMETERS

DC biased microwave bolometer/barretter/detector, describing small signal dynamic equivalent circuit for output voltage
01 p0044 A69-10626

Very far IR techniques applications in molecular and solid state spectroscopy and relationship with impurity band conduction
02 p0296 A69-11791

High responsivity high speed performance Ge bolometer detector for very far IR region, discussing performance theory and noise equivalent power
08 p1313 A69-20132

Bismuth bolometer as sensor recording IR radiation for thermal radiation fluctuations in atmosphere caused by temperature inhomogeneities
09 p1490 A69-21868

Bolometric luminosity-red shift relations of Friedmann dust universes corrected for inhomogeneities, using locally inhomogeneous Swiss cheese models
09 p1605 A69-22411

Output impedance measurements for accurate calibration in UHF region, using mobile discontinuity and bolometer for linear or nonlinear systems
14 p2422 A69-29583

Broadband thermal radiometer containing InSb electronic bolometer under magnetic field, discussing astronomical applications
17 p2969 A69-32823

Zenith atmospheric attenuation in 183-325 GHz region measured by wideband Ge bolometer detector and spectral convolution technique
23 p4115 A69-41586

Thin film bolometer for monitoring RF radiation of arbitrary polarization and direction of propagation
24 p4311 A69-42572

BOLTS

Bolt materials selection criteria in design of high strength lightweight joints, showing fatigue curves and temperature effects
13 p2268 A69-27758

Large diameter bolts in aircraft structures resisting hydrogen embrittlement and stress corrosion, noting fatigue properties
22 p3957 A69-40827

Strain gage and mechanical types of load-determining bolts selected on basis of application requirements and installation costs
22 p3957 A69-40829

External load distribution in bracket between bolts and joint, verifying Reshetov mounting bolt formulas
23 p4168 A69-41417

Traction stresses distribution over contact surfaces using photoelastic frozen stress model
23 p4235 A69-42461

BOLTZMANN DISTRIBUTION

Electron distribution function for homogeneous weakly ionized gas in presence of alternating electric field, discussing solution of Boltzmann equations
05 p0797 A69-16604

Nonisotropic relaxation of Boltzmann gas in homogeneous space, expressing collision integral moments in terms of distribution function moments for any molecule
06 p0910 A69-17347

Time derivatives of Boltzmann H function with respect to dilute gas
07 p1121 A69-19407

Inertia limited flow transition to mobility limited flow in gas diodes by taking velocity moments of Boltzmann equation for electron velocity distribution function
09 p1462 A69-21325

Boltzmann H function for moderately dense gas of identical particles with discrete velocity distribution in cases of nonisotropic binary and ternary collisions
10 p1725 A69-23790

Shock wave structure in single component monatomic gas by expanding Boltzmann equation distribution function in terms of Hermite polynomial
18 p3124 A69-35170

BOLTZMANN TRANSPORT EQUATION

Chapman-Enskog method applied to Boltzmann equations for transport coefficients for low density polyatomic gases
01 p0123 A69-10388

Continuum eigenfunction problem for hard sphere gas in spherically symmetric state, applying theory of singular integral equations
01 p0061 A69-10813

Partial differential equation for distribution function in transport of charged particles in earth magnetosphere
01 p0147 A69-11320

Transport equation for electromagnetic waves multiple scattering by turbulent plasma
03 p0478 A69-13959

Second approximation to Boltzmann equation solved for rigid sphere gas by reducing integral equation to differential equation
04 p0633 A69-15434

Boltzmann equation for weakly ionized gas electron component, solved by transformation to integral equation, applied to Lorentz gas in alternating electric field
05 p0795 A69-15619

Kinetic model construction of maximum number of Boltzmann collision integral properties
05 p0797 A69-16679

Monte Carlo solution of linearized Boltzmann equation in rarefied gas dynamics, noting Knudsen layer and Couette flow applications
06 p0910 A69-17345

Kinetic theory of sharp leading edge parallel to supersonic flow using Boltzmann equation, determining flow field
06 p0861 A69-17637

Width of strong shock wave front and transition layers estimated, using Boltzmann kinetic equation and H-theorem
07 p1118 A69-18702

Green function applied to isotropic scattering of radiation in three dimensional homogeneous space
07 p1241 A69-18808

Variational solution of linearized molecular chemical-kinetic Boltzmann equation, discussing perturbation of Maxwell distribution, nonequilibrium correction to reaction rate and activation energy
07 p1185 A69-19301

Gas kinetics application to various flow problems by solving Boltzmann equation for monoatomic single component gas
08 p1351 A69-20708

Kinetic equations for polyatomic gases obtained by extending 13 moment approximation to solve inelastic Boltzmann equation, resulting in 17 moment approximation
08 p1357 A69-20784

Time harmonic, spherical harmonic and power series expansion of Boltzmann equation
08 p1353 A69-20793

HF breakdown of air using Boltzmann equation to determine net ionization frequency relation with electric field strength
08 p1357 A69-20810

Kinetic coefficients of carrier motion in semiconductor obtained by Boltzmann equation, considering impacts between carriers
09 p1554 A69-21468

Normal solutions of linearized Boltzmann equation for initial and boundary conditions in hydrodynamics solved by approximation 09 p1480 A69-21667

Enskog method for Boltzmann equation, analyzing asymptotic nature of integral kinetic equation for molecular mean free paths and Laplace probabilities 09 p1481 A69-21889

Boltzmann equation with BGK model as governing equation for sharp leading edge problem in supersonic flow 11 p1817 A69-24288

Boltzmann equation for system of equations governing evolution of gas of identical particles with discrete velocity distribution, applying Chapman-Enskog method 11 p1921 A69-24325

Binary gas flow past curved body for stationary problem studied by solving Boltzmann equations in form of matched asymptotic expansions [ONERA-TP-694] 11 p1867 A69-24753

Kinetic theory for examining transition regime of rarefied gas dynamics, discussing Boltzmann equations and models with related boundary value problems 11 p1870 A69-25005

Angular distribution of electrons leaving plasma at electrode boundary, using kinetic Boltzmann equation with scattering function and specular reflection 11 p1933 A69-25546

Wave damping in plasma, developing Boltzmann analysis of electron mode dispersion relations involving momentum transfer and relaxations of electron-ion temperature and anisotropy 13 p2305 A69-27377

Transport equation numerical solution for unsteady radiation field by straight lines method, allowing for scattering indicatrix forms with passage of time 13 p2350 A69-27858

Collisions effect on wave propagation in homogeneous plasma, calculating permittivity tensor and electron equilibrium current using Boltzmann kinetic equation 13 p2311 A69-28104

Gasdynamic and Boltzmann equations relations in rarefied gas kinetics, applying physical and mathematical boundedness concept to setting boundary conditions for moment equations 13 p2250 A69-28320

Gain and loss collision integrals in Boltzmann equation for rigid sphere gas evaluated for distribution expressed as linear combination of Maxwellians 14 p2431 A69-29578

Minimum error criteria for shock wave structure determined by applying Mott-Smith distribution to Boltzmann equations for rigid sphere gas 14 p2431 A69-29579

Particle drift velocity distribution of fully ionized plasma in magnetic field calculated by integration of Boltzmann equation 15 p2659 A69-30707

Kinetic coefficients of carrier motion in semiconductor obtained by Boltzmann equation, considering impacts between carriers 15 p2669 A69-30713

Book on mathematical methods in kinetic theory covering boundary value problems associated with Boltzmann equation, model equations, rarefied gas dynamics, etc 16 p2811 A69-31721

Linearized Boltzmann equation in kinetic theory for weakly ionized plasma electrons under alternating electric and circularly polarized magnetic field, noting higher harmonics generation 16 p2820 A69-31752

Boltzmann kinetic equation describing rarefied neutral or weakly ionized gas state evolution, showing solution existence, uniqueness and successive approximation convergence 16 p2814 A69-31958

Fixed mass of monatomic gas unsteady spherically symmetric expansion into vacuum by asymptotic Boltzmann equation expansion 16 p2772 A69-32168

Nonlinear theoretical derivation of creep equations for three dimensional processes in polymers, based on Boltzmann-Volterra creep heredity concept using stress-strain summation 16 p2803 A69-32290

Boltzmann equation for Lorentzian plasma in elliptic magnetic field solved by expanding distribution function in Legendre polynomials 17 p3009 A69-32827

Supersonic leading edge problem using nonlinear Boltzmann equation with ellipsoidal model, calculating molecular distribution functions for flow field [AIAA PAPER 69-652] 17 p2892 A69-33464

Rarefied gas flow between parallel plates using linearized Boltzmann transport equation, deriving integral equation for mass flow velocity 19 p3296 A69-35621

Spatially homogeneous Boltzmann equation containing initial distribution functions expandable into Hermitean polynomials analyzed via ordinary differential equations 19 p3373 A69-36202

Electron momentum transfer cross sections by numerically solving electron energy distribution function from Boltzmann equation in Lorentz approximation 21 p3773 A69-38396

Thermal conductivity coefficient of gas mixtures at low temperatures obtained using quantum diffusion model and Chapman-Enskog method for Boltzmann equation 21 p3848 A69-38638

Nonlinear transport equations solution methodology covering transformations, invariants, boundary value problems, numerical methods, etc 21 p3697 A69-39729

Boltzmann equation analysis used to study near surface electron temperature for weakly ionized plasmas, showing nonequilibrium absorption layer governing electron temperature profile 22 p3989 A69-40528

Time dependent diffusion of light particles of Lorentz fluid approximated by Boltzmann equation leading to microscopic telegrapher equation 22 p3984 A69-40530

Molecular transport equations of dilute gases, considering relaxation time spectrum, obtaining kinetic equations and correlation function expressions for transport coefficients 23 p4193 A69-41512

Hydrodynamic equations derived from Boltzmann equation, obtaining molecular expressions for transport coefficients 23 p4151 A69-41513

Fokker-Planck plasma collision equation derived from Boltzmann equation, Markov process and Liouville equation 23 p4195 A69-41516

Book on flow equations for composite gases derived from Boltzmann equation, BGK approximation application, etc 24 p4299 A69-42766

Monte Carlo method applied to heat transfer in rarefied gas flow between parallel plates involving temperature jump in Knudsen layer 24 p4246 A69-43490

Rarefied gas one dimensional transverse motions consistent with Boltzmann kinetic equation, solving integrodifferential equations for shock wave structure 24 p4351 A69-43491

BOLTZMANN-VLASOV EQUATION

Longitudinal excitations, discussing plasma equilibrium distributions 08 p1362 A69-20286

Generalized Riemann function obtained as solution of transformed Boltzmann-Vlasov equation, discussing one dimensional and multidimensional cases 10 p1724 A69-22908

Perturbation theory for nonlinear oscillations in ionized plasma, treating electron-neutral collisions effect by Boltzmann-Vlasov equation relaxation term, noting distribution function 16 p2820 A69-31702

Boltzmann equation for electron distribution function of Lorentzian plasma traversed by transverse traveling wave, showing existence and uniqueness of solution 24 p4354 A69-42675

BOLZA PROBLEMS

Bolza problem of calculus of variations extended to trajectory optimization problems with several subarcs 17 p3026 A69-32837

BOMBER AIRCRAFT

NT A-6 AIRCRAFT
NT B-52 AIRCRAFT
NT B-70 AIRCRAFT
NT BUCCANEER AIRCRAFT

U.S.S.R. manned bomber role in air strategy, discussing mutual effects of U.S.-U.S.S.R. military posture developments and ICBM 14 p2392 A69-29431

BOMBS [PRESSURE GAGES]

U PRESSURE GAGES

BOMBS [SAMPLERS]

U SAMPLERS

BONDING

NT CERAMIC BONDING
NT EXPLOSIVE WELDING
NT METAL BONDING

NT METAL-METAL BONDING

NT RESIN BONDING

Book on adhesive bonding techniques covering chemical types, mechanical and handling characteristics, application and mixing, joint design, non-destructive testing, documentation tooling, etc 01 p0084 A69-10130

Stress concentrations around elliptical perforations in shrunk plates with bonded boundaries based on photoelastic models 02 p0345 A69-12391

Microelectronic components joining technique by compliant bonding, utilizing deformable medium between tool and beam leads to eliminate intricate tool shapes and alignments 02 p0254 A69-12473

Fokker bond tester and structural details of different types of sandwich structure, giving attention to adhesive bonding of panels, adhesive application, etc 03 p0434 A69-13791

Fiber geometry and partial debonding effects on bond stress distributions around single rigid fiber in infinite elastic plate subject to tensile stress 07 p1170 A69-18717

Bond shear effects on dynamic behavior of two layered cylindrical shell, identifying bond stiffness parameters [AIAA PAPER 68-354] 09 p1616 A69-21941

Controlled expansion of captive silicone rubber used to achieve pressure control for adhesive bonding interface 09 p1512 A69-22367

RF measurement techniques and interpretation of bonding impedance characteristics through VHF region 12 p2040 A69-26472

Mathematical model of yielding of adhesive bonds in form of viscous threads between elastic bodies, obtaining solution to two dimensional problem 18 p3215 A69-34569

Bonded solderless solar cell panel prototype withstanding high annealing temperature and thermal shock without electrical or mechanical degradation 19 p3251 A69-35688

Technical and metrological characteristics of short base strain gages and bonding to specimen, investigating sensitivity and creep 20 p3544 A69-37817

Wire, flip-chip and beam-lead bonding processes effects on hybrid microcircuits reliability 22 p3911 A69-39956

Anaerobic adhesives for aircraft bonding tested for mechanical properties, noting advantages over epoxy adhesives 24 p4338 A69-43464

BONE MARROW

Bone marrow distribution in dogs as basis for study of compensatory reactions of hemopoietic organs in response to radiation damage 08 p1262 A69-19835

Radioprotective effects of 5-azacytidine on bone marrow and blood leukocytes of X ray irradiated AKR mice 23 p4080 A69-41429

Radiation effects on population kinetics of granulocyte system forming bone marrow, discussing radiosensitivity and radiation-induced granulocytopenia 23 p4090 A69-41965

BONES

NT CARTILAGE
NT CEREBRUM
NT CRANIUM
NT MARROW
NT SCIATIC REGION
NT SKULL

Mineral dynamics during hibernation and disuse atrophy in connection with organismal homeostasis and chronic-term manned space flight, noting skeletal effect of immobility 21 p3660 A69-39175

Laser pulse effects on bones of rats, observing metabolic deviations in Ca 45 uptake 23 p4101 A69-41464

BOOLEAN ALGEBRA

Book on error detecting logic for digital computers covering error detection codes, logic circuits, checkers in data paths, etc 02 p0212 A69-11453

Logic networks of Boolean analogs analyzed by algebraic signal flow theory, introducing variational derivative for test detection in combinational and sequential networks [AAS PAPER 69-236] 24 p4288 A69-42811

BOOLEAN FUNCTIONS

Minimization algorithm for complex and switching functions using unique identifiers on Karnaugh map 16 p2764 A69-31710

BOOM

Equations of motion of rapidly rotating spacecraft, considering deformations of long elastic booms 18 p3207 A69-34582

BOOMS [EQUIPMENT]

Boom flutter effects on attitude dynamics of OV1-10 satellite, noting introduction of angular momentum by tip mass elliptical vibration 04 p0666 A69-15520

RAE satellite boom deployment to achieve gravity gradient capture 07 p1228 A69-18346

Wire screen deployable boom concept for avoiding thermal bending of slender tubes problem in application to gravity gradient stabilization and antennas of spacecraft 07 p1229 A69-18350

Thermally induced oscillatory instabilities in spacecraft booms, rederiving thermal torque equation to predict finite twist response 11 p1994 A69-25531

Erectable metal booms and meshes structural analysis, design and mounting and deployment techniques for space applications 19 p3433 A69-35544

Radio Astronomy Explorer satellite boom deployment method resulting in gravity gradient capture, emphasizing role of predeployment attitude and antenna Vee angle [AIAA PAPER 69-920] 21 p3821 A69-39350

Reaction boom attitude control systems for improving stabilization and maneuvering capability of earth pointing satellites, describing configurations [AIAA PAPER 69-834] 21 p3822 A69-39365

Spacecraft booms thermally induced vibration and flutter, considering damping and solar exposure effects 22 p4043 A69-40545

Motion stability of rapidly spinning satellite, discussing elastic booms effect 22 p4037 A69-41091

BOOST

U ACCELERATION [PHYSICS]

BOOSTER ROCKET ENGINES

NT M-1 ENGINE

Soviet rocketry origin, technology, launch vehicles, boosters and orbital assembly concept 01 p0162 A69-11066

Turquoise satellite booster, using stages of SSBS and MSBS ballistic missiles 02 p0334 A69-12232

Vacuum engineering problems during booster rocket engine ground tests, simulating flight environment [TR-781-O] 09 p1570 A69-22300

Supersonic ramjet propelled air breathing booster for speeds up to Mach 12, discussing flight mechanics, aerodynamics, propulsion, heating and air intake design 09 p1573 A69-22608

Deformations of thick walled cylinder with internal surface subjected to uniform pressure and externally connected to rigid chamber, calculating solid rocket booster charge 11 p1942 A69-25347

Aerodynamic heating of ELDO-A booster rocket, calculating flow field, heat transfer and conduction by method of characteristics and thermal models 11 p1966 A69-25433

Boosters and space vehicles including earth satellites, lunar probes and interplanetary spacecraft 13 p2356 A69-27914

Saturn 5 S-1C stage propulsion performance, using engine parameters from telemetry rather than accelerometer data, analyzed by iterative techniques and computer program [AIAA PAPER 69-733] 16 p2839 A69-32672

Large booster nozzle reuse, discussing design, refurbishment, performance, costs and test evaluation [AIAA PAPER 68-657] 19 p3394 A69-35944

Frequency domain and Liapunov instability criteria for attitude control system design of large booster, noting nonlinear feedback [AIAA PAPER 69-853] 21 p3687 A69-39381

Computerized optimization of flexible booster autopilot design, considering criteria for stability margins, closed loop roots and structural load relief [AIAA PAPER 69-875] 21 p3823 A69-39401

Booster digital guidance and control system, discussing communication device providing data

transfer between airborne digital computer and control device

[AIAA PAPER 69-988] 22 p3978 A69-40368

Booster engines for thrust augmentation of commercial transports, considering tradeoffs in takeoff distance, payload, range, safety and noise patterns [SAE PAPER 690381] 23 p4201 A69-41667

BOOSTER ROCKETS

Destructible low cost meteorological sounding rocket Dart for global observation of upper atmosphere [UN PAPER 68-95467] 01 p0161 A69-10510

Fracture mechanics concepts for cost effective booster pressure vessel design and fabrication from commercial steels using boiler plate techniques and minimal NDT quality control 21 p3837 A69-39028

BOOSTERS

Optimal control for minimum trajectory sensitivity of booster using algorithm and Ricatti equation 13 p2261 A69-27943

BORANES

NT CARBORANE

Vibration and absorption bands in IR spectra of diborene hydrazine stabilized by boiling in benzene 12 p2027 A69-26917

Borane carbonyl pyrolysis in low pressure tubular flow reactor measured by mass spectrometry, noting wall collision role in diborane bond dissociation 14 p2410 A69-29282

BOREL SETS

Integral operators on space of Borel measurable functions bounded considering weight function, giving condition for infinite complex matrices, mapping analytic sequence spaces 01 p0107 A69-11244

Spacecraft return probabilities with time constraints and redundant access, using Borel set concept for counting and summing coverage belts 21 p3819 A69-39017

BORES

U CAVITIES

BORESIGHTS

Closed loop and electronically calibrated radome measurement systems for beam deflection, boresight shift and transmission loss measurements 07 p1109 A69-19517

Boresight error in missile radome-antenna combination due to reflection and surface wave effects 07 p1111 A69-19536

Apollo LM and CSM tracking systems boresight shift reducible by decreasing modulation indices or scaling factor alpha 10 p1672 A69-23277

Electronic boresight shift in space-borne monopulse radar system, expressing antenna and signal parameters in terms of equivalent branch and channel asymmetries 14 p2411 A69-28895

Lockheed C-5 Galaxy aircraft avionics systems with Doppler inertial navigation equipment to operate with precision without ground based aids 18 p3104 A69-35465

BORIC ACIDS

Aged boric acid coated silica reaction vessels, showing reduced surface effects and high reproducibility in oxidation reactions 02 p0205 A69-12322

BORIDES

NT CHROMIUM BORIDES

NT TITANIUM BORIDES

Composites reinforcement with single crystal flakes of aluminum diboride 05 p0785 A69-16581

Lanthanum hexaboride single crystal field emitters for vacuum devices, describing construction and performance 09 p1468 A69-22601

Characteristic temperature, Young modulus and rms atomic displacement in metal borides of various porosities, using dynamic method based on ultrasonic oscillations measurement 12 p2115 A69-26615

Polycrystalline diborides fabrication technology, discussing additives, thermal, physical and mechanical properties, specific applications, etc 19 p3355 A69-35526

BORING MACHINES

Ruby laser boring and welding apparatus cooled by evaporated nitrogen gas, suitable for diamond boring 03 p0434 A69-13720

Cutting loads measured as function of cutting rate and cutting tool geometry during boring of Cr-Ni steel pipe blanks 21 p3731 A69-38878

Computer programming procedures in automatic control of hole boring processes for aircraft components 21 p3731 A69-38881

BORN APPROXIMATION

Ionized plasma radiation near plasma frequency, deriving formula for bremsstrahlung coefficient from Born approximation 02 p0286 A69-11589

Born approximation for calculating low temperature plasma transport properties from quantum mechanical scattering cross sections on Debye potential 02 p0291 A69-12486

First Born approximation cross sections for He excitation from ground state by proton impact calculated, using wave functions 06 p0960 A69-17027

Low pressure measurement by electron scattering using Born approximation 07 p1181 A69-19218

Polarization of Lyman alpha radiation in hydrogen rare gas collisions calculated in Born and distortion approximations including rotational coupling 08 p1355 A69-20207

Born-Mayer parameters simplifying computation of interatomic potential, tabulating numerical values for 104 mononuclear pairs of neutral ground state atoms 13 p2301 A69-27453

Plane wave scattering by semiinfinite turbulent dielectric slab, using Born approximation to develop asymptotic series for stochastic components of forward scattered field [OSA PAPER WH-16] 18 p3174 A69-35245

Atom-atom scattering potential from phase shifts, using WKB formula and Jeffreys-Born approximation 19 p3378 A69-36189

Impact parameter versions of two state and Born approximations to calculate single excitation cross sections of H atoms ground state collisions 22 p3987 A69-41006

Boron filaments reinforced epoxy aircraft landing gear structure prototype, discussing development, fabrication, and testing

09 p1508 A69-22340

Bonded Al-B metal matrix composite materials hot press fabrication and design, discussing temperature pressure time cycles and honeycomb sandwich structures

09 p1510 A69-22351

Fabrication, machining and contouring of boron-epoxy composite for sandwich type aircraft structure, noting F-5 supersonic fighter main landing gear strut door

12 p2103 A69-26826

Boron filament wound composite structures fabrication noting physical properties

14 p2455 A69-29413

Aluminum-boron metal matrix composite joining methods including electron beam, resistance spot, plasma arc and fusion welding [ASM PAPER W9-23.4]

14 p2455 A69-29449

Boron combustion for air augmented rocket applications, discussing single boron particle ignition and combustion characteristics

16 p2828 A69-31737

Combustion of pure crystalline boron single particles injected into hot oxidizing gases streams at atmospheric pressure

[AIAA PAPER 69-562]

16 p2880 A69-32741

Molded composites application to engine components, discussing turboprop reduction gear case design using polymer matrix boron composite [AIAA PAPER 69-466]

16 p2795 A69-32763

Austenitic alloy structure and stress rupture after boron addition

17 p2985 A69-32908

Macrostructural differences between filaments of B and SiC vapor deposited onto small diameter W wire, discussing radial cracks due to dilatation

18 p3160 A69-34266

Composite material applications in space vehicle structures, noting strength and stiffness of boron fibers in plastic or metal matrices

19 p3340 A69-35502

Lightly loaded truss structures fabricated from Be, Be-Al alloy and uniaxial B filament reinforced epoxy tubing for unmanned spacecraft applications

19 p3340 A69-35504

B-epoxy and B-Al composites compared for strength/weight and modulus/weight ratios, moisture absorption, corrosion resistance, projected costs, etc.

19 p3340 A69-35506

Forming, machining and joining characteristics of B-Al composite sheet metal material for space structures

19 p3318 A69-35507

Silicon carbide coated boron fibers in aluminum alloy matrix, discussing tensile and structural properties of braze bonded specimens

19 p3340 A69-35509

Mechanical properties and thermal aging of laminated specimens of collimated B monofilament reinforced composites preimpregnated with polyimide resin

19 p3354 A69-35514

Glass overlaid B filament laminates interleaved with C and silica fabrics, evaluating ablative properties in solid rocket motor tests

19 p3354 A69-35515

Boron epoxy strut prototype for support system of advanced nuclear flight stage with nonintegral cryogenic tankage configuration, achieving weight reduction

19 p3354 A69-35516

Silicon carbide coated boron fiber reinforced /Bor- sic/ Al composites tensile strength and elastic properties

19 p3344 A69-35926

Boron, Li and Cl contents in iron and stone meteorites by fluorometric, thermal-neutron activation and pyrohydrolytic separation methods, tabulating results

19 p3408 A69-36085

Boron thermal diffusion effects on plastic properties of pure Mo subjected to recrystallization

19 p3328 A69-36160

Titanium monocoque fuselage reinforced by composite boron filaments in polyimide resin matrix tested for SST applications, noting weight savings over all titanium structure [AIAA PAPER 69-763]

19 p3329 A69-36298

Boron fiber reinforced Al matrix composite material for high performance aircraft gas turbine engine compressor blading [AIAA PAPER 68-1037]

20 p3586 A69-37153

Boron fiber reinforced Al alloys spall failure and shock induced filament damage, using flyer plate technique

20 p3562 A69-37772

Composite materials application in aerospace industry, discussing boron and carbon filament properties, epoxy resins, etc

20 p3563 A69-37930

Diffusion bonding of Al and boron filament layers into continuous structural material, studying process variables including heat treatment and cross rolling effects

[AIME PAPER S69-6]

20 p3564 A69-38197

Authoradiographic technique for spatial distribution in solid of B at ppm concentration, using electron microscope

20 p3567 A69-38263

Al-B composite aircraft structure fabrication, discussing wingspan segment, resistance spot welding, hot forming of joggles, etc

[AIME PAPER S69-1]

21 p3732 A69-39471

B composite materials in helicopter development, including B and C filament production and B filament applications

22 p3971 A69-40899

Boron fiber reinforced composite materials in aircraft structures, comparing rigidity with glass fiber plastics and weight gains

23 p4179 A69-42155

Redesigned Al wing structure using B-epoxy composite applied to pressurized fuel carrying section, including material, fabrication and test data

24 p4323 A69-43418

Aircraft structure fabrication combining unidirectional strength and stiffness of B composite with metal, including test and weight/ cost data

24 p4323 A69-43419

Tensile strength improvement in Al-B composites by heat treatment to T6 condition and subsequent cold rolling

24 p4334 A69-43449

Boron epoxy composites evaluation for use in aircraft dynamic components, considering fatigue failure mechanism identification

24 p4337 A69-43450

Al-B composites fracture toughness obtained by comparing notched tensile data with unnotched specimens

24 p4335 A69-43451

BORON ALLOYS

Supersaturation of dissolved B in splat quenched Fe-Ni-B alloys, noting interstitial and substitutional B in martensitic and austenitic phases

10 p1707 A69-22987

CR-B binary system phase diagram including lattice parameters, temperature of peritectic decomposition and characteristics of alloys

15 p2641 A69-31185

Boron effect on sintered porous Ni friction at high sliding velocities and temperatures, analyzing oxide film destruction restraint by decreased Ni plasticity

15 p2641 A69-31187

Phase equilibria in ternary systems Nb-Fe-B and Nb-Co-B, determining structural types and lattice constants by using X ray and microstructural analysis

15 p2641 A69-31246

BORON CARBIDES

Boron carbide continuous filaments preparation and properties, discussing use in resin and metal composites [ECS PAPER 210]

05 p0783 A69-16236

Boron carbide body armor fabrication by hot pressing in graphite molds

08 p1320 A69-20411

Boron carbide filaments as reinforcements for metal structures, noting vapor deposition use of silica

09 p1529 A69-22070

Silicon and boron carbides wettability with liquid metals during contact reactions at various temperatures, discussing wetting mechanism

18 p3156 A69-35153

BORON CHLORIDES

Boron diffusion in silicon, using nitrogen carrier and boron trichloride diffusant at high temperature for determination of critical oxygen flow rate

02 p0297 A69-11994

Carbon dioxide laser radiation frequency controlled by varying boron trichloride pressure in cell inserted in resonator

08 p1323 A69-19804

BORON COMPOUNDS

NT BORANES

NT BORIC ACIDS

NT BORIDES

NT CARBORANE

NT CHROMIUM BORIDES

NT DIBORANE

NT TITANIUM BORIDES

Magnetic and semiconducting properties of samarium boride, noting effect of decreasing temperature

07 p1200 A69-19403

BORON FLUORIDES

Boron 10 absorption cross sections from counting ratios measurements of boron trifluoride proportional counter used to monitor neutron fluxes

17 p3008 A69-33753

Boron 11 nuclear quadrupole coupling constants in solid boron halides, finding fine structure on nuclear magnetic resonance in boron fluoride

20 p3483 A69-36935

BORON HYDRIDES

U BORANES

U CARBORANE

BORON ISOTOPES

Formation cross sections of Li, Be and B isotopes produced from oxygen 16 spallation via high energy protons related to astrophysics and cosmic ray physics

14 p2512 A69-28968

Boron 11 nuclear quadrupole coupling constants in solid boron halides, finding fine structure on nuclear magnetic resonance in boron fluoride

20 p3483 A69-36935

BORON NITRIDES

Hot pressed boron nitride properties and fabrication, noting low moisture absorptivity and aerospace applications

02 p0270 A69-11802

High temperature capacitor consisting of thin wafers of pyrolytic boron nitride noting fabrication, dissipation factor and capacitance

04 p0551 A69-15299

Boron nitride coated boron reinforced metal matrix composites, discussing continuous liquid infiltration, fiber-matrix reactions and heat treatment

13 p2283 A69-28671

Refractory materials based on BN and silicon nitride, studying effect of sintering conditions and chemical composition on mechanical properties

15 p2643 A69-31244

Boron nitride synthesis by gas phase reaction of boron chloride or diborane with ammonia, determining purity from equilibrium gas mixture components

17 p2992 A69-33432

Boron nitride and boron nitride composite under high temperatures in air and vacuum for various time periods, discussing thermal shock and oxidation resistance

19 p3359 A69-36208

BORON 10

Boron 10 absorption cross sections from counting ratios measurements of boron trifluoride proportional counter used to monitor neutron fluxes

17 p3008 A69-33753

BOROSILICATE GLASS

Composite materials consisting of brittle inorganic glass matrix with metallic or inorganic crystal microspheres, noting strength and elasticity

12 p2115 A69-26830

Thermal accommodation coefficient and critical supersaturation for nucleation of mercury vapor on pyrex glass

13 p2321 A69-28005

BOSE-EINSTEIN STATISTICS

U QUANTUM STATISTICS

BOSON FIELDS

Zero point energy, evolutionary cosmology, negative kinematic pressure and space curvature, assuming physical vacuum as ground state of Bose field

10 p1780 A69-23649

BOSONS

NT ALPHA PARTICLES

NT KAONS

NT LIGHT BEAMS

NT MESON RESONANCES

NT PHOTON BEAMS

NT PHOTONS

Superfluidity and superconductivity under cosmic conditions, discussing Bose-Einstein condensation, Fermi particles, boson systems, neutron stars, etc

16 p2853 A69-31595

He II excitation spectrum for interparticle potential using par Hamiltonian with repulsive core and attractive well

17 p3008 A69-33118

Proton-antiproton high energy elastic scattering by bosons exchange, introducing vertex functions for non-local Lagrangian

21 p3775 A69-39467

BOUGUER LAW

- Transfer equation and Bouguer-Lambert-Beer equation application to multiple light scattering in plane medium 14 p2487 A69-29663
- Atmospheric transmission determined in submillimeter solar radiation spectra using Bouguer law, identifying absorption lines in nocturnal and diurnal spectra 21 p3796 A69-38472

BOUNDARIES

- NT FLUID BOUNDARIES
- NT FREE BOUNDARIES
- NT GAS-SOLID INTERFACES
- NT GRAIN BOUNDARIES
- NT JET BOUNDARIES
- NT LIQUID-LIQUID INTERFACES
- NT LIQUID-SOLID INTERFACES
- NT LIQUID-VAPOR INTERFACES
- Moving and stationary interphase boundaries segregation during phase transformation, discussing embrittlement 03 p0450 A69-13883
- Magnetosphere boundary configuration calculated with allowance for geomagnetic dipole inclination to geographic axis and nondipole section of geomagnetic field 10 p1686 A69-23902
- Regional boundaries in control-parameter space constructed by computer algorithm, involving parameter vibration direction changes in parameter plane 13 p2225 A69-27967
- Turbojet engine open and closed loop boundary control systems performance during maximum penetration of prohibited operating area induced by HF external disturbances [AIAA PAPER 69-543] 16 p2841 A69-32681
- Elastoplastic boundaries of wave propagation of combined longitudinal and torsional stresses at tube end [ASME PAPER 69-APM-13] 18 p3213 A69-34389
- Exponential boundedness of system motion for Lure type forced systems, using quadratic Liapunov functions 18 p3164 A69-34674
- Maneuverability domains optimization with semilinear boundaries, noting application to orbital transfer 19 p3399 A69-35668

BOUNDARY LAYER COMBUSTION

- Self excited vibrating laminar diffusion flames, discussing coupling, jet spacing radial heat transfer and boundary layer interaction 16 p2876 A69-31711
- Flame acceleration data applied to unburnt gas boundary layer analysis, discussing velocity and temperature profiles, layer thickness variation and expansion phase backflow 19 p3450 A69-36359

BOUNDARY LAYER CONTROL

- NT POROUS BOUNDARY LAYER CONTROL
- Soviet monograph on laminar boundary layer in presence of suction covering incompressible flow through porous surface, drag reduction and optimal suction at high velocities 01 p0060 A69-10615
- Determining influence of blowing various gases into boundary layer on friction and heat and mass transfer when external flow velocity varies according to power law 02 p0234 A69-12581
- Blowing boundary layer control /BLC/ system designed for STOL seaplanes 05 p0695 A69-15546
- Acrodynamic technology applied to takeoff and landing, discussing STOL airplanes in descent and boundary layer control /BLC/ flap system 05 p0696 A69-15569
- Decreasing secondary flows in spatial boundary layer on porous plate by boundary layer control /BLC/ through suction or blowing, using Prandtl partial differential equations 06 p0909 A69-17185
- Radiative-convective heat transfer in gray gas plane layer blown into turbulent flow past permeable plate 07 p1242 A69-18991
- Tangential air jet for separation control of two dimensional incompressible flow along circular cylindrical wall 09 p1431 A69-22277
- Three dimensional laminar boundary layer of incompressible flow controlled by suction or injection, considering similarity flow solutions and role in satellite design 10 p1678 A69-22936

Monograph on optimal design of free-running drag turbines for boundary layer suction in aircraft, emphasizing gliders performance 12 p2011 A69-26117

- Laminar boundary layer control by combined blowing and suction, analyzing surface roughness influence concerned with underwater vehicle skin friction reduction [AIAA PAPER 69-387] 15 p2591 A69-30477
- Laminar boundary layer control on two dimensional body by combined blowing and suction in presence of roughness, noting skin friction reduction [AIAA PAPER 68-641] 17 p2957 A69-34015
- Optimal boundary layer control ensuring minimum heat transfer to porous plate from incompressible flow of hot gas of cooling system 21 p3849 A69-38846
- Integral relations method applied to air jet flow along cylinder with boundary layer control by suction or blowing 21 p3698 A69-39845
- STOL seaplane bottom pressure distribution from tests on scale model of PX-S seaplane, discussing boundary layer control effects 22 p3864 A69-40586

BOUNDARY LAYER FLOW

- NT REATTACHED FLOW
- NT SECONDARY FLOW
- NT SEPARATED FLOW
- Boundary layer of MHD flow past semifinite plate, using Navier-Stokes equations 01 p0130 A69-10771
- Axisymmetric MHD flow in turbulence chamber at large Hartmann numbers studied for flow boundary layer effects 01 p0130 A69-10772
- Time history of unsteady heat transfer in laminar boundary layer over semiinfinite flat plate due to step change in wall temperature or wall flow 01 p0177 A69-11401
- Unsteady laminar boundary layer flow at curved surfaces, analyzing frequency and curvature parameter influence on basis of small disturbances method [DVL-863] 02 p0231 A69-12053
- Plate temperature oscillation effects on forced convection laminar viscous incompressible MHD boundary layer flow from semiinfinite flat plate 02 p0288 A69-12143
- Compressible and incompressible laminar boundary layer with constant wall shear stress, using initial profiles 02 p0233 A69-12535
- Unsteady incompressible boundary layer flow over leading edge boundary layer calculated by three dimensional time dependent equations 02 p0233 A69-12543
- Viscous liquid layer flow down inclined plane under boundary conditions, taking into account drag and penetration at porous bed surface 02 p0234 A69-12774
- Planetary boundary layer response to time varying pressure gradient force 03 p0460 A69-13337
- Eddy diffusivity in planetary boundary layer determined by vertical velocity spectrum 03 p0460 A69-13338
- Thermal convection in rotating fluid annulus, discussing suppression of frictional constraint on lateral boundary 03 p0460 A69-13339
- Finite difference schemes to solve fundamental equations in boundary layer flow theory 03 p0416 A69-13655
- Implicit finite difference scheme to integrate unsteady boundary layer equations for compressible gas 03 p0416 A69-13656
- Heat transfer covering heat conduction, channel flow, boundary layer flow, separated flow, etc 04 p0684 A69-14354
- Unsteady compressible laminar boundary layer flow over insulated or isothermal flat plate moving with arbitrary time variant velocity in viscous fluid 04 p0588 A69-14715
- Boundary layer flow of viscous incompressible liquid past wedge embedded circular cylinder 04 p0590 A69-15276
- Entry region flow and convective heat transfer prediction in cooled vertical pipe open at both ends, considering wall temperature 05 p0845 A69-15717
- Wall jet type fluidic elements subjected to hydroaerodynamic effects, discussing use of boundary layer flow properties 05 p0705 A69-16016

Suction effect on incompressible flow through step expansion in circular pipe through sudden enlargement, considering inlet flow with thin boundary layer [ASME PAPER 68-FE-11] 05 p0748 A69-16074

- Laminar flow stability along flexible boundary, using broken linear velocity profile instead of boundary layer profile 06 p0909 A69-17207
- Universal equations for three dimensional laminar boundary layer of incompressible fluid on walls of axisymmetric channel with vortical external flow 06 p0909 A69-17328
- Approximate solution of equations for boundary layer flow of conducting medium on insulating and electrode walls of MHD generator channel 06 p0871 A69-17914
- Nonsimilar laminar boundary layer solutions with negative pressure gradient compared to experimental boundary layer velocity profiles, momentum and displacement thicknesses [AIAA PAPER 69-35] 06 p0913 A69-18094
- Analytical model developed from turbulent shear flow study, discussing Reynolds number effect [AIAA PAPER 69-163] 06 p0914 A69-18139
- Differential equations governing free convection boundary layer flow past isothermal semiinfinite vertical flat plate solved for large Prandtl numbers by matched asymptotic expansions 07 p1239 A69-18266
- Dirichlet and Neumann problems solvability using potential theory methods, limiting study to three dimensional domains 07 p1173 A69-18496
- Transformation of laminar stationary incompressible boundary layer equations for body of revolution in incident flow, using difference method 08 p1252 A69-20703
- Constant property turbulent boundary layer flow, developing finite difference solution for prediction of velocity profiles and skin friction coefficient 09 p1482 A69-21950
- Steady laminar boundary layer flow calculations extended to temperature boundary layer for given heat flow or temperature distribution at wall 10 p1808 A69-22915
- Existence and uniqueness to boundary layer continuation problem based on flow equation for steady gas flow 10 p1679 A69-23569
- Turbulent boundary layers on flat wall of supersonic wind tunnel, determining velocity profiles, thicknesses and skin friction coefficients 10 p1680 A69-23643
- Laminar boundary steady two dimensional constant velocity flow over curved surface equation derived from Navier-Stokes equation 11 p1867 A69-24375
- Turbulent boundary layer velocity distributions in uniform/accelerated compressible flow over flat plate, using change of variables based on mixing length formula [ONERA-TP-693] 11 p1867 A69-24752
- Shock induced boundary layer flow establishment on semiinfinite flat plate, measuring heat transfer rates and transition to turbulence 11 p1869 A69-24890
- Second order effects on two dimensional laminar boundary layer flow of incompressible fluid 11 p1872 A69-25127
- Reverse transition in two dimensional accelerated incompressible turbulent boundary layer flow, noting skin friction coefficient and turbulent intensity profiles 11 p1872 A69-25129
- Heat transfer and skin friction in convective and stagnation flow laminar film boiling in boundary layer flows with appreciable radiation 11 p1873 A69-25242
- Free convection boundary layer flow past vertical flat plate analyzed for nonlinear wall temperature distributions using series solutions 11 p2002 A69-25243
- Buoyancy effect on boundary layer flow over semiinfinite vertical plate heated to constant temperature in uniform free stream 11 p1874 A69-25352
- Wing geometry and wing lower surface boundary layer effects on rolled-up tip vortices geometry and strength 11 p1819 A69-25372
- Thin spherical layer flow stability with respect to small disturbances, showing unsteady motion above critical Reynolds numbers and secondary flow features 11 p1875 A69-25486

Similarity solutions for incompressible, steady hydrodynamic and thermal boundary layers on longitudinally curved walls, allowing for displacement and curvature effects

12 p2060 A69-25761

Wall pressure fluctuations due to turbulent boundary layer flow, calculating statistical properties [AIAA PAPER 68-642]

13 p2244 A69-27246

Conducting liquid boundary layer flow and heat flux on electrodes of MHD generator, including one dimensional flow outside boundary layer

13 p2309 A69-28028

Boundary layer physical and chemical processes effect on dynamic parameters of high temperature hypersonic gas flow past blunt bodies

14 p2391 A69-29620

Boundary value problem in three dimensional boundary layer theory for incompressible flow near stagnation point

14 p2432 A69-29677

Flow phenomena associated with electrically conducting boundary layer jet injection through slot into uniform slipstream in presence of transverse magnetic field

14 p2501 A69-29917

Power law fluids boundary layer near flat plate studied by series expansion and steepest descent methods, determining velocity gradient and skin friction coefficient

15 p2589 A69-30002

Flow and temperature boundary layers on longitudinally curved walls, giving higher approximation exact solutions

15 p2591 A69-30933

Eigenvalue bounds for amplification rates, wave speeds and linear stability conditions for Orr-Sommerfeld equation governing parallel flow in boundary layer and round pipes

16 p2768 A69-31591

Boundary layer over impulsively started flat plate, describing flow transition from unsteady /Rayleigh/ to steady /Blasius/ state by iterative methods

16 p2769 A69-31812

Ion and electron distributions in chemical nonequilibrium boundary layer flow over hypersonic reentry vehicle, discussing plasma sheath and boundary layer thickness relations

16 p2769 A69-31874

Laminar boundary layer on rotating blades and yawed infinite wings, solving partial differential equations numerically by implicit finite difference scheme on computer

16 p2732 A69-31885

Systematic formalism specialization of group theory techniques for similarity analysis applied to three dimensional incompressible boundary layer flows

16 p2773 A69-32379

Pressure and temperature surveys of Mach 27-47 nozzle boundary layer at Ames M-50 He tunnel, determining velocity profiles, wall friction coefficient, etc [AIAA PAPER 69-686]

17 p2953 A69-33441

Three dimensional hypersonic laminar boundary layer subdivided into inner and outer regions, obtaining flow description by matching inner and outer solutions [AIAA PAPER 69-710]

17 p2955 A69-33467

Turbulent boundary layer on disk rotating in free air, using circumferential and radial momentum integral equations and entrainment equation

17 p2957 A69-33601

Boundary layer equation for steady incompressible flow past flat plate with parabolic leading edge, obtaining series solution in inverse powers of Reynolds number

18 p3124 A69-35270

Hydrodynamic stability of incompressible fluid boundary layer flow during blowing or suction through porous surface, determining Reynolds number lower bounds

18 p3124 A69-35381

Rough wall turbulent boundary layer development in pipe flow determined for different roughness geometries in zero and adverse pressure gradients

18 p3125 A69-35387

Rayleigh criteria extension for boundary layers of rotationally symmetrical bodies with curved meridian, utilizing orthogonal coordinate system

19 p3298 A69-36309

Tangential and radial velocities in vortex boundary layer flow, relating diminishing amplitudes to increasing height using iterative method

19 p3363 A69-36499

Generalized series solutions of boundary layer flows over pointed and blunt nosed axisymmetric bodies, noting general potential flow extending Mangler transformation usefulness

20 p3514 A69-37211

Rice-Ramsperger-Kassel kinetic theory applied to sulfur hexafluoride injection into boundary layer of high speed reentry vehicle

20 p3514 A69-37226

External natural convection flows, studying laminar instability, transition and turbulence in boundary layer flow

20 p3633 A69-37718

Boundary layer velocity distribution in turbulent swirling pipe flow produced by twisted tape inserts [ASME PAPER 69-FE-14]

20 p3516 A69-37990

Three dimensional laminar boundary layer hypersonic flow about slender conical vehicles, analyzing transverse surface curvature effect, studying Reynolds number, cone angle, etc [ASME PAPER 69-FE-23]

20 p3460 A69-37992

Unsteady laminar incompressible time dependent boundary layer flows with cylindrical symmetry, transverse boundaries and no swirl [ASME PAPER 69-FE-47]

20 p3517 A69-37997

Unsteady boundary layer flows of compressible fluid over semiinfinite flat plate, discussing heat transfer rate

20 p3518 A69-38318

Boundary layer flow past permeable surface, generalizing integral equations for case with suction

21 p3691 A69-38573

Boundary layer equations solved for MHD version of Falkner-Skan problem, using Laplace transform and steepest descent technique

21 p3693 A69-38750

Free convection boundary layer singular character at low Prandtl numbers, deriving expression for Nusselt-Grashof relation

21 p3849 A69-38772

Skin friction results from free stream velocity boundary layers with varying injection and suction wall conditions, describing flow characteristics

21 p3696 A69-39431

Flow stability regions at surface of flight vehicle, considering boundary layer flow of incompressible fluid

21 p3645 A69-39827

Interaction between boundary layer and external vortex flows and stability transitions of heated rotating fluid annulus

21 p3698 A69-39869

Numerical calculations for boundary layer flows allowing similar solutions, using iterative numerical integration of integral equation

22 p3929 A69-39925

Velocity profile and skin friction in boundary layer on flat plate with periodic vorticity near leading edge

22 p3929 A69-40015

Velocity and temperature boundary layers on plane wall developed by ideal shock tube flow for weak shock and expansion waves

22 p3932 A69-40894

Friction, heat transfer and mass transfer theory of flow represented by two dimensional parabolic boundary layer equations

22 p3933 A69-40940

Nonequilibrium boundary layer of dissociated diatomic gas over catalytic flat plate in hot hypersonic uniform flow

22 p3934 A69-41181

Asymptotic description of laminar hypersonic boundary layer acceleration approaching sharp corner, assuming small interaction with outer inviscid flow [AIAA PAPER 68-67]

23 p4059 A69-41883

Boundary layer method for calculation of viscous damping coefficients for small amplitude progressive waves propagating in nonhomogeneous fluid

23 p4153 A69-42408

Shock wave/boundary layer interaction calculation methods circumventing simultaneous large longitudinal and transverse pressure gradients and viscous effects

24 p4243 A69-42582

Parallel magnetic field effect on free boundary layer type flows stability of low Reynolds number between parallel streams of viscous incompressible conducting fluid

24 p4298 A69-42596

Turbulent boundary layer at inlet section of gas blown tube based on solutions of energy and momentum equations, deriving relations for inlet section length

24 p4300 A69-43079

Boundary layer equations with heat transfer for laminar and turbulent incompressible flows about two dimensional and axisymmetric flows, using finite difference method [ASME PAPER 69-HT-7]

24 p4304 A69-43561

Uniform flow and wall boundary layer growth measurement in conical nozzle of reflected shock tunnel operating at high enthalpy conditions

24 p4247 A69-43575

Superimposed free vortex swirl effect on flow and heat transfer in three dimensional axisymmetric laminar boundary layer

24 p4304 A69-43584

Physical flows characteristics with self similar laminar boundary layers, performing inverse transformation of Falkner-Skan equation

24 p4304 A69-43586

BOUNDARY LAYER NOISE U AERODYNAMIC NOISE

BOUNDARY LAYER SEPARATION

Flow in square to rectangular constant area transition piece having straight walls with outlet aspect ratio of 5 fitted with exit duct

02 p0189 A69-12412

Hypersonic flow distribution and separation types over highly swept delta wings with trailing edge flaps at Mach 6 [AIAA PAPER 68-97]

02 p0189 A69-12522

Incompressible turbulent boundary layer with near zero wall friction at circular cylinder situated longitudinally in flow

03 p0416 A69-13664

Modified Karman-Pohlhausen pulse integral equation for calculating boundary layers is more accurate when seeking flow separation point

04 p0591 A69-15408

Laminar boundary layer separation and reattachment near concave corner on cooled reentry body in supersonic flow

06 p0911 A69-17592

Three dimensional boundary layer problems analyzed by exact numerical method [AIAA PAPER 69-138]

06 p0911 A69-18041

Incompressible laminar Falkner-Skan boundary layer suffering sudden acceleration by moving belt, noting boundary layer separation [AIAA PAPER 69-40]

06 p0912 A69-18049

Separation of subcritical and supercritical compressible turbulent boundary layers under strong pressure gradients using method based on integral equations [AIAA PAPER 69-34]

06 p0912 A69-18077

Isoenergetic two dimensional supersonic turbulent base flow, noting boundary layer separation properties upstream and downstream [AIAA PAPER 69-68]

06 p0864 A69-18137

Nonsimilar MHD channels boundary layers on insulating walls noting influence of loading factor, wall temperature and Hall effect on separation [AIAA PAPER 69-46]

06 p0972 A69-18192

Hypersonic laminar boundary layers on compression corner model, studying flap lengths effects and mass transfer [AIAA PAPER 69-36]

06 p0866 A69-18214

Three dimensional boundary layer separation assuming zero friction

07 p1050 A69-18736

Boundary layer discontinuity on helicopter rotor blade in hovering using flow visualization [AIAA PAPER 69-197]

07 p1051 A69-19561

Mixed three dimensional separation of boundary layer on ellipsoid of revolution at ten degree angle of attack, ignoring heat flux

08 p1251 A69-19876

Laminar boundary layer behavior in neighborhood of separation, discussing regressive influence beyond separation in Prandtl equations [ONERA-TP-677]

08 p1303 A69-19878

Boundary layer separation and vortex street buildup conditions of gas flow in circular cylinder wake

08 p1252 A69-20713

Heat flux effect on laminar boundary layer separation in supersonic flow stressing free interaction zone

09 p1429 A69-21690

Equilibrium theory of parametric pump using cyclic flow of binary mixture through column with heated and cooled bed of solid absorbent

09 p1481 A69-21910

Laminar boundary layer separation and heat transfer on zero incidence cone at hypersonic speed, noting wall temperature and Reynolds number effects

09 p1433 A69-22609

Semiactuator disk method for boundary layers and velocity of stall flutter cascade blades vibrating in transient mode, considering nonstall flutter

11 p1818 A69-25028

LF spectral analysis of flowing water pressure pulsations behind single bulge on hydrodynamic channel smooth wall at low disturbance level

13 p2246 A69-27535

Demixed layer at wall in shear flow of nonsedimenting suspensions with different geometries due to viscous and inertia effect superposition

13 p2251 A69-28498

Flow structure in conical shock wave-sharp flat plate interaction zone in supersonic flow, noting turbulent boundary layer before separation
14 p2428 A69-28897

Turbulent boundary layers behavior near flow separation, obtaining equations for equilibrium layers
15 p2591 A69-30638

Trailing shock wave position in air breathing jet engine channels, determining supersonic-subsonic boundary, noting Mach number effects on pressure ratio
16 p2768 A69-31743

Supersonic laminar boundary layer separation calculated by integral method using free parameters for velocity and enthalpy profiles, considering boundary layer-external flow interaction
16 p2731 A69-31834

Critical review of paper on suction effect on hypersonic laminar boundary layer separation
16 p2771 A69-31928

Distributed boundary layer suction effectiveness for controlling supersonic transitional flow separation
16 p2772 A69-32149

Two dimensional model for analyzing turbulent separation and reattachment at blade trailing edge at supersonic speed
[ONERA-TP-678]
16 p2733 A69-32258

Normal and negative Magnus force experienced by rotating cylinder in air flow, discussing wind tunnel tests, laminar and turbulent boundary layers separation, pressure distribution, etc
17 p2958 A69-34213

Laminar separation in incompressible fluid flowing past bluff body at high Reynolds number, investigating shock wave interaction with laminar boundary layers
18 p3122 A69-34918

Wing tunnel and theoretical studies of hypersonic wall flow on cone, considering static pressure and convection heat flux density effects
19 p3241 A69-36759

Supersonic flow past antisymmetrical thin delta wing by flow separation from subsonic leading edges, noting wing surface pressures
19 p3241 A69-36779

LF spectral analysis of flowing water pressure pulsations behind single bulge on hydrodynamic channel smooth wall at low disturbance level
20 p3518 A69-38202

Prandtl boundary layer theory problems, considering solution uniqueness and stability, unsteady flow, boundary layer separation, existence conditions, etc
21 p3697 A69-39698

Secondary losses in flat large scale turbine lattice attributed to LF pulsating flow separation on back of blade
21 p3645 A69-39717

Hypersonic turbulent boundary layer separation over cone-cylinder flare configuration at zero angle of attack and high Reynolds number
22 p2930 A69-40557

Initial pressure rise and consequent laminar boundary layer separation during interaction with shock wave
23 p4151 A69-41691

Boundary layer separation and free mixing phenomena between streams behind thin flat plate by finite difference methods and Prandtl exchange coefficient
23 p4060 A69-41912

Boundary layer separating collisionless plasma from one dimensional magnetic field for anisotropic particle velocity distribution functions, preserving charge neutrality in boundary layer
23 p4197 A69-42415

Boundary layer separation zones in laminar, transition and turbulent fluid flows past conical bodies with widening skirts
24 p4245 A69-43481

Laminar boundary layer separation in supersonic flow, constructing method for flow distribution functions, perturbed flow region dimensions and pressure perturbation amplitude
24 p4246 A69-43482

Separation flows in flat channel with step recess, analyzing dynamic characteristics in mixing region, in wake of rarefaction waves and in attachment zone
24 p4247 A69-43498

BOUNDARY LAYER STABILITY

Hydromagnetic stability of free boundary layer between two uniform streams in presence of aligned uniform magnetic field at large Reynolds number
02 p0287 A69-11832

Natural convection boundary layer stability on heated isothermal vertical plane wall, discussing Grashof number as laminar to turbulent flow transition criterion
02 p0188 A69-12038

Unsteady laminar boundary layer flow at curved surfaces, analyzing frequency and curvature parameter influence on basis of small disturbances method
[DVL-863]
02 p0231 A69-12053

Stability of laminar flow along flexible boundary using broken linear velocity profile
02 p0232 A69-12353

Numerical solution of chemically reacting boundary layer equations, noting loss of accuracy due to numerical cancellations
04 p0588 A69-14737

Irregular Sturm-Liouville first and higher order perturbation problem in boundary layer theory providing analytical approximations to complete orthogonal set of characteristic functions
04 p0590 A69-15001

Stability of laminar natural convection boundary layer flow, discussing thermal capacity coupling between fluid and wall and Prandtl number
05 p0744 A69-15719

Stability theory application to laminar boundary layer transition prediction on two dimensional and axisymmetric flows having pressure distributions in incompressible flow
[AIAA PAPER 69-10]
06 p0914 A69-18127

Geometrically exact finite element for thin shells of revolution, using approximation to predict boundary layer stress distribution during vibration
[AIAA PAPER 69-56]
06 p1029 A69-18193

Equilibrium stability of horizontal layer of fluid in field of modulated temperature gradient having layer thickness greater than penetration depth of heat waves
07 p1241 A69-18696

Velocity profiles in unsteady laminar incompressible boundary layer over flat plate in shock tube by two parameter integral method
11 p1871 A69-25026

Vortices interaction effect on vertical turbulent heat flow in atmosphere boundary layer, determining dependence of vortex mean vertical temperature gradient
13 p2293 A69-27841

Turbulence constant for flows near walls, analyzing viscosity dependence on wall distance by utilizing maximum stability principle
15 p2590 A69-30048

Wall curvature effect on hydrodynamic stability of laminar incompressible boundary layer with respect to perturbing Tollmien-Schlichting waves
19 p3299 A69-36587

Dimensionless radial and transverse velocity profiles for unsteady incompressible boundary layer on rotating disk in rotating fluid
19 p3300 A69-36720

Unsteady boundary layer with distributed injection or suction on porous plate, determining acceleration and flow parameter functions from velocity profiles
21 p3692 A69-38609

Lower boundary approximation for theory of thermal laminar steady state boundary layer on isothermal immersed plate
23 p4150 A69-41334

Unsteady periodic boundary layer stability on flat plate, presenting model for disturbance wave packet propagation streamwise pressure gradients effects in transition flow
23 p4152 A69-41888

Atmospheric model for calculating wind velocity profile and turbulence of stable atmospheric boundary layer with given temperature stratification and pressure gradient distribution
23 p4184 A69-42489

Steady state baroclinic boundary layer over two dimensional terrain in f plane, noting layer thickness dependence on stability and terrain slope
24 p4347 A69-43356

BOUNDARY LAYER TRANSITION

Turbulent to laminar boundary layer reversal by applying negative pressure gradient
01 p0058 A69-10066

Turbulent boundary layer reversion to laminar state associated with departures from inner law velocity distribution in presence of favorable pressure gradients
03 p0414 A69-13016

Axial magnetic field effect on steady linear Ekman boundary layer
03 p0474 A69-13141

Asymptotic similarity in neutral barotropic planetary boundary layers, solving Ekman flow by singular perturbation methods
03 p0460 A69-13336

Boundary layer transition measurements on flight tests of experimental 22 degree conical reentry vehicle with Be heat shield and graphite nose
[AIAA PAPER 68-1152]
03 p0362 A69-13648

Boundary layer transition to turbulence shown to have influence on magnitude of lifting reentry body heating rate
[AIAA PAPER 68-1155]
03 p0416 A69-13674

Stokes and Rayleigh layer formation during solid body rotation of semiinfinite fluid and infinite disk
03 p0417 A69-13797

Hypersonic turbulent boundary layer in adverse pressure gradients studied for transition, measuring static/pitot pressure, stagnation temperature and heat transfer rates
[AIAA PAPER 68-44]
04 p0588 A69-14716

Ekman boundary layer problem of steady axisymmetric viscous incompressible flow between infinite coaxial rotating disk, studying laminar range of Taylor number R
05 p0744 A69-15665

Hypersonic laminar and transitional heat transfer rate distribution on spherically blunted cones
05 p0696 A69-15707

Boundary layer transition detection at supersonic speeds, using thin film gages to infer local laminar and turbulent supersonic skin friction
[AIAA PAPER 69-9]
06 p0912 A69-18075

Dynamic stability loss on ablating vehicles ascribed to boundary layer transition effect from turbulent aft body heating
[AIAA PAPER 69-106]
06 p1037 A69-18087

Spatial distribution of three dimensional laminar boundary layer transition zone on sharp half angle cone from hypersonic wind tunnel tests
[AIAA PAPER 69-12]
06 p0863 A69-18112

Stability theory application to laminar boundary layer transition prediction on two dimensional and axisymmetric flows having pressure distributions in incompressible flow
[AIAA PAPER 69-10]
06 p0914 A69-18127

Width of strong shock wave front and transition layers estimated, using Boltzmann kinetic equation and H-theorem
07 p1118 A69-18702

Transition boundary layer on flat plate in subsonic wind tunnel measured by hot-wire method, obtaining velocity fluctuation distribution and turbulence intensity
07 p1121 A69-19329

Computer study of analytical model of boundary layer transition from laminar to turbulent flow
[AIAA PAPER 68-38]
09 p1482 A69-21945

Tolerable surface roughness for transition stability in incompressible laminar boundary layer, including analysis of two and three dimensional roughness shape effects
12 p2063 A69-26774

Boundary layer between cold plasma and vacuum magnetic field, considering transverse velocity component perpendicular to field
12 p2139 A69-26944

Thermal stratification effect on wind structure in Ekman layer, assuming turbulent transfer and height dependence
13 p2290 A69-27390

Radiated aerodynamic noise effects on boundary layer transition on sharp leading edge hollow cylinders in wind tunnels, noting Reynolds numbers correlation
[AIAA PAPER 68-375]
13 p2241 A69-28211

Roughness effects on boundary layer transition up to Mach 16 in hotshot wind tunnel
[AIAA PAPER 68-377]
13 p2242 A69-28213

Supersonic boundary layer acoustic characteristics measured in wind tunnel on cylindrical model with several forebody configurations
[AIAA PAPER 69-344]
13 p2249 A69-28279

Temperature factor effect on transition from laminar to turbulent flow in boundary layer of plate
13 p2251 A69-28558

Gas compressibility influence on laminar to turbulent boundary layer transition determined using Taylor hydrodynamic finite perturbation model
14 p2389 A69-28974

Subliming ablation effects on boundary layer transition for cones in hypersonic flow, discussing Reynolds numbers measured in wind tunnel tests
[AIAA PAPER 68-40]
16 p2732 A69-31881

Laminar-turbulent transition in boundary layer on thermally decomposing surface, discussing gasification rate, Reynolds number effects, heat transfer and turbulence onset mechanism
16 p2878 A69-31951

Boundary layer trip geometry, size and location effects on position of transition at hypersonic speeds
17 p2950 A69-33249

Mach number, cone angle, bluntness and wall to recovery temperature ratio effects on slender cones

boundary layer transition measurements at hypersonic speeds

17 p2890 A69-33250

Amplified boundary layer oscillations and transition at swept flat nosed wing attachment line with/without boundary layer suction analyzed by wind tunnel tests

17 p2890 A69-33251

Free stream disturbances influence on hypersonic boundary layer transition Reynolds number in heated and unheated flows

[AIAA PAPER 69-704] 17 p2953 A69-33453

Hypersonic boundary layer transition on blunt slender cones at M equal 10 obtained independent Reynolds number

[AIAA PAPER 69-705] 17 p2954 A69-33455

Cone boundary layer transition location and Reynolds number as function of nose bluntness combined effect with A_r , air and He mass injection

[AIAA PAPER 67-706] 17 p2955 A69-33476

Nonuniform heating rates during laminar boundary layer transition on slender cone at hypersonic speeds

18 p3085 A69-34435

Boundary layer transition from laminar to turbulent flow on flat plate, considering supersonic and hypersonic flow, pressure gradients, surface curvature and roughness, etc

18 p3123 A69-34920

Atmospheric horizontal mixing caused by quasi two dimensional macroturbulent motions, describing micro and mesoscale processes using numerical model

19 p3363 A69-36500

Wind and temperature profiles in Ekman boundary layer, using numerical integrations of dynamic equations including time derivative terms

19 p3363 A69-36501

Stability theory formulation for evaluation of boundary layer transition from laminar to turbulent states

[AIAA PAPER 68-669] 20 p3514 A69-37184

Turbulent boundary layer growth predicted for adverse pressure gradients, using entrainment theory for two dimensional and axisymmetric flows

[ASME PAPER 69-FE-16] 20 p3517 A69-37991

Boundary layer development on body accelerating in viscous incompressible fluid, using straight lines approximation and asymptotic expansions

22 p3929 A69-40110

Electromagnetic cascade showers transition effect in various materials, measuring energy deposition as function of position

22 p3987 A69-41003

Unsteady periodic boundary layer stability on flat plate, presenting model for disturbance wave packet propagation streamwise pressure gradients effects in transition flow

23 p4152 A69-41888

Boundary layer transition to turbulence shown to have influence on magnitude of lifting reentry body heating rate

[CIIA PAPER 68-1155] 24 p4300 A69-43251

Boundary layer separation zones in laminar, transition and turbulent fluid flows past conical bodies with widening skirts

24 p4245 A69-43481

Boundary layer and heat transfer measurements for turbulent boundary layer laminarizing in conical nozzle flow with wall cooling

[ASME PAPER 69-HT-56] 24 p4303 A69-43538

Luminescent turbulent boundary layer prediction using mixing length model modified for viscous sublayer structural changes near wall compared with heat transfer data

[ASME PAPER 69-HT-13] 24 p4303 A69-43556

Air flow laminarizing turbulent boundary layer, determining velocity, turbulence intensity, temperature profiles and local heat transfer coefficients

[ASME PAPER 69-HT-10] 24 p4413 A69-43558

High enthalpy shock tube and nozzle gas flows for incident shock Mach numbers analyzed for laminar boundary layers and boundary layer transitions

24 p4305 A69-43664

BOUNDARY LAYERS

NT COMPRESSIBLE BOUNDARY LAYER

NT HYPERSONIC BOUNDARY LAYER

NT LAMINAR BOUNDARY LAYER

NT THERMAL BOUNDARY LAYER

NT THREE DIMENSIONAL BOUNDARY LAYER

NT TURBULENT BOUNDARY LAYER

Atmospheric diffusion measurement based on analysis of thoron emitted continuously from point source, permitting study of diffusion in atmospheric boundary layer

01 p0144 A69-10043

MHD boundary layer equations in Blasius problem reduced to differential equations and solved by Laplace transform

01 p0127 A69-10337

Transverse pressure gradient and streamwise derivatives effect on free convection laminar heat transfer on isothermal vertical plate at low Prandtl numbers

01 p0177 A69-11409

Transverse plasma velocity component effect on boundary layer structure between cold plasma and confined magnetic field

02 p0235 A69-11424

Boundary layer effect on large scale atmospheric processes from analyzing two layer free atmosphere model, plotting weather forecast charts

02 p0273 A69-11435

Turbulence conditions in atmospheric boundary layer within similarity theory, including wind velocity and temperature profile

02 p0274 A69-11447

Infinite system of first order integral equations derived from Prandtl boundary layer equation and continuity equation

02 p0231 A69-12059

Boundary layer local densities in high temperature gas flows obtained by measuring monochromatic soft X rays attenuation in layer

02 p0233 A69-12489

Long wave radiative heat flux in boundary layers of cloud during solid overcast, discussing dependence on various cloud and atmospheric parameters

03 p0458 A69-13271

Thermal forcing role in diurnal oscillation of planetary boundary layer wind above sloping terrain

03 p0462 A69-13682

Boundary layer effects on shadow deformation, emphasizing two dimensional flow with image projected by parallel light beams perpendicular to flow plane

03 p0364 A69-13787

Laminar flow of viscous fluid along wall with fixed leading edge and moving surface, discussing conditions of boundary layer formation and dynamic similarity

03 p0417 A69-13792

Boundary layer equations for uniform motion of semiinfinite flat plate through incompressible conducting fluid at rest and in magnetic field, using numerical method

03 p0477 A69-13794

Sufficient conditions for stability of compressible atmospheric flows for rigid lid types of upper boundary condition

03 p0417 A69-13796

Instability and disturbance amplification in external laminar natural convection boundary layer over vertical flat surface with uniform heat flux

03 p0533 A69-13951

Laminar accelerating flow of thin film falling along vertical wall, emphasizing growth and decrease of boundary layer and film thickness

[ASME PAPER 68-APM/Z] 04 p0586 A69-14388

Cylindrical sound pulse propagation in homogeneous layer under inhomogeneous half space

04 p0630 A69-14531

Difference approximation with second order accuracy of numerical solution for parabolic type equations

04 p0622 A69-14618

Numerical solution of nonlinear two point boundary value problems of boundary layer type, noting shock wave formation in supersonic nozzle

04 p0544 A69-14889

Tetron flight observations of eddy velocities in planetary boundary layer, noting effects of height and seasonal variations

04 p0626 A69-14912

Conventional fuselage and streamline body shapes effect on drag at subsonic speeds, noting boundary layer development

05 p0697 A69-15827

Turbulence characteristics and wind velocity in atmospheric boundary layer determined from pressure and temperature fields

05 p0788 A69-16453

Solution to system of equations in boundary layer theory of steady incompressible fluid flow

05 p0751 A69-16454

Turbomachinery research, discussing two and three dimensional incompressible flow in cascades near end wall and in rotating machines

05 p0751 A69-16534

Nonscattered, singly and multiply scattered light of beam from point source analyzed at boundary layer of turbid medium

05 p0789 A69-16640

Integral method for backward boundary layers, developing third order polynomials for two dimensional potential flow toward opening

05 p0752 A69-16737

Boundary layer on flat plate with homogeneous suction, discussing dimensionless displacement/ momentum thickness and wall shearing stress

05 p0752 A69-16744

Viscous MGD channel flow in boundary layer approximation with heat conduction, transforming resultant partial differential equations set to system of ordinary differential equations

06 p0966 A69-17523

Electromagnetic wave transmission and reflection at boundary of relativistic collisionless plasma, using Laplace transformation

06 p0968 A69-17783

Maximum downwind and crosswind vertical wind shear in boundary layer, noting effect on swept wing jet aircraft landing

06 p0951 A69-17790

Transient development of reacting boundary layer near stagnation point of vaporizing drop in gas stream

[AIAA PAPER 69-174] 06 p0912 A69-18056

Shock wave-boundary layer interaction configurations for hypersonic propulsion device inlets under transitional and turbulent conditions, noting heat transfer rate

[AIAA PAPER 69-8] 06 p0915 A69-18172

Nonequilibrium electron temperature, concentration and reflection in reentry boundary layers, discussing heat transfer and ionization energy diffusion

[AIAA PAPER 69-82] 06 p0915 A69-18190

Cross hatching on various body surfaces due to periodic surface pressure fluctuations, discussing origin from counterrotating longitudinal vortices in boundary layer

[AIAA PAPER 69-11] 06 p0915 A69-18213

Modified schlieren interferometer for quantitative investigation of free convection boundary layer temperature profiles

07 p1130 A69-18263

Approximate solution for hollow circular cylinder with fixed ends under axial displacement and cylindrical surfaces free from traction, using boundary layer technique

07 p1230 A69-18265

Underexpanded nozzle ejected supersonic turbulent jet off-design behavior, discussing static pressure distribution, boundary layer and Mach number effect

07 p1049 A69-18397

Boundary layer approximation for steady laminar flow of viscous incompressible fluid past paraboloid of revolution, obtaining vorticity distribution

07 p1120 A69-18812

Discontinuity effect on Ekman layer development at leading edge of flat plate

07 p1120 A69-19044

Boundary layer effect on flow coefficient of fluid amplifier feed nozzle, noting flow uniformity, incompressibility, velocity and velocity distribution assumptions

07 p1059 A69-19320

Jet flow and wakes in external stream and tailored pressure gradients, deriving similarity solutions for boundary layer equations

08 p1252 A69-20782

Power series solutions of MHD boundary layer equations for flat plate with transverse magnetic field and arbitrary pressure gradient, discussing skin friction

09 p1545 A69-21396

Turbulent diffusion from point source in boundary layer, discussing horizontal and vertical effects

09 p1535 A69-21513

Boundary layer at tube wall behind shock wave propagating in gas-vapor mixture, analyzing condensation rate

09 p1480 A69-21591

Modified first order theory of magnetosphere boundary shape incorporating effects of neutral sheet currents of extended geomagnetic tail

09 p1488 A69-21661

Boundary layer suction sound emission, analyzing turbulent flow past elastic plate with reinforced slots performing flexural and torsional vibrations

09 p1483 A69-22638

Relation between Rayleigh and dynamic Richardson numbers in atmospheric boundary layer in presence of cellular convection

09 p1491 A69-22709

Numerical solution of MHD equations for boundary layer electrically conducting gas flow near flat plate when velocity distribution of external flow obeys power law

10 p1727 A69-23093

Low temperature optically thick boundary layers influence on spectroscopic temperature measurements in plasma MHD channels
10 p1731 A69-23434

MHD boundary layer nonlinear instability, treating laminar to turbulent flow transition as reversible process
10 p1734 A69-23452

Similar boundary layers in Prandtl approximation determining similarity conditions for second order effects due to curvatures and outer vorticity
10 p1632 A69-23700

Boundary layers influence on external electrical characteristics of MHD generator
11 p1824 A69-24221

Flat decelerating cascades boundary layer in compressible flow during change in axial flow- density ratio and upstream turbulence
11 p1818 A69-24639

Viscous effects of wall boundary layer behind primary shock wave on flow in shock tube, noting pressure and temperature changes
11 p1870 A69-25010

Criteria for reversion of turbulent to laminar flow /r-verse transition/ as special cases of Reynolds number criterion, noting boundary layer properties role
11 p1873 A69-25134

Plasmapause position measurements by ion mass spectrometers and broadband VLF receivers on OGO 1 and OGO 3 and by broadband recordings at Antarctica
11 p1878 A69-25153

Turbulent viscosity and thermal conductivity coefficients for entire cross section of fluid flow including wall boundary layers
11 p1873 A69-25228

Porous cermet electrodes thermochemical protection by blowing neutral gas into electrode boundary layer, examining effect on volt-ampere characteristics
11 p1826 A69-25232

MHD free convection from horizontal isothermal plate in vertical uniform magnetic field, considering boundary layer thickness
11 p1930 A69-25277

Hypersonic viscous gas flow past thin bodies, deriving equations for interactions between boundary layer and external flow
11 p1820 A69-25472

Boundary layer calculation during laminar MHD channel flow under crossed magnetic and electric fields using successive approximation method
11 p1932 A69-25491

Atmospheric boundary layer transparency to gas laser emissions in IR spectrum, determining attenuation factor dependence on humidity and visibility range
12 p2028 A69-25957

Surface waves effect on electromagnetic waves incoherent reflection from plasma-vacuum boundary, describing polarization and angular and spectral distributions
12 p2031 A69-26530

Rarefied Ar plasma flow current-voltage characteristics in discharge tube, noting plasma boundary layer thickness influence on saturation current
12 p2137 A69-26532

Atmospheric boundary layer mean turbulence and vertical velocity calculations, tabulating layer characteristics for various turbulent heat flux and geostrophic wind velocity values
12 p2126 A69-26578

Forced convection in atmospheric boundary layer above nonuniformly heated earth surface, noting roles of wind and stratification parameters
12 p2126 A69-26579

Boundary layer parameters behind shock wave front in ionized gas calculated with allowance for charged particle diffusion
12 p2139 A69-26713

Boundary layer theory covering viscous fluid motion laws, laminar and turbulent boundary layers, transition, etc
12 p2063 A69-26869

Wind shifts and mean gustiness calculation from short range weather forecasts, using dynamic model for wind motion in atmospheric boundary layer
13 p2293 A69-27844

Convective heat transfer, discussing coordinate transformation, similarity analysis similitude and Mcksyn integration of boundary layer equations
13 p2376 A69-28139

Boundary layer characteristics of incompressible flow in wind tunnel with asymmetric two dimensional contraction, discussing flow profiles
13 p2249 A69-28235

Boundary layer equations describing momentum, energy and mass concentration conservation in axisymmetrical turbulent jet flame solved for Lewis number unity in von Mises plane
13 p2379 A69-28455

Wall flows and wake laws validity analyzed by wall balance technique, considering boundary layers under perturbation and core flow restrictions
13 p2251 A69-28633

Long wave radiative heat flux in boundary layers of cloud during solid overcast, discussing dependence on various cloud and atmospheric parameters
14 p2471 A69-28779

Nonscattered, singly and multiply scattered light of beam from point source analyzed at boundary layer of turbid medium
14 p2482 A69-28796

Boundary layer equation of viscous incompressible fluid with moment stresses, noting flow around thin plate and submerged jet problems
14 p2428 A69-28815

Ocean and atmospheric interactions analyzed by using hydrodynamic equations for boundary layers
14 p2442 A69-29838

Atmospheric motions equations in mesometeorology prognostic problems taking into account free atmosphere and boundary layer interactions
15 p2646 A69-30107

Shock tube hot flow duration, contact surface configuration and boundary layer thickness
15 p2590 A69-30297

Boundary layers coalescence on plane convergent channel walls investigated with analytic formulas for velocity distribution, shear stress, layer thickness, etc
15 p2592 A69-31009

Pressure distribution in wake produced by obstacle with secondary fluids injection into boundary layer, obtaining coefficient governing resistance of obstacle to forward motion
16 p2768 A69-31604

Thick gas model for monochromatic one dimensional radiant flux near diffusely emitting and reflecting boundaries, discussing gray gas and exponential kernel approximations
16 p2769 A69-31871

Flow field around sharp slender cones with surface mass transfer at zero angle of attack in low density supersonic and hypersonic flow
16 p2732 A69-31887

Ablation injectants effect on supersonic stream pressure distribution inside cavity and upstream boundary layer velocity profiles
16 p2770 A69-31902

Relation between Rayleigh and dynamic Richardson numbers in atmospheric boundary layer in presence of cellular convection
16 p2808 A69-32488

Near field flow noise generated in boundary layer of water vehicle measured for rotating cylinder, ship and buoyant unit using hydrophone
17 p3004 A69-32953

Separated flow patterns in base flow at body recesses, emphasizing shock wave boundary layer interaction, laminar flow and flow in front of recess
17 p2949 A69-33124

Flow over uniformly rough surface in planetary boundary layer from mixing length wind spiral model, using surface shear stress and wind direction data
17 p2997 A69-33153

Mixing length model to relate turbulent shear stress to mean velocity field within planetary boundary layer above surface roughness change
17 p2997 A69-33154

Conducting fluid incompressible flow in entrance of MHD channel by momentum integral method, permitting edge stress existence at boundary layer free stream interface
17 p2952 A69-33436

Accelerated boundary layers classified in terms of integral balance of pressure, inertia, wall friction forces and entrainment momenta
17 p2955 A69-33462

Reflected shock and boundary layer interaction in shock tube, discussing bifurcation effect on flow and turbulence transition
18 p3116 A69-34448

Boundary layer theory application to dynamics of gyroscope in gimbal suspension, defining nutational and precessional motion
18 p3135 A69-34559

Higher order boundary layer theory development from Prandtl simplification of Navier-Stokes equations to successive approximations for incompressible and compressible flows
18 p3123 A69-34923

Difference method for parabolic differential equations solution for Rayleigh boundary layer in dissociating gas, using integral estimates to determine stability
18 p3124 A69-35295

NonNewtonian power law fluids flow behavior in circular pipe entry region, taking into account energy loss due to viscous dissipation in boundary layer
19 p3240 A69-36472

Boundary layer formed in miniature nozzle studied for effect on jet spreading discharged into space at high Mach numbers
19 p3395 A69-36760

Electron density distribution in laminar air boundary layer on sharp wedges and cones predicted by reducing chemical kinetic model to ordinary differential equations [AIAA PAPER 68-733]
20 p3458 A69-37181

Singular perturbations and boundary layer theory for approximating solutions to simple ordinary differential equations
20 p3515 A69-37583

Wind velocity below 100 meters from Laikhtman atmospheric boundary layer model, solving equations for horizontally homogeneous, stationary and nonadvective air flow
20 p3571 A69-37695

Heat conduction in thin layer near boundary surface of solid by approximating one dimensional conduction in half space with allowance for curvature
20 p3633 A69-38213

Planetary boundary layer top formation, considering particle velocity, earth surface roughness role, geostrophic wind, etc
21 p3715 A69-38566

Heat transfer coefficients, boundary layer thicknesses and temperature and velocity distributions in free convection boundary layer in closed axisymmetric volumes
21 p3848 A69-38634

Instantaneous frozen layer thickness and temperature profile in solidified layer obtained by iteration technique
21 p3852 A69-39433

Prandtl boundary layer theory problems, considering solution uniqueness and stability, unsteady flow, boundary layer separation, existence conditions, etc
21 p3697 A69-39698

Shock tube boundary layers dependence on shock strength determined using vorticity transport to define boundary layer coordinate
22 p3930 A69-40531

Free viscous layers structure at large Reynolds numbers, using matched asymptotic expansions for two dimensional compressible flow
22 p3932 A69-40927

Boundary layer calculation in incompressible turbulent flow with closed streamlines, avoiding von Mises equation
22 p3932 A69-40931

Finite-difference grid procedure for predicting friction heat and mass transfer in two dimensional boundary layers
22 p3932 A69-40939

Interaction between two temperature plasma flux and electrodes in MHD channel with crossed electric and magnetic fields, studying boundary layer dynamics
22 p3991 A69-41022

Mean flow properties of incompressible turbulent three dimensional jets and wakes, treating flow within boundary layer theory context
23 p4060 A69-41908

Boundary layer effects in turbulent spiral vortex flow of compressible fluid in supersonic centrifugal compressor, discussing flow geometry, using momentum integral method
23 p4152 A69-42109

Energetics of planetary boundary layer /Prandtl layer/ from system of hydrodynamic equations, discussing flux divergence term importance in free-windless convection transition region
24 p4309 A69-43148

Taylor Goertler vortex formation effect on heat transfer through boundary layer on concave wall [ASME PAPER 69-HT-3]
24 p4414 A69-43563

BOUNDARY LUBRICATION

Surface preparation effects on Ni-Cr-Fe alloy boundary friction studied by repeated sliding of cylinders on hard Pd-Pt-Au alloy cylinder [ASLE PREPRINT 68AM 6D-4]
07 p1139 A69-18625

World literature on boundary lubrication for machine design, giving 2711 abstracts and extensive bibliographies
11 p1891 A69-24925

BOUNDARY VALUE PROBLEMS
NT NEUMANN PROBLEM

Initial value method applied to Fredholm integral equation for radiative transfer, neutron transport and multiple scattering, verifying invariant imbedding method

01 p0103 A69-10002

Dynamic programming methods to avoid dimensionality problem arising in solution of boundary value problems by digital computer

01 p0103 A69-10006

Boundary value bending problem for anisotropic shells of revolution under asymmetrical loading solved by finite difference technique

01 p0165 A69-10088

Boundary value problems for steady, three dimensional MHD flow of viscous incompressible conducting fluid past various bodies, proving existence of solutions

01 p0126 A69-10164

Vector potential used to express equations of incompressible fluid motion in form suitable for digital solution, discussing boundary conditions

01 p0058 A69-10228

Axisymmetric transient thermoelastic problem for transversely anisotropic hollow cylinder, examining boundary value problems

01 p0166 A69-10302

Second order systems of linear differential equations eliminating all nonessential difficulties associated with initial value problem

01 p0104 A69-10316

Mixed boundary value problem of elastostatics for isotropic elastic cylinder containing strip crack opened by internal pressure, using auxiliary functions

01 p0167 A69-10317

Upper and lower bounds for static or geometric field in two and three dimensional elasticity theory, using Green functions

01 p0167 A69-10328

Orthotropic plates bending and thermal stress, analyzing basic equations

01 p0168 A69-10416

Symmetrically truncated right angle E-plane corner, placing electric and magnetic walls in symmetry plane, solving resulting boundary value problems

01 p0044 A69-10624

Finite difference method for boundary value problem for second order differential equation, demonstrating convergence

01 p0105 A69-10721

Boundary value problems in thin shallow shells of arbitrary planform analyzed by partial differential equations

01 p0171 A69-11071

Idealized delta wing free-free oscillations determination by deriving equations of motion for flexibility and rigidity and formulating boundary value problems

01 p0172 A69-11358

Contact problem of pair of nonhomogeneous semicircular regions solved by singular integral equations solution method

02 p0336 A69-11553

Thermoviscoelasticity equation solution for class of dynamic problems, giving problem solution for half space with arbitrary temperature field boundary condition

02 p0336 A69-11554

Boundary value technique for initial boundary value problems for linear and mildly nonlinear wave equations

02 p0271 A69-11733

Boundary value problem solution for arbitrary nonshallow cylindrical shells by small parameter method, assuming arbitrary geometry and hinged rectilinear edges

02 p0339 A69-11960

Nonlinear boundary value problem, discussing existence and uniqueness of solutions

02 p0272 A69-12131

Nonlinear boundary value problems direct generalized solutions based on linearization of Bubnov-Galerkin and Ritz method

02 p0272 A69-12136

Errors arising from inaccurate insertion of initial conditions in autonomous determination of coordinates of object moving along surface of spherical earth

02 p0281 A69-12137

Monograph of lectures on numerical solutions of linear, singular and nonlinear differential equations for boundary value problems using finite differences

02 p0272 A69-12157

Normal derivative of solutions to Dirichlet problem for elliptic quasi-linear equation and construction of given mean curvature hyperspace in curved space

02 p0272 A69-12221

First boundary value problem for linear second order parabolic equation with unbounded lowest order discontinuous coefficients and free terms, discussing solvability

02 p0272 A69-12222

Mixed boundary value problem for system of Navier-Stokes equations for viscous incompressible fluid in stationary motion in vessel, noting rotating fluid

02 p0272 A69-12223

Nonlinear integrodifferential equations of parabolic type with delayed argument, discussing boundary value problems with caloric and hereditary operators

02 p0273 A69-12249

Uniqueness and existence theorem concerning stability of solutions of mixed nonlinear boundary value problem, discussing generalized heat transfer phenomena

02 p0352 A69-12255

Method of particular solutions for use with quasi-linearization in solving nonlinear boundary value problems

02 p0273 A69-12550

Soviet book on linear and quasi-linear second order elliptic equations, emphasizing boundary value problems in various functional spaces

02 p0273 A69-12566

Optimal control of open loop aperiodically modulated discrete time systems, discussing solution of associated two point boundary problem

02 p0226 A69-12732

Convergence of Rayleigh-Ritz approximations to solution of elliptic boundary value problem applied to subsonic airfoil problem for 2D steady isentropic irrotational flow

03 p0361 A69-12846

Three dimensional unsteady heat conduction and temperature distributions in finite hollow circular cylinder under time dependent boundary conditions of second kind

03 p0530 A69-12861

Iterative transfer of boundary values to fictitious contour in numerical solution of partial differential equations [ONERA-TP-646]

03 p0454 A69-12874

Bounded solutions for systems of ordinary second order differential equations

03 p0455 A69-13257

Cauchy problem and mixed boundary value problem for parabolic system solved with thermal potential theory

03 p0455 A69-13259

Dirichlet problem for elliptical system, showing solvability of inhomogeneous system with uniform boundary values for half plane and circle cases

03 p0456 A69-13602

Second order elliptical operator for m-dimensional Euclidean space with open region bounded by closed surface

03 p0456 A69-13604

Critique of paper on theory of gradient instability in semiconductor currents, questioning boundary value problems solution validity

03 p0487 A69-13728

Numerical technique using transfer matrices to solve boundary value problems in structural analysis

03 p0526 A69-13736

Planar phased array of circular waveguides arranged in equilateral triangular grid, solving boundary value problem

03 p0406 A69-13829

Elastodynamic boundary value problem solution for stability in linear elasticity

03 p0530 A69-14066

Variational theorems on eigenvalues of Laplace finite difference operator with first order boundary conditions

03 p0457 A69-14230

Two point boundary value problems for determining buckling behavior of two hinged circular arches [ASME PAPER 68-WA/APM-18]

04 p0669 A69-14399

Plates yield point loads limit determination formulated as mathematical programming problem, using finite element representations for velocity and moment fields [ASME PAPER 68-WA/APM-21]

04 p0670 A69-14405

Ordinary nonlinear differential equations with linear boundary conditions, discussing formulation and proof of lemma and theorems to demonstrate existence

04 p0621 A69-14416

Ricmann boundary value problems for n pairs of functions, noting relation to validity of Noether theory

04 p0622 A69-14513

Book on nonlinear boundary value problems for ordinary second order differential equations, illustrating difference between linear and nonlinear problems concerning existence and uniqueness

04 p0622 A69-14600

Algorithm for numerical solution of variational problems for functions of two independent variables and boundary value problems using local variations method

04 p0622 A69-14616

Boundary value problem of hyperbolic equation with discontinuous boundary conditions

04 p0622 A69-14617

Nonlinear boundary value problem of elastokinetics solved by step-by-step integration to study thin walled shells stability under axial impact [DVL-853]

04 p0677 A69-14836

Numerical solution of nonlinear two point boundary value problems of boundary layer type, noting shock wave formation in supersonic nozzle

04 p0544 A69-14889

Variational theorems for stress function formulation of boundary value problems in linear theory of thin elastic shells

04 p0678 A69-14894

Differential-difference equations and nonlinear initial boundary value problems for linear hyperbolic partial differential equations, noting procedure based on method of characteristics

04 p0623 A69-14949

Existence theorem for periodic solutions of parabolic boundary value problem for infinite space time cylinder

04 p0624 A69-15004

Green matrix of periodic boundary value problem for system of linear differential equations

04 p0624 A69-15098

Periodic solutions for linear and weakly nonlinear heat conduction equations, obtaining omega-periodic solutions for initial boundary value problems

04 p0625 A69-15109

Method of lines for parabolic differential equations, transforming boundary value problems into initial value problem for system of ordinary differential equations

04 p0625 A69-15132

Numerical solution of elliptic equations by iteration result in convergence prevention and solution of Laplace and Poisson equations with singular Laplace operator

04 p0625 A69-15133

Doubly infinite sets of simultaneous linear equations used in electromagnetic boundary value problems solved by Asymptotic Anticipation Method

04 p0560 A69-15214

Book on linear boundary value problems of mathematical physics based on Green function covering Hilbert spaces, integral equations and spectral theory of differential operators

04 p0625 A69-15232

Book on boundary value problems of mathematical physics emphasizing solutions, Green functions, transforms and variational methods

04 p0625 A69-15233

Boundary condition description effect on numerical accuracy of series solution to boundary value problem by direct method

04 p0681 A69-15283

Numerical integration of elliptic mixed boundary value problem in region with curved boundary programmed in FORTRAN for general linear second order partial differential equation

04 p0625 A69-15287

Hybrid assumed mode solution of nonlinear partial differential equations/initial value problems/ in time-like independent variable

04 p0566 A69-15345

Point matching method for analysis of stress in incompressible solids of revolution, noting application to solid propellant rocket charges

04 p0683 A69-15518

Boundary conditions in oblique reaction waves in supersonic flow, adding or subtracting heat by chemical reaction

05 p0697 A69-15828

First order linear differential equations having complementary solutions of exponential type to determine effective initial and boundary conditions

05 p0786 A69-15926

Existence and uniqueness of solution to Cauchy problem for class of second order nonlinear differential equations, applying results to mixed boundary value problem

05 p0786 A69-16061

Boundary value problems for second order degenerate elliptic equations, formulating and proving theorems for existence of generalized solutions
05 p0786 A69-16422

Boundary value problems for unstable quasi-linear elliptic differential operator class, proving theorems on properties of quasi-linear elliptic-parabolic equations in bounded space
05 p0787 A69-16424

Functions satisfying mixed boundary conditions derived for boundary value problems involving regions of complex form
05 p0787 A69-16455

Invariant imbedding and multipoint boundary value problems in control theory and identification of systems
05 p0787 A69-16478

Approximate methods for integration of equations of plane isentropic motion of gas at supersonic velocities
05 p0699 A69-16674

Uniqueness theorem validity for boundary value problem in linear elastostatics for homogeneous media
05 p0844 A69-16739

Korn constant for boundary value problem of linear elastostatics applied to circular ring domain
05 p0844 A69-16740

Kinetic boundary value problem of gas flow over plane wall with constant mass-velocity gradient
06 p0910 A69-17346

Exponential decay of stresses in circular elastic cylinders subject to axisymmetric self-equilibrated end loads
06 p1023 A69-17507

Two point boundary value problems of optimal trajectories solved by offset vector method
06 p0903 A69-17577

Fiberglass reinforced plastic bottoms design for integration with cylindrical shells, discussing design, shapes and boundary value problems
06 p1025 A69-17685

Variational solutions of one dimensional nonlinear Poisson-Boltzmann boundary value problems in theory of colloids and plasmas
06 p0968 A69-17784

Shock wave in two dimensional mixed transonic airfoil flows, discussing initial value problem for flow downstream of shock
[AIAA PAPER 69-43] 06 p0915 A69-18180

Soviet collection of papers on boundary value problems and integral equations
07 p1172 A69-18495

Solvability of third boundary value problem for Laplace operator in three dimensional domains bounded by irregular surfaces
07 p1173 A69-18497

Elliptic equation solution of Dirichlet problem with zero boundary condition, examining dependence of modulus of continuity of solution on boundary properties
07 p1173 A69-18498

Cosserat functions for homogeneous isotropic elastic body filling finite domain with sufficiently smooth boundaries, noting eigenfunctions for first and second boundary value problems
07 p1173 A69-18499

Quasi-static theory of antenna in magnetoactive plasma subjected to resonance, solving boundary value problem
07 p1099 A69-18522

Gunn effect for cathode contacts with interface resistance, developing control characteristic boundary condition concept for explaining cathode fall and other phenomena
07 p1199 A69-18649

Methods to obtain uniqueness for partial differential /elliptic/ equations boundary problem extended to parabolic conditions, analyzing necessary conditions for existence
07 p1173 A69-18728

Linear differential system with boundary conditions, obtaining equivalent Fredholm integral equation and perturbation theorem
07 p1173 A69-18729

Boundary value problems for second order differential equation with continuous f satisfying local Lipschitz condition
07 p1173 A69-18730

Complex variable theory usefulness in investigating existence and uniqueness of solutions for boundary values in partial differential equation
07 p1173 A69-18731

Matched asymptotic expansions for establishing relationship between inner and outer expansions of unknown function, discussing classes of singular perturbation
07 p1180 A69-18809

Uniform matched asymptotic approximations derived for various functions, with application to boundary value problem for ordinary differential equation with turning point
07 p1180 A69-18810

Boundary value problem of temperature field and heat conduction in transparent media heated by laser radiation producing thermoelastic stresses leading to breakdown
07 p1149 A69-18925

Existence and uniqueness theorems for boundary value problems of axisymmetric deformation of circular membrane at normal pressure, using membrane theory and shooting method
07 p1233 A69-19299

Boundary value problem solved for free air geoid, developing expressions for height anomaly from free air anomalies
07 p1129 A69-19396

Shallow spherical shells equilibrium under uniformly distributed internal pressure, analyzing nonlinear boundary value problems by algorithm
07 p1237 A69-19685

Accelerating convergence of one step methods for numerical solution of ordinary differential equations, discussing various initial value problems
07 p1174 A69-19724

Boundary conditions for reflection and transmission properties of absorbing shell of arbitrary shape
08 p1273 A69-20025

Longitudinal excitations, discussing plasma equilibrium distributions
08 p1362 A69-20286

Sensitivity coefficients to solve two point boundary value problem arising from Pontryagin principle, with application to time optimal control studies
08 p1296 A69-20297

Mixed initial boundary problem for hyperbolic equations with given boundary outgoing variables, determining incoming data
08 p1342 A69-20347

Stieltjes transform relating initial boundary value problems for partial differential equations of various classifications
08 p1342 A69-20352

Error bounds and variational methods for nonlinear boundary value problems for ordinary differential equations
08 p1343 A69-20536

Soviet book on theory of heat conductivity covering physical principles of transfer and boundary value problems
08 p1421 A69-20647

Approximation method applied to closed viscous streamline flow in rectangular cavity, discussing constant shear stress boundary condition
08 p1304 A69-20811

Capacitance and lowest eigenvalue bounds for two dimensional anisotropic media as exemplified by transverse vibrations of stretched membrane
08 p1418 A69-20848

Two dimensional boundary value problem for symmetrical entry of wedge into incompressible nonviscous fluid using complex variable theory
08 p1305 A69-20995

Boundary value problem for linearized system of Navier-Stokes equations in three dimensional space, determining velocity vector and pressure
08 p1344 A69-21156

Sobolev type boundary value problems for elliptic operators using manifold theory
08 p1344 A69-21157

Cauchy problem of invariant imbedding satisfying nonlinear boundary value problem, discussing optimal control and radiative transfer applications
09 p1531 A69-21413

Particular solutions in nonlinear two point boundary value problems, showing convergence for uncontrolled and controlled systems
09 p1531 A69-21416

Numerical studies of initial value problems by boundary value techniques for cases having available asymptotic estimates or periodicity of solutions
09 p1532 A69-21610

Stabilization rate of boundary value problem for parabolic equation in n dimensional space
09 p1532 A69-21627

Normal solutions of linearized Boltzmann equation for initial and boundary conditions in hydrodynamics solved by approximation
09 p1480 A69-21667

Incompressible jets bounded by infinite auxiliary thin jets, discussing straight wall jets and establishing existence and uniqueness of boundary value problem solution
09 p1480 A69-21734

Irrrotational plane subsonic flow of compressible fluid about obstacle, reducing problem to integration of linear partial differential equation with boundary conditions
09 p1480 A69-21735

Difference schemes for approximating boundary value problems of elliptic equation free of mixed derivatives in rectangular region
09 p1532 A69-21788

Nonlinear boundary value problem algorithm in shell theory, showing aid of numerical technique
09 p1614 A69-21887

Perturbation theory for analyzing nonlinear boundary value problems
09 p1540 A69-21894

Single and double transformed Fourier series reduced to forms satisfying certain definite conditions, even with finite number of terms series
09 p1533 A69-22258

Solutions boundedness in autonomous nonlinear systems with single nonlinearity, using Lure type Liapunov functions to prove theorems
09 p1533 A69-22449

Electromagnetic wave diffraction on conducting sphere in inhomogeneous medium with given refractive index variation law, using asymptotic solution for boundary value problem
09 p1459 A69-22628

Fundamental solutions of initial value problems related to Euler-Poisson-Darboux equation generalized for radially symmetric case, developing convolution integrals
09 p1533 A69-22796

Higher order Rayleigh-Ritz approximations to eigenvalues and eigenfunctions of elliptic boundary value problem
09 p1534 A69-22798

Boundary value problems solutions for quasi-linear elliptic and parabolic equations of arbitrary order applied to nonlinear differential equations
10 p1717 A69-22809

Two point boundary value problems solution for parameter dependent nonlinear differential equations, noting application to hinged rod bending
10 p1718 A69-22846

Minimal distance of image boundary from origin and second coefficient of univalent function in unit disk
10 p1718 A69-22860

Five parameter class of linear iterative methods for solution of linear equations systems in application to elliptic boundary value problems
10 p1718 A69-22878

Numerical analysis for stresses in finite or infinite plate with arbitrary holes, considering boundary value problems
10 p1793 A69-22882

Navier-Stokes boundary value problem bifurcation solution analysis, determining stability ranges
10 p1677 A69-22901

Pointwise bounding of eigenfunctions in vibration and stability problems in elasticity theory
10 p1794 A69-22925

Generalized solutions of elliptic boundary value problems by applying Green functions
10 p1718 A69-23207

Finite difference schemes of high order of accuracy for Strum-Liouville and boundary value problems with regular singularity
10 p1719 A69-23365

Scheme for choosing approximating system of difference equations for degenerate linear and nonlinear elliptic boundary value problems
10 p1719 A69-23515

Boundary value problem for elliptic-parabolic partial differential equations in theory of random processes, obtaining analytical solution in terms of hypergeometric functions
10 p1719 A69-23516

Factorization procedure for iterative solution of systems of algebraic equations from discretization of elliptic boundary value problems
10 p1719 A69-23520

Stable difference expressions for initial and mixed boundary value problems
10 p1720 A69-23594

Singular perturbations for Cauchy and boundary value problems, considering differential operators and Hilbert space
10 p1720 A69-23635

Existence and oscillation of initial and boundary value problems solutions for real scalar second order differential equations
10 p1720 A69-23637

Existence and uniqueness for nonlinear boundary value problems satisfying Lipschitz condition
10 p1721 A69-23640

Equation for one dimensional heat conduction with nonlinear heat generation transformed from boundary to initial value problem

10 p1809 A69-23689

Existence and uniqueness of solution to Cauchy problem for class of second order nonlinear differential equations, applying results to mixed boundary value problem

10 p1721 A69-23885

Equivalence of initial boundary value problem and integral equations obtained by regularization using potential theory

10 p1721 A69-23959

Scattered light mean intensity determination in twilight aerosol atmosphere from satellite observations, formulating boundary value problem

10 p1689 A69-23970

Uniqueness and nonuniqueness of solutions of initial value problems for second order semilinear parabolic equations

10 p1722 A69-24069

Linear two and three dimensional boundary value problems in mechanics of continua for multiply connected regions

11 p1972 A69-24651

Two dimensional contained plastic deformation in asymmetrical elasticity theory based on Cosserat medium, examining boundary value problems, stress concentration and elastic wave propagation at holes

11 p1973 A69-24659

Conformal mappings for solving boundary value problems in elasticity and plasticity theories for regions having singular points

11 p1973 A69-24662

Mixed boundary value problem concerning expanding elastic space weakened by cracks located at same plane solved by integral transforms and Fredholm equations

11 p1973 A69-24663

Random periodic forces effect on single frequency oscillations of nonlinear nonautonomous system with distributed parameters, discussing perturbed boundary value problem

11 p1916 A69-24761

Boundary value problem for gravity induced wave motion of ideal fluid in axisymmetric vessel with annular ribs, noting application to bodies of revolution

11 p1868 A69-24769

Numerical method for coupled moments of inertia and integral equations of boundary value problems for fluid in moving cavities

11 p1868 A69-24774

Mixed boundary value problem in theory of axisymmetric potential of three dimensional boundary layer reduced to solution of linear integral equation

11 p1918 A69-24787

Boundary value problems numerical solutions accuracy assessed as function of grid spacing size

11 p1908 A69-24789

Asymptotic series solutions for initial value problem involving nonlinear ordinary differential equation with small parameter epsilon

11 p1908 A69-24881

Solution existence of nonlinear two point boundary value problems from uniqueness

11 p1909 A69-24883

Existence and completeness of eigenfunctions for boundary value problem arising in theory of small amplitude motions of stratified polytropic gas

11 p1868 A69-24884

Slip flow problem for general specular-diffuse boundary condition in kinetic theory of gases, noting molecular distribution function

11 p1869 A69-24893

Steady heat flow in cylindrical bodies with curvilinear rectangular cross sections, solving equation in form of Fourier series according to trigonometric functions

11 p2000 A69-24974

Kinetic theory for examining transition regime of rarefied gas dynamics, discussing Boltzmann equations and models with related boundary value problems

11 p1870 A69-25005

Stress-strain state of shells with opposite edges hinged and rigidly clamped solved by numerical method after reduction to boundary value problem

11 p1985 A69-25174

Initial conditions estimation problem for nonlinear system asymptotic stability and satisfaction of output constraints on state variables

11 p1909 A69-25290

Dynamic programming approach to numerical solution of elliptic boundary value problems, using Laplace equations

11 p1910 A69-25411

Optimal design of structures with constraints on strength and natural frequency, developing steepest descent boundary value method

11 p1989 A69-25496

Integral transforms in composite one dimensional space and application to boundary value problems of physics

11 p1910 A69-25574

Wave reflections due to rotationally symmetrical jump in circular waveguide cross section, using orthogonal expansion to solve resulting boundary value problem

11 p1855 A69-25622

Boundary conditions for time dependent temperature variations of calorimeter operating in regular thermal regime

11 p2003 A69-25702

Flow in linear MHD channel with two permeable electrodes, solving Riemann boundary value problem for electric field in channel

11 p1934 A69-25727

Theorem for integral expansion applied to boundary value problems of mathematical physics and elasticity theory for single sheet hyperboloids of revolution

11 p1910 A69-25731

Polynomial coefficients multiplication by weighted damping factors for increased conformal mapping and boundary value problems solutions accuracy for doubly connected regions

12 p2178 A69-25998

Nonoscillatory solutions of second order nonlinear differential equations

12 p2120 A69-26033

Optimization problem with bounded state variable, noting conditions on trajectories and relations for co-state vector at connecting or branching point

12 p2050 A69-26087

Elliptic boundary value problem for differential equation and pseudodifferential boundary conditions, obtaining Green formula from formulated conjugate problem

12 p2121 A69-26200

Periodic solution to boundary value problem for quasi-linear parabolic equation with nonlinear boundary conditions obtainable by Rothe method

12 p2121 A69-26282

Boundedness criteria for second order hyperbolic equation boundary value problem solution in Banach space

12 p2122 A69-26573

Approximate solution of boundary value problems for Fokker-Planck equation to determine probability of exceeding limits in nonlinear automatic control systems

12 p2054 A69-26653

Volterra operator algebra for boundary value problems involving linear viscoelasticity with continuous relaxation time and delay time spectra

12 p2182 A69-26677

Boundary value problems of thermoelasticity, discussing existence and uniqueness theorems, ellipticity, thermoelastopotentials, Liapunov-Tauber theorem, Fredholm theorems, etc

12 p2182 A69-26726

Boundary value problems for hyperbolic and mixed equations using model of wave, Lavrentiev-Bitsadze and Tricomi equations

12 p2123 A69-26727

Dirichlet problem for elliptic second order differential equations with constant coefficients in region of Euclidean space of two real variables bounded by ellipse

12 p2123 A69-26728

Cylinder buckling and other boundary value problems, applying inverse differential operators to solution of integrodifferential equations

12 p2186 A69-26841

Laser active media polarization in strong electromagnetic fields, solving boundary value problems

12 p2110 A69-26907

Existence theorems for partial differential equations theory for traction boundary value problem of linearized elastostatics

12 p2188 A69-26928

Dirichlet problem for second order linear hyperbolic partial differential equations in cylindrical domain, deriving necessary and sufficient condition for solution uniqueness

12 p2124 A69-26932

Smooth solutions to Navier-Stokes equation obtained by imposing bound on associated pressure pertaining to weak solution

12 p2124 A69-26971

Earth gravitational field representation by separating geopotential into normal and disturbing potential for

solving geodetic boundary value problem for satellite geodesy

12 p2076 A69-27089

Homeomorphism theorem of Petrovskii and homogeneous elliptic systems applied to boundary value problems and Green formula

13 p2287 A69-27515

Partially characteristic boundary value problem for partial differential equations

13 p2288 A69-27527

MHD generator analysis, formulating boundary value problem for ion diffusion and Fourier series solution for end effect of electrodes pair

13 p2208 A69-27613

Solar atmosphere surface radiation intensity determined by initial value theory including source function and resolvent

13 p2350 A69-27859

Second order differential equations eigenvalues with Sturm boundary conditions analyzed by difference method

13 p2288 A69-27922

Monograph on gravity covering gravimetric boundary value problem, iterative solutions, error analysis, gravity reduction, integral equations, etc

13 p2254 A69-27929

Boundary value problem for one dimensional unsteady equations for inviscid conducting gas during transition processes in MHD duct

13 p2309 A69-28027

Current distribution in MHD duct with permeable electrodes with tensor conductivity, obtaining Riemann-Hilbert heterogeneous boundary value problem solution by finding electric field

13 p2310 A69-28030

Perturbations stabilization in electrically conducting fluid by distributed automatic control system, determining feedback operators via boundary value problem

13 p2311 A69-28105

Stationary radial source flow of liquid particles into vacuum, discussing boundary value problem equations, parameters effects on flow structure and flow field characteristics

13 p2248 A69-28210

Variational difference method application to second order elliptic equations with inhomogeneous boundary conditions, applying results to boundary value problems in elasticity theory

13 p2289 A69-28318

Pointwise estimate for gradient of solution of first boundary value problem /Dirichlet problem/ for second order elliptic equation

13 p2289 A69-28319

Gasdynamic and Boltzmann equations relations in rarefied gas kinetics, applying physical and mathematical boundedness concept to setting boundary conditions for moment equations

13 p2250 A69-28320

Stability theorems for barotropic vorticity equation integrated within limited region for flow through boundary without existing physical boundary conditions

13 p2294 A69-28494

Steady state problems of elastic orthotropic cylinder solutions applicable to boundary value problems of laminar orthotropic elliptical cylinders

13 p2369 A69-28528

Green function for boundary value problems of heat conduction equation constructed by heat potentials method

13 p2380 A69-28548

Viscous incompressible fluid self similar mixing problems, performing group analysis for complete boundary value problem

14 p2428 A69-28803

Stress-strain problem of piecewise-homogeneous plane with cut normal to interface line reduced to Wiener Hopf equation, obtaining solution for arbitrary boundary conditions

14 p2531 A69-28805

Plane mixed boundary value problem in elasticity theory for infinite wedge

14 p2531 A69-28809

Asymptotic control theory for two point boundary value problems, considering Euler equation

14 p2425 A69-28904

Boundary value problem for nonlinear functional differential equations, discussing matrix and general operators

14 p2470 A69-28906

Liquid sloshing in vessel of complex geometry reduced to boundary value problem

14 p2428 A69-28969

Integral equations for classical elasticity boundary value problems, stressing analogous Stokes flow hydrodynamic equations

14 p2535 A69-29361

Two point boundary value problem converted into Cauchy problem, deriving power series solution method and algorithms for nonlinear problems

14 p2430 A69-29362

Difference schemes for elasticity theory plane dynamic problem with mixed boundary conditions, establishing scheme absolute stability

14 p2536 A69-29474

Boundary value problem in three dimensional boundary layer theory for incompressible flow near stagnation point

14 p2432 A69-29677

Computational accuracy of point matching solution for uniform nonsymmetric waveguides

14 p2423 A69-29758

Boundary problems solution for electromagnetic field two dimensional distributions in MHD channels at arbitrary magnetic Reynolds numbers, considering longitudinal terminal effects

14 p2500 A69-29906

Necessary and sufficient conditions for solution existence to second order boundary value problems, considering second order differential equation involving function of three variables

14 p2471 A69-29951

Variational principle for solving boundary value problems and reciprocal formula for error estimation, discussing applicability to general transport phenomena problems

15 p2716 A69-30022

Necessary and sufficient conditions for boundary point regularity in Dirichlet problem for heat conduction equation assuming Holder condition

15 p2716 A69-30047

Boundary value problem for quasi-linear equation of unsteady transonic gas flows, including linear model and operators for group of transformations

15 p2590 A69-30049

Green function construction for boundary value problems of heat conduction on rectilinear segment with dynamic boundaries, using integral equations

15 p2716 A69-30075

Finite difference treatment of mixed boundary value problems in two dimensional elastostatics, using first derivatives of displacement components at grid points

15 p2706 A69-30432

Averaging procedure for solving Cauchy problem applied to two point boundary value problem for nonlinear differential equations

15 p2644 A69-30449

Integral equation for diffraction from infinitely extended grating as mixed boundary problem of electromagnetic field, discussing single anomaly

15 p2568 A69-30795

High order plasma wave echoes formulation and relation to initial perturbations based on Landau solution of initial value problem for Vlasov equation

15 p2661 A69-30926

Monograph on stress fields in plane plastic flow as solutions to boundary value problems

15 p2711 A69-30932

Nonlinear boundary value problems for isotropic plasma with known magnetic field, examining electromagnetic waves scattering at magnetic fluctuations

15 p2569 A69-30938

Stress calculation for thermoelastic mixed boundary value problem in infinite isotropic plate with cylindrical stress free cavity

15 p2712 A69-31013

Heat propagation in rod of two sections with different properties, formulating relevant boundary value problem, solving with Duhamel principle

15 p2718 A69-31066

Attenuation of small perturbations in shape of plane shock wave propagating into uniform medium in presence of rigid or interfacial boundaries

15 p2592 A69-31145

Integral representation of p-analytic functions of complex variable, applying axisymmetric boundary value problems of elasticity theory for cylindrical surfaces and paraboloid of revolution

15 p2714 A69-31191

Asymptotic Krylov-Bogoliubov methods application to solving boundary value problems for hyperbolic quasi-linear equations with distributed parameters and retardation

15 p2653 A69-31192

Boundary value problem for linearized system of Navier-Stokes equations in three dimensional space, determining velocity vector and pressure

15 p2645 A69-31249

Sobolev type boundary value problems for elliptic operators using manifold theory

15 p2645 A69-31250

Book on mathematical methods in kinetic theory covering boundary value problems associated with Boltzmann equation, model equations, rarefied gas dynamics, etc

16 p2811 A69-31721

Langrangian equations resulting from restricted variational principles corresponding to heat conduction problem derived for boundary condition inclusion

16 p2877 A69-31872

Mixed boundary problem for elliptic equations with variable coefficients reduced to finite system of algebraic equations

16 p2804 A69-32062

Viscoelastic half space properties effect on self excited vibration boundaries determination

16 p2873 A69-32063

Plate bending problems, comparing various approximate analytical methods including point matching, Galerkin, Ritz, Kantorovich and least squares techniques [AIAA PAPER 68-296]

16 p2874 A69-32160

Unsteady heat conduction equations for elliptic cylinder with convection solved by point matching

16 p2879 A69-32171

Variational problem formulated for boundary value problem of steady heat conduction with general boundary conditions

16 p2880 A69-32378

Quasi-linearization algorithm for solution of boundary value problems for ordinary differential equations, formulating representation and convergence theorems

17 p2994 A69-32835

Algebra of quasi-homogeneous pseudodifferential operators applied to lateral boundary values of solutions of parabolic differential equations, discussing function spaces

17 p2994 A69-32842

Plane oscillations of liquid in rectangular elastic vessel determined to obtain frequencies and mode shapes of natural oscillations from velocity potential boundary conditions

17 p2950 A69-33200

Frequency and mode shapes of conical shell free oscillations related to shell parameters and boundary conditions

17 p3058 A69-33201

Initial thermostructural stresses in homogeneous quasi-isotropic two component medium, solving statistical boundary value problem thermoelastically

17 p3058 A69-33316

Wave diffraction problem solution method based on Rayleigh hypothesis equivalent to extended boundary condition method

17 p2920 A69-33422

Error estimation in thin elastic plate bending problem approximate solution by equal deflection lines method, constructing two sided bound for boundary value problems

17 p3062 A69-33713

Adaptive random search algorithm utilizing boundary cost-function hypersurfaces measurement to implement Pontryagin maximum principle, discussing hybrid computer use, iterative solution and convergence properties

17 p2933 A69-33745

Electromagnetic waves radiation in general time invariant linear media with general boundary conditions, using Green function

17 p2924 A69-33834

Numerical solution of boundary value problems, discussing spectral domain and scattering matrix formalisms

17 p2929 A69-33882

Forced harmonic oscillations of one dimensional mechanical girder systems allowing for nonlinear resisting forces calculated by boundary value problem reduction to Cauchy problem

17 p3064 A69-33917

Transformation of two dimensional boundary value equations for laminar power law nonNewtonian fluid flow to yield similar solutions

17 p2957 A69-34016

Orthogonal polynomials for solving plane elasticity theory boundary value problems without constructing mapping functions, noting applications

17 p3067 A69-34144

Green functions theory for finite integral Lebedev-Kantorovich transforms derivation, with application to elastostatics boundary value problems

17 p3067 A69-34148

Taylor vortices calculated as branching solutions of nonlinear Navier-Stokes boundary value problem

17 p2958 A69-34152

Alternating direction iteration method for nonlinear systems of equations applied to steady state heat conduction problem with nonlinear boundary conditions

18 p3163 A69-34329

Computer implementation of Bergman solution to initial value problem for partial differential equation of compressible fluid flow

18 p3164 A69-34614

Equations of motion for plate vibration derived by complementary variational principle, including boundary conditions and thin plate transverse vibrations

18 p3218 A69-34626

State space procedure for mixed boundary value problems applied to structural analysis, fluid mechanics and eigenvalues for deformable bodies

18 p3164 A69-34685

Parabolic differential equations solved by variational methods, constructing numerical representations for solutions of initial boundary value problems

18 p3164 A69-34841

Boundary conditions of orthotropic shell stability under external pressure and axial tension, analyzing critical pressure by strain energy method

18 p3222 A69-34977

Linear boundary value problem solution using iterative method

18 p3165 A69-35050

Periodic solution of boundary value problem involving motion equation of viscous fluid

18 p3123 A69-35053

MHD flow, deriving equation system and boundary conditions for gas dynamic process

18 p3181 A69-35054

Regular integral equations solvability for boundary value problems in shallow shell theory, using method of potential representations and Green matrices

18 p3224 A69-35309

Classical solution existence to mixed boundary value problems for second order hyperbolic operators obtained by Laplace transforms

18 p3165 A69-35313

Law for time variations of modulus-restricted control action at trajectory end, two point boundary value problem solution and use of Pontryagin principle

18 p3175 A69-35324

Plate dynamics generalized equations independent of plate theory hypotheses, discussing algorithm and initial and boundary conditions

18 p3226 A69-35376

Iterative algorithm applied to shell theory boundary value problem of stress concentrations at shallow shell holes

19 p3436 A69-35847

Two dimensional thermoelasticity problem for nonlinear media, obtaining solutions for thermal stress concentration and boundary value problems

19 p3436 A69-35848

Convergence rate estimates for singular perturbations solutions of linear elliptic boundary value problems

19 p3360 A69-35899

Function theoretic solution of dual integral equations applied to boundary value problem of supersonic flow over infinite span thin wing

19 p3239 A69-36311

Existence and uniqueness theorems for operator equation in differential equations theory for application to boundary value problem

19 p3360 A69-36373

Boundary conditions of incompressible fluid viscous flow on semiinfinite plate edge defined using difference methods for Navier-Stokes equations

19 p3299 A69-36394

Least squares method application to boundary value problem approximate solution for plane, axisymmetric, creeping and incompressible irrotational flows

19 p3299 A69-36475

Boundary conditions for shells with reinforced nonsymptotic boundaries, assuming coincident beam axis deformation with shell boundary deformation

19 p3443 A69-36781

Thermodynamic equilibrium stability general theory extended to arbitrary boundary conditions using properties of entropy balance equation

19 p3452 A69-36789

Benard convection cells analyzed by Boussinesq approximation and Schmidt-Liapunov method, obtaining boundary value problem branching solution

19 p3301 A69-36791

Number of forms of stability of plates and shells derived from eigenvalues of nonlinear boundary value problem containing generalized von Karman equations

19 p3445 A69-36816

Heat transfer problem involving temperature determination of body and ambient medium, deriving ex-

istence and uniqueness theorems for boundary value problems in curvilinear regions

20 p3631 A69-36991

Boundary value problem of wave propagation in three dimensional region of waveguide bounded by surface solved by variational method

20 p3487 A69-37078

Modified residue-calculus technique combined with scattering matrix multiple reflection techniques for boundary value problems in waveguide phased arrays, diffraction gratings, etc

20 p3505 A69-37298

Boundary conditions for differential approximation to radiative transfer, noting optically thick slip conditions

20 p3633 A69-37524

Particular solutions and quasi-linearization combined to solve nonlinear two point boundary value problems, illustrating method with Falkner-Skan equation

20 p3515 A69-37532

Plane membranes finite deformation, deriving energy theorems for potential U bounds estimation

20 p3624 A69-37588

Composite laminates in cylindrical bending, discussing classical laminated plate theory limitations by comparing boundary value problems to corresponding theory of elasticity solutions

20 p3626 A69-37760

Unbalanced cross-ply elliptic laminated plates with bending membrane coupling, analyzing membrane boundary conditions with clamping assumed

20 p3626 A69-37762

Buckling loads of homogeneous anisotropic plates of composite materials with simply supported boundary conditions, noting Kirchhoff-Love nondeformable normal hypothesis

20 p3628 A69-37776

Difference method for initial value problems in quasi-linear hyperbolic first order approximations extended to wider quasi-linear problems, assessing convergence

20 p3568 A69-37833

Rectangular plates bending boundary value problems, deriving formulas for plates with free edges

20 p3630 A69-38291

Perturbed motion of solid body containing axisymmetric cavities partially filled with ideal incompressible fluid, solving boundary value problems of fluid oscillations

20 p3518 A69-38296

Nonlinearly elastic plates with reinforced edges, deriving differential equations for boundary conditions

21 p3833 A69-38574

Jet efflux from two dimensional symmetric nozzles of arbitrary shape determined using conformal mapping and Riemann-Hilbert solution to mixed boundary value problem

21 p3692 A69-38686

Reduction of boundary value problems to initial value problems through variables transformation, considering application to eigenvalue problems

21 p3754 A69-38747

Shooting method difficulties in boundary value problem numerical solutions using computer programs to integrate differential equations

21 p3755 A69-38753

Combined analytical and numerical method for thermoelastic boundary problem of unidirectional infinite strip

21 p3836 A69-38927

Error function for boundary methods

21 p3755 A69-39008

Electromagnetic wave diffraction in three dimensional space divided by dielectric orthogonal half planes/wedges/, using contact boundary value problem

21 p3673 A69-39012

Partial differential equation initial value problems analyzed by ordinary differential equations via functional approximation method

21 p3756 A69-39132

Generalized solutions of elliptic boundary value problems by applying Green functions

21 p3756 A69-39148

Equivalence of initial boundary value problem and integral equations obtained by regularization using potential theory

21 p3756 A69-39150

Small parameter method applied to axisymmetric problems of elastoplastic nearly spherical bodies undergoing exponential hardening process, deriving linearized expressions for boundary conditions

21 p3839 A69-39198

Molodenskii boundary value problem exact solution by successive approximations for determination of earth figure, noting quasi-geoid surface

21 p3716 A69-39248

Approximate boundary conditions in electrodynamics of stratified tensor media estimated for ferrite layers

21 p3675 A69-39282

Closed form solution for minimum fuel constant thrust trajectories for vehicle transfer in vacuum between arbitrary boundary conditions

21 p3806 A69-39337

Nonlinear electromagnetic wave propagation by perturbation method previously employed to treat nonlinear boundary value problems involving partial differential equations

21 p3677 A69-39465

Relativistic solution by Landau procedure of initial value problem for one dimensional electron plasma wave coexisting with charged immobile background

21 p3778 A69-39579

Scattered light mean intensity determination in twilight aerosol atmosphere from satellite observations, formulating boundary value problem

21 p3717 A69-39656

Galerkin method application to solve differential equation and boundary value conditions for elastic stability of bars, showing linear relation between critical loads

21 p3845 A69-39678

Nonlinear differential equations for flow of viscous liquid thin sheet on horizontal plane, solving initial value problems for zero slope bed

21 p3697 A69-39680

Flight dynamics boundary value problem for spacecraft trajectories optimization, using variational method

21 p3817 A69-39817

Temperature field in system of coaxial cylinders by solving heat equation with corresponding initial and boundary conditions

21 p3855 A69-39855

Electromagnetic radiation and scattering from conducting bodies of revolution, obtaining formulation in integrodifferential equation from potential integrals and boundary conditions

22 p3899 A69-40014

Variational principles equivalent to mixed problems for parabolic equations with initial boundary conditions, noting heat conduction theory

22 p3974 A69-40231

Minimization of unconstrained function of several variables by gradient dependent techniques, discussing applications to boundary value problems in optimal control

22 p3975 A69-40333

Nonresonant Green functions of auxiliary boundary value problems for deriving integral equations for Dirichlet and Neumann diffractions at open screens

22 p3901 A69-40949

Elasticity boundary value problems solution based on equilibrating method and differential equation

22 p4046 A69-40967

Straight line method for boundary problems solutions with errors for partial differential equations

22 p3976 A69-41110

Analog problem solution for semiinfinite medium with Newtonian cooling at boundary, noting first term of asymptotic expansion in heat conduction equation

22 p4052 A69-41126

Lower boundary approximation for theory of thermal laminar steady state boundary layer on isothermal immersed plate

23 p4150 A69-41334

Boundary problem for differential equation of mixed type reduced to singular boundary problem for hyperbolic partial differential equations

23 p4181 A69-41409

Successive approximations method applied to boundary problem for quasi-linear parabolic equation in n dimensional Euclidean space

23 p4181 A69-41411

Boundary value problem solution for inviscid fluid flow past compliant body with analytical behavior of flow discontinued at points

23 p4151 A69-41525

Boundary effects on time dependent transport theory based on star product, noting application to transmission line theory and radiative and neutron transfer

23 p4190 A69-41571

N-th order differential systems using first approximation, finding conditions for bounded solutions, solutions asymptotic to zero and stability

23 p4181 A69-41722

Bernstein modes initial value-boundary value problem for half space of plasma bounded by wall and parallel unperturbed magnetic field

23 p4196 A69-41875

Differential equations of motion and associated boundary condition for axisymmetric flexural vibration of cylindrically anisotropic circular plate, using variational calculus

23 p4228 A69-41911

Boundary value problem of hydrodynamic equations discontinuous solution stability under random perturbations, analyzing combustion and detonation models

23 p4239 A69-41961

Normal derivative of solutions to Dirichlet problem for elliptic quasi-linear equation and construction of given mean curvature hyperspace in curved space

23 p4182 A69-41972

First boundary value problem for linear second order parabolic equation with unbounded lowest order discontinuous coefficients and free terms, discussing solvability

23 p4182 A69-41973

Mixed boundary value problem for system of Navier-Stokes equations for viscous incompressible fluid in stationary motion in vessel, noting rotating fluid

23 p4183 A69-41974

Complex configuration shells described by single analytical expression using R-conjunctive and R-disjunctive functions yielding boundary equations

23 p4229 A69-41991

Three dimensional mixed boundary value problem in elasticity by dominant states method, examining generalized Fourier series feature in Legendre polynomials

23 p4229 A69-41998

Differential operators representing potential energy of thin shell, discussing self conjugacy of boundary value problems

23 p4229 A69-41999

Rectangular waveguide with inhomogeneity represented by half space dielectric filling with boundary causing polarization, obtaining reflection elimination or minimization reflection

23 p4125 A69-42047

Numerical method for calculating unsteady two dimensional boundary layers in laminar incompressible flow

23 p4152 A69-42108

Stress concentration in shallow spherical perforated shell under loads, reducing boundary value problem to infinite algebraic equations solution

23 p4233 A69-42342

Uncoupled torsional vibrations of simply supported open cylindrical tubes analyzed by approximation equations, considering free edge boundary conditions

23 p4233 A69-42347

Flexural vibrations of simply supported lipped I section of cylindrical tubes, considering free-edge boundary conditions

23 p4233 A69-42350

Rigid/plastic solids subjected partly to uniform fluid pressure and partly to general boundary conditions, analyzing uniqueness and stability criteria

23 p4235 A69-42460

Wave propagation in dynamical theory of thermoelasticity, considering half space subject to step time strain, temperature and stress distributed over free surface

23 p4235 A69-42464

Kalman-Bucy filtering technique for estimation of initial conditions and smoothing in linear dynamic systems, noting rectilinear motion of randomly accelerated spacecraft

23 p4132 A69-42546

Elastoplastic boundary dynamic behavior in strip with crack determined by solving boundary value problem in elliptic integrals form

24 p4395 A69-42591

Buckling of truncated conical shells under torsion with various boundary conditions, applying Galerkin method to estimate critical load and wave number

24 p4395 A69-42715

Perturbation velocity potential of unsteady potential flow of barotropic gas past cascade of thin blades oscillating harmonically

24 p4244 A69-42716

Continuous dependence of boundary value problems of linear elastic body in smooth three dimensional region on force, elasticity and initial data

24 p4397 A69-42750

Boundary conditions for Tricomi equation in symmetric positive form, showing analytical and finite difference solutions

24 p4339 A69-42792

Initial deflection and internal pressure effects on supersonic panel flutter boundary of simply supported rectangular plates under diverse middle- surface stress conditions
24 p4400 A69-43056

Iterative finite difference method for initial value problems applied to hyperbolic system representing one dimensional time dependent flow of compressible polytropic gas
24 p4340 A69-43226

Wrong boundary conditions influence decay in over-determined difference approximations to hyperbolic partial differential equation
24 p4340 A69-43227

Optimization problems solution applied to separable but bounded state variable problem, providing control over commercial errors
24 p4292 A69-43286

Surface wave terms found in long wavelength limit during solution of initial value problem for semiinfinite hot plasma
24 p4356 A69-43364

Chaplygin equation applied to eddy flow past semicylindrical surface, discussing stagnation points and boundary value problems
24 p4245 A69-43477

Numerical solutions for time dependent boundary value problems governed by heat equation applied to transient heat conduction in irregularly shaped two dimensional regions
[ASME PAPER 69-HT-50] 24 p4410 A69-43521

Finite deformation of circular elastic membrane spinning with constant angular velocity, solving nonlinear differential equations by Runge-Kutta method for three boundary conditions
24 p4404 A69-43651

BOUSSINESQ APPROXIMATION

Boussinesq approximation for compressible fluids, discussing perturbation pressure and velocities and vertical scale motions
12 p2061 A69-26013

Viscous heat conducting compressible fluid response to abrupt change in circular cylinder angular velocity at stable temperature distribution, considering Boussinesq approximation
13 p2245 A69-27378

Optical refraction effects from refractive index gradients in stressed models as limitation on moire interferometry usefulness in Boussinesq problem and expanding pulse studies
14 p2531 A69-28883

Surface displacements at end of elastic semiinfinite circular cylinders due to annular axisymmetric loading, employing Boussinesq solution
15 p2711 A69-30872

Benard convection cells analyzed by Boussinesq approximation and Schmidt-Liapunov method, obtaining boundary value problem branching solution
19 p3301 A69-36791

BOW SHOCK WAVES

U SHOCK WAVES

BOW WAVES

Numerical calculations for oscillatory solutions of system of nonlinear differential equations, noting circularly polarized magnetic oscillations observed near earth bow shock front
02 p0241 A69-11729

Vela 3A and Explorer 33 elapsed time observations of earth bow shock
02 p0244 A69-12299

Quantitative determination of reentry shock precursor absorption level and effect on surface radiation heating, calculating radiative flux from shock layer enthalpy distribution
02 p0354 A69-12528

Solar wind interaction with moon, discussing core/surface layer conductivity and lunar limb shock wave formation
03 p0502 A69-14006

Detection of electric field turbulence in earth bow shock, noting wave amplitude correlation with magnetic field structure
04 p0592 A69-14681

Energetic electrons of terrestrial origin behind bow shock and upstream in solar wind
05 p0815 A69-16253

Plasma physics in space research, discussing solar wind, planetary atmosphere bow shock and convective motions of magnetosphere plasma
[ISAS-431] 06 p1000 A69-17026

Solar wind, bow shock and magnetosheath observations by charged particle analyzers on Vela satellites
07 p1208 A69-19361

Magnetopause, magnetosheath, bow shock and adjoining interplanetary domain study by IMP-1 satellite, discussing macroscopic plasma variables and fluid model for solar wind
07 p1129 A69-19374

Bow shock wave position and shape in rectilinear flight with constant acceleration
09 p1433 A69-21386

Reflected particle acceleration at magnetospheric bow shock front attributed to interplanetary electric field
09 p1577 A69-21714

Solar wind interaction with geomagnetic field, considering bow shock, field confinement in magnetosphere and stretching out of lines of force
12 p2072 A69-26735

Satellite observations of geomagnetic tail in magnetosphere near midnight meridian plane, discussing formation, shape, plasma sheet and models
12 p2072 A69-26739

Inviscid supersonic flow in right angle corner of varied angular intersecting wedges with bow waves remaining planar up to intersection line
13 p2200 A69-28251

Bow shock wave during rectilinear flight with varying acceleration, describing sonic boom loop mechanism
16 p2734 A69-32005

Transmission of Alfvén waves through earth bow shock based on hydromagnetic shocks theory, discussing amplitude amplification
16 p2777 A69-32099

Flow field study of merging between bow shock and viscous layer upstream of highly cooled axisymmetric blunt body in rarefied hypersonic stream
[AIAA PAPER 69-656] 17 p2893 A69-33498

Earth bow shock waves in far upstream interplanetary medium observed from magnetic data of Explorer 34 satellite
18 p3199 A69-34941

Earth bow shock electrical conductivity estimation from macroscopic equations without knowing microscopic dissipation processes
18 p3131 A69-35191

Shock wave interaction and bow shock wave establishment near sphere in presence of ionization relaxation, using time resolved schlieren photography
19 p3450 A69-36361

Magnetic fluctuations in various frequency ranges, associated with earth bow shock, detected with search coil magnetometer on OGO 3
22 p3938 A69-40501

MHD Rankine-Hugoniot equations for ion density, thermal pressure and convective velocity magnitude and orientation during Pioneer 6 traversal of earth bow shock
23 p4222 A69-42417

Fluctuating electric fields relations to MHD bow shock structure, using LF fluxgate magnetometer aboard OGO 5
24 p4306 A69-42693

Solar wind collisionless hydromagnetic flow interaction with planetary atmosphere, using mathematical model to determine bow shock position limits in atmosphere
24 p4368 A69-43178

BOX BEAMS

Box girders stress distribution analyzed by stress-freezing method compared with photoelastic measurement
15 p2705 A69-30419

Design laws of warping-free multicellular box beams under torsion or bending, using variational method
19 p3443 A69-36786

Bending creep tests on fabricated Al alloy box beams under constant load and temperature using continuous deflection and strain measurement
21 p3842 A69-39309

Strain distribution on surface of adhesive bonded box beam in simple bending, using water based brittle coating and self adhesive strain gages
21 p3844 A69-39325

Vibration properties of cantilever parallelogram box beam, using existing static deformation equations under large aspect ratio condition
21 p3846 A69-39803

BRACKETS

External load distribution in bracket between bolts and joint, verifying Reshetov mounting bolt formulas
23 p4168 A69-41417

BRADYCARDIA

Autonomic nervous system in control of heart rate in acceleratively stressed monkeys, discussing sympathetic, parasympathetic and bradycardia influence
06 p0875 A69-17844

Electrocardiographic T-wave changes related to bradycardia in healthy individuals, discussing T-wave inversion in people with vagotonia
09 p1445 A69-22557

BRAGG ANGLE

Bragg reflection of electrons by standing light waves of giant pulse laser
02 p0255 A69-11833

Phase grating formation in giant pulse laser Q switching liquid by reflecting light beam from Lippman plate at Bragg angle
05 p0771 A69-15811

Acoustical Bragg reflection and Debye-Sears effect with application to light and ultrasonics interaction
07 p1144 A69-18285

Far field of line source in medium with sinusoidally stratified dielectric constant, studying diffraction effects due to Bragg mechanism
17 p2925 A69-33842

Polarimeter using 45 degree Bragg angle reflection applied to rocket payload design for determining polarization of celestial sources X rays
23 p4207 A69-42382

BRAIN

NT CEREBELLUM

NT CEREBRAL CORTEX

NT CEREBRUM

NT HIPPOCAMPUS

Surgical radiolesion in human brain by high energy protons
03 p0374 A69-13501

Hypoxia effect on animal brain gamma-aminobutyric acid levels
04 p0552 A69-14482

One dimensional integral solution for cylindrical source generated transient temperature field and relation to thermal diffusivity of brain tissue
06 p0879 A69-17085

Uptake, metabolism and enzymatic synthesis of adrenaline in mammalian brain
07 p1066 A69-19260

Regional uptake of melatonin from blood or cerebrospinal fluid by rat brain
09 p1444 A69-21466

Computer analysis of cortical and subcortical activity in yellow bellied marmot during sleep, hibernation and hypothermia
10 p1643 A69-23122

Epinephrine forming enzyme phenylethanolamine-N-methyl transferase /PNMT/ in various brain regions of rats, cats, hens and turtles
10 p1644 A69-23303

Histochemical studies on nucleus basalis of Meynert of squirrel monkey
12 p2018 A69-25774

Penile erection electrically evoked from Macaca mulatta forebrain, measuring density and distribution of responding points
12 p2018 A69-25775

Measurement system for recording of small localized temperature changes in brain
15 p2606 A69-30152

Synaptic configurations in neuropil of planarian Dugesia dorotocephala brain, discussing neurotransmitters at phyletic level
16 p2741 A69-31555

Miniaturized FM telemeter for transmitting electrical activity of single nerve cells in brain of awake and unrestrained animal
19 p3261 A69-36270

Enzymes distribution in subfornical organ in squirrel monkey
20 p3478 A69-37934

Electrophysiological data for directionally sensitive units in optic tectum of mammals, indicating midbrain as site for rotating spiral motion aftereffects
20 p3480 A69-38264

Mammalian brain epinephrine metabolism data after isotonic saline perfusion into cranial vasculature
21 p3650 A69-38323

Control circuits in nature and sensory information data processing in human work, including servomechanism of brain-muscle system
21 p3652 A69-38784

Ultrasound-echo-encephalography in diagnosis of posttraumatic intercranial hemorrhage of skull and brain trauma, noting neuroanatomical techniques
21 p3652 A69-38790

EEG patterns evoked from left and right cerebral hemisphere by visual and verbal stimuli, showing asymmetrical role of hemispheres in governing cognitive behavior
21 p3656 A69-38976

Hyperbaric oxygen convulsions origin and site, studying pressure effect on brain electrical activity in rabbit by EEG

21 p3656 A69-38977

Brain weight and cholinesterase activity in rats after exposures to acoustic and light stimuli

21 p3662 A69-39627

Olfactory bulb removal effects on uptake decline of telencephalic norepinephrine, noting use for mapping adrenergic pathways

22 p3871 A69-40055

Mapping of biological potentials evoked in primary somatosensory fields by electrical signals on dorso-lateral surface of brain cortex of cats

22 p3886 A69-41121

D-amphetamine effect on single tectal neurons activity of cat opticum recorded by steel microelectrodes before and after intravenous injection

23 p4084 A69-41466

Brain and machine model of pattern recognition, pattern synthesis, memory, learning and speech, using concept of similarity, context and signal analysis

24 p4273 A69-42909

BRAIN CIRCULATION

Cerebral circulation under longitudinal acceleration, discussing rheoplethysmographic measurements of heart rate

05 p0710 A69-16625

Blood circulation in brain during acceleration analyzed by tensometric sensors and electroplethysmography, noting intracranial sensitivity to gravitational changes

06 p0874 A69-17646

Acceleration component in pelvis to head direction found influencing hyperemia of brain at various g forces

13 p2212 A69-28626

Cerebral circulation arterial system pulsatile flow flexible vessel digital simulation models distribution

19 p3264 A69-36867

Positive pressure breathing effects on cerebral arterial and venous blood pressure, hypothalamus and adrenal glands catecholamine content and cerebrum histological changes in dogs

24 p4265 A69-43371

Centrifugation for removal of bullet fragment floating freely in ventricular system of human brain to fixed safe position in left lateral ventricle wall

24 p4265 A69-43372

BRAIN DAMAGE

Head injury clinical and laboratory long term follow-up data, discussing conscious state alterations, focal neurological deficit, EEG abnormalities, etc

01 p0022 A69-11346

Cerebellar cortex function disorders of rats subjected to 10 g acceleration under weak anesthesia

02 p0198 A69-11504

Visual systems of hamster brain, discussing relative visual localization and discrimination blindness produced by ablation of cortical or tectal areas

08 p1265 A69-20685

Mechanical vibrations and noise effects on acetylcholine concentration, esterase activity and synthesis ability in rat brain

23 p4079 A69-41381

Civil pilots medical certification after head trauma, evaluating current methods efficiency

23 p4086 A69-41687

Brain atrophy clinical diagnosis aided by biochemical analyses, including age frequencies and symptoms to control incidence among aviation personnel

23 p4089 A69-41816

BRAIN STEM

Learning model of brain stem reticular formation based on nonlinear probabilistic hybrid computer concepts

05 p0711 A69-15802

Unisensory and multisensory signal processing in cortical and brain stem regions of albino rat by electronic averaging and time histogram techniques

23 p4092 A69-42055

BRAKES [FOR ARRESTING MOTION]

NT AERODYNAMIC BRAKES

NT AIRCRAFT BRAKES

NT DRAG CHUTES

NT LEADING EDGE SLATS

NT TRAILING-EDGE FLAPS

NT WING FLAPS

Brake system components automatic testing for pneumatic or hydraulic integrity essential to safe system performance

17 p2978 A69-33377

Pressure distribution over lining of brake shoe for brake drums design, discussing pressure compensation after wear

18 p3149 A69-35287

Descent device for emergency egress from jumbo jets based on centrifugal brake, including test data on C-5 fuselage section

19 p3255 A69-36146

BRAKING

Exterior arresting devices for commercial aircraft full scale tests

03 p0367 A69-14104

BRANCHING [PHYSICS]

Perturbation theory for branching analysis of perfect and imperfect discrete conservative structural systems

08 p1417 A69-20822

BRASSES

Material memory effect in plastically prestrained thin walled brass tubes analyzed on basis of kinematic strain hardening theory

02 p0336 A69-11551

Dry dynamic friction of brass disk against steel surface reduced using ultrasonic oscillations creating air gap

18 p3135 A69-34587

BRAYTON CYCLE

Thermodynamic comparison of MHD generators using Brayton and Rankine cycles, showing Rankine cycle conversion at higher channel Mach numbers for nonequilibrium ionization

03 p0369 A69-14154

Mathematical model, analog computer simulation and information comparison of closed Brayton cycle systems for power conversion [ASME PAPER 69-GT-50]

09 p1442 A69-22479

Small gas turbine Brayton cycle analysis treating component efficiencies as dependent variables in examining single stage radial compressor and turbine aerodynamic configuration [IME PAPER 5]

12 p2147 A69-25794

Turbomachinery buffer seals, buffer gas regulation and cleanup systems for operation of closed Brayton cycle power conversion system with gas cooled nuclear reactor

13 p2268 A69-27367

Nuclear energy conversion for long space missions, comparing dynamic Brayton, liquid metal MHD gas, dynamic Rankine and LMMHD Rankine cycles

16 p2810 A69-31748

Closed Brayton cycle power systems for space, lunar, terrestrial and undersea environmental conditions, discussing design and performance

23 p4071 A69-42277

Brayton-B generator for 2-10 kwe production, describing design, heat source/rejection, efficiencies and preliminary test data analysis

23 p4071 A69-42278

Argon turboalternator design and testing for Brayton cycle space power system, discussing inlet operating temperature and shaft bearings and rotation

23 p4071 A69-42279

Analog computer simulation of single shaft Brayton cycle system dynamics, including startup and shutdown transients

23 p4071 A69-42280

BRAZIL

Brazilian space activities covering launching sites, rocket experiments in meteorology, ionosphere and X ray astronomy, balloon experiments and ground observations

15 p2724 A69-31434

BRAZING

NT LOW TEMPERATURE BRAZING

Beryllium assemblies for aerospace and nuclear requirements, emphasizing braze joining structural components and effective manufacturing methods [SAE PAPER 680651]

03 p0433 A69-13454

Braze bonds of refractory electrical contacts using induction heating

04 p0607 A69-15218

Titanium alloy interaction porosity with fillers during diffusion brazing, discussing joint strength as function of time, temperature and pressure

06 p0945 A69-17896

Reliable fluid transmission systems by brazed joints, noting base and filler metals, fitting designs and various processes

09 p1507 A69-22333

Joining methods for fabricating thorium dispersion strengthened nickel and nickel chromium materials

09 p1509 A69-22342

Vacuum brazing technique for joining dissimilar metals without oxide and nitride film contamination

09 p1509 A69-22343

Radiographic, ultrasonic, thermographic and leak test quality control for brazed liquid propellant rocket engine components

10 p1699 A69-23054

Metal joints mechanisms in soldering, brazing and welding

14 p2455 A69-29344

Salt bath brazing for honeycomb structures, describing brazing techniques for thorium dispersed Ni and NiCr, Rene 41 and Ti honeycomb panels

19 p3320 A69-35557

Ti honeycomb sandwich panels, comparing properties of Ti and Al based brazing alloys

21 p3730 A69-38665

Bonding mechanisms in Mo-Mn-Ti metallizing and Cu brazing in metal to ceramic seals by strength test, microscopy and electron probe microanalysis

21 p3733 A69-39599

Step cathodic flux cleaning of furnace brazed Al assemblies used in combination with ultrasonic and chemical conversion coating techniques

24 p4319 A69-42938

Al brazed Ti honeycomb sandwich structures brazed in vacuum and Ar, analyzing mechanical properties and corrosion resistance as functions of temperature and pressure

24 p4324 A69-43435

BREADBOARD MODELS

Breadboard chip for use in computer aided design and analysis of integrated circuits, describing components and application to differential amplifiers

03 p0402 A69-13008

Electron beam meter application as lunar surface electric field detector, discussing breadboard model and performance characteristics

03 p0429 A69-13221

Breadboard technique and interconnection for fluidic circuits in large systems

05 p0705 A69-16009

Linear limit uniaxial stresses for stress-strain and stress-birefringence in photoelastic and mechanical model materials

20 p3628 A69-37777

BREAKAWAY

U BOUNDARY LAYER SEPARATION

BREAKDOWN

Gas breakdown in HF uniform electric field with/without steady transverse magnetic field

07 p1194 A69-19415

Dynamics of pulsed microwave breakdown in nonuniform field at waveguide fed mica aperture, noting electric field distribution change due to initial plasma configuration

07 p1107 A69-19448

Microwave breakdown dependence on elevated gas temperature in electric arc shock tube, considering air, nitrogen and argon

16 p2749 A69-31693

BREAKERS [ELECTRIC]

U CIRCUIT BREAKERS

BREATHING

Respiratory system control processes hypotheses experimental verification

01 p0019 A69-10209

Physiological effects of breathing cool dehumidified air in hot humid environment, tabulating tolerance time, heart rate, temperature changes and sweat loss

09 p1446 A69-22543

Respiratory system control processes hypotheses experimental verification

14 p2408 A69-28745

BREATHING APPARATUS

NT OXYGEN MASKS

High oxygen concentration breathing effect on foveal thresholds, using sea level tests on trained observers

02 p0203 A69-12216

BRECCIA

Amphoterite (LL) chondrites Rb-Sr age determination, noting high brecciation

21 p3814 A69-39583

Meteorite impact hypothesis supported by autotichonous and mixed breccias, shattercones and microscopic shock deformation evidence in central uplift rocks at La Malbaie structure

22 p4021 A69-40410

BREEDER REACTORS

Liquid metals as coolants in breeder and space vehicle reactors for stable two phase flows

05 p0803 A69-15998

BREMSSTRAHLUNG

Ionized plasma radiation near plasma frequency, deriving formula for bremsstrahlung coefficient from Born approximation

02 p0286 A69-11589

Solar radio emission slowly varying component theory, discussing main characteristics of cyclotron and bremsstrahlung radiations of thermal electrons

02 p0314 A69-11636

Dipole and quadrupole bremsstrahlung and damping of electron plasma oscillations, finding negative k-square collisional electron-ion contribution

03 p0475 A69-13149

Enhanced bremsstrahlung from supraluminous and subluminal waves in thermal isotropic homogeneous Maxwellian electron plasma, noting applicability to Crab Nebula

03 p0507 A69-13150

X ray emission from Seyfert galaxy nuclei, noting model with bremsstrahlung from hot source

04 p0649 A69-15387

Magnetobremstrahlung /synchrotron/ and Cerenkov radiation of ultrarelativistic particles, radiation reabsorption and magnetic field measurement

06 p0962 A69-17245

Solar X ray bursts decay curves and spectra in 10 to 150 keV range interpreted as hot coronal condensation during flare and electron bremsstrahlung

07 p1206 A69-19250

Sco XR 1 optical and X ray spectra simultaneous observations during rocket flights

07 p1220 A69-19391

Electron energy distribution function in plasma heated by electron-cyclotron resonance in adiabatic trap determined from bremsstrahlung spectrum

08 p1365 A69-20547

High temperature regions cooling as applied to solar flares, considering energy losses due to heat conduction, bremsstrahlung, line emission and recombination radiation

09 p1588 A69-21362

Hard X ray event spectrum representation by thermal bremsstrahlung spectrum emitted by energetic electrons, determining various physical parameters of source

09 p1579 A69-22180

Nonthermal intergalactic bremsstrahlung model as isotropic X ray background due to subcosmic electron interactions with thermal ionized gas in expanding universe

11 p1947 A69-24595

Poisson formula in double logarithmic approximation for photon emission cross section in analysis of bremsstrahlung involving high energy particles

11 p1922 A69-25758

X ray emission from radio galaxies as possible bremsstrahlung radiation of hot gas, noting Crab Nebula

12 p2166 A69-27037

Form factor of nucleus effect on high energy muons bremsstrahlung cross section

13 p2333 A69-28422

Plasma electron temperatures from electron bremsstrahlung spectra measurements in X ray region

14 p2496 A69-29783

Low energy neutral bremsstrahlung cross sections for Ne, Ar and Xe, using rapid scanning spectrometer

15 p2657 A69-31159

Radiative scattering cross sections of electrons from neutral O and atomic and molecular N using rapid scanning spectrometer for bremsstrahlung intensity

15 p2657 A69-31160

Near horizontal air showers relationship to direct muon production and heavy triplet particles of unit charge, discussing nuclear interactions and muon bremsstrahlung

15 p2678 A69-31499

Continuum radiation measurements for bremsstrahlung and recombination of neutral and ionized nitrogen

16 p2823 A69-32466

Origin of galactic gamma rays, discussing evidence in support of interstellar gas in galactic disk and production of neutral pions and bremsstrahlung

16 p2852 A69-32806

Center to limb variation of solar hard X ray bursts, suggesting inverse Compton effect and bremsstrahlung from anisotropic electrons

17 p3023 A69-33055

High temperature regions cooling as applied to solar flares, considering energy losses due to heat conduction, bremsstrahlung, line emission and recombination radiation

18 p3197 A69-34752

Neutrino-pair bremsstrahlung for hot degenerate electron gas during Coulomb scattering on imbedded nuclei in stellar regimes including lattice structure effects

18 p3176 A69-35004

Solar bremsstrahlung intensity dependence on heliographic longitude, noting maximum intensity shift toward electron beam direction

20 p3589 A69-37552

Cosmic X ray bremsstrahlung due to collisions of suprathermal protons with ambient electrons, giving clue about diffuse sky background of X rays

22 p4006 A69-40643

Stellar neutrino energy loss due to electron-electron neutrino bremsstrahlung in nondegenerate gas determined from transition probability for charged baryons or leptons interaction

24 p4351 A69-42794

Solar X ray bursts decay curves and spectra in 10 to 150 keV range interpreted as hot coronal condensation during flare and electron bremsstrahlung

24 p4372 A69-43613

BREWSTER ANGLE

Parallel and coplanar Brewster angle grinding of maser tube ends

03 p0440 A69-13302

Brewster angle window degradation of high power ionized argon gas lasers

[IEEE PAPER L-4] 05 p0775 A69-16322

Brewster angle lenses for low cost low loss laser beam transmission system

07 p1148 A69-18863

F cosine i theorem validity for VLF radio wave absorption in ionosphere tested using exponential electron density models, noting Brewster angle influence on reflection coefficient

13 p2222 A69-28473

BRIDGMAN METHOD

Temperature gradients effects on GaAs crystals grown by Bridgman method

23 p4199 A69-42469

BRIGHTNESS

NT SKY BRIGHTNESS

Metagalaxy temperature brightness explained from radio sources combined radiation with inversion spectra

02 p0313 A69-11632

Mercury radio emission phase dependence, discussing brightness temperature value approximation and surface layer properties

02 p0314 A69-11640

Solar continuum intensity determination in middle IR, obtaining solar disk center brightness temperature measurement by comparison with black body model

02 p0318 A69-12041

Mercury radio emission theory, calculating Mercurian brightness temperature as function of solar illumination and distance from sun

03 p0512 A69-13688

Photospheric brightness differences and structure of large scale intensity fluctuation, discussing association with solar supergranulation and chromospheric network

03 p0515 A69-14037

Venus brightness temperature between 0.75 and 1.65 cm from radio emission measurements, taking into account water vapor in Venus atmosphere

04 p0658 A69-14960

Spectral brightness of clouds and various terrains in visible and near IR regions measured from aircraft

06 p0953 A69-17991

Radio wave brightness temperatures and contrast characteristics in presence of clouds and precipitation

06 p0954 A69-17999

Lunar opposition effect theory applied to Mars opposition effect on brightness

07 p1214 A69-18616

Solar intensity measurements at 1.2 mm during partial solar eclipse, noting solar limb brightening and intense solar outburst near end of eclipse

07 p1217 A69-19243

Whipple and Douglas-Hamilton systematic corrections for periodic comets, considering constant coma brightness of P/Tempel 2 since 1874-1904 observations

08 p1408 A69-21137

Amplitudes and rates of brightness increase during supernova outbursts, calculating released energies

09 p1587 A69-21358

Brightness curves of eclipsing systems under monotonicity of unknown functions, using stable algorithm

09 p1588 A69-21363

Limb darkening nonlinearity effects on solutions for brightness curves of eclipsing binaries

09 p1588 A69-21364

Galactic dust layer spatial structure and relation to brightness of Milky Way based on analysis of photoelectric color excesses in Aql and Cyg stars

09 p1590 A69-21381

Auroral spectrum observations for absolute brightness of nitrogen Meinel and ING systems, considering background night airglow and atmospheric extinction

10 p1681 A69-23161

Sagittarius A occultation by moon, determining peak brightness and flux density of radio source

11 p1958 A69-24592

Atmospheric scintillation effect on planetary brightness distribution over disk from photometric measurements

11 p1960 A69-24729

Brightness coefficients for isotropic scattering of homogeneous plane layer in turbid medium, using Legendre polynomials

11 p1960 A69-24733

Brightness temperature distributions from intensity interferometric measurements reconstructed by computation

11 p1888 A69-25256

Photospheric magnetic fields, coronal emission and filaments distribution relationship with 1420 MHz radio emission, noting brightness and plasma density increase

11 p1964 A69-25417

Instability phenomena encountered in galaxies determined based on classification of galaxies according to mass and brightness

12 p2163 A69-27019

Model atmosphere source function, mean intensity and flux by matrix methods

13 p2288 A69-27564

Far IR and millimeter solar continuum, analyzing flatness of limb darkening curves and brightness temperature near minimum

13 p2341 A69-27591

Luminous spherical fog layer surrounding burning zirconium droplet during free fall through oxygen containing atmosphere, noting effect on mass and heat transfer processes

13 p2380 A69-28462

Shock wave radiation screening by thermodynamically unstable gas, discussing brightness and gas temperature relative to shock wave front position

14 p2493 A69-29673

Photographic photometry of comet Ikeya-Seki during passage near sun, plotting isophotes of coma and tail and brightness distribution diagrams

15 p2685 A69-30527

Photographic observations of comet Kilsten 1966b, estimating brightness, absolute magnitude and color index

15 p2685 A69-30529

Radio observation of 20 May 1966 solar eclipse at 9470 and 3300 MHz, discussing brightness distribution of S component sources

17 p3030 A69-33057

Angular velocity effects on meteors apparent brightness

17 p3045 A69-34222

Venus brightness temperature between 0.75 and 1.65 cm from radio emission measurements, taking into account water vapor in Venus atmosphere

18 p3197 A69-34723

Amplitudes and rates of brightness increase during supernova outbursts, calculating released energies

18 p3197 A69-34748

Brightness curves of eclipsing systems under monotonicity of unknown functions, using stable algorithm

18 p3197 A69-34753

Limb darkening nonlinearity effects on solutions for brightness curves of eclipsing binaries

18 p3197 A69-34754

Galactic dust layer spatial structure and relation to brightness of Milky Way based on analysis of photoelectric color excess in Aql and Cyg stars

18 p3198 A69-34769

Noctilucent cloud layer spectral brightness and transparency in E region determined from transhorizon rocket observations

18 p3130 A69-35148

White light solar corona brightness distribution observations /1964-1967/, considering solar flux relationship and equatorial electron densities

18 p3205 A69-35394

Brightness distribution over source, discussing regularization algorithms for radio astronomical data reduction from crossed telescope 20 p3606 A69-38033

Lunar photometric function near zero phase from Apollo 8 closeup photography, noting higher reflected brightness than at 1.5 degree phase angle 23 p4220 A69-42380

BRIGHTNESS DISCRIMINATION

Visual sonar target detectability probability function of retinal position and brightness contrast 02 p0203 A69-12218

Lunar thermal radiation measurements at 8.6 and 3.2 mm wavelengths, noting brightness temperature-time relationship in curves and as Fourier components 02 p0327 A69-12717

Observations of Venus at 15.4 GHz establishing upper limit for brightness variation with phase angle 08 p1382 A69-19818

Brightness in blue light and radial velocity variability of metallic line star 28 Andromedae 08 p1395 A69-20637

Celestial navigation system using photodetectors, comparing numbers and brightness of S4, S20 and silicon stars 10 p1775 A69-23190

Polarized brightness distributions of supernova remnants IC 443 and W44 at 6-cm wavelength from observations with 6 minute resolution 10 p1787 A69-24113

Star motion perturbations by invisible body, stressing bright bodies invisible by position near perturbed star 17 p0304 A69-33407

Brightness of fixated element in visual field as function of element luminance 22 p3880 A69-40853

Linear models with self excitation for brightness and contrast perception studies in human visual system 22 p3881 A69-40862

Hue shift and brightness enhancement of flickering light measured as function of illuminance, wavelength and target size 22 p3882 A69-40871

Human response to visual beat phenomena by combining intermittent stimuli, considering brightness estimation 22 p3884 A69-40889

Brightness discrimination judgments for gray chips by humans, using psychophysical limits method and white, noncoherent red and He-Ne laser light sources 24 p4276 A69-43323

BRILLOUIN EFFECT

Radiation damage in CdS irradiated by normal mode or Q-switched ruby laser, discussing stimulated Brillouin scattering 02 p0257 A69-12614

Ruby laser to study stimulated Mandelstam-Brillouin scattering in liquids and in various crystals in UV 03 p0438 A69-13053

Laser power increase noting influence of Mandelstam-Brillouin induced backscattering 04 p0612 A69-15414

Passive Q switching of solid state lasers based on stimulated Mandelstam-Brillouin light scattering 05 p0770 A69-15699

Laser beam scattering by acoustic waves of ionized crystal, reconsidering stimulated Brillouin emission theory for ultrasonic yield 05 p0777 A69-16610

Stimulated Mandelstam-Brillouin scattering in compressed N and H as function of pressure, using ruby laser pulses 09 p1516 A69-21562

Light polarization from stimulated Brillouin effect in compressed gaseous nitrogen, presenting depolarization variations as function of gas density and laser power 09 p1516 A69-21691

Stimulated Mandelstam-Brillouin scattering at second harmonic of ruby laser and neodymium glass laser 09 p1520 A69-22684

First Stokes component of stimulated Mandelstam-Brillouin scattering and line defects caused by self focusing of single pulse laser beam 09 p1521 A69-22686

Stimulated Brillouin scattering application to measurement of hypersonic velocities and absorption in gigahertz frequency range, laser frequency shifting and Q switching, etc 23 p4167 A69-42183

BRILLOUIN FLOW

Trajectory equations for outermost electron on beam in TWT operating in dynamic mode for Brillouin flux 03 p0406 A69-13974

Spontaneous reverse current due to Brillouin EMF observed in diode in thermal noise range 10 p1661 A69-22950

BRIQUETS

Molybdenum fiber sintering activation by adding nickel, noting decrease in impact viscosity 10 p1711 A69-23336

BRISTOL-SIDDELEY OLYMPUS 593 ENGINE

Low pressure fuel system and turbine rotor blade temperature measurement method for Concorde Olympus 593 engine [ASME PAPER 68-GT-63] 06 p0984 A69-17187

BRITISH AIRCRAFT CORP AIRCRAFT

U BAC AIRCRAFT

BRITTLENESS

Spin tests to determine brittle fracture under plane strain, using cyclic thermal stress or hydrostatic pressure to generate fatigue crack in rotor blank 03 p0524 A69-13060

Brittle surface films role in stress-corrosion phenomena in various environments 03 p0448 A69-13873

Theoretical buckling load for single edge notched struts, discussing brittleness effects 05 p0837 A69-16064

Griffith biaxial fracture criterion for porous brittle materials based on continuum model with random infinitely sharp cracks [ASME PAPER 68-WA/MET-12] 05 p0838 A69-16152

Hydrostatic tension test of brittle material using spherical specimen bonded into center of cube of matrix material 05 p0784 A69-16434

Griffith crack in brittle material, discussing validity for rock-like material with nonlinear stress-strain relationship 06 p1020 A69-17128

Ultrahigh strength steel susceptibility to brittle fracture, describing methods of testing rupture toughness and stress intensity factor 07 p1158 A69-18402

Crack front and zone in brittle elastic body under high pressure at wall inside body 07 p1231 A69-18699

Hydride, cold, irreversible and reversible hydrogen brittleness in titanium and titanium alloys 07 p1162 A69-18772

Brittle fracture models compared with experimental stress analysis results, noting plane strain and plane stress fracture toughness 07 p1234 A69-19379

Prandtl brittle fracture model modified for semi-finite crack in infinite body, discussing microscopic and macroscopic relation and crack propagation kinetics 07 p1237 A69-19682

Brittle crack theory analyzed to justify Irwin criterion at crack ends, dismissing Kristianovich-Barenblatt assumption and solutions for elastic problems 07 p1238 A69-19689

Stresses nature at ends of brittle cracks, discrediting finiteness under certain conditions 07 p1238 A69-19691

Brittleness and physical causes of cold shortness in Cr, discussing high purity metal formation and fine and superfine grain structures synthesis 09 p1526 A69-22147

Refractory ceramic materials use for advanced combustion chamber design, stressing brittleness effect and current fabrication techniques 09 p1531 A69-22624

Micromechanism of crack propagation in brittle fracture, considering kinematics for steady state crack in plane strain and energy dissipation 10 p1796 A69-23070

Bending creep vacuum testing device for brittle materials at high temperatures, noting load variation capability 10 p1696 A69-23851

Dissolved gases and carbon effect on transition temperature from plastic to brittle state of high melting metals including niobium and vanadium 10 p1715 A69-24011

Brittle fracture of steel analyzed using statistical model, attributing occurrence to coalescence of arrested cracks initiated at different points 10 p1803 A69-24033

Semibrittle material decompaction influence on stress distribution in infinite plate with edge loaded circular hole, noting stress-strain relation nonlinearities 11 p1972 A69-24656

Three dimensional problems in crack theory for unbounded brittle body, deriving critical loads from limiting equilibrium equation 12 p2178 A69-25997

Strain rate and pressurization effect on ductile-brittle transition temperature of polycrystalline sintered W, discussing yield stress 12 p2117 A69-27138

Metallographic aspects of fracture, analyzing very brittle solids, Griffith cracks, ductile solids and ductile to brittle transition 13 p2274 A69-27225

Structural modes of fracture, analyzing brittle, ductile, fatigue and stress corrosion fractures using fractography 13 p2274 A69-27226

Continuum mechanics for brittle fracture analysis in metal structures, discussing plastic limit loads 13 p2275 A69-27228

Stress waves analysis of brittle fractures, considering loading time role and cavitation of viscous fluids relation to fracture incipience 13 p2275 A69-27229

Sensitivity decrease of reversible temper brittleness of low alloy steels due to Mo inhibiting effect on phosphorus diffusion 13 p2283 A69-28491

Oxygen content and grain structure influence on TS5 Ti alloy mechanical properties, notch and crack growth sensitivity at low temperature 15 p2637 A69-30266

Brittle toughness determination method compared with Robertson and notch impact tests, evaluating steel susceptibility to brittle failure propagation 16 p2795 A69-32796

Dislocation and energy balance analysis of ductile and brittle metal cracks for determining metal fracture strength from plastic deformation 17 p3052 A69-32984

Ti-Al base alloys brittleness and stress corrosion cracking, discussing diffusion mechanism, hydrogen mobility, dislocations, etc 17 p2987 A69-33372

Alloying elements effects on low temperature metal fracture, considering changes in ductile-brittle transition flow due to solute 17 p2988 A69-33551

Fracture toughness of structural steels, discussing evaluation methods for brittle fracture resistance, toughness values and ratings correlation, etc 17 p2989 A69-33554

Reliable structural joints and attachments design for components fabricated from nonmetallic refractory brittle materials, discussing departures from conventional practices 17 p3061 A69-33569

Stressed state analysis in dynamic brittle breakdown wave front of compression waves propagating in brittle rod under longitudinal impact 18 p3217 A69-34592

Elastic bodies brittle stability weakened by cut, developing criterion for determining critical cut length 18 p3224 A69-35314

Limiting equilibrium of infinite brittle body weakened by internal plane elliptical crack, determining critical loads and stresses at crack 18 p3226 A69-35379

Limiting equilibrium stress state of unbounded brittle body with elliptical crack under monotonically increasing tensile or compression load, noting influence of crack curvature 19 p3441 A69-36745

Brittle failure models, discussing rheological properties, Griffith energy criterion properties, crack behavior in elastic and linear viscoelastic media, etc 21 p3839 A69-39194

Stability of unbounded homogeneous brittle body containing circular planform crack, determining elastic stresses and critical load by macrocrack propagation theory 21 p3839 A69-39195

Hot salt stress corrosion of Ti alloy, discussing hydrogen generation during elevated temperature exposure and embrittlement as manifestation of strain rate 21 p3747 A69-39434

Beryllium R and D emphasizing brittleness and fracture toughness for safe working stress levels of structurally loaded components 24 p4332 A69-43208

- Structural ceramics and testing of brittle materials - U.S. Army Conference, Chicago, March 1967
24 p4333 A69-43337
- Mechanical testing procedures for brittle materials, discussing test philosophy, tabular data, laboratory tests correlation, etc
24 p4333 A69-43340
- Parametric influence on strength of brittle materials, considering volume, surface, notch, strain rate, modulus variations and material variability effects
24 p4333 A69-43341
- Brittle materials mechanical properties test programs design based on nature of material, use of data and available techniques
24 p4333 A69-43342

BROADBAND

- Microwave transistor amplifier computerized design, discussing wide bandwidth and flat in-band gain response optimization on high dielectric substrates
01 p0040 A69-10194
- Wideband electronically scanned receiver, using varactor diode upper sideband parametric frequency upconverter for frequency mixing
01 p0048 A69-11036
- Noise performance of broadband traveling wave masers with longitudinal or transverse stagger tuned magnetic field
02 p0257 A69-12428
- Broadbanding of S-band three port stripline circulator, discussing effect of tuning and mode suppressor screws
03 p0404 A69-13472
- Error probability for discriminator detection of wideband PCM/FM, considering IF bandwidth/bit duration product and low pass filtering effect
08 p1271 A69-19864
- Wideband acceleration instrumentation for Rover ground test facility liquid hydrogen turbopumps to study structural and flow induced vibrations
10 p1692 A69-23250
- Broadband double balanced mixer/modulators compared with single balanced and unbalanced mixer/modulators
10 p1665 A69-23876
- Panchromatic illumination in radar systems for image quality, tracking and detection problems, suggesting application to polypanchromatic radar
14 p2416 A69-29529
- Broadband microwave double balanced mixer/modulators, discussing bandwidth, conversion loss, noise figure, intermodulation and power dissipation
15 p2580 A69-31077
- Broadband low VSWR transitions between rectangular waveguides and coaxial transmission lines, discussing asymmetrical probe and ridge types
16 p2757 A69-31584
- Broadband thermal radiometer containing InSb electronic bolometer under magnetic field, discussing astronomical applications
17 p2969 A69-32823

BROADBAND AMPLIFIERS

- Broadband parametric amplifier used as front amplifier in satellite communication systems ground station receiver, noting cryogenic operation capability
01 p0041 A69-10243
- Low noise front end wideband amplifier for 100-150 MHz broadband receivers, using distributed amplifier techniques
02 p0216 A69-12028
- Liquid helium cooled broadband parametric amplifier, discussing circuits and noise performance
02 p0221 A69-12458
- Low noise broadband parametric amplifier for communication satellite ground stations
03 p0406 A69-13733
- Frequency and power stable backward wave oscillators as energy pumps for molecular and wideband parametric amplifiers used in satellite receivers
07 p1095 A69-18430
- Helium cooled low noise high gain wideband parametric amplifier for spacecraft communication
07 p1099 A69-18462
- Monolithic planar process to fabricate DC coupled amplifiers having less than nanosecond risetime
07 p1103 A69-18878
- Noise power ratio at output of wideband amplifier with angle modulated multicarrier input, obtaining intermodulation products from Bessel functions expansion
08 p1285 A69-20595
- Noniterative wideband amplifiers having single pole transfer functions overall gain bandwidth product optimization, deriving rigorous conditions for maximum
09 p1469 A69-22606

- Wideband RF amplifier manufacturing problems, comparing operation of vacuum triodes and pentodes in passband circuits
11 p1849 A69-24958
- Ultrawideband DC transistor amplifier for pulsed switching circuits with subnanosecond risetimes, discussing multistages with feedback dipoles, transient response and drift problems
11 p1854 A69-25612
- Traveling wave tubes with broadband CW power, discussing energy dissipation
13 p2232 A69-28057
- High gain broadband amplifiers with triple tuned coaxial resonators and gridded power tubes, discussing phase stability
14 p2418 A69-28892
- Wideband transistorized amplifier frequency response analysis by simplified approximations, subdividing operational frequency range
15 p2573 A69-30113
- Wideband tunnel diode amplifier design, discussing implementation to out-of-band circulator characteristics and VSWR suppression
15 p2578 A69-30804
- Wideband selective amplifier design methods proposed by Martini and Schiaffino
16 p2761 A69-32442
- Wide tuning range S band low noise maser amplifier system, discussing bandwidth, gain and packaging for antenna mounting
17 p2979 A69-32914
- Solid state broadband RF power amplifier for airborne HF radio, eliminating total servosystem and all higher voltage components
17 p2942 A69-34114
- Parametric amplifier developed for unattended satellite communication ground stations, featuring low noise broadband characteristics
19 p3270 A69-36240
- One kw HF ground grid wideband untuned power amplifier in transformer coupled cascade stages
20 p3488 A69-37286
- BROADCASTING**
- Space broadcasting possibilities and problems, considering home reception and group participation at community centers
[UN PAPER 68-95287] 01 p0028 A69-10497
- Propagation tests of skywave field strength reduction by orthogonal transmission
03 p0395 A69-13597
- Sound and TV broadcasting from satellites, discussing systems for future individual user pickup
04 p0558 A69-15120
- Low noise room temperature satellite broadcast receiver for UHF, using room temperature parametric amplifiers
05 p0728 A69-15672
- Communication satellites applied to broadcasting, considering point to point satellite link and distribution systems
08 p1272 A69-19925
- Direct radio and TV broadcasting from satellite-borne radio transmitter to general public, giving visibility, gains, frequencies and bandwidths tables
09 p1586 A69-21286
- TV broadcasting from synchronous satellites direct to ordinary UHF receivers in 1980s
11 p1833 A69-24529
- Compatible single sideband /CSSB/ modulation suitability for broadcasting, analyzing signal spectrum, demodulation distortion and signal generation methods
23 p4125 A69-42111
- BROMIDES**
U CHROMIUM BROMIDES
U POTASSIUM BROMIDES
- BROMINE**
- Antimony bromine and mercury abundances in meteoritic materials determined by neutron activation analysis
08 p1404 A69-20919
- Br molecular dissociation rate in argon excess determined, considering visible emission intensity behind shock front
18 p3176 A69-34465
- Ion production in K/diatomic Br system by high energy K beam, obtaining total ionization cross section as function of energy
19 p3378 A69-36187
- Laser action from atomic bromine produced by flash photolysis of gaseous iodine monobromide, discussing pulsed output, optical gain, chemical reversibility and atomic excitation
19 p3337 A69-36444

- Cs ionization by bromine, measuring relative cross section velocity dependence by crossed molecular beam technique
23 p4194 A69-42208
- BROMINE COMPOUNDS**
NT CHROMIUM BROMIDES
NT POTASSIUM BROMIDES
- Bromine containing unsaturated polyesters for fire retardancy and physical strengths, noting use in reinforced plastics for laminates, molding and corrosion
08 p1340 A69-20504
- Fire retardant brominated epoxy systems for wet filament winding process, noting viscosity, pot life and NOL ring mechanical properties
08 p1340 A69-20507
- BRONCHIAL TUBE**
U TRACHEA
- BRONZES**
- Chromium bronze blanks compacted from granules for hardness and electrical conductivity, noting improved high strength characteristics over conventional production methods
02 p0266 A69-12127
- Electro-optic properties of tungsten-bronze niobate ferroelectric crystals
[IEEE PAPER F-7] 05 p0808 A69-16313
- BROWNIAN MOVEMENTS**
- High aspect ratio submicroscopic whiskers of beta-SiC, investigating rheological properties of suspensions in various fluids
01 p0102 A69-11260
- Fluids structural relaxation analyzed by nonequilibrium thermodynamics and molecular kinetic theory, considering Brownian motion
13 p2299 A69-28037
- BUBBLE CHAMBERS**
- Particle physics and discovery of K mesons and hyperons emphasizing track recording, cloud and bubble chamber techniques
24 p4352 A69-43039
- BUBBLES**
- Time dependent interaction of hot gas bubble with chemically reactive liquid stream, detailing thermal boundary layer theory
01 p0058 A69-10162
- Grain boundary gas bubbles growth in chemically vapor deposited tungsten as function of annealing time, temperature and fluorine content
01 p0097 A69-10646
- Dynamics of moving gas bubble injected in quiescent liquid, considering velocity, heat flow and mass transfer
[ASME PAPER 67-WA/HT-30] 02 p0351 A69-12201
- Bubble motion inside liquid in spherical cavity, allowing for bubble surface deformation
03 p0418 A69-13813
- Pressure induced variations in stability constant characterizing bubble structure in two phase boundary layer of several liquids during boiling with natural convection
03 p0534 A69-14149
- Ellipsoidal gas bubble dissolution in low viscosity fluid, discussing rate of steady motion, deformation degree and diffusion rate
07 p1120 A69-18990
- Rise velocity of large gas bubbles in liquid calculated, assuming velocity is determined by propagation of bubble produced wave disturbance
07 p1120 A69-18999
- Bubble leak testing of components to understand effects of gas and liquid viscosity, surface tension, pressure differential and temperature
09 p1503 A69-21391
- Bubble spiral path motion toward axis of rotation of liquid rotating at constant angular velocity
09 p1483 A69-22006
- Electrolytic bubble level during wind tunnel tests for aircraft model attitude
10 p1672 A69-23268
- Self similar solutions for collapse of empty cylindrical cavity in gas with given equation of state, describing gas motion past cavity
10 p1679 A69-23367
- Vibration characteristics of circular cylindrical shells containing water under axial excitation, investigating bubble formation and shell-fluid interaction
[ASME PAPER 69-VIBR-4] 10 p1805 A69-24162
- Hot inert gas bubble thermal stability in cool reactive liquid
11 p1998 A69-24475

Characteristic frequencies approximation formula for gas bubbles in liquids compared with exact solutions 11 p1915 A69-24582

Gas bubble formation in Ti welding associated with gas nuclei in metal, molten dwell time, gas diffusion coefficients, joint edge conditions, etc 11 p1892 A69-25669

Temperature measurement associated with bubbles leaving heat source in subcooled pool boiling carbon tetrachloride analyzed, using high speed motion pictures by schlieren optical system [ASME PAPER 68-HT-47] 13 p2374 A69-27779

Microlayer thickness in nucleate boiling, studying liquid-vapor interface motion of growing bubble near heated surface 13 p2375 A69-27789

Bubble boiling onset in forced fluid flow, deriving equations for calculating minimum temperature difference between wall and fluid, discussing applicability range 16 p2878 A69-31954

Bamberg zenith telescope investigation, noting level constant dependence on level tube bubble length 17 p2970 A69-32882

Ultrasonic detection of gas bubbles in blood, discussing device with bubble chamber attached to circulating liquid and receiver crystal harmonics 18 p3098 A69-34821

Surface tension gradients caused thermocapillary convection solved for spherical fluid film under weightlessness conditions 19 p3452 A69-36392

Bubble oscillations in water filled pressure chamber with alternating pressure generated by piston, measuring temporal development 19 p3302 A69-36871

Bubble size and blood perfusion effect on gas bubbles absorption in tissues, noting decompression sickness 21 p3651 A69-38389

Book on mathematical model for heat and material exchange in bubbles covering bubble formation, transition period and quasi-stationary bubble rise 21 p3847 A69-38448

Contact lenses hazards during high altitude aircraft piloting analyzed via bubble development 23 p4106 A69-41806

Air bubbles rise velocity and path in water based on time measurement of bubble traversing two light beams, describing electronic recording system 24 p4299 A69-42918

Decompression disease symptoms from standpoint of gas bubbles formation in blood vessels, examining factors preventing air metabolism 24 p4269 A69-43414

Dynamic behavior of gas bubble in ideal fluid plane flow, considering bubble shape, velocity field, gas pressure and stagnation point pressure determination 24 p4302 A69-43478

Unsteady axisymmetric potential flow of ideal incompressible fluid with free surfaces, deriving differential equations for gas bubble dynamics and surface geometry 24 p4302 A69-43500

Bubble flow evolution at various pressures up to critical value [ASME PAPER 69-HT-30] 24 p4411 A69-43529

Cylindrical bubbles stability in vertical pipes from photographs, describing wake, spacing, pressure pulsations and convection cells effects [ASME PAPER 69-HT-28] 24 p4411 A69-43540

BUCCANEER AIRCRAFT

Buccaneer aircraft development, considering structure, air bleed, aerodynamics, controls, electric systems, flight refueling, aircrew escape, armament and weapons delivery 09 p1435 A69-22775

BUCKLING

NT CREEP BUCKLING
NT ELASTIC BUCKLING
NT EULER BUCKLING
NT THERMAL BUCKLING

Shear buckling test data for shallow corrugated webs compared with theoretical analysis with web buckling as orthotropic plate or local mode 01 p0170 A69-10866

Nonlinear buckling analyzed by mathematical models and computational procedures using organized matrix approach to structural analysis based upon finite element 01 p0171 A69-10964

Critical loads in elastoplastic buckling of cylindrical shells analyzed using power series 02 p0340 A69-12058

Orthotropic stiffened multilayer circular cylindrical shells buckling under axial compression, lateral pressure, etc 02 p0346 A69-12510

Buckling of electroformed thin conical shells under hydrostatic pressure, proving theory for cones of large taper ratio 02 p0347 A69-12515

Recent advances in shell buckling, discussing imperfection sensitivity, boundary conditions and wall configuration [AIAA PAPER 68-103] 02 p0347 A69-12516

Mathematical programming in optimized truss design noting reduction of components under buckling 02 p0347 A69-12536

Unreinforced circular cutouts effects on buckling behavior of circular cylindrical shells under axial compression, using photoelastic plastic shells 03 p0523 A69-12988

Two point boundary value problems for determining buckling behavior of two hinged circular arches [ASME PAPER 68-WA/APM-18] 04 p0669 A69-14399

Impulse buckling threshold for elastic-plastic cylinder with elastic core after development of unstable motion 04 p0671 A69-14414

Schaefer theory of two parameter eigenvalue problems applied to stability of twisted bars, discussing quick estimate of critical loads 04 p0682 A69-15290

Iteration method for determination of critical buckling load for straight rods 05 p0832 A69-15689

Stability functions for local buckling of long thin flat walled structures loaded for longitudinal compression and shear 05 p0833 A69-15709

Stiffness matrices for buckling or vibration analysis of long thin flat plate structures connected at longitudinal edges 05 p0836 A69-16029

Theoretical buckling load for single edge notched struts, discussing brittleness effects 05 p0837 A69-16064

Circumferential buckling of ellipsoid of revolution due to internal pressure, assuming linear deflection and uniform thin shell [ASME PAPER 68-WA/PVP-12] 05 p0840 A69-16190

Buckling of long cylinders with homogeneous random axisymmetric geometric imperfections under axial compression, using truncated hierarchy technique 07 p1236 A69-19473

Dynamic stability of thin flat plates and applications in ship and aircraft deck construction, studying dynamic buckling for rectangular plate 08 p1415 A69-20665

Uniform gravity load effect on buckling of beam continuously supported by soft foundation and subjected to uniform lateral load 09 p1615 A69-21927

Buckling of eccentrically stiffened thin circular cylindrical shell under uniform combined axial compression and torsion loads with lateral pressure 09 p1616 A69-21955

Buckling capabilities of inflation rigidized wire film and shell film cylinders in axial compression and bending 09 p1617 A69-21997

Buckling deformation and stress fields around central slits in photoelastic models and metal sheets under tensile load 10 p1796 A69-23069

Axisymmetric free edge buckling of semiinfinite heterogeneous orthotropic cylindrical shells in axial compression, noting stability condition 10 p1802 A69-23889

Postbuckling behavior and subsequent imperfection sensitivity of thin walled cylinders subjected to torsion, considering perturbation 11 p1979 A69-24814

Stiffer geometry and spacing effects on buckling of axially compressed cylindrical and conical shells 11 p1979 A69-24815

Thin walled circular cylinders postbuckling behavior and stability under axial compression calculated for design loads 11 p1979 A69-24816

Nodal lines shape in individual flats for long plates in combined shear and compression with sinusoidal edge rotations in longitudinal direction 11 p1983 A69-25137

Buckling of long flat panel in combined compression and shear with sinusoidal edge moments and support on two edges and on point supports 11 p1984 A69-25138

Shear buckling of simply supported infinitely long plates orthogonally reinforced by stiffeners with flexural and torsional rigidity 11 p1984 A69-25142

Flutter design charts for isotropic panels stressed to verge of buckling for typical values of structural damping 11 p1992 A69-25524

Large deflection elastic-plastic analysis of axisymmetric shells of revolution indicating role of plastic yielding in buckling pressure reduction 12 p1886 A69-26839

Buckling loads for anisotropic fiber reinforced composite plates with strong bending membrane coupling terms 12 p1886 A69-26840

Cylinder buckling and other boundary value problems, applying inverse differential operators to solution of integrodifferential equations 12 p1886 A69-26841

Buckling and postbuckling equilibrium behavior of fiber reinforced cylindrical shell under uniform axial compression 12 p1887 A69-26843

Axisymmetric plastic buckling of complete spherical shells subjected to external hydrostatic pressure 13 p2361 A69-27439

Shear buckling of clamped rectangular linearly tapered plates, considering uniform shear stress and load 13 p2361 A69-27443

Imperfection surface effect on buckling load of circular cylindrical shell under axial compression, locating limit points of postbuckled states 13 p2362 A69-28122

Rectangular plate buckling analyzed by finite element method with deflection function 13 p2364 A69-28225

Uniaxial compressive stability of rectangular boron-epoxy laminated plates clamped on loaded edges, determining buckling loads by Southwell plots 13 p2287 A69-28669

Buckling of unsymmetric cross-ply rectangular plates under uniform shear, considering hinge-support boundary conditions 13 p2371 A69-28679

Postbuckling of rectangular plates with exponential variation in thickness, analyzing large deflection equations using dynamic relaxation method 15 p2704 A69-30291

Oscillating beams lateral buckling allowing for torsional stress in determining critical load 15 p2712 A69-31015

Buckling load of cylindrical shell with inclined stiffeners, using method for stability of thin walled cylinder under transverse end load at free end 16 p2872 A69-31912

Mixed plate element application to vibration and buckling eigenvalue problems based on Reissner variational principle, considering quadrilateral elements 16 p2874 A69-32176

Load carrying capacity of thin steel plates fatigued by cyclic shear buckling 17 p3052 A69-32980

Nonaxisymmetric stability loss /buckling/ of closed toroidal shell of circular cross section under uniformly distributed external pressure, considering Volmir linear theory 17 p3055 A69-33130

Critical buckling stress for cylinders wound with fiber reinforced plastics /FRP/, establishing stability criteria for fiber reinforced shells 17 p3058 A69-33430

Discrete element displacement method applied to buckling analysis of flat rectangular plates under arbitrary membrane loading, calculating critical load intensities 17 p3066 A69-34048

Structural members stability mathematical models using lumped bars and springs simulating postbuckling behavior 18 p3211 A69-34342

Buckling stresses in thin walled box girder under bending determined using stationary potential energy criterion 18 p3224 A69-35344

Nonlinear shell theory for thin elastic circular cylinders, obtaining equations for investigating equilibrium configurations of postbuckled states 19 p3440 A69-36636

Displacement patterns for buckled shapes of axially compressed thin walled circular, cylindrical and conical shells
19 p3443 A69-36793

Buckling and postbuckling of complete spherical shells with symmetric initial shape deviations and elastic deformations
19 p3446 A69-36834

Plastic deformation effect on dynamic buckling of elastic-plastic simple shallow truss subjected to step and impulsive loading
19 p3446 A69-36836

Deep circular arches undergoing large deflections and stability loss, determining buckling load variations
20 p3622 A69-37210

Critical buckling loads for uniform compression of clamped or simply supported parabolic and semielliptic plates
20 p3622 A69-37223

Matrix displacement method of structural analysis applied to dynamic buckling of clamped shallow spherical caps under step pressure loading
20 p3622 A69-37229

Torsional-flexural buckling of thin walled open sections under eccentric load, emphasizing singly symmetric sections loaded in plane of symmetry
20 p3625 A69-37653

Thin curved panels postbuckling behavior under axial compression, basing study on thin shell finite deformation theory and Galerkin method
20 p3629 A69-38112

Gas turbine compressor blade buckling during blade fabrication by hydraulic pellet jet technique eliminated by controlling working pressure of jet
21 p3731 A69-38879

Buckling stability of thin cylindrical shell under torsion, allowing for finite displacements due to shear in initial stress-strain state
21 p3838 A69-39187

Bifurcation and hardening rate of rigid-plastic bodies presented on buckling of rectangular plate with lateral restraint
21 p3840 A69-39299

Postbuckling of filled circular cylindrical shell using Ritz energy method for load deformation relation, discussing stabilizing effect of core
22 p4038 A69-39895

Buckling strength prediction for circular cylindrical shells reinforced by circumferential and longitudinal stiffeners, solving torsional buckling of orthotropic shells under internal pressure
22 p4042 A69-40171

Supersonic panel flutter boundary of buckled and unbuckled clamped rectangular plates, discussing in-plane stress effects
22 p3930 A69-40584

Discrete rib effect on buckling resistance of cylindrical shell under combined external and axial compression loads, using Laplace transforms
23 p4229 A69-41990

Buckling of truncated conical shells under torsion with various boundary conditions, applying Galerkin method to estimate critical load and wave number
24 p4395 A69-42715

Postbuckling analysis by equilibrium solutions of conservative system near critical point, considering stability failure in elastic structure under increasing load
24 p4396 A69-42730

Shearing force and shear buckling deformation influence on supersonic panel flutter boundary of simply supported rectangular plates, basing analysis on deflection approximation
24 p4400 A69-43055

Buckling of thick homogeneous rectangular plates subjected to constant normal stress, noting error for thin plate approximation
24 p4406 A69-43696

BUDGETING

Federal Government budgeting, discussing systems analysis, planning-programming, etc
10 p1811 A69-23351

Federal Government systems politics and budgeting, noting dichotomies, time dependence, taxonomy, etc
10 p1811 A69-23352

MACRO /methodology for allocating corporate resources to objectives/ for R and D, discussing program for optimal budget management
15 p2720 A69-30958

Expenditures for R and D effect upon U.S. economy
17 p3076 A69-34041

BUFFER STORAGE

Buffer storage for telemetry nonstationary video data compression, analyzing requirements, predictor algorithm and variable aperture control using simulation
19 p3272 A69-36260

Swedish satellite onboard computer for particle experiment, discussing functional design based on buffer unit for experimental data
20 p3501 A69-37386

BUFFERS [CHEMISTRY]

DNA denaturation without variance from pH 7.0 by adding NaOH observed with viscosity measurements, obtaining similar results with hydrochloric acid
24 p4263 A69-43225

BUFFETING

Buffeting tests of model wing in wind tunnel as function of angle of attack and Mach number
06 p0857 A69-17096

Probability diagnosis and prognosis for buffeting zones based on Bayes formula, determining clear air turbulence zones
15 p2648 A69-30645

Wind tunnel tests of swept wing fighter aircraft for transonic buffet onset lift coefficient resulting from camber and leading and trailing edge deflection [AIAA PAPER 69-793]
19 p3238 A69-36297

Acroelasticity of supersonic aircraft in flight, discussing buffeting, wing flutter and control surface flutter
22 p3862 A69-40003

BUILDING MATERIALS

U CONSTRUCTION MATERIALS

BULBS

Vertical vibration stimulation of growth of onion bulbs and mice body weights
01 p0014 A69-10584

Vertical vibration stimulation of growth of onion bulbs and mice body weights
15 p2555 A69-30754

BULGING

Sheet metals deformation behavior during punch stretching and hydraulic bulging, noting effects of lubrication, stress-strain relation, anisotropy and microcracks
20 p3551 A69-38115

BULK MODULUS

Isothermal secant and tangent bulk moduli of silicon fluids and correlation with pressure, volume and temperature
01 p0102 A69-10913

Adiabatic elastic constants of molybdenum-rich rhenium alloys, studying concentration effects on bulk modulus, Debye temperatures and interatomic forces
04 p0613 A69-14455

Bulk aerodynamic method for heat and water vapor fluxes from data obtained at Chiba /1966/, introducing modified integral diffusivity
07 p1176 A69-18965

BULKHEADS

Low profile bulkheads for launch vehicles and spacecraft compartments to obtain structural weight reduction
02 p0334 A69-12370

BUMPERS

Multiwall meteoroid protection design in Apollo program, discussing bumper, backup sheet and honeycomb cells insulation [AIAA PAPER 69-372]
13 p2367 A69-28304

Bumper materials effect on two component hypervelocity impact shields performance, noting material density influence [AIAA PAPER 69-379]
13 p2283 A69-28309

Two plate meteoroid shields effectiveness determined by analyzing debris cloud ejected behind front plate after hypervelocity impact [AIAA PAPER 69-380]
13 p2368 A69-28310

BUNCHING

NT ELECTRON BUNCHING

Bulk queuing with service time distribution assuming customer arrival in batches and service discontinuance
02 p0271 A69-12060

Photon bunching effect in spatially coherent noise field enhanced by superposing monochromatic coherent signal and/or shaping incident noise spectra
16 p2749 A69-31694

BUOYANCY

Buoyancy in turbulent shear flow, rotation or streamline curvature effects and meteorological parameters, drawing formal exact algebraic analogy
11 p1870 A69-24894

Buoyancy effect on boundary layer flow over semi-infinite vertical plate heated to constant temperature in uniform free stream
11 p1874 A69-25352

Buoyancy-driven system instability mechanism, showing Prandtl number increment effect and relation to Coriolis-driven instability of rotating fluids
11 p1876 A69-25559

Normal modes stability analysis of fluid layer adjacent to flat plate submerged in liquid, considering effects of interfacial surface tension and buoyant forces [AIAA PAPER 69-386]
15 p2590 A69-30476

Buoyant plumes and thermals defined as vertical motions produced under gravity by density or temperature contrast between incompressible source fluid and environment
18 p3122 A69-34917

Similarity solutions describing buoyancy effect on laminar and turbulent wakes of heated body in incompressible fluid vertically ascending flow
19 p3296 A69-35761

Neutral buoyancy simulation of astronaut performing module replacement and repair task in zero-g environment [AIAA PAPER 69-1005]
22 p3921 A69-40379

Plane Poiseuille flow with nonlinear temperature distribution, studying vortex type secondary flow onset due to buoyant forces [ASME PAPER 69-HT-37]
24 p4411 A69-43533

BUOYS

NOMAD buoy telemetry system for synoptic oceanographic and meteorological data, using digital processing and dual frequency transmissions
03 p0391 A69-13223

BUREAUS [ORGANIZATIONS]

Accident prevention program of Bureau of Aviation Safety, discussing probable cause analysis and function in feedback loop, hazard analysis and accident data center
22 p3867 A69-41140

BURGER EQUATION

Equation of characteristic functional for Burgers one dimensional model fluid turbulence using logarithmic expansion method, discussing change in time of energy spectrum
01 p0059 A69-10338

Burger condition for distortion field of dislocation lines in continuous medium, considering arbitrary shape in arbitrary motion
19 p3439 A69-36477

Hydrodynamic turbulence in statistical prediction for Burger equation, considering statistical inference problem for initial conditions and prediction criterion with estimable error
21 p3697 A69-39673

Solution stability and secondary solutions growth beyond critical points investigation for Burgers equations for laminar-turbulent transition
24 p4302 A69-43360

BURNERS

Flame stabilization on rectangular burners, discussing blow-off limits correlation by velocity gradients close to corners
02 p0353 A69-12320

BURNING

U COMBUSTION

BURNING PROCESS

U COMBUSTION

BURNING RATE

Diacytyle burning and spontaneous combustion regularities, determining reaction kinetics at moderate temperature
02 p0351 A69-11981

Spherical flames of spark-ignited dust clouds, discussing streak film photographs, flame propagation, particle burnout time and burning velocities
02 p0353 A69-12323

Combustion model for rapidly burning involatile condensed materials, obtaining combustion rates
02 p0355 A69-12672

Plateau effect in burning of platonized propellants due to lead compound additives
03 p0494 A69-12881

Ultrahigh pressure test vessel for determining pressure vs burning rate characteristics of propellants and explosives
04 p0645 A69-14472

Coal grain combustion rate and duration at finite air excess coefficient, solving combustion process equations under steady state assumption
04 p0687 A69-15168

Burning rate of composite propellant with gamma irradiated ammonium perchlorate, noting enhancement at atmospheric pressure

04 p0647 A69-15519

Burning rates of solid propellants by variable pressure method, taking into account environmental heat loss and gaseous condensation

06 p0982 A69-17505

Turbulent premixed flames stabilization, determining gas flow velocity, turbulence intensity, flame thickness and burning velocity relation to intensity

06 p1035 A69-17931

Solid propellant burning rate behavior during abrupt environmental pressure excursions, using transient combustion model

[AIAA PAPER 69-172] 06 p1036 A69-18046

Unstable combustion of ammonium perchlorate (AP), discussing correlation between propellant particle diameter and frequency in burning rate

[AIAA PAPER 69-177] 06 p1036 A69-18063

Photographic study of burning metalized composite propellant under acceleration, noting burning rate augmentation by heat transfer from alumina particles retained on propellant surface

[AIAA PAPER 69-173] 06 p0983 A69-18151

Solid propellant burning rates from condensed phase decomposition kinetics, discussing kinetic rates of thermal decomposition

[AIAA PAPER 69-145] 06 p1039 A69-18182

Strong electrostatic fields effects on burning rates of double base and composite propellants

[WSCIPAPER 68-24] 07 p1241 A69-18366

Tungsten delay powders combustion mechanism and intermediate stages of burning process, noting burning rate

[WSCIPAPER 68-19] 07 p1202 A69-18370

Catalytic effect of potassium bichromate and chromic oxide additives on burning of ammonium perchlorate and mixtures

08 p1375 A69-19997

Vanadium pentoxide addition effect on combustion rates of mixtures of ammonium perchlorate and metallic fuels in nitrogen atmosphere

08 p1375 A69-20342

Burning rate of solid grains of hybrid rocket engine, using calculated diagrams for quick computations of engine

08 p1376 A69-20590

Pure ammonium perchlorate single crystal self deflagration, determining energy transfer mechanisms from pressure effects, combustion characteristics and subsurface profile

[AIAA PAPER 69-142] 09 p1560 A69-21900

Burning rate catalysts mechanism and location in composite propellant combustion at high pressure

09 p1622 A69-21954

Nonmetalized composite propellant solid phase heterogeneities effect on oscillatory combustion, inducing coherent burning rate oscillations with external pressure oscillations

09 p1622 A69-22085

Hydrodynamic effects in flame spreading, ignitability and steady burning of liquid fuels, using analogy of films floating on water

11 p1999 A69-24484

Combustion rates of condensed systems under positive and negative accelerations at atmospheric pressure

11 p2001 A69-25195

Solid propellant rockets, discussing composite and double base propellants and use of polymers

11 p1941 A69-25588

Component ratio effect on pressure dependence of burning rate in ammonium and potassium perchlorate mixed with organic compounds, graphitic and tungsten

12 p2027 A69-26474

Polymethyl methacrylate burning rates in mixture with ammonium perchlorate or in hybrid systems when mixed with ammonium chloride

13 p2324 A69-28503

Compressed ammonium perchlorate combustion rate and pressure requirements established from initial temperature effects

14 p2508 A69-28914

Dipercchlorates different in organic part of structure and explosive transformation heats, showing strong dependence of combustion velocity on pressure

15 p2716 A69-30108

Solid rocket motor propellant burning rate increased by adding special fine ammonium perchlorate (SFAP) to optimize particle size distribution

[AIAA PAPER 69-519] 16 p2793 A69-31850

Thermal layer theory of composite propellant combustion leading to minimum steady state burning rate under ideal thermal conditions

[WSCIPAPER 69-5] 16 p2830 A69-32346

Composite solid propellant burning rate by solving energy equation, yielding heat release, flame thickness and standoff distance

[WSCIPAPER 69-7] 16 p2830 A69-32348

Burning velocity inhibitors effects on hydrocarbon-oxygen-nitrogen mixtures ignition temperature, reporting data on 20 additives at ambient temperature and pressure

[WSCIPAPER 69-14] 16 p2831 A69-32352

Point defect structure to control ammonium perchlorate burning rate, discussing thermal analysis data correlations, isothermal decomposition, etc

[WSCIPAPER 69-17] 16 p2831 A69-32355

Doped recrystallized ammonium perchlorate effects on composite propellant burning rates

[WSCIPAPER 69-18] 16 p2831 A69-32356

Pure monopropellant steady droplet burning rate for determining heat-up and convection transport rates in droplet combustion products of flat flame burner

[AIAA PAPER 69-563] 16 p2834 A69-32722

Flame front structure and combustion rates of gases as function of temperature dependence of thermal conductivity, diffusion coefficients, density and molecular weight

17 p3069 A69-33136

Mode transition characteristics of free burning argon electric arc with transpiration cooled anode, noting current blowing parameter

[AIAA PAPER 69-696] 17 p3011 A69-33451

Nonlinear periodic oscillations in liquid rocket combustion chambers for different chamber models and burning rate response formulations

19 p3449 A69-36352

Flame pressure tube and burning velocity related, discussing stream tube area expansion error

21 p3849 A69-38806

Ammonia addition effect on laminar flame speeds of propane-air mixtures

21 p3849 A69-38809

Acceleration effects on solid propellant rocket motors combustion characteristics

[AIAA PAPER 68-530] 21 p3786 A69-39217

Laminar burning rate of premixed propane-air flames at one atmospheric pressure in DC electric fields, using cooled porous plug burned method

21 p3852 A69-39596

Concentric or eccentric rotation effect on burning rate and geometry of small hybrid rocket motors using hydrogen peroxide-organic fuel

23 p4203 A69-41932

BURNING TIME

Mathematical analysis of oxygen diffusion to coal grains during coal dust combustion, evaluating kinetic constants by burning time

04 p0687 A69-15167

Flame burnout of atomized hydrocarbon fuel in gas turbine combustion chambers as function of ratio of time to total burnout time

08 p1420 A69-19999

BURNOUT

Nucleate boiling burnout heat flux data for ethane, ethylene and ethane-ethylene mixtures at various pressures, discussing applicability of Noyes equations

15 p2671 A69-31118

BURNS (INJURIES)

Retinal burns from intense light sources using rabbit eyes as function of irradiation rate, exposure time and image size

02 p0204 A69-12496

Protection against burn producing intense thermal exposures, noting double layer of fire resistant material

[AGARDOGRAPH-111] 08 p1266 A69-20674

Retinal burn resulting from prolonged viewing of sun, laser or thermonuclear explosion, noting effects on choroid, receptors and pigment cells

08 p1267 A69-20680

BURSTS

NT RADIO BURSTS
NT SOLAR RADIO BURSTS
NT TYPE 2 BURSTS
NT TYPE 3 BURSTS
NT TYPE 4 BURSTS
NT TYPE 5 BURSTS

Bursts of high speed rotor occurring at diametric cross section and around hub as function of hub size

01 p0142 A69-10306

BUTADIENE

Electron beam radiation curing of mercaptan terminated butadiene-acrylonitrile liquid copolymers at ambient temperatures in air

09 p1512 A69-22368

BUTANES

Chromatographic analysis of products formed during induction period of 2-methylbutane gaseous oxidation in flow system at low temperatures and long residence times

21 p3669 A69-38798

BUTT JOINTS

Butt weld fatigue properties improvement in maraging steels, using shot peening and prestretching

03 p0434 A69-13762

Filler metals for HY steels, discussing tensile and yield strength, elongation and area reduction of butt welds deposited

08 p1320 A69-20406

Continuous butt welding with CW carbon dioxide laser, noting heat affected area, remelt zone and weld efficiency

15 p2617 A69-30099

BUTYRIC ACID

Mice convulsions at varying hyperbaric oxygen pressures and carbon dioxide content correlated with decreasing brain alpha aminobutyric acid levels

19 p3257 A69-35972

BYPASSES

High bypass turbofan design, discussing JT9D engine combustion, materials and cooling

05 p0811 A69-15552

Shunted resonators on transmission line with asymmetrical response offering selectivity from resonance frequency standpoint

08 p1271 A69-19917

Pulsed ultrasonic flaw detectors resolving power enhancement by shunting semiconductor diodes across piezoelectric elements of scanning heads to shorten scan pulse duration

18 p3137 A69-35112

TF39 high bypass ratio engine design, development and tests, noting low smoke combustor

[RAES PAPER 21] 22 p4000 A69-40622

GABA shunt contribution to total metabolism of alpha ketoglutarate to succinate and high pressure O effect on system under in vitro conditions

22 p3877 A69-40776

C

C BAND

C band waveguide window for average power transmission featuring relatively small biconcave dielectric disk

07 p1096 A69-18435

C-5 AIRCRAFT

Systems analysis application to determination of C-5 effectiveness noting loading, productivity and effectiveness analysis computer programs

[SAE PAPER 680729] 03 p0379 A69-13440

C-5A transport flight test and progress report, discussing taxi runs, first flights and flight-flutter program

06 p0867 A69-17665

Technology of titanium for C-5A aircraft, discussing structural and functional components and machining, welding, forging, etc

[ASM PAPER D8-26.2] 07 p1143 A69-19672

Design, metallurgical and manufacturing problems of titanium application in superjet C5 and SST engines

09 p1570 A69-22062

C-5 engine inlet development, presenting two phase nacelle forebody and five phase model tests, scale corrections inlet/cowl optimization and prototype tests

[ASME PAPER 69-GT-52] 09 p1570 A69-22481

Flight test telemetry data processing system designed for C-5

10 p1660 A69-23269

Design of 126 channel PCM telemetry unit for C-5 aircraft flight test, discussing FET analog multiplexing

10 p1693 A69-23275

Flight testing and preflight simulated testing of Lockheed C-5 Galaxy transport aircraft

10 p1634 A69-23599

Galaxy C-5A aircraft Value Control Program stressing design organization, upper management authority, budgetary adjustments, etc

13 p2383 A69-28095

L500 cargo transport commonality with C-5 showing need for aggressive weight control program

[SAWE PAPER 745] 18 p3091 A69-34908

Lockheed L-500 aircraft weight consideration in structural design as all cargo lifter, describing engine

thrust, payload, options, etc
18 p3092 A69-35464

Lockheed C-5 Galaxy aircraft avionics systems with Doppler inertial navigation equipment to operate with precision without ground based aids
18 p3104 A69-35465

Real time terrain following computer for C-5A transport, discussing automatic throttle system and speed bleedoff utilization
[AIAA PAPER 69-797] 19 p3367 A69-35633

C-5A aircraft model high subsonic speed tests, correlating data from three transonic wind tunnels
[AIAA PAPER 69-794] 19 p3237 A69-35636

Product reliability program for C-5A to provide high delay/abort reliability during operational usage
19 p3247 A69-36011

Man machine interface problems in C-5 equipment and system design
19 p3261 A69-36024

Descent device for emergency egress from jumbo jets based on centrifugal brake, including test data on C-5 fuselage section
19 p3255 A69-36146

C-5 air force logistic transport, discussing structural design, configuration, payload, aerodynamics and flight testing
[AIAA PAPER 69-758] 19 p3248 A69-36295

C-5 aircraft stability augmentation and autopilot development with consideration for unusual design required by takeoff weight, inertia and low approach speed
20 p3461 A69-36927

C-5A transport aircraft airframes manufacture, discussing Lockheed profits, contract disputes and Cheyenne helicopter contract cancellation
20 p3640 A69-37355

C-5A Galaxy military transport hydraulic system, considering applications for industrial hydraulics
20 p3466 A69-38177

C-5A transport modular valve design for improved maintenance and high reliability due to manifold- cartridge arrangement
20 p3466 A69-38178

C-5A transport landing gear assembly design, illustrating air turbine kneeling-drive module
20 p3466 A69-38179

C-130 AIRCRAFT
Lockheed C-130 Hercules modified as STOL aircraft studied in laboratory by computerized simulation and graphics techniques for pilot view during landing
18 p3092 A69-35466

C-141 AIRCRAFT
C-141 Category IIIb all weather landing system, discussing system concept, components, operations and performance
14 p2479 A69-29701

C-141 aircraft reliability growth history, discussing fleet performance, aging trends and delivery vs production sequence
18 p3090 A69-34521

C-141 engine health monitoring program, applying results to maintenance costs reduction
[AIAA PAPER 69-775] 19 p3244 A69-35646

C-142 AIRCRAFT
U XC-142 AIRCRAFT

CABIN ATMOSPHERES
NT SPACECRAFT CABIN ATMOSPHERES

Pressurized Navajo aircraft environmental system, discussing ventilation, pressurization, heating and air cooling systems
[SAE PAPER 690330] 11 p1829 A69-24504

Urine excretion following water load in male subjects exposed to normal, hot/dry and comfortable/dry environment applied to airline crews
17 p2914 A69-33182

Closed compartment fire mathematical model to analyze combustion parameter effects, atmosphere pressure and temperature during fire
[AIAA PAPER 69-618] 17 p3074 A69-33704

Renal calculus incidence among aircrews of long and short haul airlines, considering effects of dry cabin environment and dehydration
23 p4108 A69-41826

Physical and physiological factors involved in determining aircraft passengers time of safe unconsciousness permissible after cabin decompression
24 p4278 A69-43398

CABLES
Design and tests of cable assemblies for F-111 aircraft
05 p0731 A69-16246

Flat conductor cable technology, discussing design, manufacture, specifications, etc
[ASME PAPER 69-DE-8] 14 p2393 A69-28855

CABLES [ROPES]

Parachute deployment load control by use of line ties from rocket sled tests
11 p1823 A69-25386

Carrying cables shape optimization for suspended structures under load, using minimum weight criterion
18 p3212 A69-34354

CADMIUM

Electrical properties of p-n junctions of diffused Cd or Zn in indium phosphide
02 p0294 A69-11628

Superconductivity and band structure from pseudopotential for zinc and cadmium, analyzing values of electron phonon mass enhancement
04 p0642 A69-14965

Cadmium ionization energy in InAs using heat treatment in hydrogen to eliminate anomalies
06 p0979 A69-16998

Diffusion method for fabricating negative resistance diodes consisting of Cd doped silicon, introducing Cd into n-type silicon plates in evacuated vials
09 p1462 A69-21477

Diffusion method for fabricating negative resistance diodes consisting of Cd doped silicon, introducing Cd into n-type silicon plates in evacuated vials
15 p2578 A69-30722

Maxwell coefficient change of Cd atoms /in molecular beam/ diffusely reflected from metal surfaces related to reflector temperature, material and fabrication method
20 p3580 A69-37814

Bright cadmium plating by electrolysis, describing processes during electrodeposition from sulfate electrolytes
22 p3959 A69-41266

CADMIUM ANTIMONIDES

Temperature dependence of electrical properties of In and Cu doped CdSb single crystals prepared by zone refining
04 p0643 A69-15264

Structural imperfections of CdSb single crystals undoped and doped with tellurium and indium noting etching techniques, grain boundaries and impurities
11 p1938 A69-25030

Phase diagram for physicochemical study of CdSb-Ge cross section of Cd-Sb-Ge ternary system, discussing exo-endothermal fusion effects, microstructure, etc
14 p2503 A69-28975

CADMIUM COMPOUNDS

Second harmonic generation in ternary semiconductor compounds
03 p0489 A69-13894

Electrical properties of n-type Cd tin arsenide single crystals with impurity concentrations at various temperatures
05 p0809 A69-16375

Second harmonic generation in ternary semiconductor compounds
11 p1939 A69-25695

Cadmium arsenide carriers effective mass under strong transverse magnetic field, noting restricted role of thermal EMF and Hall coefficients
13 p2318 A69-27897

Lattice component of heat conductivity in n-type cadmium arsenide at low temperatures by suppressing electron component of conductivity with strong transverse magnetic field
16 p2824 A69-31568

Electronic properties changes in amorphous CdGeAs caused by long range order loss studied by measuring optical and transport properties
19 p3390 A69-36557

Thermal EMF in cadmium arsenide specimens with various electron concentrations determined to verify parabolic subband structure of conduction band
22 p3993 A69-40607

CADMIUM ISOTOPES

High power output CW laser oscillation measured at 4416 Å laser transition in Cd 2 using single isotope of Cd 114
02 p0259 A69-12653

Isotope shifts in 4416 Å cadmium laser, showing change of double peaked to single peaked profile with doubled active tube length
10 p1705 A69-23812

CADMIUM NICKEL BATTERIES

U NICKEL CADMIUM BATTERIES

CADMIUM SELENIDES

CdSe single crystal dislocation loops and growth defects, using X ray topograms
02 p0298 A69-12048

Radiation absorption variations in KC-19 CdSe glass during ruby laser radiation, noting microcrystals and nonlinear effects role in determining optical properties
03 p0436 A69-13036

Two photon absorption and stimulated emission mechanism of CdS-CdSe mixed crystals investigated by ruby laser output
03 p0438 A69-13052

Perfect piezosemiconductor resonator /phasor/ with CdSe/CdS/ crystal, discussing vibration excitation in wurtzite type crystal in electric field of electron drift
03 p0431 A69-13930

CdSe single crystal films vacuum deposition for use of photocells base with p-n heterojunctions
07 p1198 A69-18512

Dark and photocurrent volt-ampere characteristics induced by capture of carriers injected into illuminated CdS single crystals
09 p1555 A69-21506

Slow recombination centers parameters in CdSe single crystals during heat treatment in vacuum or hydrogen atmosphere
09 p1560 A69-22664

Stimulated emission characteristics of CdS-CdSe mixed crystals subjected to two photon excitation, studying pulse energy at 77 K as function of pumping power
19 p3332 A69-35867

Gold/polycrystalline cadmium selenide film contact found ohmic in darkness and barrier in light, noting potential distribution, electron concentration and energy gap
19 p3384 A69-36480

Cadmium sulfide-selenide single crystals reflection coefficient polarimetric measurement, observing reflection peaks relationship to absorption spectral temperature dependence
19 p3391 A69-36607

CADMIUM SILVER BATTERIES
U SILVER CADMIUM BATTERIES

CADMIUM SULFIDES
Laser CRT with beam pumped aluminized CdS crystals, discussing single spot low duty operation
01 p0039 A69-10175

Thin film transistors prepared from spray deposited cadmium sulfide, discussing carrier mobility and low stability
02 p0214 A69-11596

Neutron and gamma irradiation effects on CdS crystals structure and properties, outlining electron energy level scheme
02 p0298 A69-12119

Radiation damage in CdS irradiated by normal mode or Q-switched ruby laser, discussing stimulated Brillouin scattering
02 p0257 A69-12614

Two photon absorption and stimulated emission mechanism of CdS-CdSe mixed crystals investigated by ruby laser output
03 p0438 A69-13052

Thermal cycling tests showing improvement in cadmium sulfide solar cell stability, noting effect of thermal cycling stresses
03 p0367 A69-13074

Impurity profiles and energy band diagram for cuprous sulfide-CdS heterojunction based on capacitance, Hall and electron microprobe measurements
03 p0368 A69-13075

Photovoltaic properties of CdS thin film solar cells and silicon cells at Jupiter temperature and solar intensity
03 p0368 A69-13076

Contact resistance of In or In-Ga on CdS single crystals
03 p0487 A69-13638

Photocurrent pinch-off effect in high resistivity thin CdS crystals for evaluating donors, acceptors and surface states
03 p0488 A69-13757

Bound excitons spectra in CdS, semiconductor band structure and tabulating positions of lines identified with excitons
03 p0488 A69-13784

Perfect piezosemiconductor resonator /phasor/ with CdSe/CdS/ crystal, discussing vibration excitation in wurtzite type crystal in electric field of electron drift
03 p0431 A69-13930

CdS Hall coefficient, Hall mobility and magnetoresistance coefficient dependence on electric field, magnetic field and scattering mechanisms
03 p0490 A69-13945

Modulated photocurrent in CdS crystal obtained by irradiation with intensity modulated electron beam, noting relaxation time and trap concentration
03 p0490 A69-13946

Hall mobility of photoelectrons in cadmium sulfide layers
03 p0491 A69-14055

Refractive index temperature dependence of cadmium sulfide single crystals grown from gas phase
04 p0644 A69-15268

Pulse radiation effect on dielectric constant of sintered CdS photoresistors, discussing capacitance dependence on intensity, type and frequency of light
05 p0806 A69-15694

Surface photovoltaic effect in copper electroplated single crystal CdS solar cells, discussing Fermi level and Hall effect
05 p0704 A69-15958

Surface recombination rate effect on lux-ampere characteristic of photomagnetic effect in CdS single crystals of low and high photosensitivity
05 p0809 A69-16377

Cadmium sulfide films with larger than bandgap photovoltages, analyzing photovoltage decay and temperature and light intensity effects
06 p0980 A69-17772

CdS single crystals excess conductivity observed at room temperature
08 p1374 A69-21083

Photocells with p-n heterojunctions from sintered CdS, describing spectral sensitivity and temperature dependence of no-load open EMF
08 p1374 A69-21084

Time dependent recoverable isothermal decrease of photocurrent in CdS crystals in vacuum, noting trap mechanism involving electron redistribution
08 p1374 A69-21187

IR radiation effects in cadmium sulfide crystals with green edge emission at low temperatures, discussing luminescence, photoconductivity and conductivity glow curves
10 p1746 A69-23565

Structure of epitaxial single crystal layers of CdS vacuum deposited on mica surface at various temperatures
11 p1939 A69-25709

Thermodynamic method for determination of conditions for CdS single crystal synthesis from gas phase, analyzing equilibrium between solid and gas phases
12 p2144 A69-26585

Standing waves and single mode room temperature laser emission from electron beam pumped cadmium sulfide thin crystal, discussing emission at 77 K
12 p2109 A69-26639

CdS acoustoelectric oscillator steady state oscillation frequency dependence on voltage and conductivity compared with linear acoustoelectric amplification theory
13 p2227 A69-27244

Carrier dragging in CdS single crystals under Q switched ruby laser light due to photon stream
13 p2271 A69-27661

Capture levels at photosensitive CdS crystals surface determined by studying field effect mobility dependence on electric field
13 p2318 A69-27884

Nonequilibrium conductivity and radiation of CdS, GaAs and PbS single crystals in waveguide cell under electron beam
13 p2318 A69-27886

CdS single crystals spectral dependence of photocurrent, photoconductivity quantum yield and photoelectromotive force in exciton absorption region
14 p2504 A69-28990

Ruby laser beam effects on CdS crystals optical properties, measuring absorption spectrum and light dispersion in crystal
14 p2457 A69-28999

CdS crystals emission spectrum during two photon excitation by ruby laser, noting dependence on pump power
14 p2458 A69-29167

Space environment simulation tests of cadmium sulfide thin film solar cells, noting output loss
14 p2405 A69-29538

Ceramic CdS photovoltaic solar cell properties and model, classifying junctions according to preparation method
14 p2508 A69-29886

CdS films vacuum deposited on optically polished single crystals used for converting microwave radio signals into hypersonic waves
15 p2575 A69-30236

Cadmium sulfides thin film solar cells for supplying power to instrumentation and data telemetry on longer lived balloons
15 p2553 A69-31287

IR quenching of photocurrent under field effect in CdS crystal
16 p2827 A69-32044

Superconducting cavities for resolving optically induced changes in dielectric constant of CdS at 4.2 K
17 p3016 A69-33782

Hall mobility of photoelectrons in cadmium sulfide layers
18 p3182 A69-35048

Time dependent recoverable isothermal decrease of photocurrent in CdS crystals in vacuum, noting trap mechanism involving electron redistribution
18 p3183 A69-35156

Copper sulfide-cadmium sulfide heterojunction model for photovoltaic effect, considering surface layer intrinsic absorption and CdS photoconductivity
19 p3250 A69-35683

Photovoltaic effect at copper sulfide-cadmium sulfide heterojunction, studying depletion layer width, diffusion lengths and spectral response
19 p3382 A69-35684

Resistivity, layer thickness, postbarrier heat treatment and impurity effects on cadmium sulfide-copper sulfide solar cell
19 p3250 A69-35685

Cadmium sulfide solar cells and Kapton coverslides under proton irradiation, noting annealing of damage in samples exposed to air
19 p3253 A69-35705

Integrated thin film solar cell array consisting of CdS cells deposited on Kapton single sheets connected in series and covered by Mylar single sheet
19 p3254 A69-35710

ZnS-CdS crystals luminescence during varied forbidden bandwidth, discussing two photon and ruby laser excitation and temperature dependence
19 p3331 A69-35866

Stimulated emission characteristics of CdS-CdSe mixed crystals subjected to two photon excitation, studying pulse energy at 77 K as function of pumping power
19 p3332 A69-35867

Cadmium sulfide-selenide single crystals reflection coefficient polarimetric measurement, observing reflection peaks relationship to absorption spectral temperature dependence
19 p3391 A69-36607

Optical and thermal attenuation of current induced by low energy electron bombardment in CdS crystal
19 p3392 A69-36727

Injection and excitation of charge carriers in CdS single crystals, analyzing current-voltage characteristics dependence on electrode separation, temperatures and electric field
21 p3779 A69-38423

Transient current change with minor change in voltage with double injection of electrons and holes in CdS single crystals, obtaining time dependence
21 p3780 A69-38833

Changes in CdS crystals spontaneous and coherent emissions caused by electron beam radiation damage, determining intensity and spectral composition dependence
21 p3780 A69-39047

Electromechanical effect dependence on CdS semiconductor surface state, noting relationship between microhardness and discharge current
21 p3781 A69-39072

Radioactive decay and conductivity changes with time in high and low resistivity CdS single crystals after irradiation with 14 Mev and reactor fast neutrons
22 p3993 A69-40728

Performance degradation in cadmium sulfide solar cells, discussing cause identification technique, I-V curve parameter changes, etc
23 p4070 A69-42271

Optimal CdS single crystals growth from gaseous phase achieved with 2 to 1 ratio between Cd and S concentration
23 p4199 A69-42468

CADMIUM TELLURIDES

Acceptor defect levels in cadmium telluride crystals prepared under various cadmium vapor pressures, demonstrating ionization energy variation by electrical measurements
02 p0294 A69-11546

HgTe-CdTe single crystals homogeneity and Cd distribution obtained by Bridgman and/or zone melting studied for carrier concentration and electron mobility
09 p1557 A69-21737

Electrical resistivity of epitaxial CdTe films produced by vacuum sublimation on hot orienting mica and single crystal substrates
10 p1742 A69-23001

Current voltage characteristics of p-n junctions in cadmium telluride, discussing spectral sensitivity bands
10 p1744 A69-23212

IR absorption spectrum of Br-doped n-CdTe specimen, considering donor level transfer mechanism
12 p2142 A69-25979

Temperature effects on photosensitivity spectra of cadmium telluride thin films
13 p2318 A69-27889

Cadmium telluride laser characteristics including emission wavelength and electron beam threshold current density
13 p2272 A69-27896

Photovoltaic effects in cadmium mercury tellurides, considering band-gap variations, effective masses, mobilities, majority carrier concentration and pair lifetime
19 p3381 A69-35680

Electroabsorption oscillations in CdTe films compared with results of interband transitions theory
19 p3386 A69-36523

Superradiance and recombination radiation from CdTe with high compensation, using model assuming narrowing from superradiance onset for analysis
19 p3389 A69-36550

Hot electrons effect on Fe-doped CdTe optical absorption by measuring optical transmission vs photon wavelength at liquid helium temperatures
19 p3389 A69-36551

HgTe-CdTe single crystals homogeneity and Cd distribution obtained by Bridgman and/or zone melting studied for carrier concentration and electron mobility
20 p3584 A69-38215

HgCdTe as IR satellite detector for terrestrial, atmospheric and ocean mapping, IR astronomy and optical communication
24 p4362 A69-43666

Donor and acceptor impurity effect on absorption and reflection spectra of CdTe single crystals, analyzing In, Ga, S and Se
24 p4362 A69-43735

CALCIFICATION

Parasitic calcifications of soft parts in flight personnel studied radiologically, noting filariasis, bilharziasis and worms
09 p1446 A69-22729

CALCINATION

U ROASTING

CALCITE

Calcite crystals stability anisotropy to ruby laser radiation, studying threshold power as function of beam polarization
11 p1900 A69-25553

Calcite IR absorption dependence on pressure, discussing calcite-aragonite transformation
12 p2141 A69-25783

CALCIUM

Ionized calcium lines in spectra of light bridges of sunspots, observed by diffraction spectroscopy, indicating similarity to chromospheric flares
01 p0154 A69-10894

Red autoionizing lines relative gf values for calcium measured by shock tube experiment
09 p1601 A69-22208

Vegetable diet including 210 g of dry Chlorella biomass decreases effect on calcium and magnesium assimilation to produce insignificant negative balance of K and Mn
10 p1647 A69-23590

Two component calcium plage associated with proton flare of July 1966, describing initial development in old region periphery and component merging
10 p1763 A69-23729

Chromospheric heating and polarization in late stars, considering association with Ca II K line emission cores
13 p2340 A69-27579

Fine structure of absorption lines of circumstellar Ca ejected from Nova Delphini 1967, determining ejection dates and photospheric radius
13 p2346 A69-27709

Solar activity indices based on Ca flocculi, emphasizing index representing emission excess over chromospheric emission
14 p2525 A69-29722

Ca II forbidden lines in photospheric spectrum identified with weak Fraunhofer line by photoelectric spectrometer scans
14 p2528 A69-29962

Ca XV spectrum in vacuum UV under laboratory conditions, discussing fine structure of ground level of Ca XV and coronal lines
15 p2688 A69-30553

Center limb observations of Ca II emission core interpretations, discussing chromospheric thickness effects on Doppler width
16 p2854 A69-31653

Solar Ca chromospheric plage decay curves obtained from area measurements, showing similarity and exponential mean curve
16 p2859 A69-32222

Ca 2 resonance line profiles in large disk flares and in surrounding plage, discussing H and K line behavior
17 p3023 A69-33054

Intensity ratios effect of forbidden Fe and Ca transitions in solar corona on Fe/Ca ratio, noting cascading configurations
19 p3422 A69-36219

Absorption spectra from excited metastable states in tunable dye laser pumped atomic Ca, using fast flashlamp continuum
21 p3775 A69-39740

Temperature dependence of action potential, isometric tension development and relaxation rate of mammalian myocardium at low temperature, considering Ca ions role
23 p4092 A69-42060

CALCIUM CARBONATES
NT CALCITE
Amino acid composition of organic matrix in modern and fossil calcareous oolites
04 p0553 A69-14978

CALCIUM COMPOUNDS
U CALCITE
U FLUORITE
U PEROVSKITES
CALCIUM FLUORIDES
Emission spectrum of laser employing electron-vibrational transitions in samarium doped calcium difluoride crystal, noting spectrum shift with increasing crystal temperature
08 p1326 A69-20544

Specific level role in emission of optical radiation by ruby laser stimulated calcium fluoride crystals doped with divalent Dy ions
11 p1894 A69-24618

Ultrasonic paramagnetic resonance investigations of Pr ions ground state energy levels in calcium fluoride
24 p4360 A69-42790

CALCIUM ISOTOPES
Calcium isotopes tracer migration in caged rats in metabolism study
13 p2212 A69-28618

CALCIUM METABOLISM
Calcium isotopes tracer migration in caged rats in metabolism study
13 p2212 A69-28618

Calcium mobilization control by adequate calcium intake and programmed exercise during space flight suggested from metabolic balance data
15 p2557 A69-31468

Laser pulse effects on bones of rats, observing metabolic deviations in Ca 45 uptake
23 p4101 A69-41464

CALCIUM OXIDES
CaO and MgO reflectance spectra measurements at high resolution and at low temperature including exciton spectra at 25 K, obtaining fine structure
18 p3181 A69-34274

CALCIUM TUNGSTATES
Paramagnetic resonance of Er ion in calcium tungstate single crystal, determining spin-Hamiltonian parameters
04 p0643 A69-15141

Output characteristics of slowly Q switched neodymium in calcium tungstate laser
04 p0612 A69-15206

Pulsed solid state Nd doped calcium tungstate fundamental longitudinal modes selection by insertion of Fabry-Perot interferometers, lenses and diaphragms into resonator
11 p1894 A69-24471

Stimulated emission cross section measurement of Nd ions in calcium tungstate using Edwards method
11 p1938 A69-25049

Negative dispersion of light in neodymium activated calcium tungstate single crystal using neodymium glass laser source, analyzing interference bands in spectral diagrams
15 p2632 A69-30051

CALCULATION
U COMPUTATION

CALCULATORS
Three probe impedance meter with graphic arithmetical element designed to cover frequency range from 50-1000 MHz
[ONERA-TP-605] 05 p0764 A69-16590

Mechanical calculators for solving spherical triangle problem of navigation
07 p1135 A69-19207

Calculator for obtaining moments of inertia data to determine control power for vehicle orientation and to avoid control systems over design
[SAWE PAPER 792] 18 p3118 A69-34865

CALCULI
Renal calculus incidence among aircrews of long and short haul airlines, considering effects of dry cabin environment and dehydration
23 p4108 A69-41826

CALCULUS
U ASYMPTOTIC SERIES
U COLLINEARITY
U CONTINUITY [MATHEMATICS]
U COPLANARITY

CALCULUS OF VARIATIONS
Microstrip-like transmission lines analyzed by method based on line capacitance variational calculation and charge density distribution
01 p0044 A69-10625

Variational law of control elements for automatic control systems with parameters subject to random changes
01 p0052 A69-10800

Book on variational methods in optimum control theory covering necessary and sufficient conditions for extremum and functional constraints
01 p0053 A69-11107

Discrete time optimal control problems solved by second order variational algorithm, developing recurrence relations for perturbation equations
01 p0054 A69-11416

Variation method for optimal solution of antenna synthesis problem for given radiation pattern
02 p0217 A69-12260

Elastic stability equations solved in geometrical linearization for thin anisotropic plates under transverse shear, using variational method
03 p0525 A69-13130

Variational theorems on eigenvalues of Laplace finite difference operator with first order boundary conditions
03 p0457 A69-14230

Algorithm for numerical solution of variational problems for functions of two independent variables and boundary value problems using local variations method
04 p0622 A69-14616

Variational method applied to maximization of electronic efficiency of O-type TWT
04 p0577 A69-14791

Book on calculus of variations methods and applications covering extremum problems, elasticity theory, strain and stress, Rayleigh-Ritz method, etc
04 p0623 A69-14847

Book on boundary value problems of mathematical physics emphasizing solutions, Green functions, transforms and variational methods
04 p0625 A69-15233

Variational methods for nonequilibrium thermodynamic processes noting fluctuation theory introduction
04 p0551 A69-15314

Gyrotropically filled waveguides propagation parameters calculation by variational method
05 p0718 A69-15648

Functions satisfying mixed boundary conditions derived for boundary value problems involving regions of complex form
05 p0787 A69-16455

Variational coefficients for vertical and inclined meson telescopes, deriving primary cosmic rays anisotropy parameters from daily variations
06 p0924 A69-17293

Stable stationary positions for spacecraft determined by formulating variational equations for perturbing effects of earth triaxiality
06 p1006 A69-17565

Channel parameters, magnetic field level, electrical potential and channel output pressure for optimal integral characteristic of MHD system selected by variational method
06 p0969 A69-17917

Current load distribution for optimizing MHD generator efficiency determined by variational method, noting dependence on relative length
07 p1058 A69-19012

High density plasma dynamic stability in magnetic containment using variational calculations
08 p1359 A69-19984

Variational techniques for unstable problems including input determination in system with known impulse response and measured output
08 p1342 A69-20350

Time response of second order nonlinear overdamped systems calculated by Krylov-Bogoliubov method of variation of parameters
08 p1297 A69-20356

Ultimate state periodic analysis of nonlinear electric systems by approximation methods in calculus of variations, discussing functional concept
09 p1474 A69-22448

Nonlinear second order elliptic difference equations in associated variational problems, considering differentiable solution of Dirichlet problem
10 p1718 A69-22879

Ordinary and inverse variational methods for stress-strain state of solid body, using Lagrange multipliers to reduce variational problem
10 p1793 A69-22885

Variational method for necessary and sufficient conditions of terminal state invariance of dynamic control system
10 p1718 A69-23206

Thermal stresses for mixed boundary conditions calculated from combined use of integral transforms and variational techniques, reducing computational labor
10 p1801 A69-23429

Variational calculation of coefficients of viscosity, thermal conductivity, thermal diffusivity and diffusion in binary mixture
11 p1997 A69-24285

Variational equations for rotation of heavy solid body with fixed point about horizontal axis, noting mass distribution
11 p1917 A69-24778

Variational method for weak second order resonant interactions among waves with position and time varying amplitudes and phase angles
13 p2297 A69-27634

Book on calculus of variations and optimal control theory, discussing functional analysis for use in space science
13 p2289 A69-28054

Finite difference Newton-Raphson algorithm extension to solve variational equations for simultaneous optimization of trajectories and associated parameters [AIAA PAPER 68-115]
13 p2353 A69-28203

Variational difference method application to second order elliptic equations with inhomogeneous boundary conditions, applying results to boundary value problems in elasticity theory
13 p2289 A69-28318

Variational method for time invariant states of collisionless plasma in oscillating electromagnetic field
13 p2314 A69-28365

Bayes theory and nonclassical variation method to solve optimal energy distribution available for identifying weak signals in background noise
14 p2410 A69-28817

Singular and sliding modes/unique extremals/ in calculus of variations for optimal control problems with nonlinear equations and linear control
16 p2764 A69-31629

Low thrust trajectories for minimum time rendezvous between continuous thrust interceptor and passive target vehicle, comparing calculus of variations and steepest ascent analyses
16 p2857 A69-32177

Gyrotropically filled waveguides propagation parameters calculation by variational method
16 p2754 A69-32505

Eigenvalue conversion of second variation test for algebraic and differential constraints to Jacobi accessory minimum problem by introducing norm in coordinate perturbation space
19 p3400 A69-35672

Kalman filter based on calculus of variations, evaluating object trajectory during vertical atmospheric descent

19 p3307 A69-35794

Design laws of warping-free multicellular box beams under torsion or bending, using variational method

19 p3443 A69-36786

Algorithm for Chernousko local variation method during application to solution of variational problems involving nonadditive functionals, assessing convergence

20 p3513 A69-36990

Boundary value problem of wave propagation in three dimensional region of waveguide bounded by surface solved by variational method

20 p3487 A69-37078

Perturbation matrix derivation in rectangular coordinates using Sitarsky two body variational equation for all motions

20 p3568 A69-37200

Optimization for processes expressed in differential equations, stressing use of calculus of variations and limitation

21 p3795 A69-38400

Optimum form for hypersonic profile with minimum drag for given bending strength solved by variational method

21 p3644 A69-39099

Variational method for necessary and sufficient conditions of terminal state invariance of dynamic control system

21 p3756 A69-39147

Ray theory of radio propagation by two variation techniques of phase paths

21 p3675 A69-39279

Book on optimal aerodynamic shapes by means of variational method, covering conventional and triangular thick wing lift systems in supersonic flow

21 p3644 A69-39667

Variational problem involving winged flight vehicles ascending and descending flight optimal program determination, considering necessary extremal conditions

21 p3767 A69-39823

Euler equation in variational problems for optimized process described by ordinary differential equations, deriving final extremal relationship

21 p3829 A69-39825

Variational method using Hamilton principle and calculus of variations to determine elastic curve and internal forces in static or dynamic loaded beam

22 p4043 A69-40459

Book on fundamentals of dynamics of deformable bodies of increasing dynamic complexity, using calculus of variations

23 p4226 A69-41474

Variational formulation of nonlinear differential equations, treating vector fields in Hilbert spaces, finding relations useful in quantum mechanics

23 p4181 A69-41723

Convergence of Rayleigh-Ritz approximations for variational problem, considering functionals of scalar valued function

24 p4339 A69-42793

Triangular plate bending element using Herrmann variational method, deriving matrices for finite elements

24 p4404 A69-43591

Optimum climb trajectories at constant lift coefficient, using variational methods with final altitude and final flight path angle as end point constraints

24 p4254 A69-43727

CALIBRATING

NT WIND TUNNEL CALIBRATION

Laser cone calorimeters calibration to determine heat capacity

01 p0079 A69-10220

Calibration of pressure transducers in liquid hydrogen to liquid helium temperature range using cryogenic test equipment

01 p0080 A69-10300

Electrical conductivity standards and eddy current measurements noting calibration facility

01 p0081 A69-10830

Rapid scan spectrometer design and calibration, noting application to diagnostics of high density transient Xe and H plasmas

01 p0082 A69-10838

Scaled and translated composite curve technique for reducing calibration data for spectrograph film system response characteristics

01 p0082 A69-10839

Microwave radiometer with two reference temperatures, discussing overall stability of design, sensitivity and airborne design for operation in X band [DVL-895]

02 p0220 A69-12435

Calibration of coaxial line noise sources in terms of rectangular waveguide standard, discussing use of adapter for comparison

02 p0210 A69-12436

Microwave thermal noise standards, discussing construction, calibration and errors for field operational liquid nitrogen cooled waveguide noise standard

02 p0210 A69-12438

X band radiometer to minimize errors in calibration of microwave noise sources

02 p0220 A69-12440

Mismatched errors associated with Y factor power ratio measurement effect on microwave noise-temperature calibrations [JPL-TR-32-1345]

02 p0211 A69-12442

Radar cross section data interpretation, discussing calibration, unwanted signals, averaging, scattering matrix and power spectra

03 p0385 A69-12913

Laser interferometer gauges for machine tool accuracy, discussing operation, application, manufacture, cost and closed loop numerical control systems

04 p0606 A69-14880

Decibel scaling advantages in vibration measurements

04 p0602 A69-15324

Attenuation calibration of optical resonator using transparent plate coated by thin metal layer

04 p0613 A69-15415

Thin foil heat flux sensor for radiative and convective heating rates over wide range and dynamic response, noting error mechanisms, calibration and accuracy

04 p0602 A69-15426

Solar and terrestrial thermal radiometer absolute calibration noting standards and methods

04 p0602 A69-15429

Calibration procedures for cameras and photographs in photogrammetry, noting least squares method and tolerance criteria

06 p0925 A69-17469

High accuracy microwave phase standard for calibration laboratories, discussing broadband differential phase shifter

06 p0896 A69-17487

Shipboard direction finder calibration accuracy, emphasizing radio operator training

06 p0897 A69-17533

Multichannel radiometers calibration and testing for spacecraft and solar simulation applications, noting exposure to sun onboard X-15 aircraft at high altitudes

06 p0926 A69-17620

Calibrating long wave actinometric instruments designed for Soviet meteorological satellites

06 p0929 A69-17978

Calibration curve for constant temperature hot-wire anemometer, taking into account high wire temperature and gas pressure effects

06 p0930 A69-18218

Sun as calibration signal source for L and S band telemetry, discussing receiving system noise temperature determination and antenna gains

07 p1082 A69-19113

Onboard calibration system for gamma ray spectrometers and X ray detector in earth satellites, describing fabrication and test results for radioactive sources [IEEE PAPER 3A-6]

07 p1134 A69-19193

ONERA vertical bench for dynamometric calibration to 20 tons used for engine and rocket thrust measurement

07 p1116 A69-19217

Simulated solar EUV laboratory spectrophotometry used in preparing optical space flight experiments, discussing instrumentation and calibration

08 p1267 A69-19888

Small amplitude surface irregularities effect on backscattering properties of radar calibration metal sphere, using full wave boundary perturbation method

08 p1273 A69-20027

Pointing calibration of Haystack parabolic antenna by using radiometric measurements of cosmic ray sources

08 p1281 A69-20032

Stellar absolute magnitudes recalibration for consistency with photometric distance moduli of clusters

08 p1408 A69-21139

Photometric standard based on calibration of Vega by Hayes compared with six color magnitudes

09 p1603 A69-22233

Calibration for instrument systems including strain gages, piezoelectric, thermoelectric and thermoresistive transducers

10 p1691 A69-23229

Optimum calibration interval program for determining test equipment calibration frequencies on basis of mean time between failures and acceptable reliability levels

10 p1699 A69-23288

Skin friction measurement with rectangular mouthed Preston tubes of constant thickness ratio, analyzing calibration curves and difference from circular tubes

11 p1880 A69-24376

Laser beam for determining instrumental profile of high resolution double pass solar spectrograph, noting influence of slits width

11 p1893 A69-24431

Small microwave antenna calibration by method of two black bodies exposed to different temperatures, reducing influence of cloudiness and humidity

11 p1844 A69-24450

Radio sources optical positions for independent calibration sources

11 p1958 A69-24465

AM-FM calibration modulator for microwave oscillator noise measurement

11 p1856 A69-25631

Photometric standardization and calibration of meteor spectrograms for real meteor masses determination using spectroscensitometer

12 p2154 A69-25820

Calibration and accuracy check of measuring instruments at National Center of Space Studies in France, emphasizing reference instruments

12 p2080 A69-26123

Comparative calibration characteristics determination, discussing absolute measurements method for thermal conductivity parameters

12 p2091 A69-26363

Gallium arsenide thermometer calibration in 1 to 100 K range using interpolation formula derived from p-n junction diode equation

12 p2093 A69-26484

Construction and calibration of combined temperature and pressure probe for compressible flow

13 p2242 A69-28226

Transistors scatter matrix parameters determined, describing measuring bench calibration system

14 p2420 A69-29393

Output impedance measurements for accurate calibration in UHF region, using mobile discontinuity and bolometer for linear or nonlinear systems

14 p2422 A69-29583

Oxygen boiling point studied via calibration of capsule type platinum resistance thermometers

14 p2540 A69-29888

Calibration of interference measuring instruments, stressing input impedance calibration of field intensity meters

15 p2577 A69-30375

Photometric calibration correction for /B-V/ and /U-B/ colors taking into account hydrogen line blocking

15 p2694 A69-30786

Reciprocity method for absolute calibration of piezoelectric accelerometer mounted on electrodynamic shaker table

15 p2615 A69-31283

Dual channel waveguide insertion loss test set for calibrations at 90 GHz in radio astronomy and communication systems, using sprayed thermistor mount

16 p2760 A69-31945

Scintillation index determination, discussing data reduction methods, standard test records, calibration at stations with modest equipment and simulation on digital computer

16 p2751 A69-32105

Maintaining of flow similarity in calibration of nozzle type water meters for study of working processes of pumps

16 p2772 A69-32145

Radar calibration and precipitation measurements equation taking Gaussian approximation for antenna radiation pattern

16 p2806 A69-32264

Hot-wire anemometers calibration technique providing accurate and direct velocity measurements in slow moving liquids

17 p2971 A69-32901

Piezoelectric shaker consisting of combination of damped resonant cylindrical elements for wide frequency calibration of vibration pickups

17 p2975 A69-33665

Shock tube calibration for aerodynamic loading, determining flow parameters by observing particle

trajectories with high speed photography of smoke tracers

18 p3085 A69-34469

Automated analog scaling for in hybrid computer systems imposing magnitude and frequency constraints, using equations for amplifier input factors

18 p3105 A69-34617

Solar cells volt-ampere characteristics calibrated at various solar incidence angles on LES-6 satellite in synchronous orbit

19 p3254 A69-35712

Electrostatic probes calibration and use for hypersonic wakes behind projectiles in ballistic range

19 p3291 A69-35717

Small continuum electrostatic probes calibration and operation in ionized plasma flow with sheath dimensions larger than boundary layer dimensions

19 p3304 A69-35719

Transient calibrations for Ge surface thermocouple heat flux sensors used in hypervelocity impulse tunnel

19 p3292 A69-35725

Calibration of inertial and surface temperature heat transfer transducers for hotshot and shock tube measurements developed and tested at ONERA [ONERA-TP-683]

19 p3305 A69-35726

Transducer with single crystal Ge for high heat flux measurement, noting calibration by direct conduction

19 p3307 A69-35748

Radiometric measurement, discussing characteristics and calibration of instruments for measuring radiant intensity or radiance

19 p3311 A69-36071

FM radioaltimeter for Concorde aircraft, describing autocorrelation and automonitoring device, signal characteristics, reliability, etc

19 p3315 A69-36699

Near-polar circular orbiting satellite for calibrating and evaluating ground-based radars observing space objects

20 p3617 A69-37714

Tape recorder premission calibration requiring standard and external test instruments

20 p3546 A69-38233

Cosmic ray muons for calibrating dE/dx counter used in particle identification by determining cosmic particles distribution as function of energy losses due to ionization

21 p3724 A69-39075

Digital computers used in error calculation in calibration curves of turboengines and other pneumatic devices

21 p3724 A69-39100

Radar calibration techniques for accurate real time tracking data, describing GEOS-B C-band experiment [AIAA PAPER 69-872]

21 p3675 A69-39398

Light sources with uniform variable luminance field designed for calibrating cameras used in space exploration

21 p3726 A69-39580

Space vehicle data system synthesizer /SVDS/ for dynamic calibration of automatic control and checkout systems during prelaunch and countdown operations

21 p3680 A69-39633

Standardizing strain gage with long time stability characteristics, analyzing statistically strain calibration results

22 p3945 A69-40078

Magnetic field inhomogeneities effect on line contours and magnetographic measurements, constructing two stream models using Unno solution of transfer equations

22 p4019 A69-40288

Mariner Mars 1969 TV system environmental test and calibration program

22 p3920 A69-40372

Clark oxygen electrode calibration by preparation of oxygen standard aqueous solutions, noting repair by ammonium hydroxide treatment

23 p4101 A69-41451

Vacuum gage calibration standards and methods

23 p4162 A69-41530

High intensity electromagnetic fields generation equipment for calibrating field intensity monitors, discussing anechoic chamber, transmitting antenna, etc

24 p4312 A69-42577

Flotation technique for laboratory calibration of low level accelerometers, noting accuracy dependence on flotation fluid density stability [AIAA PAPER 68-874]

24 p4315 A69-43242

Aerodynamic frequency response calibration measurements of wind anemometer by input velocity and output drag values under unsteady flow conditions

24 p4315 A69-43262

Hot-wire anemometer calibration technique for measuring velocity of very slowly moving liquids [ASME PAPER 69-HT-A]

24 p4316 A69-43527

CALIFORNIA

Prokaryotic and eucaryotic nanofossils localized in prePaleozoic microflora, noting radiometric age and association with stromatolites

22 p3935 A69-40052

CALORIC REQUIREMENTS

Human performance and adaptation to space flight effects under low calorie diet including optimal proportion of basic nutrients and amino acids

20 p3482 A69-37621

Muscular strength dynamometric measurements in subjects during prolonged inactivity with restricted caloric and protein intake, showing decrease in strength

21 p3653 A69-38901

CALORIC STIMULI

Threshold variations in caloric nystagmus in pigeons subjected to accelerations in head to tail direction in centrifuge at various temperatures

20 p3471 A69-37252

Vestibular neurons activity in decerebrized cats under ipsilateral and contralateral labyrinth polarization combined with acoustic and caloric stimulation

20 p3471 A69-37254

CALORIMETERS

Continuous wave laser absolute power measurement by calorimeter consisting of wire wound in shape of cone

01 p0078 A69-10029

Laser cone calorimeters calibration to determine heat capacity

01 p0079 A69-10220

Internal temperature distributions of present and proposed calorimeter geometries operating at high pressure and extreme heating rates compared, using one and two dimensional heat conduction programs

01 p0079 A69-10299

Microcalorimetric measurement of radiation flux of flames of condensed burning material, noting surface temperature distribution

02 p0355 A69-12671

Twin differential calorimeter for measuring heat dissipation by wire specimen under fatigue tests, using semiconductor thermopiles

04 p0618 A69-15205

Fast response thin skinned calorimeters for high heat flux profiles of arc jet flows

04 p0602 A69-15427

Plane reaction cell unit for use in differential flux calorimeters and devices for differential enthalpy analysis

05 p0764 A69-16607

Vanadium monoxides and oxycarbides heat capacity using adiabatic calorimeter, calculating entropy, enthalpy and characteristic temperatures

09 p1523 A69-21739

Pyrotechnic activated calorimeter for reentry package design of vehicles entering earth atmosphere at lunar return velocities

10 p1669 A69-23026

Calorimeter for IR carbon-dioxide laser output power measurement, noting range calibration and accuracy

11 p1885 A69-24903

Photoelectric, calorimetric and photon-momentum methods for measuring laser output energy and power emphasizing liquid, wire and pyroelectric calorimeters

11 p1899 A69-25196

Boundary conditions for time dependent temperature variations of calorimeter operating in regular thermal regime

11 p2003 A69-25702

Velocity, enthalpy and mass flux radial distributions in laminar boundary layer from calorimetry of argon subsonic flow [ASME PAPER 68-HT-16]

13 p2374 A69-27776

Cosmic ray postinteraction nuclear active particle energy spectrum measurements with ionization calorimeter, noting energy underrating

13 p2331 A69-28392

Ionization calorimeter energy measurement systematic errors

13 p2331 A69-28394

Cell current and calorimetric measurements of electrical power and heat generation with heat pipe-thermionic converter

14 p2402 A69-29238

Calorimeter for CW laser output power absolute measurement, discussing operation principles, structural features, circuit and accuracy

15 p2608 A69-30320

Acoustic flow calorimeter for evaluating power transducers under loaded conditions

16 p2790 A69-32079

Solid W enthalpy from 2800 K to melting point measured with drop calorimeter, tabulating heat capacity, entropy and free energy function

17 p2987 A69-33075

Heats of solution of Au and Cu in dilute Au-Cu-Sn alloys determined using liquid metal solution calorimeter, calculating self interaction coefficients

17 p2987 A69-33077

Guarded disk type emissometer for hemispherical emittance measurements of sample materials in 88 to 420 K range based on steady state calorimetry [AIAA PAPER 69-600]

17 p2973 A69-33280

Flat wire grid calorimeter used as radiation sensor in measuring pulsed ruby laser

19 p3339 A69-36755

Calorimeters for laser energy measurement, discussing radiation damage avoidance and modifications for various modes

22 p3961 A69-40243

CALORIMETRY

U HEAT MEASUREMENT

CALUTRONS

U CYCLOTRONS

CAMBER

NT WING CAMBER

Numerical solutions of thick cambered jet flap in ground effect for flat plate and diamond shaped airfoil [AIAA PAPER 69-738]

18 p3083 A69-34404

CAMBERED WINGS

Inverse transformation method for plane subsonic flow extended to flow past cambered profiles at angle of attack, obtaining velocity distribution

19 p3240 A69-36473

CAMEL AIRCRAFT

U TU-104 AIRCRAFT

CAMERA SHUTTERS

Shutter drive circuits for image converter camera noting focusing, deflection system, applications in plasma research, etc

12 p2082 A69-26138

Meshless shutter tube with nine images double deflection capability, using deflectron and semiconducting plates assembly

12 p2083 A69-26144

Diode type image shutter tube with proximity focusing for high speed photography

12 p2083 A69-26145

RLC integrated low inductance circuit for magnetooptical high speed camera shutters, Q switched ruby laser and short light pulses in spark gap

12 p2084 A69-26149

Multiple lens high speed camera with mechanical shutter for investigating AC arc in circuit breaker during zero current, noting framing rate and capacity

12 p2085 A69-26159

Lens shutters durability, analyzing break-in, cock-and-release cycles and cause of failures

12 p2094 A69-26600

Lens shutter design, discussing exposure process automation, shutter speed range extension and exposure accuracy

12 p2094 A69-26601

High speed plate holder and shutter mechanisms for observing 20 May 1966 annular solar eclipse

15 p2686 A69-30534

Superwide angle camera with aerial photogrammetric lens system, discussing light distribution, rotary disk shutter, etc

22 p3944 A69-40047

CAMERA TUBES

NT IMAGE DISSECTOR TUBES

NT IMAGE ORTHICONS

NT VIDICONS

Tv transmission of two dimensional transparency hologram with reduced resolution requirements on camera tube, eliminating zero order terms

17 p2974 A69-33401

CAMERAS

NT BAKER-NUNN CAMERA

NT BALLISTIC CAMERAS

NT FRAMING CAMERAS

NT HIGH SPEED CAMERAS

NT LALLEMAND CAMERAS

NT SCHMIDT CAMERAS

NT STROBOSCOPIC CAMERAS

NT TELEVISION CAMERAS

X ray spectrographic camera for nondestructive spectrum analysis of small samples

03 p0427 A69-13101

Calibration procedures for cameras and photographs in photogrammetry, noting least squares method and tolerance criteria
06 p0925 A69-17469

IR camera determining surface temperatures, discussing construction and space applications
08 p1315 A69-20455

Design and operation of Polaroid camera for use with telescope, noting six exposures per negative
08 p1316 A69-20617

Aerial panoramic camera with instantaneous exposure using combined Bouwers concentric lens system and between lens shutter
09 p1499 A69-22246

Multiple pinhole camera for X ray astronomy, suggesting cross correlation image recovery technique based on Fourier convolution theorem
09 p1502 A69-22768

Hologram obtained by recording interference pattern displayed by ultrasonic camera, discussing real time viewing
10 p1696 A69-23550

Time registration delays during photographic observations of satellites, describing NAFA type satellite camera and mechanical and electrical systems
11 p1880 A69-24365

Observatory camera for satellite observation, discussing objective focusing and diameter and manual/automatic operation
12 p2092 A69-26450

Wobble-spin technique for spacecraft inversion for earth photography using flywheel
12 p2174 A69-26780

Vibrating camera for photographic measurement of flow velocities and trajectories of bodies marked by light spots
13 p2261 A69-27913

Satellite tracking cameras developed in East Germany, discussing optical systems
13 p2262 A69-27958

Photodielectric tape camera with optical images stored on tape in form of charge pattern
16 p2792 A69-32558

Mosaic mirror and lens camera system for multiple image high resolution photography
17 p2972 A69-33089

Gemini program for geologic orbital photography, discussing equipment used
18 p3131 A69-35274

Aerial camera AFA-TES-10, discussing mean square aiming error, photogrammetric distortion and contrast
18 p3139 A69-35328

Adaptor for Debye-Scherrer powder camera to take high quality photographs even at liquid N temperature
19 p3313 A69-36493

Wide view angle holocamera to produce 360 degree hologram in strips for simultaneous image reconstruction from single laser beam
20 p3536 A69-36932

X ray heliography by Fresnel-Soret type zoneplate camera to obtain solar photographs from rockets
20 p3544 A69-37803

Cameras photogrammetric parameters determined from stellar photographs, considering distortion components, reference points, etc
20 p3545 A69-38054

Auroral displays photographed by all-sky cameras at magnetically conjugate stations, morphological similarities and electron precipitation role
20 p3535 A69-38187

Extended source Fourier transform holography for single image synthesis of multiple identical images produced by multiple pinhole camera in X ray astronomy
22 p3943 A69-40019

Tethered polyethylene balloon carrying radio controlled camera for time lapse photographs of wave generated near shore currents
22 p3865 A69-40808

Photogrammetric camera system developed from NASA requirements to document lunar surface environment during manned space flight exploration
22 p3948 A69-40989

CANADA

Canadian upper atmosphere and space research programs organization, management and results
[UN PAPER 68-95551] 06 p1042 A69-17034

Canadian domestic satellite system requirements to extend existing terrestrial communications systems to improve coverage, capacity, flexibility and cost factors
06 p1043 A69-17832

Aircraft accident investigation procedures in Canada for routine/major accidents and public inquiries, outlining organization
13 p2201 A69-27540

Air Canada flight safety system including company philosophy, safety activities, incident and accident handling and information schemes
13 p2201 A69-27541

Canadian air cushion vehicle industry, considering materials, design, production, tests, components and quality control
13 p2381 A69-27544

Report on Canadian space activities to COSPAR covering scientific satellite program, high altitude sounding rocket program, space radio communications, international cooperative programs, etc
15 p2723 A69-31429

CANADAIK AIRCRAFT

U CL-84 AIRCRAFT

CANADAIK CF-104 AIRCRAFT

U F-104 AIRCRAFT

CANADAIK CL-84 AIRCRAFT

U CL-84 AIRCRAFT

CANALS

Martian canals nature based on high contrast photographs obtained by Mariner 4 space probe
12 p2171 A69-27133

Martian diagonal and longitudinal-meridional canals mapped into grid systems, noting differences between Martian and lunar crusts tectonic activity
13 p2337 A69-27533

CANCER

Cosmic radiation interactions with living viruses, considering X ray effects and optimal radiation dosage for cancer cell destruction
01 p0013 A69-10157

CANNONS

U GUNS [ORDNANCE]

CANNULAE

Oxygen saturation in outflowing and inflowing renal blood in dogs under normal and hypoxic conditions, assessing cannula technique
14 p2406 A69-28916

CANONICAL FORMS

Mach principle in scalar-tensor gravitation theory, discussing self energy calculations in canonical formalism for solitary neutral and charged point particles
01 p0120 A69-10858

Canonical equations for Lagrangian form of gravitational field equations in empty space
04 p0658 A69-14899

Canonical correlations used to analyze relations between values of geopotential field
05 p0789 A69-16637

Relativistic systems and relativistic Hamiltonian systems defined by second order equation, discussing canonical transformations conserving vector field Hamiltonian character
07 p1182 A69-19331

Canonical forms for second order elliptic systems with constant coefficients, studying Dirichlet problem solvability for systems reduced to canonical forms
07 p1174 A69-19476

Clebsch transformation application to equations describing viscous fluid, deducing canonical equations equivalent to Navier-Stokes equations
08 p1303 A69-20125

Canonical equations of planet satellite intermediate orbits using harmonics of gravitational potential
09 p1589 A69-21374

Canonical invariance of Hamiltonians noting nature of solutions of differential equations, existence of periodic solutions and application to three body problem
10 p1721 A69-23987

Canonical transformations of unsteady control system motion equations, simplifying control process study and controller simulation on analog computer
12 p2045 A69-25960

Canonical forms for observable and controllable linear time invariant systems by simultaneous transformations of system state and input and output vectors
12 p2048 A69-26075

Canonical representation of multivariable control system in state space using matrix of differential operators acting on vectors of input-output quantities
12 p2051 A69-26094

Rational transfer function matrix realization into irreducible Jordan canonical form state equation by nonsingular transformations
12 p2122 A69-26511

Thermodynamic equivalence of limit theorems for canonical and grand canonical ensembles, discussing Massieu-Planck function analog relation by Legendre transformation
12 p2191 A69-27148

Microwave filters for canonical realization of non-minimum phase transfer functions, combining magic-T or hybrid junction with ladder structure network
13 p2228 A69-27668

Canonical transformation and Hamilton-Jacobi theories applied to space vehicle trajectory analysis, discussing elliptical coast arc and optimal low thrust problems
13 p2353 A69-28202

Canonical correlations used to analyze relations between values of geopotential field
14 p2472 A69-28793

Autonomous canonical system with two degrees of freedom, determining equilibrium position stability in resonance case, calculating earth satellite rotational stability
14 p2482 A69-28813

Isolated symmetric doubly asymptotic solutions existence in neighborhood of symmetric periodic solutions of nonautonomous canonical system with one degree of freedom near resonance
17 p2996 A69-33619

Quasi-periodic solutions for canonical systems of differential equations in plane n-body problem
17 p3035 A69-33620

Canonical equations of planet satellite intermediate orbits using harmonics of gravitational potential
18 p3198 A69-34762

Moment and discrete ordinate methods in radiative transfer problems in planar, radiating and nonscattering media, noting conical transformation of moment equations
18 p3174 A69-35237

Canonical transformations depending on small parameter, utilizing Lie series
19 p3397 A69-35608

Canonical forms for three dimensional diffraction problem of elastic harmonic waves propagating along circular cylinders infinite array
19 p3437 A69-36144

Algorithm for determining multidimensional random process from canonical representation of current state, noting minimum rms prediction error
19 p3287 A69-36663

Sedov canonic equations for supersonic gas flow solved by applying Chaplygin function to determination of Riemann function for potential and stream function equations
21 p3643 A69-38637

Thermodynamic properties of hydrogen atoms, protons and electrons, using canonical group analysis to determine bound and free states
21 p3850 A69-38964

Optimal explicit method for parameters estimation not restricted to linear Gaussian problem derived in canonical form
[AIAA PAPER 69-947] 22 p3975 A69-40330

CANOPIES

Light interaction with stacked leaves and plant canopy, determining reflectance and transmittance
12 p2097 A69-26985

Aircraft canopy scratches effects on pilot visual discrimination
13 p2214 A69-28533

Shock force calculation for parachute of arbitrary canopy design, illustrating simplification permitting differential equation solution in closed form
15 p2551 A69-31172

CANT

U SLOPES

CANTILEVER BEAMS

Stress distribution in composite cantilever beams of three layers with end loading solved by closed form elasticity method
01 p0172 A69-11266

Point load subjected deflections of cantilevers and circular rings found using electronic analog computers
03 p0522 A69-12865

Natural frequencies and mode shapes of coupled bending vibrations of pretwisted rectangular cross sec-

CAMS

Program to study interactive graphic display console systems use for solving mechanical design problems involving plate cam and follower mechanisms
05 p0724 A69-16384

Minimum radius of three dimensional cam gears calculated from driven element motion and pressure angle
23 p4168 A69-41413

tion beams determined by Rayleigh-Ritz energy method

03 p0529 A69-13989

Multidegree of freedom systems for modeling optimum design of cantilever and simply supported beams for sudden loading

04 p0674 A69-14590

Thermally induced vibration and flutter of flexible spacecraft boom, discussing stability by considering boom as cantilever beam
[AIAA PAPER 69-21]

06 p0869 A69-18144

Root fixture and grip load effects on cantilever beam damping, using bandwidth and logarithmic decrement measurement methods

10 p1800 A69-23244

Warping rigidity effect on stability of cantilever bar under eccentric follower end load, discussing bending torsional flutter and buckling

12 p2179 A69-26212

Cantilever beam profile optimization methods using iterative analog computation to achieve minimum deflection, showing application of Pontryagin maximum principle

15 p2709 A69-30671

Transient behavior of finite damped cantilever beam and circular plate analyzed by direct finite element method, noting applicability to dynamic problems

15 p2710 A69-30868

Transverse free vibration of slender cantilever subjected to compressive follower force

16 p2871 A69-31899

Stresses and displacements in elastoplastic cantilever beams and beams fastened at both ends calculated by stress-strain diagrams of material

17 p3056 A69-33191

Test facility to determine factors influencing aerodynamic energy dissipation of cantilever rods oscillating in airstream

17 p2947 A69-33928

Vibration modes and damping of rectangular cantilevered prismatic steel rods, showing effects of transverse vibration, material and stress on logarithmic decrement

17 p3065 A69-33936

Thin walled cantilevered fiberglass reinforced shafts damping characteristics dependence on natural vibration modes and fibers orientation

17 p3065 A69-33938

Transverse and torsional vibration characteristics of tapered cantilever beams and shafts analyzed by lumped inertia force method

17 p3066 A69-34052

Vibration properties of cantilever parallelogram box beam, using existing static deformation equations under large aspect ratio condition

21 p3846 A69-39803

Young modulus for wire or strip shaped specimens determined from unloaded cantilever vibration considerations

22 p4042 A69-40443

Inflation effect on circular cylindrical cantilever beam subsequent response to bending loads, using theory of small deformations superimposed on large deformations

23 p4227 A69-41881

CANTILEVER MEMBERS

Stress distribution and spring rates in cantilever cone ring combination
[ASME PAPER 68-WA/DE-3]

05 p0839 A69-16168

Cantilever blades tangential vibrations effect on damping characteristics measured by free vibration excitation and static hysteresis loop

17 p3065 A69-33935

Cantilever truncated conical shell stability under tensile stresses solved by strain energy technique

18 p3216 A69-34574

Stress-strain state calculations of ribs reinforcing cantilever shell under external pressure, using differential-difference equations

18 p3223 A69-34980

CANTILEVER PLATES

Rib positioning effect on mechanical behavior of cantilevered rectangular plate in gas flow, considering critical flow velocities and rigidity relationships

01 p0165 A69-10085

Thin cantilevered plate theory extended to large in-extensional deflections to account for geometry changes in bending moments
[ASME PAPER 68-APM/BB]

04 p0670 A69-14401

Rotating twisted blades vibrations, deriving equations and vibration tests with models

09 p1618 A69-22236

Equations for bending of elastic cantilever plate with parallelogram shape in oblique angle coordinate system, constructing functions satisfying Poisson conditions at contour

15 p2710 A69-30861

Acroelastic divergence and stability range for cantilevered and end supported structures computed as function of forward resistance and lift caused by wind

16 p2870 A69-31557

Moire reflection technique applied to study of stress-strain state of partially clamped rectangular cantilever plates under various loads

17 p3058 A69-33203

Swept cantilever thin elastic plates bending analyzed by power series representing deflection in oblique coordinate system

20 p3621 A69-37207

CANTILEVER WINGS

U WINGS

CAPACITANCE

Capacitance variation in junction varactors with linear graded, abrupt and hyperabrupt junctions, storage switching diodes and storage varactors

01 p0038 A69-10168

Microstrip-like transmission lines analyzed by method based on line capacitance variational calculation and charge density distribution

01 p0044 A69-10625

Capacitance-voltage relationships for PETN initiation by various diameter gold exploding bridgewires, noting optimum capacitance dependence on energy transfer efficiency

01 p0141 A69-10679

Germanium tunnel diode capacitance as function of bias voltage and HF signal magnitude, considering circuit design

02 p0214 A69-11614

Frequency conversion in sheath capacitance of glow discharge plasma contained within metallic coaxial cylinders

04 p0634 A69-14456

Stability limits of regenerative echo amplifier during simultaneous variation of network capacitance and negative resistance

04 p0577 A69-14778

Cathode ray curve tracer to record capacitance-voltage characteristics of p-n junctions

04 p0602 A69-15406

Diffusion capacitance of p-n junctions, short base semiconductor diodes and p-n-p transistor, discussing systematic error in quasi-steady state calculation

04 p0580 A69-15489

Pulse radiation effect on dielectric constant of sintered CdS photoresistors, discussing capacitance dependence on intensity, type and frequency of light

05 p0806 A69-15694

Equivalent capacitance derivation of space charge limited current from filamentary cathode

05 p0734 A69-16567

Voltage dependence of depletion layer width, maximum electric field and capacitance of Gaussian diffused plane, cylindrical and spherical p-n junctions

07 p1196 A69-18242

Barrier capacitance of semiconductor diodes for exact temperature measurement, discussing application to temperature to frequency converters

07 p1100 A69-18556

Differential capacity of Li doped zinc oxide single crystals between vapor deposited asymmetrical In electrode contacts

08 p1371 A69-19883

Capacitance and effective height for VLF umbrella antennas using multiple wire structural members to increase effective antenna surface area

08 p1282 A69-20041

High Q capacitance loaded coaxial cavity resonator for study of electric susceptibility of ionized gas

08 p1313 A69-20214

Capacitance and lowest eigenvalue bounds for two dimensional anisotropic media as exemplified by transverse vibrations of stretched membrane

08 p1418 A69-20848

Rechargeable nickel cadmium batteries state of charge determination by monitoring capacitance

09 p1435 A69-21425

Selenium diffusion in indium antimonide, determining concentration gradients in junction space charge region by capacitance method

09 p1554 A69-21469

Differential capacitance of n-n heterojunction calculated by metal semiconductor contact method

09 p1555 A69-21476

Capacitance methods for measuring adhesives mechanical properties in thin film bonded joints, noting results for tension, compression and shear loading

09 p1500 A69-22309

Germanium tunnel diode capacitance as function of bias voltage and HF signal magnitude, considering circuit design

11 p1847 A69-24722

Capacitance pressure transducer capable of detecting pressure changes equivalent to 0.2 mm water

11 p1885 A69-24902

Dynamometer based on electrical capacitance change in sensor element, discussing working range, circuit diagram and mechanical design

11 p1887 A69-25207

Differential capacitance, diffusion voltage and exponent alpha of hyperabrupt junction varactor

12 p2039 A69-26375

Barrier capacitance measurement in mm wavelength parametric and multiplication diodes eliminating socket capacitance influence, describing oscilloscope and indicator methods

12 p2043 A69-26885

Tunnel diode nonlinear p-n junction capacitance influence on characteristics of diode microwave self excited oscillator

12 p2043 A69-26889

Discontinuity capacitance of coaxial line terminated in circular waveguide calculated using Rayleigh-Ritz variational technique

14 p2423 A69-29754

Capacitive parametric modulator transient processes and second harmonic effect analysis, obtaining transient response and recovery time

15 p2574 A69-30125

Frequency response of MIS capacitance beyond inversion voltage, discussing recombination rate and generation-recombination current in space charge region

15 p2565 A69-30179

Selenium diffusion in indium antimonide, determining concentration gradients in junction space charge region by capacitance method

15 p2669 A69-30714

Differential capacitance of n-n heterojunction calculated by metal semiconductor contact method

15 p2669 A69-30721

High temperature capacitance strain gage development, discussing extensometer prototype systems

15 p2614 A69-31278

Controlled electric field capacitance probes for non-destructive testing, discussing field projection pattern and direction effective depth of field, applications, etc

15 p2616 A69-31503

Two donor levels and conduction properties of n-type semiconductors demonstrated by capacitance measurements of single crystal tungsten oxide in presence of electrolyte

16 p2825 A69-31609

Lock-on band of phase locked AFC system calculated by asymptotic method, considering frequency integrating filters with nonlinear capacitances

19 p3277 A69-36569

Metal insulator semiconductor volt-capacitance changes due to light flux, introducing surface recombination rate to improve model

20 p3585 A69-38273

GaAs-GaP heterojunctions, analyzing continuous conduction band, capacitance and current-voltage characteristics, photoresponse and modulation effect

21 p3779 A69-38424

Differential capacitance transducer measuring small displacements in heated transformer oil, air, castor oil or glycerin

22 p3946 A69-40439

Time varying resistance wire to arrest oscillations in pulsed capacitor discharge circuit, deriving over, under and critical damping conditions

22 p3917 A69-41228

Capacitance sensor of vertical with flexible mobile electrode, describing diagram and operation

23 p4163 A69-41550

Capacitive coupling vs DC coupling between data input and transmitter exciter in FM telemetry system, based on pulse series Fourier analysis

23 p4119 A69-41744

CAPACITANCE SWITCHES

RLC integrated low inductance circuit for magneto-optical high speed camera shutters, Q switched ruby laser and short light pulses in spark gap

12 p2084 A69-26149

Erosion of contacts under capacitive loads noting cable length, arc duration and battery voltage

13 p2269 A69-28608

Waveguide capacitive screw tuners effects on dissipative loss, discussing microwave measurements with copper screw tuners

16 p2757 A69-31586

CAPACITORS

Megagauss magnetic field generation methods, discussing high explosives, initial field, flux compression, capacitor discharges and applications

01 p0115 A69-10049

Electromagnetic forming principles and applications describing large capacitor bank facility design for multipurpose research
[ASTME PAPER MR68-418]

02 p0252 A69-11798

Active and reactive impedance components of plane capacitor immersed in plasma and at LF noting dependence on plasma conductivity

03 p0477 A69-13713

Space charge layer thickness determination in plasma filled capacitor by capacitance measurement, noting thickness dependence on plasma potential

03 p0477 A69-13714

Automatic device for charging storage capacitors in plasma devices provides voltage and operational frequency control

04 p0580 A69-14493

High temperature capacitor consisting of thin wafers of pyrolytic boron nitride noting fabrication, dissipation factor and capacitance

04 p0551 A69-15299

Fluctuation voltage mean square value at polar dielectric capacitor terminals determined by applying stochastic properties of Poisson point processes to statistical model

08 p1295 A69-21151

Accelerated reliability tests of electronic capacitors using voltage as main forcing factor, establishing correlations between lifetimes in accelerated and long term tests

09 p1464 A69-22244

Surface charge exchange in metal oxide silicon capacitors generated at low temperatures by surface state free carrier trapping

10 p1744 A69-23179

Type 2 ceramic capacitor manufacture, selection and control in Concerto space program

11 p1853 A69-25393

Microwave harmonic generation in plasma capacitor, considering power resonances dependence on electron temperature and density

12 p2037 A69-25939

Inhomogeneous and anisotropic cold plasma filled plane capacitor resonance in steady magnetic field applied to plasma diagnostics, using calculus of variations

13 p2304 A69-27240

Prebreakdown and breakdown electrical properties of thin film capacitors with certain oxides, fluorides and Teflon dielectrics

13 p2322 A69-28012

Solid electrolyte tantalum condensers reliability under repeated service voltage applications for calculating defective condenser probability

15 p2626 A69-30836

Ceramic condensers with very high reliability mass produced for Concerto program, describing component characteristics and production methods

15 p2627 A69-30844

Prebreakdown and breakdown electrical properties and light emission during destructive breakdown in thin film capacitors

16 p2761 A69-32323

Surface state density determination as function of surface potential in MIS capacitors, discussing MIS capacitance method theory and computer programs

16 p2827 A69-32556

Capacitor discharge stud welding on Ti alloys, discussing weld zone microstructure, arc and mechanical properties

18 p3151 A69-35431

Electric dose variometer principles, emphasizing differential pressure meter, differential capacitor and capacitor meter

24 p4315 A69-43143

CAPE KENNEDY LAUNCH COMPLEX

Apollo/Saturn 5 base at Kennedy Space Center and facilities and equipment supporting manned lunar mission, discussing site location choice and launch complex design concept

16 p2767 A69-32429

Thunderstorm probabilities at Cape Kennedy, giving data on frequency, duration, multiple occurrence, nonoccurrence, runs and conditional probabilities

18 p3167 A69-35100

Kennedy Space Center Vehicle Assembly Building construction, capacity and operation for manned spacecraft

19 p3288 A69-35500

Crawler-Transporter at Kennedy Space Center for moving ground support equipment, Apollo/Saturn space vehicle and mobile launcher, describing design and components

21 p3690 A69-38754

Cape Kennedy space research and national priorities, indicating performance and progress of future space operations

[AAS PAPER 69-110] 24 p4419 A69-42879

Cape Kennedy Space Center mobile launchers and auxiliary equipment for Saturn vehicles, discussing functions, design and systems

24 p4297 A69-43036

CAPILLARIES [ANATOMY]

Intrarenal capillary hydrostatic pressure effect on hemodynamically induced changes in sodium excretion

07 p1063 A69-18629

Pulmonary capillary gas exchange and venous admixture model and inclusion into respiratory system model, discussing pressure and concentration gradients, pathological effects, etc

07 p1068 A69-19482

Static pressure-diameter measurements on small pulmonary blood vessels of frogs, analyzing capillary septal area as function of intravascular pressures noting high compliance

22 p3885 A69-40974

Cerebral and retinal capillary permeability to ions in rats analyzed by electron microscope using Prussian blue reaction

23 p4081 A69-41433

CAPILLARY FLOW

Thermal diffusion coefficient and composition of gas mixtures by measuring gas flow rate in capillary tube as function of viscosity

04 p0688 A69-15410

Fluid support by capillary forces, fluid support by pressure with surface tension stabilization and capillary gas barriers for long life missions

[AIAA PAPER 68-465] 04 p0646 A69-15505

Theory of capillary flow for fluidic resistor design

05 p0705 A69-16011

Rarefied gases back diffusion between parallel plates used for studying diffusion in capillaries, deriving volume flow equation valid for any density

10 p1677 A69-22903

Load capacity, stiffness and flow requirement of capillary and orifice compensated oil lubricated externally pressurized rectangular thrust bearings

12 p2102 A69-26239

Limiting heat power transported by sodium heat pipes dependent on capillary network geometry, inclination angle and operating temperature

14 p2538 A69-29205

Liquid-vapor interaction in loop plates with different heat pipe capillary geometries using water as heat transporting medium

14 p2539 A69-29207

Capillary barriers to provide propellant positioning, expulsion capability and slosh dampening for spacecraft propulsion systems during rotational maneuvers

[AIAA PAPER 69-529] 16 p2868 A69-32713

Surface tension gradients caused thermocapillary convection solved for spherical fluid film under weightlessness conditions

19 p3452 A69-36392

Digital computer program for determining aveolar and capillary blood gas compositions corresponding to ventilation-perfusion values, considering dissolved oxygen and inert gas exchange

22 p3875 A69-40230

Alveolar and mixed venous carbon dioxide pressure during absence of gas exchange across mammalian lung

22 p3885 A69-40976

Pulmonary capillary blood flow pulse of healthy men in supine position recorded by nitrous oxide/plethysmograph and phonocardiogram

24 p4259 A69-42638

CAPILLARY TUBES

Capillary arc source spectroscopy, determining plasma temperature and pressure dependence on capillary geometry and discharge current

02 p0286 A69-11573

Transient electro-osmosis of water in capillary tubes for pumping and generation modes, analyzing response to step change in pressure or voltage change under external loading

04 p0555 A69-14862

Simulated solar radiation heating of cesium vapor thermionic converters with multicapillary transmitters

07 p1058 A69-18951

Argon discharges in metal capillary cathodes noting effects of electron density, flow velocity, electrode phenomena and gas temperature

10 p1733 A69-23450

Diffusion equation unsteady solution for flasks of equal volumes connected by capillary, considering end effect and transient processes

13 p2251 A69-28561

Dimensionless approach to maximum flow in heat pipes and optimization of capillary structure

14 p2539 A69-29206

CAPILLARY WAVES

U BAROCLINIC WAVES

U GRAVITY WAVES

CAPSULES

Explosive containment capsule for nuclear reactor irradiation

04 p0629 A69-14480

Aluminum capsule used in test reactor to irradiate explosive and propellant samples, determining radiation effects

17 p3004 A69-32945

CAPSULES [SPACECRAFT]

U SPACE CAPSULES

CAPTIVE TESTS

U STATIC FIRING

CAPTURE CROSS SECTIONS

U ABSORPTION CROSS SECTIONS

CAPTURE EFFECT

Phonon capture by electrons in semiconductors with high permittivity in external electric field

03 p0489 A69-13891

Gradual capture in p-n junctions and p-n-p transistors at AC voltage, noting diffusion capacitance and resistance

03 p0491 A69-14051

Capture of comets by large planets

03 p0517 A69-14128

Capture of electrically charged micrometeorites and corpuscles in magnetic field of gravitating dipole, noting necessary condition on particle motion

04 p0659 A69-14962

Dark and photocurrent volt-ampere characteristics induced by capture of carriers injected into illuminated CdS single crystals

09 p1555 A69-21506

Satellite altitude stabilization by gravity gradient capture in earth elliptical orbit, showing effect of increase in damping

10 p1791 A69-22926

Phonon capture by electrons in semiconductors with high permittivity in external electric field

11 p1939 A69-25692

Capture centers effect on current-voltage characteristic of p-i-n diodes during injection, noting negative resistance appearance

13 p2236 A69-28525

Minimum time single axis capture of satellite spinning about pitch axis by low thrust jets, considering gravity gradient phenomenon

17 p3048 A69-33237

Resonances and doublets observation by neutron radiative capture and transmission of W and Zr isotopes in kev region, noting partial wave strength functions

18 p3175 A69-34314

Capture of electrically charged micrometeorites and corpuscles in magnetic field of gravitating dipole, noting necessary condition on particle motion

18 p3197 A69-34725

Group cross section generating techniques to calculate neutron capture rates and spatial capture distribution in depleted thick U slab, using GAROL program

18 p3177 A69-35179

Solar neutrinos capture rate estimation by using Li 7 as detector

20 p3588 A69-37420

Moon possible origin, discussing spin off from earth, accretion from same dust cloud or formed elsewhere and captured

20 p3603 A69-37559

Direct flight and Jupiter swingby heliocentric trajectory modes of elliptic capture orbits compared for unmanned missions to outer planets

[AAS PAPER 68-105] 21 p3805 A69-39221

Capture and gravity gradient stabilization of LIDOS satellite in eccentric orbit

[AIAA PAPER 69-921] 21 p3821 A69-39351

- Lepton nonconservation implications for experiments involving solar neutrinos, showing effect on capture rate at earth for pep neutrinos
23 p4194 A69-41596
- Cross sections of charge carrier capture by ions in gamma irradiated P-Al-Si glass with metal oxides additions measured for evaluating radiation stability improvement

- High strength carbon fibers development and applications in reinforced composite materials and aerospace industry
06 p0947 A69-18236
- Carbon influence on cast Waspaloy, discussing chemical segregation, chemical gradients and tensile ductility
07 p1158 A69-18307
- C III 2p super 2 presuper 1 D level mean life measurement using beam-foil technique, noting corresponding Einstein A coefficient
07 p1184 A69-18643
- Electron impact induced fragmentation of ring D in steroids involving loss of carbon atoms analyzed by mass spectrometry
07 p1069 A69-19497
- High modulus and high strength carbon fibers and composites, discussing mechanical properties and interlaminar shear strength
08 p1338 A69-20488
- Laser beam diffraction method for measurement of apparent filament diameters, emphasizing high modulus carbon filaments
08 p1316 A69-20499
- Laminates and filament wound structures using carbon fibers with silicon carbide whiskerized surfaces, noting compositing and laminating techniques
08 p1339 A69-20501
- Shop-ready high modulus carbon and fiberglass composite reinforcement system, stressing effect of modulus fibers amount in laminate
08 p1340 A69-20508
- Mechanical properties of ceramic material consisting of pure silica matrix reinforced by carbon fibers
08 p1341 A69-20700
- Stigmatic profiles of solar C II doublet resonance lines obtained by rocket-borne echelle spectrograph
09 p1592 A69-21456
- Carbon rich star models with and without neutrinos, considering carbon burning, central stars of planetary nebulas and hot white dwarfs
09 p1606 A69-22419
- Stress graphitizing and boron codeposition effect on dynamic mechanical properties of pyrolytic carbon, noting increase in internal friction and dynamic modulus
10 p1716 A69-23036
- Differential energy losses of fission fragments in thin carbon films as function of mass and initial energy mapped by time of flight method
10 p1694 A69-23348
- Surface density of carbon foils measured accurately by determining trapped carbon dioxide pressure after burning in pure oxygen
10 p1746 A69-23663
- Free carbon content by weight in titanium, zirconium and hafnium carbides
10 p1714 A69-23846
- Diffusion coefficients of carbon in tantalum, niobium and vanadium by sectioning method, using carbon 14 as tracer
11 p1906 A69-25575
- Dynamic response of distended carbon materials to shock loading defined by measuring equation of state, unloading behavior and spallation strength
12 p2119 A69-26847
- Dielectronic recombination influence on radio recombination lines of carbon under typical nebular conditions
13 p2346 A69-27703
- Composition dependence of carbon activity and carbon diffusivity in austenite
13 p2279 A69-27763
- Wilson chamber and ionization calorimeter determination of cosmic ray particle-carbon nuclei interaction energy characteristics
13 p2330 A69-28379
- Nuclear interactions between high energy nuclear active particles and C nuclei, studying electron-photon component energy with nuclear photoemulsions
13 p2331 A69-28388
- Activated carbons and ion exchange resins bactericidal action as function of silver coating techniques
13 p2216 A69-28621
- Transition probabilities for radiative lifetime of Swan and Mulliken diatomic C bands calculated from lifetime data using Franck-Condon factors
15 p2694 A69-30789
- Carbon atoms presence in Venus upper atmosphere from Venus spectrum obtained by Aerobee rocket experiment
15 p2698 A69-31341
- Carbon fiber reinforced plastics properties improvement by applying organosilanes, discussing silanol bond formation
16 p2803 A69-31806

Carbon stars in south galactic pole region detected in objective prism survey, including variable R Scl and early R stars

16 p2860 A69-32232

Carbon fibers fine structure graphitized at high temperatures studied by X ray diffraction and electron microscopy

16 p2803 A69-32572

Carbon fiber reinforced plastics development for aerospace use, presenting criteria for resins selection

17 p2992 A69-33647

Fiber reinforced carbon and graphite with application to reentry and propulsion systems and high temperature gas turbines, noting three dimensional woven quartz

19 p3354 A69-35519

Hollow thin walled carbon spheres developed as filler material for resins in low weight high temperature applications

19 p3355 A69-35522

High temperature materials for aerospace and spacecraft applications, considering carbon/carbon composites, oxides, carbides, fibers and ablative systems

19 p3346 A69-36320

C and O atoms chemisorption on Mo surface demonstrated by surface striation

20 p3562 A69-37782

Composite materials application in aerospace industry, discussing boron and carbon filament properties, epoxy resins, etc

20 p3563 A69-37930

C content and microstructure effect on electrochemical parameters of Fe and steels in dilute sulfuric acid, discussing Tafel constants and current density

20 p3563 A69-38002

Elements nucleosynthesis during thermonuclear burning of carbon at series of temperatures and for several initial compositions

20 p3612 A69-38163

Carbon fiber reinforced plastics application to aircraft metal components for weight reduction, low cost and high mechanical properties

21 p3750 A69-38428

Carbon fiber reinforced materials applications in aerospace industry, discussing long term potential and applications in F-5 aircraft

21 p3732 A69-38989

B composite materials in helicopter development, including B and C filament production and B filament applications

22 p3971 A69-40899

High temperature pyrolysis of simple organic molecules in shock tube, considering diatomic C formation and decay rate

23 p4113 A69-41693

Carbon materials manufacture, properties and applications in space technology, discussing carbon fibers, textiles, graphite, pyrolytic carbon, composites and vitreous carbon

23 p4180 A69-42160

Gas concentration liberated during each revolution in atmospheres of short period comets to explain impulsive forces upon nuclei, noting diatomic carbon density

23 p4221 A69-42387

Carbon fiber reinforced plastic components aerospace applications, discussing honeycomb sandwich satellite structure for investigating lamination methods, shapes, bonding and machining

24 p4336 A69-43209

Carbon fibers and resin composites used as rocket motor systems ablative liners and structures, noting role in motor weight reduction

24 p4336 A69-43210

Teflon dielectric properties evaluated during fast laser beam heating, noting presence of C by microwave measurement

24 p4336 A69-43266

Composite-to-metal joints design and fabrication, using carbon yarn in epoxy matrix for missile interstage application

24 p4323 A69-43426

High modulus carbon filament composite structural elements for missile interstage application, showing weight savings

24 p4325 A69-43444

High performance void free carbon fiber laminates preparation using polyimide resins, describing flexural strengths, moduli and interlaminar shear strengths

24 p4325 A69-43445

CARBON ARCS

Excitation heating energy pumping mechanism for explaining dynamic equilibrium in C rich arc plasmas with high ion temperature/electron temperature ratio

01 p0126 A69-10276

Polyesters reaction with dimethyl p-phenylene diamine compared under UV exposure from carbon arc and natural sunlight

10 p1716 A69-23978

CARBON COMPOUNDS

NT BORON CARBIDES
NT CALCITE
NT CALCIUM CARBONATES
NT CARBIDES
NT CARBONATES
NT CHROMIUM CARBIDES
NT DOLOMITE (MINERAL)
NT HAFNIUM CARBIDES
NT MOLYBDENUM CARBIDES
NT NIOBIUM CARBIDES
NT POLYCARBONATES
NT SILICON CARBIDES
NT SODIUM CARBONATES
NT TANTALUM CARBIDES
NT TITANIUM CARBIDES
NT TUNGSTEN CARBIDES
NT VANADIUM CARBIDES
NT ZIRCONIUM CARBIDES

Book on genesis and evolutionary development of life covering carbon compounds, protobionts and evolutionary biochemical investigations of present living organisms

12 p2019 A69-26300

Carbon diffusion parameters in alloys of Nb with Ti, Zr, W and Mo, using radioactive carbon 14

18 p3157 A69-35250

Relative gas phase acidities of carbon acids determined using ion cyclotron resonance spectroscopy

19 p3265 A69-36291

Carbon trioxide formation during ozone photolysis in liquid carbon dioxide and sulfur hexafluoride, noting ozone disappearance quantum yield independence of oxygen/ozone ratio

23 p4112 A69-41338

CARBON DIOXIDE

Carbon dioxide laser stabilization using laser profile and three mirror system

01 p0089 A69-10183

Carbon dioxide laser pulsed mode for generating giant pulses, noting applications and electron impact role

01 p0090 A69-10787

Drilling and welding with sealed-off continuous carbon dioxide gas laser with outcoming beam collimated by Ge lens

01 p0086 A69-10821

Carbon dioxide spectral line broadening and self broadening coefficients, using carbon dioxide laser radiant energy

01 p0091 A69-10844

Spectral transmission for water vapor and carbon dioxide bands

02 p0236 A69-11451

Carbon dioxide ionization by Q switched laser beam, using proportional counter

02 p0255 A69-11702

Model spectra applied to carbon dioxide bands in Venus spectrophotometric measurements

02 p0319 A69-12107

Two dimensional diffuse shock waves in carbon dioxide, noting effect of shock curvature equivalence to thickness

02 p0233 A69-12534

Gas phase photolysis of carbon dioxide in far UV, searching for carbon trioxide

03 p0381 A69-13318

Dog adaptation to 60 or 90 mm Hg carbon dioxide in 260 mm Hg total pressure environment, noting arterial pH and bicarbonate level

03 p0375 A69-14071

Emission amplification coefficients of gas laser using pure carbon dioxide, carbon dioxide/air mixtures and carbon dioxide/air/helium mixtures

04 p0611 A69-14426

Electron radiation temperature measurement in carbon dioxide laser with N and He additions by microwave technique, noting average electron energy and optical gain

04 p0611 A69-14445

Carbon dioxide laser noting output for added gases, efficiency, energy levels, excitation mechanism and tuning to single line and mode

04 p0612 A69-15173

Natural convection heat transfer through enclosed horizontal layer of supercritical carbon dioxide, discussing flat plate configuration data

04 p0688 A69-15398

Water and carbon dioxide IR spectra compared with laboratory measurements

05 p0759 A69-16638

Vibrational excitation by electron impact in kinetic energy range 30-60 ev studied for water vapor and carbon dioxide, determining intensities relative to elastic scattering

06 p0960 A69-17108

Coupled cavity carbon dioxide laser interferometer with feedback for measurement of transient plasma density in theta pinch, noting sensitivity

06 p0935 A69-17706

Recombination mechanism between CO and O produced by photodissociation of carbon dioxide in upper atmosphere of Venus and Mars

07 p1214 A69-18615

Thermal disturbance radiative decay time in carbon dioxide at low pressures and for nonzero vibrational relaxation times

07 p1215 A69-18843

Competition effects between rotational levels of carbon dioxide rotation-vibration band in traveling and standing wave lasers

07 p1151 A69-19055

Nonsaturated gain of laser radiation in gas discharge in carbon dioxide with N and He

07 p1151 A69-19060

Gain enhancement effect of CO on carbon dioxide CW laser performance by accelerating relaxation of bending mode

07 p1155 A69-19088

Sealed carbon dioxide lasers life and power outputs with Xe and H additives

07 p1155 A69-19091

Sampled data regulator for maintenance of constant alveolar carbon dioxide during steady state and transient ventilatory responses to hypoxic stimulation

07 p1072 A69-19480

Depolarized Rayleigh line widths measured for carbon dioxide, nitrogen and hydrogen, using measurements to calculate reorientation cross sections

07 p1157 A69-19485

Population inversion mechanism based on electron collisional excitation cross sections for molecular vibrational levels in carbon dioxide lasers

07 p1157 A69-19655

Electron energy distribution measurements in carbon dioxide laser discharges noting similarity of distribution for nitrogen

08 p1323 A69-19801

Monte Carlo method for calculating atomic hydrogen escape rate from carbon dioxide atmosphere, considering Mars and Venus atmospheres

08 p1386 A69-20076

Mars and Earth atmospheric carbon dioxide simulation and spectroscopic measurement for developing planetary surface pressure estimating procedures from IR transmission measurements

08 p1354 A69-20151

Carbon dioxide absorption and emission in mesosphere, discussing vibrational relaxation time and radiative heating rate

08 p1308 A69-20308

Carbon dioxide bending mode deactivation by orthohydrogen, parahydrogen and deuterium through rotational transitions

08 p1358 A69-21010

Near resonant transfer of vibrational energy from carbon dioxide nu 3 mode to N 14 and N 15 molecules in collisions

08 p1358 A69-21011

Carbon dioxide laser with two gas absorption cells in cavity for emission wavelength control and HF pulsed mode of operation

08 p1327 A69-21088

Segmented anode, carbon dioxide-hydrogen performance and hollow cathode erosion tests on low power MPD arc thruster, noting current measurements

09 p1563 A69-21236

Gas lasers, discussing amplification, resonance, internal and external mirror lasers, outputs, and He-Ne, carbon dioxide and ion lasers

09 p1517 A69-22121

Nonadiabatic collision broadening theory for IR spectral lines applied to carbon dioxide-carbon dioxide and carbon dioxide-nitrogen collisions, estimating rotational line widths

09 p1543 A69-22250

Carbon dioxide laser upper level rotational relaxation rate constant measurement, observing CW gain

10 p1701 A69-22948

Amino alcohol regenerable absorbers of carbon dioxides toxicological characteristics, discussing absorbing ability in rats

10 p1646 A69-23502

Venus atmosphere observations compared with Venera 4 measurements of temperature, pressure and carbon dioxide content

10 p1791 A69-24200

High power CW carbon dioxide laser saturation and discharge conditions analyzed by rate equation

11 p1898 A69-25050

Carbon dioxide laser for production of high peak power pulse, discussing mw peak power design and oscillation problem in high gain amplifiers

11 p1899 A69-25053

Carbon dioxide-N-He laser amplifier, noting gain time dependence and thermal relaxation rate after gas heating

11 p1899 A69-25054

Gain decrease due to saturation during amplification of pulses from Q switched carbon dioxide laser oscillator, noting rotational sublevels relaxation rate

11 p1899 A69-25055

Vibrational relaxation frequency of asymmetric stretching mode of carbon dioxide determined by measuring rate of thermal emission in shock waves near 4.3 microns

11 p1922 A69-25128

Carbon dioxide temperature distribution, absorption and concentration as functions of molecular dissociation behind shock wave determined by measuring IR bands intensity

11 p1873 A69-25226

Shapes of extreme wings of collision-broadened carbon dioxide lines, noting absorption deviation from Lorentz-shaped lines

12 p2132 A69-26248

Carbon dioxide rotational constants from CW beat measurement in bulk GaAs mixer between carbon dioxide vibrational-rotational laser lines

12 p2105 A69-26311

Carbon dioxide dissociation in carbon dioxide laser gas discharge plasma for various flow rates, pressures, discharge current densities and tube diameters

12 p2107 A69-26540

Single frequency sealed off carbon dioxide amplifier, giving saturated gain

12 p2109 A69-26640

Carbon dioxide laser as light source in Michelson interferometer for plasma electron density measurement

12 p2100 A69-27177

Venus carbon dioxide spectral band analysis methods, discussing spectral lines and rotational temperatures obtained

13 p2344 A69-27649

Heat transfer coefficients for carbon dioxide near thermodynamic critical point for flow through electrically heated duct, noting turbulent forced convection as mechanism

[ASME PAPER 68-HT-32] 13 p2373 A69-27769

Lifetime of vibrational levels of carbon dioxide molecules as function of discharge current and power dissipation, noting gas heating

13 p2273 A69-28579

Energy level population of carbon dioxide molecules, noting intensity of spontaneous emission

13 p2274 A69-28580

Laser based on carbon dioxide molecules formed chemically in electrical discharge studied for designing special carbon electrode laser

13 p2274 A69-28585

Libroelastic wave propagation and dispersion characteristics /solid carbon dioxide/ evaluated by using Raman scattering measurements

13 p2286 A69-28668

Water and carbon dioxide IR spectra compared with laboratory measurements

14 p2433 A69-28794

Carbon dioxide band vibration-rotation transitions saturation characteristics, stressing role of collisions in molecular gas lasers

14 p2457 A69-28928

Blue continuum emission from hot carbon dioxide measured in shock tube, discussing applications to temperature measurement of gases containing carbon dioxide

14 p2427 A69-29014

Carbon dioxide dissociation by electron impact, determining reaction rate in positive column of DC glow discharge

14 p2488 A69-29095

NADH stimulation of ATP dependent carbon dioxide fixation in crude extracts of Hydrogenomonas facilis, considering allosteric regulation of phosphoribulokinase activity

15 p2554 A69-30036

Atmospheric transmission functions dependences on absorbing material, pressure and temperature in 15 micron band of carbon dioxide, introducing corrections

15 p2597 A69-30653

Pressure, temperature, density and enthalpy of carbon dioxide behind primary and reflected shock waves determined by method suitable for computer

15 p2592 A69-31054

Relative intensities of lines in vibration and rotation bands of isotopic carbon dioxide in planet Venus, tabulating partition functions

15 p2656 A69-31154

Monosaccharide production from carbon dioxide from respiration or human waste incineration, evaluating toxicological effects of synthetic monosaccharides

15 p2557 A69-31471

Spectroscopic observations of Venus atmosphere rotational temperature based on carbon dioxide band at 7883 A

16 p2852 A69-31563

Carbon dioxide dissociation relaxation times measured in shock tube at 1900-2400 K and 1.5-2.5 km/sec

16 p2766 A69-31910

Pressure dependence of trapped spontaneous decay of resonant radiation carbon dioxide

18 p3179 A69-35478

Acetate-2-C 14 conversion to C 14 carbon dioxide and C 14 fatty acids in rats with 2/3 of liver removed

19 p3257 A69-35976

Deactivation rate constants of carbon dioxide vibrationally excited by high temperature collision with carbon dioxide or nitrogen molecules, describing laser apparatus and reaction cells

20 p3578 A69-36937

Carbon dioxide laser pulsed mode for generating giant pulses, noting applications and electron impact role

20 p3555 A69-38004

Relaxation time for rotational transitions of linear polyatomic carbon dioxide calculated by using Brout theory for diatomic H rotational relaxation calculations

20 p3581 A69-38121

Carbon dioxide band in Venus spectrum by dispersion analysis, deriving rotational temperature

20 p3614 A69-38254

Heats of adsorption of carbon dioxide on silver /I/ oxide and copper /II/ oxide by gas chromatography

20 p3485 A69-38277

Equilibrium absorption and desorption rates of carbon dioxide-argon mixtures from silica gel measured as function of temperature using gas dynamics method

21 p3848 A69-38707

Vibration relaxation time and dissociation rate constant of carbon dioxide in high temperature shock waves, using IR emission

21 p3775 A69-39801

Age and carbon dioxide tension effects on EEG of adolescents and adults, discussing end-tidal carbon dioxide during routine hyperventilation

22 p3872 A69-40162

Peripheral chemoreceptor carbon dioxide sensitivity, measuring human respiratory response to large carbon dioxide breath in oxygen at sea level and high altitude

22 p3890 A69-40207

Carbon dioxide free jet expanding from conical nozzle into low density atmosphere, using freeze up method

22 p4000 A69-40594

Excited states lifetime of carbon dioxide and nitrous oxide ions deduced from spontaneous radiative deexcitation in vacuum after passage through gaseous target

22 p3985 A69-40715

Carbon trioxide formation during ozone photolysis in liquid carbon dioxide and sulfur hexafluoride, noting ozone disappearance quantum yield independence of oxygen/ozone ratio

23 p4112 A69-41338

Carbon dioxide inhalation and intravenous isoproterenol effects on hemorrhagic consolidation occurring after left pulmonary artery ligation in dogs

23 p4082 A69-41441

Biochemical evolution role in porphyrin synthesis forming hemoproteins base, discussing assimilation of carbon dioxide in early earth atmosphere

23 p4088 A69-41814

IR radiation transmission in pulsed carbon dioxide discharge as function of time, proposing pumping and relaxation mechanism model

23 p4174 A69-42196

Raman spectra analysis of solid carbon dioxide, nitrous oxide, nitrogen and CO, determining lattice mode intensities from oriented gas model

23 p4194 A69-42205

Dry ice ablating models for unheated supersonic and hypersonic wind tunnel tests, noting mass addition rate extension

24 p4297 A69-43255

CARBON DIOXIDE CONCENTRATION

Flight vehicle cabins ventilation for undesirable gas contaminants removal, discussing contaminant concentration calculation and automatic control

02 p0200 A69-11512

Venus exospheric temperature for various composition models, discussing carbon dioxide concentration effects

02 p0319 A69-12109

Electronic transition moment for C /Swan/ bands measured in shock tube in carbon dioxide and argon mixtures

02 p0285 A69-12833

Human motor activity under hypodynamia and increased carbon dioxide, discussing positive effects of prescribed physical exercises

03 p0377 A69-14205

Carbon dioxide pressure in earth atmosphere through geologic time determined by carbon input rate and transfer efficiency to crust

08 p1310 A69-20946

Ozone and carbon dioxide stratospheric and tropospheric horizontal distribution from weather data collected on polar flight

09 p1484 A69-21403

Carbon dioxide abundance in Mars atmosphere measured with three etalon Fabry-Perot spectrometer

09 p1607 A69-22427

EEG, EKG, respiratory motions and pulmonary ventilation recordings in study of carbon dioxide additions effect on human tolerance to hypoxic conditions

10 p1650 A69-23898

Carbon dioxide temperature distribution, absorption and concentration as functions of molecular dissociation behind shock wave determined by measuring IR bands intensity

11 p1873 A69-25226

Carbon dioxide concentration in upper troposphere and lower stratosphere recorded during commercial aircraft flights over polar route

11 p1879 A69-25254

Venus atmosphere carbon dioxide content origin from interior degassing during molten phase, using atmospheric model

16 p2857 A69-32098

Respiratory gas exchange in exercise during He-O breathing, analyzing effects on O consumption, carbon dioxide production and minute ventilation of human subjects

17 p2910 A69-33751

Mice convulsions at varying hyperbaric oxygen pressures and carbon dioxide content correlated with decreasing brain alpha aminobutyric acid levels

19 p3257 A69-35972

Carbon dioxide levels monitoring in spacesuit research including limits of physiological acceptability

21 p3665 A69-39170

Ventilatory response to hypoxia and hypercapnia in hypothermic anesthetized dogs, noting decreased sensitivity of central chemoreceptors to carbon dioxide

22 p3885 A69-40977

Oxygen exchange in Scenedesmus and Chlorella as function of carbon dioxide, compensation point, Hill activity and photorespiration, using mass spectrometry

23 p4099 A69-42528

CARBON DIOXIDE LASERS

Carbon dioxide laser inversion kinetics, combining pulse pumping with Q switching to observe rise, life and decay times

14 p2457 A69-28926

Pulsed lasers with pure carbon dioxide and mixture with N and He, discussing inversion mechanism, peak emission power and gas temperature effects in different modes

14 p2458 A69-29162

Continuous butt welding with CW carbon dioxide laser, noting heat affected area, remelt zone and weld efficiency

15 p2617 A69-30099

Gas laser cutting of thin carbon films on thick pyrex glass and ceramic substrates

15 p2635 A69-31037

Thin film carbon resistors cutting with carbon dioxide gas laser, considering cylindrical bodies and aging properties

15 p2635 A69-31038

Spontaneous self pulsing and cavity dumping in carbon dioxide laser Q switched by internal GaAs electro-optic cell without saturable absorber

16 p2797 A69-32014

Homodyne detection of IR radiation from carbon dioxide laser scattered from moving diffuse target, noting applicability to IR radar, heterodyne spectroscopy, etc

17 p2971 A69-32913

Optical heterodyne communication system with single mode and frequency carbon dioxide laser, noting coherent photon noise limit

17 p2919 A69-33086

Fog removal by high power carbon dioxide lasers, evaluating possibility of clearing airport runways [AIAA PAPER 69-670]

17 p2945 A69-33449

Carbon dioxide flowing gas laser pumped by thermally excited nitrogen, discussing power gain and absence of chemical and charged particle effects

18 p3151 A69-34264

Population inversion in carbon dioxide laser related to pumping frequency, discussing molecular dissociation effect in gas mixture

18 p3151 A69-34620

Intensity changes in visible sidelight emission from carbon dioxide laser switched on and off, calculating vibrational temperatures

18 p3153 A69-35243

Luminophors for carbon dioxide laser radiation visualization noting controlled sensitivity, quick response and resolution

18 p3153 A69-35259

Self mode locking of carbon dioxide laser with high order transverse mode oscillations in vibrational-rotational transitions of P branch

19 p3330 A69-35602

Rotational-vibrational relaxation and molecular diffusion effect on saturation parameter of carbon dioxide laser, measuring gain as function of input power

19 p3338 A69-36692

Rotating mirror Q switched carbon dioxide laser for high peak powers, analyzing pulse structure and duration dependence on collision induced relaxations

19 p3338 A69-36694

Carbon dioxide lasers near IR spontaneous emission spectra

19 p3339 A69-36697

Central tuning dip on rotation-vibration transitions of nitrous oxide and carbon dioxide laser with nitrogen, noting frequency discriminator generation

19 p3339 A69-36698

Primary excitation mechanism in pulsed carbon dioxide lasers found to be electron impact

20 p3556 A69-38122

Electrical excitation discharge effect on molecular composition of flowing carbon dioxide gas laser, noting dissociation characteristics

21 p3736 A69-38940

Carbon dioxide laser amplifiers gain saturation time dependence characteristics by theoretical model taking rotational relaxation into account

21 p3736 A69-38941

Normal frequencies, force constants and moment of inertia of carbon dioxide isotope molecules from spectroscopic data, calculating atmospheric transmission of carbon dioxide laser radiation

21 p3742 A69-39780

Carbon dioxide laser development, discussing gain, static amplifier and high pressure operations

22 p3962 A69-40474

Carbon dioxide and carbon dioxide mixture mirror Q switched laser peak power generation, using pulsed excitation

22 p3963 A69-40564

Q switched pulsed discharge carbon dioxide laser, determining peak power dependence on delay between pulse excitation and Q switching

22 p3963 A69-40566

Population and excitation rates of working levels of carbon dioxide laser calculated on basis of emission power, amplification coefficient and spontaneous emission intensity

22 p3964 A69-40795

Electron excitation and collisional energy transfer processes in laser level of pure carbon dioxide fill and carbon dioxide-water vapor mixture

23 p4171 A69-41390

Gaseous absorption cell variable attenuator for carbon dioxide laser radiation at specific wavelength, using forced convection to eliminate thermal defocusing effects

23 p4172 A69-41396

Carbon dioxide laser amplifier operation, showing photon-induced current changes dependence on amplifier gain

23 p4172 A69-41398

Nitrogen-carbon dioxide-helium lasers CW operation at various pressures and N flow rates

23 p4173 A69-41496

Closed cycle gas cooling techniques for self contained CW kilowatt carbon dioxide laser, relating output power to flow velocity and input power

23 p4173 A69-41497

Output power dependence of repetitively Q switched carbon dioxide laser on repetition time measured with thermopile, noting decrease in mirror system

23 p4173 A69-41566

Pure water vapor and water vapor-air mixture continuum absorption of carbon dioxide laser radiation measured to determine atmospheric attenuation

23 p4173 A69-41631

Electron energy measurement accuracy in carbon dioxide laser plasma by S band radiometer

24 p4327 A69-42613

N or He additions effects on carbon dioxide laser design and power output

24 p4327 A69-42640

Diffraction coupling of power from carbon dioxide laser, computing angular distribution of output light

24 p4329 A69-43753

CARBON DIOXIDE REMOVAL

Transient changes in oxygen consumption, carbon dioxide elimination and respiratory quotients during and after induced hypoxia to rabbits

06 p0876 A69-18026

Oxygen reclamation from carbon dioxide using solid oxide electrolyte, noting water vapor catalytic effect

07 p1071 A69-19423

Digital computer program for heat and mass transfer characteristics of spacecraft carbon dioxide adsorption beds, discussing surface pressure of absorbent material [AICHE PAPER 19C]

09 p1446 A69-21931

Experimental program to evaluate regenerable sorbents for carbon dioxide removal in space cabin environments

09 p1447 A69-22552

Lithium peroxide utilization feasibility for oxygen supply and carbon dioxide control in extravehicular portable life support systems [AIAA PAPER 69-620]

17 p2914 A69-33303

Regenerative life support systems, discussing water reclamation, carbon dioxide removal, onboard oxygen generation and radio isotope thermal energy sources

19 p3262 A69-36318

Oxygen supply and carbon dioxide absorption in long term life support systems, noting energy balances comparison of ecological systems

20 p3477 A69-37625

Carbon dioxide washout during square wave hyperventilation in man, postulating blood flow factor

22 p3885 A69-40975

Oxygen and carbon dioxide transfer in membrane oxygenators, considering liquid dispersion and membrane diffusion limitations

24 p4279 A69-43799

CARBON DIOXIDE TENSION

NT HYPERCAPNIA

Alveolar and mixed venous carbon dioxide pressure during absence of gas exchange across mammalian lung

22 p3885 A69-40976

CARBON ISOTOPES

Automatic equipment for sampling and preparing gases by dual column gas chromatography for subsequent mass spectral analysis of carbon isotopes during methane metabolism

02 p0205 A69-12603

Experimental measurement of He and C isotope composition of cosmic radiation

05 p0817 A69-16709

Carbon content and isotopic composition in light and dark portions of gas-rich chondrites Breitscheid and Pantar

19 p3408 A69-36081

Carbon isotopes compared in interstellar formaldehyde transition for galactic nucleosynthesis, discussing spectrum analysis of radio astronomical telescope observations

23 p4220 A69-42376

CARBON MONOXIDE

Carbon monoxide ion dynamics in envelopes of comets exhibiting fountain behavior, discussing electron-collisional ionization within envelopes as main plasma production mechanism

02 p0310 A69-11423

Gain enhancement effect of CO on carbon dioxide CW laser performance by accelerating relaxation of bending mode

07 p1155 A69-19088

IR absorbance of CO below room temperature, determining strength and half widths of lines in R branch of fundamental band

07 p1183 A69-19644

Flowing CO-N-He laser with power enhancement and high efficiency, noting role of gases

08 p1324 A69-20163

Electron impacts role on dissociation rates of CO molecules in upper layers of solar photosphere

09 p1590 A69-21376

IR spectrum of NML Cygnus star with Michelson interferometer, noting CO bands and IR excess

09 p1602 A69-22229

Fourth positive carbon monoxide system observed in absorption in vacuum UV region, discussing rotational and vibrational band structure

09 p1607 A69-22429

CO adsorption on tungsten, determining work function changes and Fowler-Nordheim preexponentials on field emitter single crystal faces

14 p2409 A69-29093

CO absorption lines in solar spectrum analyzed theoretically and experimentally indicating random distribution of molecules

15 p2688 A69-30552

Nitrous oxide-CO bimolecular reaction and O-CO recombination in single pulse shock tube

16 p2748 A69-32793

High positive g sub x acceleration effects on red cells destruction rate, measuring endogenous CO production of Gemini astronauts

17 p2908 A69-33176

Electron impacts role on dissociation rates of CO molecules in upper layers of solar photosphere

18 p3198 A69-34764

Carbon monoxide displacement rate of oxygen from combination with oxyhemoglobin solutions from human adult and fetal, horse, goat, dog, cat and rabbit

21 p3650 A69-38384

Oxygen replacement rate by CO from combination with oxyhemoglobin in cells at various temperatures

21 p3650 A69-38385

Spectral transmittance of mixture of carbon monoxide and nitrous oxide for overlapping absorption bands [AIAA PAPER 67-600]

21 p3819 A69-39013

Blood oxygen content measured by oxygen tension after release by carbon monoxide without lysing cells

22 p3873 A69-40203

Electron recombination and diffusion in afterglow following short pulsed DC discharge in CO, using microwave diagnostic techniques

22 p3984 A69-40478

Carbon monoxide dissociation at high temperatures observed spectroscopically, finding complex reaction chain with diatomic C as intermediate

23 p4113 A69-41692

Oxygen steady state transfer across thin layers of centrifuged erythrocytes at 37 degrees C before and after hemoglobin saturation with CO

23 p4093 A69-42064

Raman spectra analysis of solid carbon dioxide, nitrous oxide, nitrogen and CO, determining lattice mode intensities from oriented gas model

23 p4194 A69-42205

Carbon monoxide presence in Martian atmosphere from Mars line spectra, giving content, surface pressure and concentration

23 p4220 A69-42379

Isotopic exchange reaction rate between O 18 and CO in shock tube coupled to time of flight spectrometer, noting rate increase with time

24 p4353 A69-43807

CARBON MONOXIDE POISONING

General aviation accidents and hazards presented by drugs, ethyl alcohol, pesticides and carbon monoxide

07 p1068 A69-19435

Carbon monoxide effect on dog lung volume, mechanical properties and diffusing capacity

22 p3874 A69-40224

CARBON STEELS

Shot peening effect on fatigue properties of maraging and Al-Zn-Mg alloy steel welds, using repeated tensile tests

02 p0253 A69-12061

Stress variation cycles pattern effects on fatigue strength of materials, discussing results of low-carbon steel tests under sinusoidal loading

04 p0673 A69-14535

Free surface strain increment components on high carbon steel compression specimens to estimate tensile plastic instability onset, noting ductile fracture criterion

08 p1328 A69-19891

Eutectoid pearlite growth by pure iron-carbon specimen heat treatment

13 p2281 A69-28158

Quench rate effect on martensite start temperature and fine structure of Fe-C and Fe-C-Ni steel, using transmission electron microscopy
20 p3557 A69-36956

CARBON TETRACHLORIDE
Temperature measurement associated with bubbles leaving heat source in subcooled pool boiling carbon tetrachloride analyzed, using high speed motion pictures by schlieren optical system
[ASME PAPER 68-HT-47] 13 p2374 A69-27779

CARBON 12
Absorption cross section for 68 Mev positive pion absorption by 1p 3/2 neutron in C12 nucleus followed by single proton emission at 11 degrees
02 p0282 A69-11460
Radiation damage in yeast cells irradiated by high energy C 12 ions evaluated from survival rate study
14 p2406 A69-28915
Pure carbon 12 stellar models evolution studied to determine production mechanism of planetary nebulae, discussing shell burning and surface layers unbinding role
18 p3191 A69-34298
Normal frequencies, force constants and moment of inertia of carbon dioxide isotope molecules from spectroscopic data, calculating atmospheric transmission of carbon dioxide laser radiation
21 p3742 A69-39780

CARBON 13
Molecular ion C13H line found in zeta Oph at 4232.08 A, measuring equivalent width and finding C12/C13 ratio
09 p1603 A69-22266

CARBON 14
Acetate carbon 14 utilization in centrifuged rats, analyzing metabolism by measuring plasma glucose, FFA and lipids synthesis
07 p1067 A69-19429
Urease activity determined by using C 14 urea in stored, preserved /Permafrost/ and irradiated soils
18 p3095 A69-34543
Carbon diffusion parameters in alloys of Nb with Ti, Zr, W and Mo, using radioactive carbon 14
18 p3157 A69-35250
Acetate-2-C 14 conversion to C 14 carbon dioxide and C 14 fatty acids in rats with 2/3 of liver removed
19 p3257 A69-35976
C 14-tryptophan incorporation into C 14-protein in cultured rat pineals, noting norepinephrine stimulation
22 p3871 A69-40054
Radiocarbon natural production by cosmic ray neutrons, utilizing proportional counters filled with N atmospheres
22 p4003 A69-40095

CARBONACEOUS METEORITES
NT MURRAY METEORITE
NT ORGUEIL METEORITE
Carbonaceous, enstatite and stony meteorite classification on basis of siderophyllic, chalcophyllic and lithophyllic element proportions or isotope composition, discussing thermodynamic equilibrium
01 p0025 A69-11368
Boron determination in type 1 carbonaceous chondrites by nonaqueous colorimetry, comparing results with ordinary chondrites
04 p0661 A69-15147
Solar system elements abundance compilation based on carbonaceous chondrites and nucleosynthesis in stars
08 p1401 A69-20903
Ne and Xe in carbonaceous chondrites, noting large amounts of fission Xe and implications for galactic nucleosynthesis models
08 p1405 A69-20925
Magnetite morphological variations of type 1 carbonaceous meteorites, discussing isometric crystals, spheres, spherulites, platelets and filaments
08 p1406 A69-20932
Organic matter signals in carbonaceous meteorites, discussing possible relation to extraterrestrial life and origin
11 p1953 A69-24342
Freshly fallen meteorites from Portugal and Mexico, determining exposure age and classifying into iron meteorite and carbonaceous chondrite types
12 p2160 A69-26935
C3 and C4 carbonaceous chondrites origin, evolution and classification based on mineralogic and petrologic data
19 p3413 A69-36109
Lance chondrite C III, studying mineral composition of chondrules and heterogeneous crystalline fragments
19 p3413 A69-36110

Carbonaceous meteorites mineralogically identified by selected-area electron diffraction, suggesting formation from minerals mixtures
19 p3311 A69-36111
Carbonaceous meteorites specimen petrographic observations, noting genetic interrelations with ureilites regarding S-C and reduced Fe oxidized Fe ratios
19 p3413 A69-36112
Isoprenoids and isomeric alkanes identification in carbonaceous chondrites by gas-chromatographic mass-spectrometric analyses, including results from troilite nodules
19 p3414 A69-36113
Organic geochemical investigations of lunar rock samples based on analysis methods for carbonaceous meteorites and early Precambrian sedimentary rocks
20 p3476 A69-37616
Morphological, chemical and X ray analysis of ureilite meteorite, identifying diamonds with kamacite and troilite admixtures from carbonaceous material
21 p3816 A69-39626
Meteorites pigments identification as porphyrins for extraterrestrial life evidence, noting sample analyses of Orgueil, Murray, Cold Bokkeveld and Mokoia carbonaceous chondrites
22 p4008 A69-39889
Spectral and orbital evidence of connection among fireballs with orbit inclination, comets and carbonaceous meteorites
23 p4208 A69-41285
Chemical composition of carbonaceous chondrites /Orgueil, Nogoya and Ormans/ and LL group chondrite /Ngawi/, confirming Ca/Al ratio
24 p4382 A69-42927
Trapped Ne in carbonaceous chondrites and gas-rich meteorites, observing Ne 20/Ne 22 ratio variance
24 p4385 A69-43217
Allende carbonaceous meteorite age determination by thermoluminescence method, assuming internal radioactivity source
24 p4385 A69-43219
Fe abundance in sun and carbonaceous chondrites, noting agreement between solar and meteorite abundances of Ni, Mg, Si and Li
24 p4385 A69-43223

CARBONACEOUS ROCKS
U COAL

CARBONATES
NT CALCITE
NT CALCIUM CARBONATES
NT DOLOMITE [MINERAL]
NT POLYCARBONATES
NT SODIUM CARBONATES
Polydiethylene glycol-bis-allyl carbonate /PBAC/ Hugoniot equation of state, reporting shock data, discussing applications to propellant testing
16 p2879 A69-32179
Doped silver carbonate defect structure and doping effect on reaction kinetics by X rays and electron paramagnetic resonance, finding new crystal structure
22 p3993 A69-40720

CARBONIZATION
Cellular carbon castings fabrication by carbonization of polyurethane polyfurfuryl alcohol foam for high temperature applications, noting properties
17 p2992 A69-33373
Carbon fiber composites in construction of rocket motor cases, pressure vessels and support structures, including carbonization for ablation and insulation applications
23 p4180 A69-42158

CARBONYL COMPOUNDS
Cross-linked polymers obtained by direct reaction of aryl polycarbonyls with aryl polyamines, studying char yields effect
08 p1269 A69-21059
Borane carbonyl pyrolysis in low pressure tubular flow reactor measured by mass spectrometry, noting wall collision role in diborane bond dissociation
14 p2410 A69-29282
Thermal decomposition of molybdenum carbonyl, deriving general equations, noting agreement with experimental data
20 p3558 A69-37015
Negative electric potential effect on deposition rate of Mo from molybdenum carbonyl and on deposit chemical composition during pyrolysis
20 p3559 A69-37016
Emission band intensities of carbonyl fluoride in 2.0-6.0 micron region with scanning spectrometer, comparing results for room and shock temperature with theoretical data
21 p3669 A69-38759

CARBORANE
High pressure combustion of ortho-barenes /carboranes/, determining formation heat and amounts of boric acid and carbon dioxide
21 p3670 A69-39625

CARBOXYLIC ACIDS
U ACETIC ACID
U ALANINE
U DICARBOXYLIC ACIDS
U FORMIC ACID
U LACTIC ACID
U LYSINE
U TRYPTOPHAN

CARBURIZING
Thermodynamic study of carburization of liquid titanium and zirconium, examining effects of atmosphere, graphite porosity and alloying elements
03 p0446 A69-13572
Carburization structure on surface of Mo and Nb castings cast in graphite molds showing changes in plastic properties of metals
04 p0619 A69-15391
Atmospheric and alloying elements effects on casehardening by gas carburization of structural steels, noting carbon potential
07 p1167 A69-19344
Carburization structure on surface of Mo and Nb castings cast in graphite molds showing changes in plastic properties of metals
18 p3156 A69-35019
Pyrolyzed tetraethoxysilane for carburizing steels and Ti alloys at 850-1050 C
19 p3328 A69-36161
Carburizing spherical powders of Nb, Mo and W to obtain carbides, noting agreement between theoretical and experimental data
19 p3345 A69-36162

CARCINOMA
U CANCER

CARCINOTRONS
Capitron locked oscillator with wide electronic tuning range, describing CW operation characteristics and application to ground station microwave transmitters
23 p4135 A69-41302

CARDIAC AURICLES
Isolated pacemaker tissue from rabbit heart under dynamic and static stretching, discussing spontaneous frequency phenomena
23 p4096 A69-42092

CARDIAC VENTRICLES
Left ventricle rapid filling period measurement from rapid filling wave of apexcardiogram, noting possible influences of age and sex
03 p0376 A69-14081
Single channel pressure telemetry unit for chronic implantation into cardiac chambers or major blood vessels in unrestrained animals for measuring ventricular pressure
11 p1831 A69-25642
Left ventricular function in intact anesthetized dogs analyzed during graded hypovolemia produced by lower body negative pressure
22 p3874 A69-40225
Pulmonary capillary blood flow, stroke volume and heart rate measured in tilted and supine subjects during respiration, discussing tourniquets and intravenous atropine effects
23 p4082 A69-41445
Cerebrospinal fluid /CSF/ formation in male monkeys as function of fluid pressure at third ventricle level following temperature stress and feeding
23 p4084 A69-41469
Aortic pressure effect on left ventricular function, emphasizing effect of heart rate hematocrit and oxygen consumption
23 p4092 A69-42061
Cat hearts ventricular pressure curves dv/dt and dp/dt correlated with left heart ventricle mechanical performance
23 p4095 A69-42076
Myocardial muscle fibers transient inward current components during sheep ventricle voltage clamp analysis
23 p4095 A69-42080
Sinus outflow relationship to oxygen content in anterior cardiac vein blood and right ventricle systolic pressure
23 p4098 A69-42105
Refractory period adaptation to sudden heart rate changes in dogs
24 p4257 A69-42628
Supraventricular arrhythmias after acute myocardial infarction, noting benefit of early DC shock
24 p4262 A69-42729

Pneumatic driving system for heart assist or total replacement pumps, discussing design features and performance characteristics

24 p4273 A69-42983

CARDIOGRAPHY

NT BALLISTOCARDIOGRAPHY
NT ELECTROCARDIOGRAPHY
NT PHONOCARDIOGRAPHY

Cardiac output during space flight based on rebreathing method for estimation of gas tension in mixed venous blood and Fick equation
[UN PAPER 68-95746]

01 p0151 A69-10527

Coronary angiography for evaluating cardiac problems of aircrew, giving case histories and clinical and laboratory findings

19 p3263 A69-36461

Nonsurgical methods of cardiac output measurement in aerospace medicine, considering simultaneous recording of carotid and femoral pulses and impedance plethysmography

23 p4088 A69-41813

Errors in estimating cardiac function from aortic and peripheral pulses, using cadaver experiments

24 p4262 A69-42728

Stewart-Hamilton formula for cardiac output measurements and regional blood flow determination

24 p4271 A69-42784

CARDIOLOGY

Left ventricle rapid filling period measurement from rapid filling wave of apexcardiogram, noting possible influences of age and sex

03 p0376 A69-14081

Cosmonauts cardiac activity and respiration changes during physical exertion in orbital flight on Voshkod spacecraft

03 p0377 A69-14196

Cardiac function changes during orthostatic tests and problems in predicting reactions of cosmonauts in flight

03 p0381 A69-14229

Vectorometric EKG analysis of cardiac activity during hypokinesia with and without exercise and medication

05 p0710 A69-16519

Cardiac arrhythmias during positive G sub x acceleration, treadmill exercise and tilt table testing

06 p0874 A69-17834

Vectorometric EKG analysis of cardiac activity during hypokinesia with and without exercise and medication

18 p3096 A69-34738

Cardiac and arterial change frequency among young people, describing hydraulic model for morphological variations of carotidogram appearing with age, arterial hypertension and arteriosclerosis

21 p3661 A69-39272

Chronic congestive heart failure in dogs compared to pulmonary system, discussing effect on cardiac lymphatics

23 p4078 A69-41364

Cytoplasmic protein synthesis mechanism using rats heart-lung preparation with precise hemodynamic parameters control, noting variance with change in cardiac work level

23 p4083 A69-41456

CARDIOVASCULAR SYSTEM

NT AORTA
NT ARTERIES
NT BLOOD VESSELS
NT CAPILLARIES [ANATOMY]
NT CARDIAC AURICLES
NT CARDIAC VENTRICLES
NT DIASTOLE
NT EOSINOPHILS
NT ERYTHROCYTES
NT HEART
NT LEUKOCYTES
NT LYMPHOCYTES
NT MYOCARDIUM
NT OXYHEMOGLOBIN
NT RETICULOCYTES
NT SYSTOLE
NT VEINS

Cardiovascular changes in male students during tilt and negative pressure tests with bed rest studied from heart rate, blood pressure and leg volume measurements

01 p0021 A69-11334

Hypokinesia and transverse accelerations combined effect on human cardiovascular system and regional blood circulation

02 p0197 A69-11495

Control mechanisms of hemodynamic shifts from dogs subjected to acceleration under anesthesia

02 p0198 A69-11503

Long term restriction of muscular activity noting effects on dynamics of cardiac contraction

02 p0198 A69-11515

Cardiovascular system simulation using computer models transport and perturbation methods

03 p0380 A69-13855

Simulation of regulatory function of cardiovascular system during weightlessness

03 p0376 A69-14193

White rat physiological processes while maintained on hypothermic cardiopulmonary bypass with small membrane type heart-lung machines

05 p0708 A69-15971

G suit inflation acute and prolonged effects on cardiovascular dynamics in recumbent and passively tilted individuals

06 p0883 A69-17843

Cardiovascular responses of baboons and dogs subjected to anoxic near vacuum environment by rapid decompression

06 p0875 A69-17846

Cardiovascular disease incidence among airline flight deck personnel in relation to increase in average age of personnel

06 p0875 A69-17848

Reactions of respiratory and cardiovascular system of dogs in biocompartment of ballistic missiles, discussing biopotential of myocardium, arterial pressure, etc

07 p1060 A69-18576

Human and animal cardiovascular system reactions to weightlessness, noting vagus nerve role in adjusting organism

07 p1061 A69-18583

Statistical correlation between cardiovascular activity and respiration dynamics of cosmonauts during orbital flight, discussing heart beat and respiration rates

07 p1061 A69-18584

Cardiovascular system medical examinations for selection of aircraft and spacecraft crew members from healthy men with no apparent disorders or complaints

07 p1066 A69-18983

Axial waves in blood vessels, determining phase velocities and damping, noting anisotropic behavior of artery wall

[SESA PAPER 1350]

07 p1069 A69-19726

Dogs cardiovascular activity mathematical analysis from physiological indices during long space flight

08 p1261 A69-19828

Brief intense thermal stresses effects on cardiovascular system of man, noting criticality of effective blood volume for circulatory competence

08 p1264 A69-20668

Tilt-table and acceleration tolerance of athletes and inactive students, comparing cardiovascular responses, heart rate and blackout level

[DVL-834]

09 p1444 A69-21304

Amplitude variations in ULF ballistocardiograms of young normal airline stewardesses and applicants, discussing cardiovascular reactivity

09 p1444 A69-22544

Pathological changes in respiratory and cardiovascular systems of white rats due to various levels of hyperoxia

10 p1646 A69-23577

Long term hypokinesia effect on cardiovascular system of athletes indicating human orthostatic resistance increase due to physical exercises

10 p1646 A69-23581

Single channel pressure telemetry unit for chronic implantation into cardiac chambers or major blood vessels in unrestrained animals for measuring ventricular pressure

11 p1831 A69-25642

Blood vessel model in form of cylindrical shell filled with liquid for studying cardiovascular system dynamic and static problems

12 p2018 A69-25989

High altitude acclimatization effects on cardiovascular system, external respiration, blood composition, optical and vestibular analyzers in human subjected to various stresses

13 p2212 A69-28623

Cardiac output determined simultaneously in adult male humans by thoracic impedance changes and radioisotope dilution

14 p2408 A69-29304

Physiologic and psychologic aging in professional pilots analyzed on basis of cardiovascular, pulmonary, exercise tolerance and sense testing

14 p2408 A69-29309

Cardiovascular system, neuromuscular activity and mental fitness of subjects performing physical and men-

tal assignments with prescribed work-rest schedule during confinement

17 p2906 A69-32936

Gastric perfusion rate in restrained animals determined by Rb 86 clearance technique

17 p2908 A69-33170

Leg volume changes in response to lower body negative pressure due to blood redistribution

17 p2908 A69-33171

Beta adrenergic blockade in differential diagnosis of cardiovascular changes produced by stress induced catecholamine liberation and organic disease

17 p2909 A69-33184

Pubertal puppy and adult dog cardiovascular system during inhalation of various nitrogen-oxygen mixtures, comparing heart beat rates, minute blood volumes, etc

19 p3257 A69-36169

Cardiovascular system medical examinations for selection of aircraft and spacecraft crew members from healthy men with no apparent disorders or complaints

20 p3480 A69-38231

Cardiovascular illnesses incidence among airline flight personnel, discussing coronary insufficiency detection

21 p3661 A69-39271

Cardiac and arterial change frequency among young people, describing hydraulic model for morphological variations of carotidogram appearing with age, arterial hypertension and arteriosclerosis

21 p3661 A69-39272

Amyl nitrite inhalation effects on cardiovascular system, discussing tachycardia and carotidograms

21 p3661 A69-39278

Dogs cardiovascular responses to histamine liberator /compound 48/80/, describing shock and acidosis with elevated histamine levels

22 p3873 A69-40206

Hemodynamic characteristics of decortication in rabbits, noting upsets of compensatory and adaptive capabilities of cardiovascular system

22 p3888 A69-41271

Cardiovascular effects of hypoxia in conscious and anesthetized dogs in environmental chamber, discussing artery pressure, tachycardia, stroke volume and cardiac output

23 p4078 A69-41314

Sotalol and propranolol cardiovascular effects, comparing toxicity and blocking action against circulatory and cardiac effects of catecholamines

23 p4080 A69-41403

Cat papillary muscle length-tension curves before and after inotropic intervention, noting optimal length changes

23 p4084 A69-41461

Cardiovascular changes induced in animals by prolonged weightlessness, using implanting polyethylene cannulas in neck or head

23 p4108 A69-41824

Alaska sled dogs cardiovascular performance and flow distribution during cross country runs

24 p4256 A69-42624

Cardiovascular autonomic effects dynamic characteristics under severe arterial hypoxia in unanesthetized rabbit

24 p4258 A69-42632

Central circulatory responses of humans to rapid skin temperature changes during continuous exercises

24 p4258 A69-42633

Neural integration of cardiorespiratory responses and suprabulbar control during arterial hypoxemia in rhinencephalic thalamic pontine rabbits

24 p4258 A69-42635

M-1 Valsalva maneuver induced cardiovascular stresses effect on oculobulbar vergence of subjects observing Thorington scale, discussing probable physiological mechanisms

24 p4266 A69-43373

Circulatory reactions of humans under g forces in centrifuge for various periods, with or without anti-g suit

24 p4267 A69-43385

Cardiopulmonary bypass developed for studies of long term weightlessness on cardiovascular system of mice, white rats and squirrel monkeys

24 p4278 A69-43394

CARDS

Thematic apperception test /TAT/ cards for assessing attitudes in naval recruiting, respiratory responses during ejections and aviation psychology

23 p4112 A69-42365

CARET WINGS

Hypersonic wave riders lift and drag coefficients, lift drag ratio, shock profile and pressure distribution, discussing wind tunnel measurements of caret wings
21 p3645 A69-39802

Perturbation equations for oscillating wedges and caret wings with attached bow shock in hypersonic and supersonic flows
24 p4249 A69-43659

CARGO

NT AIR CARGO

Cargo handling systems for worldwide door to door service from marketing systems viewpoint
[RAES PAPER 1]
22 p4053 A69-40482

CARGO AIRCRAFT

NT C-5 AIRCRAFT

Air cargo traffic increase, discussing technical and economical prospects, use of intermodal containers and transportation automation tendency
01 p0008 A69-10030

Air cargo and world trade, discussing economics, cargo tariffs, customs procedures, cargo airports and convertible aircraft
03 p0536 A69-14088

Flow fields about upswept rear fuselages of rear loading cargo transport aircraft
06 p0859 A69-17492

Air cargo transportation in 1970s, discussing Boeing 747 and Lockheed 500 super airfreighters, terminals, rates, marketing, etc
13 p2381 A69-27336

Skyvan 3 light passenger/freight carrier design, detailing power plant, installation and power management
17 p2902 A69-34192

Flight compartment and cabin layout of Skyvan 3 designed as freighter with passenger capability
17 p2903 A69-34195

L500 cargo transport commonality with C-5 showing need for aggressive weight control program
[SAWE PAPER 745]
18 p3091 A69-34908

Lockheed L-500 aircraft weight consideration in structural design as all cargo lifter, describing engine thrust, payload, options, etc
18 p3092 A69-35464

Cargo aircraft future design regarding engine development, structural flexibility, airport compatibility, cargo handling, etc
18 p3092 A69-35467

Aircraft interior conversion for passenger or cargo service, discussing convertible aircraft and quick change concepts
[AIAA PAPER 69-784]
19 p3244 A69-35642

Civil cargo aircraft characteristics and development trends, discussing cargo and passenger traffic management, communications network, etc
22 p3863 A69-40427

CARGO SPACECRAFT

Low cost efficient shuttle system for personnel and cargo transport to earth orbit for NASA and DOD needs
21 p3827 A69-39695

CAROTID SINUS REFLEX

Sympathetic nerve activity inhibition due to afferent baroreceptor nerves reflexes, studying carotid sinus and aortic nerves as pathways to vasomotor center
20 p3479 A69-38073

Renal vascular circulation in carotid occlusion pressor reflex by vasoconstriction in absence of renal autoregulation
22 p3887 A69-41190

Sinusoidal pressure electric stimuli frequency effects in isolated carotid sinus on canine peripheral blood pressure, determining dynamic characteristics from observation data
23 p4092 A69-42062

Electrical stimulation effects of carotid sinus on sinus rate and atrioventricular conduction for vagi and sympathetic nerves interruption to heart in dogs
24 p4257 A69-42629

CARRIER FREQUENCIES

Chirp pulse generation by carbon dioxide laser, discussing carrier frequency sweep
04 p0609 A69-14333

Solid state precision frequency standard for L multiplex carrier equipment, using four precision quartz crystal oscillators
04 p0561 A69-15451

Carrier energy dispersal in communication satellite telephony and TV systems, noting attendant RF bandwidth increase as function of distortion
09 p1450 A69-21277

Carrier disappearance method for FM telemetry transmitter characteristics measurements including frequency deviation sensitivity, linearity and frequency response
14 p2411 A69-28881

Limiting incoherent or coherent interference signals at frequency of biphase or quadriphase digital signal
14 p2413 A69-29483

Ionospheric parameter recording accuracy by vertical sounding, discussing errors in frequency- height curve
17 p2969 A69-34002

Optimum power allocation for RF carrier phase error and synchronization error in two channel system
19 p3274 A69-36283

Pulse-to-pulse carrier frequency stability of microwave radar transmitter tube for fixed target suppression
20 p3485 A69-36943

Carrier frequency monitoring amplifier with automatic bridge tuning for coupling to passive sensors including strain gages, inductive transmitters, etc
22 p3915 A69-40937

Tradeoff between Doppler measurement capability and subcarrier demodulation in coherent digital communication system quantitatively presented for various SNR
23 p4122 A69-41771

CARRIER INJECTION

Electron-hole collisions effect on drift and electron and hole diffusion in semiconductors at high injection levels
01 p0137 A69-10257

Negative resistance behavior of InSb diodes at 77 K, extending double injection theory for insulators to extrinsic semiconductors
02 p0294 A69-11722

Punch-through microwave negative resistance diode explained and contrasted with similar Read and Shockley structures
02 p0215 A69-11938

Step voltage transient behavior of electron-hole plasma injected into Ge, noting current time dependence
02 p0301 A69-12651

Conduction mechanism in unstable range of Au doped double injection Ge diode at 77 K
02 p0222 A69-12686

Photon emission in germanium at high injection levels during uniaxial compression
04 p0643 A69-15255

Emitter base lateral diode carrier injection effect on current gain properties of small area double diffused planar transistors
05 p0728 A69-15808

Injection characteristics of n-aluminum gallium arsenides-p-GaAs heterojunctions from recombination radiation spectra
06 p0979 A69-16993

Ambipolar motion of light injected photocarriers in cadmium-mercury-telluride in terms of diffusion and drift in electric fields
06 p0979 A69-17154

Gallium arsenide double injection diode using vacuum deposited film electrode on single crystal substrate, noting current controlled negative resistance
06 p0893 A69-17156

Silicon double injection diode, discussing HF noise measurement, Nyquist noise equivalent circuit for double injection process and source of LF noise
06 p0898 A69-17762

Injection locking method for reducing FM noise in Gunn effect oscillators
07 p1102 A69-18862

GaAs lasers radiation power hysteresis manifested in generating starts and stops at different injection current levels
07 p1157 A69-19593

Dark and photocurrent volt-ampere characteristics induced by capture of carriers injected into illuminated CdS single crystals
09 p1555 A69-21506

Electron-hole collisions effect on drift and electron and hole diffusion in semiconductors at high injection levels
09 p1559 A69-22650

Electron injection into ZnO from aqueous solutions of stable substances, correlating injection with oxidation potential of substance
10 p1651 A69-22940

Injection locked oscillator FM demodulator, analyzing signal distortion, intermodulation noise, differential gain and differential phase
11 p1845 A69-24565

Minority carrier density in base region of uniform base transistor at arbitrary injection level, using two dimensional model
11 p1845 A69-24569

Negative resistance formation in impurity compensated semiconductor diodes ascribed to injected carrier drift path increment with increasing current, deriving I-V characteristics
13 p2230 A69-27877

Current-voltage characteristics for double injection processes in nonideal contact p-i-n semiconductors operating in ohmic relaxation mode
13 p2323 A69-28524

Capture centers effect on current-voltage characteristic of p-i-n diodes during injection, noting negative resistance appearance
13 p2236 A69-28525

Injection phase-locking characteristics of LSA /limited space charge accumulation/ mode transferred-electron diode oscillators, employing negative conductance and equivalent circuit
14 p2421 A69-29544

Charge flow injection into MOS substrate attributed to gate pulses, correlating charge magnitude with pulse frequency
15 p2573 A69-30033

Injection level effects on minority carrier lifetimes in lithium-doped devices and solar cells irradiated by electrons and reactor neutrons
19 p3252 A69-35698

Collector efficiency limitation of surface barrier-limited photoconductors attributed to photogenerated carrier diffusion into electrode
20 p3583 A69-37732

Injection and excitation of charge carriers in CdS single crystals, analyzing current-voltage characteristics dependence on electrode separation, temperatures and electric field
21 p3779 A69-38423

Transient current change with minor change in voltage with double injection of electrons and holes in CdS single crystals, obtaining time dependence
21 p3780 A69-38833

Electroluminescence in doped p-type GaAs single crystal diodes ascribed to double injection of nonequilibrium current carriers
24 p4288 A69-43739

CARRIER MOBILITY

NT ELECTRON MOBILITY

NT HOLE MOBILITY

Intense laser emission interaction with current carriers in semiconductors, analyzing dependence of thermoelectric field produced by light absorption on intensity, frequency and temperature
01 p0139 A69-10895

Carrier mobility variation with electric field related to structure of epitaxial field effect transistors
02 p0294 A69-11541

Thin film transistors prepared from spray deposited cadmium sulfide, discussing carrier mobility and low stability
02 p0214 A69-11596

Heterojunction band model and carrier transport mechanisms emphasizing applications to heterophotodiodes, solar cells and hetero field effect transistors
02 p0294 A69-11598

Current carrier mobility in GaTe and tin selenide semiconducting stratified lattices, noting injection of free carriers and polarized nonpolar phonons
02 p0295 A69-11777

P-n junction under arbitrary transient conditions, solving one dimensional, two carrier transport equations by numerical iterative method
03 p0487 A69-13639

CdS Hall coefficient, Hall mobility and magnetoresistance coefficient dependence on electric field, magnetic field and scattering mechanisms
03 p0490 A69-13945

Hall mobility of photoelectrons in cadmium sulfide layers
03 p0491 A69-14055

Resistivity and Hall mobility periodic change effect on probe measurements in semiconductors
04 p0642 A69-14534

Distribution of current carrier concentration and mobility in p-type silicon doped with phosphorus ions
04 p0643 A69-15254

Carrier scattering from defects in neutron irradiated semiconductors, noting mobility and relaxation time
06 p0974 A69-16864

Faraday effect at free carriers in indium antimonides and gallium arsenides, analyzing frequency dependence of rotation angle
06 p0979 A69-16996

- Interface states effects on characteristics of p-channel MOS transistors
06 p0979 A69-17117
- Digital method for quantitative study of carrier circulation phenomena in semiconductors, noting Algor program and continuously polarized p-n junction
08 p1280 A69-19973
- Magnetoelectric characteristics of inversion layers below gate region in transistors, noting Hall mobility
08 p1372 A69-20460
- Kinetic coefficients of carrier motion in semiconductor obtained by Boltzmann equation, considering impacts between carriers
09 p1554 A69-21468
- HgTe-CdTe single crystals homogeneity and Cd distribution obtained by Bridgman and/or zone melting studied for carrier concentration and electron mobility
09 p1557 A69-21737
- Electronic states and minority carrier transport in mixed semiconductors with graded composition, noting position dependent band gaps and effective masses
10 p1745 A69-23360
- Carrier dragging in CdS single crystals under Q switched ruby laser light due to photon stream
13 p2271 A69-27661
- MOS transistor Hall voltage, mobility and constant verified by magnetoelectric measurements of Si p-inversion layer
13 p2323 A69-28331
- Dislocations effect on carrier mobility and concentration in p-type and n-type InSb crystals
14 p2507 A69-29646
- Kinetic coefficients of carrier motion in semiconductor obtained by Boltzmann equation, considering impacts between carriers
15 p2669 A69-30713
- Book on semiconductor devices physics covering principles and operational characteristics, carrier distribution and transport properties, materials, junctions, thin films, etc
15 p2670 A69-31062
- Microwave power loss and semiconductor conductivity relationship measured for carrier lifetime and mobility, noting nonlinearity and accuracy
16 p2825 A69-31617
- Hall mobility of photoelectrons in cadmium sulfide layers
18 p3182 A69-35048
- HgTe-CdTe single crystals homogeneity and Cd distribution obtained by Bridgman and/or zone melting studied for carrier concentration and electron mobility
20 p3584 A69-38215
- CARRIER MODULATION**
U MODULATION
- CARRIER ROCKETS**
U LAUNCH VEHICLES
- CARRIER SYSTEMS**
U WIRELESS COMMUNICATIONS
- CARRIER WAVES**
- Amplitude modulation factors expressed as carrier and sideband power for sinusoid and square wave signals, considering negative clipping by modulator cut-off
01 p0028 A69-10419
- Transient signal propagation in lossless isotropic and homogeneous plasma for Gaussian pulse modulated carrier, discussing amplitude change and carrier phase distortion
02 p0290 A69-12351
- Analog FM subcarrier modulation selected for real time TV picture transmission via electro-optic space communication system
04 p0562 A69-15474
- Resonance effects during piezoelectric interaction between charged drift wave and flexural wave in semiconductors with one sign current carriers
08 p1371 A69-19806
- Frequency measurement of moving spacecraft RF carrier waves at low SNR by analog recording of noisy signal and HF trigger tone, noting data processing and signal fading rate
12 p2038 A69-26051
- Transmission system with baseband spectrum divided into subbands, cascade phase modulating carrier in multiplication chain
12 p2030 A69-26385
- Subcarrier phase modulated single sideband sinusoidal carrier synthesis, discussing signal power ratios, signal efficiency, design sensitivity, etc
14 p2413 A69-29489
- Electromagnetic waves as data carriers for earth resources and technology satellite sensors
15 p2607 A69-30231
- Maximum a posteriori estimate of modulation on carrier with noise, discussing iterative technique and FM test
17 p2994 A69-32917
- CARTESIAN COORDINATES**
- Numerical integration for continuously thrusting spacecraft optimal trajectory, considering rectangular Cartesian and polar cylindrical coordinates characteristics
[AIAA PAPER 69-903] 21 p3798 A69-38546
- Acoustical ray tracing in horizontally layered and vertically sectioned atmosphere on digital computer using shifting Cartesian coordinate system
23 p4154 A69-41532
- CARTILAGE**
- Invertebrate endoskeletal cartilage and cartilage-like tissues occurrence and nature, discussing cellular tissues and origin
15 p2555 A69-30412
- CARTOGRAPHY**
U MAPPING
- CARTRIDGE ACTUATED DEVICES**
U ACTUATORS
U EXPLOSIVE DEVICES
- CASCADE CONTROL**
- Divergent-convergent and convergent-divergent cascaded exponential lines, determining equivalent length of uniform transmission line
01 p0044 A69-10623
- Multiple loop feedback systems synthesis utilizing extended node introduction synthesis theory, considering filter response functions characteristics
10 p1667 A69-24037
- Filter network synthesis for realization of rational functions, discussing numerator polynomial inclusion by choice of divisor polynomial and branch introduction and parallel systems
10 p1667 A69-24038
- Storage varactors and frequency dependent diode input power for multiplier cascades control, discussing series connections and limitations by thermal noise
11 p1841 A69-25607
- Antenna switch for cascading and separating RF channels of high power wideband broadcasting systems
11 p1854 A69-25617
- Cascaded limiter and phase detector, analyzing SNR transfer characteristics for specific PM signals
23 p4131 A69-42525
- CASCADE FLOW**
- Heat transfer in cooled portion of air gas flow area of high temperature gas turbines
03 p0495 A69-12957
- Centrifugal force field influence on heat exchange between gas and blade cascade studied with noncooled blades at low temperatures
03 p0531 A69-12959
- Axial flow turbine blade cascade in transonic flow
03 p0365 A69-14103
- Cascade acceleration of plasma by two stage device noting plasma dispersion, plasma losses and highest final plasma velocity
03 p0482 A69-14215
- Blade oscillations in cascade flow of axial turbomachinery calculated as function of pitch ratio, stagger angle, angle of attack and camber
[ASME PAPER 68-FE-7] 05 p0837 A69-16069
- Heat transfer performance of porous nozzle blade cascade represented by two dimensional mathematical model
05 p0812 A69-16400
- Turbomachinery research, discussing two and three dimensional incompressible flow in cascades near end wall and in rotating machines
05 p0751 A69-16534
- Initial turbulence influence on wakes formed behind trailing edges of cascade blades
09 p1431 A69-22235
- Incompressible two dimensional potential flow analysis with compressibility effects for thick highly cambered multibodies in cascade, noting slotted compressor blade performance
[ASME PAPER 69-GT-6] 09 p1432 A69-22507
- Flat decelerating cascades boundary layer in compressible flow during change in axial flow-density ratio and upstream turbulence
11 p1818 A69-24639
- Semiautuator disk method for boundary layers and velocity of stall flutter cascade blades vibrating in transient mode, considering nonstall flutter
11 p1818 A69-25028
- Flow through turbine stage with inclined guide vanes at moderate Mach numbers, discussing exit blade angle formula for swept cascades
15 p2547 A69-30570
- Soviet book on theory and design of turbocompressors covering gas dynamic cascade theory, thermodynamics and aerodynamics, viscous gas flow, etc
20 p3459 A69-37238
- Soviet book on hydrodynamic cascade theory covering mathematical methods and numerical solutions for ideal fluid flow problems
21 p3696 A69-39527
- Compressor type cascade experiments to find closest possible traverse position to blade trailing edge
22 p3859 A69-40065
- Cascade thermoelectric heat pump reducing temperature gradient in legs of element near cold junction and reducing Joule heating in cold junction area
22 p3869 A69-40133
- Airfoils and cascades design for incompressible flow by numerical methods
23 p4058 A69-41610
- Spanwise velocity profiles through cascades and axial flow turbomachines, analyzing loading, secondary losses and inlet conditions interacting on downstream profile
23 p4061 A69-42110
- Perturbation velocity potential of unsteady potential flow of barotropic gas past cascade of thin blades oscillating harmonically
24 p4244 A69-42716
- Edge effects in efficiency of air cooled turbine blade cascades with cooling air ejection from blade trailing edges into gas flow
24 p4364 A69-43090
- CASCADE WIND TUNNELS**
- Cascade wind tunnels performance experiments, investigating effect of exit side walls lengths
19 p3241 A69-36753
- CASCADES**
- Cascaded avalanche diodes in negative resistance amplifying mode for increased output power and extended dynamic range
09 p1462 A69-21408
- CASCADES (FLUID DYNAMICS)**
U FLUID DYNAMICS
- CASE BONDED PROPELLANTS**
- Three dimensional thermal stress distribution in case bonded solid propellant determined by scattered light photoelastic technique coupled with transparent rocket motor model
[AIAA PAPER 68-512] 02 p0345 A69-12371
- CASES (CONTAINERS)**
U ROCKET ENGINE CASES
- CASSEGRAIN ANTENNAS**
- Critical parameters for optimum design of Cassegrain antenna used in space communications
[UN PAPER 68-95280] 01 p0043 A69-10481
- Aperture blockage by subreflector in Cassegrain antenna system, computing effects on far field radiation patterns
03 p0401 A69-12853
- Cassegrain two reflector antenna modification by discrete phased array, allowing for subunit redesign
04 p0572 A69-14326
- Contour pattern analysis of AN/FQP-6 monopulse radar Cassegrainian antenna, giving three dimensional drawings
04 p0576 A69-14769
- Low noise shaped beam Cassegrain antenna design for space communications earth station service, noting gain/noise temperature figure and antenna construction
05 p0728 A69-15669
- Galactic H 2 regions radio observation using Cassegrain antenna and Dicke radiometer
06 p1008 A69-17696
- Antenna gain increase, using matched pair of Cassegrain reflectors with one primary source
10 p1664 A69-23799
- RMS surface error compensation in radome-housed Cassegrain parabolic antenna including weight analysis
23 p4150 A69-42137
- Envelope characteristics of earth station Cassegrain antenna sidelobes, deriving formulas for central and spar blocking and forward feed spillover
23 p4143 A69-42517
- Space vehicle multibeam Cassegrain antenna system design meeting radiometric mapping requirements in microwave frequency range, discussing mounting, degrees of freedom, etc
[ONERA-TP-713] 23 p4143 A69-42527
- CASSEGRAIN OPTICS**
- Astronomical two mirror telescope with aplanatic secondary focus, describing prime and secondary focus field correctors
05 p0761 A69-15733

- Quasar and radio galaxy spectra obtained on Cassegrainian focusing diffraction spectroscopy
11 p1951 A69-24236
- Nova Delphini 1967 observational data and equipment including Cassegrain spectrograph, reflector telescope and photoelectric photometer
15 p2682 A69-30439
- Prismatic Cassegrainian-focus spectrograph of telescope at Shemakha Observatory, discussing camera inclination, instrumental contour for yellow neon line, astigmatism, optical temperature effects, etc
19 p3313 A69-36582
- Two channel TV Cassegrain telescope, describing color separation system for obtaining integral and monochromatic images of astronomical objects
20 p3547 A69-38309
- CASSIOPEIA A**
- Linear polarization measurements at 2.07 cm for 29 radio sources
02 p0326 A69-12705
- RF spectral lines due to OH molecule detected in interstellar space in absorption of RF radiation from Cassiopeia A source
09 p1586 A69-21295
- Preliminary observations of Tau-A, Cas-A and Cyg-A with multiple-element interferometer
10 p1777 A69-23397
- Magnetic fields in interstellar neutral hydrogen clouds in direction of radio source Cassiopeia A, noting field amplification
10 p1785 A69-24096
- Electron concentration fluctuation in inhomogeneousities estimated from Cassiopeia A radio emission
12 p2070 A69-26687
- Energetic gamma rays emission from radio source Cassiopeia A by high altitude balloon observations, using high resolution telescope
15 p2675 A69-30760
- RF spectral lines due to OH molecule detected in interstellar space in absorption of RF radiation from Cassiopeia A source
15 p2697 A69-31226
- Radio source Cassiopeia A flux density in terms of expanding radio source theory, noting frequency and time correlation with flux density changes
23 p4215 A69-42112
- Cassiopeia A luminous filaments motion study noting stellar remnant magnitude
24 p4389 A69-43746
- CASSIOPEIA CONSTELLATION**
- Galactic rotation constant calculated from radial velocities of O, B and A stars in Cassiopeia constellation, using Fehrenbach objective prism
07 p1214 A69-18664
- Statistical comparison of scintillation depths of Transit 4A satellite to radio star Cassiopeia A
07 p1215 A69-18821
- Galactic rotation in Cassiopeia region, studying O, B and A stars circular velocities as function of distance from galactic center
18 p3201 A69-35142
- Atomic and molecular absorption lines and width measurement in spectrum of WZ Cassiopeiae carbon star in visual and IR region
18 p3204 A69-35350
- Spectral energy distribution of gamma-Cas in 1967 based on observations in seven color photometric system
19 p3426 A69-36565
- Radio emission intensity of Cas-A and Cyg-A at 30-60 cm, giving spectral indices
19 p3428 A69-36876
- Eta Cassiopeiae orbit analysis with emphasis on multiple exposure photographic observations, noting companion mass
22 p4013 A69-40120
- Equal velocity contour diagrams for interstellar matter emission and absorption study in Cassiopeia-Perseus region
24 p4384 A69-43050
- CASTIGLIANO VARIATIONAL THEOREM**
- Variational principles of dynamic shell theory using Legendre transform for relations and boundary conditions of Timoshenko theory
01 p0166 A69-10262
- Castigliano variational principle applied to thermal stresses in rectangular plate by expanding stress function in double series of cosine binomials
08 p1419 A69-21178
- CASTING**
- NT INVESTMENT CASTING
NT PROPELLANT CASTING
NT SLIP CASTING
- Potential usage of titanium in cast parts for gas turbine engines, emphasizing alloys development [ASME PAPER 69-GT-24]
09 p1513 A69-22494
- Cast and forged steel mechanical properties noting starting materials and production methods roles in cast steel improvement
11 p1904 A69-24644
- Rolled sheets from beryllium scrap converted into vacuum cast ingots, discussing preparation techniques
13 p2281 A69-28160
- Induced stressing method for complex castings by controlled cooling during heat treatment applied to front frame of J-79 turbojet engine
13 p2269 A69-28184
- Casting variables of Co base superalloys, discussing variables effects on ultimate mechanical properties, investment casting, etc
14 p2456 A69-29893
- Filament reinforced metal matrix composites made by continuous casting process, discussing tensile tests results and production costs
19 p3318 A69-35511
- Low melting point material selected model melt simulating shrinking process in castings of melt with broad liquidus-solidus interval
21 p3733 A69-39720
- CASTING SOLVENTS**
U PLASTICIZERS
- CASTINGS**
NT INGOTS
NT PROPELLANT CASTING
- Carburization structure on surface of Mo and Nb castings cast in graphite molds showing changes in plastic properties of metals
04 p0619 A69-15391
- Metal castings around ceramic cores for economic manufacture of jet engines
09 p1503 A69-21907
- Titanium alloy castings fatigue behavior at room and elevated temperatures in annealed and heat treated conditions [ASME PAPER 69-GT-22]
09 p1619 A69-22497
- Cast high temperature alloys for gas turbine components, discussing production, temperature capability, composition, oxidation, hot corrosion and weldability [IME PAPER 10]
12 p2147 A69-25795
- Fatigue fracture surfaces in cast steel and Al alloys, studying fracture morphology, crack propagation rate and striation spacing with microfractographic methods
12 p2116 A69-26916
- Carburization structure on surface of Mo and Nb castings cast in graphite molds showing changes in plastic properties of metals
18 p3156 A69-35019
- Molten iron plane melt flow duration and mass in bimetallic castings production determined using nomogram
18 p3149 A69-35289
- Shrinkage cavity volume formulas for alloy castings with wide liquidus to solidus range, considering effects of diffused porosity and clustering for Mg alloy
20 p3548 A69-37329
- High quality castings unified standards for European aerospace industry
20 p3551 A69-38029
- Deformation rates effect on failure of cast aluminum alloys under various loading rates for tension and compression
21 p3746 A69-38958
- Large contoured nozzle fabrication using liquid epoxy as casting material, presenting molding process based on experimental data
24 p4318 A69-42643
- CASUALTIES**
- Hazards model for probabilistic prediction of casualties by exploding solid propellant rockets, deriving casualty expectation equation [AIAA PAPER 69-461]
16 p2869 A69-32749
- CATALASE**
- Optical Fourier transform applied to structural analysis of catalase crystalline media by gas laser
06 p0928 A69-17890
- Salts and organic solvents effect on halophilic Halobacterium cutriburum catalase, noting enzyme activity inhibition by cation and anion
18 p3096 A69-35291
- CATALOGS**
- Four color photometry data of late F type stars in general catalog tabulated with columns for HD and GC numbers, apparent visual magnitude, etc
18 p3195 A69-34430
- M 31 nebula radio continuum survey, describing discrete sources catalog and Andromeda nebula radiation distribution
20 p3601 A69-37493
- CATALOGS [PUBLICATIONS]**
- Catalog of meridian program star observations made in Brorfelde, determining position relative to FK 4 stars by using impersonal photographic micrometer
02 p0315 A69-11815
- Catalog of orbital elements for periodic comets during perihelion passage
10 p1777 A69-23396
- Pitch determination of micrometer screw by scalar star pairs derived from FK3 and Washington zenith catalog noting temperature and dampness effects
16 p2859 A69-32218
- Equinox and equator corrections of orientation elements of FK3 and FK4 catalogs based on meridian solar observations
17 p3027 A69-32871
- Bright and faint stars absolute declinations compared in vertical circle systems used in Goloseevo and Pulkov catalogs
17 p3027 A69-32872
- Parkes catalog of 1780 radio sources, noting inclusion of data concerning polarization, source structure, optical identifications, etc
17 p3045 A69-34199
- Radial velocity measurements with objective prisms and results in SA8
18 p3201 A69-35143
- Monte Carlo method for constructing catalogs of stellar positions, distances and velocities
20 p3605 A69-37829
- Radio source flux density values in revised 3C catalog determining spectrum, discussing effects of relativistic electron energy distribution, self absorption and spatial distribution
20 p3609 A69-38138
- CATALYSIS**
- Solvent effect in catalytic hydrogenation reaction of Schiff bases of alpha-keto acids with optically active alpha-alkylbenzylamine
12 p2026 A69-25779
- CATALYSTS**
NT ELECTROCATALYSTS
- Catalytic effect of potassium bichromate and chromic oxide additives on burning of ammonium perchlorate and mixtures
08 p1375 A69-19997
- Manganese catalyst photoreaction in photosynthetic oxygen evolution in Mn deficient alga Anacystis nidulans cells
13 p2210 A69-28257
- Double skeleton catalyst type VARTA fuel cell system for space power, using potassium hydroxide as electrolyte
16 p2739 A69-32418
- CATALYTIC ACTIVITY**
- Electroless deposition of various metals with emphasis on nickel, discussing mechanism, plating solutions, substrates, deposit properties and applications
01 p0099 A69-11060
- Metal oxides catalytic and inhibitory effects on photolysis of alanine by UV light
01 p0025 A69-11095
- Electron paramagnetic resonance study of interaction between adsorbed nitric oxide and NaY and decaionized Y zeolites surfaces, considering catalytic activity
02 p0205 A69-11900
- Heat and mass transfer by catalytic effect at wall, noting interaction of laminar boundary layer on flat plate
06 p1030 A69-17115
- Surface UV irradiated MgO powder catalytic activity for hydrogen-deuterium exchange reaction
07 p1073 A69-18374
- Burning rate catalysts mechanism and location in composite propellant combustion at high pressure
09 p1622 A69-21954
- Reaction kinetics between hydrazine and esters in benzene solution at 55 C, using amides as catalytic agents
14 p2409 A69-29033
- Heat and mass transfer interaction at wall for laminar boundary layer on flat plate, considering catalytic effect of wall in atomic nitrogen recombination
15 p2716 A69-30415
- Gas environment effect on catabolic activities and enzymatic reactions of trachoma and meningopneumonitis agents of genus Chlamydia
16 p2747 A69-31865

Solid fuel ignition with gaseous oxygen in presence of copper chromate and other catalysts

16 p2829 A69-31913

Packed bed catalytic reactors cooling capacity in promoting endothermic reactions of hydrocarbon fuels, using computerized temperature and composition profiles

[AIAA PAPER 69-588] 17 p3071 A69-33265

Catalytic activity enhancement of complex Co/III/ compounds on standing explained by hydrated Co/II/ ions appearance

17 p2988 A69-33433

Chemical species flux decay in turbulent boundary layer with catalytic wall, obtaining solution of conservation equation by using shear stress distribution

[AIAA PAPER 69-709] 17 p2955 A69-33480

Solar energy release by quark fusion catalysis of alpha reaction without production of neutrinos, noting temperature dependent reaction rate

18 p3186 A69-34643

Temperature and concentration measurements of H radical in hydrogen flames

21 p3669 A69-38807

Proton transfer mechanism of copper chromite catalyzed thermal decomposition of ammonium perchlorate, noting electron transfer

21 p3783 A69-38810

Catalyst poisoning and hydrazine material compatibility during hydrazine propulsion systems sterilization and decontamination

21 p3786 A69-39768

Catalytic, physical and chemical properties of enzyme lactate dehydrogenase isolated from lobster tail muscle

22 p3897 A69-41069

Properties, relative magnitudes and relationship of pyrophosphate exchange reactions catalyzed by DNA polymerase from *Escherichia coli*

22 p3898 A69-41072

Nonequilibrium boundary layer of dissociated diatomic gas over catalytic flat plate in hot hypersonic uniform flow

22 p3934 A69-41181

CATAPULTS

Aircraft steam catapult test facilities, noting construction and operational requirements

10 p1674 A69-24068

CATARACTS

Pulsed and CW microwave power effects on rabbit eyes, noting lens opacities produced

10 p1648 A69-23185

CATCHERS

Double gap catchers for klystron amplifiers and oscillators

07 p1095 A69-18432

CATECHOLAMINE

Epinephrine forming enzyme phenylethanolamine-N-methyl transferase (PNMT) in various brain regions of rats, cats, hens and turtles

10 p1644 A69-23303

Corticosteroid and catecholamine metabolism change in rabbits during sharp limitation of motor activity

12 p2021 A69-26973

Hypoxic hypoxia effect on catecholamine content and cytochemical changes in hypothalamus of cat exposed to simulated altitude, using Euler method

14 p2407 A69-29297

Beta adrenergic blockade in differential diagnosis of cardiovascular changes produced by stress induced catecholamine liberation and organic disease

17 p2909 A69-33184

Male patients urine tests during sinusoidal vibration, noting catecholamine excretion as criterion of emotional stress under various environmental conditions

21 p3654 A69-38909

Sotalol and propranolol cardiovascular effects, comparing toxicity and blocking action against circulatory and cardiac effects of catecholamines

23 p4080 A69-41403

Supersonic flying effect on urinary catecholamine excretion rates in pilots, noting emotional state

24 p4265 A69-43370

Positive pressure breathing effects on cerebral arterial and venous blood pressure, hypothalamus and adrenal glands catecholamine content and cerebrum histological changes in dogs

24 p4265 A69-43371

CATEGORIES

Information categories concept defined in relation to formulations of classical mechanics principles, considering theories of Newton, Gauss and Hertz

20 p3576 A69-37585

CATHETERIZATION

Electromagnetic catheter flowmeter with flexible sensor suitable for branch and artery application to minimize surgical intervention

22 p3889 A69-40058

CATHETOMETERS

Intravascular pressure and sound measured in anesthetized dogs and humans using fiberoptic pressure catheter

17 p2917 A69-34172

CATHODE RAY TUBES NT PICTURE TUBES

Laser CRT with beam pumped aluminized CdS crystals, discussing single spot low duty operation

01 p0039 A69-10175

CRT method of processing contoured data from hemispheric and global numerical models simulating general atmospheric circulation

01 p0109 A69-10539

Navigational and tactical data with correlative map information provided on single CRT display in aircraft, storing map data on video tape

03 p0464 A69-13246

Laser display technology, discussing experimental systems, light sources, modulation and scanning

03 p0431 A69-13850

Display techniques, discussing cold cathode luminous gas discharge /plasmas/ tube, electroluminescence and cathode ray tube

04 p0600 A69-15029

Histograms construction for azimuthal distribution of atmospheric data from visual and photographic data obtained by CRT display goniometer

04 p0593 A69-15102

CRT direction finder with linear scanning to determine statistical data for azimuthal distribution of atmospherics

04 p0600 A69-15104

Cathode ray curve tracer to record capacitance-voltage characteristics of p-n junctions

04 p0602 A69-15406

Plastic virtual infinity lens system for large aperture cathode ray tube direct view simulator displays

05 p0760 A69-15592

Photorecording techniques for command and control systems requirements, discussing association with large screen computer generated CRT projection display equipment

06 p0928 A69-17923

Dynamic cathode ray tube spot size measurement by two slit technique, noting relationship to beam current and luminance

21 p3719 A69-38329

CRT graphic display/plotter for small digital computers, describing device operation, control and applications

21 p3679 A69-39608

CRT display system coupling interface with magnetic storage determined from algorithms and time diagrams, describing character storage and system logic design

22 p3908 A69-40936

Automatic analysis and classification of images stored on 35-mm film using CRT flying spot scanner with computer control and memory

24 p4286 A69-42744

CATHODES

NT CELL CATHODES

NT COLD CATHODE TUBES

NT HOT CATHODES

NT PHOTOCATHODES

NT PHOTOMULTIPLIER TUBES

NT PHOTOTUBES

NT THERMIONIC CATHODES

NT TUBE CATHODES

Cathode emission site analysis by measuring prebreakdown current under ultrahigh vacuum conditions

05 p0800 A69-15740

Equivalent capacitance derivation of space charge limited current from filamentary cathode

05 p0734 A69-16567

Gunn effect for cathode contacts with interface resistance, developing control characteristic boundary condition concept for explaining cathode fall and other phenomena

07 p1199 A69-18649

Back bombardment of magnetron cathode as single surface multipactor, noting effects of cathode grooves and output loading

07 p1101 A69-18656

SERT 2 thruster hollow cathode durability tested in bell jar

[AIAA PAPER 69-304] 09 p1562 A69-21224

Hollow cathode mercury electron bombardment thruster design, emphasizing low specific impulse operation and discharge chamber improvements

[AIAA PAPER 69-300] 09 p1569 A69-21880

Gas laser materials, fabrication and performance, analyzing gas cleanup, cathode degradation, bore erosion and optical surface contamination effects

11 p1896 A69-24743

Heats of condensation and vaporization of W, Re and Mo cathodes of thermoelectric converter with Cs arc for various output powers and Cs vapor pressure

12 p2017 A69-26544

Incandescent cathode temperature effect on He-Ne laser output, ascertaining mixture parameters, cathode voltage and power dependence on discharge current

12 p2109 A69-26716

Tangential drag measurements at electrodes of arc in plasma accelerator, ion current partitioning at cathode and electrode damage

[AIAA PAPER 67-657] 13 p2312 A69-28219

Ionization manometer flange transducer with axial cathode and collector for high vacuum measurements, describing air resistant yttrium oxide coated cathode with Ir core

21 p3724 A69-39077

Cathode materials role in high temperature zirconia electrolyte fuel cell performance, discussing metals, collector-embedded and electronically conducting oxides properties

22 p3869 A69-40734

Electrochemical dimensional machining of metals and alloys with rotating cathode in parts manufacture from mechanically intractable materials

23 p4168 A69-41309

Electron emitters tested for gas laser operations, discussing nonreactive and reactive gases cases, matrix structures containing BaSrO and barium zirconate cathodes

23 p4172 A69-41394

Mush cathode fabrication and characteristics for high power klystrons, comparing efficiency to oxide cathodes

23 p4144 A69-42532

Step cathodic flux cleaning of furnace brazed Al assemblies used in combination with ultrasonic and chemical conversion coating techniques

24 p4319 A69-42938

CATIONS

NT METAL IONS

Rocket sounding for studying positive ions nighttime composition in E layer after magnetic storm at midlatitudes

02 p0239 A69-11686

Positive Ar ion energy distribution for beam extracted from nonmagnetic hot cathode gas discharge ion source under various source conditions

03 p0427 A69-13102

Electron and positive ion density measurements during nighttime auroral absorption event

03 p0421 A69-13327

Topside ionosphere composition data by energy spectrometer on satellite Ariel 1, discussing positive ions and diurnal, seasonal and secular variations

03 p0424 A69-13806

Cation concentration requirement of halophilic NADH dehydrogenase for stability and maximum activity

10 p1651 A69-23127

Sommerfeld type and Fermi type approximation analytical solutions of Thomas-Fermi differential equations for positive ions

10 p1726 A69-23525

Global coverage of positive ion composition and temperature, and electron density and temperature measurements during AURORAE mission of ESRO 1 satellite

13 p2253 A69-27753

Rocket sounding for studying positive ions nighttime composition in E layer after magnetic storm at midlatitudes

13 p2258 A69-28717

Binary encounter model for ionization by charged particle impact modified to evaluate cross section for ionization of positive ions by electron impact

14 p2489 A69-29996

Maximum likelihood methods applied to device performing ion swarm experiments, measuring positive ion mobility in hydrogen

16 p2788 A69-31670

Charge transfer cross section between mercury ion and Cs assessed, considering ion engine positive ion beam neutralization

16 p2835 A69-31895

Sporadic E ionization by rocket sounding, comparing positive ion density measurements with separate wind shear observations

16 p2780 A69-32310

Townsend discharge formation time determination, taking into account impact ionization in positive ion cloud moving from anode to cathode

19 p3381 A69-36603

Earth satellite sweeping mass spectrometer for measuring atmospheric neutral particle and positive ion concentration

19 p3314 A69-36681

Cations of sulphates photosensitizing role in photolysis of amino acids and peptides in various atmospheres

20 p3477 A69-37626

Drift velocity and lateral diffusion of positive hydronium, hydrogen and K ions in hydrogen with zero field mobilities

20 p3580 A69-38026

Effective Gaunt factors for threshold excitation of positive ions by electron collisions for 23 dipole transitions in 15 isoelectronic sequences

20 p3581 A69-38175

Cations desorption from O, H and N films adsorbed at graphite surface under electron bombardment, studying desorption cross sections discrepancies

22 p3972 A69-39957

Electron transport chain of monovalent and divalent cations and of polyamines, studying effects on menadione reductase activity to determine salt dependence

22 p3886 A69-41077

Ba titanate modifiers, classifying cations replacing Ti and Ba ions

22 p3996 A69-41161

Electrodialysis method for depleting positive Na, K, Ca and Mg ions from Anabaena flos-aquae A-37, noting algae survival rate

23 p4079 A69-41387

CATS

Respiratory pressure recording with tracheal cannulae applied on cats to obtain pneumograms and oscillograms of respiratory neurons

07 p1131 A69-18538

Ventral posterolateral potentials in anesthetized immobilized cats in response to electric stimulation of mesenteric nerves and mechanoreceptors, studying thalamus nucleus role

12 p2020 A69-26562

Immobilization effects on alpha rhythm, locomotor coordination and visual alimentary motor reflexes of cats

13 p2212 A69-28617

Hypoxic hypoxia effect on catecholamine content and cytochemical changes in hypothalamus of cat exposed to simulated altitude, using Euler method

14 p2407 A69-29297

Histological and histochemical studies of dephosphorylating enzyme distribution in muscle spindle capsule of guinea pig thigh muscles and cat calf muscles

15 p2554 A69-30406

Cortical auditory-evoked response during eye movement in cats, discussing relation to central mechanism

17 p2911 A69-34171

Two body mechanical system operating within dynamics laws simulating backward and forward bending motions of falling cat

19 p3259 A69-36832

Cats vestibular neurons reactions to labyrinths mon- and binaural polarization and caloric stimulation

20 p3471 A69-37255

Stimulation effects of reticular formation, hippocampus and septum on sensory responses of posterior hypothalamic neurones in cats

21 p3656 A69-38979

Cortical and thalamic evoked activities changes during sensory conditioning of freely moving cat

22 p3872 A69-40160

Unit activities in cerebellar cortex by auditory stimulation in cats, discussing response patterns obtained by histograms

22 p3876 A69-40264

Local electroretinogram responses produced in cats by light intensity incremental changes

22 p3878 A69-40835

Neuronal organization of initial afferent inflow in thalamic visual center /lateral geniculate body /LGB/ of unanesthetized cats/, noting unit activity

22 p3879 A69-40845

Psychopharmacological drug effects on retinal neuron activity in cats measured by microelectrodes, noting spontaneous activity decrease

22 p3879 A69-40846

Psychopharmacological drug effect on visually evoked responses in cats from recordings from visual cortex, noting latencies increase with dose

22 p3879 A69-40847

Cat intraretinal DC component and b-wave separation based on sensitivity to visual stimuli, discussing electroretinogram recorded with microelectrodes

22 p3883 A69-40881

High intensity flash effects on local electroretinogram, late receptor and slow potentials and ganglion cell activity in area centralis of cat retina

22 p3883 A69-40882

Arterial occlusion effects on retinal structure in cats, describing degrees of cell degeneration

22 p3884 A69-40883

Anesthetized cats with electrodes in visual cerebral cortex, investigating simulation of conditioned alimentary reflexes in response to light signals by electric signals

22 p3885 A69-41066

Functional relation between primary response individual phases and neurons activity in cats cerebral cortex

22 p3886 A69-41067

Electric responses of anterior and posterior gyrus cinguli to stimuli of sciatic nerve in cats

22 p3886 A69-41175

Cortical biopotentials in cats induced by strychnine under acoustic click stimuli of increasing intensity

22 p3888 A69-41270

Feline lung injury produced by vertical sinusoidal vibrations during upright water immersion attributed to chest wall impact

23 p4082 A69-41447

Positive phase shift relation to elastic modulus enhancement of smooth muscles of rabbit, cat and dog bladder, pulmonary artery and large veins

23 p4083 A69-41459

Reflex activity of single preganglionic sympathetic fibers during coronary occlusion in cats, discussing left third thoracic /T3/ ramus communicans

23 p4084 A69-41460

Cat papillary muscle length-tension curves before and after inotropic intervention, noting optimal length changes

23 p4084 A69-41461

D-amphetamine effect on single tectal neurons activity of cat opticum recorded by steel microelectrodes before and after intravenous injection

23 p4084 A69-41466

Temperature dependence of afferent and efferent spontaneous activity of spinal cord, using filament recordings from ventral and dorsal roots in anesthetized cats

23 p4093 A69-42066

Spinal cord temperature effect on stretch responses of muscle spindle endings of triceps surae, anterior tibialis and extensor digitorum longus in anesthetized cats

23 p4093 A69-42067

Efferent innervation influence of one ear to another in feline auditory system, based on afferent neurons responses to contralateral and binaural stimulation

23 p4094 A69-42073

Cat hearts ventricular pressure curves dv/dt and dp/dt correlated with left heart ventricle mechanical performance

23 p4095 A69-42076

Primary muscle spindle afferents from gastrocnemius muscle of cat before, during and after cold shivering, utilizing ramp stretches of same muscle

23 p4096 A69-42091

Spinal cord temperature influence on stretch response of tonic and phasic alpha-motoneurons by filament recordings from ventral roots in anesthetized cats

23 p4098 A69-42099

Isometric contraction tension after sudden isotonic to isometric contraction mode change in cat papillary muscle, discussing temperature effects, tension development changes, etc

24 p4258 A69-42631

CAUCHY PROBLEM

Difference methods in solution of incorrect Cauchy problem simulating ideal gas flow in nozzle

01 p0006 A69-10379

Cauchy problem correctness for one dimensional hyperbolic equation of arbitrary order with data on degeneracy line

01 p0104 A69-10699

Nonlinear interaction between longitudinal Langmuir waves and parallel wave vectors in heated plasma fluid, based on Cauchy problem of kinetic equation for electron distribution

02 p0285 A69-11461

Cauchy-Poisson problem for viscous liquid, calculating free liquid surface response to point impulse or initial displacement

03 p0414 A69-13015

Cauchy problem and mixed boundary value problem for parabolic system solved with thermal potential theory

03 p0455 A69-13259

Finite difference methods to solve Cauchy problem for three dimensional Laplace equation

03 p0424 A69-13661

Operator methods in engineering sciences, discussing integral transformations, Riesz method application to Cauchy problem, etc

03 p0457 A69-13744

Riemann boundary value problems for n pairs of functions, noting relation to validity of Noether theory

04 p0622 A69-14513

Computer solution of Cauchy problem of ordinary differential equations in form of Taylor series

04 p0622 A69-14624

Cauchy equation derived, giving rise to definite differential equation for materially uniform elastic bodies with inhomogeneities

05 p0834 A69-15730

Existence and uniqueness of solution to Cauchy problem for class of second order nonlinear differential equations, applying results to mixed boundary value problem

05 p0786 A69-16061

Approximate methods for integration of equations of plane isentropic motion of gas at supersonic velocities

05 p0699 A69-16674

Riemann problem in regions, showing integral operators become bounded if closed rectifiable Jordan curve without cusps becomes curve of bounded rotation

06 p0947 A69-16893

Three dimensional steady/unsteady flows of conducting inviscid gas in magnetic field, in absence of electric field, solving related Cauchy problem

06 p0966 A69-17541

Cauchy problem for nonstationary linearized Navier-Stokes equations for fixed container partially filled with liquid

06 p0959 A69-17888

Incorrect problem solving method applied to Cauchy problem solution for nonlinear partial differential equations, considering Ritz method applicability

07 p1174 A69-19005

Stability and perturbation theory of abstract Cauchy problem with difference scheme, showing application to parabolic differential equations

08 p1343 A69-20537

Cauchy problem of invariant imbedding satisfying nonlinear boundary value problem, discussing optimal control and radiative transfer applications

09 p1531 A69-21413

Singular perturbations for Cauchy and boundary value problems, considering differential operators and Hilbert space

10 p1720 A69-23635

Existence and uniqueness of solution to Cauchy problem for class of second order nonlinear differential equations, applying results to mixed boundary value problem

10 p1721 A69-23885

Existence theorems for hyperbolic genuinely nonlinear systems of conservation laws, studying Cauchy problem

11 p1909 A69-25163

Cauchy problem solution for linear/nonlinear differential equations with analytic right hand sought in form of power series

12 p2120 A69-26199

Difference methods in solution of incorrect Cauchy problem simulating ideal gas flow in nozzle

12 p2012 A69-26671

Pseudodifferential operators theory application to uniqueness of solutions of Cauchy problem

12 p2124 A69-26930

Cauchy problem for initial functionals, determining spherical limiting harmonic function for solution stabilization

13 p2375 A69-27795

Nonnegative solutions of second order linear divergence structure parabolic differential equations, discussing Cauchy problem solution, Green function, etc

13 p2290 A69-28539

Asymptotic behavior of function in Cauchy problem solution for heat conduction, basing method on Laplace transform inversion formula

13 p2380 A69-28685

Dynamic programming method applied to Cauchy problem of large deflections in compressed rods, using recurrent functional equations

14 p2533 A69-28988

Two point boundary value problem converted into Cauchy problem, deriving power series solution method and algorithms for nonlinear problems

14 p2430 A69-29362

Cauchy problem for Bellman dynamic programming equation in automatic control time minimization

14 p2426 A69-29478

Riemann problem with arbitrary jump data for extended hyperbolic systems of equations, showing conditions for unique solution

14 p2433 A69-29678

Functional analysis methods to solve Cauchy problem for linear nonhomogeneous differential equations with delayed argument

15 p2643 A69-30101

Averaging procedure for solving Cauchy problem applied to two point boundary value problem for nonlinear differential equations

15 p2644 A69-30449

Modified Chaplygin method for approximate integration of Cauchy problem for differential equations, estimating rate of convergence

15 p2644 A69-30656

Pseudo Runge-Kutta methods stability in numerically integrating two point Cauchy problems

15 p2646 A69-31261

Plane Cauchy problem solution for differential equations in heat and mass transfer theory, applying contour integral method in matrix construction

15 p2719 A69-31262

Forced harmonic oscillations of one dimensional mechanical girder systems allowing for nonlinear resisting forces calculated by boundary value problem reduction to Cauchy problem

17 p3064 A69-33917

Cauchy problem for homogeneous linear difference scheme with constant complex coefficients, giving stability lemmas

18 p3165 A69-35049

Multiple characteristics and Levi-Lax conditions for hyperbolicity to prove correctness of Cauchy problem

18 p3165 A69-35277

Asymptotic behavior of solution to parabolic equation for t approaching infinity, proposing asymptotic formula to Cauchy problem for heat conduction

18 p3231 A69-35310

Generalized Cauchy problem solution stabilization for ultraparabolic equation by integral representation of solution in positive initial functionals

18 p3165 A69-35312

Gas dynamics equations solution applied to Cauchy problem

19 p3297 A69-35861

Global properties of solution of inverse detached shock problem analyzed by characteristic coordinates at low Mach number

19 p3301 A69-36788

Homogeneous deformations of space and Cauchy problem for homogeneous free molecular motions, considering velocity fields and accelerations

19 p3444 A69-36803

Heat conduction in medium with phase transitions, solving one dimensional nonlinear problem by calculation of isotherms and reduction to Cauchy problem

19 p3453 A69-36838

Nonlinear partial differential equations numerical solution applied to solving Cauchy problem encountered in Goursat problem

20 p3569 A69-38293

Cauchy problem solution for first order nonlinear Volterra integrodifferential equation, using Runge-Kutta method

20 p3569 A69-38294

Nonlinear relativistic wave velocity distribution within spherical nucleus bounded by shock wave in superdense gas determined by Cauchy problem

22 p3861 A69-41114

Cauchy problem for partial differential equations linear parabolic system with coefficients depending on unknown functions

23 p4181 A69-41410

Absolute invariance conditions for closed isolated subsystem of nonlinear differential equations of Cauchy normal form

23 p4183 A69-42372

CAVES

Collapse theory of dimple craters, analogies with terrestrial sink holes and dimple craters as channels for gas escape from interior

05 p0818 A69-15589

CAVITATION CORROSION

Temperature and pressure effect on cobalt base alloy cavitation in liquid sodium, using vibratory apparatus and loss rate contour diagram

18 p3157 A69-35184

Hydraulic systems incipient failure detection, discussing destructive cavitation, component defects, human error, etc

19 p3255 A69-36018

CAVITATION FLOW

Inviscid cavity and wake flows behind submerged bodies, analyzing mathematical and theoretical models

04 p0587 A69-14608

Cavitation stream calculation methods for ideal incompressible fluid with free boundaries, noting cavitation generators and Riabouchinsky problems

04 p0589 A69-14994

Jet pump head rise deterioration parameter for prediction of cavitation

05 p0745 A69-15791

Laminar natural convection in enclosed rectangular cavity, discussing temperature gradient effects

06 p1033 A69-17556

Approximation method applied to closed viscous streamline flow in rectangular cavity, discussing constant shear stress boundary condition

08 p1304 A69-20811

Digital computer method for Navier-Stokes equation in prototype cavity flow problems, noting applications to biharmonic problems

08 p1305 A69-20831

Global characteristics and similarity of ventilated cavity flows by injecting air behind immersed profiles of symmetrical wedge at zero incidence

10 p1680 A69-23788

Stress waves analysis of brittle fractures, considering loading time role and cavitation of viscous fluids relation to fracture incipience

13 p2275 A69-27229

Radial liquid flow between flat annular rings /face seals/, discussing film cavitation

13 p2267 A69-27365

Heat transfer coefficients for supersonic open cavity flow recompression steps noting influence of step and flow shapes

13 p2375 A69-27786

Ablation injectants effect on supersonic stream pressure distribution inside cavity and upstream boundary layer velocity profiles

16 p2770 A69-31902

Convective heat transfer in centrifugal force field of cavity between two rotating disks in turbulent gas flow

16 p2837 A69-32139

Dielectric breakdown thresholds and cavitation in organic liquids observed during Q switched and pulsed ruby radiation

17 p2979 A69-32826

Noncavitating and cavitating performance of low area ratio water jet pumps, analyzing efficiency, area ratio, throat length, nozzle spacing and diffuser geometry

18 p3095 A69-35176

Water jets with greater than half sound speed created by shock wave impinging on cavity within liquid, discussing mechanism, maximum speed, shape, etc

19 p3301 A69-36815

Flow characteristics and wall heat transfer in separated flow region of annular cavity at free stream hypersonic speed and high gas temperature

[AIAA PAPER 68-672] 20 p3458 A69-37185

Desinent cavitation on hemispherical nosed bodies in water at various temperatures and velocities, considering isothermal case for surface nuclei

[ASME PAPER 69-FE-1] 20 p3516 A69-37986

Continuous cavitation model for incompressible fluid one dimensional unsteady motion

21 p3693 A69-38752

Cavitation flow of water and ethyl alcohol in venturi tube, noting effect of varying vapor concentration and thermodynamic properties

21 p3696 A69-39101

CAVITIES

NT PINHOLES

Rapid uniform expansion of spherical cavity in compressible elastic-plastic solid, obtaining similarity solution

03 p0528 A69-13798

Axisymmetric stress field around spheroidal inclusions and cavities in transversely isotropic material

[ASME PAPER 68-WA/APM-14] 04 p0669 A69-14400

Unsteady two dimensional flow in square cavity with fluid initially at rest and constant velocity upper surface of cavity, noting vortex center

[AICHE PAPER 25C] 04 p0587 A69-14510

Heat transfer and drag of cylinders with cavities at hypersonic speeds measured by platinum film thermometer and strain gauge balance in gun tunnel

[DVL-850] 04 p0543 A69-14822

Cavities elongation in automatic inert gas shielded welds in titanium alloys

05 p0767 A69-15972

Convection in conducting fluid filled cavities with variable wall temperature due to magnetic field, with results applicable to rheological systems

07 p1241 A69-18921

Thermal gradients in artificial satellites, considering heat exchange among various points of closed cavity surface by gray body diffuse radiation and reflection

08 p1421 A69-20157

Hollow turbine disks for provision of coolant to high performance aircraft gas turbine engines, fabricating disk in two axial halves

09 p1509 A69-22345

Plasma cavity shape formed by magnetic field effect due to several parallel line currents

[ISAS-433] 09 p1553 A69-22569

Self similar solutions for collapse of empty cylindrical cavity in gas with given equation of state, describing gas motion past cavity

10 p1679 A69-23367

Stress concentration at holes and cavities in thin elastic shells under static and dynamic loads, considering physical nonlinearities of material

11 p1974 A69-24665

Numerical method for coupled moments of inertia and integral equations of boundary value problems for fluid in moving cavities

11 p1868 A69-24774

Helical motions of body bounded by multiply connected surface immersed in infinite ideal incompressible fluid, discussing congruence

11 p1868 A69-24790

Cavity formation on water and wet cement surfaces by impingement of axisymmetric air jet noting cavity shape, depth and diameter

11 p1869 A69-24888

Optimum controller design for dynamic stability of ideal incompressible fluid in cavity of body constrained to horizontal rectilinear translational motions

11 p1966 A69-25330

Two and three dimensional quasi-static problems in coupled thermoelasticity, obtaining solutions for space containing cylindrical cavity and for solid cylinder

12 p2177 A69-25993

Shadow zone diffraction of plane step function compressional wave by circular cavity, using Friedlander wave front approximations

13 p2368 A69-28347

Membrane analogy for flexure of prismatical beams with square cross section and longitudinal cavities, employing Saint-Venant solution

15 p2704 A69-30288

Parametric interaction of electromagnetic field with spherical cavity having time variable radius, considering wave diffraction and TM oscillations

16 p2751 A69-32029

Creep experiments on Mg alloys, discussing dispersed phases influence on creep cavitation and grain boundaries mobility

17 p2985 A69-32907

Surface cavity profiles created by pulsed laser on Ti, Al, Cu, Pb and Zn, compared with isotherms computed from heat conduction models

20 p3552 A69-36917

Shrinkage cavity volume formulas for alloy castings with wide liquidus to solidus range, considering effects of diffused porosity and clustering for Mg alloy

20 p3548 A69-37329

Monograph on motion of solid body with cavities containing viscous liquid, covering kinetics involving completely or partly filled fluids

20 p3578 A69-38200

Differential equations for variable mass solid body motion about fixed point having cavities filled with ideal fluid

21 p3771 A69-39106

Natural convection in rectangular cavity with nonuniform lateral surfaces temperature, using finite difference scheme with numerical analysis

21 p3855 A69-39853

Anisotropic porous media model for fluid motion in rectangular fuel cell cavities, analyzing pressure, velocity, stream functions and purge time

23 p4075 A69-42300

Compressible gas flow into cavity of various volumes in presence of supercritical pressure gradients

24 p4298 A69-42587

CAVITY RESONATORS

Maximum power efficiency of pulsed injection laser with Fabry-Perot cavity expressed in terms of two dimensionless geometric variables

01 p0089 A69-10119

Optimum coupling for intracavity second harmonic generation in multilevel lasers

01 p0089 A69-10181

Microwave selective filter using resonant cavity with single coupling component in feedback circuit of amplifier traveling wave tube or klystron

01 p0042 A69-10384

Intracavity laser diffraction gratings for single wavelength output

01 p0092 A69-10897

Cavity excitation and support of limited space-charge accumulation mode oscillations in n-GaAs epitaxial diode

02 p0297 A69-11940

End to end cavity oscillators, folded line type cavity oscillators and reentrant cavity oscillators for use with disk seal tubes, pencil tubes and metal-ceramic tubes

02 p0216 A69-12029

Submillimeter wave oscillator/orotron/ involving open resonator with mirror having reflection grating period less than wavelength

02 p0250 A69-12248

Weak signal interaction between electron beam and microwave resonators, obtaining electron conductance, gain and transfer admittance

02 p0208 A69-12265

Cavity stabilization of microwave oscillator for noise reduction

02 p0220 A69-12451

Pumping beam width influence on optical range resonator excited coupled oscillations, deriving approximate equations

03 p0437 A69-13043

Parametric light generation in resonator with nonlinear medium, discussing continuous pumping with laser modes matched with pumping frequency

03 p0437 A69-13044

Parametric light generation employing KDP nonlinear crystals with mechanically tuned frequency

03 p0437 A69-13045

Nonlinear influence of resonator losses on stimulated emission of ruby laser, noting cut-off action

03 p0439 A69-13058

Geomagnetic field topology of nighttime magnetosphere, showing pi 2 pulsations excitation mechanism in terms of Alfvén waves resonance in external cavity

03 p0423 A69-13524

Single transverse electromagnetic mode power output for laser radar transmitter, using near hemispherical mirror resonator

04 p0609 A69-14287

Traveling waves interaction effects on emission modes of gas laser with circular resonator

04 p0611 A69-14545

258 GHz reflection amplifier with saturated gas resonance, analyzing amplification variation with gas pressure, pumping power, frequency, Q values and cavity tuning

04 p0557 A69-14754

Helium-neon gas laser cavity beam for automatic high speed particle sizing

04 p0611 A69-15023

Attenuation calibration of optical resonator using transparent plate coated by thin metal layer

04 p0613 A69-15415

Frequency vs power absorption characteristics of deactivated klystrons, noting resonance frequencies and perturbation effect of electron beam loading

05 p0729 A69-15978

Input admittance of confocal Fabry-Perot resonator, with waveguide coupled infinitely long conic-section cylindrical reflectors, taking into account diffraction and resistive losses

05 p0731 A69-16295

Two cavity large storage box atomic hydrogen maser, obtaining self excited oscillations coupled with high gain amplifier [IEEE PAPER C-8]

05 p0774 A69-16310

Composite equivalent circuits method for complex waveguide-resonator couplings based on variational principle for admittance matrices of electromagnetic volume couplings

05 p0736 A69-16785

Resonant frequencies and fields in circular cylindrical microwave cavity containing cold uniform magnetoplasma dielectric

06 p0968 A69-17763

Coupled cavity short slit delay lines in high power traveling wave tubes

07 p1095 A69-18428

Design of coupled cavity extended interaction output resonators for klystron amplifiers

07 p1095 A69-18431

Double gap catchers for klystron amplifiers and oscillators

07 p1095 A69-18432

Traveling wave microwave and optical resonators synthesis, determining design conditions for resonant frequencies

07 p1145 A69-18477

Sideband amplification via saturated gas resonance in 258 GHz reflection amplifier with hydrogen cyanide gas filled cylindrical cavity

07 p1145 A69-18479

X band internal cavity voltage tunable magnetron operating in theta mode, solving output loading, interaction limitations and cavity dimensions

07 p1102 A69-18670

Doped crystal and gas lasers, discussing resonant cavities, axial modes, relaxation oscillation, mode locking and Lamb theory

08 p1323 A69-19869

High Q capacitance loaded coaxial cavity resonator for study of electric susceptibility of ionized gas

08 p1313 A69-20214

Frequency shift and Q change of microwave cavity caused by lossy dielectrics and plasmas, examining perturbing volume requirements for conductor behavior

09 p1544 A69-21323

Fabry-Perot resonator and beam waveguide systems for laser beams, noting mode coupling and separation in laser optical systems

09 p1518 A69-22125

Cavity system for constructing paramagnetic masers with different active materials

09 p1519 A69-22288

Quasi-static modified field distributions in inhomogeneously filled cavities and waveguide tubes, comparing with homogeneously filled cavities and obtaining matrix eigenvalues

09 p1467 A69-22561

Laser resonator loss factor and axial mode frequencies calculation by interferometry

09 p1520 A69-22679

Two mirror resonators, discussing curvatures formation and stability conditions to derive natural frequencies

09 p1520 A69-22680

Gas laser output increase by nonconstricted discharge in aluminum tube cathode with mirror resonator

09 p1520 A69-22681

Linear ion accelerators noting particle motion, RF cavity design, RF power sources, injection and applications

09 p1553 A69-22697

High density plasma in resonant cavity obtained by frequency shifting power source

10 p1727 A69-22955

Resonator interferometry of pulsed submillimeter wave lasers, analyzing mode structure, pulse shapes and molecular mechanism of laser emission

10 p1705 A69-23810

Resonator field inhomogeneities effect on transient processes in quantum oscillator, considering two active crystals in cavity

10 p1705 A69-23948

Perturbation theory applied to emitting density matrix in nonlinear polarization of resonance media, considering gas laser in coaxial magnetic field

11 p1895 A69-24630

Ideal mode conversion and transmission by circular aperture of cylindrically symmetric cavity

11 p1899 A69-25056

Electromagnetic fields in cylindrically symmetrical microwave resonator filled with premagnetized ferrite along cylinder axis

11 p1855 A69-25625

Gallium arsenide junction laser resonant modes from theoretical model, calculating frequency separation

12 p2108 A69-26637

Inhomogeneous permittivity and boundary effects influence on electric fields of laser with open cavity containing inhomogeneous active medium

12 p2110 A69-26908

Frequency memory in cavity controlled Gunn oscillators, discussing loop gain and bandwidth dependence on oscillation mode and bias voltage

13 p2229 A69-27677

Microwave cavity bandwidth determined from reflection coefficient measurements, considering reflection magnitude and phase

13 p2223 A69-28606

Noncollinear single cavity optical parametric oscillation with specified energy conversion using ruby laser-pumped lithium niobate, discussing tuning

14 p2460 A69-29605

Waveguide below cut-off resonators for active microwave circuits, describing experiments with avalanche and Gunn diodes

15 p2577 A69-30613

Characteristics of neodymium-glass laser with unstable resonator noting transverse modes and radiation angular distribution

15 p2634 A69-30730

Laser cavity optimization for producing minimum short light pulse width in fast Q switching of optical maser

16 p2796 A69-31802

Electromagnetic fields in closed one dimensional resonators with oscillating boundary, analyzing amplitude buildup

16 p2751 A69-32030

Electromagnetic cavity resonances in rotationally induced gravitational field by relativistic approach

16 p2812 A69-32048

Nonlinear response of single Helmholtz resonator subjected to finite amplitude pressure oscillations, detailing entrance, orifice and cavitation flow [AIAA PAPER 69-481]

16 p2844 A69-32719

Multiple mode phase locking of He-Ne laser with fixed cavity length and laser tube fixed position in cavity, generating high speed optical pulses

17 p2980 A69-32957

Geomagnetic field effects on microwave noise spectrum in earth-ionosphere resonator, calculating field energy spectrum near resonance maximum, discussing excitation by lightning

17 p2918 A69-33034

Broadband intracavity SHF modulation of He-Ne laser emission in 10 cm band, showing agreement with calculations

17 p2981 A69-33112

Modified liquid fueled pulsating combustion chamber operating as Helmholtz cavity resonator, measuring chamber pressure as function of time

17 p3074 A69-33410

Automatic tuning of superconducting cavity resonant frequency using optical feedback, discussing phase error processing and frequency deviation

17 p2937 A69-33781

Superconducting cavities for resolving optically induced changes in dielectric constant of CdS at 4.2 K

17 p3016 A69-33782

Wave excitation in resonant dissipative and inhomogeneous structures, discussing resonator geometry, mode spectra, etc

17 p2926 A69-33849

Simultaneous integral equations numerical solution for open optical resonator mode analysis, using kernel function and Fresnel approximation

17 p2983 A69-33883

Diffraction of modal field by semimfinite waveguide, integral representation for Wiener Hopf kernel factorization and applications to open resonators

17 p2930 A69-33888

Transformed kinetic equation used to study relaxation of quantum oscillator to thermodynamic equilibrium state

18 p3152 A69-35126

Radiation emission by molecules in electromagnetic field, considering cavity resonators and waveguides excitation

18 p3178 A69-35404

Tunnel diode coupling with spheroidal resonant cavity, describing method of measuring elements for interpretation

19 p3283 A69-35998

Stable mode generation in ruby laser with ability for modulation, using convex resonator and uniform illumination

20 p3553 A69-37607

Simultaneous mode locking of Nd YAG laser and intracavity second harmonic generation in high temperature Li niobate or BaNa niobate

20 p3555 A69-37731

Holographic image range contouring produced by multifrequency emission from resonant output reflector in pulsed ruby laser cavity

20 p3540 A69-37733

Amplification saturation in spatially inhomogeneous laser field, relating power to active medium and resonator parameters

21 p3740 A69-39549

Annular gas laser cavity designs with additional mirrors for longitudinal oscillation mode selection, noting positive results for He-Ne laser

21 p3740 A69-39553

Eigenmodes of asymmetric cylindrical confocal laser resonator with single output coupling aperture, obtaining diffraction loss factors and mirror field distributions

21 p3741 A69-39564

Accuracy and frequency stability of H masers in terms of wall collision effect and cavity resonator tuning

21 p3741 A69-39685

Axial mode frequencies, loss coefficients and optimal parameters of three and four mirror resonators of gas lasers, including designs with maximum selectivity

22 p3964 A69-40796

Mirror mount for shock tube laser cavity with alignment capability, noting seal against internal pressures

22 p3951 A69-41233

Longitudinal modes locking and ultrashort light pulse generation in laser cavity resonator with nonlinear refractive index

23 p4171 A69-41389

Discrete delay line measuring FM noise, discussing special case of narrow band cavity resonator method

23 p4137 A69-41606

Time dependent natural oscillations of plane open resonators infinite periodic sequence, considering electromagnetic energy transfer into ambient medium

23 p4139 A69-42039

Laser quantum theory compared to stationary atoms semiclassical theory, emphasizing role of cavity mode spatial structure

24 p4327 A69-42789

Laser cavity modes phase equality demonstrated by oscilloscope trace in two photon fluorescent method

24 p4327 A69-42981

Polarization characteristics of He-Ne ring laser emission with circularly anisotropic resonator, analyzing ellipticity as function of half wave cavity plate

24 p4328 A69-43160

GaAs laser diodes differential external quantum efficiency and gain per unit length dependence on laser resonator length, taking into account optical losses

24 p4330 A69-43767

GaAs junction laser total stimulated light power dependence on resonator length taking into account optical losses

24 p4330 A69-43768

Self gravitating pulsating cylindrical and ring shaped cosmic masses from group theory standpoint compared with oscillating stars

01 p0148 A69-10124

Faraday angle of rotation of radio signals polarization plane from satellites and celestial bodies

01 p0030 A69-10574

Differential rotation of celestial body maintained in resonance state by locking photosphere oscillation onto rotational period

01 p0156 A69-11136

Astronomical alignment accuracy by rocket Cassiopeia system, discussing scientific payload rotation and orientation by celestial bodies

03 p0462 A69-12850

Pulsar characteristics absence in X ray sources, noting data for Scorpius XR-1

07 p1218 A69-19254

Bright celestial IR sources in Ursa Major detected in spectral region by rocket-borne telescope, discussing luminosities of quasi-stellar sources

09 p1603 A69-22230

Isophot system characterizing photometric structure of elongated celestial objects constructed by equidensitometric method based on Sabatier photographic phenomenon

11 p1952 A69-24255

Optical sensing devices for angle measurement between celestial body and satellite axes

12 p2078 A69-25871

Correlation coefficients, comparing galactic X ray sources distribution with classical cepheids, old novae, planetary nebulae and Wolf-Rayet stars

12 p2171 A69-27155

Resonant long-period orbits around Lagrange equilateral points for critical mass ratio of main bodies

13 p2346 A69-27706

Q switched ruby laser designed for lidar probing of cosmic bodies and earth atmosphere

14 p2460 A69-29660

Measured atmospheric refraction of bright astronomical objects less than calculated data for large zenith distances

15 p2679 A69-30161

Faraday angle of rotation of radio signals polarization plane from satellites and celestial bodies

15 p2568 A69-30744

Dim astronomical sources observability from sunlit spacecraft, considering coma of micron sized ice crystals influence on scattering by condensation model

16 p2861 A69-32301

Solar radiation pressure windmill effect in rotational bursting and elimination from solar system of small magnetic celestial bodies

21 p3814 A69-39584

IC 3258 emission line spectrum observations, discussing blueshift, extragalactic location, possible nature, etc

23 p4219 A69-42374

CELESTIAL MECHANICS

N-body problem in celestial mechanics, using differential equations, reduced to quadratures [UN PAPER 68-95268]

01 p0150 A69-10476

Perturbations on major axes of slow moving comets in nearly parabolic original orbits by fast moving stars, discussing statistics of stellar encounters

01 p0153 A69-10871

N body systems with/without external field, noting galactic field effect on system flattening

02 p0322 A69-12270

Collective stability of collisionless gravitating systems based on variational principles resembling energy principle

02 p0323 A69-12275

Coordinates interpretation in Schwarzschild problem, projecting space of events by light beams onto Galilean system at infinity

03 p0506 A69-13090

French atlas of planets covering ancient and modern planetary system and discoveries, physical nature and movement, etc

03 p0513 A69-13778

Capture of comets by large planets

03 p0517 A69-14128

Current state and research trends in celestial mechanics, discussing satellite orbit, planetary flight and other astrodynamical problems

03 p0517 A69-14223

Hill stability in unbounded three body problem, analyzing motion in baricentric coordinate system, deriving equations for curves defining conditions for stability

04 p0652 A69-14543

Stellar escapes from clusters and temporary captures in restricted three body problem with equal masses

05 p0827 A69-16595

Regularization of perturbed Keplerian motion in three dimensional space by means of Levi-Civita transformation generalized to three dimensions

05 p0827 A69-16602

Approximate solution of celestial mechanics differential equations by reducing to quadratures for n body problems

06 p1006 A69-17566

Soviet book on theoretical astronomy covering evolution from Ptolemy to Einstein, universal gravitation and principles of celestial mechanics

07 p1211 A69-18544

Stellar orbits in galactic plane represented as generalized Keplerian motion

08 p1381 A69-19792

Partially translatable one parameter continuous transformation group for complete system of integrals in celestial mechanics, discussing Wintner nonisolating integral and Poincare theorem

08 p1382 A69-19872

Space motions of bright F type stars from parallaxes obtained by photometry

08 p1386 A69-20074

Final motions of Hamiltonian conservative systems, analyzing Liouville type, homogeneous and similar systems

09 p1540 A69-21882

Particular solutions relative to system of invariant relationships in involution

09 p1596 A69-22049

General solution of Liouville equation for collisionless system of gravitationally interacting particles, with distribution function locally isotropic in momentum space

09 p1605 A69-22412

Intermediate orbits to construct motion theory of natural satellites of all planets

11 p1952 A69-24253

Stability of steady state motions of nonholonomic mechanical systems, noting Chetaev method for construction of Liapunov functions

11 p1920 A69-25742

Quasi-stochastic nonlinear one dimensional oscillations in periodically disturbed field applied to celestial mechanics of planetoids

12 p2130 A69-26373

Spiral galaxies rotation curve fluctuations attributed to kinematic properties of galactic matter and gas components

12 p2170 A69-27062

Hydromagnetic stability of spiral arm embedded in gravitating medium from analysis of instability of self gravitating incompressible cylinder

13 p2346 A69-27705

Restricted three body problem of conservative Hamiltonian systems with two degrees of freedom and mass ratio parameter, considering phase space around L sub 4

13 p2346 A69-27711

Messier 51 ionized hydrogen observations, discussing H II regions, radial velocities and galactic mass, rotation and noncircular nuclear motions

13 p2347 A69-27720

Comet Arend-Roland type-1 tail characteristics including accelerating disturbance, outward-moving waves, tail inclination, etc

13 p2349 A69-27816

Solar system light elements investigated assuming Li, Be and B abundance as nuclear reaction products of high energy particles accelerated in early sun formation
13 p2354 A69-28495

Coordinates interpretation in Schwarzschild problem, projecting space of events by light beams onto Galilean system at infinity
14 p2516 A69-28772

Fundamental principles of thermodynamics incorporation into general relativity and geometrodynamics, interpreting entropy growth in terms of space dynamics
14 p2538 A69-29019

Close galactic encounters in dense galactic clusters, discussing effects on internal motions dispersion and stellar dissipation
14 p2521 A69-29461

Celestial mechanics, Part 1, covering almost periodic functions, relation to classical astronomy and modern mathematics, implicit function theorem, three body problem, etc
18 p3199 A69-34928

Tabulated coherent S-band Doppler data from Pioneer 6 and 7 radio tracking, improving astronomical constants and ephemerides for earth-moon system [AAS PAPER 68-130]
20 p3595 A69-37179

Planet Mars opposition to earth, Jupiter and Saturn, including table showing Mars-Jupiter conjunctions
21 p3801 A69-38788

Dimensionless coupling constants predicted from causal relationship among strong, electromagnetic, weak and gravitational interactions in fluid region of universe
22 p3981 A69-40416

Periodic orbits obtained for special restricted three body problem in resonance using numerical integration
22 p4031 A69-40909

Grobner method of Lie series applied to numerical integration of spacecraft trajectories and n-body problems
23 p4223 A69-42476

CELESTIAL NAVIGATION
NT ASTRONAVIGATION

Celestial navigation, discussing position fixing on rotating earth, time input, navigation aids and sextant angle
03 p0463 A69-13207

Sight reduction tables for orbital plane determination checked out by sextant sightings onboard Gemini 7
07 p1177 A69-19206

Most probable position /MPP/ choosing methods accuracy, investigating relative effects of dead reckoning /DR/ and celestial lines of position /LOP/ errors
07 p1177 A69-19214

Polar flight navigation charts showing feasibility of three dimensional celestial positioning
09 p1538 A69-21406

Celestial navigation system using photodetectors, comparing numbers and brightness of S4, S20 and silicon stars
10 p1775 A69-23190

Simultaneous observations of altitudes of stars and moon for determination of longitude without time by navigators
14 p2479 A69-29855

Automatic celestial navigation, discussing star trackers design, mathematics of celestial fix and relationship to errors and physical and environmental constraints
18 p3169 A69-34852

Spacecraft-based navigation instruments for outer planet missions using celestial directions to outer planet natural satellites [AIAA PAPER 69-902]
21 p3761 A69-39348

Satellite attitude estimation from onboard telescope celestial sightings using iterative least squares method, considering measurement error noise and axes wobble
24 p4348 A69-43244

CELESTIAL OBSERVATION
U ASTRONOMY

CELESTIAL SPHERE

Magnetotelluric method for investigating earth vertical structure with allowance for sphericity
02 p0240 A69-11699

Great circle route determination based on celestial spherical triangulation
02 p0278 A69-12360

Schwarzschild perfect fluid spheres stability to radial perturbations, noting fluid adiabatic index relation to critical value
07 p1221 A69-19585

Magnetotelluric method for investigating earth vertical structure with allowance for sphericity
13 p2258 A69-28730

Celestial sphere scanning by passive method applicable to space missions requiring long lifetime and moderate pointing accuracies [AIAA PAPER 68-854]
21 p3767 A69-39764

CELL ANODES

Sealed nickel-cadmium cell design optimization, evaluating effects of various electrochemical treatments on energy density of nickel oxide positive electrode
10 p1639 A69-23992

Nonaqueous lithium anode high energy density electrochemical primary generators, considering energy factors and electrolytic couples
16 p2740 A69-32427

Irreversibility resulting from composition changes in operating fuel cell anode and cathode chambers and cell geometry influence
18 p3093 A69-34781

CELL CATHODES

Absolute short term current efficiency of aluminum electrolytic cell, stressing aluminum amount determination in cathode
06 p0869 A69-17233

Hydrogen-oxygen fuel cells with conducting and nonconducting hydrophobic electrode matrices
08 p1261 A69-21055

Metal fluoride compounds as cathodes for use with mixed fluoride electrolyte /LiF-NaF-KF eutectic/ in thermal batteries
10 p1640 A69-23997

Pseudosplitting/peroxide mechanism for O reduction at fuel cell cathodes, analyzing O molecule adsorption, H bonding and electron transfer at surface
16 p2748 A69-32809

Irreversibility resulting from composition changes in operating fuel cell anode and cathode chambers and cell geometry influence
18 p3093 A69-34781

CELL DIVISION

NT MITOSIS

Photoinhibition of cell division and growth in Euglenoid flagellates by fluorescent and incandescent visible light
01 p0014 A69-10903

Weightlessness effects on fertilized frog egg development on board Gemini 8 and 12 manned orbital flights, discussing cell division, differentiation and embryogenesis
01 p0017 A69-11084

UV and visible light interaction effect on biological activity of *Paramecia* unicellular infusoria, noting cell division rates and cell deaths
01 p0017 A69-11085

Mathematical models for *Chlorella* cell and biomass growth under illumination during space flight, noting ionizing radiation presence
02 p0198 A69-11508

Axial units with basal plates in spermatozoa of *Chlidia groenlandica* negatively stained with phosphotungstic acid, showing doublet microtubules
07 p1066 A69-19263

Postirradiation growth of cultured Chinese hamster cells exposed to UV light, including comparison with X irradiation
19 p3257 A69-35975

Local stress effect on immunocompetent cells differentiation in guinea pigs lymphatic ganglia, showing antibody producing cells number increase
22 p3877 A69-40277

NT HEMOGLOBIN

NT LEUKOCYTES

NT LYMPHOCYTES

NT MITOCHONDRIA

NT NEURONS

NT OXYHEMOGLOBIN

NT RETICULOCYTES

Cell and tissue cultivation outside living organisms, discussing applications in space biology, space medicine and food protein sources
02 p0198 A69-11501

Mammalian cell survival, chromosome abnormalities and recovery from heavy ion and X ray irradiation
03 p0373 A69-13492

Cellular localization of acetyl-coenzyme A synthetase in yeast, noting enzyme distribution during aerobic growth on glucose
04 p0554 A69-15333

Magnetic fields role in neuropsychiatric and physiological experiments, noting effect on phagocyte activity
05 p0715 A69-16627

Cellular effects on weightlessness noting relation to size and cell complexity
06 p0872 A69-17013

Cultured Chinese hamster cells responses to UV light of different wavelengths indicating photon absorbing molecules inhibition of colony development
07 p1068 A69-19492

Degree of organization in bacterial cell, discussing pool size and DNA synthesis
07 p1069 A69-19505

Structural and functional changes in cells as result of freezing of muscular tissue or suspension of erythrocytes
10 p1642 A69-23117

Gas vacuoles development in blue green algae by cell transfer from defined medium to distilled water
10 p1644 A69-23184

Direct epoxy embedding of monolayer cells cultured on millipore filter and fixed, dehydrated and microscoped before immersion
10 p1649 A69-23404

Acceleration effects on cellular and subcellular structures enzyme activity in humans and animals, noting changes resulting from changed permeability of membranes
10 p1645 A69-23496

Origin of life data, discussing self ordered polymers, propagative cell-like systems, protozooids, cellular evolution, etc
12 p2018 A69-25781

Life origin and organic-inorganic systems, emphasizing protein colloids-mineral salts interactions at protocell stage
14 p2408 A69-29632

Invertebrate endoskeletal cartilage and cartilage-like tissues occurrence and nature, discussing cellular tissues and origin
15 p2555 A69-30412

Continuous culture device for controlled growth of *Euglena gracilis*
15 p2555 A69-30445

Escherichia coli B/r cells plasmolyzed in sucrose observed under phase contrast, noting plasmolysis reduction in ions presence
19 p3257 A69-35973

Biological effects of radioactivity and X rays irradiation of whole body and cells, considering DNA degradation
19 p3257 A69-35978

Cultured mammalian cell growth morphology studied in situ with scanning electron microscope, discussing surface morphology changes during mitotic cycle of Chang liver cells
20 p3467 A69-37100

Biological experiments on cells with/without suppressors, discussing RNA, DNA, enzymatic and UAA codon activities
20 p3480 A69-38265

Long microextensions on cultivated human liver cells, using scanning electron microscope
20 p3480 A69-38287

Heart muscle ultrastructure during general hypoxia in dogs, noting development of compensatory-adaptational and dystrophic changes in myocardial intracellular components
21 p3651 A69-38412

Organism growth physiology based on decisive enzymic reactions, considering synthesis of biological proteins from DNA and molecular life processes
21 p3652 A69-38787

Canine cerebellar Purkinje cells electron microscopy after rapid decompression to near vacuum
21 p3660 A69-39177

Scenedesmus algae cell wall structure degrading to increase digestibility of cell bound protein, describing mechanical, enzymatic and chemical methods
21 p3667 A69-39701

Cell interactions and motions correlation for animal locomotion
21 p3662 A69-39708

Erythroblasts fractionating method based on size, density and resistance of immature erythroblasts which change during maturation
22 p3877 A69-40761

Cell origin in self organizing natural polymers in terms of molecular evolutionary priority of polynucleotides and poly alpha amino acids
22 p3896 A69-40781

Adenosine triphosphate /ATP/ production in normal cells and sporulation mutants of *Bacillus subtilis*,

discussing applications of ATP synthesis response to C sources

22 p3886 A69-41076

Retarded immunological recovery in sublethally X-irradiated mice by additional thymic exposure reversal with injected marrow cells

22 p3887 A69-41194

Critical oxygen pressure dependence on buffer in diluted heart muscle sarcosome suspensions and effect of hemoglobin or myoglobin

23 p4080 A69-41427

DNA interaction with ribosomes enhancing amino acid incorporation into cell-free protein synthesizing system extracted from *Chlorella pyrenoidosa*

23 p4080 A69-41430

Cell-like structures containing biochemicals as inevitable event under various hypothetical primitive earth conditions

23 p4085 A69-41479

Steady state and time dependent concentration gradients in and around cells due to oxygen diffusion and depletion in radiobiology

23 p4090 A69-41966

Viruslike particles in fat body cells and oenocytes of *Drosophila melanogaster* imagoes, in glial cells of cephalic ganglionic center of flies and in gamma radiated cells

23 p4091 A69-42021

Inoculum dose effect on complement-fixing antigen production, heat lability and separation from BHK-21 cells infected with lymphocytic choriomeningitis virus

24 p4263 A69-43336

CELLULOSE

Threshold criteria of gas phase thermal ignition for cellulose materials, considering heating by radiant energy

11 p1940 A69-24474

CELLULOSE NITRATE

Heat production rate equivalence to heat removal rate during ignition of ballistite powder by incandescent wires

02 p0354 A69-12668

Cellulose nitrate sheets applicability in detecting cosmic ray relativistic heavy nuclei, considering etchable tracks

06 p0924 A69-17286

Tensile tests on time dependent Pb and cellulose nitrate, including stress-strain curve prediction from creep test data

19 p3445 A69-36829

CELSIUS TEMPERATURE SCALE

U TEMPERATURE SCALES

CEMENTATION

Conditions for obtaining concentrated Ti-containing melts free of Al and V chlorides by cementing with metallic Ti and Ti-containing materials

22 p3957 A69-40918

CEMENTS

Phosphate cements for bonding mica ceramic to titanium in jet engine equipment

05 p0786 A69-16799

Polymers and organic optical cements transparent in 1 to 13 micron IR region, noting organosilicon resin

08 p1336 A69-20387

Cement materials to attach thermocouple to stainless steel tubing in nuclear rocket engine nozzle, considering thermal conductivity, bond and tensile and compressive strengths

21 p3753 A69-39699

Error correction of strain gage/cement combination reading relaxation under prolonged steady loading at elevated temperature

22 p4042 A69-40313

CEMS SYSTEM

U CENTRAL ELECTRONIC MANAGEMENT SYSTEM

CENSORED DATA [MATHEMATICS]

Multiply censored data plotting on various type hazard papers for engineering information on time to failure distribution

20 p3567 A69-38288

CENTAUR LAUNCH VEHICLE

NT ATLAS CENTAUR LAUNCH VEHICLE

Liquid hydrogen and LOX boost pump design for Centaur missile and liquid hydrogen and LOX chill-down pump design for Saturn 4B missile

01 p0087 A69-11149

Nose cone ejecting system with pyrotechnic devices for two stage Centaur rockets /Sud-Aviation/ with RF mass spectrometer

10 p1635 A69-23034

Centaur computer assimilating Centaur vehicle hardware functions performed by digital computer, discussing modules, flight control system, cost reduction, etc

[AIAA PAPER 69-943] 22 p3904 A69-40326

CENTAURUS CONSTELLATION

Optical identification of X ray source Cen XR-2 as variable star WX Cen, discussing colors and similarity to Sco X-1

01 p0145 A69-10857

Photometric investigation in UVB and H alpha of early B stars in Scorpio-Centaurus association, computing intrinsic colors and magnitudes corrected for interstellar absorption

06 p1001 A69-17195

Spectral line profiles of 3 Centauri A during microdisturbance, showing turbulent velocity and metal element abundances

07 p1211 A69-18407

Polarization and intensity distribution of extended supernova remnant in Centaurus, discussing remnant effect on galactic magnetic field

09 p1598 A69-22184

Centaurus constellation search for gamma rays using balloons, discussing radio and X ray luminosity

09 p1580 A69-22269

X rays from galactic center and Centaurus regions, discussing Cen X-2 flux

09 p1583 A69-22765

Sco-Cen B stars radial velocities, determining spectroscopic binaries

14 p2519 A69-29136

Spatial distribution of stellar densities and velocity distributions in phase space, using Greenwich catalog of positions and proper motions of omega Centauri cluster stars

16 p2859 A69-32220

Low energy X ray flux existence in Cen X-2 observed by rocket flight

22 p4007 A69-40773

CENTER OF GRAVITY

Spacecraft periodic motion near center of mass determined by point transformation combined with bifurcation theory, studying stability and parametric dependence

01 p0161 A69-10205

Radio emission center of gravity from 3C 273 quasar determined by radio telescope together with A and B component fluxes

03 p0506 A69-13092

Satellite nonlinear spatial oscillations about center of mass during circular orbit, using perturbation theory and analog computer

04 p0665 A69-14270

Hill stability in unbounded three body problem, analyzing motion in baricentric coordinate system, deriving equations for curves defining conditions for stability

04 p0652 A69-14543

Air density fluctuation effects on aircraft dynamic stability around center of gravity during climbing and diving maneuvers, discussing atmospheric pressure and flight path angle

04 p0548 A69-14825

Center of gravity of two dimensional gravitating bodies by gravitational anomaly technique, based on conformal mapping of bilinear function

05 p0792 A69-15696

Helicopter instability on ground with propulsion system operating and inoperative, discussing overturning, restoring moments and pilot training

09 p1433 A69-21385

Symmetrical body rotational motion with asymmetrical mass distribution about center of mass, determining minimum initial value of angular velocity

09 p1595 A69-21762

Integration time reduction for equations of motion of vehicle center of mass during parabolic reentry, using Runge principle

09 p1532 A69-21763

Onboard aircraft weighing system /OBAS/ for accurate gross weight and CG measurements, describing axle shear deflection transducer system

10 p1693 A69-23276

Gyrostabilized satellite steady state motions in Newtonian force field having displaced satellite center of mass orbital plane relative to center of attraction

12 p2173 A69-25885

Earth center of mass determination from simultaneous satellite observations by photography or laser radar

12 p2068 A69-26425

Satellite motion relative to center of mass and resonances by approximate solutions to motion equations, applying asymptotic methods

13 p2357 A69-28502

Spacecraft periodic motion near center of mass determined by point transformation combined with bifurcation theory, studying stability and parametric dependence

14 p2530 A69-28741

Radio emission center of gravity from 3C 273 quasar determined by radio telescope together with A and B component fluxes

14 p2516 A69-28774

Vibration damping and elastic bond positioning in nonlinear systems with coincident centers of gravity and rigid damping

14 p2537 A69-29746

Pendulum motion about stationary axis of solid body containing damper, ascribing instability to center of gravity shift with respect to cavity

18 p3135 A69-34557

STAN integral weight and balance system providing aircrews with takeoff gross weight and CG data [SAWE PAPER 755]

18 p3136 A69-34882

Computer program for weight and center of gravity tolerance data for assembly aerospace vehicle [SAWE PAPER 734]

18 p3221 A69-34892

Economics evaluation for operation of commercial fixed wing aircraft at aft center of gravity position, noting fuel saving from drag reduction

18 p3091 A69-34902

Cone-conical-frustum configurations meeting center of gravity requirements for higher hypersonic lift-drag ratios in axisymmetric manned spacecraft

21 p3644 A69-39237

Geomagnetic field and aerodynamic perturbation effects on satellite motion about center of mass, using asymptotic methods of nonlinear oscillation theory

21 p3830 A69-39835

Spacecraft spherical motion about mass center under inertial force using Euler differential equations

21 p3830 A69-39838

Controlled motion of space vehicle about center of mass analyzed by equation expressing nutation angle invariance

21 p3830 A69-39839

Satellite orientation by determining rotation parameters about centers of mass with respect to certain coordinates

22 p4037 A69-41089

Proton 2 satellite orientation and motion about center of mass determined from telemetric data analysis under aerodynamic moment

22 p4037 A69-41090

Ballistic equations for mass center movement in vertical plane defined by projectile initial velocity

23 p4183 A69-42482

CENTIGRADE TEMPERATURE SCALE

U TEMPERATURE SCALES

CENTRAL AMERICA

Telecommunications network for air traffic in Central America to attain higher degree of reliability

03 p0399 A69-14182

CENTRAL ELECTRONIC MANAGEMENT SYSTEM

Automatic system self test technique known as central integrated test subsystem /CITS/ for logically testing avionics systems

11 p1866 A69-25083

CENTRAL NERVOUS SYSTEM

NT BRAIN

NT BRAIN STEM

NT CEREBELLUM

NT CEREBRAL CORTEX

NT CEREBRUM

NT HIPPOCAMPUS

NT SPINAL CORD

NT SPINE

NT THALAMUS

Psychochemical research theory and methodology, relating biochemical phenomena to human brain function

04 p0553 A69-14976

Rats sensitivity to accelerations found dependent on excitation-inhibition ratio in central nervous system and hypophyseal-adrenal system reactions during acoustic excitation

10 p1645 A69-23497

Transverse accelerations effect on dogs gastrointestinal tract secretory activity, noting central nervous system role

10 p1645 A69-23498

Tremographic studies of central nervous system during supersonic flight as engineering psychology application to man machine relations in aircraft-spacecraft industries

19 p3259 A69-35834

Averaged cortical evoked response characteristics relationship to performance in traditional threshold

procedures, discussing stimulus sensitivity and intensity control in central nervous system
21 p3653 A69-38897

Cerebral subcortical structures controlling effect on central and peripheral nervous systems, discussing motion coordination, space orientation, search reflexes and physiological sleep
22 p3889 A69-41275

Neural integration of cardiorespiratory responses and suprabulbar control during arterial hypoxemia in rhinencephalic thalamic pontine rabbits
24 p4258 A69-42635

S-RETIC vertebrate command model, discussing computer simulation of reticular formation Golgi anatomy capable of habituation, conditioning, extinction, generalization and error discrimination
24 p4273 A69-42910

CENTRAL NERVOUS SYSTEM DEPRESSANTS

Barbamyl effect with and without somatotropic hormone injection in mice during prolonged isolation and hypokinesia, noting sleep duration
10 p1646 A69-23576

CENTRIFUGAL COMPRESSORS

Shockload on axial intake fan leading edge of radial flow compressor, calculating flow field
08 p1251 A69-20604

Unsteady relative flow in centrifugal impeller passage running at part capacity and zero flow observed by hydrogen bubble flow visualization method [ASME PAPER 69-GT-35]
09 p1432 A69-22489

Gas turbine centrifugal compressor design considerations for impellers and diffusers, including blade loading and pressure gradients determination and aerodynamics [IME PAPER 1]
12 p2146 A69-25790

Unsteady aerodynamic processes in centrifugal compressor stage with impeller, vaneless diffuser and annular receiver chamber
15 p2547 A69-30073

Centrifugal compressor impeller disk design, considering stress analysis for shielding portion profile determination to satisfy equal strength condition
17 p3057 A69-33193

Diffuser for high performance centrifugal compressors based on discrete pipe drillings [ASME PAPER 68-GT-38]
19 p3240 A69-36420

Internal aerodynamics of centrifugal compressor impeller, discussing impeller channel airflow model, impeller exit flow, rotating channel flow, etc [RAES PAPER 19]
22 p3859 A69-40498

Discrepancy between theoretical and experimental coefficients of friction losses on blades of centrifugal compressor impeller wheels, using lattice theory
23 p4058 A69-41727

Boundary layer effects in turbulent spiral vortex flow of compressible fluid in supersonic centrifugal compressor, discussing flow geometry, using momentum integral method
23 p4152 A69-42109

CENTRIFUGAL FORCE

Hollow rolling elements for reducing centrifugal load on high performance bearings, discussing production, fatigue life, etc
01 p0085 A69-10294

Variable thickness circular annular disk bending in centrifugal force field, establishing dependence between angular velocity and axial pressure intensity
01 p0168 A69-10401

Centrifugal force field influence on heat exchange between gas and blade cascade studied with noncooled blades at low temperatures
03 p0531 A69-12959

Shape and stability of interface between liquids subjected to surface tension and mass force field in vessel
03 p0417 A69-13809

Axial rigidity effect of centrifugal force acting on balls of rapidly rotating radial thrust bearing
04 p0605 A69-14606

Centrifugal instability of plasma column generated by cyclotron absorption of microwave power in magnetic mirror field
11 p1931 A69-25366

Dynamics of deployable space structures stiffened by centrifugal forces due to spin, discussing LF radio telescope
11 p1994 A69-25530

Plasma rotation by Lorentz force in homopolar gas discharge device, considering centrifugal forces effect on flow pattern
13 p2315 A69-28556

Spiral disk galaxies stability analysis assuming centrifugal force balancing self gravitation, transforming

linearized equations of motion into eigenvalue equations
18 p3200 A69-35131

Geotropic response reciprocity in oat seedlings grown in two axis clinostat compared with acceleration constraints of biosatellites, considering imposition of centrifugal force
20 p3477 A69-37620

Squirrel monkeys exposed to centrifugally generated artificial gravity trained to respond for food reinforcement at selected gravity levels
23 p4081 A69-41434

Centrifugation for removal of bullet fragment floating freely in ventricular system of human brain to fixed safe position in left lateral ventricle wall
24 p4265 A69-43372

Rotating wickless hollow shaft heat pipe utilizing centrifugal acceleration for return pumping of condensate and transferring high heat fluxes [ASME PAPER 69-HT-19]
24 p4413 A69-43550

Centrifugal forces effect on stability of inviscid liquid film over rotating cylinder under from stagnation region, noting film thickness stabilization effect
24 p4305 A69-43597

CENTRIFUGAL PUMPS

Gas flow deflection at centrifugal pump wheel outlet for wheels having different inlet and outlet vane angles
15 p2547 A69-30571

CENTRIFUGES

NT HUMAN CENTRIFUGES

Space-station-centrifuge configuration dynamic stability exhibiting instabilities at lower and higher centrifuge rotational speeds [AIAA PAPER 68-142]
02 p0334 A69-12373

Space research centrifuge counteracting null gravity physiological deconditioning, discussing linear and angular accelerations sensitivity and deconditioning effect on reentry task performance
18 p3114 A69-34368

Centrifuge on board orbiting spacecraft as research tool for biological and physical experiments relevant to prolonged missions and spacecraft design
23 p4108 A69-41833

CENTRIFUGING

Selective g-force application as centrifugation treatment for retinal detachment, applying minimal load on circulation and optimal load on retina
24 p4268 A69-43405

CENTRIFUGING STRESS

Coriolis stimulus effect during centrifugal g load on spatial orientation and accompanying stick performance
06 p0876 A69-18023

Otolith and cupular apparatus interaction in human vestibular analyzer during gravitational changes
07 p1062 A69-18589

Acetate carbon 14 utilization in centrifuged rats, analyzing metabolism by measuring plasma glucose, FFA and lipids synthesis
07 p1067 A69-19429

Human operator manual control of spacecraft under accelerations up to 18 g, noting performance and efficiency of males
08 p1265 A69-19936

Gravity preference tests on rats subjected to simulated Aerobee 150 A rocket launching and flight in ground based spiral centrifuge
13 p2213 A69-28090

Decreased antidiuretic activity measured in blood of chronically centrifuged rats, noting role of antidiuretic hormone /ADH/
14 p2407 A69-29301

Central adrenergic mechanisms role in neurosecretory function of hypothalamo-hypophyseal system of rabbits under transverse accelerations in centrifuge
15 p2554 A69-30055

Centrifugation effects on body composition and growth of mice
17 p2910 A69-33746

Threshold variations in caloric nystagmus in pigeons subjected to accelerations in head to tail direction in centrifuge at various temperatures
20 p3471 A69-37252

Squirrel monkeys escape behavior under centrifuge simulated gravity in excess of earth gravity
21 p3665 A69-39174

Centrifuge on board orbiting spacecraft as research tool for biological and physical experiments relevant to prolonged missions and spacecraft design
23 p4108 A69-41833

Bonded strain gages for experimental stress analysis of high speed rotating machinery under high centrifugal loads
24 p4397 A69-42740

Urine osmolality of centrifuged rats compared with ad libitum or pair-fed control animals, indicating enhanced free water excretion and antidiuretic hormone involvement
24 p4262 A69-42904

CENTRIPETAL FORCE

Physiological studies of centripetal and Coriolis accelerations effects on vestibular function of humans in rotating chamber
02 p0197 A69-11498

CEPHEID VARIABLES

Frequency and radial velocity for various cepheid binaries, discussing hot companions detection through photometry
07 p1223 A69-19627

Preliminary model atmospheres for cepheid variable eta Aquilae, discussing mass loss processes
08 p1386 A69-20089

Period-age relations for delta Cephei stars based on stellar evolution theory and initial abundance of hydrogen
08 p1392 A69-20564

Color index and mean light curves constructed for Cepheid Variables
08 p1395 A69-20635

Polaris cepheid variable star system color index and absolute magnitude from photometric observations
08 p1408 A69-21138

Cepheid stars as distance indicators in extragalactic space, using periodicity-luminosity relation
08 p1408 A69-21147

Cepheid variable and F and G stars observed for neutral lithium line, searching for resonance lines of ionized beryllium in similar stars
09 p1604 A69-22402

Atomic line spectrum computation for F-K supergiant or cepheid, using observational data on standard star spectrum
10 p1771 A69-22854

Galactic structure and space distribution of known Classical Cepheids, noting interstellar absorption and variation of period with distance to galaxy center
10 p1773 A69-22962

Cepheid variable stars light curves analyzed to determine radii and absolute magnitudes
10 p1775 A69-23200

Hot companion presence for RW Camelopardalis confirmed from UVB photometry
10 p1775 A69-23201

Stellar atmosphere parameters analyzed over pulsation cycle by high dispersion spectra of cepheid variable RT Aurigae
10 p1778 A69-23605

Cepheids variations used to measure intergalactic distances, noting method of calibrating absolute Cepheid luminosity
10 p1780 A69-23646

Delta Cepheid blue companion /delta Cep C/ rapid radial velocity variations, noting spatial proximity between delta Cep A and C
11 p1957 A69-24405

Oort constant A and solar motion components in galactic plane determined from Classical Cepheids data
12 p2153 A69-25804

Cepheid variable I Carinae position in H-R diagram suggested from microturbulent velocity role in pulsational instability
14 p2522 A69-29590

Photoelectric /UBV/ photometry of Cepheids in Cygnus and Monoceros noting sequence stars near Nova Cyg 1948
15 p2692 A69-30772

BCD classification for cepheids, discussing /sigma/ surface definition, locus of normal stars of population I and interstellar reddening
17 p3038 A69-33725

Cepheid observation, nature and evolution
21 p3795 A69-38403

Cepheid variable stars distance estimated from UVB three color photoelectric photometry data
22 p4031 A69-40943

VV Cephei type binaries cool and hot primary stars light variations, discussing duration, orbital cycle correlation, mass loss, etc
24 p4386 A69-43346

Blue component of HD 237006 and VV Cephei spectra, suggesting greater luminosity of blue star in late type supergiant
24 p4387 A69-43353

Delta Cepheid blue companion /delta Cep C/ rapid radial velocity variations, noting spatial proximity between delta Cep A and C
24 p4391 A69-43795

CEPHEUS CONSTELLATION

Interstellar light absorption in Milky Way region of Cepheus analyzed by excess color technique
07 p1216 A69-18855

Distance of bright stars in Cepheus OB2 region by MK spectral classification and UVB photometry, noting early main sequence and supergiant stars
09 p1599 A69-22194

Cepheus light attenuation curve explained by applying polymodal particle size distribution, obtaining interstellar dust density
20 p3608 A69-38048

CERAMAL PROTECTIVE COATINGS

U CERMETS
U PROTECTIVE COATINGS

CERAMALS

U CERMETS

CERAMIC BONDING

Phosphate cements for bonding mica ceramic to titanium in jet engine equipment
05 p0786 A69-16799

Sintered metal powder process for metal-to-ceramic seals for thermionic converters, giving results for tensile strength, thermal cycling and cesium corrosion
14 p2454 A69-29211

Glass ceramic coated and bonded silicon semiconductor material in integrated circuits devices fabrication, noting matched thermal expansion
15 p2669 A69-31040

Bonding mechanisms in Mo-Mn-Ti metallizing and Cu brazing in metal to ceramic seals by strength test, microscopy and electron probe microanalysis
21 p3733 A69-39599

CERAMIC COATINGS

Arc driven shock tube with alumina ceramic liner to reduce driver gas contamination, noting shock speed and test time increase
[AIAA PAPER 68-366] 09 p1570 A69-21957

Refractory metal, precious metal and ceramic material compatibility tested by metallography and by microprobing for protective coatings possibilities
09 p1477 A69-22325

Density distribution vs thickness in sprayed ZrC, NbC and aluminum oxide coatings obtained by plasma jet
12 p2118 A69-26258

Metal insulating seals using preliminary metallization or direct brazing for applications in thermionic converter technology and irradiation capsules
14 p2455 A69-29212

Glass ceramic coated and bonded silicon semiconductor material in integrated circuits devices fabrication, noting matched thermal expansion
15 p2669 A69-31040

Test program simulating solar wind outside magnetosphere to evaluate high melting point high density ceramic oxides as white thermal control coating pigments
[AIAA PAPER 69-641] 17 p2993 A69-33762

Composite ceramic armor systems for airborne vehicles and personnel, air cushion vehicles and ground troops, discussing weight and contour forming advantages
19 p3355 A69-35525

Temperature fields and stresses in heat resistant ceramic coatings, illustrating alumina coating on Mo to calculate heating rate
20 p3565 A69-37359

Metal or ceramic layers application to substrate by flame spraying process
21 p3731 A69-38938

CERAMICS

NT CERAMIC BONDING
NT CERAMIC COATINGS
NT PORCELAIN
NT PYROCEAM [TRADEMARK]

Crack growth in ceramics from velocity measurements on glass and sapphire as function of applied force, temperature and moisture environment
01 p0101 A69-10767

Pre-cracked ceramic rocket nozzle throat inserts, discussing improved thermal displacement accommodation, load transmission, fracture tolerance, articulation capability, etc
02 p0334 A69-12369

Porous ceramic heat shields for lifting reentry vehicles, noting crack propagation resistance and load redistribution
[SAE PAPER 680643] 03 p0453 A69-13457

Special ceramics - Conference, Stoke-on-Trent, Staffs., England, July 1967
06 p0946 A69-17527

Metal fiber reinforced ceramic matrix composites, discussing model system, bond strength, loading and elastic properties
06 p0946 A69-17528

Ceramic radomes for hypervelocity aerospace vehicles, considering wide temperature environment effects on stability and properties
07 p1171 A69-19511

Radome design and manufacture, considering airborne requirements, antenna systems and electromagnetic energy, with emphasis on ceramic material melting, forming, grinding and finishing
07 p1142 A69-19526

Processing techniques for fabrication of ceramic radomes from alumina and silica
07 p1142 A69-19527

Ceramic radome materials resistance to rain erosion at high Mach numbers
07 p1171 A69-19532

X ray and photomicrographic study of metal layer-ceramic seal interface reaction products, discussing phase transformations, temperature effects and time dependence
08 p1320 A69-20375

Mechanical properties of ceramic material consisting of pure silica matrix reinforced by carbon fibers
08 p1341 A69-20700

Metal castings around ceramic cores for economic manufacture of jet engines
09 p1503 A69-21907

Oxide ceramics finishing processes, discussing leaching, machining, surface finishing, strengthening by compressive surface layers and joining
09 p1510 A69-22350

Ceramic whiskers and metallic matrix chemical reactions during composite formation, analyzing coated and uncoated SiC whiskers in titanium matrix
09 p1527 A69-22359

Silicated alumina attachment for high temperature radomes and leading surface heat shields, discussing stress concentration and load transfer
09 p1477 A69-22370

Refractory ceramic materials use for advanced combustion chamber design, stressing brittleness effect and current fabrication techniques
09 p1531 A69-22624

Ceramic substrate cutting with carbon dioxide laser by scribing perforation pattern,
10 p1699 A69-23302

Ceramics strength and fracture behavior in terms of modified Griffith equation, discussing effective surface energy and initial crack size
11 p1907 A69-25238

Type 2 ceramic capacitor manufacture, selection and control in Concerto space program
11 p1853 A69-25393

Fabricable materials with low plastic deformation for gas turbine components, noting strength vs temperature for alloys, fiber composites and ceramics
[IME PAPER 8] 12 p2147 A69-25791

Metallic and ceramic whiskers and fibers for material reinforcement, discussing properties and fabrication techniques
12 p2111 A69-25856

Book on ceramic fibers and fibrous composite materials as structural reinforcements covering dynamic testing of fine filaments and whiskers, material characterization, etc
12 p2118 A69-26340

Pressure calcining process in production of fine grained ceramics at low temperatures
12 p2119 A69-26832

Friction and wear characteristics of ceramics and cermets as bearing materials, with tabulation of room temperature hardness and maximum service temperatures
13 p2284 A69-27232

Chemical corrosion of zirconia-based refractories in MHD generators, considering thermal cycling and shock, seed migration and prevention
13 p2284 A69-27469

Refractory ceramic materials thermal stability in high temperature subsonic ionized gas flow products, emphasizing zirconia and magnesia
13 p2285 A69-27472

One inch ceramic vidicon with slow scan photoconductor, electrostatic focusing and magnetic deflection to withstand sterilization and environmental testing for space applications
13 p2234 A69-28262

Ceramic and cermet materials insulating, physical and mechanical properties for use in thermionic converters
14 p2467 A69-29214

Barium vapor effect on converter materials, examining metals-ceramics compatibility at high temperatures
14 p2467 A69-29215

Metallo-ceramic materials strength as function of porosity calculated for tension, shear, bending and torsion deformations
15 p2638 A69-30283

Erosion wear of graphitic and mica-ceramic materials used for sealing turbine compressors at high temperatures, including test installation
15 p2643 A69-31186

Ceramic heat transfer gage for supersonic wind tunnel investigation of blunt swept wing leading edges aerodynamic heating
15 p2613 A69-31272

Ceramic phase reinforcement of metals and alloys, discussing interfacial energies, binding forces and elastic stress fields
[ONERA-TP-661] 16 p2802 A69-32204

Sliding friction and wear properties of metal ceramic composites applied to aircraft brakes
17 p2987 A69-33375

Injection holding for ceramic parts from nonplastic materials, presenting time-temperature schedules for low temperature removal of molding material without damage
17 p2978 A69-33376

Transient effects of nuclear radiation bursts on dielectric properties of refractory low loss ceramics at L, S and X bands
20 p3584 A69-38065

Book on phase diagrams for ceramists, 1969 supplement
22 p3971 A69-40782

Parametric losses in nonlinear centrosymmetrical ferroelectric ceramic in strong microwave field at temperatures above Curie point
22 p3996 A69-41164

Mechanical properties of glass and glass-ceramics products improvement through prestressing
24 p4335 A69-43034

Silicon nitride ceramics fabrication technology and dimensional stability during nitridation, discussing applicability to aerospace precision or joined ceramic shapes
24 p4336 A69-43211

Structural ceramics and testing of brittle materials - U.S. Army Conference, Chicago, March 1967
24 p4333 A69-43337

Polycrystalline ceramics chemical and microstructural control through thermomechanical and thermochemical hot forming techniques, discussing pressure sintering, hot extrusion, strain annealing, etc
24 p4321 A69-43338

Structural analysis and statistical fracture approach to design and testing for polycrystalline ceramic materials, including combined stress testing and load redistribution models
24 p4333 A69-43339

CEREBELLUM

High energy X ray irradiation of head of Macaca mulatta, determining effect on cerebral blood flow and blood pressure
03 p0376 A69-14075

Lactate dehydrogenase and monoamine oxidase distribution in medulla oblongata and cerebellum of squirrel monkey
12 p2018 A69-25778

Nerve tissue oxidation processes relation to nervous system radiation sensitivity in dogs with cerebellum X rayed after enzyme poisons administration
21 p3658 A69-39053

Canine cerebellar Purkinje cells electron microscopy after rapid decompression to near vacuum
21 p3660 A69-39177

Spatiotemporal patterns learning among sensory and motor organs with linearly ordered components by nonlinear networks in terms of embedding fields theory
22 p3887 A69-41196

Information transfer capacity of afferent and efferent cell system and fiber tracts of human cerebellum numerically defined with regard to cybernetics
23 p4084 A69-41467

CEREBRAL CORTEX

Cerebellar cortex function disorders of rats subjected to 10 g acceleration under weak anesthesia
02 p0198 A69-11504

Phosphodiesterase activity of anterior pituitary, median eminence, heart and cerebral cortex of rat, studying effects of caffeine, theophylline and hydrocortisone
02 p0199 A69-11885

Flexible printed circuitry electrode arrays fabrication for surface cortical potentials recording in animals
02 p0204 A69-12601

Cerebral cortical neurons response to visual stimuli during stationary and rapid eye movement
03 p0369 A69-13360

High oxygen concentration influence at normal pressure on evoked potential of cortical optic zone and sub-cortical zones
05 p0709 A69-16515

Prolonged bed rest effect on brain bioelectrical activity from EEG reactions of subjects to acoustic signals followed by light signals
05 p0710 A69-16520

Psychomotor reactions to zero gravity during ballistic rocket flights, analyzing electrical activity of cortex in animals
06 p0874 A69-17649

Visual systems of hamster brain, discussing relative visual localization and discrimination blindness produced by ablation of cortical or tectal areas
08 p1265 A69-20685

Graphical method for plotting electrophysiological observations, showing hodographs application in biopotential studies of cortical reactions
11 p1829 A69-24540

Oxidative and dephosphorylating enzymes and esterases in rat and squirrel monkey cerebral cortexes, noting neuron activity
12 p2018 A69-25773

Soviet book on nervous mechanisms of vestibular reactions emphasizing mathematical description of operation, neuro rhythmic changes in cerebral cortex and oculomotor activity modeling
16 p2746 A69-32605

High oxygen concentration influence at normal pressure on evoked potential of cortical optic zone and sub-cortical zones
18 p3096 A69-34734

Prolonged bed rest effect on brain bioelectrical activity from EEG reactions of subjects to acoustic signals followed by light signals
18 p3096 A69-34739

Glutamic acid metabolism compartmentation in brain cortex demonstrated in vitro, using isotopic labeling
18 p3096 A69-35172

Electrical response of frog and human visual cortex neurons to thermal vestibular and light flash stimulation
20 p3469 A69-37242

Labyrinth polarization effect on stimulation and neuron activity in visual cortex of cats, using electroencephalograph
20 p3469 A69-37244

Visual and vestibular analysors interrelation in subjects receiving light pulses before and after rotation, noting role of cortical elements
20 p3470 A69-37249

Averaged cortical evoked response characteristics relationship to performance in traditional threshold procedures, discussing stimulus sensitivity and intensity control in central nervous system
21 p3653 A69-38897

Radiotelemetric EEG recording variation possibility, examining dynamic behavior of human cerebral rhythms
22 p3889 A69-40158

Cortical and thalamic evoked activities changes during sensory conditioning of freely moving cat
22 p3872 A69-40160

Spatial distribution of amplitude and onset of pre-mo-tion positivity, readiness and motor potential changes in human cerebral cortex preceding voluntary finger movements
22 p3875 A69-40261

Unit activities in cerebellar cortex by auditory stimulation in cats, discussing response patterns obtained by histograms
22 p3876 A69-40264

Cerebellar cortex reactions to sciatic nerve stimulation in rats under transverse accelerations in centrifuge
22 p3877 A69-40279

Responsiveness of cortex and visual pathway during transient hypotension induced by increased gravitational stress, discussing intraocular pressure of cat
22 p3878 A69-40779

Squirrel monkey retinas spectral stimulation, determining differential color responses reaching striate and prestriate cortex
22 p3879 A69-40844

Visual field meridians in circumstriate visual cortex of monkey determined by tracing degenerating axons stained by Nauta method
22 p3881 A69-40858

Nocturnal and diurnal monkeys spectral sensitivity functions determined from simultaneous recordings of light-evoked cortical and retinal responses
22 p3882 A69-40867

Topographic distribution of cortical potentials produced with tachistoscope and by stroboscopic stimulation, studying occipital and frontal differences
22 p3884 A69-40885

Anesthetized cats with electrodes in visual cerebral cortex, investigating simulation of conditioned alimentary reflexes in response to light signals by electric signals
22 p3885 A69-41066

Functional relation between primary response individual phases and neurons activity in cats cerebral cortex
22 p3886 A69-41067

Topography of potentials induced by acoustic clicks in auditory cortex of dogs, including ectosylvian gyrus distribution
22 p3888 A69-41269

Cortical biopotentials in cats induced by strychnine under acoustic click stimuli of increasing intensity
22 p3888 A69-41270

Cerebral subcortical structures controlling effect on central and peripheral nervous systems, discussing motion coordination, space orientation, search reflexes and physiological sleep
22 p3889 A69-41275

Structural differences effect of gyral and sulcal areas of acoustic projection cortex on primary induced acoustic responses
23 p4079 A69-41380

Learning model of motor behavior in brain cortex of higher animals and man, discussing M automaton, information reception, correlation, memory, emotions, desires and actions
23 p4109 A69-41977

Unisensory and multisensory signal processing in cortical and brain stem regions of albino rat by electronic averaging and time histogram techniques
23 p4092 A69-42055

Electroretinogram and visually evoked cortical potential as response potentials in human visual system
24 p4271 A69-42644

CEREBRAL VASCULAR ACCIDENTS

Airline pilots simulated incapacitation involving myocardial infarction or cerebrovascular accident, discussing effect on crew behavior during flight task performance
24 p4277 A69-43386

CEREBROSPINAL FLUID

Regional uptake of melatonin from blood or cerebrospinal fluid by rat brain
09 p1444 A69-21466

Cerebrospinal fluid /CSF/ formation in male monkeys as function of fluid pressure at third ventricle level following temperature stress and feeding
23 p4084 A69-41469

CEREBRUM

Vestibular neurons activity in decerebrized cats under ipsilateral and contralateral labyrinth polarization combined with acoustic and caloric stimulation
20 p3471 A69-37254

Protein rates and RNA synthesis in cerebra of rats analyzed as factor of high altitude hypoxia adaptation
22 p3886 A69-41122

Electric responses of anterior and posterior gyrus cinguli to stimuli of sciatic nerve in cats
22 p3886 A69-41175

Cerebral and retinal capillary permeability to ions in rats analyzed by electron microscope using Prussian blue reaction
23 p4081 A69-41433

CERENKOV COUNTERS

Pulsar CP 1133 high energy gamma ray emission, using atmospheric Cerenkov detection technique for high energy neutral cosmic rays
02 p0307 A69-11823

Primary cosmic radiation charge spectrum measurement during 1965 minimum solar activity, using balloon-borne Cerenkov scintillation counter
02 p0308 A69-12043

Splash albedo flux measurement, using Cerenkov counter telescope surrounded by anticoincidence shield
06 p0989 A69-17278

High energy muons Cerenkov radiation, using water filled counter as function of muon momentum, noting no intensity decrease
06 p0991 A69-17306

Fast charged particles measurements by Cerenkov counter in Cosmos 137 satellite, noting hard electron flux and cosmic ray radiation spectrum
13 p2327 A69-27693

Night sky Cerenkov light detectors observations of pulsars CP 1133, NP 0532 and NP 0527, noting instrumental limitation in detecting ultrashort light pulses
18 p3200 A69-34994

CERENKOV RADIATION

Gamma ray fluxes from pulsating radio sources, using detection of Cerenkov light generated by energetic particles in atmosphere
03 p0513 A69-13772

Magnetobremsstrahlung /synchrotron/ and Cerenkov radiation of ultrarelativistic particles, radiation reabsorption and magnetic field measurement
06 p0962 A69-17245

High energy muons Cerenkov radiation, using water filled counter as function of muon momentum, noting no intensity decrease
06 p0991 A69-17306

Magnetoacoustic waves generated by Cerenkov radiation from corpuscular fluxes due to star interaction with stellar wind, determining deceleration forces on star
11 p1955 A69-24385

Natural oscillations excitation in magnetoactive plasma by modulated electron beam ascribed to Doppler or Cerenkov effects
11 p1932 A69-25535

Cerenkov radiation from point charge uniformly moving along external magnetostatic field in warm anisotropic plasma, noting excitation modes and propagation frequencies
13 p2307 A69-27964

ISIS A satellite fixed and sweep frequency ionograms indicating electron density variations, ionospheric resonances and Cerenkov radiation
15 p2604 A69-31416

Analogy between Cerenkov and quasi-Cerenkov radiation in nonlinear crystal by intense laser light used to determine conditions for quasi-Cerenkov radiation
21 p3741 A69-39669

Magnetoacoustic waves generated by Cerenkov radiation from corpuscular fluxes due to star interaction with stellar wind, determining deceleration forces on star
24 p4390 A69-43775

CERIUM

Meteoritic materials investigated for Sc, Ce and Eu content and distribution in various phases, using neutron activation analysis
01 p0026 A69-11376

Ce activated garnet crystals optical properties, noting IR and near UV absorption spectra and room and low temperature fluorescence
07 p1201 A69-19647

Chromium-cerium phase diagram determined by differential thermal, metallographic and X ray structural analysis
15 p2640 A69-30666

Ce II line reversal from absorption to emission in solar spectrum, noting reversal position dependence on wavelength and line source function scattering term
20 p3613 A69-38168

CERIUM COMPOUNDS

IR spectral transmittance and physicochemical properties of tellurite glasses with vanadium and cerium oxides, showing polymer chains in structure
14 p2468 A69-29329

Stimulated emission of cerium trifluoride-positive trivalent Nd ion laser noting absorption, luminescence, excitation, emission spectra and metastable state lifetime
14 p2460 A69-29645

CERMETS

Beryllium cermet compositions, discussing beryllium oxide content, mechanical strength and elastic and shear moduli
10 p1711 A69-23334

Beryllium base cermets corrosion resistance increased in moist carbon dioxide at 700 C
10 p1711 A69-23338

Thermal stability of refractory and cermet materials, analyzing small samples subjected to cyclic high energy radiative heating and air-water cooling
12 p2118 A69-26262

Friction and wear characteristics of ceramics and cermets as bearing materials, with tabulation of room temperature hardness and maximum service temperatures
13 p2284 A69-27232

Chemical composition of cermet material for radial sealing of high temperature gas turbines, ensuring structural stability and oxidation resistance
13 p2275 A69-27344

CERTIFICATION

Thin film cermet resistors for integrated circuits produced by thermal vapor deposition in vacuum, cathodic sputtering and explosive vapor deposition
13 p2268 A69-27466

Ceramic and cermet materials insulating, physical and mechanical properties for use in thermionic converters
14 p2467 A69-29214

X ray diffractometer stress analysis of WC-Co cermets, discussing surface preparation and heat treatment
16 p2802 A69-32339

Co content influence on temperature stress in WC-Co cermets using one exposure and two exposure X ray diffraction
16 p2802 A69-32340

Facility for evaluating thermal stability of heat resistant materials and cermets in constant temperature gas flow
20 p3565 A69-36979

Heat resistance and strength properties of porous Ni-base cermet materials with mica additions under high temperature oxidation
21 p3751 A69-38615

Wear resistant Ti carbide based cermets with alloy steel binder, noting electrical and heat conductivity dependence on composition and temperature
22 p3971 A69-40919

CERTIFICATION

Civilian transport aircraft operation realities vs theoretical performance certification
14 p2392 A69-29698

Abnormalities of routine electrocardiograms in medical certification of pilots, indicating errors in screening
19 p3263 A69-36462

Airworthiness certification of civil aircraft, discussing international cooperation on inspection, accident investigation, etc
19 p3456 A69-36688

Engine powered lift civil aircraft certification factors taking into account traffic growth, accident rates, learning rate and acceptable safety level
22 p3862 A69-39962

Civil pilots medical certification after head trauma, evaluating current methods efficiency
23 p4086 A69-41687

CESIUM

Optical absorption of thin film cesium between 2300 and 11000 Å
03 p0491 A69-14060

Li and Cs electrical conductivity measured from 300-1200 K, obtaining interpolation formulas by least squares method
03 p0481 A69-14148

Varian cesium resonator as prime frequency testing standard with accuracy dependent on electronic system for quartz slaving
04 p0600 A69-15068

Work function and desorption energy measurements of alkali metals from metallic substrates with modulated molecular beam, noting surface contamination
09 p1558 A69-21808

Indium, Rb and Cs abundances obtained from sun-spot spectra by comparison with Zr and Ti lines
13 p2343 A69-27626

Positive ion concentration in subsonic high velocity laminar flames determined by interpreting kinetic and diffusion factors of adding cesium to flame
13 p2380 A69-28463

Nuclear type cylindrical thermionic converter with porous adsorbent structure and liquid cesium tank
14 p2397 A69-29174

Thermal emission converter, using Cs-Ba mixture in low voltage arc mode, detailing construction
14 p2403 A69-29247

Langmuir S curves for tungsten single crystals in presence of adsorbed cesium, discussing orientation, theoretical and experimental correlation and instrumentation
14 p2506 A69-29271

Surface structures, work function changes, Auger electron and surface plasma losses for Cs on clean W surface
19 p3392 A69-36733

Absorption spectrum of CS atoms excited by electrical discharge and irradiated by monochromatic light and ionized by electron collisions
22 p3984 A69-40418

CESIUM DIODES

Backscattering due to collisions for electrons from emitter accelerated through positive ion sheath into plasma in thermionic diodes
06 p0898 A69-17773

Predicting electrode geometry effect on saturation ion currents in diode exposed to ionizable vapor in equilibrium with liquid Ce
09 p1440 A69-21832

Electron transport phenomenon in high pressure cesium diodes, noting quasi-static assumption of particle distribution functions
14 p2401 A69-29229

Inverse current in ignited mode diode linearly related to spacing, noting emitter sheath
14 p2401 A69-29230

Voltage drop of ignited mode related to current density in cesium diode, noting plasma zones
14 p2401 A69-29232

Preignition volt-ampere curves for thermionic cesium diodes exhibiting nonsaturation characteristics under low temperature and electron-rich emission conditions
14 p2403 A69-29253

Spectral lines emitted from low voltage discharge in cesium filled diode with hot cathode, giving current-voltage characteristics as function of pressure and temperature
14 p2491 A69-29260

CESIUM ENGINES

Cesium electron bombardment microthruster system, discussing ion engine, feed, discharge neutralizer, power conditioning and control electronics [AIAA PAPER 69-293]
09 p1561 A69-21223

Cesium microthruster system using beam deflection for satellite control, describing ion engine subsystem and control logic/power conditioner subsystem [AIAA PAPER 69-292]
09 p1569 A69-21875

Cs contact ion microthruster system design, fabrication and flight qualification, noting control logic/power conditioning unit and electronic packaging [AIAA PAPER 68-552]
21 p3785 A69-39212

Cs contact ion engine with tubular W ionizer tested for performance and reliability in vacuum chamber
22 p4000 A69-40592

CESIUM IODIDES

Electrical conductivity of cesium iodide single crystals with anion and cation impurities noting temperature dependence
16 p2824 A69-31573

CESIUM ION

Effective cross section of resonant cesium ions charge exchange determined by retarding field method, considering dependence on ion velocity
06 p0959 A69-16908

Barkhausen oscillator for LF domain by substituting Cs and K positive ions for electrons, giving oscillation curves and spectral analysis
08 p1280 A69-19981

Cs and K ions drift velocity calculations in vapors of own atoms under various electric field strengths effect
11 p1922 A69-24226

Cesium ions decay time in thermionic converter operating in gas kinetic mode by pulse ionization, noting dependence on interelectrode potential distribution
14 p2403 A69-29252

Cross sections threshold behavior for Cs II resonance lines excitation due to Cs ion-He collision
17 p3008 A69-33388

Cs ionization by bromine, measuring relative cross section velocity dependence by crossed molecular beam technique
23 p4194 A69-42208

CESIUM OXIDES

Plasma anode technique for work functions measurements of polycrystalline W and Re wires in cesium vapor with cesium oxide additive
14 p2507 A69-29274

Ultrahigh vacuum cleaved GaAs-Cs and GaAs-cesium monoxide photoemission acceptor densities, noting crystal parameters role
23 p4198 A69-41548

CESIUM PLASMA

Alkali metal quadrupole spectral doublets used as diagnostic for determining alkali-metal plasma electron temperature
02 p0286 A69-11584

Plasma physics experiments and theoretical studies, discussing plasma heating by magnetic compression and irreversible expansion, Cs plasmas, plasma diagnostics, etc
02 p0289 A69-12200

Ionization and recombination in low temperature plasmas, noting fast electron distribution function deviation from Maxwellian form and calculation for Cs plasma
02 p0292 A69-12559

Probe and spectral techniques compared for investigation of low voltage arc of cesium plasma thermionic converter
03 p0478 A69-13836

Low voltage Knudsen arc in cesium argon mixture using tungsten electrodes, analyzing current voltage characteristics
06 p0963 A69-16920

Thermal metal-plasma thermodynamic equilibrium, using surface ionization of inner and outer potentials and work function, discussing ion and electron extraction
06 p0979 A69-17249

Cesium plasma produced inside hot cylindrical tantalum cavity at 1400 K by contact ionization at wall while obtaining electrons from internal filament
06 p0927 A69-17707

Recombination coefficients for dense weakly ionized cesium plasma, treating recombination process as diffusion generated by electron collisions
08 p1359 A69-19844

Dominant ionic species in cesium plasma through mass spectrometer analysis, measuring total ion and electron currents
09 p1544 A69-21335

Ionic species identification in argon-cesium discharges for thermionic converter design
09 p1440 A69-21830

Electrical conductivity, electron energy balance, ionization equilibrium time and channel parameters in pulse discharge nonequilibrium Cs plasma containing inert gas addition
10 p1731 A69-23439

Ionization relaxation in atmospheric pressure Ar-Cs plasma, considering two and three body recombination and O impurity effects
10 p1733 A69-23445

Plasma decay coefficient, charge recombination coefficient and electron scattering in cooling electron gas of quasi-steady cesium discharge plasma under high pressure
10 p1733 A69-23448

Mercury cesium plasma in crossed electric and magnetic fields as working fluid of MHD generators based on Rankine cycle
10 p1636 A69-23458

Cesium plasma confinement time improvement in symmetrically heated tungsten end plates of Q machine
11 p1925 A69-24314

Arc mode thermionic Cs converter nonlinear I-V characteristics explained by current-dependent temperature and potential fields in plasma
11 p1827 A69-25400

Positive column contraction in Ar and Ar-Cs mixtures, developing theory for nonisothermal local collision arc
11 p1932 A69-25539

Nonlinear algebraic equation system describing populations of excited atoms of low pressure nonequilibrium cesium plasma, determining ionization coefficient and molecular ion concentration
11 p1934 A69-25567

Back scattered electron inelastic LEED spectra of cesium plasma in W/100/-Cs system, noting strong loss peak
12 p2132 A69-26116

Decaying arc discharge Cs plasma luminosity anomalous behavior due to combined effect of intrinsic monotonic and complex nonmonotonic emissions
14 p2490 A69-28996

Low voltage arc in cesium thermionic converter, investigating current-voltage characteristics, electron temperature, electron density and plasma potentials in ignited mode
14 p2401 A69-29231

Unignited mode converter and emitter work function patches, calculating electron-cesium momentum transfer cross sections from saturation current measurements
14 p2490 A69-29240

Rasor phenomenological theory of space ionization in arc mode regime of Cs thermionic converter
14 p2402 A69-29242

Cesium plasma electron temperature in narrow electrode space of thermionic converter determined using electrode and changeable space diode
14 p2491 A69-29243

Low voltage Cs arc in thermionic converter with slotted cathode surface, determining electron concentration and temperature distribution
14 p2403 A69-29250

Electron temperature and density distributions across cesium converter interelectrode gap determined spectroscopically, noting maxima toward emitter
14 p2491 A69-29259

Work function measurements of polycrystalline W, Re and Ni disks in high pressure cesium plasma for low probe temperature range
14 p2506 A69-29266

Ionization and recombination in low temperature plasmas, noting fast electron distribution function deviation from Maxwellian form and calculation for Cs plasma
15 p2658 A69-30256

Electronic density of collisional cesium plasma, comparing measurements made by Langmuir and HF spherical probes
15 p2659 A69-30300

Shock wave propagation through collisionless magnetized plasma, using gun driven, laser and cesium plasma flow methods
19 p3379 A69-35759

Electron temperatures and densities in interelectrode plasma of close spaced high current cesium plasma diode
19 p3380 A69-36415

Electron energy distribution for Cs plasma in emitter region of ignited mode thermionic converter, noting nonequilibrium ionization effect
19 p3380 A69-36442

Measurement method for relative phase shift between density and potential oscillations in Cs plasma
24 p4354 A69-42676

Steady state interaction between collisionless plasma flow and immersed stationary magnetized or unmagnetized objects by inserting Cs ion accelerator into plasma wind tunnel
24 p4359 A69-43646

CESIUM VAPOR

Electron impact ionization cross section in cesium vapor measured with Tate-Smith apparatus
01 p0137 A69-10285

Plasma decay at high pressure in helium and argon with cesium vapor admixture and pure cesium vapor, using Saha equation
03 p0480 A69-14052

Doublet structure suppression in mixtures of cesium and foreign gases, discussing absorption observations
08 p1356 A69-20736

Charge exchange collisions in ground state and ionic hydrogen incident on cesium vapor, measuring beam components after passage through target
08 p1356 A69-20737

Saturation electron emission characteristics from incompletely outgassed Ta wire emitters immersed in Cs vapor using plasma anode technique, noting oxygen effects
09 p1437 A69-21812

Predicting electrode geometry effect on saturation ion currents in diode exposed to ionizable vapor in equilibrium with liquid Ce
09 p1440 A69-21832

Thermionic converters stability and safety maintainable at high Ce pressures
09 p1441 A69-21837

Adsorption process limits when used as Cs reserve in thermionic converter
09 p1441 A69-21839

Gas breakdown model for analyzing breakdown of Ce vapor filled crack in thermionic trilayer insulator
09 p1441 A69-21840

Momentum transfer cross sections, recombination coefficients and ionization coefficients of working gases for MHD energy converter
10 p1733 A69-23446

Heats of condensation and vaporization of W, Re and Mo cathodes of thermoelectric converter with Cs arc for various output powers and Cs vapor pressure
12 p2017 A69-26544

High pressure Cs thermionic converter with cold region, measuring Cs partial pressure distribution in Ar filled tube
14 p2397 A69-29176

Cesium sorption in materials for thermionic converters reservoirs, discussing dimensional stability of porous alumina, W and C samples
14 p2463 A69-29220

Low voltage arc discharge characteristics in cesium vapor, considering energy balance, electron temperature, energy losses, volt-ampere characteristics, ignition, cathode temperatures, etc
14 p2401 A69-29234

Thermionic converter stability as function of cesium pressure, heat input, reservoir temperature, load voltage or resistance
14 p2402 A69-29236

Cs mixture effects with Ba and I on cathode electron emission in thermionic converter
14 p2402 A69-29239

Thermionic converter current-voltage characteristics under various emitter temperatures and cesium vapor pressures, noting role of Schottky effect
14 p2402 A69-29241

Low voltage arc in thermionic cesium vapor diode with lengthy electrodes and temperature variations along emitter, discussing plasma and current density distributions
14 p2402 A69-29244

Knudsen arcs kinetic theory with cesium/inert gas mixtures in narrow gap between parallel plate electrodes, discussing fast particle beams and electron scattering
14 p2491 A69-29245

Current oscillations and electromagnetic radiation in low pressure cesium thermal emission converters using glass diode with plate geometry metal electrodes
14 p2402 A69-29246

Low voltage Knudsen arc in cesium-argon mixture for thermal emission converters
14 p2403 A69-29248

Experimental and theoretical data correlation on low voltage arc in thermionic converters using cesium vapor, describing discharge plasma by solving differential equation system
14 p2404 A69-29254

Ionization mechanisms in ignited mode cesium thermionic converter, discussing positive ions production for electron space charge neutralization and ion density calculations
14 p2404 A69-29258

Radiation effects on Cs thermionic converter, discussing radiation interaction with alkaline atoms to complete space charge neutralization by supplementary ion creation
14 p2404 A69-29261

Plasma anode technique for work functions measurements of polycrystalline W and Re wires in cesium vapor with cesium oxide additive
14 p2507 A69-29274

Electron work function profile determined for polycrystalline Mo and W single crystals with and without Cs vapors by emission microscope and photomultiplier
14 p2507 A69-29276

Mass transfer during Cs condensation from moving vapor mixture containing Ar in water-cooled tube
15 p2718 A69-30998

Plasma decay at high pressure in helium and argon with cesium vapor admixture and pure cesium vapor, using Saha equation
18 p3181 A69-35045

Cs jet device eliminating wall influence in nonlinear radiation-atom interaction phenomena
19 p3376 A69-36174

Longitudinal electric field, electron density and temperature in positive column of low pressure Cs-Ar DC arc discharge, discussing Cs vapor depletion
19 p3380 A69-36441

Flow and thermodynamic variables of Ar-Cs mixture behind normal shock in shock tube at various temperatures and pressures
23 p4150 A69-41335

Electron density in positive column of Cs vapor discharge related to current and gas pressure, discussing field strength effects on drift velocities
23 p4196 A69-42197

CESIUM 133

GaAs laser used as optical sweep generator for display of Cs 133 spectral line shape, studying fluorescence and radiation lifetime
19 p3339 A69-36696

National Physical Laboratory atomic clock improvements, describing use of cesium 133 as second of time standard and phase shift effects on precision
21 p3720 A69-38548

CESSNA AIRCRAFT

Military forward air control aircraft conversion from lightweight commercial tandem engine aircraft noting visibility, communication and navigation equipment [SAE PAPER 690313]
11 p1822 A69-24511

CESSNA MILITARY AIRCRAFT

U MILITARY AIRCRAFT

CF-104 AIRCRAFT

U F-104 AIRCRAFT

CH-34 HELICOPTER

Night vision requirements of Vietnam combat pilots investigated for relationship to Skyraider fatal crash during target strafing and H-34 helicopter crash landing
23 p4107 A69-41807

CH-46 HELICOPTER

CH-46 Sea-Knight and CH-47 Chinook transport helicopters experience in Vietnam war, discussing missions, payloads, speeds, operating ranges, etc
01 p0009 A69-10405

Flight recorder program determining combat operating environments of CH-46D helicopters analyzed and compared with aircraft design criteria [AHS PAPER 375]
17 p3059 A69-33513

CH-46 helicopter flight simulation program for pilot response to large perturbation maneuvers, using six degrees of freedom mathematical models [AHS PAPER 361]
17 p2946 A69-33521

CH-47 HELICOPTER

CH-46 Sea-Knight and CH-47 Chinook transport helicopters experience in Vietnam war, discussing missions, payloads, speeds, operating ranges, etc
01 p0009 A69-10405

CH-54 HELICOPTER

Combat fielded cargo-carrying CH-54A Flying Crane helicopter industry-government reliability/maintainability field test evaluation
19 p3247 A69-36017

CH-113 HELICOPTER

U CH-46 HELICOPTER

CHAFF

Mesospheric wind measurement by meteorological rockets based on radar determination of drift trajectories of chaff clouds
20 p3529 A69-37797

Soviet book on semiconductor compounds, production and properties covering crystal structures, phase diagrams, etc

01 p0137 A69-10353

Current carrier mobility in GaTe and tin selenide semiconducting stratified lattices, noting interaction of free carriers and polarized nonpolar phonons

02 p0295 A69-11777

Dynamic current-voltage characteristics of thin film diodes on chalcogenide glass base

02 p0223 A69-12834

Diffusion anomaly of native acceptor defect in zinc selenium telluride p-n junctions, discussing applications in triple diffusion technique of preparing p-n junction diodes

05 p0808 A69-16286

Soviet book on methods of investigating semiconductors as applied to lead chalcogenides PbTe, PbSe and PbS covering physical and physicochemical properties

12 p2145 A69-26851

Monograph on vanadium selenides and tellurides with NiAs structure covering existence regions, superstructures and equiatomic compounds from viewpoint of thermodynamics

15 p2667 A69-30602

Chalcogenide semiconductor film switches time parameters, showing delay time decrement with thickness decrease and voltage increase

21 p3780 A69-39045

CHAMBERS

Optimum design of spherical and ellipsoidal pumping chambers for solid state lasers determined from numerical calculation of radiation transfer efficiency

24 p4327 A69-42986

CHANCE-VOUGHT MILITARY AIRCRAFT

U MILITARY AIRCRAFT

CHANNEL CAPACITY

Multichannel amplitude analyzer for space applications, noting use as gamma-spectrometer component in Lunik 10 and 4096 bit/channel traffic capacity

01 p0084 A69-11315

Multistage detection systems probability characteristics with parallel stage realization, taking into account signal losses

02 p0206 A69-11604

Frequency locked loop /FLL/ to optimize loop filter and quantization of amplitude channel

03 p0390 A69-13202

Channel identification coding for data compressors, deriving optimum code word length for bit compression ratio and overflow identification scheme

03 p0391 A69-13219

Gaussian channels capacity, studying supremum of information transmission rates with small error probability

04 p0558 A69-15006

Multiple beam waveguide and optical delay line capacity increase by transmitting Gaussian beams clearly resolved at receiver

04 p0579 A69-15446

Domestic satellite communication system model for greatest possible amount of traffic using Saturn 5 propulsion systems, multibeam antennas, synchronous repeater platforms, etc

04 p0561 A69-15447

Satellite communication channel number and distribution optimization, obtaining malfunction probability for telephone service communication system [UN PAPER 68-95772]

06 p0886 A69-17030

Transistorized multichannel pulse height analyzer and recording system for balloon-borne cosmic ray payloads, discussing performance capacity

06 p0924 A69-17284

Data compression techniques compared for use in communications systems to minimize required number of samples and bits per sample

07 p1077 A69-18758

Waveform distortion resulting from adjacent channel crosstalk and from amplitude and phase nonlinearity in channel filters in DSB/SC telemetry link

07 p1083 A69-19130

Optimum linear feedback code for additive noise systems with average power constraint on transmitter to increase channel capacity

07 p1085 A69-19181

Algorithm for calculating Moore automaton or connected network channel capacity and source of input symbols for full capacity utilization

07 p1088 A69-19707

Multichannel microwave amplifier at L band frequencies, using several amplifiers in parallel

09 p1466 A69-22446

Simultaneous transmission of information signals and pseudonoise synchronization waveforms in common bandwidth [IEEE PAPER 67-TP-1173-COM]

10 p1655 A69-23532

Navigation accuracy and telecommunications system capacity interrelationships in economical improvement of air traffic control system over North Atlantic

10 p1723 A69-23704

Multistage detection systems probability characteristics with parallel stage realization, taking into account signal losses

11 p1835 A69-24711

Noise rejection and carrying capacity of wideband and narrowband discrete systems transmitting complex signals in concentrated noise spectrum

13 p2218 A69-27213

Delay time of pulse signals in radio channel transmission described by standard deviation of channel properties

13 p2218 A69-27215

Optimum thermal and nonlinear noise intensities distributions in frequency division multiplex satellite communications systems, relating relay station power, frequency band and channels

14 p2412 A69-29426

Two beam short wave channel capacity with beam separation at receiving end, noting dependence on channel properties and fading correlations

15 p2562 A69-30115

Unknown channels classes epsilon capacity applied to estimating capacity of channels with additive noise, discussing models and upper and lower bounds

15 p2570 A69-31142

Channel dropping filter for millimeter wave in low loss circular waveguide for overland telecommunications in bandwidth over 10 GHz

17 p2936 A69-33032

Communication channel information capacity determination through particle ensembles entropy analysis

19 p3334 A69-35885

Tactical Satellite Communications /Tacsat/ cost reduction, discussing jamming avoidance and mitigation, communications security, capacity increase and spectrum conservation

20 p3497 A69-38315

Geostationary satellite orbit used for communication satellites, noting ultimate limit of channels as related to separation angles between satellites

21 p3673 A69-38757

Satellite communication system capacity for segment of geostationary orbit extended to models involving two angular dimensions

23 p4131 A69-42521

Data compression from standpoint of epsilon entropy theory, considering precise measure of channel capacity necessary to describe data source

23 p4134 A69-42526

N-dimensional theorem for evaluating time continuous channel capacity or rate distortion function of random process

24 p4284 A69-42721

CHANNEL FLOW

NT OPEN CHANNEL FLOW

Inertia effect of flow between eccentric cylinders with rotating outer cylinder, calculating pressure and shearing distribution and force on inner cylinder

01 p0059 A69-10307

Gravity waves train propagation in cylindrical channel, discussing derivation by three dimensional flow analysis method

01 p0059 A69-10382

Indeformable gravity waves in horizontal cylindrical channel, using first and second order approximations for nearly uniform flow equations solutions

01 p0060 A69-10392

Two dimensional ionized plasma flow in coaxial channels calculated using differential equations

01 p0130 A69-10723

Steady state circular motion of fluid with variable rheological characteristics between coaxial cylindrical surfaces, obtaining velocity distribution

01 p0061 A69-10733

Steady state three dimensional MHD flow in variable profile channels calculated by reducing problem to two dimensional approximation using curvilinear coordinate system

01 p0131 A69-10776

Electromagnetic fields effect on turbulent boundary layer characteristics of compressible fluid on insulating wall of MGD channel

01 p0131 A69-10777

Turbulent flow between parallel plates, discussing turbulence generation by energy addition

01 p0061 A69-10993

MHD flow through circular, elliptic and rectangular straight channels with external magnetic field transverse to flow direction

01 p0132 A69-11209

Fluid logic circuits miniaturization for flow in straight and curved channels of various cross sections

02 p0196 A69-12084

Heat transfer of steady laminar flow of incompressible, viscous and electrically conducting fluid between parallel porous plates

02 p0289 A69-12235

Algorithm for Orr-Sommerfeld equation applied to stability of laminar flow, noting profile resembling mean velocity profile of turbulent flow in flat tube

02 p0233 A69-12573

Velocity measurement and flow pattern determination of plane shock waves during passage through channel diaphragm

02 p0234 A69-12589

Elastoviscous flow in curved channels, analyzing nonNewtonian effects for case of circular and elliptic walls

02 p0234 A69-12608

Similarity law for channel wall influence in wind tunnels valid for all flow velocities

02 p0192 A69-12830

Transonic flow around profile in blocked plane channel and in free jet, noting channel wall and jet edge effects on flow along profile

03 p0361 A69-13018

Steady laminar flow in two dimensional channel with different permeability porous walls and large injection at both walls

03 p0417 A69-13795

Stationary, moving and pulsating electrohydrodynamic flow between parallel dielectric plates and Couette flow, noting reaction concentration near wall

03 p0419 A69-13919

Unperturbed tube flow theory extended to flow through short axisymmetric tube

03 p0419 A69-13969

Thermodynamic comparison of MHD generators using Brayton and Rankine cycles, showing Rankine cycle conversion at higher channel Mach numbers for nonequilibrium ionization

03 p0369 A69-14154

Heat transfer covering heat conduction, channel flow, boundary layer flow, separated flow, etc

04 p0684 A69-14354

Average energy dissipation in MHD duct flow of arbitrary cross sectional shape, evaluating bulk temperature, net wall heat flux and pressure gradient

04 p0635 A69-14724

MHD channel flow temperature distributions with Hall effect, using formulation for momentum and energy equations

04 p0635 A69-14746

Reynolds number similarity argument, establishing relation between mean velocity at pipe or channel center and shear stress at wall

04 p0589 A69-14895

Monochromatic flexural waves passage through elastic insert between plates, determining wave absorptivity dependence on wave frequency

04 p0679 A69-14906

Quasi-neutral, steady, inviscid and nonheat conducting flow of conducting gas with high magnetic Reynolds number in plane channel with transverse magnetic field

04 p0636 A69-14984

Magnetic field effects on heat transfer between Ar plasma flow and channel wall, noting effects of temperature and Reynolds number

04 p0636 A69-14989

Irrational almost uniform plane flow of two immiscible inviscid liquids on horizontal bottom in channel, noting permanent gravity waves

04 p0590 A69-15055

MHD flow in square cross sectional channel in transverse magnetic field with conducting walls parallel to magnetic field

05 p0799 A69-15697

Real liquid turbulent flow of two parallel eddy streams between two parallel walls with given periodic roughness

05 p0747 A69-16034

Incompressible turbulent boundary layers in channel flow using constant temperature hot-wire anemometer, emphasizing measurement in viscous sublayer [ASME PAPER 68-FE-26] 05 p0747 A69-16066

Pressure recovery of straight channel divergence diffusers at high inlet Mach numbers [ASME PAPER 68-WA/FE-19] 05 p0698 A69-16095

Mathematical problem of MHD thermal entrance regions for parallel plate channel solved by Galerkin method [ASME PAPER 68-WA/HT-10] 05 p0803 A69-16118

Approximate method for calculating subsonic gas flows in curvilinear channels for gas admission control in arc welding 06 p0908 A69-16828

Viscous MGD channel flow in boundary layer approximation with heat conduction, transforming resultant partial differential equations set to system of ordinary differential equations 06 p0966 A69-17523

Shock formation in supersonic plasma flow guided by magnetic channel up to magnetic barrier 06 p0966 A69-17524

Lorentz force sustained energy discharge, discussing cesium added argon flow across magnetic field in disk channel 06 p0969 A69-17910

Linear approximation of ionization instability in disk channel of nonequilibrium MHD generator, calculating interatomic collisions frequency as function of temperature 06 p0871 A69-17911

MHD flows in channels of MHD devices, emphasizing two and three dimensional problems 06 p0969 A69-17913

Approximate solution of equations for boundary layer flow of conducting medium on insulating and electrode walls of MHD generator channel 06 p0871 A69-17914

Nonsimilar MHD channels boundary layers on insulating walls noting influence of loading factor, wall temperature and Hall effect on separation [AIAA PAPER 69-46] 06 p0972 A69-18192

Steady flow circuit characteristics in square cross section channels of planar geometry fluid control elements in case of laminar flow 07 p1118 A69-18293

Natural frequency of fluid oscillations in complex pipelines 07 p1119 A69-18745

Numerical analysis of stabilization of one component conducting plasma in two dimensional coaxial duct 07 p1190 A69-18757

Conducting gas acceleration in strong unsteady electromagnetic field, discussing channel flow in relation to time and pressure gradient 07 p1191 A69-18988

Navier-Stokes equations solved for viscous incompressible fluid flow due to laminar jet flow into channel in presence of magnetic field 07 p1120 A69-18997

MHD flow in channels with abruptly widening sections and finned walls under transverse magnetic field, discussing effects on drag 07 p1192 A69-19016

Power losses in MHD channel due to longitudinal end effects related to finite dimensions of electrodes and terminal insulators 07 p1193 A69-19030

Weightlessness effect on critical heat flow during forced motion of water in different kinds of channels 07 p1243 A69-19616

Turbulent incompressible MHD flow between two parallel smooth plates in transverse magnetic field, determining magnetic Reynolds number 07 p1195 A69-19736

Semilogarithmic law of velocity and temperature for turbulent flow in circular channel, examining analogy between momentum and energy transfer 08 p1420 A69-19877

Free surface of electrically conducting liquid in gradually varied supercritical regime in horizontal rectangular channel 08 p1362 A69-20273

Discharge structure and stability of nonequilibrium plasma undergoing supersonic flow through linear MHD channel 08 p1366 A69-20788

Highly turbulent boundary layers on walls in channels using laser light sources 09 p1515 A69-21434

Convective MHD channel flow in vertical channel subjected to temperature and pressure gradients, discussing wall conductances effects on flow rate and heat transfer 09 p1545 A69-21441

Navier-Stokes equations solution applicable to source type low Reynolds number flow through conical nozzles 09 p1482 A69-21976

Subsonic channel flow of frictionless barotropic gas through oscillating grid, investigating perturbation velocity field and aerodynamic forces on airfoils 10 p1631 A69-22905

Incompressible Newtonian flow between two parallel plates, noting marginal stability condition, mean velocity profile and turbulence 10 p1678 A69-22909

Optimum operation modes of MHD converter 10 p1636 A69-23095

MHD flows in MHD generator channel under magnetic field, analyzing steady laminar flow during entry and Hall effect on conductivity temperature dependence 10 p1734 A69-23455

Quasi-neutral plasma formation in hydrodynamic channel flow, discussing ignition and breakdown processes in preionized gaseous flow 10 p1737 A69-23467

Two dimensional flow of unipolar medium in electrodynamic power generation channel, discussing stationary model, electric field and ion density distributions 10 p1638 A69-23486

Thin wall flow of circular jets in bounded transverse flow, showing hydrodynamical parameter of mixture effect on jets dimensionless path 10 p1679 A69-23567

Laminar elasticoviscous flow of liquid with short memory in two dimensional channel with porous walls 10 p1680 A69-23668

Magnetic field induced nonequilibrium argon plasma ionization relaxation processes obtained with allowance for flow parameters change in relaxation zone 11 p1922 A69-24225

Heat transfer in MHD parallel plate channel flow in entrance regions analyzed by Galerkin method, noting Hall current effect 11 p1923 A69-24290

Characteristics method for solution of differential equations representing time changes of wind and pressure fields in divergent barotropic channel flow 11 p1911 A69-24585

Two dimensional stratified flow over obstacle in finite height channel, noting lee waves and drag increase with decreasing speed 11 p1869 A69-24892

Self similar axisymmetric and plane laminar viscous gas channel flows noting exponential or hyperbolic law of decrease in static pressure along channel 11 p1875 A69-25482

Boundary layer calculation during laminar MHD channel flow under crossed magnetic and electric fields using successive approximation method 11 p1932 A69-25491

Viscous flow-induced vibrations of elastically restrained flat plates in narrow channel, considering one dimensional viscous flow theory 11 p1991 A69-25515

Flow in linear MHD channel with two permeable electrodes, solving Riemann boundary value problem for electric field in channel 11 p1934 A69-25727

Gas jets collision flowing from parallel wall channels, applying solution to calculating geometrical characteristics of fluid jet amplifiers 12 p2016 A69-25879

Navier-Stokes equations for compressible gas, generalizing viscous channel flow of heat conducting gas to slip flow of rarefied gas 12 p2061 A69-25887

Electrohydrodynamic channel flow using boundary problem and approximations corresponding to flow of unipolarly charged and polarized media 12 p2135 A69-26400

Monochromatic flexural waves passage through elastic insert between plates, determining wave absorptivity dependence on wave frequency 12 p2182 A69-26659

Incompressible elastic-plastic solid flow through rough converging conical channel analyzed using Mises yield condition and Prandtl-Reuss equations 12 p2063 A69-27114

One dimensional calculations of finite length MHD uniform traveling wave induction generator, discussing

magnetic field distribution, electrical impedance and conversion efficiency 13 p2206 A69-27494

MHD induction converters operational characteristics calculations with simultaneous considerations for finite length and channel width 13 p2207 A69-27496

Nonconducting vanes end effects on electrical characteristics of MHD channels, analyzing current density, Joule losses and finite length vanes 13 p2306 A69-27497

MHD channel mercury flow with hydraulic shock in transverse magnetic field, determining characteristic values distribution over range of principal parameters 13 p2307 A69-27499

Laminar-turbulent transition in MHD channel in transverse and longitudinal magnetic fields, discussing Reynolds equation for large Hartmann numbers 13 p2307 A69-27500

Velocity profiles of MHD flow through electrically insulated circular channel in transverse magnetic field 13 p2307 A69-27501

Optimal mean radius and half height of channel of liquid metal coaxial linear induction MHD generator with unilateral and bilateral excitation 13 p2207 A69-27507

Rayleigh-Taylor instability in synchronous liquid metal MHD generators, showing stabilization by channel positioning and threshold power rating 13 p2307 A69-27508

LF spectral analysis of flowing water pressure pulsations behind single bulge on hydrodynamic channel smooth wall at low disturbance level 13 p2246 A69-27535

Resonance tube excitation from energy depletion in central part of subsonic jet supplying tube 13 p2247 A69-27738

Turbulent flow in circular tube and parallel plate channel, considering molecular viscosity and duct shear stress variation 13 p2248 A69-28131

Combined free and forced convection flows in parallel channel systems and in single channels, discussing metastable flow regimes, single phase laminar flows, etc 13 p2377 A69-28152

Model to study viscous flow characteristics in channel with porous walls and constant suction, noting non-monotonic velocity profile 14 p2429 A69-29015

MHD channel flow calculations by quasi one dimensional approximation, considering potential drops at electrodes 14 p2500 A69-29904

Boundary problems solution for electromagnetic field two dimensional distributions in MHD channels at arbitrary magnetic Reynolds numbers, considering longitudinal terminal effects 14 p2500 A69-29906

Pressure drop fluctuations amplitude and frequency effect on channel resistance and magnetic field effect on fluctuations intensity in laminar conducting fluid flow 14 p2501 A69-29909

Shunting effect of conducting channel walls in induction MHD machines, discussing wall effects on pressures during pumping and generating operation modes 14 p2405 A69-29912

Velocity distribution effect on electric field at walls for axisymmetric flow of electrolyte in circular channel in magnetic field of E shaped inductor 14 p2501 A69-29915

Longitudinal pressure distribution in MHD channel with electrodes parallel to applied transverse magnetic field 14 p2501 A69-29918

Monograph on Prandtl number effect on heat transfer and pressure loss in artificially roughened channels 15 p2717 A69-30934

Radiative luminescence of gas discharge plasmas in channel with substantial radial heat transfer determined from energy balance measurement 15 p2662 A69-30978

Boundary layers coalescence on plane convergent channel walls investigated with analytic formulas for velocity distribution, shear stress, layer thickness, etc 15 p2592 A69-31009

Eigenfrequency spectrum and stability of perfectly conducting inviscid incompressible fluids in cylindrical channels and twisted magnetic fields, noting flowfields and critical wavelenghts 15 p2664 A69-31063

Heat and mass transfer in porous medium with bulk flow in thin adjacent channel, applying Green function analysis to hydrogen-oxygen fuel cell
15 p2552 A69-31115

Wind tunnel investigation of turbulent gas flow heat transfer and hydrodynamic drag in variable pressure gradient field of divergent-convergent channel
15 p2548 A69-31173

Nonequilibrium plasma boundary layer along channel insulator wall, noting different electron and heavy particle temperatures
[AIAA PAPER 68-134] 16 p2821 A69-31873

Diagonal conducting wall /DCW/ MHD generator channel flows in formulation including Hall effect, electrode drop and electrode wall angle
16 p2736 A69-32172

Linearized motion equations for conducting gas in magnetic and electric field solved for coaxial channel and free jet, assuming small Reynolds number and parallel flow
17 p3010 A69-33016

Conducting fluid and plasma rotation between concentric cylinders due to crossed fields, determining velocity distribution, induced magnetic field and kinetic energy
[AIAA PAPER 69-726] 17 p3011 A69-33472

Turbulent velocity distribution and wall friction calculated from eddy viscosity distribution for concentric annulus
17 p2956 A69-33575

Minimum Reynolds number and Malkus theory of turbulent channel flow, discussing stability, equilibrium flow, and stationary turbulence via variational theorem
17 p2957 A69-33764

Asymptotic theory of Orr-Sommerfeld problem for symmetric channel flow stability
17 p2958 A69-34151

Channel heat transfer determination based on thermal conductivity coefficients as functions of temperature gradients in channel wall materials
18 p3230 A69-34988

Flow viscosity and heat conduction effects on shock wave propagation in bent channel with weak Mach reflection
18 p3124 A69-35326

Fraunhofer holography for measurement of three dimensional flowfield velocity components, investigating rectangular channel flow
19 p3305 A69-35729

Combined free and forced convection hydromagnetic flow and heat transfer of electrically conducting fluid subjected to temperature variations in vertical channel
19 p3380 A69-36304

Interaction effects between mixing and pressure distribution of heterogeneous flow in channel, deriving criteria for predicting pressure variation sign
19 p3300 A69-36785

Laminar flow of compressible viscous gas in channels of variable cross section
20 p3457 A69-37089

Thesis on turbulent velocity distribution and wall friction in flow channels of various cross sections
20 p3515 A69-37925

Prandtl mixing length theory for flow in pipes and channels described by spatial exponential form, developing velocity profile and friction factor
[ASME PAPER 69-FE-48] 20 p3516 A69-37978

LF spectral analysis of flowing water pressure pulsations behind single bulge on hydrodynamic channel smooth wall at low disturbance level
20 p3518 A69-38202

Heat transfer in curved channel as function of inlet configurations, obtaining Nusselt number equations for thermal and mixed convection and laminar flow
21 p3850 A69-38866

Channel flows energy stability, discussing Couette and plane Poiseuille flows, velocity profiles, vorticity maxima, etc
21 p3697 A69-39675

Flow structure in wake behind cylinder in plane channel, discussing circulation zone variation and velocity and turbulence distribution at various channel cross sections
21 p3698 A69-39850

Viscoelastic fluid steady flow in porous walled channel, examining mass flow solution continuity
22 p3930 A69-40118

Laminar MHD flow in porous walled channel in transverse magnetic field, determining velocity distributions, induced fields and current over channel cross section
22 p3989 A69-40256

Internal aerodynamics of centrifugal compressor impeller, discussing impeller channel airflow model, impeller exit flow, rotating channel flow, etc
[RAES PAPER 19] 22 p3859 A69-40498

Skin friction and mean velocity profiles measured for fully developed 1000-10,000 Reynolds number flows in pipes and channels
22 p3932 A69-40897

Pulsed energy balance expressions for turbulent characteristics of incompressible circular flow in channel with inserted rotating cylinder
22 p3933 A69-41028

Linear stability criteria for two dimensional wave perturbations effects on nonNewtonian fluid flow between parallel plates
22 p3933 A69-41108

Momentum, heat and mass transfer in turbulent channel flow emphasizing phenomena close to wall, using boundary layer growth-breakdown model
24 p4407 A69-42914

Prandtl number influence on heat transfer and pressure drop characteristics of roughened channels, determining friction factor
24 p4407 A69-42915

Transition from axisymmetric to nonaxisymmetric flow in rotating annulus, using two layer quasi-geostrophic model
24 p4345 A69-43150

Separation flows in flat channel with step recess, analyzing dynamic characteristics in mixing region, in wake of rarefaction waves and in attachment zone
24 p4247 A69-43498

Secondary flow occurrence and geometry in viscous turbulent flow in square channel, using iterative solution
24 p4303 A69-43501

Local Nusselt number beyond abrupt circular channel expansion tested for Reynolds numbers with air as working fluid
[ASME PAPER 69-HT-35] 24 p4411 A69-43532

Gas phase self induced pressure field and laminar velocity distribution of working fluid within closed heat pipe channels analyzed by momentum integral method
[ASME PAPER 69-HT-22] 24 p4412 A69-43546

Gas velocity and pressure influence on electrical breakdown potential of Ar, N and He between parallel flat plate and concentric electrodes
24 p4359 A69-43693

CHANNELS

Single channel binary PSK communication systems performance influenced by degree of RF coherence between transmitter and receiver
07 p1082 A69-19109

Low temperature optically thick boundary layers influence on spectroscopic temperature measurements in plasma MHD channels
10 p1731 A69-23434

CHANNELS (DATA TRANSMISSION)

Cross correlation methods for determining systems time domain response adapted to communications channel evaluation, discussing computer simulation of on-line testing
16 p2750 A69-31757

Signal propagation in channel subject to static investigated using Fokker-Planck type equation in statistical mechanics methods
16 p2753 A69-32437

Automatic multichannel transient monitor for electrical transient detection and data processing, transmission and storage on aircraft
17 p2947 A69-34135

Meteor burst communication channel parameters for low data rate telemetry, considering signal amplitudes, decay, duty cycle, multipath, phase stability, trail location and variations
19 p3271 A69-36250

Optimum power allocation for RF carrier phase error and synchronization error in two channel system
19 p3274 A69-36283

Noiseless feedback schemes for digital and analog transmission over additive white Gaussian noise channels
21 p3671 A69-38405

Radio relay FM channel data transmission, evaluating cumulative thermal noise due to IF amplification at each station
21 p3672 A69-38653

EEG with combined multichannel radiotelemetry and telephone for onward data transmission
21 p3664 A69-38978

Single channel pressure telemetry unit with magnetic latching or RF switch for chronic implantation
23 p4100 A69-41295

Algebraic decoding techniques, discussing channel models, errors correction, hardware and software, etc
23 p4119 A69-41746

Linear filtering effects in channel with binary direct sequence antipodal biphase modulation in presence of white noise and sinusoidal interference, noting variance
23 p4122 A69-41774

EHF earth-satellite link communication channel emphasizing down link, discussing weather models, atmospheric absorption and temperature, channel coherence bandwidth, etc
23 p4129 A69-42506

CHAPLYGIN EQUATION

Self adaptive circuit parameters synthesis of systems using amplitude-frequency characteristic by Chaplygin theorem
03 p0410 A69-13685

Approximate methods for integration of equations of plane isentropic motion of gas at supersonic velocities
05 p0699 A69-16674

Hodograph for lifting airfoil with subsonic velocity at infinity, using Chaplygin compressibility law for computation
[ONERA-TP-631] 07 p1049 A69-18416

Approximation of Chaplygin plane motion equations of gas flow at high supersonic velocities
07 p1120 A69-18754

Blasius-Chaplygin formula for generalizing Kutta-Joukowski theorem concerning jet profiles, calculating resultant of hydrodynamic forces
11 p1867 A69-24355

Modified Chaplygin method for approximate integration of Cauchy problem for differential equations, estimating rate of convergence
15 p2644 A69-30656

CHAPMAN-ENSKOG THEORY

Chapman-Enskog method applied to Boltzmann equations for transport coefficients for low density polyatomic gases
01 p0123 A69-10388

Plasma kinetic equation obtained by method similar to Chapman-Enskog method
08 p1369 A69-20816

Electrical conductivity of partially ionized plasma, noting nonapplicability of Enskog-Chapman method and use of Lorentzian gas model
09 p1546 A69-21584

Enskog method for Boltzmann equation, analyzing asymptotic nature of integral kinetic equation for molecular mean free paths and Laplace probabilities
09 p1481 A69-21889

Transport coefficients for almost Lorentzian mixture, computed as perturbation to coefficients for true Lorentzian mixture, compared to Chapman-Enskog method results
11 p1997 A69-24286

Chapman-Enskog procedure extension for binary gas mixtures, obtaining diffusion equation from revised relaxation time of component velocities
11 p1921 A69-24308

Boltzmann equation for system of equations governing evolution of gas of identical particles with discrete velocity distribution, applying Chapman-Enskog method
11 p1921 A69-24325

Chapman-Enskog theory applied to observed stellar velocity distribution function, attributing deviation from Maxwellian function to negative K effect
15 p2687 A69-30549

Thermal conductivity coefficient of gas mixtures at low temperatures obtained using quantum diffusion model and Chapman-Enskog method for Boltzmann equation
21 p3848 A69-38638

CHAPMAN-FERRARO PROBLEM

Chapman-Ferraro approximation for magnetic interior field line configuration in plasma flow around two dimensional dipole, allowing for tail formation and neutral sheet
18 p3129 A69-34955

CHAPMAN-JOUGET FLAME

U CHEMICAL EQUILIBRIUM

U DETONATION

U FLAME PROPAGATION

CHAPMAN SHEAR LAYER

U SHEAR LAYERS

CHARACTER RECOGNITION

Image recognition algorithms estimated for effectiveness by formulas minimizing classification error probability
23 p4134 A69-41954

CHARGE CARRIERS
 NT FREE ELECTRONS
 NT HOLES [ELECTRON DEFICIENCIES]
 NT MAJORITY CARRIERS
 NT MINORITY CARRIERS
 Recombination rate dependence on nonequilibrium charge carriers concentration at semiconducting surface 01 p0136 A69-10253
 Nonequilibrium carriers during semiconductor depolarization, noting microwave oscillation energy absorption in silicon and zinc sulfide crystals 01 p0138 A69-10434
 Recombination radiation from excitons and free carriers in epitaxial GaAs with impurities at liquid He temperatures 01 p0140 A69-11253
 Faraday effect of free carriers on n-type GaSb at 20 K, determining mass and mobility of electrons from Hall effect and conductivity 02 p0298 A69-12039
 Anisotropic pressure influence on silicon diodes parameters 02 p0223 A69-12839
 Carrier generation-recombination in space charge region of asymmetric p-n junction, noting experimental results for InSb diodes 03 p0487 A69-13641
 Carrier scattering mechanisms in n-type GaP, measuring IR radiation absorptivity in Te doped GaP 03 p0492 A69-14168
 N-type GaAs single crystal magnetoresistivity, noting charge carrier scattering mechanisms 03 p0492 A69-14177
 Quality control of semiconductor materials, analyzing homogeneity by statistical distribution of nonequilibrium carriers based on photoconductivity measurement 04 p0642 A69-14856
 Electric field strength and helix pitch in induced cholesteric-nematic phase transitions, noting activation energy for charge carrier production 04 p0555 A69-14964
 Distribution of current carrier concentration and mobility in p-type silicon doped with phosphorus ions 04 p0643 A69-15254
 Current carrier concentration temperature dependence in Te-doped silicon single crystals by analyzing photoconductivity spectra 04 p0644 A69-15267
 Charge carrier concentration determination by double probe in plasma with Druyvesteyn distribution of incident electron flow 05 p0800 A69-15737
 Impurity transfer in doped and undoped epitaxially grown GaAs films, studying substrate dopants effect on carrier concentration profiles 05 p0807 A69-15957
 Fresnel drag produced by relativistic addition of electron velocities in semiconductors measured by changes in refractive index 05 p0807 A69-16026
 High temperature effects on gallium arsenide crystals current carriers lifetime, discussing recombination characteristics and impurity photoconductivity 05 p0809 A69-16551
 Recovery of carrier concentration and lifetime in n- and p-type Si during annealing after irradiation by 10 Mev electrons, noting impurities effects 06 p0974 A69-16865
 Hall effect and resistivity of n-type gallium arsenide phosphides doped with Te and Se 06 p0978 A69-16988
 Charge carrier lifetime measured in intrinsic conductivity range of Cd doped InAs to define recombination mechanism, relating temperature dependence to surface impurities recombination 06 p0979 A69-16997
 Ambipolar motion of light injected photocarriers in cadmium-mercury-telluride in terms of diffusion and drift in electric fields 06 p0979 A69-17154
 Energy separation and electrons effective mass ratio of conduction bands of tellurium doped GaSb obtained by free carrier Faraday rotation measurements 07 p1201 A69-19464

Resonance effects during piezoelectric interaction between charged drift wave and flexural wave in semiconductors with one sign current carriers 08 p1371 A69-19806
 Time dependent velocity distribution functions for carriers calculated in weakly ionized plasma in external electric field 08 p1362 A69-20265
 Distribution and carrier type in germanium bar in electric field, relating distribution obtained by using Hall effect to avalanche phenomenon 08 p1372 A69-20277
 Semiconductor current fluctuations associated with generation, recombination and annihilation of random electron-hole pairs at ohmic contacts 08 p1372 A69-20545
 HgTe-CdTe single crystals homogeneity and Cd distribution obtained by Bridgman and/or zone melting studied for carrier concentration and electron mobility 09 p1557 A69-21737
 Inhomogeneity distribution of carrier concentration and electrovoltaic effect in GaAs devices analyzed by scanning electron microscope 09 p1557 A69-21746
 Static characteristics of transistors dependence on current carriers surface recombination in inactive base region, noting strong electric field influence 09 p1464 A69-22287
 Recombination rate dependence on nonequilibrium charge carriers concentration at semiconducting surface 09 p1559 A69-22646
 Radial distribution profiles of charge carriers in low temperature gas discharge plasma accounted for in terms of volume recombination 11 p1925 A69-24330
 Metallic impurities effect on Ge surface charge and recombination properties, noting fast and slow electron density changes by forbidden band penetration 11 p1939 A69-25703
 LF noise mechanism for forward biased semiconductor p-n junction, noting charge carrier capture in electron traps of carrier depleted region 11 p1857 A69-25705
 Current-voltage characteristics of p-n-p-n diodes, discussing collector voltage effect on current carrier concentration distribution in diode base 13 p2236 A69-28531
 Nondrifting n-p-n semiconductor current gain dependence on surface recombination rate 13 p2236 A69-28547
 Anisotropic scattering of current carriers in semiconductors, obtaining general expression for mobility tensor with variational principle 14 p2508 A69-29667
 Inhomogeneous distribution of nonequilibrium current carrier concentrations in semiconductors with electrons and holes of different lifetimes, noting instability 15 p2665 A69-30041
 LF electrostatic oscillations of inhomogeneous solid state plasma with small number of current carriers in parallel external electric and magnetic fields 15 p2665 A69-30042
 Finite scattering cross section in current carriers scattering on impurities in compensated semiconductors, assuming unscreened Coulomb potentials 15 p2666 A69-30063
 Quality control of semiconductor materials, analyzing homogeneity by statistical distribution of nonequilibrium carriers based on photoconductivity measurement 15 p2667 A69-30248
 Carrier lifetime in p-nu-n diodes, discussing error of forward pulsed diode method by Wilson and alternative model 16 p2757 A69-31615
 External magnetic force and internal Coulomb force influence on carriers in conduction or valence band of semiconductor, considering H atom spectra 16 p2826 A69-31824
 Multilayer multijunction solar cells with carrier generation within diffusion length of junction, discussing epitaxial techniques 19 p3251 A69-35690
 Fe-doped p-type gallium arsenide single crystal radiative recombination emission during current carriers transition from deep acceptor level into valence band 19 p3392 A69-36611
 HgTe-CdTe single crystals homogeneity and Cd distribution obtained by Bridgman and/or zone melting studied for carrier concentration and electron mobility 20 p3584 A69-38215

Injection and excitation of charge carriers in CdS single crystals, analyzing current-voltage characteristics dependence on electrode separation, temperatures and electric field 21 p3779 A69-38423
 Current carrier concentration and magnetic field as factors influencing laser frequency resonance mixing in semiconductors with narrow forbidden bands 21 p3737 A69-38998
 Electrical properties of semiconductors in HF electromagnetic field, showing Dember type EMF dependence on carrier response to field inhomogeneity 22 p3993 A69-40605
 Cross sections of charge carrier capture by ions in gamma irradiated P-Al-Si glass with metal oxides additions measured for evaluating radiation stability improvement 23 p4180 A69-42470
 Electroluminescence in doped p-type GaAs single crystal diodes ascribed to double injection of nonequilibrium current carriers 24 p4288 A69-43739
CHARGE DISTRIBUTION
 Microstrip-like transmission lines analyzed by method based on line capacitance variational calculation and charge density distribution 01 p0044 A69-10625
 Cross field plasma instability resulting in charge density irregularities shown to meet requirements for ionospheric irregularities model 01 p0073 A69-11178
 Charge image detector for reading information as extended spatial charge distribution on dielectric layer surface, using vibrating conducting probe scanner 02 p0248 A69-11822
 Step recovery switching silicon transistor combining planar and mesa technologies, discussing charge storage and fall times 02 p0215 A69-11937
 Charge and energy composition of particles in solar flare, discussing rigidity spectra of singly and multiply charged nuclei 06 p0989 A69-17280
 Cosmic ray magnetic spectrograph for measurement of momentum spectrum, charge ratio and specific ionization of muons, discussing magnetic and scattering displacement 06 p0925 A69-17302
 Long transmitting dipole antenna, studying current and charge distributions by Wiener-Hopf technique 08 p1281 A69-20019
 Distribution and carrier type in germanium bar in electric field, relating distribution obtained by using Hall effect to avalanche phenomenon 08 p1372 A69-20277
 Transient processes in conduction type MHD generators due to external circuits induction distribution 12 p2017 A69-26545
 Electrostatic charge distribution on ultrahigh vacuum cleaved silicates including instrumentation, UV irradiation, half life, Paschen relation, etc 13 p2322 A69-28018
 Electric field profile and turbulence ratio relationship in free atmosphere as function of vertical current density, conductivity, potential gradient and charge density 13 p2295 A69-28523
 Integral charge neutrality effect on local space charge density of MHD generator channel, examining electrode couple for Faraday generators 15 p2664 A69-31055
 Einstein field equations solutions generated via static spherically symmetric mass and charge distributions 16 p2812 A69-32053
 High energy cosmic ray muon charge ratios at large zenith angles measured as function of momentum by using spectrometer 17 p3023 A69-33321
 Biased electrostatic probes determining free stream charge density and ionization risetime in supersonic flows in arc heated pressure driven shock tube 19 p3291 A69-35715
 Computerized design parameters for realizable over-driven bimode varactor frequency doubler based on charge-voltage relationship at break point 20 p3505 A69-37299
 Dielectric response of semifinite metal surface to external point charge in linearized Fermi-Thomas approximation, discussing potential in metal and vacuum 20 p3583 A69-37498
 Negative charge distribution in thunderstorm clouds related to direction of storm movement, noting vertical column 20 p3572 A69-37908

Steady state sunlit lunar surface electrostatic charge and potential distributions, noting electrons photoemission and solar wind particles collection
20 p3609 A69-38077

Ionization formula linking nitrogen ion charge density ratio to plasma temperature
22 p3990 A69-40714

CHARGE EXCHANGE

Ionization, neutralization and charge exchange processes in ionosphere, detailing dependence of photodissociation and collision detachment of negative ions
01 p0066 A69-10598

Ion-molecule collisions of Ar-Co and N-No pairs, discussing charge exchange reaction rates and spiraling nature
05 p0797 A69-16428

Energy flux into earth thermosphere due to fast corpuscular neutrals arising from charge transfer collisions between solar protons and neutral interstellar H
05 p0817 A69-16654

Charge exchange cross sections in methane and ammonia, noting dissociative charge exchange role
06 p0884 A69-17114

Perturbation methods for exchange and Coulomb energy of hydrogen molecule, calculating Hamiltonian by wave function
07 p1186 A69-19446

Charge exchange collisions in ground state and ionic hydrogen incident on cesium vapor, measuring beam components after passage through target
08 p1356 A69-20737

Nonlinear charge exchange and dissociative recombination effects on night F region decay compared with linear theory
10 p1685 A69-23832

Slow charged products of charge exchange collisions by ions in molecular gases, comparing kinetic energies during various reactions
13 p2301 A69-27455

Sodium atoms and NO molecules role in atomic O 6300 and 5577 Å emissions in comet Mrkos 1957d due to charge exchanges and dissociative recombination
14 p2523 A69-29707

Elementary processes cross sections in charged states changes during proton-hydrogen molecule interactions
15 p2655 A69-30963

Charge transfer cross section between mercury ion and Cs assessed, considering ion engine positive ion beam neutralization
16 p2835 A69-31895

Ion momentum transfer through charge exchange in mixture of ion gases and parent neutral gases under thermal nonequilibrium, noting role of Boltzmann equation
16 p2822 A69-32108

Interatomic potential between alkali ions and rare gas atoms, using model accounting for repulsive and attractive exchange forces
16 p2815 A69-32464

Charge exchange cross sections and electron losses in hydrogen ion beam impacting on water vapor molecules
19 p3378 A69-36190

Afterglow decay rates of Zn II laser lines in spontaneous emission measured, indicating thermal energy charge exchange excitation and CW oscillation
21 p3735 A69-38598

Charge exchange of solar wind protons passing shock front, noting turbulent subsonic motion of randomized hot solar wind protons in shadow cone
22 p4008 A69-41208

CHARGE SEPARATION

U POLARIZATION [CHARGE SEPARATION]

CHARGE TRANSFER

Low collision energy charge transfer and dissociative charge transfer between rare gas ions and molecular nitrogen, measuring nitrogen ion kinetic energy distributions
05 p0796 A69-15909

Charge transfer cross sections for slow ion production in nitrogen molecular ion beams incident on hydrogen and deuterium
05 p0796 A69-15914

Effective cross section of resonant cesium ions charge exchange determined by retarding field method, considering dependence on ion velocity
06 p0959 A69-16908

Potassium ion resonant charge exchange, determining relation between effective cross section and ion velocity, using retarding field method
06 p0959 A69-16909

Two body rate coefficients for charge transfer reactions of nitrogen, oxygen and NO positive ions to Na atoms measured using flowing afterglow system
07 p1185 A69-19303

Forward scattering of metastable and ground state argon atoms after argon ion-atom charge transferring collisions, discussing excitation resonances
08 p1354 A69-19809

Diffusion coefficient, velocity distribution function and velocity averages for gaseous ions moving in strong electric fields, considering ion-gas molecule charge transfer collisions
08 p1355 A69-20209

Phase characteristics and magnetic mirrors effect on charge motion in spatially periodic magnetic field
09 p1551 A69-22036

Charge and traveling wave interaction in circular waveguide in resonance regime solved by Krylov-Bogoliubov asymptotic method
09 p1551 A69-22037

Surface charge exchange in metal oxide silicon capacitors generated at low temperatures by surface state free carrier trapping
10 p1744 A69-23179

Charge transport in high pressure RF glow discharge in air at atmospheric pressure based on model plasma
10 p1740 A69-23662

Organic semiconductors physical properties and intermolecular charge transfer between donor and acceptor
13 p2317 A69-27799

Charge transfer and vibrational excitations in hydrogen molecular ion-hydrogen gas collisions
13 p2302 A69-28196

Alkaline metal adsorption on high work function metals with charge transfer, measuring polycrystalline Mo photoelectric emission as function of Cs coverage
14 p2507 A69-29275

Charge flow injection into MOS substrate attributed to gate pulses, correlating charge magnitude with pulse frequency
15 p2573 A69-30033

Reaction rate constants of ion-molecule interchange reaction as function of temperature, flow velocity, activation energy and constant part of steric factor P
16 p2747 A69-32312

Ionization, recombination and charge transfer in upper atmosphere during aurora, considering quasi-equilibrium ion-electron concentrations
17 p2961 A69-33417

Charge transport in n and p type samples of beta phase semiconducting iron disilicide, noting effect of room temperature doping
19 p3390 A69-36556

Semiclassical wave emission and absorption theory applied to charged particles interaction with waves in magnetized plasmas
01 p0126 A69-10123

Soviet investigations of solar and cosmic electromagnetic and charged particle radiations by balloon, rocket and satellite measurements
01 p0145 A69-10945

Inner Van Allen belt proton dose rate and spectral charged particle environment profiles correlated, noting agreement with theoretical values
01 p0145 A69-11081

Partial differential equation for distribution function in transport of charged particles in earth magnetosphere
01 p0147 A69-11320

Leptonic quarks with various charges in cosmic rays, determining upper limit of flux in underground measurements
02 p0306 A69-11547

Electric discharge in gas flow with magnetic field, showing varying charged particle density as function of argon-cesium pressure
02 p0285 A69-11570

Coupling coefficients of global and vertical fluxes of charged cosmic ray component in stratosphere measured by radiosondes
02 p0306 A69-11659

Magnetosphere studies in France noting magnetosphere characteristics, wave propagation, charged particles, particle precipitation mechanisms in auroral zones and polar caps
02 p0242 A69-11904

Primary cosmic radiation charge spectrum measurement during 1965 minimum solar activity, using balloon-borne Cerenkov scintillation counter
02 p0308 A69-12043

Diffusion effect on particle buildup in deionizing steady plasma flux linked to plasma concentration in presence of electron temperature gradients
02 p0291 A69-12483

Etching techniques for revelation and viewing of fossil charged particle tracks in meteoritic and terrestrial minerals
02 p0245 A69-12569

Scattering of energetic charged particles in weakly unstable plasma for integrated spectrum of plasma electric field autocorrelation function
03 p0475 A69-13151

Electropropulsion by thruster using colloidal carbon particles charged by electron bombardment to provide thrust, noting specific impulse
03 p0495 A69-13396

Charged particle dynamics in spiral interplanetary magnetic field model, discussing electric drift velocity, point of origin and distribution
03 p0503 A69-14015

Acceleration of charged particles in strong DC magnetic field by electrostatic waves with spatially varying phase velocities integrated numerically on IBM 360/65
03 p0479 A69-14028

Stormer problem of charged particle motion in magnetic dipole field, discussing analytical method for high and low energy particles
03 p0504 A69-14127

Charged particle density of unsteady plasma from Stark broadening of Balmer H beta line, using time scanning image converter
03 p0481 A69-14145

Charged particle motion in time dependent external magnetic field
03 p0504 A69-14235

Charged particles motion in spatially modulated magnetic field solved using modification of Krylov-Bogoliubov asymptotic method
04 p0633 A69-14297

Asymptotic method for studying charged particle motion in spatially modulated magnetic field
04 p0634 A69-14298

Charge multiplication in crystals, analyzing ionization rate, avalanche breakdown in p-n junctions, pair production and impact of impurities
04 p0641 A69-14503

Ion and electron contaminating currents removal in vacuum evaporating devices, using biased field plates
04 p0577 A69-14875

Capture of electrically charged micrometeorites and corpuscles in magnetic field of gravitating dipole, noting necessary condition on particle motion
04 p0659 A69-14962

Total conserved momentum-energy of electromagnetic interaction of system of point charges in Wheeler-Feynman theory, noting mass defect of connected system
04 p0631 A69-15058

H resonator for charged particle beams combination at output of double beam linear accelerator
05 p0727 A69-15639

Multielectrode analyzers for measuring properties of ionospheric charged particles
05 p0761 A69-15702

Charged particle motion in constant direction magnetic field varying exponentially with time, discussing electric field effect on particle motion
05 p0801 A69-15744

Dynamic response of solids induced by charged particle interaction noting laser interferometric measurement of surface stresses
05 p0771 A69-15817

Spectroscopic charged particle concentration determination, discussing error and limits of applicability in low temperature plasma
05 p0762 A69-15899

Charged particles injection into captured radiation zone of Van Allen belts during main phase of magnetic storm indicated by proton data analysis
05 p0815 A69-16057

Diurnal variations of neutral and charged particle temperatures in equatorial F region
05 p0755 A69-16270

Electrogasdynamics /EGD/ engineering, discussing generators and compressors
05 p0804 A69-16586

Equation for charged particle motion in electromagnetic wave field propagated along magnetic field applied to nonlinear wave propagation in plasma near cyclotron resonance
06 p0963 A69-16905

Photomultipliers response to energetic particles in terms of background current using data from OGO experiments
06 p0923 A69-16932

Soviet satellite exploration of space magnetic fields and charged particles, noting Proton satellites and protons and carbon nuclei inelastic interactions [UN PAPER 68-95768]
06 p0986 A69-17031

Charged particle environment in synchronous orbit region, discussing electrons and protons under influence of geomagnetic field
07 p1204 A69-18340

Energy losses of clusters of charged particles moving through unbounded isotropic plasma manifesting non-linearity in interaction of particle generated fields
07 p1189 A69-18528

Simplification of equations for two temperature plasma composed of electrons, singly charged ions and neutral atoms, noting effect of viscosity and thermal force
07 p1190 A69-18693

Plasma diagnostics by spectroscopic techniques, measuring polarity dependences of temperature and charged particle concentration for flows with shock wave and periodic structure
07 p1190 A69-18695

Ion composition and charged particle temperatures at 300-600 km from sounding rocket and topside sounder Alouette 2 measurements
07 p1124 A69-18839

Charged particle motion in electromagnetic field from basic equation of motion for magnetosphere, discussing dipolar magnetic field, Stormer trapped particle theory, etc
07 p1208 A69-19355

Geomagnetic field line stretching outward due to energy entry in form of large number of charged particles or increase in particle temperature /inflation/
07 p1127 A69-19357

Low energy charged particles in earth magnetosphere observed by OGO satellite
07 p1208 A69-19358

Particle dynamics measured by ATS satellite synchronous orbit, discussing flux time variations during geomagnetic disturbances
07 p1209 A69-19371

Equation describing statistically trapped particle motion under influence of fields varying in time and space
07 p1209 A69-19375

Plasma flux measurements by charged particle traps in Venus vicinity by space vehicle Venus 4, discussing low concentration of charged particles
07 p1222 A69-19613

Solution of equations of motion of charged particles in constant magnetic field and variable electric field
08 p1361 A69-20213

Integrated charged particle energy spectra from gridded electrostatic analyzers, relating retarding potential curve to particle floating potential, kinetic temperature, etc
08 p1364 A69-20521

Cosmic ray Li, Be and B nuclei measurements, analyzing differential energy spectra, L-M ratio, atmospheric and solar modulation
08 p1380 A69-20638

Charged body moving at subsonic velocity normally through stratified elastic half space composed of film on homogeneous half space
08 p1417 A69-20753

Inertia of electrically charged spherical body calculated on basis of relativistic stress energy
08 p1352 A69-20756

Charged particles concentration change during vertical propagation of acoustic wave in F layer found transforming electric field into circularly polarized wave
09 p1484 A69-21528

Vertical transport rate of charged particles in F region, allowing for vertical velocity gradients
09 p1485 A69-21529

Charged particles equations of motion in earth magnetosphere in polar storms, considering auroral zone, diurnal variations and electron and proton velocities
09 p1485 A69-21535

Charged particle acceleration in interplanetary medium, discussing protons and plasma oscillations interactions
09 p1575 A69-21541

Quantum mechanical description of ionizing reactions of highly charged positive ions in solar corona, obtaining approximate sum and selection rules
09 p1596 A69-22054

Cosmic charged particle acceleration in electromagnetic field described by vector and scalar potentials, constituting plane electromagnetic wave propagating along z axis
10 p1756 A69-22816

Charged particles motion in geomagnetic field from analyzing spatial distribution within framework of two dipole magnetosphere model
10 p1756 A69-22818

Primary specific ionization in noble gases by charged particles
10 p1726 A69-23128

Book on thermodynamics of charged and polarized layers covering matter in electric fields, general framework theory, applications, etc
10 p1724 A69-23159

Solid state AC voltage circuitry for measuring and controlling charged particle detector signals
10 p1662 A69-23256

Nonequilibrium ionization in central regions of low temperature plasma, describing charged particle drift by using diffusion time concept
10 p1732 A69-23440

Coupling coefficients for integral charged component of cosmic rays determined from measuring azimuthal geomagnetic effect on rays observed in crossed telescopes
10 p1770 A69-23925

Density modulated charged particle beam interaction with plasma under paramagnetic resonance, analyzing longitudinal oscillations and parametric instability zone
10 p1741 A69-23947

Longitudinal electric field distribution and charged particle density in magnetic mirror under potential difference between magnetic equator and plane
10 p1689 A69-24204

Adiabatic theory of charged particle motion in electromagnetic field, applying asymptotic methods of nonlinear oscillations theory
11 p1948 A69-24857

Stable particle trapping zone in magnetosphere, discussing results of adiabatic theory application to charged particle motion in earth magnetic field
11 p1948 A69-24858

Solar cells degradation by charged particles in space, considering protection by filter, silicon properties and use of cadmium cells
11 p1825 A69-24870

Charged particle motion in periodic electromagnetic field, constructing dynamic variables describing motion
11 p1927 A69-25100

Charged particle concentration near electrodes in high current pulsed discharge with separated flames at atmospheric pressure determined by measuring quadratic Stark effect
11 p1927 A69-25219

Charged aerosols production for electrohydrodynamic processes by spraying liquids through capillary at high electric field strengths into high pressure air flows
12 p2138 A69-26631

Boundary layer parameters behind shock wave front in ionized gas calculated with allowance for charged particle diffusion
12 p2139 A69-26713

Charged particle population dynamics in outer radiation zone of magnetosphere, discussing ring current particles, protons, electrons, alpha particles and electric field
12 p2150 A69-26743

Charged particles influx from cusp shaped regions of stagnant plasma trapped in vicinity of two magnetic cusps on polar magnetopause
12 p2151 A69-26945

Charged primary cosmic rays responsible for relative intensities of muon-poor extensive air showers at mountain and sea levels
12 p2152 A69-27099

Electrohydrodynamic flows at large electric Reynolds numbers, obtaining Bernoulli and Cauchy-Lagrange integrals
13 p2305 A69-27379

Slow charged products of charge exchange collisions by ions in molecular gases, comparing kinetic energies during various reactions
13 p2301 A69-27455

Fast charged particles measurements by Cerenkov counter in Cosmos 137 satellite, noting hard electron flux and cosmic ray radiation spectrum
13 p2327 A69-27693

Comet interaction with solar wind, assuming field tail coupling of ionized comet material to solar wind ions
13 p2349 A69-27817

Cerenkov radiation from point charge uniformly moving along external magnetostatic field in warm anisotropic plasma, noting excitation modes and propagation frequencies
13 p2307 A69-27964

Charged particles generation by liquid subjected to high electric field for efficient bipolar microthruster [AIAA PAPER 67-728]
13 p2325 A69-28220

Stable particles heavier than nucleons in extensive cosmic ray showers detected by delayed coincidences relative to shower electron photon component
13 p2331 A69-28402

High energy ionization bursts in cosmic ray showers electron photon component, obtaining bursts power spectrum and component energy dependence
13 p2332 A69-28404

Cosmic ray particles with fractional charge at sea level searched by scintillation counters with spark chambers, estimating quark flux intensity
13 p2333 A69-28425

Coupling coefficients of global and vertical fluxes of charged cosmic ray component in stratosphere measured by radiosondes
13 p2334 A69-28690

Effective recombination coefficient in lower ionosphere determined from charged particle spectra obtained by rocket sounding in Canada
14 p2511 A69-28960

Electrostatic screening in isothermal symmetrically charged and quasi-neutral plasmas, noting confinement in electrostatic trap
14 p2490 A69-29035

Low energy charged particle motion parallel with magnetic force lines analyzed in magnetosphere model with constant electric field
14 p2512 A69-29040

Electric field determination from charged particle concentration in wake of body moving in rarefied plasma, noting hydrodynamics similarity
14 p2517 A69-29068

Horizontal electric fields relations to charged particle fluxes in polar auroral ionosphere
14 p2437 A69-29070

Geomagnetic cut-off influence on charged particle dynamics in geomagnetic field, applying charged particle motion theories to magnetosphere fields
14 p2513 A69-29099

Stark effect applicability to charged particle concentration in nonstationary plasma
14 p2497 A69-29790

Duoplasmatron charged particles energy spectra analyzed as function of discharge parameters
14 p2501 A69-29955

Charged particle motion in magnetic mirror trap, observing time dependence with respect to orbital magnetic moment conservation
15 p2659 A69-30724

Steady oscillations of active nonlinear system of nonisothermal plasma and charged particle flux, noting steady ion-acoustic waves

15 p2662 A69-30947

Spectroscopic measurements of charged particle concentrations in jet produced by pulsed plasma generator

15 p2663 A69-30991

Charged particle motion in superposed Heliotron and biconical cusp magnetic fields, considering particle confinement

16 p2817 A69-31643

Numerical analysis of charged particles radial distribution in radiation belts extended to geomagnetic tail for low energy auroral electrons

16 p2850 A69-32102

H resonator for charged particle beams combination at output of double beam linear accelerator

16 p2762 A69-32497

Charged particles concentration change during vertical propagation of acoustic wave in F layer found transforming electric field into circularly polarized wave

16 p2783 A69-32523

Vertical transport rate of charged particles in F region, allowing for vertical velocity gradients

16 p2783 A69-32524

Charged particles equations of motion in earth magnetosphere in polar storms, considering auroral zone diurnal variations and electron and proton velocities

16 p2783 A69-32530

Charged particle acceleration in interplanetary medium, discussing protons and plasma oscillations interactions

16 p2851 A69-32536

Charged colloids generation by electrostatic spraying for thruster concept, subjecting metal capillary needles to AC voltage [AIAA PAPER 69-495]

16 p2846 A69-32773

Ground state energy inequalities for N particle non-relativistic quantum mechanical system, showing non-saturating gravitational forces and increasing binding energy per particle

17 p3028 A69-32900

Atmospheric ion concentration increment by electrostatic lens to facilitate electrical properties measurements of charged particles in submicroscopic range

17 p2971 A69-32928

Cosmic ray shower axis mean distance from apparatus determined by measuring muon to charged particles densities ratio

17 p3024 A69-33580

Linear irreversible thermodynamics theory as applied with conservation principles and Maxwell relations to charged particle motion in electromagnetic field, noting Onsager coefficients role

17 p3075 A69-34142

Capture of electrically charged micrometeorites and corpuscles in magnetic field of gravitating dipole, noting necessary condition on particle motion

18 p3197 A69-34725

Positive ion concentration in D region, using spherical stationary electrostatic probe in weakly ionized collision dominated gas

18 p3128 A69-34804

Inhomogeneities time buildup in lower ionosphere weakly ionized plasma during charged particle concentration perturbations and source temperature variations

20 p3525 A69-37658

Charged particles injection into captured radiation zone of Van Allen belts during main phase of magnetic storm indicated by proton data analysis

20 p3591 A69-37967

Upper atmosphere particles, luminosity and electron concentration measurements documented in input, storage and energy radiation classes, determining recombination coefficients

21 p3707 A69-38491

Charged particles beam penetration effects produced in atmosphere, determining particle diffusion and trajectory using Spencer moments and Monte Carlo methods

21 p3709 A69-38502

Universal dependence of density fluctuations on specific entropy derived from equation describing material composed of neutral particles and equal number of charged and antiparticles

21 p3771 A69-38995

Reentrant albedo flux and singly charged particles directional asymmetry in upper atmosphere estimated from oriented telescope observations over Hyderabad

22 p4005 A69-40519

Infinites in statistical theory of radiative processes when applied to plasmas containing charged particles and radiation

22 p3991 A69-41055

Thermal conductivity relationship to heat transport coefficients for gases and liquids with charged or uncharged particles

23 p4237 A69-41324

Electron concentration vertical profile in ionosphere in presence of horizontal wind shifts determined using E layer charged particle redistribution approximation

23 p4155 A69-41840

Magnetospheric stable charged particle beams for pearl pulsations and discrete VLF radiation in geomagnetic field, attributing synchronization to space charge

23 p4206 A69-41851

Quark mass and charge interpretation during particle track photographic analysis of air shower cores by delayed expansion Wilson cloud chamber

24 p4383 A69-42945

CHARGING

Aerospace NiCd batteries charge control, discussing depth of discharge, limiting voltage and environmental temperature interrelationship

23 p4071 A69-42282

CHARPY IMPACT TEST

Natural aging effects on fracture characteristics of aluminum weldments, investigating precracked Charpy impact toughness

01 p0086 A69-10537

Fracture mechanics and data from instrumented Charpy impact test

05 p0780 A69-16431

Thickness and drilled holes effects on notch toughness of Charpy V notch bars over wide temperature range

10 p1798 A69-23087

Thin walled maraging steel tube toughness determined by Charpy precrack testing of transverse and longitudinal impact properties

13 p2269 A69-28183

Fracture toughness of AlZnMgCu alloys, employing sharp notch tension, tear and precracked Charpy impact tests

16 p2800 A69-31780

CHARRING

Charring phenolic nylon ablator material pyrolysis and surface recession for cyclic and constant combined convective and radiative heating [AIAA PAPER 69-151]

06 p1036 A69-18055

Charring ablator char zone nonequilibrium flow and chemical reaction kinetics as function of temperature, using thermal environment simulator

24 p4409 A69-43512

CHARTS

NT FLOW CHARTS

NT GRAPHS [CHARTS]

NT METEOROLOGICAL CHARTS

NT PATTERN MAP

Radar range height angle charts for plotting earth based radio or radar system vertical plane coverage diagrams

01 p0031 A69-10633

Secular variations distribution on earth surface, plotting isopor charts from mean annual values of magnetic elements /1960-1965/

10 p1687 A69-23920

Viscosity-temperature chart for hydrocarbons permitting linear extrapolations into low viscosity high temperature regions

10 p1753 A69-23975

Cartographic representation methods in climatological regional charts, discussing topographical elements, scale, screen patterns and area color

12 p1214 A69-25893

Eye chart determination and layout for digital transmission system by computer simulation

21 p3678 A69-38776

Illumination effect on air navigation chart reading during flight, using questionnaire data

24 p4271 A69-42605

CHEBYSHEV APPROXIMATION

Chebyshev polynomials maximum property, examining effect of roundoff errors in Horner scheme for floating point arithmetic

03 p0456 A69-13553

Single row riveted joints, representing rivet forces by Chebyshev functions in homogeneous arrangements and obtaining equations for continuous joints from limit procedure

04 p0682 A69-15292

Ascent algorithm for Chebyshev solution of inconsistent linear equations, noting use for linear programming

04 p0626 A69-15318

Pseudoexact Chebyshev response curves for band-pass filter design, discussing phase response and time delay characteristics

08 p1283 A69-20227

Error estimation technique for Chebyshev series solution to ordinary differential equations

08 p1344 A69-20828

All-pass transfer functions of new class type for design of quadrature filter networks, using Chebyshev approximation

08 p1277 A69-21167

Chebyshev error norms of polynomial approximations for ideal filter minimized by emphasizing role of transfer function even and odd parts

08 p1299 A69-21168

Chebyshev filter with flat group delay obtaining transfer function, noting cascade synthesis and extended bisection theorem

08 p1299 A69-21169

Iterative Chebyshev approximation for computerized network design by linearizing original nonlinear programming

08 p1299 A69-21170

Transfer function of low pass filters with Chebyshev attenuation characteristic in stopband and predetermined phase or delay time realized by ladder network

08 p1300 A69-21171

Theorem for necessary and sufficient condition for continuity of Chebyshev operator

10 p1718 A69-22875

Low pass filters synthesis based on Chebyshev polynomials properties noting requirements of critical frequency, frequency response decline rate and tolerance range

11 p1887 A69-25210

Extremal controlled plants identification by Chebyshev orthogonal polynomials, comparing results with regression analysis

11 p1861 A69-25713

Chebyshev polynomial of even order used in synthesis of equally terminated low pass lumped and distributed filters of even order

13 p2233 A69-28068

Polynomial approximations in perturbational navigation and guidance schemes including Chebyshev and least square approximations

19 p3368 A69-35664

Chebyshev series approximations for Bose-Einstein functions of orders one to ten, noting computability of Fermi-Dirac functions and polylogarithms

24 p4341 A69-43231

CHECKOUT

Data analysis methods for integrated data processing system for onboard in-flight checkout for launch vehicle evaluation [AIAA PAPER 67-911]

01 p0037 A69-11024

In-flight and flight line checkout techniques for foreign object damage to jet engines

01 p0056 A69-11055

Automatic preventive maintenance program for hybrid computer system by checking individual units

04 p0568 A69-15359

Dual processor checkout system providing isolation of malfunctioning unit from memory and ensuring decision making by operative unit

04 p0568 A69-15361

Interpretive Checkout Test Language /CCTL/ designed in near English form for aerospace checkout tasks

04 p0569 A69-15364

Electronic system checkout in SAAB 37 Viggen, using computer controlled test equipment

05 p0726 A69-16767

Real time computer controlled telemetry system readiness testing and validation, describing automatic closed loop checkout methods and remote display controller

10 p1660 A69-23270

Flexible control module for real time automated checkout requiring programming by personnel with strong software background

11 p1843 A69-25072

Automatic system self test technique known as central integrated test subsystem /CITS/ for logically testing avionics systems

11 p1866 A69-25083

Scientific satellite checkout system tests by manual, automatic and self test control

13 p2243 A69-28480

Automatic quantitative checkout equipment for telemetry circuit of Diamant satellite booster before launching
16 p2750 A69-31727

Mathematical model for operational readiness of dormant systems /periodically checked missiles/, discussing time distribution to failure detection, occurrence and between tests
18 p3142 A69-34477

Failure detection methods, discussing percent checkout, failure sensitivity, undetectable failures, etc
18 p3146 A69-34511

Signature analysis diagnostic methods for reliability tests involving final product checkout and early fault detection
19 p3322 A69-35574

CHECKOUT EQUIPMENT

U TEST EQUIPMENT

CHELATE COMPOUNDS

U CHELATES

CHELATES

Liquid lasers properties and composition including organic complex compounds, organic dyes, rare earth elements in polyphosphoric acid, etc
11 p1893 A69-24353

CHEMICAL ANALYSIS

NT ELECTROPHOTOMETRY

NT GAS ANALYSIS

NT GAS SPECTROSCOPY

NT MICROANALYSIS

NT NEPHANALYSIS

NT NEUTRON ACTIVATION ANALYSIS

NT OZONOMETRY

NT PAPER CHROMATOGRAPHY

NT QUALITATIVE ANALYSIS

NT QUANTITATIVE ANALYSIS

NT SPECTROSCOPIC ANALYSIS

NT URINALYSIS

NT VOLUMETRIC ANALYSIS

Meteoritic extraterrestrial materials sampling for chemical, petrographic and metallurgical analyses, discussing microstructure and optimum specimen weight for representative analysis
[UN PAPER 68-95381] 01 p0150 A69-10480

Analytical techniques for in-flight monitoring of aerospace water supplies for potability, emphasizing rapidity, sensitivity and reproducibility
01 p0019 A69-11339

Volcanic gas from lava lake, noting carbon and sulfur gases depletion during cooling and solidification
02 p0236 A69-11466

Lunar surface material chemical composition in lunar mare and on Tycho crater north rim, noting Surveyors 5, 6, and 7 alpha analyses
04 p0655 A69-14658

Microchemical analysis for diffusion measurement of laser produced lithium plasma in uniform magnetic field
05 p0762 A69-15960

Gas-liquid and thin layer chromatography and nuclear magnetic resonance techniques to steric analysis of diketopiperazines
07 p1075 A69-19498

Auger and photoelectron spectroscopy for chemical analysis, noting effects of sample thickness, sample potential, surface contamination and X ray incident angle
07 p1075 A69-19775

Priming explosives analysis suggesting physicochemical methods for high purity products for space applications
10 p1750 A69-23012

Chemical and mineralogical study of Kodaikanal meteorite silicate and metal phases, using optical, X ray and electron microprobe techniques
11 p1953 A69-24335

Chemical composition analysis of one mesosiderite and seven chondrites, with notes on mineralogy and chemical procedures
11 p1953 A69-24336

Bioorganic comparative analysis of desert soils, Precambrian shales and meteorites by automated pyrolysis-gas chromatography-mass spectrometry system for future Mars soil analysis
[JPL-TR-32-1368] 11 p1832 A69-25640

Aircraft accident toxicology, guidelines for collection, preservation, shipment and analysis of specimens and test result interpretation
12 p2022 A69-25842

Quantitative separation of elements in gamma prime from precipitation hardened high temperature nickel-base alloys by anodic dissolution
13 p2277 A69-27408

Organic analysis of Pueblito de Allende meteorite using thin layer chromatography or combined gas chromatography and mass spectrometry
13 p2337 A69-27520

Sugars identification as trifluoroethylacetyl polyol derivatives by gas-liquid chromatography
15 p2558 A69-31539

Sterile soil from Antarctica found to contain organic carbon, noting significance for biological exploration of Mars
16 p2746 A69-31552

Extraterrestrial life detection experiments integrated into single multipurpose space laboratory, including chemical analyses, metabolism identification, observation for molecular and/or cellular growth and replication
17 p2912 A69-32970

Free lysine and dinitrophenyl /DNP/ derivatives determined quantitatively by ion exchange chromatography
17 p2917 A69-33651

Chemical analysis and paragenesis of manganian ilmenite from Sierran adamellite using electron microprobe
19 p3302 A69-35977

Iron meteorites analysis for Ni, Co, P, C, S and Cu elements by milling technique, noting superiority degree based on Co-Ni correlation
19 p3417 A69-36130

Ti determination in presence of Nb or Ta by extraction-photometric method with diantipyrylmethane and thiocyanate
20 p3544 A69-37812

Colorimetric method to determine small amounts of Mn in metallic Ti by potassium periodate solution
20 p3544 A69-37813

Aircraft breathable LOX purity, water percentage and carbon dioxide and methane proportions, determining other contaminants after concentration by refrigeration
21 p3666 A69-39273

Chemical analysis of lunar surface by devices exploiting alpha particle backscattering and proton production by alphas placed by Surveyor 5, 6 and 7
22 p4012 A69-40088

Norwegian lichen species chemical investigation for aromatic compounds, hydroxy fatty acids, amino acids, soluble and bound sugars
23 p4080 A69-41428

CHEMICAL ATTACK

U INTERGRANULAR CORROSION

CHEMICAL AUXILIARY POWER UNITS

Secondary cells with liquid lithium anodes and immobilized fused salt electrolytes
04 p0552 A69-15330

CHEMICAL BONDS

NT HYDROGEN BONDS

Temperature dependent isomer shift and anharmonic binding of Sn 119 in niobium stannide, measuring Mossbauer recoil free fraction
01 p0134 A69-10009

Second order susceptibilities of III-V and II-VI compounds using Phillips model, discussing second optical harmonic in III-V compounds with tetrahedral bonds
01 p0138 A69-10365

Metal ionic reactions with weak chemical bond breaking and three body reactions forming molecular ions without bond breaking, discussing sporadic E deionization
01 p0071 A69-11168

Photoionization curves and threshold energies for fluorocarbon and trifluoromethyl halide molecules and ions, calculating ionic heats of formation and bond dissociation energies
02 p0205 A69-12464

Photolytic conversion of allene to cyclopropylidene, discussing cyclononadiene in vapor phase and resulting product
02 p0205 A69-12721

Liquid metal adsorption induced embrittlement, noting bond strength reduction and grain boundaries penetration
03 p0448 A69-13872

Hydrogen effect on interatomic bonds of Ti beta alloy and Young modulus, noting measurements at various temperatures
04 p0618 A69-15178

Activation energies of bimolecular multivalent transfer reactions of gaseous compounds, considering bond dissociation energy, length and order
[WSCI PAPER 68-48] 07 p1239 A69-18321

Enthalpies determination of adduct formation of sulfoxides, sulfanilamides and thionylamides with

trimethylalane, noting replacement effect on electron donating ability of oxygen
07 p1074 A69-18631

Chemical bond nature and properties in cyclic compounds of carbon and graphite, presenting bond energy computation method
07 p1171 A69-18932

Direct chemical bonding effect on flexural strength and flexural modulus of glass fiber reinforced plastics, noting degradation reactions
08 p1341 A69-20514

Rotational spectrum of ethylene episulfoxide to determine molecular structure, particularly orientation of C sub 2 S ring
08 p1268 A69-20535

Increased Ti heat resistance by forming solid solutions and compounds having various dispersions and bond strength
09 p1525 A69-22140

Mass spectral fragmentation of substituted aliphatic glycols and hydroxylated carbon-carbon bond
09 p1448 A69-22551

Covalence degree of activator-ligand chemical bonds effect on spectroscopic properties of transition metals
11 p1907 A69-25031

Ionic and biradical mechanisms in thermal and photo cis-trans isomerizations elucidated by planar and twisted configurations of polyenes
13 p2216 A69-27618

Glass finish and glass resin chemical bond adhesion roles in filament wound structures response, failure and filament strength
14 p2468 A69-29345

Carbon fiber reinforced plastics properties improvement by applying organosilanes, discussing silanol bond formation
16 p2803 A69-31806

Sulfur hexafluoride dissociation in argon at various temperatures and pressures, using shock tube techniques to determine unimolecular parameters
18 p3100 A69-35475

Active center chemical bond alteration influences on luminescence characteristics of phosphate glasses, noting quick energy transfer via ions
20 p3552 A69-37017

Molecular rearrangements of nitrene intermediates, suggesting role in bond formation and breaking at nitrogen
20 p3484 A69-37485

Chemical bond nature and properties in cyclic compounds of carbon and graphite, presenting bond energy computation method
21 p3752 A69-39153

Adenylates condensation in protein-associated amino acids as clue to peptide bond synthesis within protocellular structures
22 p3895 A69-40048

Deoxyribonucleoside triphosphate substrate binding to Escherichia coli DNA polymerase, conducting equilibrium dialysis
22 p3898 A69-41074

DNA and d/A-T/ oligomers enzyme binding to DNA polymerase by sucrose density gradient centrifugation
22 p3898 A69-41075

Dimer bond energies analysis in Mg and Ca dimer molecules, approximating characteristic temperatures and virial coefficients
23 p4195 A69-42210

Sequence preparation of protected peptide polymer bond with anion exchange resin using solid phase transesterification
24 p4279 A69-42713

Helix to coil transition for triple stranded macromolecule in solution, calculating ring weighting and partition functions and intact bonds
24 p4353 A69-43812

CHEMICAL CLEANING

Solution velocity and turbulence effects on solvent cleaning of corrosion resistant steel tubing, discussing fluidity forces and cleaning formulation
08 p1318 A69-19807

Substrates ultraclean surface preparation methods, examining crystal cleaving and crushing, heating, chemical cleaning, ion bombardment, etc
14 p2455 A69-29348

Step cathodic flux cleaning of furnace brazed Al assemblies used in combination with ultrasonic and chemical conversion coating techniques
24 p4319 A69-42938

Ti-Al alloy structure manufacturing technology covering forming, cleaning, chem-milling, machining, fastening and welding
24 p4324 A69-43431

Chemical treatment of Ti during processing, discussing protective coating, scale conditioning, surface contaminant removal and acid pickling
24 p4324 A69-43432

CHEMICAL COMPOSITION
NT CARBON DIOXIDE CONCENTRATION

Chemical composition effect on duraluminum supersaturated solid solution stability, presenting time vs temperature C curves of isothermal decomposition
01 p0094 A69-10396

Graphical and analytical interpolation methods for representing initial compositions in equilibrium thermodynamic systems
01 p0176 A69-10403

Venus cloud layer thickness and lower boundary estimation from data on chemical composition, temperature and pressure profiles of atmosphere
01 p0152 A69-10580

Microturbulent velocity parameter correlation to iron-to-hydrogen ratio for G dwarfs, using model atmosphere abundance analyses
01 p0154 A69-10877

Chemical composition of upper atmosphere and interplanetary space measured by Soviet sounding balloons and rockets, discussing flask sampling techniques
01 p0025 A69-10940

Chemical composition of various types of chondrites, determining quantitative proportions soluble and insoluble in acids
01 p0026 A69-11381

Stone meteorite chemical composition, analyzing chondrites Borodino, Lavrentevka, Alfianello and Nardoo II
01 p0026 A69-11382

Lunar composition analysis by measuring atomic and nuclear radiation emission from orbiter [AAS PAPER 68-197]
02 p0312 A69-11475

Capillary arc source spectroscopy, determining plasma temperature and pressure dependence on capillary geometry and discharge current
02 p0286 A69-11573

Tabular reduction of crystal structure chemical information for metals and semiconductors for material selection use
02 p0295 A69-11786

Numerical solution for ambipolar diffusion and kinetic decomposition of rotating body of complex chemical composition in ionized airstream
02 p0191 A69-12580

Sulfur-organic compounds association with aromatic hydrocarbons, noting oxidation inhibiting effect on petroleum oil
03 p0494 A69-13800

Combustion products temperature and composition in chamber or at nozzle exit calculated for fuels containing excess oxidizer ratios greater than unity
04 p0684 A69-14486

Lunar surface material chemical composition in lunar mare and on Tycho crater north rim, noting Surveyors 5, 6, and 7 alpha analyses
04 p0655 A69-14658

Amino acid composition of organic matrix in modern and fossil calcareous oolites
04 p0553 A69-14978

Chemical compositions and structural states of feldspar in recrystallized /Type 6/ chondrite meteorites, using electron microprobe analysis and X ray diffraction techniques
05 p0819 A69-15626

Chemical composition and phase identification in commercial grades of cemented carbides
05 p0780 A69-15989

Chemical composition of nuclear cosmic rays with Z greater than 22, noting etching techniques for utilizing meteoritic minerals as detectors
05 p0816 A69-16355

Stony meteorite Krahenberg, determining isotopic composition, rubidium and strontium age of dark and light portions by neutron activation analysis
05 p0826 A69-16439

Homogeneous main sequence star models with convective cores, considering core chemical composition, size and energy generation ratio mechanism
05 p0829 A69-16777

Elementary composition and origin of primary cosmic rays, discussing space techniques for observation of components
05 p0818 A69-16816

Chemical composition and morphological, structural, textural and mineralogical characteristics of chondrules and chondrites
07 p1212 A69-18548

Ti alloys chemical composition, fatigue life, stress rupture strength, crack susceptibility and nature of stress-strain rate
07 p1161 A69-18763

Ti alloy beta phase variations in quantity, composition and dispersion during quenching, thermomechanical treatment and aging
07 p1163 A69-18777

Chemical composition relationship to heat resistance of titanium alloys, using diagrams for establishing composition of new multicomponent alloys
07 p1163 A69-18780

Magnetic susceptibility of InP-GaAs solid solutions at various temperatures and for varying GaP content
07 p1200 A69-19013

Australasian microtektite physical and chemical properties, comparing refractive indices, specific gravities, composition trends, etc
08 p1305 A69-19815

Quantitative spectroscopy methods for determining data on chemical constitution of plasmas, treating optically thin LTE plasmas
08 p1363 A69-20465

Chemical composition of stellar atmospheres by model atmospheres, considering atomic transition, line broadening and thermodynamic equilibrium
08 p1402 A69-20904

Chemical composition and element abundance in solar atmosphere and photosphere, noting solar absorption and emission and energy spectrum data
08 p1402 A69-20905

Chemical composition of diffuse Orion Nebula and stars compared for lighter elements, considering solar system formation from interstellar medium
08 p1402 A69-20908

Chemical composition of atmospheres of oldest Galactic stars, considering element abundances, metal and helium content and nuclear activity of massive stars
08 p1402 A69-20909

Abundance determinations and spectrum intercomparisons in late type peculiar stars, discussing carbon and heavy metal star classes
08 p1403 A69-20910

Heat resistant nickel alloys for castings, tabulating chemical composition, mechanical properties, heat treatment, weldability, etc
09 p1522 A69-21608

Alloying elements effects on structure, mechanical properties, aging and composition of precipitation hardening intermetallic phases in Ni and Fe based alloys
09 p1525 A69-22143

Viscosity coefficients approximation for chemical compositions in chromosphere and coronal gas
09 p1602 A69-22217

Cepheid variable and F and G stars observed for neutral lithium line, searching for resonance lines of ionized beryllium in similar stars
09 p1604 A69-22402

Primordial solar system chemical composition for studies of origin and evolution, compiling solar composition data
09 p1608 A69-22745

Neutral atomic H content of small angular diameter galaxies, noting systematic radial velocities and total mass of galaxies
10 p1773 A69-22956

Chemical composition of chromium steels for optimum heat resistance properties, noting effects of nickel, nitrogen and ferrite and austenite-forming elements
10 p1708 A69-23000

Psychological, physiological and biochemical responses to controlled diets, determining regional and total body sweat composition of men working in temperate environment
10 p1644 A69-23314

Prolateness of Venus radius on basis of satellite microwave temperature measurements, chemical compositions and ice cap model
10 p1784 A69-23958

Chemical composition effect on glass fibers strength, discussing reasons for increased surface layer strength
10 p1717 A69-24045

Circumstellar grain compositions of stars with various O to C abundance ratios, calculating molecular equilibrium of condensates and gaseous compounds in stellar atmospheres
10 p1786 A69-24103

Nebular abundances allowing for temperature variations in nebula along line of sight, correcting changes in electron temperature along path of observation
10 p1787 A69-24116

Stellar evolution, computing sequences to establish solar model of primordial composition, comparing models with spectroscopic observations
10 p1788 A69-24126

Stellar models for chemical compositions to explain gap above main sequence in color-magnitude diagram of NGC 188
10 p1789 A69-24127

Chemical compositions and ages of M67 and NGC 188 determined from color-magnitude diagrams, noting stellar distribution near gap in diagram and He content
10 p1789 A69-24128

Lunar surface chemical composition using RF mass spectrometer
10 p1698 A69-24207

Chemical composition analysis of one mesosiderite and seven chondrites, with notes on mineralogy and chemical procedures
11 p1953 A69-24336

Liquid lasers properties and composition including organic complex compounds, organic dyes, rare earth elements in polyphosphoric acid, etc
11 p1893 A69-24353

Chemical composition of stony meteorites by analytical methods, discussing sample preparation and X ray fluorescence
11 p1953 A69-24358

Quality assessment of quantitative data on chemical composition of stony meteorites, considering precision and accuracy
11 p1953 A69-24359

Ethylene oxide and ethane low pressure fuel-rich flames mass spectrometry, analyzing composition and temperature profiles and OH radical role
11 p1831 A69-24478

Direct analysis of lunar surface chemical composition, considering soft landing probe and X ray isotope fluorescence method
11 p1832 A69-24629

Chemical composition of Venusian atmosphere by Mariner and Venus satellites, comparing upper atmospheres of Venus and earth
11 p1960 A69-24971

Equilibrium compositions of reaction products calculated by permutation over limiting equilibrium surface in reaction space, considering charged components and condensation products
11 p2001 A69-25224

Venus atmosphere chemical composition, surface temperature and pressure obtained by Venera 4 and Mariner 5
12 p2155 A69-26129

Physical parameters and chemical composition of DD Lac atmosphere from spectral analysis
12 p2156 A69-26219

Component ratio effect on pressure dependence of burning rate in ammonium and potassium perchlorate mixed with organic compounds, graphite and tungsten
12 p2027 A69-26474

Transensor implantation, sham implantation, no implantation and lighting effects on rat body composition, noting fat and water content
12 p2020 A69-26557

Temporal variation of metal content in galaxy, discussing stellar radiation pressure effects on heavy element abundance of interstellar gas
12 p2160 A69-26854

Quasar properties from cosmological nature, discussing red shift, luminosity, radiation intensity, absorption features, distribution, chemical composition, etc
12 p2168 A69-27049

Chemical composition of cermet material for radial sealing of high temperature gas turbines, ensuring structural stability and oxidation resistance
13 p2275 A69-27344

Chemical composition of nuclear active particle component of primary cosmic rays in extensive air showers
13 p2326 A69-27464

Hydrogen content in Ia supergiant spectra of type B, noting lack of Stark wings of Balmer lines
13 p2348 A69-27722

Composition dependence of carbon activity and carbon diffusivity in austenite
13 p2279 A69-27763

Solar wind quiet state thermal properties and chemical composition compared with coronal expansion hydrodynamic model predictions
14 p2513 A69-29098

Pressure sensitive adhesives composition, tapes tacking and peeling theory and tests including electrolytic corrosion and insulation evaluation
14 p2468 A69-29342

Stellar Si burning at constant temperature studied for various initial abundance compositions, noting convergence toward pure Si relaxation

14 p2529 A69-29983

Chemical composition effect on Cr-Ni-Mo-Ti stainless maraging steels mechanical properties

15 p2640 A69-30631

Chlorapatite and whitlockite compositions of phosphate minerals from chondrites determined by electron microprobe

15 p2690 A69-30706

Venus cloud layer thickness and lower boundary estimation from data on chemical composition, temperature and pressure profiles of atmosphere

15 p2691 A69-30750

Lower oxides of Si, studying chemical composition, formation conditions, stability and chemical and physical properties

15 p2643 A69-31245

Lattice components of heat conductivity and chemical composition relations of magnesium alloy solid solutions

16 p2824 A69-31567

Lower solar corona composition changes due to pressure and thermal gradients calculated with multicomponent diffusion equations

17 p3030 A69-33059

Gravimetric and IR absorption spectra analysis for determining heat resistance and chemical changes in organosilicon resins during heating

17 p2992 A69-33744

Curve of growth analysis for close binary HR 5317 indicating Mg, Mn, Ca and Sr overabundance respecting standard star 110 Her

18 p3191 A69-34297

Earth ecosystem chemical composition compared with Mars and Venus ecosystems to determine presence of life

18 p3193 A69-34361

Thermal coefficient of optical glasses refractive index determined by interferometry, noting relation to glass chemical composition

18 p3172 A69-35013

Sharps chondrite chemical, petrographic and mineralogical studies suggesting formation from complex and repetitious high temperature events and agglomeration processes

19 p3408 A69-36086

Reflectivity and chemical composition of metallic phase minerals in stone meteorites, showing optical characteristics sensitivity to composition

19 p3415 A69-36124

Mercury internal constitution and chemical composition, discussing models with iron cores and iron admixtures in mantle

20 p3597 A69-37331

Monograph on solid rocket propellants covering composition, combustion characteristics and energetic, mechanical and operational properties

20 p3585 A69-37441

Mare Tranquillitatis surface chemical composition data from Surveyor 5, comparing element abundances with meteorites and terrestrial rocks

20 p3601 A69-37517

Elements nucleosynthesis during thermonuclear burning of carbon at series of temperatures and for several initial compositions

20 p3612 A69-38163

Differential curve-of-growth analysis of late type giant stars yielding chemical compositions, discussing nature and size of uncertainties in estimates

21 p3800 A69-38700

Cosmic rays composition, origin, acceleration and propagation, describing two component models

21 p3789 A69-38814

Meteoritic compositions used to determine prehistoric cosmic rays composition and energy spectrum

21 p3789 A69-38815

Aluminum alloy laminates composed of two metallurgically bonded Al alloys of different composition

21 p3745 A69-38936

Electrical excitation discharge effect on molecular composition of flowing carbon dioxide gas laser, noting dissociation characteristics

21 p3736 A69-38940

Galactic cosmic rays, discussing chemical composition, isotopic separation, proton and alpha particles energy spectra, propagation, interactions, etc

21 p3791 A69-39502

Composition and thermal treatment effects on weldability of precipitation hardened Ni base alloy, analyzing heat affected zone cracking sensitivity

22 p3968 A69-39885

V systems applications and phase diagrams, discussing binary metallic systems, Kurnakov law, alloy properties dependence on composition, superconductivity, melting point, etc

22 p3968 A69-39887

Stony meteorite composition and structure studied for conditions of preplanetary stage of solar system

22 p4012 A69-40084

Chemical composition of galactic and solar cosmic rays, discussing differences from universal cosmic abundances, using Cerenkov counters, emulsions, etc

22 p4002 A69-40090

Fractionation mechanisms in early phases of planetary evolution sought to explain abundance problem in terrestrial planets

22 p4018 A69-40185

Preferential welding oxidation emphasized as element transfer mechanism in weld metal composition control

22 p3955 A69-40460

Weld porosity in Al alloys as function of composition variations, discussing water vapor contamination of welding arc

22 p3956 A69-40461

Meteorite chemical and mineralogical composition and classification

22 p4032 A69-40981

Joints structure, phase and chemical composition in kinetics of titanium diffusion brazing with copper

22 p3958 A69-41203

Tektites chemical composition showing minor concentration changes during melting used for parent material identification

23 p4210 A69-41346

Ivory Coast microtektites chemical composition from electron microprobe analysis

23 p4211 A69-41351

Component proportion and diffraction spectrum of macroblock thin films of indium telluride phase of In-Te system, using X ray and microanalysis

24 p4361 A69-42995

Gradually decreasing N concentration effects on composition, tissue production and oxygen yield of unicellular algae in continuous culture

24 p4263 A69-43201

CHEMICAL COMPOUNDS

Gas chromatography technique for separation and purification of chemical compounds for ionizing radiation detectors

02 p0249 A69-12011

CHEMICAL EFFECTS

Chemical treatment effects on mechanical properties of titanium alloy tubes

03 p0434 A69-13914

Adiabatic kinetic calculations of chemical additive effects on ignition delay of hydrogen-oxygen-argon gas mixtures

07 p1239 A69-18316

Chemical effects of solar wind and cosmic protons on solid bodies in space, discussing possible relation to origin of life

08 p1407 A69-20935

Chemical mechanism of two stage spontaneous ignition controlled by cool flames of alkane-air mixtures under engine conditions to avoid knocking

11 p1998 A69-24479

Porous cermet electrodes thermochemical protection by blowing neutral gas into electrode boundary layer, examining effect on volt-ampere characteristics

11 p1826 A69-25232

Reinforced plastics corrosion resistance, showing dependences on coupling agent and chemical compatibility between resin and fibers

14 p2467 A69-28853

Molybdenum disulfide dry film lubricant wear theory and test correlation problems, considering sintering self propagation due to chemical effect of environment

19 p3323 A69-35580

Potent chemical factors released from anterior hypothalamus of rhesus monkeys in response to thermal stress during thermoregulation

23 p4084 A69-41472

Origin and distribution of elements - Conference, Paris, May 1967
 08 p1398 A69-20892

S-process nucleosynthesis and temperature averaged neutron capture cross sections studied in relation to solar system, considering elemental and specific isotopic abundances
 08 p1357 A69-20896

Solar system elements abundance compilation based on carbonaceous chondrites and nucleosynthesis in stars
 08 p1401 A69-20903

Chemical composition of atmospheres of oldest Galactic stars, considering element abundances, metal and helium content and nuclear activity of massive stars
 08 p1402 A69-20909

Element abundances in magnetic stars, discussing Zeeman effect and anomalies in spectra
 08 p1403 A69-20911

Primitive elemental abundances in solar system, discussing composition of sun, meteorites and lunar maria
 08 p1403 A69-20914

Statistical distribution of chemical elements average abundances in earth crust and meteorites and nucleosynthesis of elements under specific astral conditions
 08 p1310 A69-20941

Element abundances of sharp lined field early A stars using model atmosphere
 09 p1600 A69-22198

Models for emission line region of 3C 273, considering ionization distributions for estimation of relative abundances
 10 p1790 A69-24137

Approximate ionization potentials for high ionization stages of elements with atomic numbers 31 to 92 obtained by binding energy calculations
 14 p2488 A69-29923

Solar system matter evolutionary beginning traced to chemical elements synthesis by considering radioactive decay irreversible processes
 19 p3406 A69-36076

Minor element influence on high temperature weldability of high Ni alloys and weld quality
 22 p3967 A69-39879

Mn, S and rare earth additions influence on Inconel alloy weld microfissuring including material, hot ductility and tensile strength data
 22 p3967 A69-39883

Ti, Al, S and P influence on Ni alloys weldability, discussing chemical composition, susceptibility to hot cracking and ductility temperatures
 22 p3967 A69-39884

Nuclear theory of elements origin, discussing nucleosynthesis to interpret abundances
 24 p4386 A69-43334

Elements origin and development in universe, discussing energy generation, structure and population of stars in Galaxy
 24 p4386 A69-43335

CHEMICAL ENERGY

NT ENERGY OF FORMATION

Convective instability by active stress, discussing composition dependent stress fields in continuous and mechanically isolated material and chemical to kinetic energy conversion
 14 p2540 A69-29634

Monograph on solid rocket propellants covering composition, combustion characteristics and energetic, mechanical and operational properties
 20 p3585 A69-37441

CHEMICAL ENGINEERING

Chemical processing for manufacture of solid propellant motors, discussing mixing, casting and curing of composite propellants
 16 p2829 A69-31992

Color chemistry concept producing high quality color negatives and prints in existing black and white processing systems
 22 p3948 A69-40990

CHEMICAL EQUILIBRIUM

NT ACID BASE EQUILIBRIUM

Complex chemical equilibrium calculation, analyzing thermodynamic principles and solution to nonlinear equations
 01 p0023 A69-10588

Chemical rockets theory for case of chemical equilibrium and frozen nozzle expansions
 03 p0495 A69-13004

Nonequilibrium dissociation effects on constant pressure laminar mixing for diatomic molecules and atoms, analyzing concentration and temperature of free shear layer
 04 p0588 A69-14733

Chemical nonequilibrium, mass transfer and viscous interaction effects on spherically blunted cones at hypersonic conditions, emphasizing stagnation point
 [AIAA PAPER 69-168] 06 p0862 A69-18047

Graphite ablation in air, N, Ar and He assuming chemical equilibrium, equal diffusion coefficients and steady state ablation
 [AIAA PAPER 69-148] 06 p0947 A69-18155

Laminar boundary layer on axisymmetric blunt body in dissociated air taking into account nonequilibrium homogeneous chemical reactions
 07 p1050 A69-18734

Equilibrium between H and OH radicals in turbulent H flames, noting component concentrations in H-O-N flames of different composition
 11 p1999 A69-24487

Equilibrium compositions of reaction products calculated by permutation over limiting equilibrium surface in reaction space, considering charged components and condensation products
 11 p2001 A69-25224

Electronic analog model for differential equations of equilibrium of gaseous combustion products based on asymptotic stability
 15 p2717 A69-30862

Electrical characteristics of equilibrium plasma sheaths at stagnation point of blunt body in high speed air, considering current collection regimes
 [AIAA PAPER 69-702] 17 p3011 A69-33473

Rocket motor combustion efficiency evaluated by chemical energy conversion to equilibrium, applicable to fuels, oxidizers and combustors at subsonic or supersonic velocity
 23 p4239 A69-41919

CHEMICAL EXPLOSIONS

NT GAS EXPLOSIONS

Powders and explosives - Conference, Brussels, September 1966
 02 p0301 A69-11519

Initiation of detonation by incident shock waves in hydrogen-oxygen-argon mixtures
 02 p0304 A69-12313

Explosion limits in hydrogen-oxygen reaction measured in diffusion regime, giving rate constant of branching step
 02 p0353 A69-12319

Detonation capacity of mixture of ammonium perchlorate base and polymethyl methacrylate and polystyrene, noting critical particle size dependence on composition
 02 p0305 A69-12674

Prevention of and protection against accidental explosion of munitions, fuels and other hazardous mixtures - Conference, New York, October 1966
 04 p0644 A69-14467

Mixing function vs time relationship for liquid propellant explosion hazards prediction, noting thermocouple grid for maximum information
 04 p0646 A69-14478

Liquid nitrogen inertant for continuous suppression of pressurized fuel tank explosion
 05 p0703 A69-16505

Chain reaction theory defining kinetic mechanism giving rise to explosion, noting conservation of free valences and formation and disappearance of radicals
 06 p1031 A69-17415

One dimensional lattice model for heterogeneous explosive detonation, discussing hot spots, grain burning ignition time, ignition site types and RDX detonation [WSCI PAPER 68-30]
 07 p1240 A69-18357

Gas dynamics, thermodynamics, chemical properties, energy and products of hydrocarbon-air detonations in tubes under standard atmospheric conditions [WSCI PAPER 68-26]
 07 p1241 A69-18369

Transverse wave spacing in self sustaining detonations in H-O mixtures, noting evidence against acoustic theory and for characteristic chemical dimension
 09 p1622 A69-21953

Piston motion influence on gaseous motion set up by constant energy explosion, applying to steady high Mach number flow past blunt nosed object
 22 p3931 A69-40892

CHEMICAL EXTINGUISHERS

U FIRE EXTINGUISHERS

CHEMICAL FUELS

NT AEROZINE
 NT AIRCRAFT FUELS
 NT HYDROCARBON FUELS
 NT HYDROGEN FUELS
 NT JET ENGINE FUELS
 NT JP-4 FUEL
 NT METAL FUELS

Transverse wave spacings for self sustaining detonations in oxygen and diluents mixtures with hydrogen, methane, acetylene or ethylene fuel, noting dilution
 13 p2378 A69-28217

CHEMICAL INDICATORS

Cladonia rangiferina resistance to stresses, considering suitable indices for stress response
 18 p3095 A69-34539

CHEMICAL KINETICS

U REACTION KINETICS

CHEMICAL LASERS

Chain and branched halogen-hydrogen reactions kinetic analysis for developing chemical laser with radiation energy weakly dependent on pumping energy
 02 p0259 A69-12645

Stimulated emission of cyanine dyes, discussing amplification coefficients
 04 p0612 A69-15373

Uranium hexafluoride-hydrogen hydrogen fluoride chemical laser, discussing conditions for negligible collisional deactivation and defined rotational temperature determination
 05 p0771 A69-15906

Laser emission of neodymium salt dissolved in polonium-chlorine, discussing fluorescence intensity
 06 p0936 A69-17778

Laser excited vibrational fluorescence for determining vibrational energy transfer rates in HCl-carbon dioxide, HCL-HI and HI-carbon dioxide
 07 p1144 A69-18289

Power output and radiation spectra of trivalent Nd doped liquid lasers based on phosphoryl chloride with tin and titanium chlorides
 11 p1894 A69-24620

Laser with molecular H and Cl mixture at HCl vibrational transitions
 14 p2461 A69-29672

Passive Q switching of chemical laser operating on vibrational-rotational line of vibrational transition of HCl
 16 p2796 A69-31840

Stimulated emission of cyanine dyes, discussing amplification coefficients
 16 p2797 A69-32120

Continuous explosion laser study of stationary detonation waves to determine conditions leading to partial population inversion and critical population density

19 p3336 A69-36360

Laser action from atomic bromine produced by flash photolysis of gaseous iodine monobromide, discussing pulsed output, optical gain, chemical reversibility and atomic excitation

19 p3337 A69-36444

Lasers based on organic dye solutions, discussing operation, structural formulas, absorption and luminescence spectra

20 p3555 A69-38011

Chemical high pressure laser action produced by stimulated phototransition of electrons at contact moment between pair of reacting nonexcited gas molecules

22 p3965 A69-41117

Hydrogen fluoride chemical laser emission spectrum, studying rotational-vibrational transition of molecules triggered optically or electrically

23 p4172 A69-41493

CHEMICAL MACHINING

NT ELECTROCHEMICAL MACHINING

Beryllium chemical and mechanical machining in quantity production, examining salvage and safety precautions [SAE PAPER 680649]

03 p0434 A69-13455

Fluosilicic acid in chemical milling of Ti and Ti alloys

21 p3669 A69-38966

Ti-Al alloy structure manufacturing technology covering forming, cleaning, chem-milling, machining, fastening and welding

24 p4324 A69-43431

CHEMICAL PROPERTIES

NT ACIDITY

NT HEAT OF COMBUSTION

NT HEAT OF FORMATION

NT HEAT OF SOLUTION

NT HEAT OF VAPORIZATION

NT THERMOCHEMICAL PROPERTIES

Polymeric film properties related to metal substrate interface corrosion, considering effects of stress concentration, surface cleanliness and adsorbed gases

02 p0265 A69-11896

Book on properties of liquid and solid helium 3 and 4 physical characteristics, phase behavior and experimental techniques

04 p0630 A69-14688

Ti metallochemistry investigations, noting atomic radius, electronegative valency effect, first atom ionization potential and production of special Ti alloys

07 p1161 A69-18764

Textural variation relation to mineralogical and chemical characteristics of chondrites from review of published data

08 p1391 A69-20516

Soviet book on fluid semiconductor properties at high temperatures during transition from solid to liquid state

10 p1744 A69-23316

Description and automated research of correlation /DARC/ for establishing quantitative relationships between topology and properties of chemical substance

12 p2026 A69-26361

Physicochemical and operational properties of trimethylol propane esters as lubricating oils under static and dynamic conditions

12 p2103 A69-27090

Polymer structure relationship to thermal, mechanical and chemical properties of electrical insulating materials

13 p2285 A69-27986

Physical and physicochemical properties of ferrites - Conference, Minsk, Belorussian SSR, 1967

13 p2319 A69-27991

Artificial aging effect on spinel structure and properties of ferrites using X ray analysis, neutron diffraction and electron microscopy

13 p2320 A69-27997

Polyvinyl acetate and polyvinyl alcohol thermoplastic adhesives, discussing gluing properties, chemical properties, preparation, polymerization methods

14 p2469 A69-29347

Lower oxides of Si, studying chemical composition, formation conditions, stability and chemical and physical properties

15 p2643 A69-31245

Hypersonic aircraft induced changes in chemical and thermodynamic properties of air influencing aerodynamic forces on vehicle

17 p2895 A69-33576

Lunar based physics and chemistry, discussing exploration of and survival in lunar environment

18 p3112 A69-34235

Lunar conditions differing from simulations in laboratories, examining surface, physicochemical properties and friction

18 p3113 A69-34241

Chemical modifications effects on Escherichia coli, DNA polymerase, including Hg atom addition to sulfhydryl group of enzyme

22 p3898 A69-41071

Soviet book on silicoorganic protective coatings preparation, physical, chemical and operational characteristics, with emphasis on silicates and metals

24 p4336 A69-43232

CHEMICAL PROPULSION

NT HYBRID PROPULSION

Chemical rockets theory for case of chemical equilibrium and frozen nozzle expansions

03 p0495 A69-13004

High performance chemical propulsion systems feasibility, discussing propellant combinations

06 p0983 A69-17627

Advanced electrical and nuclear propulsion systems for European launchers, comparing performances with chemical propulsion

06 p0984 A69-17628

Explosive and pyrotechnical elements for Grillo 1, Grillo 2 and Trigone 1 hot water rockets, detailing nozzle closure and chemical reaction activation

10 p1753 A69-23028

Electric and chemical rocket propulsion systems

13 p2325 A69-28255

Advanced liquid fuels and oxidizers development from rocket propulsion reaction principle

16 p2828 A69-31747

Interagency Chemical Rocket Propulsion Group method of treating measurement error for liquid rocket engine performance parameters, using uncertainty model

[AIAA PAPER 69-734] 16 p2846 A69-32781

Chemical relaxation, optimum propellant mixture ratio, combustion chamber pressure, gas jet impulse, mass flow and drive capacity of space propulsion systems

18 p3229 A69-34773

Book on chemical rockets and flame and explosives technology covering propulsion systems, combustion, propellant ingredients, etc

22 p3998 A69-40866

Manned flyby and stopover missions to Mars and Venus with chemical propulsion and Saturn 5 launch vehicles, noting short duration low energy missions [AAS PAPER 69-492]

24 p4380 A69-42839

CHEMICAL REACTION CONTROL

Hydrogen and basic electrolyte cold cells, studying control systems for reactants supply, current, reaction by-products, etc

16 p2738 A69-32410

CHEMICAL REACTIONS

NT ATOMIC RECOMBINATION

NT CARBONIZATION

NT DECARBOXYLATION

NT DEHYDROXYGENATION

NT DEIONIZATION

NT DEOXIDIZING

NT ELECTROCHEMICAL OXIDATION

NT ENDOTHERMIC REACTIONS

NT EXOTHERMIC REACTIONS

NT FLUORINATION

NT GLYCOLYSIS

NT HALOGENATION

NT HYDROGENATION

NT HYDROLYSIS

NT ION RECOMBINATION

NT NITRIDING

NT OXIDATION

NT OXYGEN RECOMBINATION

NT OXYGENATION

NT PHOSPHORYLATION

NT PHOTOCHEMICAL REACTIONS

NT PHOTOCROMISM

NT PHOTODECOMPOSITION

NT PHOTOLYSIS

NT PHOTOOXIDATION

NT PHOTOSYNTHESIS

NT PYROLYSIS

NT RADIOLYSIS

NT REDUCTION [CHEMISTRY]

NT SULFATION

NT THERMAL DISSOCIATION

Hydrocarbon formation mechanisms under conditions resulting from graphite filament explosions in hydrogen atmospheres, emphasizing stepwise radical formation and methane role

01 p0120 A69-10675

Chemical phenomena during explosions of wires in various gaseous atmospheres, using apparatus with electronic crowbar for current flow regulation

01 p0081 A69-10680

Analytical mechanics of chemical reactions, discussing natural collision coordinates for three dimensional reactions and exchange collisions for molecule and atom

01 p0123 A69-10681

HI and DI reaction into HD and 2I, noting need for rotational or vibrational excitation in addition to translational energy of collision

01 p0123 A69-10686

Very high temperature air flow laminar boundary layers on rotating bodies with unsteady chemical reactions, determining flow dynamic behavior

01 p0060 A69-10725

Ion reactions with neutral molecules, discussing analogies with conventional chemical systems

01 p0124 A69-10859

Vacuum distillation technique for isolation and recovery of alkali metal reaction products with Ta, Ni, V and oxygen

01 p0083 A69-10927

Reaction rate and mechanism for low temperature reaction between lithium hydride and liquid ammonia, noting chemisorbed ammonia dissociation at interface

01 p0025 A69-11285

Local mass transfer from wall with homogeneous or heterogeneous chemical reactions in uniform velocity flow, Couette flow and boundary layer flow

02 p0232 A69-12234

Rarefied merged stagnation shock layer of hypersonic body, considering chemical reactions of nonequilibrium dissociative relaxation of air

02 p0189 A69-12521

Chemical reaction fluctuations and oxygen electron attachment omission effects on density fluctuations in turbulent wakes, noting electron density fluctuation, bimodal model, etc

02 p0233 A69-12538

Chain and branched halogen-hydrogen reactions kinetic analysis for developing chemical laser with radiation energy weakly dependent on pumping energy

02 p0259 A69-12645

Chemical reaction scheme effect on hot zone structure of hydrogen-oxygen diffusion flame, considering influence of hydroxyl radical

03 p0531 A69-12895

Energy distribution among products of reactive collision of atomic H with Br molecule yielding HBr and Br atom, using perturbed Morse oscillator approximation

03 p0472 A69-13316

Metal oxide and carbon interaction during spatial separation of reagents, noting influence of reducing agent activity on metal vapors

03 p0445 A69-13569

Chemical nitrogen fixation methods for life support systems, discussing organometallic chlorides and bromides

03 p0382 A69-14198

Confined jet mixing region at entrance of tubular reactor, discussing mass and momentum transfer, chemical conversion and effect of Reynolds number [AIChE PAPER 25A]

04 p0586 A69-14508

Various reaction mechanisms proposed for interstellar medium, discussing formation and destruction of interstellar molecules

04 p0653 A69-14613

Numerical solution of chemically reacting boundary layer equations, noting loss of accuracy due to numerical cancellations

04 p0588 A69-14737

Angular distribution of reactive elastic scattering analyzed by opacity function /reaction probability/

04 p0554 A69-14859

Enhanced light emission rate in adiabatically expanded NO-O reaction ascribed to molecular clusters

04 p0555 A69-14864

Shock tube and samples of fluoroethylene, difluorodichloroethylene and fluoromethane in argon diluent used to prepare carbon difluoride, discussing electronic oscillator strengths

04 p0632 A69-14944

Thermal explosion in Poiseuille flow of reacting viscous fluid in infinite circular cylindrical channel or between two rotating infinite cylinders

04 p0686 A69-14986

Chemical compatibility estimation of lead and tin tellurides thermoelectric materials with metallic alloys

04 p0551 A69-15315

Boundary conditions in oblique reaction waves in supersonic flow, adding or subtracting heat by chemical reaction

05 p0697 A69-15828

Atomic hydrogen-bromine linear collision reaction intermediate formation and reactive scattering cross sections quantum mechanical calculation, using perturbed Morse oscillator approximation
05 p0796 A69-15911

Gas lasers involving gas-discharge collisions, selective pumping or chemical reactions to produce necessary inversion, giving theoretical analysis of excitation mechanisms
05 p0772 A69-16226

Ultrahigh molecular weight polyethylene terephthalate synthesis from commercial solid state materials, noting effects of several parameters
05 p0797 A69-16496

Fluorinated polyurethanes synthesis for liquid oxygen environments and cryogenic structural utility, noting structural effects on LOX compatibility
05 p0717 A69-16498

Compressible combustor turbulent shear flow analysis, discussing eddy diffusivity, density fluctuations, vorticity intensification and turbulent transport [WSCIPAPER 68-27]
06 p1034 A69-17793

Cholesteric liquid crystals application to trace contamination detection, describing color response measurement
06 p0885 A69-17842

Compressibility transformation theory extended for turbulent boundary layer, involving mass transfer with/without chemical reactions [AIAA PAPER 69-161]
06 p0912 A69-18045

Nonadiabatic reacting homogeneous system undergoing density changes, predicting chemical reaction rates and intermediate combustion products from chain reaction kinetics [AIAA PAPER 69-87]
06 p1036 A69-18054

Transient development of reacting boundary layer near stagnation point of vaporizing drop in gas stream [AIAA PAPER 69-174]
06 p0912 A69-18056

Supersonic molecular beam sampling system for coupling mass spectrometer to alkali metal-air reacting flow system in kinetics study, noting gas dynamic effects [AIAA PAPER 69-94]
06 p0930 A69-18099

Parasitic eigenvalue in integration of equations governing one dimensional flow of chemically reactive gas
07 p1118 A69-18317

Analog simulation of chemically reacting system applied to thermal decomposition of oxygen difluoride [WSCIPAPER 68-49]
07 p1073 A69-18318

Kinetics calculations in shock tube data interpretation, determining elementary rate constants and complex reaction mechanism [WSCIPAPER 68-50]
07 p1073 A69-18319

Activation energies of bimolecular multivalent transfer reactions of gaseous compounds, considering bond dissociation energy, length and order [WSCIPAPER 68-48]
07 p1239 A69-18321

Lewis acidity of alanes, discussing interactions of trimethylalane with amines, ethers and phosphines
07 p1074 A69-18630

Acidic, neutral and basic proteinoids thermal synthesis, discussing characterization and tendency to form microparticles
07 p1074 A69-18633

Chemical reactions in boundary layer on porous plate in oxygen stream, discussing similar solution of laminar boundary layer equations with flame front
07 p1119 A69-18735

Ti-Zr-Sn alloys phase equilibria and interaction between titanium nitride and solid solution of Ti and Zr
07 p1162 A69-18770

Synthesis and nucleophilic reactions of stable alpha-bromoorganolithium reagent
07 p1074 A69-19479

Chemical analysis, isotopic composition, structure and mineralogy of meteorites for classification into iron and stony, discussing time variation of temperature, pressure, etc
07 p1224 A69-19710

Chromium oxide additions effects on reaction rates decrease during ammonium perchlorate and nitrate combustion
08 p1375 A69-20340

Cross-linked polymers obtained by direct reaction of aryl polycarbonyls with aryl polyamines, studying char yields effect
08 p1269 A69-21059

Schiff base cross-links effect on synthesis of polymeric azomethines produced by bis exchange reactions, carbonyl and amine
08 p1269 A69-21061

Chemical processes in silicon carbide due to reactive deposition and chemical conversion, noting silicon growth mechanism involving outward diffusion
09 p1554 A69-21351

Oxygen depletion effect in chemical reactions between pyrolysis gases and air stream on surface recession of charring ablators [AIAA PAPER 68-302]
09 p1622 A69-21982

Electron microscopy for continuous observation and recording of dynamic reactions in high temperature materials
09 p1499 A69-22304

Mass spectrometric determination of pyrolysis products generated from heated polymer samples
09 p1448 A69-22314

Ceramic whiskers and metallic matrix chemical reactions during composite formation, analyzing coated and uncoated SiC whiskers in titanium matrix
09 p1527 A69-22359

Supersonic free jet with real gas effects and chemical reactions calculated by approximation
10 p1631 A69-22898

Metal composites of Ni or Mo fibers in Be matrix, discussing chemical compatibility in terms of reactions, solid solubility and diffusion at various temperatures
10 p1707 A69-22991

Venus atmosphere origin, discussing high temperature effects and chemical composition via space probe and terrestrial observations
10 p1775 A69-23183

Neat alpha styryl azide transformation into 2-phenylazirine, 3,6-diphenylpyridazine and 2,5-diphenylpyrrole after one month at room temperature in brown glass bottle
10 p1651 A69-23307

Polymerization of monomers considered for direct synthesis of iminobenzylidene
10 p1651 A69-23308

Polyesters reaction with dimethyl p-phenylene diamine compared under UV exposure from carbon arc and natural sunlight
10 p1716 A69-23978

Poly A-poly U synthesized by Azotobacter Vinelandi RNA polymerase in unprimed reaction containing ATP and UTP, following short lag period
10 p1647 A69-24185

Laminar flow stream containing periodic fluctuation of mass fraction of chemical species over flat plate with reactive surface
11 p1831 A69-24284

Critical conditions in spherical reacting mass, noting oscillatory nature of critical parameters in truncated Arrhenius rate on basis of nontruncated form
11 p1998 A69-24480

Explosive reactions between hydrogen and oxygen flashed in presence of nitrogen dioxide, chlorine or bromine as sensitizers, considering thermal contribution
11 p1832 A69-24878

Vibrationally excited nitrous oxide formation in reaction of N atoms with nitrogen dioxide, noting IR emission and vibrationally excited nitric oxide
11 p1832 A69-24880

Chemical species and reactions determined for propellants in calculating nonequilibrium rocket engine performance
11 p1940 A69-24905

Liquid rocket propellants chemical reactions identification during kinetic expansion [WSCIPAPER 68-7]
11 p1942 A69-24906

Chemical reaction rate data for propellant systems containing boron or aluminum and hydrogen, chlorine and fluorine, based on finite kinetics expansions [AIAA PAPER 69-182]
11 p1940 A69-24907

Planning, instrumentation and analysis of shock tube experiments in chemical kinetics, noting gas phase reaction rates at high temperatures
11 p1863 A69-25015

Combustion chemical reactions kinetics of gaseous phase systems, discussing temperature, reaction rates extrapolation, hydrogen and hydrocarbons
11 p2000 A69-25185

Ignition dynamics of solid materials with differing kinetic and thermophysical parameters, emphasizing temperature growth during chemical reaction leading to ignition
11 p2000 A69-25188

Ignition critical conditions based on reactions in condensed phase, discussing initiation from pulsed and continuous external heat sources, heat release by chemical reactions of ignition, etc
11 p2001 A69-25191

Composition and thermodynamic properties of gaseous system reacting at low temperatures with condensed phase formation, discussing iterative process convergence in approximation
11 p2001 A69-25223

Equilibrium compositions of reaction products calculated by permutation over limiting equilibrium surface in reaction space, considering charged components and condensation products
11 p2001 A69-25224

Supersonic air flow past blunt body of revolution in presence of nonequilibrium chemical reactions, ionization and molecular excitation
11 p1820 A69-25474

Inviscid reacting flow free of molecular transport analyzed locally near stagnation point, using Lighthill-Freeman gas model
11 p1876 A69-25560

Ductile metal powder chemical reactions during comminution in pure or oxygenated water
13 p2216 A69-27762

Electrochemical synthesis of chlorine pentafluoride formation from chlorine trifluoride-anhydrous hydrogen fluoride-sodium fluoride system
13 p2217 A69-28134

Chlorine pentafluoride formation from chlorine in anhydrous hydrogen fluoride in electrochemical cell, noting formation rate
13 p2217 A69-28135

Chemically reacting flow field and solid surfaces, formulating nonequilibrium laminar boundary layer equations for two dimensional and axisymmetric flows
13 p2377 A69-28147

Block tractable azomethine copolymers prepared by reaction of insoluble oligomers with monomers or of two different fusible oligomers, noting high thermal stability
13 p2217 A69-28317

HNO role in hydrogen-NO reaction rate data reexamined by numerical integration of governing differential equations
13 p2218 A69-28457

Coupled heat and mass transfer with zero order reactions in two phase systems consisting of drops, bubbles or solid particles
14 p2537 A69-29012

Borane carbonyl pyrolysis in low pressure tubular flow reactor measured by mass spectrometry, noting wall collision role in diborane bond dissociation
14 p2410 A69-29282

Chemical reaction-rate theory for creep tests, analyzing extrapolation equations for time-to-rupture dependence on temperature and stress
14 p2464 A69-29442

Laminar and turbulent hypersonic wakes trailing blunt bodies studied by finite difference method, taking into account pressure gradients and nonequilibrium chemical reactions effects
14 p2391 A69-29618

Perturbed molecular distribution in translational and internal degrees of freedom in dilute chemically reacting gases with low ion concentrations
14 p2410 A69-29988

Isothiocyanates and phenyl isocyanate reaction with hydrazinoethanol and hydrazinoethyl hydrogen sulfate
16 p2747 A69-31808

Chemical reaction between combustible solid fuel surface and oxidizer-containing gas in space capsule
16 p2877 A69-31896

Hybrid rockets combustion mechanism, discussing turbulent boundary layer with heat and mass transfer, chemical reactions, etc
16 p2879 A69-32002

Meteoritic elements ionization and loss mechanisms in E region, discussing roles of atomic oxygen and metal ions chemical reactions
16 p2780 A69-32313

Chemical reactions in compressible turbulent mixing flows, analyzing flow characteristics, rate equation and Reichardt theory [AIAA PAPER 69-537]
16 p2747 A69-32701

Boron nitride synthesis by gas phase reaction of boron chloride or diborane with ammonia, determining purity from equilibrium gas mixture components
17 p2952 A69-33432

Chemical species flux decay in turbulent boundary layer with catalytic wall, obtaining solution of conservation equation by using shear stress distribution [AIAA PAPER 69-709]
17 p2955 A69-33480

Chemical reactions activation energy at high temperature, noting cross section shape role for deducing activation energy from rate data
18 p3099 A69-34443

Velocity and angular distributions of KBr formed in reactive collisions between crossed molecular beams of K and thermal HBr/DBr/
18 p3178 A69-35476

Nuclear environment irradiation effects on materials, emphasizing radiation chemical processes affecting polyimide and copolymer of styrene and alpha-methylstyrene

19 p3356 A69-35530

Proton and deuteron energy used to study solid state chemical reactions effects on meteorites composition and properties, obtaining hydroxyl ions and hydrocarbons

19 p3414 A69-36114

Flame and pressure /or velocity/ oscillations interaction in unstable combustion regimes, considering tubes with propane-air mixtures

19 p3450 A69-36357

Computer program for numerical integration of chemical reaction rate equations behind steady state hydrogen-oxygen shock wave

19 p3451 A69-36366

Finite chemical reaction rate detonation wave interaction with rarefaction wave, noting mixture activation energy and heating power influence

19 p3298 A69-36384

Thermal conductivity calculation for chemically reacting multicomponent gas mixture, comparing results from Brokaw method and simplified formula

20 p3483 A69-36974

Nonequilibrium laminar heat transfer in viscous flow of chemically unstable gases past blunt body and plate

20 p3513 A69-37087

Physical state changes, chemical reactions, gaseous diffusion in solids and solid-gas interactions in vacuum, considering saturated vapor pressure, condensation, evaporation, etc

20 p3576 A69-37408

C-nitroso compounds chemistry covering various nitrosation reactions connected with reduction and deoxygenation

20 p3484 A69-37486

Gas phase ion-molecule chemistry of HCN by ion-cyclotron resonance spectroscopy identifying individual reactions by double resonance

20 p3485 A69-38262

H release, pressure and oxide layer formed by reaction during ball milling Cr in water

21 p3728 A69-38567

Destructive interaction of refractory carbides and graphite compositions with chemically active high temperature gas streams

21 p3751 A69-38640

Chemical processes responsible for transformation of vast gas and dust cloud into planetary system

21 p3804 A69-39200

Chemical and thermal behavior of materials corrosion in propellant exhaust gases with analysis of reactions involving hydrogen, nitrogen, water, carbon dioxide, etc

21 p3784 A69-39489

Volatile oxygen organic compounds subjected to RF electrodeless discharge, explaining product distribution in terms of reaction sequences

21 p3670 A69-39737

Solar proton bombardment of lunar surface, discussing luminescence and chemical effects

22 p4012 A69-40089

Book on rate constants of chemical reactions from flames covering flame propagation, mass spectroscopy, electron spin resonance, particles diffusion, combustion physics, etc

22 p3895 A69-40318

Chemical high pressure laser action produced by stimulated phototransition of electrons at contact moment between pair of reacting nonexcited gas molecules

22 p3965 A69-41117

Reaction zone following overdriven detonation wave propagating into mixtures of fluorine oxide and hydrogen molecules showing HF laser emission

22 p4052 A69-41188

Polypeptide synthesis as function of 5S ribosomal RNA dissociated from 50S ribosomal subunits by EDTA treatment

23 p4113 A69-41491

Chemical reaction kinetics in high temperature gases in terms of collision theory, discussing gaseous statistics and Boltzmann equation

23 p4113 A69-41518

Transesterification of amino acid peptide alkyl and fatty acid esters by treatment with anion-exchange resin

24 p4280 A69-43513

Prebiological chemical evolution, studying synthesis and degradation rates relationship at primitive environment energy levels

24 p4269 A69-43514

CHEMICAL REACTORS

Pilot chamber initiated thermal decomposition reactor concept for monopropellant thruster, discussing thrust levels and throttling ratios

[AIAA PAPER 69-420] 16 p2841 A69-32685

CHEMICAL RELAXATION U MOLECULAR RELAXATION

CHEMICAL STERILIZATION

Spacecraft sterilization techniques efficiency in terrestrial and extraterrestrial environments noting dry heat, radiation, ethylene oxide, isopropanol and formaldehyde in methanol

05 p0712 A69-15937

Ethylene oxide sterilization rate dependence on temperature, gas concentration, relative humidity and medium surrounding microorganisms

05 p0707 A69-15940

Spacecraft sterilization by hydrogen peroxide solutions mixed with selected anion active detergents

05 p0713 A69-15943

Antimicrobial spacecraft materials, discussing feasibility of impregnation or chemical combination of materials with bactericides

05 p0713 A69-15944

Formic acid catalytic action on sterilizing effectiveness of ethylene oxide

05 p0713 A69-15945

Sterilization without damage by mixing steam and formaldehyde at 80 C under subatmospheric pressure, noting thorough penetration

05 p0713 A69-15946

Thermal stabilization and ethylene oxide effect on spaceborne electronic component sterilization and decontamination

08 p1283 A69-20266

NT MICROANALYSIS

NT NEPHANALYSIS

NT NEUTRON ACTIVATION ANALYSIS

NT OZONOMETRY

NT PAPER CHROMATOGRAPHY

NT QUALITATIVE ANALYSIS

NT QUANTITATIVE ANALYSIS

NT SALT SPRAY TESTS

NT SPECTROSCOPIC ANALYSIS

NT URINALYSIS

NT VOLUMETRIC ANALYSIS

Lignin presence in New Zealand moss gametophytes observed for characteristic color reaction and UV spectra, noting contrast with north temperate species

17 p2912 A69-34176

CHEMILUMINESCENCE

Long lived low level chemiluminescence due to gaseous reactions at low concentrations induced by mercury lamp irradiation or Tesla coil discharge

01 p0024 A69-10618

Wake temperature turbulent fluctuation decay rates deduced from atomic oxygen recombination chemiluminescence

02 p0190 A69-12525

Enhanced light emission rate in adiabatically expanded NO-O reaction ascribed to molecular clusters

04 p0555 A69-14864

Chemiluminescence and chemionization in flames, considering electrically conducting properties and spectral analysis

06 p1032 A69-17423

Chemiluminescence in high temperature oxidation of methane studied in shock tube

06 p0885 A69-17937

Biochemiluminescent luminol-peroxide reaction to detect iron porphyrin proteins in microorganisms for extraterrestrial life search, discussing reaction kinetics

15 p2556 A69-31325

Rate coefficients for chemiluminescent reactions of excited Hc with N, O, carbon monoxide and dioxide determined from spatial dependence of visible emission

20 p3483 A69-36936

CHEMISORPTION

Adsorbed gas influence on X ray emission from exploding tungsten wires noting ungasged and degassed specimens in vacuum

01 p0118 A69-10668

Chemisorption of H onto Nb /110/ surface, measuring low energy electron diffraction and inelastic electron scattering from clean and H-covered surfaces

06 p0980 A69-17758

Chemisorbed oxygen effect on electrical conductivity of zinc doped polycrystalline tin oxides

07 p1201 A69-19478

Work function change of tungsten single crystal /100/ surface measured as time function during surface molecular gas adsorption

09 p1521 A69-21338

Experimental program to evaluate regenerable sorbents for carbon dioxide removal in space cabin environments

09 p1447 A69-22552

Platinum based metal binary catalysts as anodes for hydrogen/carbon monoxide fuel mixtures oxidation, discussing alloy surface chemisorption of CO

12 p2026 A69-25937

Desorption kinetics of atomic and oxide phases, analyzing composition of surface film formed from W and Mo single crystals interaction with oxygen

12 p2026 A69-26115

Alkaline metal adsorption on high work function metals with charge transfer, measuring polycrystalline Mo photoelectric emission as function of Cs coverage

14 p2507 A69-29275

Low energy electron diffraction oxygen adsorption kinetics on planes of tungsten at coverages below monolayer and work function measurements

18 p3183 A69-35106

Oxygen 18 adsorption on silicon activation analysis measurements used to obtain kinetic curve for chemisorption from monolayers

18 p3183 A69-35107

Surface structures, work function changes, Auger electron and surface plasma losses for Cs on clean W surface

19 p3392 A69-36733

Oxygen environment influence on Inconel X-750 surface deformation and cracking during fatigue related to chemisorption and oxidation

20 p3558 A69-36966

C and O atoms chemisorption on Mo surface demonstrated by surface striation

20 p3562 A69-37782

Field emission and field-ion microscopic adsorption studies, discerning major states in chemisorption for metal-crystal surfaces

22 p3895 A69-39898

Adsorption kinetics in ternary mixture of nitrogen, methane and hydrogen, using concentration-time /breakthrough/ curves measurement on activated coconut shell charcoal

[NAS-NRC PAPER H-4] 22 p3981 A69-40629

CHEMISTRY

Lunar physics and chemistry - IAA Conference, Belgrade, September 1967

18 p3112 A69-34234

CHEMONUCLEAR PROPULSION

U CHEMICAL PROPULSION

U NUCLEAR PROPULSION

CHEMORECEPTORS

Peripheral chemoreceptor carbon dioxide sensitivity, measuring human respiratory response to large carbon dioxide breath in oxygen at sea level and high altitude

22 p3890 A69-40207

CHEMOTHERAPY

Medicinal therapy and flight safety of pilots and astronauts, discussing drug use, self treatment, tolerance and environmental factors

01 p0014 A69-10583

Essential hypertension in selection and evaluation of airline pilots, discussing use of thiazide therapy

06 p0875 A69-17850

Therapeutic potential of dimethyl sulfoxide in aerospace medicine

06 p0883 A69-17851

Medicinal therapy and flight safety of pilots and astronauts, discussing drug use, self treatment, tolerance and environmental factors

15 p2555 A69-30753

Psychiatric morbidity as absenteeism cause among ground and flight personnel in civil aviation, recommending psychotherapy and chemotherapy

24 p4266 A69-43378

CHICKENS

Increased chronic acceleration physiological effects on chickens, comparing hematological observations with exercise capacity, survival and sexual development

10 p1641 A69-23041

Repeated blood sampling effect on plasma cholinesterase, acid phosphatase, alkaline phosphatase and hematocrit ratios in domestic chickens

10 p1644 A69-23158

Chronic acceleration effects on erythrocyte number, plasma volume, globulin fractions, erythrocyte size and plasma A/G ratio in chickens

11 p1828 A69-25458

CHILLING

Hypoxia tolerances in nitrogen dilution chamber of chickens at sea level and high altitudes, discussing role of hematocrit and heart mass

22 p3874 A69-40214

CHILLING

U COOLING

CHIMES

U AUDITORY SIGNALS

CHIMPANZEES

Constant illumination intensity effects fixed ratio lever pressing behavior for appetitive reinforcement with chimpanzee in temperature and humidity controlled environment

24 p4260 A69-42702

CHINA

U CHINESE PEOPLES REPUBLIC

CHINESE PEOPLES REPUBLIC

Communist China civil aviation, discussing major, local and international routes and agreements, aircraft types and national origin, total mileage, etc

16 p2882 A69-32337

CHINOOK HELICOPTER

U CH-47 HELICOPTER

CHIRP SIGNALS

Ultrasonic diffraction delay line operation interpretation as radar chirp signal correlator

01 p0026 A69-10072

Chirp pulse generation by carbon dioxide laser, discussing carrier frequency sweep

04 p0609 A69-14333

Chirp radar signal compression by proton spin echo phenomena, noting compression ratio and SNR

11 p1834 A69-24566

CHLORATES

Ammonium chlorate thermal decomposition by measuring formed noncondensable gas pressure and weight loss in solid state kinetic investigation

21 p3669 A69-38800

CHLORELLA

Mathematical models for Chlorella cell and biomass growth under illumination during space flight, noting ionizing radiation presence

02 p0198 A69-11508

Mineralized human wastes solutions utilization for Chlorella cultivation, noting growth rates

02 p0200 A69-11511

Organic compounds /metabolites/ extracting technique from nutrient media of Chlorella cultures indicate unsaturated amine and phenol composition

08 p1262 A69-19833

Mineral nutrition elements concentration stabilization by correcting solution additions during prolonged Chlorella cultivation with medium recycling

10 p1646 A69-23578

Vegetable diet including 210 g of dry Chlorella biomass decreases effect on calcium and magnesium assimilation to produce insignificant negative balance of K and Mn

10 p1647 A69-23590

Chlorella seaweed hybrid strains containing larger amounts of amino acids than original parent species

13 p2216 A69-28620

White rats diet containing alcohol-soluble fraction of Chlorella and Scenedesmus biomass, noting changes in adrenal cortex and renal glomerus

17 p2906 A69-32930

Microbial protein extraction from Chlorella algae and Torulla yeasts using urca soaking method

21 p3662 A69-39712

Survival rates of continuously cultivated Chlorella plants in air-carbon dioxide atmosphere after single exposure to gamma radiation, using microcolony counting technique

22 p3876 A69-40275

Restoration processes in Chlorella pyrenoidosa to distinguish intense and less intense gamma ray irradiations

22 p3878 A69-40792

DNA interaction with ribosomes enhancing amino acid incorporation into cell-free protein synthesizing system extracted from Chlorella pyrenoidosa

23 p4080 A69-41430

Oxygen exchange in Scenedesmus and Chlorella as function of carbon dioxide, compensation point, Hill activity and photorespiration, using mass spectrometry

23 p4099 A69-42528

Chlorella enzymes activity in reducing nitrate to nitrite and nitrite to ammonia

24 p4263 A69-43136

CHLORIDES

NT ALUMINUM CHLORIDES
NT AMMONIUM CHLORIDES
NT BORON CHLORIDES

NT CARBON TETRACHLORIDE

NT HYDROCHLORIC ACID

NT IRON CHLORIDES

NT MAGNESIUM CHLORIDES

NT POTASSIUM CHLORIDES

NT SODIUM CHLORIDES

NT TITANIUM CHLORIDES

Salt water stress corrosion cracks morphology in titanium alloy, discussing crack propagation, brittle nature and chloride contamination effect

[SAE PAPER 680642] 03 p0444 A69-13458

Magnon density of states of ferromagnetic gadolinium trichloride in magnetic field, using high resolution optical spectroscopy

03 p0494 A69-14257

Titanium tetrachloride reduction to titanium by magnesium, showing autocatalytic process

07 p1163 A69-18784

Motion sickness treatment with bethanechol chloride, noting negative results with 12 airskip student naval aviators

12 p2024 A69-26561

Niobium deposition on graphite from vapor-gas phase assuming heterogeneous process

15 p2629 A69-30992

Co 2 chloride aqueous and alcoholic solutions by X-ray diffraction to find potential ligands relative coordinating abilities

20 p3484 A69-37496

Conditions for obtaining concentrated Ti-containing melts free of Al and V chlorides by cementing with metallic Ti and Ti-containing materials

22 p3957 A69-40918

CHLORINE

Cl 35 nuclear quadrupole resonance spectra of 3,6-dichloropyridazine, tetrachloropyridazine, 2,6-dichloropyrazine and chloropyrazine

01 p0123 A69-10290

Chlorine as indicator of terrestrial contamination in iron meteorites, using neutron activation analysis and metallographic observation

08 p1405 A69-20923

Chlorine pentafluoride formation from chlorine in anhydrous hydrogen fluoride in electrochemical cell, noting formation rate

13 p2217 A69-28135

Additives effect on flame propagation velocity and stability in N diluted hydrogen-chlorine preflamants, noting entrained air role

[WSCI PAPER 69-13] 16 p2831 A69-32353

Boron, Li and Cl contents in iron and stone meteorites by fluorometric, thermal-neutron activation and pyrohydrolytic separation methods, tabulating results

19 p3408 A69-36085

Ar 39 and Cl 36 production rates and ratios in stone and stony-iron meteorites metal phases, discussing terrestrial age calculation

19 p3411 A69-36100

Solar He abundance limits and discrepancies of Cl 37 solar neutrino count experiment

20 p3592 A69-38068

CHLORINE COMPOUNDS

NT ALUMINUM CHLORIDES

NT AMMONIUM CHLORIDES

NT AMMONIUM PERCHLORATES

NT BORON CHLORIDES

NT CARBON TETRACHLORIDE

NT CHLORATES

NT CHLORIDES

NT CHLOROSILANES

NT DICHLORODIPHENYLTRICHLOROETHANE

NT HYDROCHLORIC ACID

NT HYDROXYLAMMONIUM PERCHLORATES

NT IRON CHLORIDES

NT MAGNESIUM CHLORIDES

NT MAGNESIUM PERCHLORATES

NT NITRONIUM PERCHLORATE

NT PERCHLORATES

NT POTASSIUM CHLORIDES

NT POTASSIUM PERCHLORATES

NT SODIUM CHLORIDES

NT TITANIUM CHLORIDES

Titanium aluminum alloys two stage direct production by aluminothermal reduction of titanium tetrachloride

07 p1159 A69-18536

Flame resistant chlorine containing polyester resins, discussing preparation, curing characteristics, physical properties and reinforced plastics application

08 p1340 A69-20505

Nb-gaseous Nb chlorides equilibrium from transpiration measurements at 800-1400 C, confirming importance of Nb pentachloride, Nb tetrachloride and Nb trichloride

23 p4112 A69-41339

CHLORINE FLUORIDES

Thermal dissociation of chlorine trifluoride behind incident shock waves at high temperature, discussing bimolecular reaction rate constant

[WSCI PAPER 68-40] 07 p1202 A69-18355

Electrochemical synthesis of chlorine pentafluoride formation from chlorine trifluoride-anhydrous hydrogen fluoride-sodium fluoride system

13 p2217 A69-28134

Chlorine pentafluoride formation from chlorine in anhydrous hydrogen fluoride in electrochemical cell, noting formation rate

13 p2217 A69-28135

Thermal dissociation of chlorine trifluoride behind incident shock waves as function of temperature using UV absorption spectroscopy

21 p3670 A69-39739

CHLOROAROMATICS

NT CHLOROBENZENES

Cl 35 nuclear quadrupole resonance spectra of 3,6-dichloropyridazine, tetrachloropyridazine, 2,6-dichloropyrazine and chloropyrazine

01 p0123 A69-10290

CHLOROBENZENES

Raman spectra and temperature dependent nuclear quadrupole resonance frequencies of p-dichlorobenzene and p-dichlorobenzene-D, calculating librational amplitudes

01 p0122 A69-10286

Ion cyclotron double resonance technique to identify collision-induced ion fragmentation pathways illustrated with p-chloroethylbenzene

19 p3265 A69-36292

CHLOROFORM

Crystal and molecular structure of mu-oxo-bis(chlorobis/2, 4-pentanedionato/titanium/IV/-chloroform solved by symbolic sign determination method and Patterson map interpretation

01 p0023 A69-10411

CHLOROFORMATE

Reagent menthyl chloroformate use in optical analysis of asymmetric amino and hydroxyl compounds by gas chromatography

07 p1075 A69-19499

CHLOROPHYLLS

Q switching of ruby lasers by natural chlorophyll a and derivatives pheophytin a and Cu chlorophyllin Na

11 p1900 A69-25581

Manganese deficiency effect on growth and chlorophyll content of algae with and without hydrogenase

15 p2558 A69-31551

CHLOROPLASTS

Interactions between intermediate fluorescence quenching trapping center and associated electron acceptor of oxygen evolving photosynthetic spinach chloroplast photosystem

01 p0024 A69-10928

Deoxyribonucleic acid conformations in spinach leaf chloroplasts by electron microscopy

20 p3479 A69-38001

CHLOROSILANES

Halocarbon solvent for application of chlorosilane finish to heat cleaned glass fabric for reinforcement of plastic, noting relative humidity effect

08 p1341 A69-20513

SiC part fabrication by chemical vapor deposition through pyrolysis of chlorosilanes from vapor state onto machined substrates of graphite and metals

09 p1509 A69-22344

CHLORPROMAZINE

Glucose disappearance rate from dogs blood at simulated 27,000 ft altitude compared with tolerance at ground level, discussing chlorpromazine administration effect

14 p2408 A69-29305

CHOCTAW HELICOPTER

U CH-34 HELICOPTER

CHOICE

U SELECTION

CHOKES (RESTRICTIONS)

Mixing regimes for flows with different stagnation enthalpies subject to mass flow limitation due to thermal choking

13 p2251 A69-28499

Swirl influence on choking constraint in transonic flow through nozzle throat

[AIAA PAPER 68-693] 23 p4151 A69-41887

CHOLESTEROL

Electric field strength and helix pitch in induced cholesteric-nematic phase transitions, noting activation energy for charge carrier production

04 p0555 A69-14964

Exercise effects on hepatic cholesterol of rats on diets high in saturated or unsaturated fats

21 p3653 A69-38903

Cholesterol-protein metabolism in muscles, liver and cerebrum of lethal X ray exposed guinea pigs compared with unexposed group

21 p3657 A69-39052

Brain weight and cholinesterase activity in rats after exposures to acoustic and light stimuli

21 p3662 A69-39627

Stewart-Hamilton theorems for total input-output analysis of body cholesterol in man

24 p4259 A69-42639

CHOLINE

1.5 g angular acceleration effects on acetylcholine metabolism in guinea pig brains and hearts

02 p0198 A69-11505

Mechanical vibrations and noise effects on acetylcholine concentration, esterase activity and synthesis ability in rat brain

23 p4079 A69-41381

Regression process in acetylcholine level in rats after mechanical vibrations and noise exposure

23 p4079 A69-41382

Optic nerve spikes elicited by acetylcholine application on isolated perfused retina of frog, varying response by prostigmine and atropine

23 p4084 A69-41465

CHOLINESTERASE

Insignificant or recoverable changes observed in blood acetylcholine content and cholinesterase activity of rabbits subjected to 8 g acceleration

02 p0197 A69-11491

CHONDRITES

NT CARBONACEOUS METEORITES

NT MURRAY METEORITE

NT ORGUEIL METEORITE

NT PANTAR CHONDRITES

Replicate neutron activation determinations of Ga, Ge, In and Ir in L group chondrites, proposing model which accounts for observations

01 p0155 A69-10976

Chondrules in Sharps /H-3/ chondrite show evidence of recrystallization and homogeneous olivines and pyroxenes

01 p0156 A69-10977

Chemical composition of various types of chondrites, determining quantitative proportions soluble and insoluble in acids

01 p0026 A69-11381

Stone meteorite chemical composition, analyzing chondrites Borodino, Lavrentevka, Alfanello and Nardoo II

01 p0026 A69-11382

Enstatite chondrites structure and mineral content and composition using microscopic and X ray analysis, grouping parameters in distinguishing types

02 p0317 A69-12016

Rubidium, Sr and Sr isotopic composition of normal gray hypersthene chondritic falls, noting Rb/Sr and Sr87/Sr86 ratio determination of Bath Furnace L chondrite isochron

02 p0317 A69-12020

Meteorite fragments fall and distribution at Bur-Gheluai, Somalia, discussing crust morphology, mineralogical composition and structure

03 p0507 A69-13095

Oxygen partial pressure, temperature and olivine composition related, determining distribution coefficient of Fe and Mg between olivine and pyroxene

03 p0516 A69-14082

Disordered chondritic pyroxenes, analyzing X ray patterns of meteoritic and synthetic crystals

03 p0516 A69-14083

Nepheline occurrence in unequilibrated chondrites, discussing crystallographic evidence from X ray powder patterns

04 p0659 A69-15010

Heavy xenon isotopic anomalies in carbonaceous chondrites, rejecting plutonium 244 spontaneous fission decay mechanism

05 p0819 A69-15625

Chemical compositions and structural states of feldspar in recrystallized /Type 6/ chondrite meteorites, using electron microprobe analysis and X ray diffraction techniques

05 p0819 A69-15626

Nitrogen abundances in chondritic meteorites determined by carrier gas fusion extraction

05 p0825 A69-16301

Electron microprobe analysis of vanadium in presence of titanium by compositional measurement of chromite in chondritic meteorites

07 p1073 A69-18419

Chemical composition and morphological, structural, textural and mineralogical characteristics of chondrules and chondrites

07 p1212 A69-18548

Textural variation relation to mineralogical and chemical characteristics of chondrites from review of published data

08 p1391 A69-20516

Chondrite meteorite fall /1969/ in Mexico, noting opaque and microcrystalline matrices and gamma rays from short lived isotopes

08 p1396 A69-20686

Fractionation of abundant lithophile element ratios in chondrites emphasizing Si-Mg ratio

08 p1403 A69-20915

Indium abundances in chondritic and achondritic meteorites and terrestrial rocks determined by radiochemical neutron activation analysis

08 p1404 A69-20917

Mercury concentration relation to thermal history of chondritic meteorites, using activation analysis

08 p1404 A69-20920

Trace element distribution in metal phase of chondrites and iron meteorites, using neutron activation analysis with radiochemical separation

08 p1404 A69-20921

Redistribution of potassium and argon in meteorites and rock samples, discussing thermal diffusion and grain size

08 p1405 A69-20926

Electron probe analysis of olivine and pyroxene in LL-group chondrites, discussing iron and fayalite composition and unequilibrated stones

08 p1406 A69-20931

Cosmic ray induced radioactivity in lunar surface and meteorites calculated together with cosmic ray intensity variations

10 p1756 A69-22817

Chemical composition analysis of one mesosiderite and seven chondrites, with notes on mineralogy and chemical procedures

11 p1953 A69-24336

Quality assessment of quantitative data on chemical composition of stony meteorites, considering precision and accuracy

11 p1953 A69-24359

Lithophile elements relationship in chondrites and basaltic achondrites, tabulating Ca-Al ratios and Ca, Al, Ti, Zr, Sr, Ba and Sc percentages

11 p1954 A69-24360

Chondritic meteorites arsenic, tin and antimony content determined by anion-exchange chromatography and neutron activation analysis

13 p2344 A69-27630

Rb 87-Sr 87 age of bronzite chondrites, analyzing olivine bronzite chondrite falls for K, Rb and Sr elemental concentrations

14 p2526 A69-29881

Geochemistry of fission Xe component in chondrites, suggesting Xe derivation from superheavy elements with Z 112 to 119

15 p2681 A69-30325

Chondritic Cr and Mn content studied by X ray fluorescence, noting positive correlation in H and L groups and negative correlation in carbonaceous chondrites

15 p2681 A69-30416

Volatiles percentage at 1000 C in nitrogen atmosphere for chondrites, considering cosmo-petrological significance of microchondrule coalescence

17 p3030 A69-33067

Cosmogenic Al 26 in achondrites and chondrites measured by nondestructive gamma-gamma coincidence counting

17 p3034 A69-33584

Bovedy Chondrite fall in Northern Ireland, describing fragments trajectory and metal, sulphide and silicate presence

18 p3200 A69-34993

Iron distribution inconsistency indicated in Group H and L chondrites through Ni and Co analysis of fractionated samples, plotting atomic ratios on Prior diagram

19 p3407 A69-36078

Mossbauer spectra of Fe minerals in unequilibrated ordinary chondrites, noting ratios of olivine to pyroxene iron

19 p3408 A69-36082

Sharps chondrite chemical, petrographic and mineralogical studies suggesting formation from complex and repetitious high temperature events and agglomeration processes

19 p3408 A69-36086

Fractionation of abundant lithophile element ratios of Si, Mg, Ca, Al and Ti in carbonaceous, common and enstatite chondrites

19 p3409 A69-36087

Tieschitz and Mezo-Madaras chondrites and chondrules formation from considerations of coexisting minerals and interstitial ground mass

19 p3409 A69-36089

Ar 39 content in chondrites interpreted for meteorite size, exposure age and orbital elements

19 p3411 A69-36101

Radiation ages of bronzite chondrites, amphoteric and hypersthene from cosmic ray activities

19 p3412 A69-36102

Lance chondrite C III, studying mineral composition of chondrules and heterogeneous crystalline fragments

19 p3413 A69-36110

Chondritic meteorites initial orbits evolution to earth impact calculated by Monte Carlo method, considering relationships to meteorite sources

19 p3415 A69-36118

Quantitative mineralogical characterization of chondrites by modal analysis using electron microprobe

19 p3416 A69-36125

Black chondrite inclusions in Cumberland Falls meteorite, discussing inclusion chemical, mineralogical and electron probe data

19 p3416 A69-36127

Kamacite analysis for P and Ni in chondrites, palasite and iron meteorites, considering cooling rate and rhadbit

19 p3417 A69-36131

Dynamically deformed structures in chondrites and hexahedrites observed to discriminate among theories about origin of chondrules and meteorites

19 p3418 A69-36135

K 40-Ar 40 age measurements in separated mineral phases of chondrites, including production rates of spallation isotopes

19 p3418 A69-36137

V 50/V 51 abundance ratios in chondrite, terrestrial diabase standard W-1 and reagent V

20 p3601 A69-37501

Petrology, mineralogy and phase composition of Siena chondrite, interpreting meteorite as ignimbritic rock or welded tuff

20 p3602 A69-37534

Amphoterite /LL/ chondrites Rb-Sr age determination, noting high brecciation

21 p3814 A69-39583

Meteorites pigments identification as porphyrins for extraterrestrial life evidence, noting sample analyses of Orgueil, Murray, Cold Bokkveid and Mokoia carbonaceous chondrites

22 p4008 A69-39889

Olivine-bronzite chondrite fragments found near Oshkosh, Wisconsin, in fall of 1961

22 p4021 A69-40413

Ilmenite composition in equilibrated ordinary chondrites, analyzing Fe, Mg, Ti and Cr content

24 p3382 A69-42890

Rb-Sr isotopic determinations for Olivenza olivine-hypersthene chondrite, noting isotopic ratio vs age

24 p4385 A69-43214

CHONDRULE

Chondrules in Sharps /H-3/ chondrite show evidence of recrystallization and homogeneous olivines and pyroxenes

01 p0156 A69-10977

Chemical composition and morphological, structural, textural and mineralogical characteristics of chondrules and chondrites

07 p1212 A69-18548

Rare earth elements and yttrium in meteoritic chondrules determined by radiochemical neutron activation analysis

08 p1403 A69-20916

Volatiles percentage at 1000 C in nitrogen atmosphere for chondrites, considering cosmo-petrological significance of microchondrule coalescence

17 p3030 A69-33067

Meteorite origin theory limitations from microscopic examination and microprobe analyses of chondrules in unequilibrated meteorites

17 p3034 A69-33585

Ramsdorf meteoritic chondrules and metal particles formation attributed to shock-induced partial melting and rapid cooling

19 p3409 A69-36088

Tieschitz and Mezo-Madaras chondrites and chondrules formation from considerations of coexisting minerals and interstitial ground mass

19 p3409 A69-36089

Bjurbole chondrules composition and density, discussing formation of homogeneous olivines and pyroxenes

19 p3409 A69-36090

Dynamically deformed structures in chondrites and hexahedrites observed to discriminate among theories about origin of chondrules and meteorites

19 p3418 A69-36135

Pyroxene crystallization in meteoritic chondrules, noting normal spherulite crystallization

22 p4033 A69-41065

CHOPPERS [ELECTRIC]

U ELECTRIC CHOPPERS

CHORDS [GEOMETRY]

Velocity, lifting force, pressure moment and circulation around linear array of thin foils with direction normal to profile chords calculated by Birnbaum-Glauret method

11 p1817 A69-24348

Geometric conditions selection in directions determination in satellite and rocket aided triangulation, deriving formulas for chords directions of earth ellipsoid

15 p2689 A69-30572

CHOROID MEMBRANES

Retinal burn resulting from prolonged viewing of sun, laser or thermonuclear explosion, noting effects on choroid, receptors and pigment cells

08 p1267 A69-20680

CHORUS [DAWN PHENOMENON]

U DAWN CHORUS

CHROMA PHENOMENON

U DAWN CHORUS

CHROMATES

NT POTASSIUM CHROMATES

Cleaning, deoxidizing and chromating process effects on chromate coated Al, using salt spray corrosion tests

19 p3321 A69-35570

CHROMATOGRAPHY

NT GAS CHROMATOGRAPHY

NT PAPER CHROMATOGRAPHY

NT THIN LAYER CHROMATOGRAPHY

Dispersion in gel permeation chromatograph, noting contributions of injection and detection systems to peak broadening and retention time

04 p0555 A69-14884

Dispersion in gel permeation chromatography, noting eddy diffusion in chromatographic columns

04 p0555 A69-14885

Gas-liquid chromatography of natural protein amino acids in biological substances, noting separation characteristics

13 p2217 A69-28258

Polychromator measurement of hydrogen plasma electron density produced by normal ionizing shock wave, using Stark broadening study of H beta line

14 p2494 A69-29767

Free lysine and dinitrophenyl (DNP) derivatives determined quantitatively by ion exchange chromatography

17 p2917 A69-33651

Gel permeation chromatography of nominally linear aliphatic polyesters, using tetrahydrofuran solvent at 37 degrees C

21 p3670 A69-39806

Aromatic and nonaromatic hydrocarbon fractions in terrestrial graphite, discussing classification and analysis by chromatography and mass spectrometry

22 p3934 A69-39890

CHROME

U CHROMIUM

CHROMITES

Thermal decomposition of ammonium perchlorate and ammonium perchlorate-copper chromite mixtures

02 p0304 A69-12312

Electron microprobe analysis of vanadium in presence of titanium by compositional measurement of chromite in chondritic meteorites

07 p1073 A69-18419

CHROMIUM

Irradiation influence on chromium transition temperature explained by defect clusters and embrittling impurity redistribution

01 p0095 A69-10604

Mechanical properties of thermally diffused layers obtained by vacuum chromizing of steel, establishing need to decarburize substrate material

03 p0450 A69-13913

Cr gas deposition on steel by means of chromium chloride salt, noting chromizing conditions effect on carbide growth and friction resistance

04 p0605 A69-14577

Cobalt concentration reduction in maraging steels by Cr replacement and increased Mo and Ti additions

04 p0616 A69-14649

Chemical vapor deposition of chromium metal on substrates, discussing influence of temperature, gas flow rate and chromium chloride concentration [ECS PAPER 223]

05 p0769 A69-16232

Brittleness and physical causes of cold shortness in Cr, discussing high purity metal formation and fine and superfine grain structures synthesis

09 p1526 A69-22147

Chromium concentrations induced line shift in ruby single crystals spectra, determining principal lines position

10 p1744 A69-23321

Chondritic Cr and Mn content studied by X ray fluorescence, noting positive correlation in H and L groups and negative correlation in carbonaceous chondrites

15 p2681 A69-30416

Annealed Cr structural changes during creep at 900 C in air, discussing crystalline disorientation X ray studies and stress

18 p3160 A69-35453

Tau-luminescence in thin gamma-colored and uncolored ruby crystals containing Cr ions measured, discussing ions absorption spectrum changes

19 p3335 A69-36166

Steels chromized by vacuum diffusion, studying depth, microstructure and properties of chromized layer

19 p3329 A69-36572

H release, pressure and oxide layer formed by reaction during ball milling Cr in water

21 p3728 A69-38567

Grain boundary grooving kinetics for Cr, W and Mb in Ar and vacuum, determining interface free energies and surface self diffusion coefficients

21 p3744 A69-38740

Bright chromium electrodeposition principles and properties of coatings

22 p3958 A69-41263

CHROMIUM ALLOYS

Deformation in aged Fe-Cr alloy studied for rate-controlling solid solution mechanism as function of stress

01 p0095 A69-10601

Cooling rate effect during aging on heat resistance of forged blanks of nickel based chromium alloy

02 p0266 A69-12125

Chromium bronze blanks compacted from granules for hardness and electrical conductivity, noting improved high strength characteristics over conventional production methods

02 p0266 A69-12127

Cr-Si diffusion layers on Ti, noting results of roentgenographic and metallographic studies

04 p0614 A69-14578

Nb and Cr additions effects on Hadfield type steel mechanical properties, noting improvement especially at low temperatures

04 p0614 A69-14579

Quasi-ternary titanium dichromide-V-Mo system composition at high temperatures, physical properties and phase diagrams

04 p0618 A69-15080

Be, Co, V and Ti additions effect on oxidizability of cast, forged and cold worked Nb-Cr-Mo alloys

04 p0618 A69-15081

Hot working temperature effects on Rene 63 mechanical properties and microstructures, using tensile and stress rupture tests, electron microscopy and X ray diffraction analysis

05 p0781 A69-16446

Long term creep behavior of nickel-chromium-molybdenum alloy, noting temperature effect on grain boundaries

05 p0781 A69-16500

Cobalt chromium high temperature oxidation and scale formation [ECS PAPER 413]

08 p1332 A69-20363

Cobalt chromium alloys high temperature oxidation kinetics, discussing thermographic study of oxidation rate and oxygen pressure role [ECS PAPER 413]

08 p1332 A69-20364

Joining methods for fabricating thoria dispersion strengthened nickel and nickel chromium materials

09 p1509 A69-22342

Spontaneous martensite phase transformation in Ti-Cr alloy thin foils formed electrolytically

10 p1708 A69-22994

Long range order formation in Ni-Cr alloys analyzed by direct neutron diffraction, considering disorder-order transition temperature and chemical composition

10 p1714 A69-23964

Vacuum deposition of Cr-Al film on Ni-Mo alloys, describing operating pressure, temperature and film thickness

10 p1715 A69-24013

Ductile metal clads and coatings of silicides, aluminides and noble metals to protect Cr alloys against nitrogen embrittlement and air oxidation

12 p2114 A69-26495

Thoria strengthened Ni-Cr alloys high temperature stability, noting thoria particle size influence

14 p2465 A69-29682

Cr-Si diffusion layers on Ti, noting results of roentgenographic and metallographic studies

15 p2638 A69-30279

Chromium-cerium phase diagram determined by differential thermal, metallographic and X ray structural analysis

15 p2640 A69-30666

CR-B binary system phase diagram including lattice parameters, temperature of peritectic decomposition and characteristics of alloys

15 p2641 A69-31185

Chromium ternary systems phase diagrams and crystallographic structures, using heat treatment and X ray analysis

18 p3158 A69-35262

Group 7A and group 8 elements alloying effect on Cr dislocation structure and mechanical properties, discussing ductile-brittle transition temperature and electronic theory

18 p3160 A69-35452

Ni-Cr alloy unidirectionally solidified, grain and eutectic structure and alloy strength

19 p3343 A69-35921

Abrasion and corrosion resistant Cr-Co-B cast alloys in aggressive media, concluding resistance is due to chromium boride and fine dendritic structure

19 p3347 A69-36742

Stress corrosion cracking of stainless steels and Incoloy and Inconel alloys in chloride, caustic, oxygenated and miscellaneous environments

19 p3349 A69-36890

Authoradiographic methods for diffusion and phase transformation in Fe-Cr alloys by application of photographic emulsion with tracer element on metal surface

20 p3561 A69-37416

Equilibrium vapor compositions and activities over Fe-Cr-Ni alloys at 1600 C determined by collecting effusate from thoria Knudsen cells

23 p4175 A69-41503

Chromium composites mechanical properties, studying effects of alloying with spinel and magnesium oxides

23 p4177 A69-41672

CHROMIUM BORIDES

Abrasion and corrosion resistant Cr-Co-B cast alloys in aggressive media, concluding resistance is due to chromium boride and fine dendritic structure

19 p3347 A69-36742

CHROMIUM BROMIDES

Faraday effect for magnetic properties of chromium tribromide along various isotherms near critical point, confirming scaling laws

15 p2668 A69-30686

CHROMIUM CARBIDES

Cobalt base high chromium carbide strengthened superalloy, evaluating physical and mechanical properties

11 p1901 A69-24259

Stainless steels stress corrosion susceptibility, detecting chromium carbide in martensitic matrix by galvanic nondestructive test method

14 p2466 A69-29935

Ni based superalloy mechanical properties, determining chromium carbide discontinuous precipitation effects at various temperatures

23 p4176 A69-41507

CHROMIUM COMPOUNDS

NT CHROMATES

NT CHROMITES

NT POTASSIUM CHROMATES

Dilatometric and X ray study of temperature dependence of linear expansion coefficients of lattice constants of chromium disilicon

04 p0619 A69-15392

Young modulus of sintered nonporous titanium, zirconium and chromium nitrides, computing characteristic temperature and root mean square atomic displacements in lattices

06 p0938 A69-16830

Dilatometric and X ray study of temperature dependence of linear expansion coefficients of lattice constants of chromium disilicon
18 p3156 A69-35020

Cr-S and Cr-Fe-S systems phase relations, using silica tube and collapsible tube experiments, correlating formation conditions of meteoritic sulfide assemblages
19 p3359 A69-36123

CHROMIUM ISOTOPES

Microsectioning technique applied to measurement of diffusion coefficients of Cr 51 in polycrystalline Nb at 1220-1766 K temperature range
11 p1903 A69-24577

CHROMIUM OXIDES
NT CHROMITES

Catalytic effect of potassium bichromate and chromic oxide additives on burning of ammonium perchlorate and mixtures
08 p1375 A69-19997

Chromium oxide additions effects on reaction rates decrease during ammonium perchlorate and nitrate combustion
08 p1375 A69-20340

CHROMIUM STEELS

Light austenitic grain boundaries in heat treated Cr-Mo-W-V alloy steels
01 p0100 A69-11295

Chromium steel /El961/ susceptibility to structural damage under cyclic loads by nondestructive inspection of magnetic hysteresis and eddy current losses
07 p1141 A69-19316

Chemical composition of chromium steels for optimum heat resistance properties, noting effects of nickel, nitrogen and ferrite and austenite-forming elements
10 p1708 A69-23000

Monograph on effect of nitrogen on precipitation behavior of austenitic chromium-nickel steel covering carbides, intermetallics, phase transportations, corrosion resistance, etc
11 p1902 A69-24369

Monograph on effect of boron, zirconium and titanium on austenite transformation of CrMo steels bainite and martensite covering carbides, nitrides, mechanical properties, etc
11 p1903 A69-24634

Aging effects on hardness and tensile strength of nickel-chromium steels at various high temperatures and time periods
11 p1906 A69-25439

Etching, spray etching and photo-resist methods for producing CrNi steel heating elements for propeller deicing
12 p2102 A69-26370

Dynamic strain aging of Fe-Cr-C and Fe-Mo-C steels, analyzing strength, ductility and secondary hardening by using microprobes, foils diffraction and extraction replicas
13 p2276 A69-27403

Double notch creep rupture tests of Cr-Mo steels, investigating changes in notch profile, dimensions and structure
[ASME PAPER 68-WA/MET-7]
14 p2464 A69-29441

Creep rates measurement errors at low stresses in intermediate temperature range, examining log creep rate vs log stress plot in Cr-Mo steel
15 p2639 A69-30599

Chemical composition effect on Cr-Ni-Mo-Ti stainless maraging steels mechanical properties
15 p2640 A69-30631

Damping, fatigue and optimal heat treatment of Cr-Ni steel for compressor blades operating at temperatures up to 500 K
17 p2990 A69-33933

Nondestructive eddy current testing of chromium steel for early stage fatigue damage of aircraft components
18 p3136 A69-34777

Cutting loads measured as function of cutting rate and cutting tool geometry during boring of Cr-Ni steel pipe blanks
21 p3731 A69-38878

Ce, Zr, Nb and B effect on heat resistance and structure of low alloy CrMoWV steels (type CSN 41 5335/
22 p3972 A69-41079

V contents influence on high temperature strength and fine structure interrelation in low alloy CrMoWV steels
22 p3972 A69-41083

High strength austenitic Cr-Mn-Ni steel applicability to welded pressure vessels for cryogenic fluid storage, discussing operating temperature stability, weldability, etc
23 p4175 A69-41475

CHROMOSOMES

Mammalian cell survival, chromosome abnormalities and recovery from heavy ion and X ray irradiation
03 p0373 A69-13492

Three dimensional Fourier synthesis at low resolution for calculating ribosome electron density distribution in chromatoid bodies
07 p1074 A69-19394

Corneal epithelium chromosome rearrangements in gamma irradiated white adult mice, noting radiation dosage and duration
17 p2907 A69-32944

Pre and postflight leukocyte chromosome aberration analyses of Gemini astronauts
17 p2908 A69-33173

S-4 human blood experiment during Gemini 2 flight, studying spaceflight ionizing radiation interaction effects on single and multiple break chromosome aberrations
23 p4085 A69-41600

CHROMOSPHERE

Chromospheric flares photometric measurements during near minimum solar activity, discussing characteristics
01 p0149 A69-10127

Ionized calcium lines in spectra of light bridges of sunspots, observed by diffraction spectroscopy, indicating similarity to chromospheric flares
01 p0154 A69-10894

Chromospheric and photospheric solar observations made in Belgium in 1967, noting heliographic sunspot latitudes
02 p0313 A69-11533

Ionized metals emission lines intensity in chromosphere observed with coronagraph, determining hydrogen concentration
02 p0314 A69-11635

French solar research program, emphasizing protosphere-chromosphere transition zone
02 p0316 A69-11905

Coronagraphic determination of hydrogen concentration in luminescence regions of ionized metals in lower chromosphere
03 p0420 A69-13086

Solar flares effect on ozonosphere, calculating time necessary for solar radiation to increase ozone concentration by 50 percent
03 p0424 A69-13542

Solar chromosphere dark mottles size, shape and evolution, using high resolution photography near solar disk center
03 p0515 A69-14038

Chromosphere fine structure in Lyman alpha intensity, compiling isophote map
03 p0515 A69-14039

Chromospheric flare development and motion with respect to magnetic field of sunspot clusters
04 p0648 A69-14371

Time variations of chromospheric network of bright points covering solar disk in spectrograms, noting contrast and interspaces variation with 11-year solar cycle
04 p0651 A69-14372

Solar flares and sunspots number decrease near central meridian
04 p0660 A69-15040

Bright streaks in H alpha disk chromosphere, noting predominantly horizontal loop structures
04 p0664 A69-15525

High resolution H alpha line photographs of solar chromosphere, showing superpenumbra-like dark fibrils around isolated sunspots
04 p0664 A69-15526

Chromospheric /optical/ flares caused by dense material falling from corona into chromosphere
06 p0993 A69-17430

Small scale mass motions in chromospheric structures surrounding solar flare indicating changes in magnetic field
06 p0993 A69-17431

Flare-like phenomena in chromosphere, discussing moustaches, dashes and spicules and relation to changes in magnetic field
06 p0994 A69-17433

Stellar chromosphere and flare spectra observations with image tube spectrograph using Hc 10803 line, noting possible contribution to X ray background
06 p1003 A69-17449

Solar radio emissions analysis using radio telescope measurements, observing quasi-periodic LF fluctuations caused by chromospheric processes
06 p1004 A69-17535

Chromospheric velocity field temporal characteristics in quiet region of sun, determining power spectra of Doppler shifts of H alpha spectra
07 p1217 A69-19240

Three dimensional information pictures of chromospheric alpha H line using special camera attached to solar telescope diffraction grating spectrograph
07 p1217 A69-19241

Solar flare initial development model assuming high temperature chromospheric point explosion, noting subsequent expansion and large density gradient effects
07 p1205 A69-19246

Emission line formation in homogeneous chromosphere for noncoherent scattering, considering various chromosphere models
08 p1381 A69-19800

Photoelectric measurement of chromospheric heights by method requiring neither high telescopic resolution nor best seeing, discussing trials during September 1967
08 p1385 A69-20070

Synoptic charts of chromosphere, giving position and magnitude of sunspots, faculae plages and prominences during synodic revolution of sun
08 p1379 A69-20378

Spectroscopic evidence for mass loss from CH Cygni based on observations of chromospheric lines of high dispersion spectrograms
08 p1396 A69-20651

Flares and chromospheric absorption features locations compared with H alpha magnetograms, noting double emission ribbons development
09 p1579 A69-22179

Viscosity coefficients approximation for chemical compositions in chromosphere and coronal gas
09 p1602 A69-22217

Solar magnetic fields compared in chromospheric and photospheric layers using magnetograph measurements, noting correlation with solar event
10 p1762 A69-23727

Solar spectra of Mg II doublet lines during September 22, 1968 eclipse, considering chromospheric activity effects on emission peaks
11 p1958 A69-24591

Solar activity complex development based on magnetic, photospheric, chromospheric and coronal observations
11 p1964 A69-25418

Chromospheric heating and polarization in late stars, considering association with Ca II K line emission cores
13 p2340 A69-27579

Coronagraphic determination of hydrogen concentration in luminescence regions of ionized metals in lower chromosphere
14 p2433 A69-28768

Solar activity indices based on Ca II H, emphasizing index representing emission excess over chromospheric emission
14 p2525 A69-29722

Excitation sources distribution in chromosphere from observed H alpha line contour, considering resonant scattering and internal excitation
15 p2683 A69-30509

Chromospheric spicules formation, density, pressure gradient, vertical motion, velocity fluctuations and luminosity
15 p2675 A69-30551

Short period pulsations in solar magnetic fields and chromosphere, determining optimum conditions for formation of standing oscillations
15 p2688 A69-30556

Solar Mg b and Na D line spectra, computing profiles for Doppler cores of lines for multilevel model atoms and selected chromospheric parameter ranges
15 p2693 A69-30779

Thermal conductivity coefficients in solar corona and chromosphere computed and tabulated for H plasma
15 p2694 A69-30788

Center limb observations of Ca II emission core interpretations, discussing chromospheric thickness effects on Doppler width
16 p2854 A69-31653

Solar chromosphere metal abundance determined taking into account local thermodynamic equilibrium departures
16 p2855 A69-31657

Solar Ca chromospheric plage decay curves obtained from area measurements, showing similarity and exponential mean curve
16 p2859 A69-32222

Chromospheric spectrum outside of eclipse, wave lengths 3040 to 9266 A, listing emission lines taken at McMath solar telescope
16 p2861 A69-32257

Nondivergent oscillations in solar atmosphere forming normal modes or free oscillations, assuming free surface of chromosphere coronal interface and large density in convective zone
17 p3029 A69-33048

- Fine structure of 9 June 1968 solar flare related to nonflare chromosphere in active regions
17 p3024 A69-33802
- Power spectral analysis of chromospheric inhomogeneities in July 1967 and June 1968, tabulating mean heights of formation in solar atmosphere
17 p3040 A69-33811
- Chromospheric inhomogeneities rapid changing properties observable in H and K lines above sunspot umbrae
18 p3204 A69-35389
- Umbral chromosphere flashes visual and photometric observations at 5 sec intervals on K line filtergrams using Halle filter
18 p3204 A69-35390
- Photospheric radiation field role in temperature inversion of stellar chromospheres with dominant H ion opacity, postulating mechanical energy dissipation
20 p3613 A69-38173
- Chromospheric heating above sunspots by analyzing MHD wave generation and propagation in sunspots and solar atmosphere
22 p4010 A69-39992
- Statistical analysis of chromospheric flares connections with sunspots, using frequency distributions of flares occurrences in sunspot groups
22 p4001 A69-39996
- Coronal jet resulting from chromospheric burst observed during 22 September 1968 total solar eclipse
22 p4028 A69-40716
- Solar flares associated optical phenomena including filaments enhancement, destabilization and distortion, high speed ejections, explosions and loop prominences
24 p4371 A69-43607
- Solar chromospheric spicules acceleration mechanism based on magnetic field structure on supergranulation boundaries
24 p4374 A69-43635
- CHRONIC CONDITIONS**
- Increased chronic acceleration physiological effects on chickens, comparing hematological observations with exercise capacity, survival and sexual development
10 p1641 A69-23041
- Chronic acceleration effects on erythrocyte number, plasma volume, globulin fractions, erythrocyte size and plasma A/G ratio in chickens
11 p1828 A69-25458
- Single channel pressure telemetry unit with magnetic latching or RF switch for chronic implantation
23 p4100 A69-41295
- CHRONOGRAPHS**
U CHRONOMETERS
- CHRONOLOGY**
NT RADIOACTIVE AGE DETERMINATION
- Late type stars, discussing main sequence for Population 1 and Population 2 stars and ages and chemical composition of old galactic clusters and globular clusters
01 p0158 A69-11325
- Uranium in meteorites, discussing U content and isotope composition, Pb isotope ratios, radiogenic Pb, origin of matter and meteorite ages
01 p0025 A69-11369
- Galactic halo chronology determination by positron component flux measurement in primary cosmic rays
08 p1386 A69-20084
- Open clusters age determination method to study giant star distribution as function of age
08 p1388 A69-20237
- Color magnitude distribution as function of age for giant stars of open clusters, discussing error sources
08 p1388 A69-20238
- Kodaikanal iron meteorite measurements for cosmogenic rare gases and K-Ar isotopes ages for glass inclusions
09 p1596 A69-22047
- Initial Sr isotopic composition at time of planetary objects formation in solar system and precision measurements for age determination of basaltic achondrites
11 p1953 A69-24357
- Rb-Sr and other radioactive isotopes cosmochronology in solar system, analyzing age of elements and r process
11 p1955 A69-24393
- Solar system age based on decay rate of natural radioactive elements
11 p1961 A69-24972
- Lunar craters circularity measurements relation to age, discussing fracture system and stress history associated with mare formation
13 p2344 A69-27645

- Pulsar dispersion-removing technique, discussing pulsar mean flux density decrease with age
14 p2517 A69-29091
- Gaunt lunar craters, discussing lunar age and defining surface steady state
16 p2863 A69-32404
- Photoelectric photometric stellar spectroscopy for calculating metal abundance from Fraunhofer absorption lines, relating results to star age
17 p3043 A69-34140
- Rb-Sr and other radioactive isotopes cosmochronology in solar system, analyzing age of elements and r process
24 p4390 A69-43783

CHRONOMETERS

- Remote control spectrophotochronograph to study radiation of high speed high temperature processes, giving construction data and diagrams
12 p2085 A69-26161
- High speed curtain type photographic shutters testing by chronograph with phosphorescent and photographic recording, determining movement rate including acceleration and braking
12 p2093 A69-26598

CHRONOPHOTOGRAPHY

- Aerial chronophotography of Southern Hemisphere conducted on around world polar flight analyzed for meteorological and geographical aspects and compared with satellite data
09 p1534 A69-21405
- Meteorological application of ATS observations in form of time lapse movies of weather in motion, describing camera and data flow [AIAA PAPER 68-1094]
12 p2174 A69-26804
- Variable time lapse videoscintiscopes in medical applications, discussing implementation of TV camera, signal tape recording and audio activation
18 p3134 A69-34541
- Umbral chromosphere flashes visual and photometric observations at 5 sec intervals on K line filtergrams using Halle filter
18 p3204 A69-35390
- Tethered polyethylene balloon carrying radio controlled camera for time lapse photographs of wave generated near shore currents
22 p3865 A69-40808

CHRONOTRONS

- U PULSE RATE
U TIME LAG

CHUGGING

- U COMBUSTION STABILITY

CINEFLUOROGRAPHY

- U MOTION PICTURES
U RADIOGRAPHY

CINEMATOGRAPHY

- Image intensifier-vidicon closed circuit TV network for auroral cinematography at low light levels
06 p0925 A69-17382
- Optical evidence for mass motions in solar flares /1937-1967/
06 p0993 A69-17428
- Cine-holographic apparatus consisting of ruby laser and semitransparent mirror, noting capability of photographing within 10-100 nsec intervals
12 p2087 A69-26172
- Cinematic holography as continuous motion uninterrupted viewing system compared with standard cinematography, noting flicker-free shutterless reproduction
12 p2087 A69-26173
- Shadowgraph cinematography technique for testing attenuating influence of symmetrical diaphragm system on shock wave
12 p2088 A69-26184
- Ultrahigh speed cinematographic materials, discussing mirror turbines, streak and synchronized framing cameras
12 p2090 A69-26197

CINERADIOGRAPHY

- U MOTION PICTURES
U RADIOGRAPHY

CINETHEODOLITES

- Multiple frame camera with image compensation as ballistic phototherodolite
12 p2084 A69-26153

CIRCADIAN RHYTHMS

- Weak alternating electric field effects on human circadian rhythms
01 p0013 A69-10167
- Daily sleep and wakefulness periodicity changes effect on heart rate, respiration and body temperature

- diurnal rhythms in human males under isolation conditions
03 p0377 A69-14203

- Circadian rhythms disruption during long distance flights, discussing adverse effects on pilot and passenger performance
03 p0378 A69-14260

- Circadian rhythm effect between individuals of separate twin pairs, noting application to physiological research in medical genetics and human biometeorology
04 p0553 A69-15152

- Brain norepinephrine effect on daily rhythmic changes in activity of tyrosine transaminase in livers of starved adrenalectomized rats
05 p0707 A69-15582

- Rapid global transportation effect on circadian rhythmic patterns in human body functions, discussing kidney excretion and pituitary adrenal cortical system
09 p1444 A69-22545

- Circadian rhythms characteristics in humans, animals and plants, noting possible effects of rhythm disturbances on astronauts
13 p2211 A69-28614

- Circadian rhythm of optic nerve impulses in isolated eye of sea hare *Aplysia californica* in total darkness
14 p2406 A69-28870

- Constant light/darkness effects on stress response rhythm of hypothalamic-pituitary-adrenocortical system in female rats
15 p2556 A69-31330

- Light effects on circadian rhythms in monkeys, describing changes in deep body temperature and locomotor activity phase relationships
15 p2556 A69-31336

- Latent desynchronization, discussing life system and distortion, body rhythms coordination, circadian rhythms and adaptation to new system of time
15 p2557 A69-31457

- Diurnal variations in radiation sensitivity of mice and rats to irradiation with median lethal doses, noting sine curve survival function
15 p2557 A69-31458

- Alternating electric field effects on circadian rhythms in men, discussing period shortening and internal desynchronization
15 p2557 A69-31461

- Circadian rhythm in dermestid beetles *Trogoderma glabrum* Herbst as response to compulsory constant light and temperature conditions
15 p2557 A69-31469

- Long distance air flights through different time zones, discussing circadian physiological cycles, light-dark ratio shifts effects and methods of lessening desynchronization effects
16 p2745 A69-32444

- Diurnal pressure cycles found as zeitgeber to entrain body temperature endogenous circadian rhythm in pocket mice under constant environmental temperature and light
16 p2745 A69-32447

- Diurnal periodicity of physiological functions of flight crews flying through several time zones found to correspond to time zone of permanent residence
17 p2906 A69-32935

- Urinalysis of crew members of first transatlantic helicopter flight indicating interindividual endocrine-metabolic variability and circadian trends modification
19 p3263 A69-36452

- Biological clocks, discussing circadian rhythms of organisms using animal experiments and physical oscillator model
21 p3653 A69-38895

- Desynchronization and resynchronization of human circadian rhythms of activity, body temperature and urine excretion during isolation in underground bunker in various conditions
21 p3660 A69-39173

- Circadian rhythm phase shifts during ontogenesis produced by hormone concentration changes resulting from light variations
22 p3872 A69-40198

- Circadian variations in human temperature regulation, measuring peripheral and rectal temperatures and peripheral heat and arterial blood flows in clothed resting males
22 p3872 A69-40201

- Circadian rhythms characteristics of healthy human beings as reference standards for comparing investigation data from different continents
23 p4083 A69-41457

- Subjects confined in caves for two to six months to note physiological rhythms time evolution and associated desynchronization and resynchronization
23 p4107 A69-41818

Circadian rhythm in man for artificial light-dark cycles including twilight transitions and temperature rhythm
23 p4094 A69-42070

Autonomous circadian rhythm in man under complete isolation and light-dark cycles and illumination intensity changes
23 p4094 A69-42071

Circadian rhythms in nonhuman primates - Conference, Atlanta, July 1968
24 p4259 A69-42701

Constant illumination intensity effects fixed ratio lever pressing behavior for appetitive reinforcement with chimpanzee in temperature and humidity controlled environment
24 p4260 A69-42702

Bigeminus pattern in baboon social behavior, noting diurnal rhythm independence from social deprivation, light cycling and food supply
24 p4260 A69-42705

Circadian rhythm phase relationships between photoperiodism and heart rate, locomotor activity and deep body temperature/DBT/ in unrestrained monkeys
24 p4260 A69-42706

Physiological circadian rhythms in isolated and nonisolated Macaca Nemestrinas living under varied light intensities, noting telemetered deep body temperature, urine volume and sodium, etc
24 p4261 A69-42707

Nonhuman primate circadian rhythms as functions of phase shift carried out in advance or delay
24 p4261 A69-42709

Urine sampling conditions for kidney function circadian rhythm during global flight, considering food and water intake, sampling intervals and body position
24 p4266 A69-43374

Circadian periodicity of human reaction times tested during normal diurnal cycles and 24 hour wakefulness, noting acoustic and visual stimuli effects on learning
24 p4267 A69-43387

Psychophysiological effects of fatigue and correlation with somatic parameters following circadian rhythm
24 p4268 A69-43407

CIRCLES (GEOMETRY)
NT GREAT CIRCLES

Surface temperature of flat plate cooled convectively and insulated by circular spot, determining effects of spot radius and Biot number
03 p0531 A69-12863

Volterra problem with given singularities for exterior of circle applied to fluid mechanics
24 p4339 A69-42679

CIRCUIT BOARDS

Printed circuit board wiring technique for strain gage rosettes application in extensive airframe static tests
02 p0250 A69-12231

Additive processing technique for fabrication of single sided, double sided and multilayer printed circuit boards
07 p1100 A69-18621

IR evaluation of multilayer etched circuit boards, discussing testing of circuit distributive properties and individual layers
07 p1117 A69-19698

Microsoldering techniques for thin and thick film hybrid circuits and microminiature printed circuit boards
09 p1510 A69-22349

Flexible-rigid hybrid polyimide-epoxy glass multilayer board to fill gap between all flexible and all rigid circuit boards
19 p3319 A69-35545

CIRCUIT BREAKERS

Exploding wire self healing fuse feasibility demonstrated with Hg, noting dynamics of conversion of electric to mechanical energy
01 p0120 A69-10677

Plasma physics of electric arc transition from conducting plasma to insulating gas in electric circuit interruption, noting interrupter interaction with power system
12 p2133 A69-25905

Cut-in and cut-out characteristics of fast acting composite transistor circuit, noting pulse duration
13 p2235 A69-28517

CIRCUIT DIAGRAMS

Digital computer circuit design book covering requirements of circuit for digital logic and memory functions and physical properties of components
06 p0892 A69-17869

Multistage amplifier design with frequency compensation by eliminating stages in HF region
07 p1103 A69-18877

Computer aided circuit design by singular imbedding, beginning with prespecified topology and undetermined elements
07 p1115 A69-19148

Operational principles and characteristics of pulse width modulator designed on basis of autooscillator amplifier, giving circuit diagrams
10 p1664 A69-23817

Plasma diagnostics facilities design, circuit diagrams and operation based on Q switched ruby laser and optical recording system
14 p2461 A69-29782

Photometer for simultaneous stellar photometry in UVB bands, purposes and performance characteristics and circuit diagrams
16 p2790 A69-32209

Ionosonde electric circuit modified to permit radio wave absorption measurements over wide frequency range, calculating electron collision frequencies in F region
17 p2968 A69-33994

Computer program for generation of test patterns for multiterminal devices and networks
21 p3679 A69-39604

X ray scintillation spectrometers temperature stabilizing circuit, describing amplitude- frequency conversion technique for position stability
21 p3727 A69-39856

CIRCUIT PROTECTION

Energy source specifications and control techniques evaluated for microwave amplifier arrays, discussing use of common power supply and energy storage bank
01 p0047 A69-10998

Malfunction elimination in asynchronous fluidic switching circuit by locating static hazards
02 p0195 A69-12080

Pulsed radar quantum paramagnetic amplifier protection from driving pulse leakage power by transient processes
05 p0728 A69-15644

Pulsed radar quantum paramagnetic amplifier protection from driving pulse leakage power by transient processes
16 p2762 A69-32501

Overload protection guidelines for power subsystems, discussing source and protective device characteristics emphasizing spacecraft requirements
17 p2904 A69-34088

Ignition hazards in electrical circuits contaminated by glycol fluids, describing hazard detection by RF methods, decontamination procedures, safety checks, etc
19 p3359 A69-36028

Spark gap protection of input transistors in radio receivers against antenna-collected static charge damage
21 p3681 A69-38395

Gunn oscillators protection from catastrophic breakdown phenomena, using carrier velocity saturation in n-type Ge
21 p3682 A69-38777

Laser beam circuitry miniaturization facilitating laser circuit assembly isolation from thermal, mechanical and ambient changes
24 p4328 A69-43327

CIRCUIT RELIABILITY

Schmitt trigger current-voltage characteristic for determining switching behavior and switching point temperature, examining formulas and equivalent circuits
01 p0039 A69-10171

Reliability system design, emphasizing circuit design analysis, failure drifts and component failure modes by use of computer programs /ECAP, CIRC and IMAG/
04 p0608 A69-15224

Controlled transient signal distortion by shock monitoring instrumentation circuits using piezoelectric accelerometers
04 p0603 A69-15430

Semiconductor device failure modes temperature dependence, discussing bonds, metallization and packaging
06 p0894 A69-17218

Error origin and control in high gain operational amplifier in time differentiation of voltage signal used for photoemission studies
06 p0897 A69-17700

Miniature microwave tuners with solid state reliability and reduced power consumption, using YIG, mixer circuits and integrated control circuitry
07 p1102 A69-18672

Alternative balancing technique utilizing linear combination of two equal and opposite drift characteristics to minimize drift in integrated differential amplifiers
07 p1102 A69-18874

Precision monolithic circuits fabrication techniques, describing differential amplifier design incorporating emitter feedback and direct DC errors compensation
07 p1102 A69-18875

IR evaluation of multilayer etched circuit boards, discussing testing of circuit distributive properties and individual layers
07 p1117 A69-19698

Flip-flops built with complementary symmetry MOS, discussing power, noise and load stability due to n and p channel series transistors
07 p1113 A69-19766

Microcircuit components and microelectronic systems reliability assessment including short term testing, noting digital systems, packaging, production controls, etc
08 p1291 A69-20984

Microcircuits, integrated circuits and other monolithic solid state circuits failure mechanisms examined and applied to reliability methodology [AGARDOGRAPH-114]
08 p1292 A69-20987

Catastrophic failures in logic circuit and system design, considering thermal effects, complexity, statistical methods and computer use
08 p1299 A69-21107

Conventional electronic and microelectronic circuits reliability, discussing external stress effects on improvement in avionics and rocket applications
08 p1293 A69-21112

Reliability distribution parameters for electronic components, determining time and tolerance dependence of reliability
08 p1293 A69-21114

Integrated semiconductor circuits reliability in electronics and microelectronics, discussing hybrid and monolithic circuits in thin/thick film design and on Si monocrystals
08 p1294 A69-21118

Nonlinear capacitive parallel frequency converter circuit stability, using filtered circuit method
08 p1299 A69-21148

Accelerated reliability tests of electronic capacitors using voltage as main forcing factor, establishing correlations between lifetimes in accelerated and long term tests
09 p1464 A69-22244

Ruggedized ballistic range telemetry system survivability and in-flight stability after gun launching, presenting temperature, strain and stagnation point pressure measurements
10 p1654 A69-23281

Reliability function for electronic device during initial period of operation, based on use of lower bound
10 p1662 A69-23318

State probabilities of finite stochastic queueing system for calculating equipment reliability parameters
10 p1664 A69-23693

Electronic systems and component reliability in space, considering electric parameter variation effects
11 p1848 A69-24867

In-circuit diodes testing by semiautomatic low current regulated voltage test set
12 p2035 A69-25835

Computer programs for linear systems fault isolation, discussing technique theory and limitations
12 p2040 A69-26568

Tactical air navigation system redesign with integrated circuits, obtaining weight reduction and improved performance and reliability
13 p2227 A69-27389

Electric relays reliability requirements, discussing specifications, minimum current, load and frequency effects, etc
13 p2231 A69-28045

Satellite circuit assembly reliability achievement by high reliability components, redundancy and optimal utilization
15 p2624 A69-30819

Integrated circuit failure analysis in military and space applications utilizing type-test programs
15 p2624 A69-30820

Management and scientific computer reliability difference, considering circuits, component assembly, software, maintenance, etc
15 p2624 A69-30821

Reliability of integrated circuits with emphasis on errors
15 p2626 A69-30831

Third generation computer reliability including preparation and test of integrated logic circuits
15 p2626 A69-30832

Transistors and IC reliability for memory control evaluated by Concerto subprograms
15 p2627 A69-30842

Reliability of high resolution accelerometer composed of semiconductor integrated circuits
15 p2627 A69-30843

Microelectronic technology for mass production of high reliability hybrid thin film circuits
15 p2628 A69-30845

Thin film tantalum nitride resistors technology and production, evaluating projected reliability of resistance circuits as function of operating and environmental conditions
15 p2628 A69-30846

Disturbances simulation in instrumentation utilizing digital integrated circuits for reliability computation in complex circuits
15 p2628 A69-30848

Computer aided design /CAD/ of component selection for circuit optimization applied to circuit performance and sensitivity calculations
15 p2628 A69-30849

Radiology and thermography in nondestructive reliability testing of electronic equipment
15 p2610 A69-30850

Complex systems reliability, describing uses of computer programs in analysis of circuit design, component failure modes and faults due to drifts
15 p2572 A69-31042

Microwave strip transmission line, discussing evolutionary improvements, computerized design, materials, semiconductors, packaging, reliability, etc
15 p2721 A69-31074

Quality control of high volume microelectronic circuit assembly of military computer emphasizing preventive action
15 p2580 A69-31129

Integrated circuits screens, developing sequence of life and environmental tests to remove units of potential reliability hazards
15 p2580 A69-31130

Integrated circuits failure analysis in space program applications, describing electrical analog for notification, fact gathering, part analysis and corrective action functions
15 p2580 A69-31132

Metal oxide semiconductor integrated circuits, showing failure rates and degradation causes
16 p2759 A69-31851

Large scale integrated circuits reliability with emphasis on multilayer metalization, designing test vehicles for failure mechanisms
17 p2935 A69-32887

Scanning electron mirror microscope advantages over electron mirror and scanning electron microscopes for examining integrated circuits
17 p2971 A69-32891

Al interconnections discontinuities at integrated circuit contact windows observed by scanning electron microscope, noting catastrophic failure and Si presence
17 p2936 A69-32893

Test structure model for studying semiconductor-insulator interface related failure mechanisms in large scale integrated circuitry
17 p2936 A69-32894

Fluidic thrust reversal control system for turbojet achieving cost and weight reduction, illustrating fluidic circuit and noting circuit reliability
17 p3018 A69-33329

Beam lead sealed junction transistor and integrated circuits reliability, describing test conditions and failure mechanisms
18 p3145 A69-34497

Epoxy encapsulated transistors reliability, data from long term maximum rated life and accelerated tests
18 p3145 A69-34498

Wave soldering reliability and cost saving potential in miniature circuits manufacture for aerospace applications, noting process control and machine design relationship
18 p3146 A69-34512

Computer program and component part models for nonlinear DC circuit simulation at various temperatures
18 p3108 A69-34525

Integrated circuits failure analysis techniques utilizing pin-to-pin curve tracer tests and thermal measurements
19 p3282 A69-35786

Failure mechanisms and analyses of large scale integrated circuits based on bipolar and MOS transistors, describing measurement and probing techniques
19 p3282 A69-35787

Intermediate level mathematical reliability model relating failure mechanism, part strength and interaction of application stresses to parts failure rates, with emphasis on microcircuits
19 p3283 A69-36019

Microelectronics and IC process and quality control check list including conductor screening, resistor abraiding and discrete part attachment
19 p3283 A69-36020

MOS arrays failure mechanisms, discussing oxide defects, contamination and metal migration due to mode of operation and fabrication techniques
21 p3684 A69-39605

Flexible circuitry for reliable spaceborne data processing equipment electronic packaging
22 p3903 A69-39951

Hybrid microelectronic circuit failure mechanisms for thick and thin film resistors, conductors and capacitors, noting packaging contributions
22 p3910 A69-39954

Failure analysis of corrosion products in hybrid thin film circuits, discussing detection technique, instrumentation and results
22 p3911 A69-39955

Wire, flip-chip and beam-lead bonding processes effects on hybrid microcircuits reliability
22 p3911 A69-39956

Stability boundaries of discrete circuits employing delay lines with forward and feedback links, deriving equations
22 p3918 A69-40957

Ultrasonic oscillations effects on magnetic permeability of ferrite circuit components
23 p4138 A69-41873

Electromagnetic compatibility /EMC/ filter design and test methods to achieve effectiveness and reliability, emphasizing transfer impedance characteristics
23 p4142 A69-42233

Phase-pulse multistable circuit reliability improvement by additional negative feedback increasing parametric variation tolerance, feeding voltages and temperature
23 p4143 A69-42338

Active Ni centers properties in Si with emphasis on increasing and reducing minority carrier lifetime in silicon integrated circuits, discussing energy levels
24 p4360 A69-42759

Soviet collection of papers on electric circuits and electromagnetic systems
01 p0046 A69-10744

Active circuit analysis by state variable method, defining state vector as set of voltages between nodes and reference node
03 p0410 A69-13831

Electrical circuits time domain analysis, describing method for computer solution of circuit equations
05 p0737 A69-15766

Circuit and system theory - Conference, University of Illinois, October 1968
06 p0901 A69-17394

Shunted resonators on transmission line with asymmetrical response offering selectivity from resonance frequency standpoint
08 p1271 A69-19917

Sine wave oscillator circuits and performance prediction for NERO thrust measurement test stand
08 p1300 A69-20155

Pulsed ultrasonic flaw detectors resolving power enhancement by shunting semiconductor diodes across piezoelectric elements of scanning heads to shorten scan pulse duration
18 p3137 A69-35112

GABA shunt contribution to total metabolism of alpha ketoglutarate to succinate and high pressure O effect on system under in vitro conditions
22 p3877 A69-40776

CIRCULAR CONES

Mach number effects on pattern of vortex flow past delta wing and circular cones at various Reynolds numbers
06 p0858 A69-17339

Three dimensional laminar boundary layer near windward generator of cone subjected to uniform mass transfer by suction or injection
11 p1874 A69-25281

Supersonic combustible gas mixture flow around circular cone, discussing ignition by shock wave and flow modification by conical flame front
15 p2548 A69-31007

Flow measurements about high Mach number low Reynolds number laminar wake behind spherically blunted cones, including surface and wake flow field data, radial wake profiles, etc
17 p2894 A69-33500

HF radar scattering by finite circular cone as function of frequency and aspect angle using modified diffraction pattern theory
20 p3495 A69-37849

N strip algorithm of integral relations to analyze flow around circular cone at incidence in supersonic flow
20 p3460 A69-38128

Fluid mechanical structure of laminar hypersonic wake behind sharp circular cone, investigating flow field at zero angle of attack and adiabatic wall temperature
24 p4247 A69-43576

CIRCULAR CYLINDERS

Circular, cylindrical thin walled shell dynamic response to moving shock solved by Flugge equations in series form
01 p0164 A69-10057

Simultaneous partial integro-differential equations governing natural vibrations of arbitrary cross section cylindrical tubes, suggesting Fourier series solution
01 p0164 A69-10065

Unsteady heat flow in finite composite hollow circular cylinder using inverse method of eigenfunction expansion /method of finite integral transformation/
01 p0175 A69-10230

Convective heat transfer across fluid film limited by right sections of two parallel circular hollow steel cylinders
01 p0176 A69-11135

Transverse curvature effect on skin friction and heat transfer in laminar flows past slender circular cylinders
02 p0232 A69-12210

Diffraction of cylindrical and plane waves in system of two parallel circular cylinders, using equivalent circuit method
02 p0217 A69-12261

Plane inhomogeneous thermal stress in isotropic elastic circular infinitely long cylinder produced by plane unsteady temperature distribution
02 p0349 A69-12826

Three dimensional unsteady heat conduction and temperature distributions in finite hollow circular cylinder under time dependent boundary conditions of second kind
03 p0530 A69-12861

HF approximations, discussing plane wave diffraction by conducting circular cylinder using Watson transform
03 p0384 A69-12903

Stresses in circular cylindrical shell subjected to local heating
03 p0523 A69-12952

Unreinforced circular cutouts effects on buckling behavior of circular cylindrical shells under axial compression, using photoelastic plastic shells
03 p0523 A69-12988

Creep buckling of circular cylindrical shells under axial compression and bending, using Al alloy test specimens

03 p0523 A69-12995

Heat input influence on hypersonic flows past sphere and circular cylinder
[DVL-844]

03 p0364 A69-13663

Submerged rigid circular cylinder displacement under influence of plane acoustic pressure wave solved by operational method

04 p0667 A69-14261

Directional properties of electric vibrator positioned at reflecting circular cylinder, discussing radiation patterns and cylindrical wave diffraction

04 p0574 A69-14459

Kinematic and dynamic relations determined for vortex flow of ideal incompressible fluid past circular cylinder, noting use for calibrating cylindrical adapters

04 p0541 A69-14484

Flow field of impulsively started circular cylinder, noting drag due to nonlinear convection

04 p0544 A69-14897

Steady flows of incompressible viscous fluid exterior or interior to circular cylinder

04 p0589 A69-14898

Dielectric waveguide propagation, impedance and attenuation characteristics and insertion loss and launching efficiency of mode transducer

04 p0577 A69-14971

Steady longitudinal motion of insulating cylinder in conducting fluid, discussing analog between steady MHD and acoustic scattering

04 p0638 A69-15192

Boundary layer flow of viscous incompressible liquid past wedge embedded circular cylinder

04 p0590 A69-15276

Local pressure and skin friction distribution around circular cylinder in cross flow in large range of Reynolds numbers

05 p0744 A69-15716

Tangential stress distribution and heat transfer in circular cylinder with attached wall jet

05 p0746 A69-16022

Liquid rise in partially filled circular cylinder with free surface accelerated from rest to constant angular velocity

[ASME PAPER 68-FE-13]

05 p0747 A69-16065

Circular cylinder near wake in cross flow measured with hot-wire anemometry for various Reynolds numbers, noting data processing on digital computer

[ASME PAPER 68-FE-5]

05 p0747 A69-16068

Lift and drag coefficients for circular cylinder immersed in time dependent flow analyzed using potential flow model

[ASME PAPER 68-FE-15]

05 p0747 A69-16072

Unsteady potential flow and wake near oscillating circular cylinder noting velocity, pressure and correlation measurements

[ASME PAPER 68-WA/FE-23]

05 p0749 A69-16099

Unsteady supersonic flow around thin circular cylinder representing rocket stage, calculating flutter and response to random environment

[ONERA-TP-666]

06 p0857 A69-17098

Inviscid incompressible fluid flow stability against helical disturbances in circular cylinder

06 p0910 A69-17332

Laminar near wake flow field of two dimensional adiabatic circular cylinder with surface mass transfer

[AIAA PAPER 69-67]

06 p0862 A69-18044

Approximate solution for hollow circular cylinder with fixed ends under axial displacement and cylindrical surfaces free from traction, using boundary layer technique

07 p1230 A69-18265

Strouhal and Reynolds numbers relation from data on vortex streets of circular cylinder in two dimensional flow

07 p1119 A69-18749

Nonaxisymmetric temperature field of unbounded hollow cylinder with moving heating boundary, expanding surface temperature into Fourier series

07 p1241 A69-18924

Short cylinder of perfectly plastic Coulomb yield conditions compressed between rigid plates, discussing cylinder-plate interface frictions, angles of internal friction and cohesion

08 p1410 A69-19890

Boundary layer separation and vortex street buildup conditions of gas flow in circular cylinder wake

08 p1252 A69-20713

Steady motion through rarefied gas of circular cylinder due to surface temperature difference

08 p1305 A69-20888

Dynamic response of anisotropic circular cylinders to uniformly distributed pressure varying periodically with time analyzed using Laplace transformation

09 p1611 A69-21440

Three dimensional vibration analysis of circular homogeneous elastic cylinder, obtaining differential equations and zero stress conditions

09 p1612 A69-21601

Three dimensional analysis of torsional vibrations of circular elastic homogeneous cylinder, stressing new torsional vibrations

09 p1612 A69-21603

Plane thermal stress field in discontinuous temperature distribution within isotropic linear elastic circular cylinder of infinite length

10 p1793 A69-22884

Antiplane strain model for describing cracks and dislocation arrays within circular cylindrical inhomogeneity surrounded by elastic material

10 p1803 A69-24031

Numerical solutions for incompressible Newtonian flow around circular cylinder for various Reynolds numbers

11 p1867 A69-24279

Thin walled circular cylinders postbuckling behavior and stability under axial compression calculated for design loads

11 p1979 A69-24816

Radiation pattern of axial slot on circular conducting cylinder based on wedge diffraction and creeping wave theory

11 p1836 A69-24993

Maximum stress under bending for thin walled circular cylindrical shell stiffened with uniform stringers

11 p1987 A69-25380

Skin friction drag coefficient for right circular cylinder calculation coefficient on basis of Blasius solution for flow

11 p1819 A69-25384

Thermal stresses in hollow finite circular cylinder having smooth rigid insulating cover on curved surfaces and temperature distribution on plane ends

12 p2180 A69-26268

Torsion in composite inhomogeneous circular cylinder, obtaining solutions for elastic displacements and stresses

12 p2180 A69-26274

Hollow circular viscoelastic cylinder axisymmetric plain strain problem, considering displacement, traction and mixed boundary conditions, noting applicability to rocket solid fuel core

12 p2181 A69-26396

Monograph on shell calculations by linear three dimensional elasticity theory, relating displacements and stresses

12 p2188 A69-26902

Thermoelastic waves in stretched circular cylindrical bar, analyzing displacements, secondary pressure and temperature field by using Frobenius method

12 p2189 A69-27115

Minimum volume face sheet design of circular cylindrical sandwich shell obeying Mises yield criterion for loads transverse to lateral surface and axisymmetric

12 p2189 A69-27117

Dynamic response of imperfect circular cylinder to constant velocity load, noting applicability of Hoff nonlinear equation for dynamic buckling of columns

13 p2359 A69-27260

Viscous heat conducting compressible fluid response to abrupt change in circular cylinder angular velocity at stable temperature distribution, considering Boussinesq approximation

13 p2245 A69-27378

Self controlled vibration of elastically supported cylinder in fluid stream due to von Karman shedding, considering fluidelastic interaction, structural deformation and natural frequency

13 p2360 A69-27437

Guided waves in circular cylindrical radially inhomogeneous medium, using vector theory based on Maxwell equations

13 p2221 A69-28062

Stresses in infinite solid elastic circular cylinder due to rotating line source of heat

13 p2364 A69-28206

Loitsianski method of parametric approximation extended to include flat plate with constant surface suction and flow past circular cylinder

13 p2249 A69-28247

Directional properties of electric vibrator positioned at reflecting circular cylinder, discussing radiation patterns and cylindrical wave diffraction

14 p2418 A69-28830

Vibrations of thick walled shallow circular cylinder with thickness change in time, applying dynamic elasticity and Volterra equations

14 p2533 A69-28985

Axisymmetric impact of circular cylindrical plates, obtaining two dimensional dynamic stress distributions for materials of linear elastic compressibility and plastic behavior in shear

14 p2534 A69-29027

Creep strain rate and stress distribution of thick walled cylinders under internal pressure at elevated temperature, using variational principle

15 p2703 A69-30070

Periodic radial heat flux in infinite cylinder with varying heat sources, assuming time variable heat exchange on surface

15 p2717 A69-30575

Thick walled pressurized cylinder fatigue test results compared with axial tension and rotating beam tests on same material

15 p2709 A69-30676

Surface displacements at end of elastic semiinfinite circular cylinders due to annular axisymmetric loading, employing Boussinesq solution

15 p2711 A69-30872

Thermoelastic stresses in isotropic circular cylinder with surface locally heated by external Newtonian heat source, considering various heat transfer conditions

15 p2714 A69-31178

Thermal stresses in circular cylinder with regularly distributed cavities, establishing distribution laws for temperatures and stresses

15 p2714 A69-31196

Prebuckling deformations influence on circular cylindrical shell buckling under external pressure, applying Galerkin method to Donnell equations

16 p2872 A69-31905

Incompressible attached wall jet /Coanda flow/ over circular cylinder with finite incompressible injection normal to surface

16 p2772 A69-32148

Electromagnetic field eigenvalues along conductive circular cylinder in magnetoionic medium, assuming lossless medium and field frequency not equal to cyclotron frequency

16 p2754 A69-32568

Backscattered impulse response waveforms of conducting circular cylinder for broadside incidence utilizing Fourier synthesis

17 p2917 A69-32918

Two dimensional incompressible flow past circular cylinder at moderate Reynolds number, reducing partial differential equations of motion by series truncation for flow field

17 p2896 A69-33600

Asymptotic solutions for vector fields and propagation constants of axial modes in circular cylindrical waveguides, noting changes in dielectric constant

17 p2921 A69-33673

Stress level reduction in pressurized circular cylinder with circumferential ring stiffener and longitudinal crack, using shallow shell equations

18 p3212 A69-34347

Secondary vortex generation in near wake of circular cylinders under forced oscillation, analyzing motion dependent transition regimes using hydrogen bubbles flow visualization

[AIAA PAPER 69-755]

18 p3084 A69-34411

Vortex wakes behind circular cylinder subject to transverse sinusoidal oscillations in uniform water flow at specific Reynolds numbers, photographing varied frequency flow patterns

18 p3086 A69-35169

Fluctuating heat transfer and flow measurements for circular cylinder in crossflow with simultaneously imposed transverse standing sound field

18 p3124 A69-35384

Hypersonic rarefied gas flow past flat plate with sharp leading edge and past circular cylinder, noting wake structure similarity to viscous theory prediction

19 p3294 A69-35755

Plasma density and potential distributions along circular cylinder surface in weakly ionized high speed low pressure gas flow, noting boundary layer separation point

19 p3380 A69-35839

Canonical forms for three dimensional diffraction problem of elastic harmonic waves propagating along circular cylinders infinite array

19 p3437 A69-36144

Nonlinear shell theory for thin elastic circular cylinders, obtaining equations for investigating equilibrium configurations of postbuckled states

19 p3440 A69-36636

- Transition in near wake, from study of base pressure on circular cylinders in incompressible flow
19 p3242 A69-36809
- Mach reflection limiting parameters of conical shock wave in Plexiglas cylinders, showing head wave curvature radius linear relationship to cylinder diameter
19 p3302 A69-36845
- Stress distribution in finite and semifinite solid cylinders under end normal load, using Fourier-Bessel series
20 p3621 A69-37199
- Roshko correlation for estimating vortex shedding from circular cylinder in sheared flow with velocity in Strouhal and Reynolds numbers
20 p3515 A69-37228
- Load carrying capacity of orthotropic circular cylindrical shell under uniformly distributed normal load, considering edge support conditions
20 p3629 A69-38075
- Field patterns, propagation constants and losses determined for axially propagating modes guided by circular cylindrical inhomogeneous dielectric, using perturbation method
20 p3497 A69-38130
- Narrow band vortex shedding from circular cylinder in critical Reynolds number range, noting increase in Strouhal number
21 p3644 A69-38690
- One dimensional spectra of turbulent wakes behind circular cylinders, discussing isotropy, anisotropy and Reynolds number
21 p3693 A69-38705
- Circular cylindrical freely supported shell moment state stability, solving critical parameters by infinite matrix eigenvalues determination
21 p3835 A69-38724
- Deformation of circular cylindrical shell of varying thickness, obtaining differential equation solutions through multiple scales method
21 p3837 A69-39159
- Postbuckling of filled circular cylindrical shell using Ritz energy method for load deformation relation, discussing stabilizing effect of core
22 p4038 A69-39895
- Buckling strength prediction for circular cylindrical shells reinforced by circumferential and longitudinal stiffeners, solving torsional buckling of orthotropic shells under internal pressure
22 p4042 A69-40171
- Forced convection heat transfer coefficient for fully developed turbulent flow in circular tube with time-varying circumferential heat flux
22 p4051 A69-40921
- Closed circular cylindrical shell stability and oscillations under ring-shaped axial load, defining stress-strain state by radial displacements and force function
22 p4049 A69-41280
- Inflation effect on circular cylindrical cantilever beam subsequent response to bending loads, using theory of small deformations superimposed on large deformations
23 p4227 A69-41881
- Semiempirical stability boundary for flutter of simply supported cylinders for various length-radius and radius-thickness ratios
23 p4228 A69-41914
- Beam wave propagation in conducting hollow circular cylinder applied to shielding cylinders design for aperture antenna transmission
24 p4282 A69-42987
- Transverse acoustic wave excitation of elastic circular cylindrical sandwich shell submerged in infinite fluid medium, describing simultaneous equations development for modal response
[ASME PAPER 69-APMW-17]
24 p4401 A69-43100
- Vortex shedding from circular cylinders rotating normal to free stream velocity, studying roles of rotation rate and Reynolds number
24 p4248 A69-43601
- CIRCULAR ORBITS**
NT STATIONARY ORBITS
- Particle moving in circular orbit perpendicular to axis of cylindrically symmetric magnetic field
01 p0120 A69-10816
- Near circular satellite orbits evolution taking into account gravitational fields zonal harmonics effect on motion
01 p0157 A69-11304
- Optimal circular satellite orbits for planetary surface mapping mission minimizing overlap
03 p0518 A69-14247
- Satellite nonlinear spatial oscillations about center of mass during circular orbit, using perturbation theory and analog computer
04 p0665 A69-14270
- Minimum fuel rendezvous maneuver for two space vehicles in circular orbit, considering propelled tracking equipment nonlinear equations of motion
05 p0823 A69-16036
- Nonlinear equations of motion for rendezvous in circular orbits, pursuer using minimum fuel and pursued having no propulsion
06 p1014 A69-17571
- Braking and acceleration speeds and maximum magnitude during transfer from circular orbit having earth center as focus to elliptical orbit within circular orbit
06 p1007 A69-17578
- Perturbation method in rectangular coordinates based on motions of Galilean satellites of Jupiter applied to nearly circular orbits of quasi-resonant systems
08 p1390 A69-20275
- Circular satellite orbit calculation from incomplete observations of one orbital pass
09 p1589 A69-21373
- Optimal rendezvous between satellite and spacecraft, determining power and time optimal coplanar rendezvous in circular orbit
09 p1538 A69-21759
- Periodic motion of satellite with magnetic damper along circular orbit, assuming small value of damping coefficient
09 p1609 A69-21761
- Circumpolar satellite orbits under lunar and solar perturbations based on two fixed centers problem, considering large amplitude disturbances
10 p1780 A69-23616
- Optimal interorbital transfers between closely spaced nearly circular noncoplanar orbits, taking into account active section length for low power thrusts
10 p1783 A69-23712
- Numerical solution for changing satellite orientation within circular orbit plane by applying force of onboard flywheel
10 p1792 A69-24194
- Plane planetary orbits construction extended to nearly circular and quasi-plane orbits by generalizing perturbations method to problems in space
15 p2690 A69-30622
- Rendezvous maneuver with minimum fuel in circular orbit solved without restrictive conditions for accelerations due to approach thrust
16 p2852 A69-31558
- Stability of steady circular motions in systems with hidden variables analyzed by using Lejeune-Dirichlet theorem
16 p2804 A69-31621
- Electrically propelled TV satellite control maneuvers to reach target position in synchronous circular orbit from spiral ascent trajectory
16 p2868 A69-31935
- Flywheels desaturated by magnetic action for optimizing stabilization system of satellite in circular orbit [ONERA-TP-732]
17 p3049 A69-33241
- Steady motion stability of satellite gyroscope in Cardan suspension traveling along circular orbit in Newtonian central force field
18 p3135 A69-34585
- Minimum fuel guidance from hyperbolic into specified circular orbit
19 p3367 A69-35663
- Minimum impulse transfer between circular and nearby noncoplanar elliptic orbit, applying Pontryagin principle
19 p3400 A69-35675
- Vehicles optimal flights with controlled or boundary level thrust in circular orbit neighborhood, using linearized equations of motion
19 p3427 A69-36612
- Optimal landing of spacecraft on moon surface from low circular orbit, analyzing rocket thrust, altitude and landing site distance effect on spacecraft mass
19 p3431 A69-36616
- Stability of periodic orbits in elliptic restricted three body problem
[AAS PAPER 68-086]
20 p3595 A69-37172
- Near-polar circular orbiting satellite for calibrating and evaluating ground-based radars observing space objects
20 p3617 A69-37714
- Automatic stationkeeping/geosynchronization/for maintaining satellite in circular synchronous orbit at all geocentric longitudes for prolonged time with low fuel consumption
21 p3805 A69-39213
- Trajectory optimization of second state of rocket launched into earth circular orbit in gravitational field by stepwise fuel control, using Pontryagin maximum principle
21 p3829 A69-39818
- Closed form solution to stability of coupled libration motion of slender axisymmetric satellite in circular orbit limited to small amplitude vibrations
22 p4008 A69-39936
- Optimal pulsed orbital transfer between close nearly circular orbits in central field of gravity realized by geometrical solution
22 p4033 A69-41085
- Nonlinear longitudinal dynamics of lifting orbital vehicle in near circular orbit, considering translational motion components effecting orbital decay or dilatation
[AAS PAPER 69-244]
24 p4392 A69-42857
- CIRCULAR PLATES**
- Variable thickness circular annular disk bending in centrifugal force field, establishing dependence between angular velocity and axial pressure intensity
01 p0168 A69-10401
- Torsional oscillations of elastic half space set up by rigid circular disk examined by integral equation method
01 p0169 A69-10809
- Strain rate effect of large deflections of clamped circular viscoplastic plates subject to rigid mass impact
02 p0349 A69-12798
- Large finite deflections of clamped thin elastic circular plate subject to transverse concentrated load at center solved by power series
04 p0675 A69-14596
- Circular disk stress-strain state due to thermoelastic strain applied at disk sector edge
04 p0681 A69-15171
- Elastic strain and stress in ribbed circular plate bent skew-symmetrically, using orthotropic plates theory
04 p0681 A69-15172
- Symmetrical bending of laterally loaded circular micropolar plates
04 p0682 A69-15291
- Circular plate elastic stability under unidirectional compression, using Rayleigh-Ritz-Timoshenko method to determine buckling load
04 p0683 A69-15515
- Displacement, distortions and unit stresses in rotating circular disk under plane strain
05 p0835 A69-15807
- Geometry changes influence on rigid plastic circular plate behavior under two independent distributed pressures
06 p1023 A69-17508
- Governing equations for bending of fixed isotropic circular sandwich plate subjected to eccentric concentrated load
09 p1615 A69-21926
- Natural vibration frequency of circular orthotropic plate with variable rigidity
09 p1618 A69-22238
- Flexible circular plate on elastic support connected at free edge, noting stress independent of working load
09 p1618 A69-22239
- Limit loads for circular and annular plates of smoothly varying profile under uniformly distributed transverse loads
11 p1982 A69-24946
- Liapunov type analysis of linear structural dynamic system excited by stochastic parametric load, discussing radially loaded thin circular plates
11 p1990 A69-25507
- Rigid plastic circular and annular plates dynamics taking into account yield point dependence on strain rate
12 p2177 A69-25994
- Torsional flow of incompressible anisotropic fluid between parallel circular plates rotating with constant angular velocity, showing resemblance to shear flow
12 p2062 A69-26277
- Thermal shock temperature distribution and thermal stresses in finite circular disk subjected to instantaneous point heat source
13 p2363 A69-28130
- Stress-strain state of circular annular plate with varying thickness subjected to concentrated axisymmetric load and shearing force applied to internal perimeter
13 p2369 A69-28563
- Axisymmetric impact of circular cylindrical plates, obtaining two dimensional dynamic stress distributions for materials of linear elastic compressibility and plastic behavior in shear
14 p2534 A69-29027
- Incompressible viscous fluid steady motion caused by rotating ellipsoid, determining drag moments for circular disk and sphere
14 p2432 A69-29627

Finite integral transform determination for solving circular plates forced vibrations with time dependent conditions
15 p2704 A69-30306

Circular curved foil steady oscillations near screen in semiinfinite space filled with incompressible fluid transformed into equivalent linearized problem
15 p2547 A69-30576

Stress-strain state of circular disk with diametral cracks determined by approximating limiting equilibrium equation
15 p2708 A69-30663

Clamped circular plates impulse load tests with sheet explosives, showing finite difference program for computing large deflection dynamic response
15 p2709 A69-30675

Transient behavior of finite damped cantilever beam and circular plate analyzed by direct finite element method, noting applicability to dynamic problems
15 p2710 A69-30868

Thermal stresses and displacements in isotropic inhomogeneous rotating circular disk with axle hole under steady temperature field
15 p2712 A69-31016

Extensional vibration of thin inhomogeneous circular plate with variable modulus of elasticity and central hole, calculating periods of vibration
15 p2713 A69-31026

Load carrying capacity of circular plates under axisymmetric load
16 p2875 A69-32289

Temperature field, strains and stresses induced in thin circular disk by unsteady heat source, noting time effect and resonant vibrations
17 p3054 A69-33021

Stress-strain state determination for axisymmetric shells applied to design of circular/annular plates and rotating disks
17 p3057 A69-33194

Axisymmetric bending oscillations of thin circular plates of constant thickness with allowance for energy dissipation in material, analyzing resonance and phase amplitude characteristics
17 p3064 A69-33919

Von Karman equations in dimensionless and finite difference forms for deflections of elastic circular plate with central hole under load solved by iteration [ASME PAPER 69-APM-20]
18 p3214 A69-34395

Stress conditions of anisotropic plate with soldered in circular isotropic aluminum disk in presence of notches at seam, assuming elastic symmetry of plate
18 p3218 A69-34602

Free oscillations of rigidly clamped circular plate carrying concentrated masses, deriving frequency equation and value of lower roots
18 p3226 A69-35377

Safety disk strength under static lateral pressure from rupture studies of thin circular plates under static and pulsating lateral pressure
19 p3434 A69-35773

Force on circular plate near screen due to incident potential incompressible jet flow
19 p3297 A69-35816

Variational method for computer calculation of supercritical bending of thermoelastic uniformly loaded circular plates, determining Ritz parameter influence on accuracy
19 p3434 A69-35829

Residual deformation of elastoplastically bent thin circular plate after perfect unloading from large deflection, considering equilibrium and compatibility conditions
19 p3438 A69-36306

Vibrating circular plate standing wave lateral displacements visualization by photographically recorded moire patterns
20 p3537 A69-37067

Buckling of eccentrically stiffened thin circular elastic plate under circumferential uniform compression, obtaining equations and critical loads
20 p3622 A69-37221

Heat transfer coefficient and flow patterns of horizontal circular plate for various Rayleigh numbers, noting surface temperature
20 p3632 A69-37523

Stress and displacement in thin circular plates of ductile materials under axisymmetric loading predicted by nonlinear analysis
20 p3628 A69-37787

Axisymmetric vibrations of thin drums consisting of circular cylindrical shell and two circular end plates
20 p3629 A69-38114

Stress analysis of circular elastic plate buckling under radial compression, noting Kirchhoff hypothesis influence on critical value of thickness-to-radius ratio
21 p3834 A69-38722

Flexible circular plate in stationary temperature field calculated for stress-strain state using perturbations method
21 p3835 A69-38830

Bending of circular plate into shell, using stress-strain relation in finite strain, solving differential equations and boundary conditions
21 p3836 A69-39005

Deformation of uniformly thick elastic circular plates containing circular holes reinforced by thin rigid elastic rings
21 p3846 A69-39713

Dynamic stability of circular isotropic plate with central hole subjected to torsional moment uniformly distributed over both edges by equilibrium equation
22 p4043 A69-40455

Stress-strain state of circular disks with arbitrarily varying thickness along radius under antisymmetrical load calculated by integral equations method
22 p4047 A69-41168

Ambartsumian deflection theory applied to asymmetric bending problem for transversely isotropic circular plates
22 p4049 A69-41278

Stress concentrations in circular plate with square hole subject to triaxial tension
23 p4227 A69-41712

Differential equations of motion and associated boundary condition for axisymmetric flexural vibration of cylindrically aeolotropic circular plate, using variational calculus
23 p4228 A69-41911

Deflections of heated circular plates with or without concentric circular hole and with different boundary conditions and temperature distributions
23 p4234 A69-42412

Three layered circular plate under harmonic excitation, analyzing forced vibrational characteristics by variational principle and Ritz method
23 p4236 A69-42495

Forced symmetrical vibrations of circular elastic plate analyzed by applying Gaussian hypergeometric, Legendre functions and Jacobi polynomial
24 p4397 A69-42746

Circular plates axisymmetric nonlinear bending, using variational method to derive equilibrium equations and boundary conditions
24 p4399 A69-42989

Transverse shear influence on circular plates small displacement theory determined from coupled linear partial differential equations of plates
24 p4405 A69-43655

Large deflections of circular air mat plates consisting of inflatable structures of two membranes connected by inextensible cords network
24 p4405 A69-43688

CIRCULAR POLARIZATION

Nonlinear interaction of steady state circularly polarized electromagnetic wave with cold plasma in constant longitudinal magnetic field
03 p0476 A69-13381

Balanced symmetrical four arm conical equiangular spiral antenna providing omnidirectional circularly polarized radiation pattern in azimuthal plane
03 p0404 A69-13471

Rayleigh scattering from circularly birefringent media generalized for medium with no preferred internal axes
04 p0609 A69-14291

Reciprocal latching ferrite phase shifters application to lightweight scamed phased arrays, noting quasi-circularly polarized modes with lowest insertion loss
04 p0572 A69-14320

Polarization tensor variation due to Faraday effect and differential absorption of ordinary and extraordinary waves for radiation propagating in magnetoactive cosmic plasma
05 p0805 A69-16650

Circularly polarized waveguide mode simulation for multislot leaky waveguide harmonic content measurement
07 p1105 A69-19046

Focal antennas and receivers of Nancy radio telescope to measure flux density and incoming waves polarization, noting circular polarization in quasars
08 p1392 A69-20567

Gas laser frequency stabilization by coupled oppositely circularly polarized components of single cavity mode in axial magnetic field
08 p1327 A69-21090

Charged particles concentration change during vertical propagation of acoustic wave in F layer found transforming electric field into circularly polarized wave
09 p1484 A69-21528

Plasma ions turbulent heating during electron-acoustic instability in field of circularly polarized electromagnetic wave at ion cyclotron frequency
10 p1728 A69-23137

Transverse waves induced by disk oscillations about state of steady rotation in MHD, revealing circularly polarized waves with different phase velocities
10 p1728 A69-23239

Type 3 solar flare circular and linear polarization at 23.5 MHz frequency
11 p1945 A69-24244

Anisotropic plasma density measurement by launching circularly polarized plane electromagnetic wave at small angles to magnetic field direction
11 p1930 A69-25286

Circular polarization of solar microwave radio emission in Southern and Northern Hemispheres due to solar magnetic field
13 p2326 A69-27550

Relativistic electrons synchrotron radiation by calculating magnetoactive plasma permittivity tensor, determining normal waves polarization characteristics
13 p2315 A69-28451

Vela pulsar PSR 0833-45 optical observations and Crab pulsar NP 0532 linear and circular polarization measurements by telescope- photomultiplier
13 p2354 A69-28470

Charged particles concentration change during vertical propagation of acoustic wave in F layer found transforming electric field into circularly polarized wave
16 p2783 A69-32523

Circular polarization in moving type 4 burst compared to stationary type 4 burst and related to preceding type 2 sources
17 p3024 A69-33806

Complex refractive index profiles and wave polarizations calculated for electromagnetic waves transmission through ionosphere at micropulsation frequencies
17 p2927 A69-33864

Circular polarization measurements of compact radio sources at 1420 MHz, finding no detectable polarization
20 p3606 A69-37831

Solar Zeeman triplet for excited atomic state comparable to or shorter than Larmor precession period, discussing polarization
22 p4019 A69-40287

Circularly polarized VHF antenna systems for spin stabilized satellites, discussing design and performance test results
22 p3913 A69-40695

Circular or linear polarization diversity reception for VHF earth-station-satellite communications through turbulent ionosphere, assuming Rayleigh distribution fading
23 p4115 A69-41585

Simple antenna with good circular polarization over wide space sector, showing geometry, normalized orthogonal field distributions and beamwidth range, considering slot combinations
23 p4137 A69-41590

Parabolic antenna properties generated by dual band circularly polarized focused two channel monopulse feed system, discussing tracking data from helicopter, Apollo 8 and Cassiopeia A
23 p4120 A69-41752

Radar return from clutter target with circular polarization, finding probability density functions and cumulative distributions of power ratio
23 p4131 A69-42540

CIRCULAR SHELLS

Multilayered shells equivalence to single layer shells for stress analysis, vibrations and stability
02 p0346 A69-12509

Circular cylindrical isotropic shell deformation rate under dynamic axial load described by second order linear differential equation
04 p0673 A69-14499

Optimal design of circular cylindrical sandwich shells under pressure and shear loads, showing acceptability of small shear coefficient values
08 p1416 A69-20722

Large uniform torsion of thin walled open section of circular cross section, deriving tube radius contraction observed in experiments
10 p1794 A69-22930

Free vibrations in axisymmetrically loaded orthotropic circular conical shells with longitudinal and circumferential stiffening based on linearized theory, considering shear deformation and inertia
11 p1969 A69-24327

- Semiinfinite circular cylindrical shell buckling under axial load, computing forces, moments and displacements by thin shell equation
11 p1979 A69-24818
- Inplane and rotary inertia effects on free vibration frequencies of circular cylindrical shells eccentrically stiffened by orthogonal set of stringers and/or rings
11 p1992 A69-25520
- Imperfection surface effect on buckling load of circular cylindrical shell under axial compression, locating limit points of postbuckled states
13 p2362 A69-28122
- Stressed state of cylindrical circular shell clamped at edges and subjected to concentrated radial forces
13 p2368 A69-28322
- Free vibrations of thin truncated circular conical shell and reinforcing rings and stringers, determining resonant frequencies for stiffened and unstiffened configurations
17 p3051 A69-32955
- Axisymmetrical vibration characteristics of circular sandwich shell with viscoelastic core layer analyzed via differential equation to obtain frequency equation and composite loss factors
18 p3211 A69-34327
- Circular cylindrical shell nonlinear response to uniform radial impulsive pressure, noting inextensionality constraint and equations of motion roles [ASME PAPER 69-APM-26]
18 p3214 A69-34399
- Nonlinear equations for elastic strain of circular-toroidal membrane shell under uniform pressure, computing stress and displacement fields
18 p3216 A69-34575
- Free vibrational characteristics of thin walled circular cylindrical shells with layers of anisotropic elastic material laminated about middle surface
20 p3627 A69-37767
- Stability of free and clamped spherical and circular cylindrical shells subjected to uniform or nonuniform heating, discussing effects of temperature stresses
21 p3838 A69-39190
- Infinite systems of algebraic equations in periodic problems for spherical shells with circular holes approximated by reduction method
23 p4227 A69-41706
- Creep stress analysis of circular cylindrical shells under axisymmetric loading, plotting stresses and deformations for various parameters
23 p4233 A69-42352
- Flexural vibrations of rectangular cross sectioned rings, solving characteristic value problem for finite circular cylindrical shell
24 p4404 A69-43629
- CIRCULAR TUBES**
- Steady state temperature distribution in heat generating fluid in plug flow in circular tube with arbitrary inlet and wall temperature distribution
03 p0530 A69-12862
- Thin curved circular tube under in-plane bending [ASME PAPER 68-PVP-12]
03 p0523 A69-12999
- Small twist of elastic circular cylindrical tube with nonorthogonal laminar acoloptropy, noting zero and nonzero warping conditions effects
05 p0831 A69-15580
- Laminar flow heat transfer of viscous incompressible fluid in entrance region of circular tube, using nonlinear equations
10 p1809 A69-23195
- Three dimensional compressible potential flow in curved circular duct analyzed by perturbation method
11 p1867 A69-24607
- Finite difference method for heat transfer for developing laminar flow at inlet of circular uniformly heated and isothermal tube, determining Nusselt number
12 p2062 A69-26242
- Turbulent flow in circular tube and parallel plate channel, considering molecular viscosity and duct shear stress variation
13 p2248 A69-28131
- Oscillation in resonance tubes excited by subsonic jet, analyzing pressure and frequency for small Mach numbers by using wave diagram
13 p2370 A69-28630
- Displacement of liquid by insoluble liquid from horizontal circular tube during laminar flow, analyzing flow characteristics
14 p2431 A69-29607
- NonNewtonian power law fluids flow behavior in circular pipe entry region, taking into account energy loss due to viscous dissipation in boundary layer
19 p3240 A69-36472

- Isotherms location in simple nonconstant area/diverging/ tube configuration investigated for heat transfer
20 p3632 A69-37219
- Fluid velocity in starting flow in circular tube using Laplace transform
22 p3931 A69-40688
- Stress analysis of cylindrical tubes under torsional and transverse static loads based on vibrational theory, applied to rectangular cantilever tube
23 p4228 A69-41916
- Uncoupled torsional vibrations of simply supported open cylindrical tubes analyzed by approximation equations, considering free edge boundary conditions
23 p4233 A69-42347
- Flexural vibrations of simply supported lipped I section of cylindrical tubes, considering free- edge boundary conditions
23 p4233 A69-42350
- Peristaltic pumping in circular cylindrical tube, discussing viscous fluid flow induced by axisymmetric traveling sinusoidal wave imposed on flexible tube wall [ASME PAPER 69-APMW-3]
24 p4275 A69-43108

CIRCULATION

- Circulator power splitting and isolating function in integrated microwave network
02 p0222 A69-12475
- Broadbanding of S-band three port stripline circulator, discussing effect of tuning and mode suppressor screws
03 p0404 A69-13472
- H plane waveguide Y circulators engineering design based on circulation equations
04 p0575 A69-14460
- Recirculator with sign variable feedback coefficient for delay line passband increase
04 p0575 A69-14464
- Ferrite Y junction E plane circulator for airborne high power X band radar
07 p1100 A69-18639
- Band three port Y junction stripline circulator with triangular ferrite
08 p1286 A69-20838
- Miniaturized E-Tee three port circulator with wide bandwidth, noting negligible effect of static field small variations on performance
08 p1291 A69-20980
- Y-circulators specified, measured and calculated values correlated as function of leakage matrix elements and terminating dipoles reflection
09 p1473 A69-22114
- Waveguide Y circulator electrodynamic parameters by design algorithm and computer programs
10 p1661 A69-23108
- Microstrip circulator size reduction attained by tight inductive ferrite coupling for incorporation with microwave integrated circuits
13 p2230 A69-27679
- H plane waveguide Y circulators engineering design based on circulation equations
14 p2418 A69-28831
- Mathematical relations for ring laser beams polarization conditions, using slanted isotropic plate and phase circulator to separate polarization plane
20 p3553 A69-37606
- Small losses measurement in circulators and reciprocal quadrupoles, using scattering matrix to eliminate mismatch errors
22 p3875 A69-40259
- Waveguide Y-circulator parameters thermal stability equation, considering temperature, magnetization level and magnetic field resonance effects on tuning frequency
23 p4123 A69-41951

CIRCULATORY SYSTEM

- NT AORTA
- NT ARTERIES
- NT BLOOD VESSELS
- NT CAPILLARIES [ANATOMY]
- NT VASCULAR SYSTEM
- NT VEINS

- Orthostatic intolerance, with assessment of circulatory problem of weightlessness in prolonged space flight
06 p0873 A69-17016
- Analog computer modeling of human systemic arterial tree, based on lump parameter circuit approximation
07 p1072 A69-19727
- Brief intense thermal stresses effects on cardiovascular system of man, noting criticality of effective blood volume for circulatory competence
08 p1264 A69-20668
- Psychic stress effect on physiological parameters of helicopter pilots during critical flight situations, considering biotelemetric examination of heart and circulatory systems
11 p1829 A69-24347
- Dynamic stability of two degrees of freedom circulatory systems with bilinear hysteresis damping
13 p2363 A69-28127
- Human circulatory reactions to cumulative flight vegetative stimuli evaluated by cumulative stress simulation method
24 p4266 A69-43375
- High intensity and short duration acceleration effects on human beings, discussing mechanical resistance of spinal column and circulatory aspects
24 p4266 A69-43380

CIRCUMLUNAR TRAJECTORIES

- Soviet probe Zond 5 circumlunar flight to recover space vehicles from interplanetary paths
06 p1003 A69-17389
- Reentry trajectories from lunar surface and orbit obtained by computer with allowance for initial data spread
09 p1594 A69-21756
- Earth-moon and moon-earth trajectory parameters related to lunar orbit conditions for synthesizing lunar orbit trajectory
18 p3196 A69-34704

CIRRUS CLOUDS

- Jet stream cirrus radiative characteristics from airborne IR measurements, noting cirrus cloud emission and transmission and cirrus height and temperature estimates
01 p0110 A69-10694
- Cirrus IR radiance model for explaining measured cloud radiance characteristics, considering thermal emission and irradiance scattering
01 p0111 A69-10848
- Aircraft high level cloud data to estimate vertical distribution of cirriform clouds and tropical tropopause levels on airline routes
03 p0458 A69-13032
- Wind vector in respect to orientation of large scale cirrus bands based on stereophotogrammetry and radar observations
08 p1346 A69-20442
- High altitude radiant emittance of cirrus clouds and cloudless sky for IR transmissivity based on aircraft measurements
09 p1536 A69-21641
- Tenuous cirrus cloud influence on 6.4-6.9 micron Nimbus 2 water observations, discussing equivalent black body temperatures correspondence to cloud and clear areas
12 p2075 A69-27003
- Far IR angular scattering observations as diagnostic tool to examine microstructure of high altitude cirrus clouds
18 p3126 A69-34281
- Cirrus clouds occurrence, position and wind velocities on jetstream axes based on statistical analysis of aerological data and satellite TV pictures
19 p3366 A69-36669
- Cirrus cloud height above sea level and shape correlation with lower section static stability determined by stereophotogrammetric measurements
20 p3570 A69-37349
- EOLE constant level balloon flights in troposphere, discussing short lifetime due to overloading with ice in dense cirrus cloud
21 p3646 A69-38373

CISLUNAR SPACE

- Secular change examination in cislunar geomagnetic tail field gradient during summers of 1966 and 1967, using Explorer 33 and 35 results
01 p0077 A69-11237
- Cumulative flux of interplanetary and cislunar space dust particles by Mariner 4 and OGO 3 spacecraft, noting particle impact rate
15 p2699 A69-31394

European highly eccentric orbit satellite /HEOS/ cislunar probe to explore interplanetary space for magnetic fields, cosmic radiation, solar wind and earth shock wave
17 p3050 A69-33397

CITIES

Remote sensing of urban environments for metropolitan information systems noting photographic, thermal IR, radar and microwave applications
12 p2193 A69-27012

Air transport development relationship to city regional planning, including analysis of Heathrow airport design
19 p3296 A69-36850

Metropolitan downtown airports for STOL and VTOL aircraft stressing Los Angeles Metroport [SAE PAPER 690402]
23 p4147 A69-41660

Intercity air transportation compared with automobile and train travel, attributing air travel dead time to ground route and airspace congestion
24 p4416 A69-42561

Intercity travel demands simulation by linear graph model applied to Windsor-Montreal corridor [AAS PAPER 69-382]
24 p4417 A69-42805

Public policy for urban transportation system, using calculus of variations to determine optimal introduction curve
24 p4417 A69-42809

Demand curves for VTOL intercity transportation, discussing conventional helicopters, compound helicopters, tilt rotor, tilt wing, stored rotor and fan or jet lift
24 p4254 A69-43721

CIVIL AVIATION

Airline crew training, requalification, recurrent, upgrading and aircraft transition training for crew and pilot
01 p0019 A69-10450

Space techniques for application to civil aviation, discussing air to ground communications, air traffic monitoring and navigation and weather forecasting by satellite
[UN PAPER 68-95349]
01 p0179 A69-10490

Satellites and ocean platforms for civil aviation operations over North Atlantic, noting cost justification dependence on supersonic traffic increase
[UN PAPER 68-95887]
01 p0113 A69-10521

Head-Up Display /HUD/ flight information applied to civil aviation, noting operational safety improvement and pilot work load reduction
01 p0020 A69-10635

Boeing 747 characteristics for passenger and cargo service noting economic gain, operational performance, control cabin, engine, etc
[AIAA PAPER 67-397]
01 p0010 A69-10636

Analytical reliability ratio to operational reliability for airborne equipment taking into account electrical and thermal aspects
01 p0011 A69-11069

Air traffic control at Los Angeles International Airport, discussing simultaneous parallel ILS approaches and departures and STOL problems
01 p0057 A69-11356

Interim radar improvement program for air route traffic control centers pending development of automated terminal radar programs
01 p0114 A69-11357

Inertial navigation for commercial aircraft, discussing Sagem-Ferranti and Litton systems
02 p0278 A69-12239

Exterior arresting devices for commercial aircraft full scale tests
03 p0367 A69-14104

Synchronous extractor for simultaneous extraction and association of primary and secondary radar videos in civil system, discussing automatic identification process
05 p0721 A69-16592

NASA civil aviation electronics research program, discussing feasibility of V/STOL aircraft all-weather operations
05 p0850 A69-16718

Accident prevention and investigation procedures of National Transportation Safety Board /NTSB/, discussing management patterns
06 p1041 A69-16842

International problems of air traffic control, discussing legal and political basis for organization and ATC liability
06 p1042 A69-16846

Air carrier legal responsibility for commercial air safety as compared to liability in other transportation modes
06 p1042 A69-16847

Aviation industry passenger liability, discussing negligence litigation, compensation standards and roles of government, manufacturers and courts
06 p1042 A69-16851

Automatic air traffic control systems design, development and application to civil and military aviation
06 p0955 A69-17858

Air navigation and economics, discussing air traffic control and traffic density effects on fuel consumption and engine life
07 p1052 A69-18661

Nondemographic model predicting market shares of V/STOL aircraft in competition with automobiles and conventional airliners for short haul intercity business travel markets
07 p1244 A69-18967

General aviation accidents and hazards presented by drugs, ethyl alcohol, pesticides and carbon monoxide
07 p1068 A69-19435

Future commercial VTOL transportation, considering technical, political and socio-economic problems [AIAA PAPER 69-198]
07 p1056 A69-19567

Nondestructive testing methods for civilian transport aircraft production, overhaul and maintenance
07 p1143 A69-19702

STOL and V/STOL role in eliminating air traffic congestion at U.S. and West European airports and in short haul and municipal routes
08 p1254 A69-20093

National tasks in civil aeronautical research and development noting technological and social factors
08 p1422 A69-20171

STOL aircraft intercity test flights emphasizing curved ILS approach, using onboard computer for altitude and distance data
08 p1347 A69-20602

Civil aviation statistical data and airport planning
10 p1634 A69-23601

Airport operation and administration, discussing supply, costs, tariffs, etc
10 p1811 A69-23602

V/STOL aircraft performance characteristics related to civil aviation operations and certification requirements [ICAS PAPER 68-05]
11 p1822 A69-24463

Anticing for all-weather operation of business jets, discussing atmospheric conditions, ice formations, prevention and removal systems [SAE PAPER 690333]
11 p1822 A69-24500

Comparative evaluation of avionic installations in design stage, detailing parameters for civil aeronautical use
11 p1887 A69-25212

Aircraft engines future specifications as affected by expanding market, noting speed requirements and thrusts
11 p1942 A69-25215

Air transport prediction for West Europe by 1980
11 p2004 A69-25216

Aeromedical investigation of civil aircraft accidents by National Transportation Safety Board, noting post-mortem legal aspects and need for human factors investigation
12 p2021 A69-25840

Civil aircraft accident investigation, discussing organization and procedures of Bureau of Aviation Safety of National Transportation Safety Board
12 p2191 A69-25844

Aircraft hijacking prevention through technical and legal means, discussing national and international air piracy laws
13 p2381 A69-27528

Aircraft accident investigation procedures in Canada for routine/major accidents and public inquiries, outlining organization
13 p2201 A69-27540

Civilian transport aircraft operation realities vs theoretical performance certification
14 p2392 A69-29698

Civil airports design standards development noting advisory circulars
15 p2588 A69-30408

Air transportation problems in connection with rapid aviation growth noting crisis in near future
15 p2720 A69-30588

Rescue locator beacons and airborne search equipment of VHF and UHF capabilities available to international civil aircraft operations
15 p2552 A69-30852

Secondary radar system chosen by EUROCONTROL Agency for civil air traffic control at Shannon and Brussels airports
15 p2571 A69-31501

Book on competition in North Atlantic commercial air transport covering passengers, freight and mail from supply, demand and market point of view
16 p2881 A69-31866

Ground facilities long term planning, considering factors to determine air transport growth and changing commercial aviation pattern
16 p2766 A69-32020

Civil aircraft requirements from 1975 onward, discussing classes, categories and R and D
16 p2882 A69-32022

Aerodynamic problems in future civil aircraft design, emphasizing Concorde development possibilities, discussing VTOL intercity transport, subsonic swept wing and hypersonic aircraft, all-wing airbus, etc
16 p2732 A69-32023

Civil aircraft projected development regarding materials and structures, discussing new components and fuel contribution to weight and metals and composites for replacing Al
16 p2872 A69-32024

Book on soviet An-24 aircraft-construction and exploitation covering fuselage, powerplant, controls, fire prevention, air conditioning, maintenance, etc
16 p2735 A69-32112

FAA jurisdictional procedures for law infringement, discussing civil codes, delegation of enforcement authority and routine violations including low flying, weather, etc
16 p2882 A69-32335

CAB decisions regarding subsidy reduction, carrier mergers, and dense route certification requiring improved clarity and timeliness
16 p2882 A69-32336

Communist China civil aviation, discussing major, local and international routes and agreements, aircraft types and national origin, total mileage, etc
16 p2882 A69-32337

Airworthiness objectives for civil powered lift aircraft, discussing safety, traffic growth and accident rates
17 p2897 A69-33211

Civil transport aircraft power plant and auxiliary systems as sources of delays, presenting critical path analysis
17 p2898 A69-33213

Flying offenses committed by private and professional pilots in Great Britain, discussing role of authorities involved
17 p3077 A69-34202

Edwards Inquiry Report into British Civil Air Transport based on cost effective economic study, involving airlines and regulatory system
18 p3231 A69-34311

Soviet efforts to market civil aviation equipment in West
18 p3232 A69-34538

Tupolev Tu-154 three jet transport featuring automatic flight control system with inertial and Doppler navigation inputs, low speed wing devices
18 p3092 A69-34933

Aerospace technology application to commercial avionic system for cost effectiveness in functions expansion, phase-over, installation, maintenance and operation, discussing added information functions
18 p3108 A69-35069

Flight and piloting influence on morbidity of civil aviation personnel, noting incidence of enteric, hemorrhoidal and respiratory diseases
18 p3098 A69-35303

Los Angeles International Airport development planning, discussing airfield improvement, tunnel reconstruction, terminal layouts, parking, roads and access, etc
[AIAA PAPER 69-806]
19 p3288 A69-35590

Civil aviation center for R and D in aviation personnel education and training [AIAA PAPER 69-785]
19 p3453 A69-35597

Air travel and population growth requiring larger structures for office buildings, airport passenger terminals and aircraft servicing facilities [AIAA PAPER 69-809]
19 p3289 A69-35622

Airport facilities planning for conventional jet, STOL and SST aircraft ground handling, stressing facilities economy and transportation subsystems [AIAA PAPER 69-808]
19 p3289 A69-35623

General aviation missions in national transportation system /1968, 1975, 1980/, considering fuel taxes, overall system economics, ground facilities, etc [AIAA PAPER 69-818]
19 p3453 A69-35624

Light rigid civil aircraft response to continuous atmospheric turbulence estimated using two rigid body degrees of freedom method for vertical and lateral gusts [AIAA PAPER 69-766]
19 p3433 A69-35657

Legal liability in civil aviation, proposing international treaty 19 p3454 A69-35980

Air cushion vehicle legal status and cargo and passenger liability 19 p3455 A69-36330

Airworthiness certification of civil aircraft, discussing international cooperation on inspection, accident investigation, etc 19 p3456 A69-36688

VSTOL and conventional transport aircraft compared for short haul air transport services 20 p3461 A69-37281

Subsonic civil air transport navigation systems, discussing flight routes redistribution across North Atlantic to meet increased traffic 20 p3574 A69-37417

Monograph on low visibility landing in civil aviation, considering visibility determination methods and equipment and IR sighting devices 20 p3574 A69-38064

Cabin personnel occupational strain in civil aviation, relating heart rate to aerobic power while working during flight 21 p3665 A69-39180

RB 202 self contained lift fan engine design for high speed interurban civil VTOL operations, considering weight, cost, noise and fuel consumption 22 p3862 A69-39933

Turbofan engine influence on civil transport aircraft design as function of thrust, discussing engine ratings, number of engines, APU and thrust engine 22 p3862 A69-39961

Accident prevention program of Bureau of Aviation Safety, discussing probable cause analysis and function in feedback loop, hazard analysis and accident data center 22 p3867 A69-41140

Book on law making in International Civil Aviation Organization covering membership problems, air navigation and transport safety, settling of disputes, etc 23 p4240 A69-41297

Airport terminal planning, considering expansion, automation, backup measures, layout problems and solutions, etc [SAE PAPER 690399] 23 p4147 A69-41661

Civil pilots medical certification after head trauma, evaluating current methods efficiency 23 p4086 A69-41687

Sud commercial aircraft /1970-1980/, discussing market trends, airport saturation, Airbus power plants and seating capacities 24 p4416 A69-42563

Operational and economical aspects of V/STOL air transportation reevaluated for civil aviation promotion [AHS PAPER 69-325] 24 p4418 A69-42870

Food-borne diseases prevention in civil aviation, reporting gastroenteritis cases during flight 24 p4278 A69-43392

CL- 84 AIRCRAFT

Technological evolution of turboprop propeller powered tilt wing V/STOL aircraft, discussing XC-142A, CL-84 and VZ-2 aircraft 05 p0701 A69-15564

CX-84 two propeller tilt wing deflected slipstream V/STOL Military Evaluation Program related to support of surface forces [AHS PAPER 351] 17 p2900 A69-33526

Canadair CL-84 two propeller V/STOL utility tilt wing vehicle development program and flight tests to assess military potential of aircraft 17 p3077 A69-34065

CL-595 HELICOPTER

U XH-51 HELICOPTER

CLADDING

Explosive welding application to dissimilar metals and tube to tube plate welding, noting influence of detonation and sound bulk velocity 04 p0608 A69-15481

Exposure tests of corrosion resistant claddings for high strength Al alloys protection, finding higher purity alloy cladding superiority 19 p3322 A69-35571

Stainless steel cladding of metals to combine desirable properties into composite, describing bonding, product types and treatment 21 p3745 A69-38937

CLAIMING

Sonic boom damage legal claims, discussing causal relationship validity and claims processing 14 p2541 A69-29155

CLAMPS

End constraints and length/width ratio influence on composites off axis tensile tests, considering rigid clamping with/without end rotation 13 p2286 A69-28667

Scale factor determination for energy dissipation at clamped ends, analyzing geometric parameter and clamping force effect on oscillation damping constant 17 p3065 A69-33927

Clamping and sealing fastener for single direction installation consisting of pin, collar and sealing collar with insert 22 p3957 A69-40831

CLARK Y AIRFOIL

U AIRFOIL PROFILES

CLASSICAL MECHANICS

NT ASTRODYNAMICS
NT CELESTIAL MECHANICS
NT KEPLER LAWS
NT ORBITAL MECHANICS
NT SPACE MECHANICS

Equations of motion for kinematics of complex mechanisms, noting methods and relations 01 p0115 A69-10165

Keplerian motion parameters second derivatives determined from initial conditions by deriving differential equations 01 p0107 A69-11305

Trouton-Noble experiment to detect motion of earth through ether by electromagnetic torque on charged suspended parallel plate capacitor, explaining null results 03 p0517 A69-14106

Bound motion for particle in point electric dipole field, noting features of motion common to spherical pendulum motion 03 p0473 A69-14109

Book on theory of kinetic equations covering classical mechanics, Liouville equation and distribution functions, kinetic equations relation to fluid dynamics, KBG equations, etc 07 p1180 A69-18411

Statistical theory of fluids in equilibrium based on correlation functions for pair interactions between constituent molecules, invoking superposition closure approximation 08 p1350 A69-19868

Coherence theory of electromagnetic field from classical/wave/ or quantum /particle/ standpoint, stressing information theory 11 p1915 A69-24455

Test particle classical dynamics in closed expanding universe, discussing Newtonian inertial mass decrease and canonical methods for determining momentum, velocity and energy 11 p1920 A69-25561

Monograph on gasdynamics and classical theory of shock waves covering viscosity, heat conduction, gas cloud expansion into vacuum, etc 13 p2246 A69-27639

Nonholonomic coupling effect on mechanical system stabilization characteristics in terms of generalized coordinates 14 p2482 A69-28814

Invariants method and applications in classical and relativistic physics emphasizing theory of relativity, physical and mathematical theories relations and group theory applications 14 p2484 A69-28860

Book on deformable bodies mechanics covering load resisting members of structures and machines 18 p3222 A69-34927

Celestial mechanics, Part 1, covering almost periodic functions, relation to classical astronomy and modern mathematics, implicit function theorem, three body problem, etc 18 p3199 A69-34928

Paradox of incoming photons detection at two antennas without interference pattern disturbance explained by classical and quantum physics 20 p3538 A69-37415

Information categories concept defined in relation to formulations of classical mechanics principles, considering theories of Newton, Gauss and Hertz 20 p3576 A69-37585

Cavity Q dependence of intensity of single mode He-Ne laser above threshold for quantum and semiclassical theories 22 p3961 A69-40415

Planck law for black body radiation spectrum theoretically derived on basis of classical Lorentz-invariant electromagnetic radiation at absolute zero temperature without quantum assumption 22 p3982 A69-41001

Thermal average derived with classical path treatment for line broadening theories of gases or plasmas 23 p4192 A69-41378

CLASSIFICATIONS

NT DICHOTOMIES
NT HIERARCHIES
NT INDEXES [DOCUMENTATION]

Subject classification bibliography for thermal contact resistance [ASME PAPER 68-WA/HT-18] 05 p0847 A69-16122

Sunspot group classifications made at Zurich and Catania during 19th solar cycle compared to determine seeing influence 05 p0826 A69-16388

Feature selection in pattern recognition, discussing techniques, crop classification problem and parametric multiclass pattern recognition 06 p0892 A69-17396

Stieltjes transform relating initial boundary value problems for partial differential equations of various classifications 08 p1342 A69-20352

Spontaneous decomposition of image space into compact sets /images or classes/ using adaptive dispersion method to reduce system learning time 11 p1859 A69-24964

Rocket propulsion devices classifications, discussing energy sources, propellants, performance, space vehicle applications, liquid propellant rockets, engines, selection criteria and cooling methods 11 p1943 A69-25587

Spectroscopy and star classification on basis of spectra 12 p2155 A69-26122

Cometary tails maximum lengths compared with orbit parameters and absolute magnitudes, proposing classification scheme 15 p2689 A69-30566

Two dimensional spectral classifications for bright A stars including magnitudes and colors 16 p2860 A69-32233

Giant galaxy classified in terms of stellar population, discussing Orion, intermediate amorphous and combination categories 16 p2862 A69-32395

BCD classification for cepheids, discussing /sigma/ surface definition, locus of normal stars of population I and interstellar reddening 17 p3038 A69-33725

Periodic motions in single mass impact vibration system by point transformations method, noting complexity characteristics 18 p3172 A69-34565

Classification of synoptic processes, discussing condensation of parameters characterizing state of atmosphere 18 p3166 A69-34815

Quantitative analysis and classification of stony meteorites, including carbonaceous chondrites, by Mossbauer characteristics, discussing Prior plot and weather influence role in finds and falls 19 p3408 A69-36083

C3 and C4 carbonaceous chondrites origin, evolution and classification based on mineralogic and petrologic data 19 p3413 A69-36109

Iron meteorites genetic classification based on parent body cooling rate and Ga-Ge trace element content 19 p3416 A69-36129

Chemical classification of iron meteorites with Ge concentrations between 80 and 200 ppm, reporting concentrations of Ge, Ni, Ga and Ir 20 p3602 A69-37537

Ba titanate modifiers, classifying cations replacing Ti and Ba ions 22 p3996 A69-41161

Personnel training and selection systems, applying information processing models to diagnostic testing in job classification for performance improvement 24 p4274 A69-43020

CLASSIFYING

Adaptive pattern recognition, discussing classification techniques and merging into other aspects of artificial intelligence research 07 p1088 A69-18381

Unitary sorting influence on reliability of planar transistors subjected to irradiation recovery cycles and scaled stresses 15 p2626 A69-30834

Nonparametric partitioning algorithm for pattern classification, discussing pattern recognition, classifiers structure, real data applications, etc 24 p4285 A69-43062

CLEAN ROOMS

Control and sampling in sterile rooms, noting worker introduction of contaminants

05 p0714 A69-15953

High bay clean room design with laminar air flow, discussing air filtration, sound attenuation, construction, illumination, etc

10 p1673 A69-23354

Avionics clean room workshops, discussing turbulent and laminar flow rooms and contamination monitoring of controlled environment facility

16 p2767 A69-32369

Electrostatic control for portable clean rooms, describing fabrication, assembly and checkout problems with Instrument Unit /IU/ control center for Saturn launch vehicles

19 p3428 A69-35550

CLEANERS

U AIR FILTERS

CLEANLINESS

Pollution control forecast, contamination control specialist and systems approach

08 p1265 A69-19808

Hydraulic fluid cleanliness measured using microscopy, automatic particle counters and gravimetrics, discussing silting index and evaluator used by aerospace industry

19 p3256 A69-36715

CLEAR AIR TURBULENCE

Correlation between CAT and thermal gradient increase at standard isobaric levels found to be potential forecasting tool

02 p0275 A69-11818

Wind gust simulation procedures, discussing high altitude clear air turbulence and simulation of air perturbations

03 p0461 A69-13647

Correlations at regional scale between clear air turbulence aircraft observation, Richardson number and wind intensity and direction at flight level

03 p0462 A69-13966

Stratospheric critical clear atmospheric turbulence at midlatitudes, noting applications to supersonic aircraft design

06 p0950 A69-17789

Aircraft reports of clear air turbulence over North Atlantic, discussing jet stream proximity and large amplitude ridge associated with occlusion point

08 p1345 A69-19885

Disturbed index of refraction scattering cross sections and aircraft acceleration increments for clear air turbulence, deriving correlation for measurements

10 p1656 A69-23651

Aircraft reports of high level turbulence on European and Atlantic routes, noting rapid changes in large scale flow pattern occurring locally

12 p2127 A69-26901

Airborne scanning spectrometer for IR detection of clear air turbulence, presenting flight records

12 p2098 A69-26999

Airborne IR spectrometer for remote clear air turbulence detection, noting necessity for mirror stabilization in pitch axis

12 p2098 A69-27000

Radar application to meteorology, entomology and ornithology, discussing clear air turbulence detection and flight tracking of birds and insects

12 p2034 A69-27004

Radar echoes observed from clear atmosphere, discussing scattering mechanisms of thin stable inversions, convective thermals, Benard convection cells, breaking gravity waves, etc

14 p2415 A69-29518

Qualitative analysis of CAT parameters from radio sounding data, noting mean bumpiness probability dependence on Richardson number and wind vector shift

14 p2474 A69-29735

Synoptic criteria combined with qualitative criteria for CAT diagnostics from analysis of turbulent zones responsible for bumpiness in upper troposphere

14 p2474 A69-29736

Stratospheric turbulence producing bumpiness up to 18 km developing at levels characterized by abrupt changes in vertical temperature gradients

14 p2474 A69-29737

Probability diagnosis and prognosis for buffeting zones based on Bayes formula, determining clear air turbulence zones

15 p2648 A69-30645

Wind velocity fluctuations calculation in CAT based on closed equations numerical solution for turbulent layers in upper troposphere

15 p2649 A69-30649

Atmospheric turbulence in cloudless region above thunderstorms and relation between turbulence and radar pictures of storms

15 p2649 A69-31211

Boeing 747 problems including noise and automatic landings in CAT-II conditions

16 p2734 A69-31631

Clear air turbulence and detection - Conference, Seattle, August 1968

17 p2998 A69-33732

Clear air turbulence uninfluenced by mesoscale disturbances or terrain, discussing relationship between density profile curvature and heat and momentum transfer

17 p2998 A69-33733

Meteorological analysis of stratospheric clear air turbulence flights, discussing vertical temperature structure in terms of wave motion and turbulence intensity

17 p2999 A69-33736

Gust probes in model of low altitude atmospheric turbulence during USAF research program LO-LOCAT, plotting relationship between peak count distribution curves

17 p2999 A69-33737

Lee waves and orographic wind phenomena in Rocky Mountains near Boulder, noting stratospheric standing gravity waves and turbulence sampled by HI-CAT U-2

17 p2999 A69-33738

Temperature profiles and associated wind profiles obtained with Jimsphere/FPS-16 radar system at Cape Kennedy, discussing remote CAT detector assessment

17 p2999 A69-33739

Centrifugation effects on body composition and growth of mice

17 p2910 A69-33746

Energy dissipation near tropopause determined from measured clear air turbulence spectra and probabilities

19 p3303 A69-36407

High altitude CAT regions length distribution determined from level flight path sampling data correlation

20 p3570 A69-37168

Vertical wind shears, structure functions, turbulence and power spectra for transverse velocity fluctuations in troposphere and stratosphere, noting clear air turbulence

20 p3570 A69-37506

Radar observations of convective pattern types in clear atmosphere consisting of thermal- and Benard-like convection cells

20 p3573 A69-38059

Clear air turbulence computerized analysis and forecast over U.S. using upper air rawinsondes measurements

22 p3976 A69-39927

Clear air turbulence /CAT/ causes effect on aircraft control, discussing monitoring device and aircraft position maintenance under CAT conditions

22 p3977 A69-40007

Air traffic safety enhanced through flight crew awareness of hazards, clear air turbulence detection and avoidance, collision avoidance, etc

22 p3868 A69-41151

Clear air turbulence detection in troposphere by multifrequency radiometric sensor, noting multibeam system for supersonic aircraft

23 p4144 A69-42536

Wavelike structure observed near tropopause with sensitive radar system, suggesting clear air turbulence as cause of breakdown of gravitational wave

24 p4342 A69-42893

Simultaneous lower atmosphere clear air turbulence analysis by multiwavelength radar, jet aircraft and special rawinsondes

24 p4342 A69-42894

Clear air turbulence in upper atmosphere and in mountain waves, discussing density variations

24 p4343 A69-42913

CLEARANCES

Radial clearance influence on self lubricating porous bearing friction coefficient and oil losses as function of operation duration

16 p2794 A69-32067

CLEAVAGE

Microscopic cleavage strength of high nitrogen steel notched bars determined from critical tensile stress criteria using elastoplastic analysis method

01 p0169 A69-10765

Electrostatic charge distribution on ultrahigh vacuum cleaved silicates including instrumentation, UV irradiation, half life, Paschen relation, etc

13 p2322 A69-28018

Cleavage plane in stress corrosion cracking of alpha phase Ti-Al alloys

13 p2283 A69-28189

High strength titanium alloys subcritical stress corrosion crack propagation, studying stress and environment effects on cleavage mode

19 p3343 A69-35922

Metallographic analysis of stress corrosion cracking of Ti alloys of Al and Sn in aqueous magnesium chloride solutions, noting cleavage process

19 p3352 A69-36903

CLIFFS

Relative heights on moon, tabulating lunar topography and comparing micrometrical measurements and map data

10 p1782 A69-23697

CLIMATE

Climatic factors affecting pilot vision and contributing to misjudgement during landing procedures, noting effect of downward slope in runway approach

06 p0884 A69-18036

European pilots accustomed to equatorial climate tested during regular flying missions, discussing heat effects on urinary steroids

12 p2024 A69-26560

CLIMATOLOGY

NT BIOCLIMATOLOGY

NT MICROCLIMATOLOGY

Daily insolation observations at Blue Hill, Massachusetts, correlated by month with observations of temperature, snow cover, winds, sunshine, sky cover, pressure and precipitation

01 p0066 A69-10862

Correlations at regional scale between clear air turbulence aircraft observation, Richardson number and wind intensity and direction at flight level

03 p0462 A69-13966

Soviet book on aeronautical climatology covering methodology of climatologic indices useful for airfields, pilots and flight routes evaluation

04 p0627 A69-14935

Sensible and latent heat meridional transport associated with standing eddies computed from climatic mean data

04 p0627 A69-15085

Eole program to further data acquisition for climatology and weather forecasting [UN PAPER 68-95831]

06 p0950 A69-17073

Meteorological data for flight path climatologies, analyzing annual frequency distribution of maximum wind velocities

09 p1535 A69-21519

One and two dimensional frequency distributions for probability estimates of climatological quantities, discussing temperature and interdiurnal changes

09 p1535 A69-21520

Cartographic representation methods in climatological regional charts, discussing topographical elements, scale, screen patterns and area color

12 p2124 A69-25893

Ocean circulation as climate regulator, discussing role in redistributing climate-changing energy input from solar radiation or lunar tidal friction into atmosphere

12 p2067 A69-26333

Ballistically effective atmospheric parameters for rocket vehicle design manuals involving application of climatological concepts of meteorology

12 p2175 A69-26874

Soviet collection of papers on aviation climatology covering cloud covers, tropopause characteristics, icing conditions, etc

12 p2127 A69-26898

Complex climatological cloud profiles structural characteristics along given air traffic routes prepared for practical aviation problems

12 p2127 A69-26899

Westerly air flow frequency decline resulting in lower seasonal temperatures, tabulating Lamb categories daily maximum and minimum temperatures

13 p2222 A69-28474

Climatic environments development for physiological studies, considering ambient temperature, radiated heat and air velocity and movement

13 p2215 A69-28594

Helicopter climatic testing, discussing component, systems and field tests and facilities

14 p2427 A69-29505

Hydrodynamic theory of climate and atmospheric circulation, emphasizing numerical experiments role in studying large scale processes

14 p2476 A69-29819

Time spectra of wind velocity, temperature, pressure and turbulent heat transfer and momentum in synoptic region
14 p2476 A69-29823

Climate studies with allowance for radiative heat inputs, constructing nonadiabatic motions model for improving prognosis
14 p2477 A69-29827

Earth orography influence on climatological distribution of wind and geopotential fields, stressing central asiatic mountains role in atmospheric circulation
14 p2478 A69-29835

Functional relations expressing short wave radiation absorption and scattering in atmosphere
15 p2648 A69-30222

Ozone soundings data obtained over Australia and Colorado to obtain vertical picture of synoptic climatology of ozone at midlatitudes
15 p2649 A69-30898

Statistical analysis of Brewer-Mast electrochemical soundings of vertical ozone distribution for developing computer programs of climatological behavior
16 p2786 A69-32632

Martian surface features and climate with emphasis on atmospheric surface layers, assessing Mariner 4 data
17 p3029 A69-33040

Zonal winds in temperate latitude analyzed as function of latitude and month from GHOST balloon flights in Southern Hemisphere at 200 mb
17 p2997 A69-33163

Climatological patterns of atmospheric kinetic energy dissipation in free atmosphere derived from upper wind statistics of Northern Hemisphere, using Kolmogoroff functions
18 p3166 A69-34825

Electronic data collection for climatological stations, describing acquisition and processing of various identification signals and meteorological parameters
20 p3538 A69-37428

Soviet book on synoptic climatological and heliogeophysical long term weather forecasts, discussing monthly and seasonal anomalies, sun-earth interrelations, solar corpuscular elements, etc
21 p3759 A69-39523

Linear equations of motions of inviscid ideal gas atmospheres, describing climatology of propagation parameters for point impulse sources
22 p3938 A69-40446

Cloud cover forms in circulatory-climatic zones of earth based on Zond 5 picture analysis, discussing air-mass exchanges and motions direction
23 p4184 A69-42486

CLIMBING FLIGHT

Air density fluctuation effects on aircraft dynamic stability around center of gravity during climbing and diving maneuvers, discussing atmospheric pressure and flight path angle
04 p0548 A69-14825

Aerodynamic technology applied to takeoff and landing, discussing STOL airplanes in descent and boundary layer control/BLC/flap system
05 p0696 A69-15569

Conjugate gradient methods for optimization problems with terminal constraints, noting minimum time paths for V/STOL aircraft climb phase
12 p2013 A69-26763

Optimum climb trajectories at constant lift coefficient, using variational methods with final altitude and final flight path angle as end point constraints
24 p4254 A69-43727

CLINICAL MEDICINE

NT OTOLOGY

Head injury clinical and laboratory long term follow-up data, discussing conscious state alterations, focal neurological deficit, EEG abnormalities, etc
01 p0022 A69-11346

Clinical problems during interplanetary flights, stressing need for diagnostic algorithms and automated medical equipment
02 p0202 A69-12121

Book on space clinical medicine covering hypoxia, ebullism, decompression, acrotitis, dehydration, hypothermia, cabin atmosphere contamination, urinary calculus, etc
05 p0711 A69-16801

Clinical analysis of combat and noncombat ejection experience of USAF
06 p0878 A69-16960

Clinical spectrum of postural hypotension, treating vasodepressor syncope, orthostatic arterial anemia and idiopathic orthostatic hypotension
06 p0873 A69-17017

Clinical report on Apollo 7 and 8 mission medical data, discussing preflight preventive medical activities, inflight treatment, radiation levels, etc
09 p1446 A69-22542

Motion sickness treatment with bethanechol chloride, noting negative results with 12 airsick student naval aviators
12 p2024 A69-26561

Biotelemetry system as candidate prototype of generalized system for clinical applications
19 p3262 A69-36272

Coronary angiography for evaluating cardiac problems of aircrew, giving case histories and clinical and laboratory findings
19 p3263 A69-36461

Clinical data on ambulant airmen with complete left bundle branch block discovered on electrocardiogram, finding majority with evidence of organic heart disease
19 p3263 A69-36463

Private one doctor one nurse clinic at Sydney airport, discussing history, operating conditions, medical record and statistics
23 p4105 A69-41786

Brain atrophy clinical diagnosis aided by biochemical analyses, including age frequencies and symptoms, to control incidence among aviation personnel
23 p4089 A69-41816

Frequency analysis of second heart sound splitting in patients with coronary artery disease assessed clinically and by phonocardiography
24 p4261 A69-42726

Abnormally slow ultrasound diastolic slope detected by mitral valve motion study in patients with clinically pure mitral insufficiency
24 p4261 A69-42727

CLOCK PARADOX

Theory of relativity and role of time intervals in prediction experiments for rate of clocks
03 p0467 A69-13599

Clock paradox of Einstein special theory of relativity, reviewing work of Prokhovnik, Schlegel and Arley
10 p1772 A69-22865

Einstein interpretation of time in special relativity theory disputed by Fok time dilatation theory
11 p1915 A69-24345

CLOCKS

NT ATOMIC CLOCKS
NT CHRONOMETERS
NT CLOCK PARADOX

Worldwide clock synchronization by geostationary satellite transponder relaying VHF signals from reference clock, noting accuracy of radio propagation delay prediction
12 p2080 A69-26053

CLOSE PACKED LATTICES

Pressure effects on hcp crystalline lattice alloys order-disorder transformations
11 p1937 A69-24704

Slip band extrusions in hexagonal close packed Cd, Mg and Ti subject to cyclic stresses, noting microstructure changes
12 p2116 A69-26912

CLOSED CIRCUIT TELEVISION

Image intensifier-vidicon closed circuit TV network for auroral cinematography at low light levels
06 p0925 A69-17382

CLOSED CYCLES

MHD generator and compressor Joule losses effect on thermoelectric energy conversion closed cycle efficiency with electrical conductivity maintained by nonequilibrium ionization
03 p0369 A69-14152

GaAs injection diode laser cooled by closed cycle gas refrigeration system, noting time required to reach laser operating temperature
05 p0777 A69-16793

Helium closed cycle cooled very low noise high gain parametric amplifier for investigating interstellar atomic hydrogen radiation
07 p1098 A69-18461

High speed stable system by combining hunting type control system without closed cycles designed for plant optimization with recycling type controller
07 p1116 A69-19759

Mathematical model, analog computer simulation and information comparison of closed Brayton cycle systems for power conversion [ASME PAPER 69-GT-50]
09 p1442 A69-22479

MHD electrical power generation - Conference, Warsaw, July 1968, Volume 1, Closed cycle MHD with gaseous working fluids
10 p1729 A69-23433

Equilibrium loss in closed cycle MHD generator using rare gases binary mixtures as working fluid
10 p1737 A69-23468

Closed cycle MPD experiments with applied electric and magnetic fields emphasizing current leakage, segmentation, relaxation and aerodynamic effects
10 p1738 A69-23479

Experimental arrangement consisting of closed cycle system, ionization duct and inductive MPD converter with traveling wave component, using Hg as working medium
10 p1638 A69-23490

Closed loop cycle converter, composed of MHD generator and compressor consuming thermal energy, exhibiting moderate cycle efficiency decreases
11 p1824 A69-24223

Turbomachinery buffer seals, buffer gas regulation and cleanup systems for operation of closed Brayton cycle power conversion system with gas cooled nuclear reactor
13 p2268 A69-27367

Mechanical work recoverable from stored energy and heat absorbed by taking material through closed cycle in strain and entropy space
20 p3575 A69-37074

Temperature and pressure relations in power plant with closed gas cycles with radiative heat transfer, noting radiation area reduction influence
20 p3464 A69-37603

Closed cycle MHD with gaseous working fluids and steady state nonequilibrium ionization
21 p3777 A69-39479

Closed cycle gas cooling techniques for self contained CW kilowatt carbon dioxide laser, relating output power to flow velocity and input power
23 p4173 A69-41497

Closed Brayton cycle power systems for space, lunar, terrestrial and undersea environmental conditions, discussing design and performance
23 p4071 A69-42277

CLOSED ECOLOGICAL SYSTEMS

Man as main component of future spacecraft or planetary station closed ecological system, discussing spacecrew physiological monitoring for biological cycles optimization
01 p0020 A69-11076

Biological life support system based on continuous algae seaweed cultivation as link of closed ecological system, discussing design and performance
01 p0020 A69-11077

Biological life support system for regenerating closed atmosphere by photosynthesis, using gas exchange between man and microalgae
01 p0021 A69-11078

Mathematical models of energy and mass transfer processes in closed loop multicomponent life support systems
01 p0021 A69-11316

Rodents exposure to neon enriched atmosphere for three weeks in sealed recycling system, discussing body weight pregnancies and litter
01 p0019 A69-11342

Membrane vapor diffusion for water reclamation from urine and wash water on space missions
03 p0379 A69-12992

Microbiology of water management subsystem for manned space flight, discussing sterilization by heat and tests inside Integrated Life Support System [ILSS] [SAE PAPER 680718]
03 p0379 A69-13441

Physicochemical method for converting human urine and feces into carbohydrates in closed ecological systems
03 p0381 A69-14199

Life in spacecraft - Conference, Belgrade, September 1967
06 p0881 A69-17642

Life support system energy efficiency, treating transfer equations of closed space regeneration systems
06 p0882 A69-17644

Human endurance during isolation in closed space with prescribed veloeometric exercises, noting impairment of functional capacity
08 p1263 A69-19933

Reactors technical characteristics for high temperature mineralization of closed life systems biological wastes, deriving equations to estimate energy balance
10 p1649 A69-23504

Mathematical model of closed biological cycle regenerating part of life support products, incorporating astronaut, storage and regenerating waste disposal units
10 p1649 A69-23580

Human ecology in space flight - USN-NASA Conference, Princeton, October 1965, Volume 3
13 p2213 A69-27266

Soviet space biology and medicine, discussing ecological physiology, closed system ecology, exobiology and medical tests on cosmonauts
13 p2209 A69-27356

Closed life support systems tests, describing effects of long term /one year/ confinement of three human subjects
13 p2216 A69-28612

Artificial life support systems for sealed environments with application to specific missions, noting cryogenics use
17 p2915 A69-33682

Fire hazard in closed chamber associated with intestinal hydrogen and methane formed by space diets, comparing Gemini-type and bland diets
20 p3482 A69-37622

Mathematical model of optimal partially closed life support system consisting of man, recycling unit, storage unit and waste disposal outlet
22 p3892 A69-40272

CLOSED LOOP SYSTEMS
U FEEDBACK CONTROL

CLOSURE LAW
Closure conditions for Vlasov turbulence, discussing infinite systems of equations for dynamics of statistical quantities
17 p2958 A69-34228

Vlasov turbulence exact solutions, considering closure conditions, correlation length, Lundgren hierarchy, homogeneous turbulence, etc
17 p2958 A69-34229

CLOTH
U FABRICS

CLOTHING
U FLIGHT CLOTHING
U GLOVES
U HELMETS
U PRESSURE SUITS
U PROTECTIVE CLOTHING
U SHOES
U SPACE SUITS

CLOUD CHAMBERS
Cloud chamber for measuring specific ionization in relativistic region by muons in gases, using drop counting method
06 p0925 A69-17303

Simultaneous parallel penetrating muons observed in multiple cloud chambers, obtaining information about sea level muons interactions and EAS
06 p0991 A69-17304

Automatic counter for concentration of cloud condensation nuclei in thermal diffusion chamber, measuring light scattering coefficient of cloud
09 p1494 A69-21640

Particle physics and discovery of K mesons and hyperons emphasizing track recording, cloud and bubble chamber techniques
24 p4352 A69-43039

CLOUD COVER
NT COVERINGS

Tiros Operational Satellite system for global weather analysis data acquisition and cloud cover photography, noting sensor development for numerical weather prediction
[UN PAPER 68-95823] 01 p0108 A69-10473

Venus cloud layer thickness and lower boundary estimation from data on chemical composition, temperature and pressure profiles of atmosphere
01 p0152 A69-10580

Automated layered-nephanalysis and numerical total cloud cover prediction program using moisture data from Tiros 7 photographs
01 p0110 A69-10691

Apollo landmark sighting by astronaut using Apollo onboard navigation system, simulating cloud cover effects with Monte Carlo technique
01 p0110 A69-10692

Wind perturbations characteristics near large convective cloud banks as function of ascending current, wind shear and turbulence
02 p0274 A69-11446

Long wave radiative heat flux in boundary layers of cloud during solid overcast, discussing dependence on various cloud and atmospheric parameters
03 p0458 A69-13271

Radar method to estimate turbulent motions in clouds
03 p0459 A69-13289

Quantitative estimations of cloud and precipitation by radar meteorology, assuming homogeneous reflectivity distribution of clouds
04 p0626 A69-14507

Atmospheric processes interpretation from cloud cover pictures televised by orbiting satellite, examining indirect weather forecasting
[UN PAPER 68-95713] 06 p0949 A69-17029

Meteorological satellite TV data of earth cloud cover for determining atmosphere pressure field
[UN PAPER 68-95654] 06 p0949 A69-17052

Actinometric and nephelometric data on outgoing short wave radiation obtained by Cosmos 122 satellite, tabulating cloud cover data, digital radiation data and brightness curves
06 p0952 A69-17983

Interpretation of IR cloud images transmitted by Nimbus 1 and Cosmos 122 satellites, using radiation temperature contrasts
06 p0952 A69-17984

Atmospheric measurements from satellites, discussing ATS-1 cloud images for definition of wind and use of WEFAX through ATS 2 satellites for data transmission
[AIAA PAPER 69-158] 06 p0954 A69-18038

Mars polar cap ice cap and dry ice theories, discussing dark wave and cloud distribution meteorological observations
07 p1212 A69-18603

Test of Velikovsky theory for dense hydrocarbon clouds and dusts surrounding Venus, using IR reflection spectra
09 p1608 A69-22566

Vertical air flow asymmetrical distribution ascribed to cyclone motion and thermal inhomogeneity by studying spiral cloud configurations in cyclone area
11 p1912 A69-24829

Two dimensional autocorrelation functions of outgoing radiation fields usable as quantitative characteristics of cloud distribution structures
11 p1913 A69-24832

Tenuous cirrus cloud influence on 6.4-6.9 micron Nimbus 2 water observations, discussing equivalent black body temperatures correspondence to cloud and clear areas
12 p2075 A69-27003

Regression coefficients obtained from satellite cloud observations applicability in constructing geopotential fields, tabulating coefficients obtained from ground stations
13 p2292 A69-27731

Long wave radiative heat flux in boundary layers of cloud during solid overcast, discussing dependence on various cloud and atmospheric parameters
14 p2471 A69-28779

Microwave brightness temperatures for downward viewing over open seas from above atmosphere, using tropospheric model containing homogeneous layer clouds
14 p2415 A69-29515

High and low latitude cellular cloud patterns observed by meteorological satellites, noting frequent occurrence over oceans
14 p2473 A69-29727

Cloud pattern characteristics in intertropical convergence zone above Indian and Pacific oceans from meteorological satellite photographs and cloud formation maps
14 p2473 A69-29728

Venus cloud layer thickness and lower boundary estimation from data on chemical composition, temperature and pressure profiles of atmosphere
15 p2691 A69-30750

Monograph on large scale cloud distribution in extratropical low pressure regions, using classical meteorological observations and Tiros weather satellites data
15 p2650 A69-31212

Cloud distribution effect on global coverage of remote radiometric sounding of atmosphere, considering Nimbus 1 and 2 data
15 p2650 A69-31335

Multiple light scattering solutions accuracy by diffraction peak omission from cloud and haze analytic phase functions compared for optically thick and thin planetary atmospheres
17 p3032 A69-33159

Earth albedo effect on ionospheric D layer determined from aircraft sounding of E layer echo amplitude above reflecting cloud cover
18 p3127 A69-34800

Venusian cloud layer radius, discussing error in determination of occultation level height of Regulus by Venus
18 p3203 A69-35331

Cloud layer multiple scattering in Jovian atmosphere, discussing influence on Lorentzian contour of planetary absorption lines
18 p3203 A69-35332

Cloud masses vertical thickness estimated from study of cloud shadows on satellite TV pictures
19 p3366 A69-36670

APQ-97 side-looking radar for topographic mapping of continually cloud covered areas, noting data reduction and compilation methods
20 p3519 A69-36928

Cloud bank structure formation physical mechanism relationship with airflow using differential equations
20 p3569 A69-36985

Large scale cloud layers vertical boundaries approximate determination using atmospheric temperature and moisture data from aircraft sounding
20 p3569 A69-36986

Worldwide cloud cover simulation procedure providing data for computer simulation of earth oriented space missions, describing computer program using Monte Carlo mission simulation
20 p3573 A69-38120

Computer controlled TV cloud recognition equipment on meteorological satellites, discussing multistep process of automatic perspective distortion corrections by onboard computer
22 p3977 A69-40004

Long term computer produced multiple image satellite photomosaics for Southern Hemisphere, analyzing circulation, meridional bands, polar ice, cloud cover variations, etc
22 p3977 A69-40733

Venus atmosphere and clouds exploration by entry probes, discussing ground temperature, greenhouse model, cloud layer, etc
23 p4216 A69-42201

Cloud cover forms in circulatory-climatic zones of earth based on Zond 5 picture analysis, discussing air-mass exchanges and motions direction
23 p4184 A69-42486

Solid cloud cover moisture content relation to outgoing thermal radiation, obtaining correlation coefficient and regression equations
23 p4184 A69-42488

Multiple exposure averaging technique summarizing satellite cloud photographs for various periods, presenting entire earth cloud cover atlas
24 p4343 A69-42897

CLOUD GLACIATION
Critique of paper on water crystal existence on Venus, presenting arguments against existence of clouds of micron sized ice crystals
01 p0157 A69-11292

CLOUD HEIGHT INDICATORS
Cauchy system for reflection and transmission functions of finite isotropically scattering atmospheres with specular reflectors, noting use for ozone and cloud heights measurements
15 p2597 A69-31152

Heights of cloud bases and convective cloud tops determined by stereoscopic photogrammetry of Apollo 6 mission
20 p3569 A69-36926

Cirrus cloud height above sea level and shape correlation with lower section static stability determined by stereophotogrammetric measurements
20 p3570 A69-37349

CLOUD PHOTOGRAPHS
Venus UV photographs and drawings shown in short interval sequences, noting left to right shift in cloud features
02 p0320 A69-12111

Processing TV cloud data monitored by Molniya 1 and Meteor meteorological satellites, discussing computer interpretation of TV photographs
[UN PAPER 68-95759] 06 p0950 A69-17060

European cyclonic system developmental phases determined from characteristic structural features of satellite cloud pictures
[UN PAPER 68-95711] 06 p0950 A69-17070

Statistical analysis of lee wave clouds from satellite TV pictures, determining lengths and air flow direction
11 p1912 A69-24828

Computer program for interpreting IR cloud pictures from Cosmos 122 satellite based on potential function method
11 p1884 A69-24833

Vertical air motions and cloud behavior relationship based on statistical analysis of TV cloud pictures from Cosmos 122 satellite
13 p2291 A69-27724

IR TV cloud pictures from meteorological satellites used for sky condition diagnostics and forecasting through automatic interpretation by image brightness quantization
13 p2291 A69-27728

Cartographic interpretation of TV cloud pictures transmitted by Molniia 1 satellite

13 p2292 A69-27730

Baker-Nunn photometry from Apollo tracking utilizing photographs for brightness, dynamics and duration of rocket exhausts and venting clouds

15 p2571 A69-31338

Digitized video cloud picture data from ESSA satellite, discussing mesoscale archive and computer products including time averages and composites

19 p3279 A69-35810

Precipitation zone-cloud mass correlation based on Tiros cloud photographs, synoptic charts and weather maps for European U.S.S.R.

19 p3366 A69-36671

Heights of cloud bases and convective cloud tops determined by stereoscopic photogrammetry of Apollo 6 mission

20 p3569 A69-36926

Long range weather forecasts attempt from relation between northern Atlantic Ocean water temperature anomaly and monthly satellite cloud data changes

20 p3569 A69-36987

Synoptic and mesoscale cloud patterns near low level jet from Tiros 7 and 8 photographs, noting stratus formation and dissipation

20 p3570 A69-37404

Cloud velocity computations from ATS 1 and 3 satellites spin-scan photographs for prediction of neph systems motion and thunderstorms

21 p3757 A69-38370

Wind and cloud velocities from ESSA 3 and 5 and ATS 1 pictures for typhoon and tropical vortices in intertropical convergence zone

21 p3758 A69-38371

Equatorial anticyclones over eastern Pacific caused by large scale cross-equatorial flows determined by ATS-1 photographs, noting frictional convergence factor

24 p4342 A69-42895

Multiple exposure averaging technique summarizing satellite cloud photographs for various periods, presenting entire earth cloud cover atlas

24 p4343 A69-42897

CLOUD PHOTOGRAPHY

Cloud pictures from weather satellites reception according to automatic picture transmission (APT) system, discussing design and field strength measurements

[UN PAPER 68-95451] 01 p0108 A69-10458

Tiros Operational Satellite system for global weather analysis data acquisition and cloud cover photography, noting sensor development for numerical weather prediction

[UN PAPER 68-95823] 01 p0108 A69-10473

Utility of satellite cloud pictures to meteorological work, discussing weather observation in Israel Meteorological Service

[UN PAPER 68-95571] 01 p0109 A69-10482

Spiral structure of cloudiness in occluded cyclones studied by mathematical model based on meteorological satellite photographs

[UN PAPER 68-95429] 01 p0109 A69-10505

Global cloud models construction techniques, discussing vertically pointing radars, airborne panoramic cameras, radiometry, meteorological satellites and light detection and ranging

02 p0275 A69-12381

Cloud features produced by European tropospheric low pressure areas observed by meteorological satellite photographs, noting cyclonic systems development

06 p0950 A69-17619

Air flow distribution and wind velocities in cyclones constructed from Cosmos 122 TV cloud images

11 p1912 A69-24825

TV IR cloud images interpretation transmitted by Cosmos 122, discussing specific features of cloud covers and underlying surfaces

11 p1912 A69-24826

Statistical analysis of convective layer thickness and moisture content effect on convective cloud configurations, using satellite TV pictures

11 p1912 A69-24827

Noctilucent clouds morphological and kinematic characteristics based on photographs

18 p3132 A69-35335

Cirrus cloud height above sea level and shape correlation with lower section static stability determined by stereophotogrammetric measurements

20 p3570 A69-37349

CLOUD PHYSICS

Aircraft instrumentation system for cloud nucleation studies measures and records ice nucleus and aerosol concentration/distribution, temperature, etc

01 p0080 A69-10542

Axisymmetric model of unsteady convective cumulus cloud produced by time dependent heat source in unsteady atmosphere

02 p0274 A69-11436

Collection of Soviet papers on cloud physics and modification covering radar techniques, radio echoes and turbulent motions

03 p0459 A69-13285

Radar method to estimate turbulent motions in clouds

03 p0459 A69-13289

Large convective clouds in superheated air generated by static tests of Saturn 5 first stage

03 p0462 A69-14125

Atmospheric noise at 33.5 GHz observed most on days of cumulus clouds probably due to local convective activity

05 p0721 A69-16661

Water droplet simulation by glass spheres used in study of light scattering at cloud particles

06 p0953 A69-17992

Photoelectric equipment for nephelometric simulation studies of light scattering by cloud particles

06 p0953 A69-17993

Radio emission and microwave absorption spectrum dependence on physical properties of clouds in millimeter and centimeter wavelength range

06 p0954 A69-17998

Radio wave brightness temperatures and contrast characteristics in presence of clouds and precipitation

06 p0954 A69-17999

Mathematical frame for cloud models, discussing condensation, collection and advection processes and freezing and electrical effects

07 p1176 A69-19041

Electric fields and conductivity in thunderclouds by parachuting rotating differential electric field mills

08 p1345 A69-19813

Radiation scattering changes due to droplet size distribution change during stratus cloud formation calculated, using development model and Mie theory

08 p1346 A69-21093

Automatic counter for concentration of cloud condensation nuclei in thermal diffusion chamber, measuring light scattering coefficient of cloud

09 p1494 A69-21640

Simultaneous measurements of cumulus cloud thermal structure and concentration of water particles larger than 18 micron diameters

09 p1536 A69-21866

Convective clouds effect on large scale stratification, showing cumulus and cumulonimbus self amplifying convection as factor in tropical cyclogenesis

09 p1536 A69-22165

Condensation kinetics in clouds, determining cloud spectrum evolution taking stochastic processes into account

10 p1722 A69-23972

Radiophysics Laboratory (Sidney), discussing radio astronomy, radioheliographs, radio telescopes, cloud physics and research

10 p1784 A69-23988

Virial theorem extended to investigate star condensations in large interstellar gas clouds

10 p1787 A69-24119

High velocity neutral hydrogen cloud formation by cold condensations in hot corona, ejection from galactic nucleus, extragalactic objects and supernova envelopes

11 p1954 A69-24364

Theoretical models corresponding to initial phases in thermal-gravitational collapse of spherical clouds from interstellar gas for stellar formation

11 p1963 A69-25261

Cloud and fog droplet spectra due to condensation of water vapor on nuclei solved by partial differential equation

12 p2126 A69-26017

Ion cloud ambipolar diffusion and motion dependence on initial configuration and close magnetic field alignment above 95 km, discussing observations of meteor trains

12 p2074 A69-26961

Vertical air motions and cloud behavior relationship based on statistical analysis of TV cloud pictures from Cosmos 122 satellite

13 p2291 A69-27724

Heat convection mechanism in two phase autooscillatory system generalized to convective heat transfer in cloudy atmosphere

13 p2292 A69-27798

Radar and satellite TV clouds observation in meso and macroscale cloud systems

13 p2294 A69-27853

Sporadic E layer cloud configuration study based on explorer 20 satellite observations, discussing W echoes

14 p2434 A69-28943

Night airglow variations observed during Cosmos 92 satellite orbits, determining atmospheric albedo wavelength dependence for solid and medium cloudiness and clear skies

14 p2435 A69-29042

Nocturnal development of air mass stratus clouds in Texas and mechanism of formation, discussing turbulent mixing theory

15 p2649 A69-30893

Statistical data concerning noctilucent clouds formation during IQSY, noting tendency to form along geographic longitudes and day and night existence

15 p2598 A69-31255

Latent heat of condensation related to atmospheric dynamics in cloud formation processes with allowance for moisture exchange

17 p2997 A69-33188

Numerical simulation of macrophysical and microphysical processes in convective cloud, including cloud geometry and equations describing dry and moist phases

19 p3362 A69-36497

Horizontal wind components over U.S.S.R., Western Europe and Northeast Atlantic obtained from satellite photographs of vortex cloud systems

19 p3365 A69-36668

Cirrus clouds occurrence, position and wind velocities on jetstream axes based on statistical analysis of aerological data and satellite TV pictures

19 p3366 A69-36669

Cloud bank structure formation physical mechanism relationship with airflow using differential equations

20 p3569 A69-36985

Large scale cloud layers vertical boundaries approximate determination using atmospheric temperature and moisture data from aircraft sounding

20 p3569 A69-36986

Cirrus cloud height above sea level and shape correlation with lower section static stability determined by stereophotogrammetric measurements

20 p3570 A69-37349

Cloud physics problems of precipitation release from interaction of air motions and microphysical events, discussing raindrop growth initiation, artificial cloud modification, etc

20 p3572 A69-37906

Cumulus and cumulonimbus clouds electrical and microphysical properties measured by instrumented aircraft

20 p3572 A69-37907

Long wave radiation influx toward atmospheric layers generated naturally by clouds, discussing radiation cooling of atmosphere in cloudy and clear weather

21 p3758 A69-39112

Stratified cloud transport and evolution, solving kinetic equations by numerical method

21 p3759 A69-39119

Condensation kinetics in clouds, determining cloud spectrum evolution taking stochastic processes into account

21 p3760 A69-39658

Radiative transfer theory applied to layer cloud with normal liquid moisture content, discussing volume extinction, scattering and absorption coefficients, etc

23 p4184 A69-42177

Precipitation physics, discussing cloud structure on mountains and in free atmosphere, precipitation measurement on ground, raindrop size distribution, etc

24 p4343 A69-43037

Varying ratio between mean free path and spherical particle radius at 0-10 km, discussing free molecular flow effects in cloud physics

24 p4345 A69-43145

CLOUD SEEDING

Visibility improvement in warm fog by seeding with micron size hygroscopic particles, noting results for NaCl

01 p0111 A69-10696

Cloud seeding effects due to inhomogeneous distribution of freezing nuclei, discussing silver iodide distributions by Gaussian plume diffusion model

09 p1535 A69-21639

Sulfur dioxide, nitrogen dioxide and Aitken nuclei washout by artificial rain of known intensity and droplet size distribution

24 p4345 A69-43146

NT STRATUS CLOUDS
Nonexistence of Biota-Cloud recontamination hazard for planetary lander proved by analysis of interactions between small particles and physical fields around vehicle
02 p1201 A69-11771
Lunar libration clouds, discussing visual observation at small phase angles for estimation of dominant cloud particle size
05 p0827 A69-16527
Astronomical maps of integrated hydrogen density, dispersion and velocity of high galactic latitude neutral hydrogen concentration, discussing kinetic temperature
13 p2347 A69-27718
Neutral hydrogen cloud observed at high galactic latitude, discussing top intensity velocity, peak intensity dispersion, age, hydrogen mass and density
13 p2347 A69-27719
Radiative heat transfer in nonisothermal scattering media of plane, spherical and cylindrical geometries separated by particle cloud
16 p2878 A69-31925
Cloud scattering corrections added to synthetic spectrum analysis of carbon dioxide bands and water vapor line in Venus spectrum
17 p3032 A69-33161
IR reflection spectra agreement for frost particles and Venus clouds, noting ice as clouds constituent
18 p3190 A69-34282
Ice clouds near IR spectral reflectivity dependence on particle size, noting application to planetary atmospheres
18 p3126 A69-34283
Magellanic clouds positions, associated gases, evolution, etc
19 p3401 A69-35757
Interstellar hydroxyl molecular clouds as radio wave sources, using very long baseline interferometry, suggesting natural masers in space for OH emissions
19 p3427 A69-36659

NT ARTIFICIAL CLOUDS
NT CIRRUS CLOUDS
NT CUMULONIMBUS CLOUDS
NT CUMULUS CLOUDS
NT NOCTILUCENT CLOUDS
NT STRATUS CLOUDS
Spiral structure of cloudiness in occluded cyclones studied by mathematical model based on meteorological satellite photographs
[UN PAPER 68-95429] 01 p0109 A69-10505
Global cloud models construction techniques, discussing vertically pointing radars, airborne panoramic cameras, radiometry, meteorological satellites and light detection and ranging
02 p0275 A69-12381
Radar method of spiral scanning clouds and precipitation at constant altitude
03 p0459 A69-13286
Numerical radar information charts, plotting radio echo reflection boundaries from cloud and precipitation observations by weather radars
03 p0459 A69-13287
Heated liquid mercury rotation rate and direction counter to rotating bunsen flame related to Venus cloud formations high velocities
04 p0664 A69-15466
Cloud features produced by European tropospheric low pressure areas observed by meteorological satellite photographs, noting cyclonic systems development
06 p0950 A69-17619
IR scanning systems of meteorological satellites for detection of clouds and various underlying surfaces, determining detection probability and errors
06 p0952 A69-17986
Spectral brightness of clouds and various terrains in visible and near IR regions measured from aircraft
06 p0953 A69-17991
Atmospheric models for electromagnetic scattering of monochromatic IR and microwave radiation by natural suspensions as hazes clouds and precipitation
12 p2030 A69-26467
Complex climatological cloud profiles structural characteristics along given air traffic routes prepared for practical aviation problems
12 p2127 A69-26899
Soviet meteorological and geophysical rockets, satellites and techniques in cloud studies and weather forecasting, noting Cosmos results
13 p2290 A69-27348
Wind velocity, geopotential and atmospheric layer temperature fields constructed from Tiros 9 satellite

cloud data using least squares method and trigonometric polynomials
13 p2292 A69-27733
Radiation in atmospheric circulation, considering radiative equilibrium, cloudiness and surface interactions, surface temperature and heat input
14 p2477 A69-29826
Bidirectional reflectance of solar radiation and IR temperature data from Nimbus 2 satellite to differentiate clouds above snow surfaces
15 p2596 A69-30455
Radio wave single scattering at particles randomly grouped in space, showing correlation function of water content fluctuations in scattered field in clouds
16 p2807 A69-32267
Dimensions, concentration and spectrum of large precipitation particles in clouds and cloud water content by measuring reflectivity and absorptivity at different wavelength
16 p2807 A69-32268
Vertical wind velocity pulsations in precipitation and passage through subfrontal clouds measured by pulse radar
16 p2807 A69-32272
Turbulence dissipation rate in clouds and precipitations determined from rms width of vertical sounding radar signal fluctuation spectra, distinguishing gravity and turbulence effects
16 p2807 A69-32273
MRL-1 meteorological radar station detection of cloud types under steady rain, showers and storm conditions, describing radar data analysis procedure
16 p2808 A69-32278
Survey of six year period of satellite observed tropical Pacific cloud mapping
17 p2996 A69-33001
Precipitation zone-cloud mass correlation based on Tiros cloud photographs, synoptic charts and weather maps for European U.S.S.R.
19 p3366 A69-36671
Negative charge distribution in thunderstorm clouds related to direction of storm movement, noting vertical column
20 p3572 A69-37908
Wind and cloud velocities from ESSA 3 and 5 and ATS 1 pictures for typhoon and tropical vortices in intertropical convergence zone
21 p3758 A69-38371
Bidirectional reflectance of earth atmosphere and cloud formation above equatorial Pacific observed by synchronous satellite as function of angular dependence
24 p4346 A69-43154
CLUTTER
Adaptive detection mode for surveillance radar, using detection threshold proportional to spatially sampled clutter level estimates for regulation of false alarm probability
01 p0026 A69-10178
Moving target indicator (MTI)/ performance degradation by limiting clutter analyzed for various pulse cancellers and verified by time-domain Monte Carlo simulation
03 p0390 A69-13198
Weighted pulse trains for clutter suppression during radar target detection
04 p0562 A69-15467
Statistical analysis of Radicord /radar digitizing and recording/ clutter and signal spectra and moving target detection by pulse radar
05 p0721 A69-16619
Clutter residues of coherent MTI radar receiver, emphasizing IF stages saturation nonlinearity affecting cancelling circuits performance
13 p2220 A69-27941
Optimal radar receivers and waveforms with limited dynamic range for detecting point target masked by thermal noise and clutter returns
17 p2921 A69-33625
Compound fading exponential /CFE/ clutter model for radar target detection, describing automatic detection applications
23 p4117 A69-41604
Radar return from clutter target with circular polarization, finding probability density functions and cumulative distributions of power ratio
23 p4131 A69-42540
COAGULATION
NT BLOOD COAGULATION
Nickel alloy high temperature tests, noting coagulation of precipitated gamma prime phase, vacancies and creep rate increase
09 p1528 A69-22733

Plasticizer mechanical properties and content in paste, considering effects on texture of coagulation structure during die extrusion of compacts
12 p2118 A69-26257
Diathermy instrument using solid state circuits to provide square wave pulses, discussing operating parameters for bipolar coagulation and advantages over spark gap instruments
18 p3134 A69-34537
COAL
Mathematical analysis of oxygen diffusion to coal grains during coal dust combustion, evaluating kinetic constants by burning time
04 p0687 A69-15167
Coal grain combustion rate and duration at finite air excess coefficient, solving combustion process equations under steady state assumption
04 p0687 A69-15168
COALESCENCE
U COALESCING
COALESCING
Boundary layers coalescence on plane convergent channel walls investigated with analytic formulas for velocity distribution, shear stress, layer thickness, etc
15 p2592 A69-31009
COANDA EFFECT
Variable time delay achievement in fluid logic circuits based on Coanda effect devices
02 p0196 A69-12085
Coanda nozzle entrainment and flow augmentation approximating numerical stability by finite differences
05 p0746 A69-16021
Bistable fluid device utilizing Coanda effect along convex surface for wall attachment
[ASME PAPER 68-WA/FE-27] 05 p0749 A69-16101
Wall attachment phenomenon /Coanda effect/ basis for jet elements in digital and/or pulse-mode systems
10 p1638 A69-23553
Attachment and separation of free jet from wall, discussing model equations for wall attachment fluid amplifier
14 p2428 A69-28877
Incompressible attached wall jet /Coanda flow/ over circular cylinder with finite incompressible injection normal to surface
16 p2772 A69-32148
Coanda effect of separated jets reattachment to wall at high Knudsen number in pneumatic fluidic devices, discussing Reynolds and Mach numbers effect
[ASME PAPER 69-FLCS-37] 21 p3692 A69-38602
LF switching in wall attachment type digital fluid amplifiers, studying visual and quantitative values for switch pressure and flow as function of geometric variables
[ASME PAPER 69-FLCS-31] 21 p3649 A69-38604
COASTING FLIGHT
Coasting arc determination in rocket trajectory problems by Lagrange multipliers
09 p1595 A69-21969
Variational equations uniform closed solution for optimal trajectories during coast without use of numerical integration
19 p3399 A69-35671
Vector integral extension to optimal trajectory coordinate multiplier systems with constant of motion demonstrated for coast-arc problem
[AIAA PAPER 69-907] 21 p3807 A69-39339
COASTS
Magnetic anomalies off Cape Hatteras explained as possible edge effect, discussing ocean and continental magnetic crusts and igneous and magnetic rocks
11 p1879 A69-25405
Tethered polyethylene balloon carrying radio controlled camera for time lapse photographs of wave generated near shore currents
22 p3865 A69-40808
COATING
NT ANODIZING
NT ELECTROPLATING
NT ENCAPSULATING
NT METALLIZING
Pool boiling heat transfer from stainless steel coated with Teflon to produce nonwetted surfaces
[ASME PAPER 68-WA/HT-12] 05 p0847 A69-16119
Chemical vapor deposition of chromium metal on substrates, discussing influence of temperature, gas flow rate and chromium chloride concentration
[ECS PAPER 223] 05 p0769 A69-16232

Dielectric surface coatings effect on transmission and loss properties of silicon-microstrip microwave transmission lines

01 p0041 A69-10201

Aged boric acid coated silica reaction vessels, showing reduced surface effects and high reproducibility in oxidation reactions

02 p0205 A69-12322

Scattering from coated absorbing conducting bodies, considering flat plane and curved surfaces in Rayleigh region

03 p0384 A69-12908

Molybdenum disilicide allotropy influence on coating growth rate and morphology [ONERA-TP-642]

08 p1335 A69-19967

Thermographic phosphor coatings to obtain optical quantitative heat transfer distribution on wind tunnel models

12 p2099 A69-27150

Wear-resistant hard thin layers deposited on various base material surfaces analyzed by electron microprobe

13 p2282 A69-28164

Boron nitride coated boron reinforced metal matrix composites, discussing continuous liquid infiltration, fiber-matrix reactions and heat treatment

13 p2283 A69-28671

Bonding strength of plasma coatings with substrate, testing aluminum oxide on steel

15 p2630 A69-31189

Thermal control coatings for solar cells of solar probe Helios

16 p2867 A69-31741

Gas products evolved from selected thermal control coating materials during UV radiation in vacuum, noting permanent reflectance loss [AIAA PAPER 69-640]

17 p2992 A69-33289

Damping properties of multilayer coatings for aircraft structures analyzed on duralumin samples subjected to bending at room, elevated and low temperatures

17 p2993 A69-33941

Elastomeric and coating materials for aerospace systems, considering temperature, rain, sand erosion, propellant and radiation resistant properties

19 p3357 A69-35586

Solar cell integral covers optical losses in vacuum as function of degradation by UV exposure, noting accelerated testing for time-cost reduction

19 p3253 A69-35703

Multilayer lead oxide and cryolite dielectric coatings stability to ruby laser radiation, noting breakdown coherent radiation power densities

19 p3334 A69-35886

Thermal control coatings, windows and mirrors for 1973 Mars Viking Lander vehicles under simulated Martian surface conditions [AIAA PAPER 69-1023]

22 p3923 A69-40393

COAXIAL CABLES

Hybrid digital transmission systems, discussing joint optimization of analog and digital repeaters and information rate of coaxial cable systems

01 p0027 A69-10248

Green function for linear antennas in warm plasma fed by coaxial air filled transmission line, computing current distribution and input admittance

02 p0215 A69-11942

End correction for input admittance of electrically thick monopole antenna with arbitrary radius driven from coaxial line

02 p0219 A69-12346

Calibration of coaxial line noise sources in terms of rectangular waveguide standard, discussing use of adaptor for comparison

02 p0210 A69-12436

Precision coaxial connectors, giving IEEE standard mechanical, electrical and environmental specifications

for general precision connectors using coplanar butt joints

02 p0222 A69-12757

Temperature effect on phase stability and electrical length of braided coaxial cables, considering dielectric constant and mechanical length

08 p1283 A69-20225

Coaxial radiator as feed for low noise paraboloid antennas, presenting pattern synthesis

11 p1856 A69-25635

TEM-DUAL surface wave propagation in coaxial cable with stratified dielectric structure to reduce attenuation calculated by addition theorem to Bessel functions

11 p1856 A69-25659

Discontinuity capacitance of coaxial line terminated in circular waveguide calculated using Rayleigh-Ritz variational technique

14 p2423 A69-29754

Broadband low VSWR transitions between rectangular waveguides and coaxial transmission lines, discussing asymmetrical probe and ridge types

16 p2757 A69-31584

COAXIAL FLOW

Steady state circular motion of fluid with variable rheological characteristics between coaxial cylindrical surfaces, obtaining velocity distribution

01 p0061 A69-10733

Coaxial jet mixing regimes in jet engines, determining requirements for compatibility by applying aerodynamic theory of ejectors [ONERA-TP-599]

02 p0187 A69-11619

Coaxial flow jet chamber flow patterns dependence on inlet gas velocity, density and length/diameter ratio [AICHE PAPER 25B]

04 p0587 A69-14509

Ducted turbulent mixing and burning of coaxial streams, presenting experimental results for rocket-air mixing system [AIAA PAPER 69-85]

06 p0984 A69-18082

Jet mixing applications to aircraft engines, discussing one dimensional calculation of coaxial streams mixing inside conduit

09 p1429 A69-21305

Optimal mean radius and half height of channel of liquid metal coaxial linear induction MHD generator with unilateral and bilateral excitation

13 p2207 A69-27507

Alternating current plasma arc coaxial flow stabilization [AIAA PAPER 68-706]

13 p2313 A69-28232

Turbulent gas coaxial mixing theory, deriving eddy viscosity model and semiempirical expressions for velocity, temperature and density fluctuations [AIAA PAPER 69-682]

17 p2952 A69-33434

Transport properties of free turbulent mixing of subsonic coaxial streams by introducing environmental distributions in integrals of momentum, energy and species continuity equations [AIAA PAPER 69-681]

17 p2956 A69-33495

Cold subsonic coaxial jets observed for relationship between noise output and flow characteristics, showing effect of relative annular and central jet velocities

20 p3513 A69-37063

Coaxial turbulent compressible gas jets propagation, discussing mass buildup data in coaxial jets

21 p3645 A69-39847

COAXIAL PLASMA ACCELERATORS

Gas flow model of coaxial electromagnetic plasma gun front profiles and speeds for operation with positive central electrode

02 p0288 A69-12032

Coaxial plasma accelerator for generation of pure injection plasmas, noting stability of propagating current sheath

03 p0481 A69-14213

Coaxial Hall plasma accelerator, noting interaction between radial applied magnetic field and axial applied electric field

05 p0806 A69-16734

Electromagnetic thrust equations for coaxial MPD accelerator, noting role of externally applied magnetic field [AIAA PAPER 69-108]

06 p0972 A69-18197

Axial striograms of noncylindrical focusing discharge for plasma structure in front of interior electrode of coaxial gun

08 p1362 A69-20279

Current sheet velocity in coaxial plasma accelerator, noting drag due to insulator ablation and degassing [AIAA PAPER 69-265]

09 p1566 A69-21258

Conducting gas flow parameters in coaxial duct, considering magnetic nonuniformity, Hall currents and fields distortion near electrodes

19 p3381 A69-36772

Rotational arc motion in MPD accelerators with strong axial fields predicted by plasma physics equations

23 p4201 A69-41909

H plasmoid tail cut-off eliminating plasma impurities during injection across octupole magnetic field from coaxial source

24 p4358 A69-43474

COAXIAL TRANSMISSION U TRANSMISSION

COBALT

Saturation solubility of carbon in cobalt and nickel with respect to graphite determined by vapor transport experiments over large temperature range

01 p0092 A69-10060

Friction induced plastic deformation of Be-Co-Zn single crystals with HCP structure

02 p0254 A69-12627

Cobalt concentration reduction in maraging steels by Cr replacement and increased Mo and Ti additions

04 p0616 A69-14649

Maraging steel with reduced Co, establishing optimal temperature range for short aging

04 p0616 A69-14650

Total and spectral emittance of cobalt surfaces conditioned by evaporating some cobalt from surface at high temperature in vacuo

05 p0716 A69-16447

Cobalt-tungsten solid solutions thermodynamic properties calculated by Borelius method using phase diagram

07 p1165 A69-18941

Lattice defects in annealed and plastically deformed cobalt, showing increase with increasing martensite transformations

12 p2113 A69-26042

Volumetric and allotropic changes during heating in electrolytic cobalt multiple phase transformations

12 p2114 A69-26455

Cobalt and Co alloys oxidation, sulfidation and hot corrosion data, summarizing characteristics of films and scales formed

20 p3562 A69-37751

Nb supersaturated solid solution in Co precipitation mechanism analyzed by X rays and electron microscope, noting diffusive scattering effects

21 p3750 A69-39788

Bright cobalt plating electrolytic processes, examining brighteners and formation mechanism of deposits

22 p3959 A69-41265

COBALT ALLOYS

Cobalt base alloy for construction in high temperature corrosive environment, discussing mechanical properties, oxidation and corrosion resistance and phase stability

01 p0095 A69-10546

Nickel-cobalt fcc alloys rolling and recrystallization textures established with filtered Aco K-alpha radiation, considering stacking fault energy effects

04 p0615 A69-14643

Structural stability of cobalt base superalloy at high temperature prolonged exposure under stress

05 p0781 A69-16448

Grain size dependence of yield, flow and fracture stresses of Fe-Co-V alloy for 77-298 K

17 p1166 A69-19264

Controlled solidification in Co-Ta-C system to develop pseudobinary eutectic mixture containing TaC crystals aligned parallel to growth direction [ONERA-TP-673]

07 p1167 A69-19339

Cobalt chromium high temperature oxidation and scale formation [ECS PAPER 413]

08 p1332 A69-20363

Cobalt chromium alloys high temperature oxidation kinetics, discussing thermographic study of oxidation rate and oxygen pressure role [ECS PAPER 413]

08 p1332 A69-20364

Self diffusion coefficients measurements for cobalt in nickel-cobalt alloys, using cobalt radioisotope 60

08 p1334 A69-20577

Monograph on precipitation hardening and mechanical properties of various heat resistant alloys with Co contents to 35 percent

08 p1334 A69-20763

Substructural changes during fatigue due to stacking fault energy variations related to morphology of fracture surface in solid solution Ni-Co alloys

10 p1795 A69-23060

Cobalt base high chromium carbide strengthened superalloy, evaluating physical and mechanical properties

11 p1901 A69-24259

Gadolinium-cobalt system investigation by X ray diffraction thermoanalysis and metallography for inter-

metallic compounds, noting structure transformation and homogeneity 11 p1903 A69-24574

Electrical resistivity and magnetization saturation in cobalt alloys during formation of modulated structures 11 p1904 A69-24707

Book on hard alloy properties, discussing bending and compression properties, tensile, torsional and impact strength, wear resistance and thermal shock resistance 12 p2111 A69-25902

Precipitated phase composition and structure of Co-Ti solid solution during aging 12 p2112 A69-26037

Phase composition and Co content effect in WC-Co and WC-TiC-Co alloys on magnetic properties behavior 13 p2275 A69-27343

Room temperature WC-Co compacts oxidation resistance in air noting increase with preliminary sintering temperature 13 p2275 A69-27345

Stress and plastic deformation influence on allotropic transformation of cobalt-nickel single crystals studied by X ray diffraction 13 p2279 A69-27761

Co base high temperature binary alloys microstructure, investigating diffusion coefficients, stacking faults, vacancies, etc 14 p2465 A69-29890

High temperature properties relationship to microstructure of Co base superalloys and strengthening methods 14 p2465 A69-29891

Processing characteristics of wrought Co base alloys, discussing thermomechanical treatment effects, yield strength, ductility, etc 14 p2456 A69-29892

Casting variables of Co base superalloys, discussing variables effects on ultimate mechanical properties, investment casting, etc 14 p2456 A69-29893

Crystal structures of intermediate phases in La-Co and Nd-Co systems by powder X ray diffraction technique 15 p2667 A69-30087

Dispersoids and temperature effect on coercive force of 19 Co base and 10 Fe plus 27 percent Co base 15 p2669 A69-30689

Co content influence on temperature stress in WC-Co cermets using one exposure and two exposure X ray diffraction 16 p2802 A69-32340

Orientation relationships between phases in Co-TaC pseudobinary eutectic alloy, discussing Co fcc-hcp allotropic transformation [ONERA-TP-714] 17 p2988 A69-33395

Temperature and pressure effect on cobalt base alloy cavitation in liquid sodium, using vibratory apparatus and loss rate contour diagram 18 p3157 A69-35184

WC-Co alloys structural changes under loads near yield limit, noting formation of slip bands 18 p3158 A69-35261

Co base alloy for gas turbines, discussing microstructure, creep, oxidation resistance and hot corrosion properties 18 p3158 A69-35421

Directionally solidified Co-Nb eutectic alloys mechanical properties and magnetic performance for elevated temperature space applications 19 p3341 A69-35542

Cobalt and Co alloys oxidation, sulfidation and hot corrosion data, summarizing characteristics of films and scales formed 20 p3562 A69-37751

Commercial Co base superalloys oxidation and hot corrosion resistance under controlled environments, examining role of various alloying elements [ASM PAPER D8-21.5] 20 p3564 A69-38134

WC-Co alloys microstructure and microproperties, considering individual phase behavior and grain-solid solution interactions 20 p3564 A69-38246

Plastic deformation and dislocation damping of cemented WC-Co alloys studied by compressive testing at room temperature 21 p3744 A69-38736

Burner rig hot corrosion test facility for evaluating Ni-Co alloys used in gas turbine engines operating in marine environment 22 p3928 A69-40673

Al-Ni-Co alloys precipitation mechanism effect on magnetic properties, including heat treatment and Ti alloying effects 23 p4175 A69-41298

Metallurgy and properties of quenched and tempered high strength Ni-Co steels, discussing welding and aerospace applications 23 p4175 A69-41299

Ternary diffusion at high temperature in Fe-Co-Ni alloy system covering entire ternary phase diagram, including computed interdiffusion coefficients 23 p4176 A69-41505

Cobalt-base superalloys analysis for temperature stability, corrosion resistance, creep, fatigue and strength in aircraft structures and parts applications 24 p4334 A69-43427

COBALT COMPOUNDS
NT COHENITE

Synthetic ferrites and sulfides of Ni and Co sulfated in presence of molten sodium pyrosulfate and sodium bisulfate 16 p2747 A69-32567

Catalytic activity enhancement of complex Co/III/ compounds on standing explained by hydrated Co/II/ ions appearance 17 p2988 A69-33433

Semiconducting properties of lanthanum-cobalt oxide measured, using Seebeck coefficient for analysis as function of resistivity 21 p3780 A69-38612

COBALT ISOTOPES

Co 2 chloride aqueous and alcoholic solutions by X ray diffraction to find potential ligands relative coordinating abilities 20 p3484 A69-37496

COBALT OXIDES

Thin foil preparation technique for transmission electron microscopy and selected etch pitting technique for CoO single crystals 12 p2112 A69-25944

CoO complex defects indicated by negative enthalpy of formation, considering isobaric electrical conductivity measurements at various temperatures and oxygen pressures 14 p2508 A69-29925

COBALT 60

Self diffusion coefficients measurements for cobalt in nickel-cobalt alloys, using cobalt radioisotope 60 08 p1334 A69-20577

Co 60 kernel heat source for multikilowatt space power supplies, stressing design for maximum safety 23 p4187 A69-42257

COCHLEA

Analog signal processing concepts based on models simulating mechanical function of ear cochlea 17 p2911 A69-34092

Dependence of cochlear microphonics and summating potential on endocochlear potential 23 p4085 A69-41574

COCKPIT SIMULATORS

Motion cues simulation system with seat of six differentially inflatable sections, discussing DYNASEAT 17 p2947 A69-34007

Manned aircraft air to air combat capabilities evaluated by simulator using two cockpits, digital computer and collimated displays [AIAA PAPER 68-253] 20 p3510 A69-37159

COCKPITS

Aircraft traffic control with cockpit self sufficiency for accurate and reliable navigation capability, discussing radar vector navigation and communication 07 p1177 A69-19210

Personal cooling in inadequately air conditioned cockpits, considering dry air, air ventilated suits and liquid circulated tubes near skin [AGARDOGRAPH-111] 08 p1267 A69-20684

Navigation and guidance systems for low altitude aircraft flight safety noting position determination, cockpit environment and fail-safe operation 17 p3002 A69-34080

Flight compartment and cabin layout of Skyvan 3 designed as freighter with passenger capability 17 p2903 A69-34195

Computerized crewstation geometry evaluation and design optimization using 23-pin-joint man-model [AIAA PAPER 69-977] 22 p3892 A69-40357

Cockpit displays for transport aircraft noting digital techniques and flight control-navigation integration 22 p3946 A69-40486

Cockpit noise intensity during normal cruising operations at various altitudes for 15 different single engine general aviation light aircraft 23 p4102 A69-41676

Commercial aircraft peak cockpit noise level during cruise and high speed descent, discussing damage risk criteria and inter-pilot speech interference 23 p4102 A69-41682

Noise levels in twin engine general aviation light aircraft cockpits, discussing protection against possible hearing damage 24 p4252 A69-42902

F-5 cockpit fogging during low flights and dive bombing in South Vietnam attributed to hot humid weather, recommending cockpit temperature control and pilot diet 24 p4277 A69-43376

CODERS

Microwave carrier graycode analog to digital converter capable of 1200 megabits per second 01 p0044 A69-10627

Time coding system for recording balloon measurements on magnetic tape 05 p0762 A69-15825

Phantom disk encoder for arc second digital position transducers 05 p0766 A69-16748

Serial BCD binary coder design, using Karnaugh diagrams to minimize synchronous and asynchronous counter stages 09 p1467 A69-22579

PDM command coder meeting NASA Tone Digital Command Standard for German central ground station 16 p2755 A69-31859

Flexible format adaptive telemetry encoder design, discussing system design and implementation technique with modular units 23 p4119 A69-41748

CODING
NT DECODING
NT ERROR CORRECTING DEVICES
NT REDUNDANCY ENCODING
NT SIGNAL ENCODING

Book on probabilistic information theory-discrete and memoryless models covering information transmission, digitalized sources, generating functions, decoding error, systematic codes and sequential decoding 01 p0037 A69-11030

Book on communication systems covering signal design, video signals, communication satellites and threshold decoding techniques 03 p0383 A69-12867

Synchronization in coded communication systems, considering phase lock loop and square wave correlation function 03 p0383 A69-12871

Error correcting coding on DCSP satellite channels, discussing single access communication through wide-band SHF repeaters in synchronous earth orbit 03 p0387 A69-13177

Clutter rejection using coded burst waveform for airborne early warning /AEW/ and airborne attack type radars 03 p0388 A69-13185

Channel identification coding for data compressors, deriving optimum code word length for bit compression ratio and overflow identification scheme 03 p0391 A69-13219

Shift and add property for majority combined binary composite codes with linear maximal sequences 03 p0391 A69-13229

TAF /time and frequency/ code written in FORTRAN language for computing steady state, frequency and time response from nonlinear simultaneous differential equations 04 p0565 A69-15341

Incidental modulation effect on accuracy, signal loss and sensitivity of pseudorandom code systems 06 p0890 A69-17824

Mariner 1969 high rate telemetry system portions pertinent to combinatorial mathematicians, discussing coding and encoding 06 p0890 A69-17862

Block coding for transmitting across noisy binary symmetric channel accompanied by noiseless delayless feedback channel 06 p0891 A69-17864

Upper and lower bounds for feedback decoding and definite decoding minimum distances of binary convolutional codes 06 p0904 A69-17865

Topological codes and simplicial subclass information rates, minimum weights and word length 06 p0948 A69-17866

Majority logic decoding of Euclidean or projective geometry codes in two steps 06 p0891 A69-17867

Sequences with small correlation functions as error correcting codes in word separation, synchronization and pulse compression systems

06 p0948 A69-17868

Fourier transform algorithm introduction leading to image coding technique with image transformed by Hadamard matrix operator

07 p1078 A69-18859

Optimum linear feedback code for additive noise systems with average power constraint on transmitter to increase channel capacity

07 p1085 A69-19181

Digital telemetry from spacecraft, discussing on-board processing, data compression, coding, sequence detection and receivers

08 p1276 A69-20592

Minimum bandwidth of M real equal energy signals with specified code or correlation matrix, noting optimum waveforms

09 p1452 A69-21313

Soviet literature on coding theory and applications, stressing contributions to nonSoviet specialists

09 p1460 A69-21393

Coding schemes for memoryless Gaussian channels with feedback considering error probabilities

09 p1454 A69-21794

Error correction of digital data with cyclic codes and probability function set extended to Bose-Chaudhuri-Hocquenghem codes and P super M codes

10 p1655 A69-23529

Tandem interleaved cyclic codes for digital HF communication with improved error rate at reduced decay time

10 p1655 A69-23530

Cosmic ray observation data automatic recording, presenting coding system for reading into computer

13 p3227 A69-27609

Algebraic and sequential coding-decoding method for data communication rates up to capacity of discrete memoryless channel, discussing error probabilities

13 p2219 A69-27664

Lower bound determination of automaton memory elements, describing coding procedure and algorithm for machine states

13 p2239 A69-28554

Coding of morphological evolution in time of auroral displays as generalization of existing JUGG code

13 p2256 A69-28655

Largest scalar product of class and identification codes in diagnostic problems, discussing recognition

14 p2417 A69-29144

Optimum time for telemetry data transmission by system using feedback combined with error correcting codes

14 p2412 A69-29428

Color coding effect on alphabetic filing names, comparing first and second letter codes and no color code condition

17 p2916 A69-34004

Encoding and decoding in IR tracking system, analyzing chopping rotating FM reticle pattern

19 p3268 A69-36058

Binary increment and residual class notation techniques for onboard spacecraft computer arithmetic

20 p3499 A69-37378

Programming aspects of computer uses in civil engineering, stressing engineer-coder communication via flow diagrams

22 p3903 A69-40138

Coding aspects of computers use in civil engineering, discussing language selection, program partitioning and storage use

22 p3903 A69-40139

Digital telemetry link coding as English language analogy, developing block code scheme combining bit, word and block error detection and correction methods

23 p4119 A69-41745

Digital transition tracking symbol synchronizer for low SNR coded telemetry systems, discussing phase locked loop analysis and phase detector simulation by Monte Carlo method

23 p4130 A69-42513

Pioneer 9 deep space probe with telemetry link operated in coded mode with sequential decoding, discussing ground and flight test data

23 p4131 A69-42522

Tree codes for memoryless time discrete sources with bounded fidelity criterion

24 p4284 A69-42720

Pseudorandom code development and possibilities for radar applications, considering signal processing, antenna requirements, radar signal phase modulation, etc

24 p4281 A69-42741

COEFFICIENT OF FRICTION

Frictional and heat transfer characteristics of laminar flow in porous tubes, using numerical solutions to flow and energy equations

01 p0177 A69-11408

Vacuum effect on steel friction, noting changes in residual gases and heat transfer conditions

03 p0434 A69-13915

Coefficient of friction variations for MHD flow of electrically conducting liquid across porous medium under transverse magnetic field

03 p0480 A69-14112

Incompressible turbulent boundary layer properties with arbitrary pressure gradient calculated by integral method resulting in single equation for skin friction coefficient

[ASME PAPER 68-WA/FE-22]

05 p0749 A69-16098

Runways slipperiness and grooving, discussing influence of wetness, tire form and speed on friction coefficient

10 p1674 A69-23707

Wear and friction properties of nylon and polyethylene sliding over unlubricated steel, considering adhesion theory

11 p1892 A69-25021

Velocity distributions and skin friction coefficients in turbulent boundary layers over flat plate with injection or suction through porous wall

11 p1871 A69-25027

Skin friction coefficient relation to pressure distribution in turbulent flow and development of momentum thickness along flow

11 p1819 A69-25385

Friction coefficients for turbulent flow through smooth pipes, considering average and friction velocity relations, fluid velocity measurements and flow Reynolds number

11 p1874 A69-25429

Friction coefficient dependence on interfacial potential between solids

12 p2129 A69-25982

Load carrying capacity and friction calculated for pivoted pad journal bearings for machine design use

[ASME PAPER 68-LUBS-27]

13 p2266 A69-27275

Friction wear of solid bodies based on microscopic contact system model, deriving particle distribution law from physicochemical analysis

13 p2268 A69-28051

Incompressible viscous fluid steady motion caused by rotating ellipsoid, determining drag moments for circular disk and sphere

14 p2432 A69-29627

Solid lubricant films friction and wear life determined under various conditions of contact, temperature, load and atmosphere

[ASLE PREPRINT 69AM 6C-1]

15 p2619 A69-30471

Hot pressed molybdenum disulfide-nickel composite film friction and wear tests in air and face seal configuration

[ASLE FICFS PREPRINT 23]

15 p2620 A69-30491

Contact conformity effects on spinning torque and friction coefficient in angular contact ball bearings from lubricated and unlubricated tests

[ASME PAPER 68-LUB-10]

15 p2628 A69-30901

Injected gas flow nonisothermicity and transversity effects on friction, heat transfer and flow parameters at cylindrical tube inlet

15 p2592 A69-30986

Drag and friction coefficients for laminar pulsating incompressible fluid flow in circular tubes obtained from Navier-Stokes equation

15 p2592 A69-30988

Turbulent boundary layer laminarization in conical nozzle flow, measuring velocity profiles and friction coefficient

[JPL-TR-32-1407]

16 p2732 A69-31894

Radial clearance influence on self lubricating porous bearing friction coefficient and oil losses as function of operation duration

16 p2794 A69-32067

Soviet book on rocket aerodynamics covering configurations, lifting, stabilizing and control surfaces, friction and heat transfer characteristics

17 p2889 A69-32829

Skin friction drag formula for tapered and delta wings with allowance for coefficient variation and Reynolds number dependence on chord length

17 p2896 A69-34037

Micropolar liquid basic flows, considering case with coupling constant relating microstructure to macroscopic flow greater than viscosity coefficient

18 p3121 A69-34786

Friction coefficient increase caused by metal surface textures anisotropic effect on friction force

18 p3149 A69-35151

Friction coefficient and elastic deformation magnitudes relation in polyurethane during sliding friction in various liquids/lubricants/

18 p3149 A69-35362

Geometrical model for surface contact area, noting influence of nonlimitations on friction coefficient in elastic deformation

19 p3329 A69-36494

Nylon wear curves and friction coefficients for steel-on-nylon pairs determined as function of normal load

19 p3329 A69-36495

Graphical representation of friction stresses produced on mechanical parts surface layers, using mathematical model based on Poisson ratio and friction coefficient

19 p3329 A69-36723

Wear and friction of fiber-metal Mo bodies impregnated with molybdenum disulfide, noting coating-endurance life

20 p3547 A69-36953

Blowing effect on surface friction coefficient and heat transfer in turbulent boundary layer in compressible fluid with pressure gradient

21 p3643 A69-38636

Nonlinear model including rocket rotary and forward motion inside smoothbore launcher utilizing dynamic friction coefficient

22 p4037 A69-41038

Friction characteristics during diamond honing of different steel grades, determining lubricating and cooling liquids effect on friction coefficient

22 p3958 A69-41170

Surface films effect on friction coefficient of sodium chloride and Zn single crystals under normal pressure loads, noting film thickness role

23 p4170 A69-42343

COEFFICIENTS

NT ACCOMMODATION COEFFICIENT

NT AERODYNAMIC COEFFICIENTS

NT ATTENUATION COEFFICIENTS

NT BINOMIAL COEFFICIENTS

NT COEFFICIENT OF FRICTION

NT COHERENCE COEFFICIENT

NT CORRELATION COEFFICIENTS

NT COUPLING COEFFICIENTS

NT DIFFUSION COEFFICIENT

NT DISCHARGE COEFFICIENT

NT FLOW COEFFICIENTS

NT HEAT TRANSFER COEFFICIENTS

NT INFLUENCE COEFFICIENT

NT IONIZATION COEFFICIENTS

NT NOZZLE THRUST COEFFICIENTS

NT ONSAGER PHENOMENOLOGICAL COEFFICIENT

NT RECOMBINATION COEFFICIENT

NT REGRESSION COEFFICIENTS

NT SCATTERING COEFFICIENTS

NT STRUCTURAL INFLUENCE COEFFICIENTS

NT WIGNER COEFFICIENT

Characteristic coefficients in method of integral relations calculated by Lagrange interpolation, noting application to numerical solution of differential equations

06 p0857 A69-17102

Transfer coefficients for inhomogeneous systems characterized by constant density, mean free path and activation energy of carriers at each point

07 p1193 A69-19024

Partition coefficients between natural melts and plagioclase phenocrysts determined for rare earth elements and barium by mass spectrometry

08 p1310 A69-20944

Transport coefficient density expansions obtained from time correlation functions in moderately dense gas with short range repulsive intermolecular forces

14 p2540 A69-29469

Differential coefficients applied to Izsak-Borchers ballistic trajectory and errors produced by perturbations of initial vectors, applying results to data capsule recovery

16 p2857 A69-32156

Inequalities for coefficients of univalent functions

22 p3975 A69-40453

Parabolic equation and equation systems with relaxed assumptions involving coefficients of first derivatives and unknown function, demonstrating Pogorzelski fundamental solutions validity

23 p4180 A69-41408

Hydrodynamic equations derived from Boltzmann equation, obtaining molecular expressions for transport coefficients
23 p4151 A69-41513

Fourier series solution of finite range Wiener Hopf equation, determining coefficients from Wiener Hopf procedure
23 p4181 A69-41608

Coefficient quantization in digital continuous time process controllers, applying results to nominal transfer function approximation
24 p4292 A69-43283

COENZYMES

Cellular localization of acetyl-coenzyme A synthetase in yeast, noting enzyme distribution during aerobic growth on glucose
04 p0554 A69-15333

COERCIVITY

Isochronic annealing effect on coercive force of Mo Permalloy samples bombarded with neutrons in nuclear reactor
05 p0783 A69-16815

Dispersoids and temperature effect on coercive force of 19 Co base and 10 Fe plus 27 percent Co base
15 p2669 A69-30689

COGNITION

Models for cognitive behavior and psychomotor behavior for maintenance tasks
12 p2025 A69-27086

COHENITE

Morphologies and mechanical properties for identification of phosphides /schreibersite/ and carbides /cohenite/ in iron meteorites, noting nucleation and growth
19 p3417 A69-36133

COHERENCE

Electric field correlation to magnetic fields in quantum theory of coherence, deriving dynamical equations governing space-time development of correlation matrix
20 p3575 A69-37304

COHERENCE COEFFICIENT

Spatial coherence of He-Ne laser radiation diffused by turbid medium calculated by using diffraction and interference measurements
22 p3964 A69-40798

Plane electromagnetic waves coherence properties, considering linear and arbitrary degree of polarization
24 p4350 A69-42982

COHERENT ACOUSTIC RADIATION

Ultrasonic pulse velocity and attenuation measurement in presence of noise, using coherent detection and signal averaging
14 p2449 A69-29564

COHERENT ELECTROMAGNETIC RADIATION

Coherent frequencies method for irregular component of satellite signal phase lead due to ionospheric inhomogeneities between satellite and ground station
06 p0890 A69-17799

Pulsar model based on rapidly rotating neutron star with radiating attached plasma, discussing test of radiation mechanism by means of coherence of emission
06 p1012 A69-18226

Passive electromagnetic circuit elements for laser light control such as circulators, isolators and phase shifters, discussing coherent light and polarization
09 p1518 A69-22127

Coherence theory of electromagnetic field from classical /wave/ or quantum /particle/ standpoint, stressing information theory
11 p1915 A69-24455

Relativistic coherence theory of black body radiation in transparent medium, deriving expressions for second order correlation tensors by phenomenological quantum electrodynamics
11 p1920 A69-25563

Electron density profiles in outer ionosphere and integral of electron density measured with coherent radio waves emitted from Electron satellite
14 p2438 A69-29106

Double aperture problem with partially coherent incident field, noting application to microwave antenna-reflector combination
17 p2929 A69-33877

Natural and man-made radio noise measurements, including formula for calculating signal strength of coherent interference
23 p4126 A69-42217

COHERENT LIGHT

Ultrasonic holography applications in nondestructive testing, describing conversion of ultrasonic field into optical field
01 p0078 A69-10132

Transmission of coherent ruby laser radiation through traveling wave amplifier noting spatial field structure changes
02 p0255 A69-11608

Resonance light pulse propagation in one dimensional medium containing n and m quantum emitters located in Fabry-Perot resonator
03 p0437 A69-13039

Generation and amplification of ultrashort optical pulses [IEEE PAPER H-12]
05 p0774 A69-16317

Electric and magnetic fields of narrow coherent polarized light beam in free space, noting longitudinal field components due to beam narrowness
05 p0777 A69-16789

Fluctuation phenomena in electromagnetic field in optical spectral region and coherence characteristics of optical fields, analyzing quantum noise
06 p0937 A69-18011

Laser applications to situations requiring highly bunched high power density light beams
06 p0938 A69-18012

Statistical properties of intensity fluctuations of light fields consisting of incoherent Gaussian component heterodyned with single frequency coherent beam
07 p1182 A69-19416

High quality holography with illumination possessing low degree of spatial coherence by means of interferometric arrangement with amplitude division
08 p1312 A69-20081

Ultrashort optical pulses of coherent light, discussing propagation in inhomogeneously broadened medium of two level systems
08 p1324 A69-20083

Helium-neon gas laser as coherent light source for holograms of vaporizing fuel films and for Michelson interferometer
08 p1327 A69-20874

Coherent light fluxes detection, noting correlation characteristics of output signals of photomultiplier illuminated by multimode He-Ne laser
09 p1515 A69-21438

He-Ne laser light coherence distortion by atmospheric turbulence
11 p1894 A69-24452

Coherent optical target recognition through randomly turbulent medium for imaging system offsetting image degradation due to turbulence
11 p1894 A69-24470

Transmission of coherent ruby laser radiation through traveling wave amplifier noting spatial field structure changes
11 p1895 A69-24715

Polarization effects of scattered coherent light on laser imagery, determining surface roughness and angle of incidence effects photographically on basis of Fung theory
11 p1896 A69-24849

Statistical properties of electromagnetic field diffracted by illuminated plane aperture studied in Fresnel zone on basis of partial coherence theory
11 p1836 A69-24978

Single and cladged glass fibers radii and refractive indices measurements on basis of laser light scattering
11 p1918 A69-25044

Coherence phenomena for gas laser transitions coupled by common level, noting coherent superposition
11 p1898 A69-25045

Space-time characteristics of coherent light giant pulse development in laser with instantaneous Q switching, deriving equations to describe linear and nonlinear phases
12 p2110 A69-26909

Diffraction images of coherently illuminated objects in presence of aberrations stressing images of edges, disks and bars
13 p2297 A69-27451

Irradiance distribution in far field diffraction patterns of partially coherent light diffracted by annular aperture, using Fourier transformation relationship of Schell
14 p2460 A69-29640

Image enhancement by coherent optical system without spatial filter, noting improved defocused transparencies
14 p2450 A69-29641

Laser-nonlinear crystal dynamical interactions, studying saturation and coherence properties of second harmonic wave generated inside laser cavity
15 p2632 A69-30026

Interferometer for measuring electric fields spatial correlation function at camera aperture, describing laser light coherence measurements after propagation through turbulent atmosphere
15 p2653 A69-31164

Holographic recording of temporal coherence pattern of wave train from pulsed radiation source, investigating single mode ruby laser
17 p2973 A69-33114

Laser beam propagation through turbulent medium, investigating statistical distribution of phase shift fluctuations
17 p2976 A69-33857

Statistical model for coherent functions obtained from laser equation, showing amplitude and frequency coupling of radiation fluctuations
18 p3152 A69-34820

Coherent light scattering from rough surface, studying effects of target tilt, translation and rotation on speckle patterns produced
18 p3174 A69-35281

Stimulated reflection experiment for correlation between coherent photon beams from independent lasers
18 p3153 A69-35292

Optical imaging with partially coherent nonthermal light, discussing correlation function propagation, transfer functions, spatial Fourier analysis, weak visibility and matrix form
19 p3372 A69-35907

Optical imaging with partially coherent nonthermal light, discussing reconstruction of object from image and similarity between object and image, including detection
19 p3372 A69-35908

Coherent emission from injection electron-hole plasma in indium antimonide without magnetic field, noting roles of crystal thickness and pinch effects
19 p3387 A69-36532

Information processing with coherent light, discussing holographic interferometry, contour mapping, three dimensional pictures, holographic coding, etc
21 p3722 A69-38797

Focal plane observation of granulation phenomena on scattering surface illuminated by coherent light from gas laser
21 p3741 A69-39575

Spatial coherence of He-Ne laser beam studied in Young interference experiment, noting multimode light percentage attributed to weak transverse modes
22 p3960 A69-40018

Coherent light focusing by helicoidal guide- extension to particle focusing, discussing analogy between index distribution for classical optics and potential distribution for electronic optics
22 p3981 A69-40475

Quadratically nonlinear filtering systems analysis and synthesis by linear methods, discussing application to partially coherent transilluminated optical systems
24 p4350 A69-42971

Coherent light propagation through turbulent atmosphere observed by applying He-Ne lasers to simultaneous measurements of scintillation effects over homogeneous optical paths
24 p4344 A69-43114

COHERENT RADAR

Spectrum distortion of intermediate frequency signal in coherent Doppler navigation radar
01 p0034 A69-11013

Coherent moving target indicator radar receiver behavior as function of input situation, using improvement factor
04 p0556 A69-14338

Hologram form of forward scatter bistatic radar or sonar
07 p1078 A69-18866

Atmospheric extinction coefficient and backscattering function determined by laser radar using differential equation
07 p1126 A69-18966

Angel type radar echoes from coherent pulses in centimeter and decimeter wavelengths characterized by daytime convection and presence of inversion/ isothermal layers
09 p1491 A69-22706

Clutter residues of coherent MTI radar receiver, emphasizing IF stages saturation nonlinearity affecting cancelling circuits performance
13 p2220 A69-27941

SNR changes loss factor effect during passage through MTI coherent receiver followed by video integrator
16 p2753 A69-32438

Angel type radar echoes from coherent pulses in centimeter and decimeter wavelengths characterized by daytime convection and presence of inversion/ isothermal layers
16 p2753 A69-32486

- Doppler radar based on triple pulse transmission at coherent frequencies, comparing echo pulses for target cancellation and extraction
21 p3672 A69-38436
- Coherent pulsed radars using pseudorandom modulation, explaining pulse position modulation and radar receiving equipment
24 p4282 A69-42743
- ### COHERENT RADIATION
- Noise emitted by gas filled cavity perturbed by strong coherent signal computed by Nyquist equation
02 p0211 A69-12448
- Radiation intensity from system of monoenergetic relativistic electrons in plasma, discussing maser effect in coherent synchrotron radiation
03 p0500 A69-13407
- Coherent emission in epitaxial structures with heterojunctions in AlAs-GaAs system
03 p0489 A69-13896
- Black body radiation coherence properties characterization by stochastic Gaussian scalar potential correlation function
05 p0795 A69-16819
- Helium-neon laser radiation of given spectral compositions, noting relation between spatial coherence and controlled number of frequencies
07 p1148 A69-18803
- Organic lasers, discussing coherent laser light emission induced from organic dye molecules
07 p1149 A69-18908
- Numerical determination of Doppler effect and reduced Doppler frequency difference for two coherent radio waves emitted from earth satellite
07 p1087 A69-19610
- Optical systems with quasi-monochromatic partially coherent illumination, discussing energy distribution computation program
08 p1353 A69-21096
- Coherent emission from rare earth ions in electro-optic crystals, noting oscillations and electric field modulation occurrence
09 p1514 A69-21339
- Temporal and spatial coherence effects of optical fields and relationship to multipole coherence effect
09 p1540 A69-22083
- Perturbation solution for propagation of fourth order coherence function in random medium extended to larger field fluctuations, deriving integrodifferential equation
10 p1724 A69-23042
- Coherent detection spectroscopy with laser oscillator, emphasizing high resolution and applications in astronomical spectroscopy and IR
10 p1696 A69-23684
- Gas lasers coherence properties and availability for holography, discussing continuous power output of He-Nc, Ar and Kr ion lasers
11 p1895 A69-24680
- Coherent emission in epitaxial structures with heterojunctions in AlAs-GaAs system
11 p1939 A69-25697
- Coherent radio emission mechanism in quasars and supernova remnants, discussing magnetic effects
12 p2168 A69-27050
- Ideal quantum receiver to detect coherent narrow band optical signal in presence of thermal background radiation, noting error probability
14 p2414 A69-29502
- Coherence-polarization in remote sensing by microwave and laser means, analyzing scattering functions of rough surfaces
14 p2448 A69-29532
- Optical communications experiments for quantitative data at 6328 Å on system fading due to scintillation and atmospheric turbulence effects on coherent propagation at 10.6 micron
16 p2748 A69-31564
- Partially coherent radiation scattering determined using Heisenberg operator, noting radiation absorption dependence on interfrequency band coherence
16 p2797 A69-32050
- Coherent radiation generation using gas lasers, analyzing interaction between EM radiation and matter
19 p3335 A69-36067
- Coherent radiation detection using laser optical sine waves, considering detection by heterodyning, laser preamplifier and parametric amplification
19 p3335 A69-36070
- Magneto-optical constants and conduction band parameters of GaAs by coherent radiation at high temperatures, measuring Faraday rotation
19 p3386 A69-36522

- Coherent recombinational radiation of semiconductors excited by electron beam
19 p3387 A69-36539
- Ionospheric data of local and integral electron concentration obtained by measuring phase shift of satellite emitted coherent radio waves
20 p3519 A69-37022
- Coherent radiation short pulses from mode locked laser permitting schlieren photography of plasma growth
21 p3736 A69-38795
- Helium-neon laser radiation of given spectral compositions, noting relation between spatial coherence and controlled number of frequencies
21 p3736 A69-38948
- Coherent light emission by molecules excited by laser pulses having duration comparable to active medium polarization relaxation time
21 p3737 A69-38999
- Changes in CdS crystals spontaneous and coherent emissions caused by electron beam radiation damage, determining intensity and spectral composition dependence
21 p3780 A69-39047
- Scalar waves propagation in bounded randomly fluctuating media, emphasizing interface effects on coherent wave motion
21 p3675 A69-39283
- Partially coherent PSK-modulated binary detection, deriving noisy phase reference by narrow band tracking filter, analyzing bit output error as function of SNR
23 p4122 A69-41772
- Amplified radiation of laser used for coherent optical pumping in two level low pressure gas laser
24 p4327 A69-43067

COHERENT SCATTERING

- Plasma diagnostics using scattering of laser electromagnetic radiation by plasma density function, discussing plasma species collision effect on line profiles
07 p1131 A69-18485
- Stimulated Compton scattering for laser action, noting voltage tunability and gain at far IR wavelengths [IEEE PAPER 5-9]
07 p1154 A69-19081
- Electron concentration in polar ionosphere measured by coherent scattering method
12 p2071 A69-26703
- Light intensity during coherent scattering based on complex refraction index of medium, noting scattering by clouds and diffraction by semitransparent hole
15 p2635 A69-31108
- Coherent light scattering from rough surface, studying effects of target tilt, translation and rotation on speckle patterns produced
18 p3174 A69-35281

COHERENT SOUND
U SOUND WAVESCOHERENT SOURCES
U RADIATION SOURCES

COHESION

- Physicotechnical problems of weightlessness, considering cohesive forces, surface tension and mechanical behavior of fluids and weightlessness simulation techniques
07 p1070 A69-18568
- Short cylinder of perfectly plastic Coulomb yield conditions compressed between rigid plates, discussing cylinder-plate interface frictions, angles of internal friction and cohesion
08 p1410 A69-19890
- Plane contact problems in elasticity theory allowing for cohesive forces solved by integral and differential equations
15 p2706 A69-30578
- Annealing effect on transition zone cohesion strength in two layer steel-titanium sheet, investigating role of TiC formation
18 p3159 A69-35450
- Two point tensor function symmetries of nonlocal cohesive finite elastic materials determined from atomic lattice theory, obtaining Green function
19 p3444 A69-36798

COHOMOLOGY
U HOMOLOGYCOIN AIRCRAFT
U OV-10 AIRCRAFT

COINCIDENCE CIRCUITS

- Tunnel diode subnanosecond coincidence circuit stability and time resolution, noting influence of polarization and input-pulse currents
05 p0735 A69-16743

- Polarity coincidence correlation method due to random processes state characterization applied to man machine systems
12 p2022 A69-25931

- Stable particles heavier than nucleons in extensive cosmic ray showers detected by delayed coincidences relative to shower electron photon component
13 p2331 A69-28402
- Demultiplexing of high speed multichannel optical pulse code transmission systems, based on coincidence detection using locally generated reference pulses
19 p3279 A69-36764

COINING

- Stress coining methods for improving aircraft structure fatigue life by controlling material yielding inside holes and materials surrounding holes and slots [AIAA PAPER 69-761]
19 p3433 A69-35659

COKE AIRCRAFT
U AN-24 AIRCRAFT

COLD ACCLIMATIZATION

- Brown adipose tissue providing internal heating jacket and metabolic heater overlying systemic vasculature, noting cold survival role
23 p4091 A69-42013

COLD CATHODE TUBES

NT PHOTOMULTIPLIER TUBES
NT PHOTOTUBES

- Glass pleats and cold cathodes in laser discharging tube, discussing angular displacements
03 p0435 A69-12981
- Display techniques, discussing cold cathode luminous gas discharge /plasmas/ tube, electroluminescence and cathode ray tube
04 p0600 A69-15029

- Microwave tube development, discussing cold cathodes, ferrite and semiconductor integration into tubes, tube failure physics, etc
11 p1847 A69-24745

COLD DRAWING

- Cold drawing workability of Nb, Mo and Ta using dies with lubrication for metal sheets
03 p0452 A69-14124
- Mechanical anisotropy of polyethylene terephthalate and relation to molecular structure and cold drawing
05 p0785 A69-16489

COLD FLOW TESTS

- Cold subsonic coaxial jets observed for relationship between noise output and flow characteristics, showing effect of relative annular and central jet velocities
20 p3513 A69-37063

COLD GAS

- Cold neutral H cloud existence in Galaxy from measurements of 21 cm line spectra
22 p4025 A69-40644

COLD NEUTRONS

- Whirling liquid hydrogen layer thermal and hydrodynamical conditions, noting application to cold neutrons source in high flux beam reactor
05 p0849 A69-16818

COLD PLASMAS

- RF characteristics of electrodes immersed in magnetoplasma, discussing potential distribution around point charge and RF probe measurement of plasma parameters
01 p0029 A69-10550
- Transverse plasma velocity component effect on boundary layer structure between cold plasma and confined magnetic field
02 p0235 A69-11424
- Nonlinear large amplitude electrostatic and electromagnetic oscillations in cold plasma having one dimensional spatial variations and fixed neutralized ion background
02 p0288 A69-12171
- Shear instability in unbounded collisionless cold plasma in external uniform magnetic field in current free case, noting dispersion relations
02 p0289 A69-12177
- Dispersion relations of axisymmetric and dipolar surface modes propagation along inhomogeneous plasma columns on dispersion relations
02 p0289 A69-12242
- Born approximation for calculating low temperature plasma transport properties from quantum mechanical scattering cross sections on Debye potential
02 p0291 A69-12486
- Ionization and recombination in low temperature plasmas, noting fast electron distribution function deviation from Maxwellian form and calculation for Cs plasma
02 p0292 A69-12559

Diffraction of cylindrical waves at half plane in cold anisotropic plasma, using Fresnel integrals
02 p0293 A69-12842

Existence and stability of periodic waves in cold collisionless plasma in magnetic field
03 p0474 A69-13143

Nonlinear interaction of steady state circularly polarized electromagnetic wave with cold plasma in constant longitudinal magnetic field
03 p0476 A69-13381

Synchrotron radiation excitation in system of relativistic monoenergetic electrons rotating in cold magnetoactive plasma
03 p0476 A69-13383

Cold plasma motion caused by electromagnetic wave pressure propagating along uniform magnetic field
03 p0477 A69-13413

Probe and spectral techniques compared for investigation of low voltage arc of cesium plasma thermionic converter
03 p0478 A69-13836

Kinetic theory to determine wave increments propagating across magnetic field in system of relativistic electrons in cold plasma
04 p0635 A69-14555

Input admittance of cylindrical dipole antenna immersed in cold isotropic lossless plasma medium and insulated by ion sheath or unit permittivity dielectric
04 p0580 A69-15490

Laser light scattering by plasma using theory of ionospheric scattering of radar signals, determining scattered spectrum
05 p0798 A69-15586

Low temperature plasma electric arc source operation describing current voltage characteristics and potential distribution
05 p0802 A69-15902

Plasma instabilities produced by beam plasma discharge in mirror magnetic trap
05 p0803 A69-16212

Explorer 35 measurements of low energy plasma in lunar orbit made by planar multigrad sensor programmed as retarding potential analyzer
05 p0825 A69-16278

Wave dispersion analysis for amplification in cold plasma filled cylindrical waveguide penetrated by electron beam of same radius
05 p0736 A69-16790

Oscillating electric dipole in cold plasma with ideal conductivity along lines of force of external magnetic field
06 p0921 A69-17743

Trapped mode wave propagation for cold uniform magnetoplasma cylinder in free space, studying dipole modes and one-wave approximation
06 p0967 A69-17756

Power flow in cyclotron and plasma modes propagating in waveguide filled with cold collisionless axially magnetized plasma
06 p0897 A69-17760

Electrostatic waves in inhomogeneous plasma in finite magnetic field, noting dispersion relation for cold plasma and stabilization of instability
06 p0967 A69-17761

Resonant frequencies and fields in circular cylindrical microwave cavity containing cold uniform magnetoplasma dielectric
06 p0968 A69-17763

Dispersion equation for dipolar surface waves in uniform cold lossless infinitely long magnetoplasma column in free space, obtaining numerical and asymptotic solutions
06 p0968 A69-17774

Transport properties of partially ionized low temperature plasmas, considering viscosity, electrical and heat conductivity of argon and nitrogen at high temperatures
06 p0969 A69-17907

Thickness of resistivity controlled hydromagnetic shock wave, using classical one fluid equations and generalized Ohm law
06 p0970 A69-17956

Magnetoplasma waves in semiconductors, discussing cold plasma dispersion, helicons, carrier densities, lattice dielectric constant and acoustic domain propagation
07 p1197 A69-18465

Comparative models of magnetoplasma, discussing wave propagation in cold plasma, warm plasma and microscopic model
07 p1190 A69-18919

Radiation resistance of short dipole immersed in cold magnetoionic medium, using polarized wave modes
07 p1107 A69-19226

Collisionless shock waves in high beta plasmas and in cold plasmas
07 p1194 A69-19366

Cold plasma stability during traversing by electron beams in presence of external magnetic field, obtaining dispersion relations for longitudinal and transverse modes
07 p1195 A69-19465

Antenna impedances in cold plasma with perpendicular static magnetic field
08 p1281 A69-20029

Nonlinear behavior of two stream instability between cold electron and ion streams
08 p1367 A69-20800

Power radiated by oscillating magnetic and electric dipoles in cold streaming plasma calculated by Poynting vector method
09 p1544 A69-21329

Cylindrical electromagnetic waves diffraction at impedance wedge in anisotropic cold plasma, using Maxwell equation and double contour integral
09 p1545 A69-21505

Total radiation of dense low temperature argon arc discharge plasma measured by bolometer, showing increase with arc current and pressure
09 p1547 A69-21595

Cold plasma magnetoacoustic resonance, showing nonlinear exciting magnetic field dependence on polarity and energy
09 p1548 A69-21668

Nonthermal microwave emission from cold cathode PIG discharge plasma, noting wide spectrum of electron cyclotron frequency harmonics
09 p1549 A69-22018

Nonequilibrium distribution functions for neutral atoms excited states in optically thin low temperature singly ionized plasma containing ions, electrons and neutrals
10 p1731 A69-23437

Incoherent synchrotron radiation by relativistic electrons gyrating in cold magnetoactive plasma rederived, correcting errors
10 p1741 A69-23858

Ionization instability in low temperature magnetized plasma, analyzing electron concentration perturbation caused by Joule heating during electron-ion collisions
10 p1741 A69-23962

Radial distribution profiles of charge carriers in low temperature gas discharge plasma accounted for in terms of volume recombination
11 p1925 A69-24330

Transient signal propagation through cold inhomogeneous plasma with electron density decreasing exponentially in direction of propagation
11 p1836 A69-24990

Synchrotron radiation amplification by monoenergetic electron stream helically gyrating in static magnetic field of cold plasma, discussing amplification rate frequency dependence
11 p1931 A69-25361

Electron-ion recombination coefficient for triple collisions in dense low temperature plasma, deriving finite electron Fokker-Planck equation
11 p1933 A69-25541

Resonance radiation output effect on electron distribution according to energies and concentration in low temperature plasma, solving relevant kinetic equations
11 p1935 A69-25757

Soviet book on plasma thermionic energy conversion covering operation modes, transport processes, current-voltage characteristics, density, temperature, electric field distribution
12 p2017 A69-26850

Boundary layer between cold plasma and vacuum magnetic field, considering transverse velocity component perpendicular to field
12 p2139 A69-26944

Inhomogeneous and anisotropic cold plasma filled plane capacitor resonance in steady magnetic field applied to plasma diagnostics, using calculus of variations
13 p2304 A69-27240

Near electrode layer calculation in low temperature plasma, solving kinetic ion equation for quasi-neutral and Poisson equation for space charge regions
13 p2312 A69-28117

Collective scattering of light from ruby laser by cold dense deuterium plasma produced by electrical discharge, deducing density and electron temperature
13 p2273 A69-28366

Monochromatic plane waves propagation in anisotropic homogeneous cold plasmas, treating dispersion surface, reflection, refraction and waveguide applications
14 p2492 A69-29399

Ionospheric models for motion of slightly ionized homogeneous cold plasma influenced by electrostatic field and neutral particles flow, considering geomagnetic effects
14 p2499 A69-29863

Ionospheric inhomogeneity model for motion of infinite elliptical cylinder of cold plasma in neutral particle flow and ambient electrostatic and magnetostatic fields
14 p2500 A69-29864

Ionization and recombination in low temperature plasmas, noting fast electron distribution function deviation from Maxwellian form and calculation for Cs plasma
15 p2658 A69-30256

Energy absorption by cold nonuniform plasma from externally driven electric field, noting relation between plasma and driving frequencies
15 p2661 A69-30922

Low density cold plasma effect on stability of cylindrical layer of charged particles against electrostatic perturbations in uniform magnetic field
16 p2816 A69-31635

Macroscopic quasi-linear theory of HF radiation in cold electron-proton plasma allowing direct use of plasma and Maxwell equations
16 p2819 A69-31684

Weak nonlinear hydromagnetic waves in cold collisionless plasma, using nonlinear perturbation method
17 p3010 A69-32866

Trapped modes in cold magnetoplasma slabs and rods in free space analyzed by Maxwell equation, assuming DC magnetic field and homogeneous electrons distribution
17 p2926 A69-33850

Whistlers propagation in cold plasma in uniform magnetic field, considering amplitude dispersion effect
18 p3179 A69-34437

Cold plasma approximation of whistler excitation of lower hybrid resonance at wake of body moving through ionosphere, comparing results with Alouette satellite observations
20 p3519 A69-37025

Plasma instabilities produced by beam plasma discharge in mirror magnetic trap
20 p3581 A69-37784

Transient phenomena in bounded dispersive medium emphasizing surface wave propagation, discussing space and surface waves excitation in bounded cold magnetoplasma
20 p3494 A69-37842

Nonlinear oscillations of inhomogeneous cold plasma in hybrid resonance region
21 p3672 A69-38588

Nonlinear interaction between extraordinary waves propagating perpendicular to static magnetic field in cold homogeneous magnetoplasma
23 p4195 A69-41538

Thermal radiation diffraction of dielectric cylinder /cold plasma model/ containing N plus one layers with arbitrary temperatures and permittivities
23 p4123 A69-42028

Plasma resonances driven into nonlinear regime, using models of cold plasma driven by wave source and unmagnetized Vlasov plasma by two grid source
23 p4197 A69-42418

Hydromagnetic radiation characteristics of electric and magnetic dipoles in homogeneous anisotropic cold plasma, obtaining field components and wave propagation modes
24 p4307 A69-42905

Whistlers nonlinear interaction during cold magnetoplasma propagation, considering energy exchanges between waves
24 p4309 A69-43174

COLD PRESSING

Be billets fabrication from powders by cold hydrostatic pressing and pressureless sintering, noting hardness, density and grain size dependence on temperature
14 p2465 A69-29681

COLD ROLLING

Elastic anisotropy and polycrystalline orientations in cold rolled titanium sheets investigated by Fourier series method, discussing Young modulus values
01 p0094 A69-10431

Cold rolling and annealing effects on tensile strength, heat resistance and ductility of sintered Al powder sheets
03 p0452 A69-14121

Alloying elements and cold rolling deformation effects on formation of texture in Ti alloys, noting inhomogeneity
04 p0617 A69-15077

Subsequent yield surfaces in cross shaped brass plates determined after prestraining or cold rolling
04 p0682 A69-15302

- Beta Ti alloy initial state effect on mechanical properties and dislocation structure after cold deformation by rolling
14 p2463 A69-29313
- Depth dependent variations in texture in Nb due to inhomogeneous plastic deformation during cold rolling
21 p3744 A69-38737

COLD STRENGTH

- Low temperature predeformation and disorientation of mosaic blocks to strengthen aluminum
20 p3562 A69-37819

COLD TOLERANCE

- Life raft thermal protection against exposure of aircrews to cold, noting chemically fueled heaters and IR reflective liners
06 p0883 A69-17841
- Human body cold tolerance and relation to BMR seasonal variation
06 p0876 A69-18024
- Norepinephrine, dinitrophenol and dicumaryl effect on brown adipose tissue of cold exposed rats
19 p3258 A69-36294
- Primary muscle spindle afferents from gastrocnemius muscle of cat before, during and after cold shivering, utilizing ramp stretches of same muscle
23 p4096 A69-42091

COLD TRAPS

- Anisotropic plasma cyclotron instability in magnetic trap with cold ion background and isotropic Maxwellian velocity distribution
02 p0292 A69-12554
- Anisotropic plasma cyclotron instability in magnetic trap with cold ion background and isotropic Maxwellian velocity distribution
15 p2658 A69-30251

COLD WALLS

U WALLS

COLD WEATHER

- Subjective feeling of dampness correlation with relative humidity of air at zero and below zero C temperatures
23 p4109 A69-41870
- Temperature dependence of action potential, isometric tension development and relaxation rate of mammalian myocardium at low temperature, considering Ca ions role
23 p4092 A69-42060

COLD WORKING

NT EXPLOSIVE FORMING

- Aging and cold work hardening effect on deformability of aluminum-magnesium-silicon-copper alloy
02 p0254 A69-12677
- Tangential and normal stress distribution in deformed metals, discussing work hardening of metals and cold working without softening effect
03 p0435 A69-14118
- Cold working considered for decreasing fatigue crack propagation rate in thin duraluminum sheets with various plastic deformations
04 p0681 A69-15170
- Dislocation distributions in cold worked fcc, bcc and hcp metals, discussing dislocation structures in deformed single crystals and work hardening theories
05 p0778 A69-15754
- Roll planishing and thermal treatments effects on gas tungsten arc welded Ti-6Al-4V alloy on residual stresses, tensile, formability and fracture toughness properties
08 p1319 A69-19966
- Cold worked high purity Mo wire recovery after plastic deformation at room temperature, considering electrical resistivity decrease as function of annealing temperature
15 p2636 A69-30082
- Prestrained material plastic behavior experiments and deformation lines of influence analysis, noting importance in cold working
17 p3067 A69-34146
- Martensite transformation, C content and work hardening relations in stainless steels studied for magnetic detection of embrittlement during deformation
18 p3138 A69-35117
- Nickel solid solutions strengthening under cold deformation studied by X ray, noting screw and edge dislocations role
18 p3157 A69-35246
- Low temperature predeformation and disorientation of mosaic blocks to strengthen aluminum
20 p3562 A69-37819
- Cold working and aging effects on mechanical properties of TiAl-V including creep and temperature effects
[DGLR-69-002] 23 p4177 A69-42163

- Stored energy of cold work and electrical resistivity of Ag-Mg solid solution alloys measured as functions of strain, Mg concentration and initial state of order
24 p4332 A69-43029

COLLAGENS

- Corneal stroma collagen fibrils and ground substance refractive indices, discussing corneal transparency and clouding
22 p3884 A69-40886

COLLAPSE

- Collapse pressure of flush cylindrical nozzle axisymmetrically intersecting conical pressure vessel for rigid plastic shells
15 p2704 A69-30289
- Fatigue collapse probability of fail-safe structure compared to safety factor design
22 p4045 A69-40820

COLLECTORS

U ACCUMULATORS

COLLEGES

U UNIVERSITIES

COLLIMATION

- Collimation of row and column steered phased arrays
04 p0570 A69-14304
- Single two dimensional coherent matched filter optical processor for simultaneous synthetic radar antenna beam sharpening and pulse compression
04 p0562 A69-15475
- Collimator lens design for transforming axisymmetric primary field into prescribed secondary field
06 p0895 A69-17454
- Population inversion distribution and wave processes in optical amplifier, showing beam transformation of constant section and dependence on crystal characteristics
11 p1893 A69-24447
- Collimator lens design for transforming axisymmetric primary field into prescribed secondary field
20 p3508 A69-37939

COLLIMATORS

- Reflection measurements in IR, investigating effect of angle of incidence and collimated beam on reflection spectra
01 p0120 A69-10891
- Modulation collimators determining angular sizes and celestial positions of X ray sources Sco X-1 and Taurus XR-1
10 p1678 A69-23326
- Celestial X ray source positions from rotating modulation collimator, predicting performance of collimator
10 p1722 A69-23328
- Photodetector requirements for autocollimators with beam splitters, considering spectral characteristics, photoresponse, time constant, positioning, etc
14 p2447 A69-29326
- Mechanical collimator using random aperture arrays for celestial observation at extreme UV and X rays
19 p3313 A69-36489

COLLINEARITY

- Superposition of discrete number of collinear amplitude modulated harmonic oscillations
02 p0281 A69-12252
- Optimal control stationkeeping for maintaining space probe stability around collinear points in three body problem
[AIAA PAPER 69-906] 21 p3807 A69-39338

COLLISION AVOIDANCE

- Aircraft flight safety, discussing structural and aerodynamic concepts, maintenance and operations
03 p0365 A69-12886
- Listen-in feature, allowing general aviation aircraft equipment to receive airborne SSR reply signals, provides air to air proximity warning
03 p0464 A69-13247
- Project Icarus for reduction of threat of asteroid collision with earth by deflection or disintegration, noting guidance, control and communications for rocket
04 p0652 A69-14564
- Industry airborne collision avoidance systems /CAS/ development program, discussing cooperative devices in aircraft
05 p0790 A69-16725
- Pilot warning indicators to equip all aircraft at low cost, discussing Doppler system
05 p0790 A69-16726
- Monograph on mathematical model for aircraft separation in air traffic safety control, analyzing aircraft motions and collision avoidance
08 p1347 A69-20712

- Air traffic lateral separation assurance over North Atlantic for increased routes capacity without safety reduction
08 p1349 A69-21200

- Aircraft electronic proximity warning devices applications, discussing compatibility in ATA collision avoidance system
[SAE PAPER 690340] 11 p1914 A69-24496

- Airborne collision avoidance system /CAS/ performance and operational requirements
11 p1914 A69-25430

- Collision avoidance system for air traffic, discussing false signal discrimination via electronic measurement of light pulse duration from aircraft Xenon discharge beacon lamp
12 p2129 A69-26772

- Aircraft collision avoidance systems development, current status and future prospects, discussing basic requirements, criteria and prototypes
13 p2295 A69-27330

- AH-56A helicopter manual and automatic terrain following and manual terrain avoidance systems, discussing nap-of-earth flight, design and simulation
[AHS PAPER 311] 17 p3002 A69-33544

- Situation/command system displays and maneuvers for collision avoidance systems, discussing pilot preferences
17 p3002 A69-34096

- Low cost pilot proximity warning instrument, discussing design influences of Xe strobe lights, atmospheric radiation transmission characteristics and detection considerations
17 p2917 A69-34103

- Bird hazard in aviation, discussing aircraft/bird collisions in France, protective measures and airport environment control against nesting and breeding
18 p3090 A69-34695

- Time/frequency technology using time-ordered reporting digital data for air traffic control to avoid airborne collision
[AIAA PAPER 69-795] 19 p3367 A69-35635

- Airborne collision avoidance system based on time-frequency techniques for use within ground based control systems, showing air/ground synchronization and collision geometry
19 p3371 A69-36735

- Air traffic safety enhanced through flight crew awareness of hazards, clear air turbulence detection and avoidance, collision avoidance, etc
22 p3868 A69-41151

COLLISION PARAMETERS

- Elastic scattering of electrons from argon atoms in argon air plasmas by shock tube microwave reflection method, measuring power reflection coefficient
[AIAA PAPER 68-138] 04 p0632 A69-14701
- Rarefied flow past sphere, analyzing collisionless flowfield structure and development as density increases
04 p0542 A69-14731
- Partially ionized hydrogen transport coefficients, using expressions containing collision integrals for charged particles
04 p0637 A69-15051
- Moment equations for general gas mixture from Boltzmann-like equations, evaluating collision integrals
04 p0633 A69-15436
- Elastic bodies collisions in presence of thermoelastic effects, investigating local inertial and thermoelastic forces effect on compression region shape
05 p0841 A69-16207
- Ion-molecule collisions of Ar-Co and N-No pairs, discussing charge exchange reaction rates and spiraling nature
05 p0797 A69-16428
- Kinetic model construction of maximum number of Boltzmann collision integral properties
05 p0797 A69-16679
- Parametric or impact parameter treatment for describing ion-atom collision at low or high impact velocities, reexamining approximate treatments
05 p0797 A69-16697
- Kinetic model describing collisions in nonequilibrium multicomponent plasma, studying pair collisions effect on stability of plasma-beam system
07 p1189 A69-18539
- Diffusion coefficients of H atoms in mixtures of He and Ar with hydrogen by catalytic sink technique, discussing rigid sphere collision diameters
07 p1185 A69-19300
- Rotational inelastic transitions in atom-diatom collisions, discussing restricted distorted-wave approximation, transition probabilities, impact parameters, inelastic and glory quenching, etc
07 p1185 A69-19302

Bounds on scattering lengths, phase shifts and other scattering parameters determining cross sections, noting variational bounds for zero incident energy
07 p1186 A69-19657

Partially ionized plasma oscillations in crossed magnetic and electric fields, noting role of LF particle collisions
08 p1370 A69-21079

Temperature stability of slightly ionized gas for arbitrary collision cross sections, discussing electron temperature variation as function of electric field strength
09 p1551 A69-22039

Local potential method extended to study plasma oscillations inhomogeneous kinetic equations in presence of linear or nonlinear collision operators
11 p1925 A69-24316

Direct Coulomb interaction matrix elements between hydrogen atoms in ground states calculated, presenting interaction potential
11 p1921 A69-24416

Collision integral kernels of kinetic equation for single component gas density matrix derived by Bogoliubov-Gubov method
14 p2458 A69-29169

Gain and loss collision integrals in Boltzmann equation for rigid sphere gas evaluated for distribution expressed as linear combination of Maxwellians
14 p2431 A69-29578

Rare gases total excitation cross sections absolute values measured in collision chamber, noting energy distribution of exciting electron beam, fine structure, etc
14 p2493 A69-29693

Linearized kinetic equation for perturbed electron distribution function, detailing plasma oscillations along magnetic field by Landau collision term
16 p2818 A69-31674

Kinetic model describing collisions in nonequilibrium multicomponent plasma, studying pair collisions effect on stability of plasma-beam system
21 p3776 A69-38691

Impact pressures during two body collisions, correlating pressure with particle speed
21 p3836 A69-38943

COLLISION RATES

Krook kinetic relaxation equation generalized to include approximate kinetic equations with velocity independent collision frequency
02 p0234 A69-12582

Electromagnetic oscillations in ionized plasma, assuming higher oscillation frequency than collision frequency
02 p0292 A69-12643

Frictional forces and collision frequencies for ions moving in neutral gases
03 p0421 A69-13328

Effective collision frequency deduced from ratio of microwave conductivity to electron density in PIG discharge plasma
05 p0804 A69-16442

Maximum number of binary collisions for three particles with zero range forces in relativistic rescattering singularities studies
08 p1353 A69-19788

Plasma electron density and collision frequency determination, using CW maser interferometer
08 p1359 A69-19987

Collisional excitation and ionization rates comparison in statistical equilibrium model atmosphere calculations
08 p1385 A69-20065

Voltage dependence of mobility limited electron current density in gas filled diode for collision frequency proportional to electron speed
09 p1462 A69-21326

D region electron concentrations and collision frequencies obtained from high power wave interactions experiment, presenting average winter collision frequency model
09 p1489 A69-21702

Electron density and collision frequency of MHD plasma determined directly by measuring phase shift and attenuation of propagating laser microwave signal
10 p1731 A69-23436

Molecular reaction rates and ion/electron vertical profile and concentrations in equatorial ionosphere, applying computer simulation to numerical solution of continuity equations
10 p1688 A69-23929

Electron flux parameters determination from ionograms and reflected signal amplitudes between 120-130 km, considering electron collision frequencies
10 p1688 A69-23931

Asymptotic solution for Fokker-Planck equation at low collision frequency, studying electron-ion collisions effect on universal instability in inhomogeneous plasma
11 p1930 A69-25358

Plasma turbulence effect on magnetosonic wave attenuation, noting increased electron and ion collision frequency and appearance of anomalous resistance
16 p2820 A69-31794

Electronic collision frequency measurement at F layer peak near ground sunrise time
16 p2779 A69-32197

Faraday effect and permittivity of hydrogen plasma measured simultaneously, determining electron density and collision frequency
17 p2919 A69-33394

Lower ionospheric electron concentration and collision frequency measurements by Nike-Apache rockets, suggesting geomagnetic anomaly in D region
18 p3127 A69-34798

Ionospheric electron density and collision frequency profiles examined for changes during December 1967 to January 1968 stratospheric warming
21 p3714 A69-38556

Ionospheric nondeviative radio wave absorption, noting roles of collisional and working frequencies and solar zenith angle
23 p4127 A69-42425

Ionospheric heating and velocity dependence of collision cross sections on transversely propagated equatorial hydromagnetic waves, discussing ordinary and extraordinary modes
23 p4161 A69-42437

Thermal nonequilibrium state and effective collision frequency between protons and electrons in solar wind plasma, explaining abnormal dissipation
24 p4368 A69-43187

COLLISION WARNING DEVICES

U WARNING SYSTEMS

COLLISIONLESS PLASMAS

Absorption of linearly polarized light in reflecting surface layer of collisionless plasma, calculating layer lifetime for reflection of light
01 p0127 A69-10283

Nonlinear hydromagnetic solitary wave propagation at angle to magnetic field in fully ionized quasi-neutral collisionless warm plasma, noting isotropic pressure effect
01 p0127 A69-10336

One dimensional Vlasov plasma nonlinear response to external electric field varying in space and time
01 p0133 A69-11214

Shear instability in unbounded collisionless cold plasma in external uniform magnetic field in current free case, noting dispersion relations
02 p0289 A69-12177

Collisionless plasma heating by hydromagnetic waves in solar wind
02 p0309 A69-12714

Green tensor for collisionless plasma, emphasizing relations between outgoing and ingoing electric fields
02 p0293 A69-12745

Existence and stability of periodic waves in cold collisionless plasma in magnetic field
03 p0474 A69-13143

Magnetosonic wave propagation across magnetic field in warm collisionless Maxwellian multicomponent plasma studied for small electron cyclotron and ion cyclotron radii
03 p0479 A69-14020

Fluctuations in multipole confined plasmas explained by solving general integral equation, yielding hydromagnetic and frequency modes
05 p0804 A69-16385

Solar wind model for electrons and collisionless ions temperatures and anisotropies
06 p0986 A69-16983

Cross field energy transfer in collisionless plasma across earth magnetospheric boundary, using computer and one dimensional sheet model simulation [ISAS-429]
06 p0916 A69-17023

Electromagnetic wave transmission and reflection at boundary of relativistic collisionless plasma, using Laplace transformation
06 p0968 A69-17783

Mixture Mach number defined for collisionless plasma flow about solid body by extending cold-ion theory [AIAA PAPER 69-78]
06 p0971 A69-18128

Wave propagation and instabilities in rotating anisotropic collisionless plasma, analyzing plane and cylindrical perturbations
07 p1195 A69-19438

Landau damping of long wavelength ion acoustic waves in collision-free one dimensional plasma with gravity field
08 p1359 A69-19983

Collisionless shock waves in rarefied plasma, discussing dispersion effect and oscillatory shock wave structure
08 p1303 A69-19996

Viscous stress tensor for collisionless plasma with anisotropic pressure in magnetic field
08 p1365 A69-20522

Quasi-linear theory of hydromagnetic waves in non-relativistic collisionless plasma, noting resonant diffusion effect on plasma heating mode
08 p1367 A69-20797

Microwave scattering from longitudinal plasma waves propagating in collisionless plasma column
08 p1276 A69-20798

Ion Landau damping and finite Larmor radius effects on dispersion relation of Kelvin-Helmholtz instability due to shear in ion fluid velocity
08 p1367 A69-20799

Fluid equations for collisionless plasma including finite ion Larmor radius and finite beta effects
08 p1368 A69-20802

Particle-wave interactions in weakly turbulent collisionless plasma, discussing ensemble average distribution function, diffusion, nonlinear Landau damping and nonlinear instabilities
08 p1368 A69-20803

Heating of collisionless plasma in magnetic mirror by random electric field transverse to magnetic field
08 p1368 A69-20805

Double adiabatic MHD fluid equations for electrons and ions with pressure gradients for collisionless plasma in magnetic field
08 p1369 A69-20815

Particle free path estimates for axisymmetric high specific impulse plasma accelerators, discussing collisionless plasma simulated by computer [AIAA PAPER 69-278]
09 p1563 A69-21233

Inhomogeneous collisionless plasma drift-oscillation stability in magnetic field augmented by E wave HF field
09 p1546 A69-21564

Collisionless plasma heating by damping hydromagnetic waves applied to solar wind qualitative model, discussing magnetoacoustic wave energy
09 p1607 A69-22426

Dynamics, stability and approach to equilibrium of bounded one dimensional collisionless plasma representing minimum energy states with nonlinear Vlasov equation solutions
11 p1924 A69-24305

Analog simulation of cylinder wave potential for hypersonic motion in collisionless plasma
11 p1926 A69-24756

Unstable ion sound wave propagation across magnetic field in collisionless shock waves, noting drift instability
11 p1930 A69-25273

Steady linearized aligned fields flow of collisionless plasma past slender body, noting effect of tensor conductivity
11 p1930 A69-25278

Steady equilibrium collisionless plasma in oscillating electromagnetic field, describing formalism for linear relation between perturbation and charges and currents induced in plasma
12 p2135 A69-26284

Nonlinear periodic wave propagation at angle to magnetic field in collisionless plasma studied by two fluid plasma equations
13 p2304 A69-27297

Magnetic curvature effect on collisionless plasma density gradient drift instabilities, covering mean ion Larmor radius and Alfvén modes
13 p2305 A69-27375

Variational method for time invariant states of collisionless plasma in oscillating electromagnetic field
13 p2314 A69-28365

I-V characteristics of electron emitting satellite in ionosphere, analyzing spherical Langmuir probe in collisionless plasma in magnetic field
14 p2511 A69-28956

Potential distribution between point in interelectrode gap and thermionic converter cathode in collisionless mode under transverse magnetic field
14 p2401 A69-29235

High speed streak cameras applicability to low density theta pinch studies, describing image converters design, operation and block diagrams
14 p2496 A69-29787

Collisionless Ce and K plasmas measurements to determine steady state parameters and LF oscillations, noting noise relationship to drift instability
14 p2499 A69-29849

Collisionless plasma slab drift mode stabilization at uniform temperature by oscillating electromagnetic field
14 p2499 A69-29851

Detached MHD shock wave formation in front of magnetic field acting as piston moving collisionless plasma, discussing time dependence, Alfvén speed and plasma parameters
14 p2502 A69-29958

Self consistent solutions for collisionless plasma penetration across magnetic field, showing electrons ability to accompany ions across field
15 p2661 A69-30923

Transverse instabilities in collisionless electron plasma in absence of permanent magnetic field with spheroidal velocity distribution, noting application to shock theory
16 p2817 A69-31645

Quasi-linear theory of waves in collisionless plasma in absence of external fields, relating wave energy growth and decay to plasma stability
16 p2817 A69-31646

Analytic expressions for motion of collisionless plasma created with isotropic velocities within uniform magnetic field, assuming equal electron and ion masses
16 p2818 A69-31673

Electromagnetic echo generation in collisionless spatially homogeneous plasma dependence on velocity distribution and magnetic interaction
16 p2818 A69-31677

One dimensional free expansion of collisionless plasma tested as function of thermal equilibrium and confinement, using Vlasov equations and computer
16 p2819 A69-31685

Collisionless drift plasma wave instability growth rate calculation noting destabilization from resonant electrons
16 p2820 A69-31691

Weak nonlinear hydromagnetic waves in cold collisionless plasma, using nonlinear perturbation method
17 p3010 A69-32866

Collisionless cylindrical Langmuir probe response in turbulent plasma for mean and statistical properties [AIAA PAPER 69-698] 17 p3010 A69-33438

Collision free earth shock wave gross and fine structure deduced fromOGO 5 plasma diagnostics [AIAA PAPER 69-676] 17 p2961 A69-33452

Structure of solitary waves propagating in collisionless plasma perpendicular to magnetic field, considering soliton wavefronts charge separation and relativistic velocity
17 p2922 A69-33696

Collisionless shock wave front turbulence in diluted plasma, including thickness, electron and ion component measurements
17 p3012 A69-33818

Collisionless shock wave generation and structure in zeta and theta pinches
17 p3013 A69-33819

Energy dissipation in collisionless shock waves generated in plasmas with 1-500 trillion/cm electron density by theta pinch, measuring axial ionic energy spectrum
17 p3013 A69-33820

Collisionless shock wave structure in plasmas, noting plasma and shock wave generation mechanisms
17 p3013 A69-33822

Collisionless plasma heating mechanisms from current layer turbulence in theta pinch experiment and shock wave front structure as function of initial magnetic field
17 p3013 A69-33824

Collisionless shock waves in plasma and ion and electron turbulent heating in high voltage theta pinches, noting magnetic disturbance
17 p3013 A69-33825

Anomalous absorption of electromagnetic wave in collisionless dense cylindrical plasma beam in circular waveguide, noting electric field strength for energy transfer
18 p3101 A69-34621

Damping of plane sinusoidal wave in cold collisionless plasma, studying supercritical amplitude oscillatory process
18 p3180 A69-34703

Shock wave propagation through collisionless magnetized plasma, using gun driven, laser and cesium plasma flow methods
19 p3379 A69-35759

Plasma ion and electron concentration perturbations in wake of body moving at high velocity in collisionless plasma under steady magnetic field
20 p3459 A69-37659

Thermal effects of resonant coupling hydromagnetic oscillations in inhomogeneous finite-beta plasmas, obtaining equations for coupling modes between Alfvén and magnetosonic waves
21 p3776 A69-38710

Antenna noise spectrum in collisionless isotropic plasma, considering plasma fluctuation theory and reciprocity theorem
21 p3683 A69-39284

Successive approximations convergence analyzed in solving supersonic collisionless plasma flow past magnetic dipole
23 p4156 A69-41853

Boundary layer separating collisionless plasma from one dimensional magnetic field for anisotropic particle velocity distribution functions, preserving charge neutrality in boundary layer
23 p4197 A69-42415

Guiding center Vlasov equation derived dielectric tensor of collisionless plasma, obtaining dispersion relation of Alfvén waves in warm plasma
23 p4197 A69-42416

Two stream instabilities, considering uniform infinite collisionless plasma with stream of electrons passing through ion-electron medium
24 p4355 A69-42685

Theoretical models for collisionless plasma shock waves in terms of nonlinear, magnetosonic, constant profile waves, turbulent- and electrostatic-shock structures, etc
24 p4355 A69-42694

Steady state interaction between collisionless plasma flow and immersed stationary magnetized or unmagnetized objects by inserting Cs ion accelerator into plasma wind tunnel
24 p4359 A69-43646

Light scattering from ruby laser beam passing through collisionless shock produced by H plasma compression measured by photomultiplier
24 p4360 A69-43748

COLLISIONS

NT ATOMIC COLLISIONS
NT COULOMB COLLISIONS
NT ENCOUNTERS
NT INELASTIC COLLISIONS
NT IONIC COLLISIONS
NT METEORITE COLLISIONS
NT MOLECULAR COLLISIONS
NT PARTICLE COLLISIONS

Aircraft in-flight collision, discussing difficulties and procedures of medical board of inquiry
05 p0715 A69-16628

COLLOCATION

Convergence of Multhopp collocation method for numerical solution of linear singular integrodifferential equation, noting use in airfoil, propeller and elasticity theory
02 p0271 A69-12056

Collocation method applied to solving contact thermoelasticity problem for short thick walled hollow cylinder attached to thin elastic shell in axisymmetric temperature field
18 p3217 A69-34595

Nonlinear free motion of conservative oscillator with one degree of freedom calculated by collocation method
19 p3438 A69-36308

COLLOIDAL GENERATORS

Charged colloids generation by electrostatic spraying for thruster concept, subjecting metal capillary needles to AC voltage [AIAA PAPER 69-495] 16 p2846 A69-32773

COLLOIDAL PROPELLANTS

Specific acoustic admittance of solid propellant burning surface for determining burning instability under rocket motor conditions
02 p0302 A69-11521

COLLOIDS

NT AEROSOLS
NT COLLOIDAL PROPELLANTS
NT FOG

Electropropulsion by thruster using colloidal carbon particles charged by electron bombardment to provide thrust, noting specific impulse
03 p0495 A69-13396

Variational solutions of one dimensional nonlinear Poisson-Boltzmann boundary value problems in theory of colloids and plasmas
06 p0968 A69-17784

Simulator for testing colloid microthruster, discussing spacecraft interfaces and time of flight thrust data [AIAA PAPER 69-314] 09 p1478 A69-22380

Virtual power principles applied to solving force acting on fluid consisting of colloidal suspension of polarized particles in neutral vehicle
12 p2136 A69-26404

COLOR

Stratospheric dust effect on twilight sky color, evaluating scattered radiation chromaticity for atmospheric models containing ozone
02 p0243 A69-12014

Relation between color index over lunar surface and solar rays angle of incidence, noting supplementary emission attributed to surface luminescence
03 p0506 A69-13089

Empirical relation between (B-V) color and radiation temperature by observing eclipsing variables undergoing total eclipses
03 p0469 A69-13964

Aircraft instrument lighting color effects on posture, exposure, scotopic absolute and acuity threshold and legibility for reading of instruments
03 p0380 A69-14073

Color and appearance properties of paint films and relations to amounts and properties of colorants, noting translucent plastics and metallized paint films
04 p0620 A69-14886

Photometric effects of UVB color indices ineffective in detecting double stars in Galaxy
07 p1216 A69-18854

Interstellar light absorption in Milky Way region of Cepheus analyzed by excess color technique
07 p1216 A69-18855

Relation between color index over lunar surface and solar rays angle of incidence, noting supplementary emission attributed to surface luminescence
14 p2516 A69-28771

Micrographic reagent coloring grains of Mo in relation to crystalline orientation applied to refractory metal welding and diffusion studies
14 p2505 A69-29221

Color signal light gun for aircraft control at airport towers, noting pilot tests for familiarity with signal code
17 p2914 A69-33185

Spectral reflectivity differences /color differences/ on lunar surface in visible region, indicating compositional difference origins
17 p3037 A69-33653

Color coding effect on alphabetic filing names, comparing first and second letter codes and no color code condition
17 p2916 A69-34004

Variation influence of total absorption to color excess ratio on galactic spiral structures indicating ineffective application of variable-extinction method to Q spectra
18 p3199 A69-34914

Color coded area sensitivity maps of photomultiplier tubes by multicolor display technique, noting focus electrode voltage
19 p3305 A69-35724

Wavelength dependence of stellar scintillation, discussing apparatus to detect color effect in twinkling
19 p3401 A69-35809

Colors production on electroluminescent display using phosphors impressed-frequency/emission-color relationships together with chromatic biasing
24 p4286 A69-42900

COLOR CENTERS

Ruby laser output energy degradation due to pump light absorption by color centers of ruby rod
02 p0256 A69-12358

Laser holography using colored KBr crystals subjected to hard gamma radiation as photosensitive material
04 p0598 A69-14855

Laser holography using colored KBr crystals subjected to hard gamma radiation as photosensitive material
15 p2608 A69-30247

Ruby laser output energy degradation due to pump light absorption by color centers, discussing roles of defects and impurities in center formation
16 p2795 A69-31697

Second harmonic generation in media with center of inversion following deformation by laser beam or static pressure
19 p3332 A69-35872

F center formation and X ray and photostimulated F-band luminescence in europium ion-activated potassi-

um halides as function of temperature and X ray dosage
19 p3383 A69-36164

Electron spin memory in optical pumping cycle of potassium halides F centers, measuring relaxed excited state g factors and spin resonance line widths
23 p4198 A69-42419

COLOR PHOTOGRAPHY

Aerial color photography for terrain analysis noting development of cameras, filters, high speed emulsions and processing equipment
01 p0077 A69-10023

Photoelectric photometry of Mercury, Venus, Mars, Jupiter and Saturn /1963-1965/, determining phase curves and monochromatic albedos
04 p0663 A69-15383

Color and black and white negatives effectiveness for photointerpretation, noting color imagery advantages
08 p1311 A69-19820

Color excesses in Kapteyn Selected Area 4 using photovisual /yellow/ and photographic /blue/ magnitudes from catalog data
08 p1388 A69-20241

Photogrammetric color negative prints, slides, etc, improved by scanning beam modulation
09 p1494 A69-21634

Qualitative considerations of color indices grouping for Abell-1781 cluster of galaxies, table of data and identification charts
10 p1775 A69-23204

Six color stellar photometry of 159 field stars including subdwarfs, high velocity stars and 50 Hyades stars, tabulating color data
10 p1788 A69-24122

Large scale color and color IR aerial photography evaluation to determine interpretability for improving range resource inventories
11 p1880 A69-24265

Multicolor hologram recording and reconstruction gas lasers, discussing control of ghosts in three dimensional image
11 p1882 A69-24679

Magellanic Clouds color composite photographs prepared from negatives taken in blue and IR light
12 p2152 A69-25801

Flow field over plain or complex bodies with pressure density changes, using high speed schlieren apparatus with color strip filter
12 p2088 A69-26183

Electric fields effect on flame front propagation structure and velocity, obtaining color toepelograms by high speed photography
12 p2190 A69-26192

Color photograph of group of meteor trails with red glow beneath by automatic camera from balloon at 30.6 km
12 p2157 A69-26231

Green flash photographed at sunset by aircraft at 10.6 km over Pacific, noting correspondence with visual observation
12 p2066 A69-26232

Variable comparison star identified from photoelectric observations of RR Lyrae star BR Aqr, showing light and color curves
14 p2519 A69-29139

Image quality of color disks in aerial photographs using panchromatic, color positive, color negative and false color films, measuring reflected sunlight
14 p2450 A69-29600

Color IR film improvement for high altitude remote sensor, using auxiliary minus-visual filters
15 p2609 A69-30457

Response color curves of U, B, V photometric system compatible for stellar observation, including U revision
15 p2689 A69-30562

13 color narrow band photometry of 1000 bright stars in tubular form, discussing sample points, Balmer discontinuity, absolute energy calibration, etc
17 p3038 A69-33692

Spectral reflectances of objects and vegetative backgrounds to generate color photographic technique increasing detection sensitivity and rate
18 p3133 A69-34247

Four color photometry data of late F type stars in general catalog tabulated with columns for HD and GC numbers, apparent visual magnitude, etc
18 p3195 A69-34430

Environmental studies using orbital photography, discussing color, color IR, black and white applications from Gemini and Apollo programs
18 p3132 A69-35275

Photographic film properties, discussing base material, emulsion, photochemical process, sensitometry, densitometry, granularity and color film
20 p3541 A69-37746

Schmidt camera image quality examined with spot diagrams, emphasizing methods of color confusion reduction over wide wavelength range
20 p3546 A69-38272

Comparative photointerpretation from panchromatic, color and Ektachrome IR aerial photography
22 p3944 A69-40039

Photogrammetric contours plotting from aerial color films
22 p3944 A69-40045

Cepheid variable stars distance estimated from UVB three color photoelectric photometry data
22 p4031 A69-40943

Color aerial photography - Conference, New York, June 1969
22 p3948 A69-40985

Glass filter systems for aerial color photography developed from spectral studies of sunlight, skylight and airlight in Rayleigh atmosphere
22 p3948 A69-40986

Multispectral processing of Apollo 6 earth photograph, evaluating geologic, vegetative and cultural features from red, green and blue portions of visible spectrum
22 p3941 A69-40987

Color chemistry concept producing high quality color negatives and prints in existing black and white processing systems
22 p3948 A69-40990

Photographic properties of Cibachrome silver dye bleach materials for yielding color reflection prints directly from color transparencies, discussing applications to aerial photography
22 p3949 A69-40991

Aerial color film processing systems
22 p3949 A69-40992

Color and color IR aerial photography compared for estuarine and marshland research, considering detection of turbidity, pollution, salinity, etc
22 p3942 A69-40993

Optical engineering and quality control of photogrammetric instruments for aerial color photography, discussing lenses, filters, projectors, plotters, electro-optical rectifier, etc
22 p3949 A69-40996

Multispectral color aerial photography using broadband spectral filters for detecting and identifying small environmental features of earth surface
22 p3949 A69-40997

Camera lenses and techniques for aerial color photography, discussing atmospheric influences, filters, films and exposure times
22 p3950 A69-40999

Xenon plasma continuous illumination sources design and operation for night and color aerial photography covering photogrammetric resource surveys, ground traffic, flight paths, etc
22 p3950 A69-41000

COLOR TELEVISION

Laser display technology, discussing experimental systems, light sources, modulation and scanning
03 p0431 A69-13850

Laser color TV projection-display system using moving mirrors and dual polarization scanner
07 p1137 A69-19740

Color TV system for Earth Resources Observation Satellite /EROS/, discussing resolution in relation to spectral separation through data simulation study [SMPTE PAPER 105-79]
12 p2077 A69-25767

Apollo 10 field sequential color TV system, describing camera modifications, systems design and equipment compatibility problems
18 p3101 A69-34810

Effective color TV transmission via satellite using PCM/PSK modulation, noting dependence on available equipment, bandwidth, desired error rate and SNR
23 p4130 A69-42520

Communication satellites european development, discussing economic and technological problems, stressing color TV and SHF/FM transmission, compared to conventional ground station transmission
24 p4393 A69-43133

COLOR VISION

Tinted ophthalmic media effect on detection and recognition of red signal lights in daylight, noting allowable coloration for aviation use
01 p0022 A69-11341

Aircraft instrument panel lighting color and intensity preference by pilots for taxiing, takeoff, cruising flight and landing
05 p0715 A69-16622

Aircraft instrument panel lighting, comparing red and white colors for general and peripheral vision
05 p0715 A69-16623

Instrumental reward experiment using concept learning paradigm with word-color compounds as stimuli
07 p1064 A69-18636

Foveal luminances for chromatic and absolute thresholds for hue identification in case of small targets
07 p1183 A69-19649

Squirrel monkey retinas spectral stimulation, determining differential color responses reaching striate and prestriate cortex
22 p3879 A69-40844

Flicker characteristics of eye color receptive systems by measuring modulation thresholds for sinusoidal flicker of color superimposed on complementary color background
22 p3880 A69-40851

Tritanope and trichromat experiments for parafoveal visual response of tritanope, measuring spectral sensitivity and absolute threshold values
22 p3882 A69-40869

Hue shift and brightness enhancement of flickering light measured as function of illuminance, wavelength and target size
22 p3882 A69-40871

Blue cone mechanism contribution to mesopic function in producing Purkinje shift with luminance decrease, measuring sensitivity by flicker technique
22 p3883 A69-40880

COLORATION

U COLOR

COLORIMETRY

Optimized formula for MacAdam color differences with modification in weighting of chromaticity and lightness, discussing Fortran IV computer programs development
04 p0564 A69-14883

Boron determination in type 1 carbonaceous chondrites by nonaqueous colorimetry, comparing results with ordinary chondrites
04 p0661 A69-15147

Cholesteric liquid crystals application to trace contamination detection, describing color response measurement
06 p0885 A69-17842

Cluster star color indices determination by measuring intensities at nodes of extrafoveal star spectra
08 p1387 A69-20122

Colorimetric studies of galaxies exhibiting red shift with increasing radial distance from center
12 p2164 A69-27025

Colorimetric method to determine small amounts of Mn in metallic Ti by potassium periodate solution
20 p3544 A69-37813

COLUMBIUM

U NIOBIUM

COLUMNS [PROCESS ENGINEERING]

Column method of measuring thermal conductivity of CO and oxygen in 350-1500 degrees K temperature range, discussing error sources and data reliability [AIAA PAPER 69-603]
17 p3073 A69-33298

COLUMNS [SUPPORTS]

NT TAPERED COLUMNS

Linearized simple beams and columns theory for anisotropic materials, discussing flexural and extensional effects coupling in tension test
07 p1171 A69-18727

Thin walled channel columns section stability analyzed in terms of overall /Euler/ and local buckling
13 p2361 A69-27440

Linear elastic columns dynamic stability under time dependent axial load, investigating almost-sure asymptotic stability
16 p2872 A69-31911

Prestressed beams, columns and plates nonlinear response, statistical behavior and transverse cracking under axial compression, describing strength and stiffness
17 p3060 A69-33568

Buckling in process of loading idealized elastoplastic Shanley column, noting continuous increase possibility
18 p3217 A69-34596

Wrinkling of pressurized cylindrical and conical fixed free membrane column under lateral load, considering membrane sheets elastic properties
22 p4045 A69-40814

Creep buckling time of simply supported column under nonuniform temperature distribution over cross sections 24 p4400 A69-43053

COMA

Two phase flow in comas of dust comets, noting acceleration of gaseous and particle phases of continuous streams and particle vaporization 06 p1000 A69-16984

COMBAT

Clinical analysis of combat and noncombat ejection experience of USAF 06 p0878 A69-16960

A-7 Corsair 2 introduction to fleet and combat operations in Southeast Asia 06 p0867 A69-17660

Characteristics, employment and tactics of Huey Cobra attack helicopter in Vietnam, discussing three primary weapon configurations 06 p0867 A69-17661

Aviation combat performance criterion by analyzing questionnaires sent to combat deployed flight surgeons, noting possible value of peer rating 09 p1447 A69-22549

Computerized air combat simulation with comparison of analog and digital approaches, noting Air to Air Combat/Fort Worth [AIAA PAPER 69-811] 19 p3289 A69-35629

Night vision requirements of Vietnam combat pilots investigated for relationship to Skyraider fatal crash during target strafing and H-34 helicopter crash landing 23 p4107 A69-41807

COMBINATIONS [MATHEMATICS]

Mariner 1969 high rate telemetry system portions pertinent to combinatorial mathematicians, discussing coding and encoding 06 p0890 A69-17862

COMBINED STRESS

Elastic/viscoplastic wave propagation in thin tubes under combined stress of tension and torsion, using viscoplastic constitutive equations 02 p0344 A69-12293

Creep behavior of nonlinear rigid polyurethane foam under combined stress and applicability of multiple integral and modified superposition principle 04 p0680 A69-15155

Elastic stability of thin circular cylindrical shell with elastic core, longitudinal and transverse ribs and initial defects under combined pressure and thermal stress 05 p0832 A69-15692

Circular bar elastoplastic behavior under combined axial force and torque in strain hardening range, noting elastic compressibility effects 06 p1023 A69-17371

Stability of cylindrical shell reinforced by circular ribs under combined action of external pressure and axial forces, using characteristic equation 07 p1238 A69-19687

Nodal lines shape in individual flats for long plates in combined shear and compression with sinusoidal edge rotations in longitudinal direction 11 p1893 A69-25137

Buckling of long flat panel in combined compression and shear with sinusoidal edge moments and support on two edges and on point supports 11 p1984 A69-25138

Tresca shear stress fatigue failure criterion and experimental data for combined bending and torsion acting out of phase 11 p1984 A69-25140

COMBUSTIBILITY

U FLAMMABILITY

COMBUSTIBLE FLOW

Combustion and flame stabilization in axisymmetric laminar or turbulent H flows, noting combustion rates and flame breakdown conditions 02 p0355 A69-12673

Compressible combustor turbulent shear flow analysis, discussing eddy diffusivity, density fluctuations, vorticity intensification and turbulent transport [WSCIPAPER 68-27] 06 p1034 A69-17793

Combustion in compressible turbulent mixing flows, discussing mixing facility, experimental results and numerical analysis [WSCIPAPER 68-28] 06 p0969 A69-17794

Viscid-inviscid equations solution, describing flows with coupled mixing, combustion and lateral pressure gradients [AIAA PAPER 69-83] 06 p1037 A69-18109

Mixing and combustion of gaseous and particle laden jets in air stream, analyzing turbulent, coaxial and jet mixing flows [AIAA PAPER 69-33] 06 p1038 A69-18146

Nonequilibrium chemical reaction effect on decay in spontaneous explosion for reactive expelled gas and inert expelling gas 07 p1119 A69-18705

Turbulent diffusion and Rayleigh-Taylor instability in inhomogeneous flow of combustion gases circulating through magnetic field 13 p2310 A69-28032

Supersonic combustible gas mixture flow around circular cone, discussing ignition by shock wave and flow modification by conical flame front 15 p2548 A69-31007

Trails arising in wake of fan type jets in transverse gas flow during uniform fuel-air mixture combustion 16 p2879 A69-32140

Model for mixing and combustion of compressible particle laden ducted flows [AIAA PAPER 69-460] 16 p2880 A69-32650

Combustion effects on mixing of axisymmetric supersonic and turbulent free jets to obtain species concentrations, pitot pressures and temperatures [AIAA PAPER 69-538] 16 p2843 A69-32705

Combustible mixtures flow past bodies, discussing equation for shock polar for exothermal discontinuities at subsonic and supersonic velocities 19 p3241 A69-36780

Hydrogen-air combustion in supersonic flow past sphere determined with allowance for chemical reactions nonequilibrium rates at high pressure and temperature 24 p4408 A69-43488

COMBUSTION

NT AFTERBURNING

NT BOUNDARY LAYER COMBUSTION

NT DEFLAGRATION

NT FUEL COMBUSTION

NT HYDROCARBON COMBUSTION

NT HYPERSONIC COMBUSTION

NT METAL COMBUSTION

NT PROPELLANT COMBUSTION

NT SOLID PROPELLANT IGNITION

NT SPONTANEOUS COMBUSTION

NT SUPERSONIC COMBUSTION

Wet oxidation process for management of organic waste products in closed ecologies of long term multimanned space missions [SAE PAPER 680714] 03 p0380 A69-13443

French collection of papers on oxidation and combustion covering reaction characteristics, thermodynamics, chain reactions, flammable gas mixtures, etc 06 p1030 A69-17412

Phenomenological characteristics of oxidation reactions and combustion, noting nature and physical state of mixtures, localization of reaction and chain mechanisms 06 p1031 A69-17413

French collection of articles on oxidation and combustion, Volume 2 06 p1032 A69-17419

Reciprocal interaction of combustion wave and field of turbulence, discussing aerodynamic principles, turbulence effect on flame propagation speed and measuring methods 06 p1032 A69-17420

Combustion in heterogeneous systems, considering diffusion flames and fine droplets dispersed into gaseous oxidizer in fog form 06 p1032 A69-17421

COMBUSTION CHAMBERS

Combustion chamber equation for liquid fuel rocket engine, considering time varying ignition lag 01 p0142 A69-10090

Adiabatic stirred reactor, discussing steady state nonlinear equations of reactant gases combustion 02 p0352 A69-12316

Flame stabilization on rectangular burners, discussing blow-off limits correlation by velocity gradients close to corners 02 p0353 A69-12320

Electrically controlled heat transfer between flat parallel flow hydrocarbon diffusion flame and walls of combustion chamber 02 p0353 A69-12324

Glass fiber reinforced plastic /GFRP/ roving end grains in rocket combustion chambers, discussing design and structural parameters 02 p0305 A69-12748

High pressure rocket engine design, considering complete combustion, propellant feed system overall efficiency and thermodynamic gain 03 p0495 A69-12888

Diathermal regenerative cooling of combustion chambers and engine nozzles with supercritical heat transfer mode 03 p0495 A69-12970

Jet engine exhaust composition and methods for reducing smoke emission through burner design changes, noting primary zone fuel and airflow pattern [SAE PAPER 680348] 03 p0495 A69-13350

Temperature drop in combustion chamber of open cycle MHD power plant due to added potassium carbonate as function of various parameters 03 p0369 A69-14162

Thermodynamic computations for combustion product temperature and flow rate as function of pressure in burner and excess air ratio 04 p0684 A69-14487

Soviet book on gas dynamics of solid fuel rocket motors covering combustion chamber flow, nozzle and thrust characteristics, pressure relaxation and channel charge 04 p0647 A69-15493

Spherical deflagration and detonation waves in diluted stoichiometric hydrogen-oxygen mixtures in hemispherical combustion chamber 06 p1034 A69-17927

Shock tunnel simulation of scramjet combustion chamber performance [AIAA PAPER 69-84] 06 p0985 A69-18165

HF instability of steady combustion process with allowance for elastic strains in chamber walls 07 p1242 A69-18993

Fuel mixing mechanism in diffusion type supersonic combustion, noting influence of combustor configuration and fuel density [AIAA PAPER 69-32] 07 p1242 A69-19266

Flame burnout of atomized hydrocarbon fuel in gas turbine combustion chambers as function of ratio of time to total burnout time 08 p1420 A69-19999

Optimal length conditions of liquid rocket combustion chambers, considering propellants, injection conditions, etc, noting graphs and differential equations solutions 08 p1376 A69-20606

Combustion in high power jet engine combustion chamber in case of continuous and intermittent liquid fuel injection 08 p1421 A69-20762

Combustion chamber design for advanced gas turbines, noting influence of fuel air mixing and air flow distribution 09 p1573 A69-22612

Performance analysis of combustion chambers with continuous air admission along flame tube, deriving governing equation from reaction kinetics 09 p1624 A69-22618

Heat release in combustion chambers of propulsion and lift engines considering various parameters of materials and design problems 09 p1625 A69-22619

Gas turbine engines smoke emission, considering smoke measurement, flame structure, carbon production, pressure effects fuel-air ratio, etc 09 p1573 A69-22622

Refractory ceramic materials use for advanced combustion chamber design, stressing brittleness effect and current fabrication techniques 09 p1531 A69-22624

Injected propellant behavior during one dimensional passage through rocket combustion gas chamber, considering Reynolds number and propellant characteristics 11 p1941 A69-24329

Combustion instability problems in rocket motors, emphasizing strongly coupled pressure oscillations in combustion chambers 11 p2003 A69-25597

Gas turbine combustion chamber design factors including combustion volume, burning zone, dilution zone, pressure drop, fuel preparation, injection and ignition, exhaust smoke, etc [IME PAPER 3] 12 p2146 A69-25789

Tubular gas turbine combustion chamber design for optimum mixing performance using flow and mixing data of cold air injection into hot gas stream [IME PAPER 15] 12 p2147 A69-25793

Fiber reinforced space vehicle combustion chambers and cryogenic fuel tanks, discussing design and elastomechanical problems 12 p2176 A69-25860

Helmholtz resonance in rocket injectors as function of frequency response of interaction between chamber pressure and dissolved gas-fuel injection flow rate 12 p2148 A69-26806

Turbine and jet engines kerosene fuels tests in small and medium size laboratory combustion chambers 13 p2240 A69-27932

Shorter combustors for high temperature jet engines of high speed aircraft, considering lifetime, shroud scoops, overheating, warpage, etc

14 p2509 A69-29433

Rocket motors with combustion chambers of variable geometry for hybrid propellants, stressing toroidal chamber

15 p2671 A69-30600

Axial gas turbine efficiency and work functions, discussing turbine using isothermal high velocity combustor

16 p2837 A69-32064

Combustion bomb testing of propellants containing fluorocarbon binder and ammonium perchlorate, noting unique ignition, combustion and extinction properties

[WSCIPAPER 69-9] 16 p2831 A69-32349

Pilot chamber initiated thermal decomposition reactor concept for monopropellant thruster, discussing thrust levels and throttling ratios

[AIAA PAPER 69-420] 16 p2841 A69-32685

Flight performance prediction for throttling bipropellant rocket engine utilizing ablative combustion chamber throat, discussing lunar module descent engine

[AIAA PAPER 69-452] 16 p2841 A69-32690

Metal oxide particle growth processes in rocket chambers and nozzles, using generalized kinetic-coagulation equation

[AIAA PAPER 69-541] 16 p2844 A69-32724

Supersonic combustion for high Mach number high altitude flight, discussing laboratory simulation for actual flight condition and chamber design

[AIAA PAPER 69-458] 16 p2880 A69-32743

Nonequilibrium inlet conditions effect on combustor performance during H and vitiated air combustion, studying ignition delays

[AIAA PAPER 69-457] 16 p2881 A69-32767

Temperature and flow measurements in jet engine combustion chamber, discussing design and calibration of gasdynamic thermometer, double thermocouple and flow probe

17 p2945 A69-32947

Continuous mode operation in hypergolic bipropellant low thrust rocket motors, discussing high temperatures reached by combustion chamber walls and cooling solutions

17 p3019 A69-33335

Fiberglass reinforced plastics internal heat shielding for isopropyl nitrate rocket combustion chamber, considering lining resistance and safety during repeated firing /Ludion motor/

17 p3019 A69-33343

Modified liquid fueled pulsating combustion chamber operating as Helmholtz cavity resonator, measuring chamber pressure as function of time

17 p3074 A69-33410

LF oscillations in simple combustion chamber using gaseous propane fuel, discussing association with progressive flame necking

18 p3230 A69-34837

High temperature combustion chamber as high velocity gas generator, noting application to MHD power generator research

18 p3184 A69-34931

Kinetic model and steepest descent method to optimize one dimensional combustor

[AIAA PAPER 68-644] 19 p3448 A69-35943

Acoustic measurements at room temperature for determining losses in rocket chamber during combustion instability, using small scale model

19 p3394 A69-35946

Low smoke emission combustors for aircraft turbine engines, discussing effects on ignition and exit temperature distribution

[AIAA PAPER 69-493] 19 p3394 A69-36299

Nonlinear periodic oscillations in liquid rocket combustion chambers for different chamber models and burning rate response formulations

19 p3449 A69-36352

Film vaporization of fuel in combustion chambers of aircraft turbines, determining concentration and velocity distributions of fuel and air

20 p3633 A69-37921

Film vaporizing gas turbine combustor design including performance tests and combustion physics

21 p3784 A69-38607

Liquid propellant rocket injectors response to HF chamber pressure oscillations using one dimensional model

21 p3786 A69-39235

Monograph on electrically heated turbulent flames in cylindrical combustion chamber, investigating temperature distribution and stability

21 p3853 A69-39707

Supersonic flow stability with energy input applied to reaction kinetics of processes in aircraft and rocket combustion chambers

24 p4248 A69-43642

Intermediate hydrazine-RFNA reaction product formed on injector nozzle and combustion chamber surfaces after fuel injection without ignition analyzed by various methods

24 p4365 A69-43669

COMBUSTION CONTROL

Hydrogen bromide, HI and HCl effects on hydrogen-air mixtures flammability, discussing flame propagation inhibition efficiency

02 p0304 A69-12315

Aged boric acid coated silica reaction vessels, showing reduced surface effects and high reproducibility in oxidation reactions

02 p0205 A69-12322

Factor analysis applied to identifying extremal plants, presenting regression analysis based on least squares techniques to calculate mathematical model coefficients

05 p0737 A69-15888

Flame inhibition with electron attachment observed using halogenated hydrocarbons

06 p1034 A69-17926

Activation energies in baffled stabilized flame deduced from reaction zone using gas chromatography

06 p1035 A69-17930

Extinction by depressurization of AP composite solid propellants theory to predict rate of pressure decrease required to achieve flameout

[AIAA PAPER 69-176] 06 p0983 A69-18102

Hydrogen-air supersonic combustion at low densities, discussing laboratory computer simulation based on boundary layer concepts and finite rate chemistry

[WSCIPAPER 68-29] 07 p1240 A69-18358

Tungsten delay powders combustion mechanism and intermediate stages of burning process, noting burning rate

[WSCIPAPER 68-19] 07 p1202 A69-18370

Heat release in combustion chambers of propulsion and lift engines considering various parameters of materials and design problems

09 p1625 A69-22619

Gas turbine combustion control at high pressure, considering mixing, fuel evaporation, spray penetration and cone angle

09 p1625 A69-22620

Chemical mechanism of two stage spontaneous ignition controlled by cool flames of alkane-air mixtures under engine conditions to avoid knocking

11 p1998 A69-24479

Semiempirical correlation of characteristic velocity for Otto Fuel II during monopropellant combustion, assuming droplet vaporization as rate controlling process

[AIAA PAPER 69-419] 16 p2877 A69-31843

Point defect structure to control ammonium perchlorate burning rate, discussing thermal analysis data correlations, isothermal decomposition, etc

[WSCIPAPER 69-17] 16 p2831 A69-32355

Kinetics of combustion promotion of hydrogen-hydrocarbon mixtures by active particles, free atoms and free radicals using differential equations

17 p3069 A69-33139

COMBUSTION EFFICIENCY

Laminar heat transmission coefficients in combustion zone for particular oxygen and kerosene mixture

08 p1421 A69-20585

Combustion in high power jet engine combustion chamber in case of continuous and intermittent liquid fuel injection

08 p1421 A69-20762

Performance analysis of combustion chambers with continuous air admission along flame tube, deriving governing equation from reaction kinetics

09 p1624 A69-22618

Gas turbine combustion control at high pressure, considering mixing, fuel evaporation, spray penetration and cone angle

09 p1625 A69-22620

Ionizing radiation effects on combustion of ammonium perchlorate compacts with and without fuel addition, considering X ray, electron and plasma radiation

11 p1941 A69-25194

Semiempirical correlation of characteristic velocity for Otto Fuel II during monopropellant combustion, assuming droplet vaporization as rate controlling process

[AIAA PAPER 69-419] 16 p2877 A69-31843

Combustion performance evaluation program demonstrating high performance with space storable propellant combination of FLOX, methane and ethane

[AIAA PAPER 69-507] 16 p2829 A69-31848

Combustion and exhaust losses in gas turbines, recommending pulsating combustion for increased useful energy

17 p3021 A69-33360

Rocket motor combustion efficiency evaluated by chemical energy conversion to equilibrium, applicable to fuels, oxidizers and combustors at subsonic or supersonic velocity

23 p4239 A69-41919

Li-F-H tripropellant study, discussing injection method variations and thrust chamber configuration effects on characteristic velocity efficiency and heat flux measurement

24 p4362 A69-43128

COMBUSTION HEAT U HEAT OF COMBUSTION

COMBUSTION PHYSICS

Gas combustion hydrodynamic stability using feedback equation and theorems for variations in mass and momentum vector

01 p0173 A69-10087

Combustion response of hydrazine-nitrogen tetroxide hypergolic rocket propellants to transverse gas flows, noting coupled and uncoupled oscillations

01 p0175 A69-10112

Book on combustion covering aerodynamic and chemical aspects, combustion instability, detonation and rocket propellant combustion

01 p0176 A69-10906

Olefins combustion studies, considering influence on hexane combustion at different oxidation stages leading to ignition

02 p0352 A69-12309

Spherical flames of spark-ignited dust clouds, discussing streak film photographs, flame propagation, particle burnout time and burning velocities

02 p0353 A69-12323

Combustion model for rapidly burning involatile condensed materials, obtaining combustion rates

02 p0355 A69-12672

Rocket engine combustion mechanism of ammonium perchlorate composite propellants

03 p0532 A69-13002

Unsteady motions of diffusion flame sheet due to perturbations of reactant concentration, approximating species and energy conservation requirements

03 p0532 A69-13014

Mathematical analysis of oxygen diffusion to coal grains during coal dust combustion, evaluating kinetic constants by burning time

04 p0687 A69-15167

Coal grain combustion rate and duration at finite air excess coefficient, solving combustion process equations under steady state assumption

04 p0687 A69-15168

Explosive combustion of hydrogen at high pressures, showing attainment of constant value of hydrogen peroxide

05 p0849 A69-16615

Chain reaction theory defining kinetic mechanism giving rise to explosion, noting conservation of free valences and formation and disappearance of radicals

06 p1031 A69-17415

Flame establishment and propagation in gas phase taking into account aerodynamic and chemical kinetics

06 p1031 A69-17418

Combustion in compressible turbulent mixing flows, discussing mixing facility, experimental results and numerical analysis

[WSCIPAPER 68-28] 06 p0969 A69-17794

Solid propellant burning rate behavior during abrupt environmental pressure excursions, using transient combustion model

[AIAA PAPER 69-172] 06 p1036 A69-18046

Nonadiabatic reacting homogeneous system undergoing density changes, predicting chemical reaction rates and intermediate combustion products from chain reaction kinetics

[AIAA PAPER 69-87] 06 p1036 A69-18054

Transverse secondary gaseous injection penetration into confined supersonic flow

[AIAA PAPER 69-2] 06 p0913 A69-18080

Nonsteady combustion models for gases, liquid fuels and solid propellants, reviewing errors in physics and mathematics

[AIAA PAPER 69-178] 06 p1037 A69-18100

Quasi-steady combustion model of fuel droplet with convection, including pressure effect

[AIAA PAPER 69-147] 06 p1037 A69-18114

Sustained combustion initiation in subatmospheric gaseous fuel-oxidant mixtures by UV radiation at room temperature, measuring parameters as function of mixture pressure

[AIAA PAPER 69-88] 06 p0983 A69-18118

Adiabatic kinetic calculations of chemical additive effects on ignition delay of hydrogen-oxygen-argon gas mixtures
[WSCI PAPER 68-52] 07 p1239 A69-18316

Regression rate model for pressure sensitive hybrid combustion based on classical turbulent flame theory
[WSCI PAPER 68-22] 07 p1240 A69-18362

Chromium oxide additions effects on reaction rates decrease during ammonium perchlorate and nitrate combustion
08 p1375 A69-20340

Combustion in advanced gas turbine systems - Conference, Cranfield, Bedfordshire, England, April 1967
09 p1624 A69-22611

Turbofan engines augmentation, evaluating duct heater, bluff body stabilizers, piloted can combustors, flameholding techniques and afterburner tests
09 p1573 A69-22617

Film cooling injection slots number and position over flame tube and minimum cooling airflow in aircraft gas turbines
09 p1625 A69-22623

Thermal approach to pulsating combustion, determining temperature-time variation, frequency and pressure from mathematical model
09 p1625 A69-22694

Nozzle flow temperature patterns of relaxing combustion gases compared at different temperatures and pressures, using kinetic-chemical calculations
[DVL-896] 10 p1809 A69-23644

Steady flames transition into spherical detonation in various gas mixtures using high speed photography in sealed volumes
10 p1810 A69-23897

Leading edge conditions of obstacle exuding fuel into oxidizer stream, using Oseen equations in parabolic coordinate system
11 p1997 A69-24307

Critical conditions in spherical reacting mass, noting oscillatory nature of critical parameters in truncated Arrhenius rate on basis of nontruncated form
11 p1998 A69-24480

Combustion chemical reactions kinetics of gaseous phase systems, discussing temperature, reaction rates extrapolation, hydrogen and hydrocarbons
11 p2000 A69-25185

Hydrodynamic instability of normal flame and turbulent combustion of gas mixtures, considering surface and volume combustion models
11 p2000 A69-25186

Combustion mechanism of condensed inflammable systems such as gunpowder and other explosives, discussing combustion stability
11 p2000 A69-25187

Ignition dynamics of solid materials with differing kinetic and thermophysical parameters, emphasizing temperature growth during chemical reaction leading to ignition
11 p2000 A69-25188

Ignition of condensed homogeneous combustible materials in presence of phase transition in heated layer, discussing temperature distribution and ignition delay time in ammonium perchlorate
11 p2000 A69-25189

Ignition critical conditions based on reactions in condensed phase, discussing initiation from pulsed and continuous external heat sources, heat release by chemical reactions of ignition, etc
11 p2001 A69-25191

Unsteady heating of fuel mixture in vertical cylindrical container with Arrhenius heat source, discussing heat conduction equations and wall temperature effects
11 p2001 A69-25192

Hybrid chemical rocket theory and design noting radiation effects, regression and convective heat transfer
11 p1944 A69-25589

Spherical monopropellant droplet radially symmetric burning during adiabatic vaporization and direct decomposition, examining near-equilibrium limit by asymptotic analysis
12 p2190 A69-25948

Soviet book on combustion, detonation and explosive energy of condensed systems covering stable/unstable processes
12 p2190 A69-26757

Steel cylinder wall materials effects on flame propagation at constant volume of propane-air mixtures
13 p2379 A69-28363

Turbulent burning velocity definition for one dimensional turbulent flow and average flame orientation perpendicular to flow direction, discussing transient flames in turbulent environment
13 p2379 A69-28452

Stable homogeneous combustion of condensed substances /CS/, systematizing and analyzing elementary CS combustion models
13 p2379 A69-28454

Equations for steady state combustion of fuel drops in oxidizing atmosphere integrated numerically, obtaining ignition and extinction conditions
13 p2379 A69-28456

Luminous spherical fog layer surrounding burning zirconium droplet during free fall through oxygen containing atmosphere, noting effect on mass and heat transfer processes
13 p2380 A69-28462

Positive ion concentration in subsonic high velocity laminar flames determined by interpreting kinetic and diffusion factors of adding cesium to flame
13 p2380 A69-28463

Small disturbances distribution in flow parameters along two dimensional combustion zone of finite width using thermal diffusion theory
14 p2537 A69-28986

Spherical symmetric unsteady conservation equations describing transient burning of volatile fuel droplets, obtaining time dependent fuel and heat distribution in flow field
14 p2537 A69-29016

Liquid fuel droplets combustion under free and forced convection noting combustion rate
15 p2719 A69-31174

Chemical reaction between combustible solid fuel surface and oxidizer-containing gas in space capsule
16 p2877 A69-31896

Reacting gas ignition by sudden contact with heated noncatalytic surface, deriving heating time and transferred heat amount by Blasius perturbation method
16 p2878 A69-31955

Combustion instability characteristics of solid propellants, discussing small scale testing methods
16 p2829 A69-31996

Feed-system-coupled combustion instability linearized mathematical models for liquid fuel rocket engines, discussing nonrigid injector and method for instability elimination
16 p2836 A69-32001

Laser ignited combustion of 365 micron Zr droplets falling in ultrapure oxygen using spectroscopic and photographic techniques, discussing vapor phase transport phenomena
[WSCI PAPER 69-4] 16 p2830 A69-32345

Thermal layer theory of composite propellant combustion leading to minimum steady state burning rate under ideal thermal conditions
[WSCI PAPER 69-5] 16 p2830 A69-32346

Collection of articles on ramjets including reaction propulsion, hypersonic inlets, combustion problems, Griffon aircraft, storable liquid fuels, etc
16 p2837 A69-32608

Model for mixing and combustion of compressible particle laden ducted flows
[AIAA PAPER 69-460] 16 p2880 A69-32650

Spontaneous reignition predictions for solid restartable rocket motors with solid propellant combustion terminated by liquid quenching
[AIAA PAPER 69-444] 16 p2842 A69-32695

Gas phase ignition theory with feedback of homogeneous propellant exposed to stagnant gas after shock reflection
[AIAA PAPER 69-559] 16 p2880 A69-32740

Supersonic combustion for high Mach number high altitude flight, discussing laboratory simulation for actual flight condition and chamber design
[AIAA PAPER 69-458] 16 p2880 A69-32743

German monograph on turbulence in isothermal free jets and free jet flames covering local flow variations, Reynolds number effects, exchange processes, etc
17 p3068 A69-32991

Powdered oxidizer and infusible polymer binder combustion at various pressures, studying gaseous phase temperature field by optical color analysis
17 p3069 A69-33135

Normal flame speed during gas combustion in calorimetric bomb with constant combustion volume calculated by approximate equations
17 p3069 A69-33137

Computer calculation of kinetic characteristics of normal flame propagation during gas combustion, constructing physical model and differential equation system
17 p3069 A69-33138

Temperature and pressure effects on flame propagation rates, burning time and combustion zone length in turbulent flows of homogeneous gas mixtures
17 p3069 A69-33140

Flame propagation mechanism on plastic fuel in oxygen-nitrogen atmospheres with variable pressures and
17 p3074 A69-33662

at different initial fuel temperatures, discussing safety and ignition problems
17 p3074 A69-33662

Closed compartment fire mathematical model to analyze combustion parameter effects, atmosphere pressure and temperature during fire
[AIAA PAPER 69-618] 17 p3074 A69-33704

Energy balance equation for two phase liquid-gas mixture ignition process, deriving formula for speed of combustion zone movement
18 p3231 A69-35123

Monograph on solid rocket propellants covering composition, combustion characteristics and energetic, mechanical and operational properties
20 p3585 A69-37441

Film vaporizing gas turbine combustor design including performance tests and combustion physics
21 p3784 A69-38607

Laser applications in combustion research, discussing interferometric, schlieren and deflection mapping, holography, velocity measurement, scattering, laser spectroscopy, ignition by laser beams, etc
21 p3741 A69-39589

Computer routines for approximations of thermochemical properties of gas mixtures, using JANAF /Joint Army Navy Air Force/ tables of combustion systems
21 p3670 A69-39591

Perfluorocyclobutane-oxygen mixture combustion, measuring burning velocities and adiabatic equilibrium flame temperatures
21 p3852 A69-39594

Book on rate constants of chemical reactions from flames covering flame propagation, mass spectroscopy, electron spin resonance, particles diffusion, combustion physics, etc
22 p3895 A69-40318

Book on chemical rockets and flame and explosives technology covering propulsion systems, combustion, propellant ingredients, etc
22 p3998 A69-40866

Slow combustion laser spark at intensity below optical breakdown obtained by focusing radiation pulse of Nd glass laser in discharge gap
23 p4172 A69-41492

Boundary value problem of hydrodynamic equations discontinuous solution stability under random perturbations, analyzing combustion and detonation models
23 p4239 A69-41961

Reaction broadening in hydrogen-oxygen diffusion flame for slow hydrogen dissociation, using matched asymptotic expansions
24 p4408 A69-42920

Supercritical burning of liquid fuel droplets in stagnant environment, using flame sheet model to obtain heat and mass fields
24 p4415 A69-43600

Supersonic flow stability with energy input applied to reaction kinetics of processes in aircraft and rocket combustion chambers
24 p4248 A69-43642

COMBUSTION PRODUCTS

Oxygen addition to fuel stream effect on formation of soot and polycyclic aromatic hydrocarbons in ethane-air and ethylene-air diffusion flames
02 p0205 A69-12318

Reactions kinetics contribution to nonequilibrium recombination occurring in supersonic nozzle flow of combustion products of hydrogen in air
02 p0353 A69-12488

Mass velocity of detonation products of hydrogen-oxygen mixtures measured by simultaneously recording internal resistance and induced voltage in ionized medium
02 p0354 A69-12628

Combustion products temperature and composition in chamber or at nozzle exit calculated for fuels containing excess oxidizer ratios greater than unity
04 p0684 A69-14486

Thermodynamic computations for combustion product temperature and flow rate as function of pressure in burner and excess air ratio
04 p0684 A69-14487

Thermodynamics of combustion products and aerothermochemistry noting temperature calculation, heat, mass and momentum transfer in gases and deflagration wave propagation
06 p1031 A69-17414

Combustion mixture composition dependence on electrical conductivity of products with potassium additive, discussing hydrocarbon fuels
06 p0870 A69-17908

Tank collection and spectrophotometric tests in determining aluminum oxide particle size produced by small rocket engine

[AIAA PAPER 69-146] 06 p0984 A69-18117

Gas dynamics, thermodynamics, chemical properties, energy and products of hydrocarbon-air detonations in tubes under standard atmospheric conditions [WSCI PAPER 68-26] 07 p1241 A69-18369

Optical constants of soot applied to heat flux calculations, discussing soot particles concentration determination in hydrocarbon combustion products [ASME PAPER 68-HT-13] 13 p2374 A69-27777

Temperature measurement of plasma consisting of combustion products in MHD duct, measuring spectral line contours by Fabry-Perot interferometer for accuracies 13 p2309 A69-28023

Electronic analog model for differential equations of equilibrium of gaseous combustion products based on asymptotic stability 15 p2717 A69-30862

Heat release rate during gas combustion products recombination in supersonic nozzle, using graphic interpolation of flow parameters 15 p2717 A69-30987

Compressible turbulent accelerating boundary layer flow model for convective heat transfer from rocket combustion gases, noting heat flux 16 p2878 A69-32000

Pure monopropellant steady droplet burning rate theory for determining heat-up and convection transport rates in droplet combustion products of flat flame burner [AIAA PAPER 69-563] 16 p2834 A69-32722

Spectral absorption coefficients and emissivities of thermodynamic equilibrium mixture of various combustion products at high temperatures, based on graphs 19 p3266 A69-36840

High pressure combustion of ortho-barenes /carboranes/, determining formation heat and amounts of boric acid and carbon dioxide 21 p3670 A69-39625

COMBUSTION STABILITY NT FLAME STABILITY

Combustion chamber equation for liquid fuel rocket engine, considering time varying ignition lag 01 p0142 A69-10090

Gas combustion stability with respect to one dimensional perturbations, considering flow compressibility stabilizing effect 01 p0174 A69-10107

Book on combustion covering aerodynamic and chemical aspects, combustion instability, detonation and rocket propellant combustion 01 p0176 A69-10906

Specific acoustic admittance of solid propellant burning surface for determining burning instability under rocket motor conditions 02 p0302 A69-11521

Combustion instabilities in solid propellant rocket engines, emphasizing acoustic types for longitudinal and tangential modes 02 p0303 A69-11531

Solid propellant combustion instability models describing combustion zone dynamics applied to acoustic and nonacoustic instability in LF regime [WSCI PAPER 67-13] 02 p0352 A69-12311

Combustion oscillations in liquid and solid propellant engines, noting destructive effect of LF vibrations and acoustic instability 02 p0305 A69-12494

Pressure and velocity couplings effects on oscillatory and transient motions in solid propellant rocket motors, emphasizing unsteady burning calculations 02 p0305 A69-12501

Air jet high temperature and low pressure influence on combustion stability in ramjet engine 03 p0531 A69-12968

Acoustic absorbers for combustion stabilization, discussing analytical model based on temporal damping coefficient for oscillation modes and allowance for nonuniform distribution 03 p0532 A69-13133

Perturbation behavior of solid propellant combustion, discussing relevance of analytical models and use of qualitative models 04 p0685 A69-14726

Relaxation induced self oscillations during combustion of gunpowder in semiclosed volume, noting combustion instability 04 p0686 A69-14987

Unstable combustion of ammonium perchlorate /AP/, discussing correlation between propellant particle diameter and frequency in burning rate [AIAA PAPER 69-177] 06 p1036 A69-18063

Oxidizer particle size and binder type effects on nonacoustic combustion instability of solid propellants [AIAA PAPER 69-175] 06 p0983 A69-18152

HF instability of steady combustion process with allowance for elastic strains in chamber walls 07 p1242 A69-18993

Kerosene droplets combustion stability studied by motion pictures, discussing pressure, temperature and O concentrations effects in turbulent carbon dioxide flow 08 p1421 A69-20345

Nonmetalized composite propellant solid phase heterogeneities effect on oscillatory combustion, inducing coherent burning rate oscillations with external pressure oscillations 09 p1622 A69-22085

Solid propellant combustion, calculating burning, flame standoff distance, flame thickness, heat transfer, energy losses, and distributed and unsteady combustion 09 p1623 A69-22091

Fluorine light-off detector /FLOD/ for sensing and indicating minimum light-off or blow out conditions in turbojet engine afterburner [ASME PAPER 69-GT-36] 09 p1501 A69-22488

Thermal approach to pulsating combustion, determining temperature-time variation, frequency and pressure from mathematical model 09 p1625 A69-22694

Injected propellant behavior during one dimensional passage through rocket combustion gas chamber, considering Reynolds number and propellant characteristics 11 p1941 A69-24329

Combustion mechanism of condensed inflammable systems such as gunpowder and other explosives, discussing combustion stability 11 p2000 A69-25187

Steady propagation of flame front initiated by local ignitor /spark/ in gas mixture, discussing critical requirements, boundary conditions, etc 11 p2001 A69-25190

Combustion rates of condensed systems under positive and negative accelerations at atmospheric pressure 11 p2001 A69-25195

Combustion instability problems in rocket motors, emphasizing strongly coupled pressure oscillations in combustion chambers 11 p2003 A69-25597

Soviet book on combustion, detonation and explosive energy of condensed systems covering stable/unstable processes 12 p2190 A69-26757

Solid propellant rocket engine design for combustion stability, discussing length, pulse induced and acoustic instability types [AIAA PAPER 68-532] 12 p2191 A69-26788

Stable homogeneous combustion of condensed substances /CS/, systematizing and analyzing elementary CS combustion models 13 p2379 A69-28454

Compressed ammonium perchlorate combustion rate and pressure requirements established from initial temperature effects 14 p2508 A69-28914

Galerkin method applied to axial, transverse and three dimensional linear combustion instability problems in liquid propellant rocket motors 14 p2538 A69-29021

Fuel drop combustion under unsteady conditions at high pressure in unlimited and limited air volume 15 p2719 A69-31476

Combustion in liquid propellant rockets, discussing aerothermochemical steady state and nonsteady behavior analysis and experiments 16 p2835 A69-31732

Solid propellants steady state combustion with emphasis on heterogeneous propellants 16 p2829 A69-31995

Combustion instability characteristics of solid propellants, discussing small scale testing methods 16 p2829 A69-31996

Feed-system-coupled combustion instability linearized mathematical models for liquid fuel rocket engines, discussing nonrigid injector and method for instability elimination 16 p2836 A69-32001

Small disturbances and effect on processes of fast combustion of inflammable compressible mixture 16 p2837 A69-32137

Rocket stability monitoring by temporal radiometry, using exhaust radiance measurement to detect frequencies in thrust chamber combustion pressure [AIAA PAPER 69-580] 16 p2839 A69-32670

Droplet vaporization model representing combustion processes of longitudinal oscillations in liquid rocket combustor [AIAA PAPER 69-483] 16 p2841 A69-32689

Composite propellants high pressure burning stability with various binders and oxidizers, showing ammonium perchlorate oxidized formulations susceptibility to instability [AIAA PAPER 69-438] 16 p2834 A69-32704

Linear and nonlinear pressure coupled combustion instability of solid propellants [AIAA PAPER 69-479] 16 p2834 A69-32725

Compositional and oxidizer particle size effects on combustion instability of plastic propellant based on ammonium perchlorate and polyisobutene [AIAA PAPER 69-478] 16 p2834 A69-32734

Stability criteria for longitudinal combustion instability tested for generality using data from various solid propellant formulations [AIAA PAPER 69-480] 16 p2834 A69-32736

Interaction between two phase dynamical and combustion parameters in one dimensional gas-gas-metal combustion system [AIAA PAPER 69-540] 16 p2880 A69-32742

Modified liquid fueled pulsating combustion chamber operating as Helmholtz cavity resonator, measuring chamber pressure as function of time 17 p3074 A69-33410

Finite amplitude standing transverse resonant acoustic field effects upon flow behavior of viscous fluid in cylindrical enclosure to acoustically model combustion instability [AIAA PAPER 69-667] 17 p2954 A69-33457

LF oscillations in simple combustion chamber using gaseous propane fuel, discussing association with progressive flame necking 18 p3230 A69-34837

Hydrodynamic stability of solid fuel combustion in presence of acoustic disturbances in gas phase, considering material erosion and particle dispersion 18 p3231 A69-35150

Acoustic measurements at room temperature for determining losses in rocket chamber during combustion instability, using small scale model 19 p3394 A69-35946

Flame and pressure /or velocity/ oscillations interaction in unstable combustion regimes, considering tubes with propane-air mixtures 19 p3450 A69-36357

Nonsteady propellant burning theory for Al melting role in suppressing combustion instability in solid propellant rocket motors 19 p3393 A69-36814

Laboratory unsteady burning data applied to analysis of small amplitude combustion instability in solid propellant rockets 20 p3586 A69-37224

Combustion turbulence effect on flame propagation velocity taking into account flame-generated pulsation velocity as function of temperature and flame velocity 21 p3850 A69-38861

Discontinuity characteristics of trough-shaped flame stabilizers for combustion in wake of poorly streamlined body during period of ignition arrest 21 p3851 A69-39092

Nonstationary solid rocket fuel combustion scheme, using unsteady combustion model for quantitative analysis of rocket engine irregularities attributed to excessive fuel 22 p4050 A69-40457

Unsteady combustion wave passage through inert obstacle in gunpowder in N filled pressure vessel 22 p4051 A69-41119

Detonation wave instability and damping in gas containing liquid or solid inflammable aerosol, considering atomized propellants 23 p4240 A69-42339

COMBUSTION TEMPERATURE

Stabilized low temperature ignition of cyclohexane using vertical flow reactor 02 p0304 A69-12314

Temperature and pressure measurements in low temperature combustion of n pentane covering slow reaction and cool flame regions 02 p0353 A69-12321

Optical measurement method for burning surface temperature of condensed systems, realizing radiation from surface of combustion by light guide of monocrystalline aluminum oxide 13 p2379 A69-28453

Jet engine combustion temperature measurements by thermocouples or gas analysis noting errors involved 23 p4165 A69-41650

COMBUSTION VIBRATION

Combustion oscillations in liquid and solid propellant engines, noting destructive effect of LF vibrations and acoustic instability

02 p0305 A69-12494

Initiation of HF combustion oscillation in premixed gas rocket
[ISAS-430]

06 p1029 A69-17025

Nonmetalized composite propellant solid phase heterogeneities effect on oscillatory combustion, inducing coherent burning rate oscillations with external pressure oscillations

09 p1622 A69-22085

Acoustic frequency of longitudinal self oscillations during vibrational fuel combustion in afterburner, taking into account nonlinear properties of heat supply zone

11 p2002 A69-25339

Self excited vibrating laminar diffusion flames, discussing coupling, jet spacing radial heat transfer and boundary layer interaction

16 p2876 A69-31711

Fuel injector-induced mass flux and mixture ratio distributions effects on combustion performance, chamber volume and stability, discussing combustion oscillation avoidance

16 p2877 A69-31731

Nonlinear periodic oscillations in liquid rocket combustion chambers for different chamber models and burning rate response formulations

19 p3449 A69-36352

Rocket body elastic vibrations, liquid fuel supply oscillations and engine thrust vibrations effects on system stability

20 p3617 A69-37604

Cylindrical shell with supersonic nozzle end, describing axisymmetric oscillations forced by burning filler in gas stream

24 p4300 A69-43073

COMBUSTION WAVES

U FLAME PROPAGATION

COMBUSTORS

U COMBUSTION CHAMBERS

COMETS

NT AREND-ROLAND COMET

NT MOREHOUSE COMET

NT MRKOS COMET

NT SCHWASSMANN-WACHMANN COMET

Perturbations on major axes of slow moving comets in nearly parabolic original orbits by fast moving stars, discussing statistics of stellar encounters

01 p0153 A69-10871

Secular perturbations produced by comet belt beyond Neptune on orbits of periodic comets of large aphelion

01 p0158 A69-11327

Carbon monoxide ion dynamics in envelopes of comets exhibiting fountain behavior, discussing electron-collisional ionization within envelopes as main plasma production mechanism

02 p0310 A69-11423

Gaseous hydrates formation in comet nuclei, discussing stability at given temperatures and pressures and solar radiation shielding by dust sheath

03 p0515 A69-14032

Capture of comets by large planets

03 p0517 A69-14128

Orientation and motion of bands in tail of comet Ikeya-Seki, discussing synchronous formations

04 p0652 A69-14378

Meteor spectrum from 1966 Leonid shower considered to be closer to comet nucleus spectra than previous spectra

04 p0655 A69-14664

Mathematical analysis for mechanism of spherical comet nucleus division as effect of nonuniform surface heating during rotation

04 p0659 A69-14997

Nongravitational impulses on short period comets

04 p0660 A69-15037

Cometary origin of meteorites, discussing and rejecting origin from recent asteroidal collisions

05 p0818 A69-15588

Zodiacal light, cometary contribution and solar activity

05 p0826 A69-16391

Solar corona effects on tail of comet Ikeya-Seki, describing model for interaction between tail and corona

06 p1000 A69-16982

Two phase flow in comas of dust comets, noting acceleration of gaseous and particle phases of continuous streams and particle vaporization

06 p1000 A69-16984

Carbon molecule photodissociation in cometary atmospheres, discussing intensity level distribution based on model

06 p1004 A69-17534

Ice nucleus formation in developing comet, discussing dissociation and vaporization characteristics of parent molecules as participants in process

06 p1004 A69-17537

Visual and photographic comet observations, including perihelion passage of P/Perinne-Mrkos in 1968

07 p1216 A69-19205

Solar phenomena correlation with brightness variations of comet Alcock 1963b, noting sunspot maximum followed by maximum in absolute magnitude of comet

08 p1394 A69-20620

Asteroidal and cometary orbits and origin of meteorites, discussing eccentricities, exposure ages and mass yield

08 p1406 A69-20929

Cometary origin of meteors and element abundance in primitive solar nebula, discussing neutron capture products in chondrites

08 p1406 A69-20930

Whipple and Douglas-Hamilton systematic corrections for periodic comets, considering constant coma brightness of P/Tempel 2 since 1874-1904 observations

08 p1408 A69-21137

Photographic and reflector observations of comets including orbit determinations and recoveries

08 p1408 A69-21140

Cometary magnetic fields by measuring depolarization of molecular resonance fluorescence

09 p1603 A69-22234

Low thrust space probe mission to Halley comet, utilizing nuclear electric propulsion

10 p1772 A69-22864

Total planet interaction energy of comets passing through solar system, showing non-Gaussian shape of distribution

10 p1774 A69-22970

Catalog of orbital elements for periodic comets during perihelion passage

10 p1777 A69-23396

Size and velocity measurements of particles suspended in gas expanding from nozzle into vacuum simulating cometary two phase flow with evaporation

10 p1674 A69-23686

Cometary nucleus dynamic center noncoincidence with photometric center, using computer calculations of Arend-Roland comet

10 p1784 A69-24035

Comet Berbon and minor planet positions photographically recorded /1964-1967/

11 p1962 A69-25121

Cometary, lunar and solar effects on precipitation, considering joint influence of meteoric streams and moon

11 p1965 A69-25420

Recently discovered comets including Comet Thomas, discussing magnitudes and perihelions

12 p2172 A69-27161

Comet interaction with solar wind, assuming field tail coupling of ionized comet material to solar wind ions

13 p2349 A69-27817

Soviet collection of articles on cosmic physics, Number 3, Comets, sun and interplanetary space

14 p2522 A69-29703

Comet scintillations and tail characteristics studied to obtain information on interplanetary flux field, magnetic fields and planetary structures

14 p2523 A69-29704

Cometary tail diffusion model based on luminous particle number decrease with time and particle accelerated motion and diffusion in space

14 p2523 A69-29705

Comet Ikeya-Seki phenomena near perihelion interpreted from mean surface and ice nucleus internal layers temperatures

14 p2523 A69-29706

Comet Ikeya-Seki head and tail structure -noting cloud ribbons at angle to tail axis

14 p2524 A69-29708

Comet Ikeya-Seki 1965f photometric investigation during perihelion, determining tail type according to Bredikhin classification

14 p2524 A69-29709

Comet Ikeya-Seki 1965f primary nucleus splitting date and rate established from dynamic solutions

14 p2524 A69-29710

Halley comet abrupt daily motion variation ascribed to solid particles ejection from ice nucleus stimulated by gas outflow

14 p2524 A69-29712

Nongravitational force dynamic effect and model for rotating cometary nucleus, including changes in orbital elements

14 p2524 A69-29713

Critical analysis of Oort cometary cloud existence, discussing stellar encounters of sun, planetary explosions, etc

14 p2524 A69-29714

Visual, photographic and spectral observations of comets during IQSY, discussing comets Tomita-herber-Honda 1964c and Ikeya-Seki 1965f

14 p2525 A69-29716

Solar UV radiation effects on processes in comet head, interpreting surface brightness distribution of comet 1959k in terms of photodissociation

14 p2525 A69-29717

Comets considered as natural interplanetary space probes, stressing need for international cooperation on solar system studies

15 p2679 A69-30011

Solar flares associated with intensive sodium D lines emission observed photoelectrically with telescope in unperturbed region, analyzing possibilities of comets solar origin

15 p2674 A69-30506

Soviet collection of articles on physics of comets covering solar radiation, solar corona, comet nucleus, comet spectra, comet tails, etc

15 p2683 A69-30515

Secular decline in absolute brightness of comet Encke from photometric curves obtained during past and present century

15 p2684 A69-30518

Gasdynamic model of comet nucleus region, discussing molecular collisions, surface brightness distribution and dust particle motion

15 p2684 A69-30520

Expression relating gas density, radial velocity and temperature at comet nucleus surface to nucleus surface temperature, applying results to unsteady sublimation process

15 p2684 A69-30521

Photoelectric comet observation techniques, tabulating narrow and wideband filter combinations for determining parameter Q for various cometary spectral emissions

15 p2684 A69-30522

Unidentified cometary spectra line emission possible interpretations, examining atomic hydrogen abundance in cometary atmosphere and ionic hydrogen recombination

15 p2685 A69-30523

Comet Ikeya-Seki tail spectra from nebular spectrograph, tabulating energy distribution in comet tail, noting similarity to solar spectrum

15 p2685 A69-30524

Polarimetric and photometric observations of comet Ikeya-Seki 1965f, plotting isophotes of head and polarized light distribution in tail

15 p2685 A69-30525

Number and mass of sodium atoms in comet Ikeya-Seki 1965f head calculated from spectral observations, ascribing D lines to resonance scattering of photospheric radiation

15 p2685 A69-30526

Photographic photometry of comet Ikeya-Seki during passage near sun, plotting isophotes of coma and tail and brightness distribution diagrams

15 p2685 A69-30527

Comet atmosphere dust component, relating physical properties to brightness characteristics in stellar magnitudes

15 p2685 A69-30528

Photographic observations of comet Kilston 1966b, estimating brightness, absolute magnitude and color index

15 p2685 A69-30529

Cometary tails maximum lengths compared with orbit parameters and absolute magnitudes, proposing classification scheme

15 p2689 A69-30566

Hansen method of partial anomalies for cometary orbits applied to comet Encke perturbed by earth and compared with perturbations by numerical integration

16 p2863 A69-32400

Luminous particles volumetric concentration calculation based on limiting surface density to determine bulk density in cometary head

17 p3032 A69-33189

Relativistic effect in pericenter motion of comets and natural satellites from major semiaxes and eccentricities of natural bodies

17 p3044 A69-34174

Ephemeris of comet Grigg-Skjellerup for reappearance in 1971/72, based on equations of motion integration and perturbations
17 p3044 A69-34183

Selection effects on comets discovery, comparing effectiveness of photographic and visual observation techniques
17 p3045 A69-34221

Orbit determination for short and long period comets using equations of motion including terms for radial components of nongravitational force
18 p3195 A69-34432

Distributions of close planet-comet encounters for various orbital elements, calculating trajectory by conic matching
18 p3195 A69-34433

Comet-solar wind interaction model, determining contact discontinuity size and shape around comet nucleus and ion specular reflection
18 p3188 A69-35190

Comet observations and orbit determinations, noting eccentricity of comet Thomas
19 p3403 A69-35970

Comet heads gas dynamics, analyzing coma or head region as continuum source flow of dusty gas
19 p3428 A69-36807

Definitive orbit of comet 1943 I determined from photographic and visual observations
20 p3596 A69-37310

Initial and future orbits of comet 1959 IV Alcock determined considering Venus, Jupiter, Saturn, Uranus and Neptune perturbations, noting elliptical to hyperbolic orbit transition
20 p3597 A69-37319

Comet tails orientation determination for solar wind and interplanetary plasma investigation, considering geometrical difficulties and suggesting computation procedure
20 p3599 A69-37467

Photometric and spectroscopic observations analysis of Comet Honda 1968c
20 p3614 A69-38252

Halley Comet rendezvous mission, comparing low thrust mode with ballistic Jupiter or Saturn swingby mode
[AIAA PAPER 69-933] 21 p3809 A69-39360

Cometary nuclei composition as last samples of early solar system composition, discussing dirty snowball model and radical lifetime problem
22 p4013 A69-40097

Cometary and asteroidal orbital differences and similarities, emphasizing limiting cases to study orbital evolution of meteors
23 p4208 A69-41284

Spectral and orbital evidence of connection among fireballs with orbit inclination, comets and carbonaceous meteorites
23 p4208 A69-41285

Spatial region accessible to earth launched probes determined for mission planning for exploration of aperiodic comets, discussing orbit parameters
23 p4212 A69-41536

Daylight observations of Comet Ikeya-Seki 1965-f at perihelion passage, discussing resulting emission line spectra within comet head
23 p4221 A69-42386

Gas concentration liberated during each revolution in atmospheres of short period comets to explain impulsive forces upon nuclei, noting diatomic carbon density
23 p4221 A69-42387

Space mission opportunities selection from analysis of short period comet perihelia, discussing flyby and rendezvous mission payloads
[AAS PAPER 69-320] 24 p4381 A69-42866

COMMAND **U THERMAL COMFORT** **COMMAND AND CONTROL**

Real time performance, ground control and data processing of Surveyor spacecraft during maneuvers
[AIAA PAPER 67-644] 04 p0586 A69-15502

Photorecording techniques for command and control systems requirements, discussing association with large screen computer generated CRT projection display equipment
06 p0928 A69-17923

Single rotation for reorienting rigid body from initial to arbitrary final attitude together with corresponding control torques
09 p1610 A69-21998

ELDO satellite command decoder performance in presence of noise, evaluating PDM bit decoder bit error probability and false command probability
11 p1834 A69-24563

PDM command coder meeting NASA Tone Digital Command Standard for German central ground station
16 p2755 A69-31859

Post Attack Command and Control System - Airborne Data Automation /PACCS-ADA/, describing components, operation, etc
17 p2977 A69-34116

Avionics of Naval E-2C airborne sentry and command and control system, discussing digital computer, search radar, etc
18 p3108 A69-34811

Robot command and control by computer assembly, describing engineering analog of vertebrate nervous system
21 p3679 A69-39603

COMMAND-CONTROL **U COMMAND AND CONTROL** **COMMAND GUIDANCE**

Technical characteristics of spacecraft telemetering, tracking and telecommand systems, stressing links between earth stations and spacecraft
09 p1451 A69-21291

Tracking and data acquisition systems for spacecraft and ground link through command, telemetry and tracking, noting data relay satellites, etc
17 p2919 A69-33371

Apollo 11 guidance and navigation systems involved in lunar landing, describing command and service modules design
24 p4295 A69-42550

COMMAND MODULES

Radiation measurements inside Apollo 4 and 6 command modules during passage through trapped radiation belts
[AIAA PAPER 69-17] 06 p0884 A69-18202

Apollo mission simulation, discussing Command Module Simulator /CMS/, onboard computer system and dynamic visual presentation via infinity-optics display
[SMPT PAPER 105-74] 12 p2055 A69-25768

Apollo spacecraft command module aerodynamic characteristics during entry compared with wind tunnel test predictions
[AIAA PAPER 68-1008] 12 p2012 A69-26789

Aerodynamic measurements on Apollo CM model at hypersonic flow simulating earth orbital reentry trajectory
12 p2012 A69-26800

Apollo navigation, guidance and control systems in command module and lunar module, discussing inertial, optical and computer hardware operation
19 p3369 A69-35799

Apollo 11 guidance and navigation systems involved in lunar landing, describing command and service modules design
24 p4295 A69-42550

COMMAND SERVICE MODULES

Apollo LM and CSM tracking systems boresight shift reducible by decreasing modulation indices or scaling factor alpha
10 p1672 A69-23277

Ultrasonic inspection systems to determine and record bond quality on all adhesive bonded assemblies of Saturn S-2 booster and Apollo Command and Service Modules
15 p2632 A69-31515

COMMERCE

Commercial orbital space stations economics and potential markets, considering fisheries, ocean transportation, air traffic control, resources surveys, pollution reduction, etc
06 p1007 A69-17599

COMMERCIAL AIRCRAFT

NT A-300 AIRCRAFT

NT BOEING 2707 AIRCRAFT

NT BOEING 707 AIRCRAFT

NT BOEING 747 AIRCRAFT

NT CV-990 AIRCRAFT

NT DC 3 AIRCRAFT

NT DC 8 AIRCRAFT

NT DC 10 AIRCRAFT

NT DH 121 AIRCRAFT

NT L-1011 AIRCRAFT

NT SE-210 AIRCRAFT

NT SUPERSONIC COMMERCIAL AIR TRANSPORT

NT TU-104 AIRCRAFT

NT TU-134 AIRCRAFT

NT VC-10 AIRCRAFT

Boeing 747 characteristics for passenger and cargo service noting economic gain, operational performance, control cabin, engine, etc
[AIAA PAPER 67-397] 01 p0010 A69-10636

BAC Three-Eleven 220 seat airliner for short and middle distance routes, discussing operating costs, thrust and range
02 p0193 A69-12067

Navigation system for American SST noting use of Doppler radar and inertial navigation
02 p0278 A69-12238

Inertial navigation for commercial aircraft, discussing Sagem-Ferranti and Litton systems
02 p0278 A69-12239

Exterior arresting devices for commercial aircraft full scale tests
03 p0367 A69-14104

Test equipment for rapid automatic checkout and evaluation of automatic flight control systems on commercial and jet transport aircraft
05 p0742 A69-15883

Federal government legal liability for commercial air safety in aircraft accident suits
06 p1042 A69-16848

Aeronautics - Conference, Beverly Hills, September 1968
06 p0866 A69-17658

LR-1 prototype design criteria and flight testing, discussing Model 99 airliners for commuter airlines
06 p0867 A69-17668

Commercial jet safety, analyzing aircraft accidents and accident rates
06 p0868 A69-17829

Nondemographic model predicting market shares of V/STOL aircraft in competition with automobiles and conventional airliners for short haul intercity business travel markets
07 p1244 A69-18967

Baseline requirements for commercial aircraft propulsion systems, stressing engine installation in aircraft
[ASME PAPER 69-GT-57] 09 p1572 A69-22514

JT15D business aircraft turbofan engine, discussing low costs and fuel consumption, maintenance, reliability, installation, etc
[ASME PAPER 69-GT-119] 09 p1572 A69-22524

Soviet supersonic transport Tu 144, describing wing unit, fuselage, passenger accommodation, tail unit, landing gear, power unit engine nacelle and navigation
10 p1634 A69-23838

Modular hydraulic power source systems for general aviation aircraft, discussing design selection, phase in and customer acceptance problems
[SAE PAPER 690329] 11 p1825 A69-24505

Military forward air control aircraft conversion from lightweight commercial tandem engine aircraft noting visibility, communication and navigation equipment
[SAE PAPER 690313] 11 p1822 A69-24511

Computer controlled testing of commercial aircraft avionics systems for automatic, semiautomatic and manual operation to perform repair and calibration tasks
11 p1864 A69-25061

Douglas DC-10 medium range aircraft, discussing engine placement, passenger and cargo capacity, construction data, etc
11 p1823 A69-25211

V/STOL aircraft in commercial aviation, discussing costs, noise reduction, propulsion systems, projected routes, etc
13 p2203 A69-28039

FAA additional airworthiness standards for small aircraft in air taxi and commercial operations, noting safety levels
[SAE PAPER 690320] 15 p2549 A69-30090

Business aircraft electrical power sources, discussing electromechanical constant speed drive /EMCSD/ and comparison with DC/inverter and hydraulic CSD
[SAE PAPER 690346] 15 p2552 A69-30091

Low cost inertial measurement unit /IMU/ for commercial and private aircraft, evaluating components and system
[SAE PAPER 690337] 15 p2606 A69-30092

Dassault Mercure short haul jumbo jet, discussing production costs and market potential
15 p2550 A69-30317

Dassault Mercure high speed twin turbojet aircraft, discussing capacity, range, propulsion, profitability threshold, etc
15 p2550 A69-30318

German VFW 614 short haul commercial jet aircraft design, marketing, etc
16 p2734 A69-31805

Book on competition in North Atlantic commercial air transport covering passengers, freight and mail from supply, demand and market point of view
16 p2881 A69-31866

Aircraft role in future transport systems for passengers and goods, emphasizing shorter distances, intercity and interurban communication, etc
16 p2881 A69-31932

High bypass ratio engine influence on short range civil aircraft design, considering performance, noise, engine location, etc
17 p2897 A69-33212

STOL and V/STOL short haul intercity airliners emphasizing propulsion systems, operational aspects and economics
17 p2898 A69-33356

Technical problems in converting long service civil aircraft to obtain more volume, easier loading access or greater flexibility
20 p3461 A69-36919

Economic effectiveness determination methods for commercial transport aircraft design analyzed quantitatively, using four engine 100-seat turboprop aircraft
21 p3855 A69-38873

Economic effectiveness of design and fabrication changes in aircraft construction industry for profitable operation of commercial transport aircraft
21 p3855 A69-38874

Engine powered lift civil aircraft certification factors taking into account traffic growth, accident rates, learning rate and acceptable safety level
22 p3862 A69-39962

Commercial jet aircraft thrust reversers and noise suppressors developed by Rolls-Royce, discussing compatibility, reliability and applications
[SAE PAPER 690410] 23 p4200 A69-41638

Booster engines for thrust augmentation of commercial transports, considering tradeoffs in takeoff distance, payload, range, safety and noise patterns
[SAE PAPER 690381] 23 p4201 A69-41667

Commercial aircraft peak cockpit noise level during cruise and high speed descent, discussing damage risk criteria and inter-pilot speech interference
23 p4102 A69-41682

Commercial aircraft environmental compatibility planning, considering problems of airport traffic growth and restrictive air traffic control regulations
[AAS PAPER 69-326] 24 p4252 A69-42808

FAA power spectral gust methods for computing design limit loads on commercial aircraft, noting British investigation
24 p4253 A69-43111

COMMERCIAL AVIATION

U CIVIL AVIATION

COMMUNITION

NT GRINDING [COMMUNITION]

Ductile metal powder chemical reactions during comminution in pure or oxygenated water
13 p2216 A69-27762

COMMITTEE ON SPACE RESEARCH

Bibliography of reports and papers on space sciences and research activities of national institutions of COSPAR members /1966-1967/
10 p1784 A69-24001

COMMUNES

U MOUNTAIN INHABITANTS

COMMUNICATING

NT BROADCASTING

NT INTERSTELLAR COMMUNICATION

NT POINT TO POINT COMMUNICATIONS

NT TELEPHONY

NT VERBAL COMMUNICATION

Technical communication patterns in R and D laboratories, discussing effects of work structure, social relations, etc
20 p3640 A69-38019

Communication in large organizations, describing internal communication model
24 p4419 A69-42930

COMMUNICATION CABLES

NT BEAM WAVEGUIDES

NT COAXIAL CABLES

NT PLASMA GUIDES

NT WAVEGUIDES

Data transmission on common communication circuits, noting circuit characteristics, limitations on performance and future digital service
04 p0559 A69-15207

Monograph on discrete signals transmission by FM, considering secondary signal compression device and wire communication channels
12 p2033 A69-26866

COMMUNICATION EQUIPMENT

NT BIOTELEMETRY

NT CLOSED CIRCUIT TELEVISION

NT COLOR TELEVISION

NT EDUCATIONAL TELEVISION

NT PULSE FREQUENCY MODULATION

NT SPACECRAFT TELEVISION

NT SUPERHETERODYNE RECEIVERS

NT TELEMETRY

NT TELEPHONY

NT TELEPHOTOMETRY

NT TELEVISION SYSTEMS

NT TRANSMITTER RECEIVERS

NT WHISTLER RECORDERS

Automatic picture transmission station equipment including antenna, cavity filters, tape recorder, oscilloscope, facsimile system and kinescope
[UN PAPER 68-95450] 01 p0054 A69-10522

Spacecraft pencil beam parabolic antenna design and installation, discussing directivity factor variation with diameter and orientation accuracy effects
01 p0030 A69-10581

Linear integrated circuit communication systems based on subsystem approach, showing example of IF strip and audio AGC/squelch amplifier
01 p0035 A69-11389

Automatic test equipment applicability to testing problems created by increasing complexity of communications equipment
03 p0410 A69-13189

Optical receivers for deep space optical communications link assuming PCM scheme
03 p0389 A69-13194

Data transmission on common communication circuits, noting circuit characteristics, limitations on performance and future digital service
04 p0559 A69-15207

Traveling wave tubes for Symphonic Communication Satellite, discussing design, performance and efficiency
07 p1095 A69-18429

Data transition tracking in digital communication systems by decision directed phase tracking loops
07 p1082 A69-19108

Communications for Apollo Applications Program, considering extended duration manned missions in low earth orbit and Gemini, Saturn and Apollo hardware
07 p1083 A69-19124

Mariner 1969 multimission high rate deep space telemetry system design, hardware and application
07 p1083 A69-19125

Suboptimum decision feedback communications systems incorporating simple digital processing compared with optimum Wald scheme
10 p1656 A69-23534

Solid state synchro data interfaces for angular information, noting synchro to digital and digital to synchro conversion techniques and synchro repeaters
11 p1842 A69-24543

Digital data transmission techniques and complex instrumentation systems design noting control, identification, synchronism and error reduction
11 p1834 A69-24545

Electrical engineering, Volume 3, communications, covering special theories, systems components, telecommunication, electroacoustics, digital and analog computers and programming
15 p2568 A69-30619

Spacecraft pencil beam parabolic antenna design and installation, discussing directivity factor variation with diameter and orientation accuracy effects
15 p2568 A69-30751

Unidigit and multidigit communications systems performance and transmission characteristics, emphasizing SNR improvements
17 p2918 A69-33066

Communication equipment reliability improvement through testing and failure analysis
19 p3282 A69-35783

Satellite and terrestrial point-to-point communication circuit costs, considering multiple access and small antenna earth stations
19 p3456 A69-36822

Booster digital guidance and control system, discussing communication device providing data transfer between airborne digital computer and control device
[AIAA PAPER 69-988] 22 p3978 A69-40368

More earth station equipment and design for satellite communication in INTELSAT network including antenna, feed and tracking, interconnect system, etc
22 p3900 A69-40679

Periodic ladder type design delay equalizer for linear delay characteristics in millimeter waveguide systems
23 p4135 A69-41361

COMMUNICATION SATELLITES

NT EARLY BIRD SATELLITES

NT INTELSAT SATELLITES

NT MOLNIYA SATELLITES

NT SYNCOM SATELLITES

Broadband parametric amplifier used as front amplifier in satellite communication systems ground station receiver, noting cryogenic operation capability
01 p0041 A69-10243

Space applications program including communications and navigation meteorology, earth resources survey and geodesy
[UN PAPER 68-95437] 01 p0178 A69-10472

International experimentation with U.S. communications satellites, noting design variations with participants and restraintless information exchange
[UN PAPER 68-95421] 01 p0108 A69-10474

Small earth stations in future communication satellite systems, discussing applications, characteristics and equipment
[UN PAPER 68-95751] 01 p0028 A69-10492

Space broadcasting possibilities and problems, considering home reception and group participation at community centers
[UN PAPER 68-95287] 01 p0028 A69-10497

Satellite educational TV, considering program distribution, satellite characteristics, ground terminals design, reliability, quality, programming and costs
[UN PAPER 68-95827] 01 p0029 A69-10499

Japanese space research organizations, sounding rockets, meteorology, satellite communications, geodesy, etc
[UN PAPER 68-95563] 01 p0151 A69-10501

Marine requirements possible satisfaction by using space techniques to improve long range communications to achieve safety at sea and shipping operations efficiency
01 p0161 A69-10503

British contributions to communication satellite earth station technology covering antennas, low noise amplifiers, traveling wave tubes and threshold extension demodulators
[UN PAPER 68-95843] 01 p0054 A69-10507

Communication satellites development in U.S.S.R., discussing Molniya 1 satellite design and objectives and Echo 2 satellite transmission experiments
01 p0032 A69-10949

Performance characteristics of hard limited and linear repeaters for satellite communications systems
01 p0032 A69-10966

Ground-air-ground communications system using pseudonoise through satellite and central ground based control facility, discussing system advantages, SNR and modulation schemes
01 p0033 A69-11009

Satellite communications with emphasis on European programs, discussing synchronous satellites, Europa 2 rocket and Saros and Symphonic projects
02 p0207 A69-11910

Multijet electrothermal systems for attitude control and stationkeeping of synchronous communications satellite
[AIAA PAPER 67-723] 02 p0305 A69-12375

Maritime radio communications satellite service for ship safety, discussing stationary equatorial satellite systems
[AIAA PAPER 68-232] 02 p0356 A69-12383

Book on communication systems covering signal design, video signals, communication satellites and threshold decoding techniques
03 p0383 A69-12867

Communication satellites systems, discussing Intelsat satellite specifications and modulation methods for multiple access
03 p0383 A69-12870

Space age communication, use of satellites by mass media - UNESCO Conference, Paris, December 1965
03 p0534 A69-13132

Error correcting coding on DCSP satellite channels, discussing single access communication through wideband SHF repeaters in synchronous earth orbit
03 p0387 A69-13177

Time division multiple access system for INTELSAT satellite, analyzing burst preamble and selection of frame period
03 p0388 A69-13179

Communications system considerations for lunar libration point relay satellite to support Apollo lunar far side mission
03 p0388 A69-13180

Aeronautical satellite system to relay communications at VHF or L band frequencies from aircraft flying over oceanic routes
03 p0464 A69-13235

Transoceanic air traffic control system with independent surveillance of aircraft positions, decision making agency and undelayed communications, using satellites
03 p0464 A69-13236

International satellite system for commercial aircraft communications and air traffic control
03 p0464 A69-13238

Low altitude satellite relay system, discussing modulation, antennas, frequency plans, telemetry, tracking, command and earth terminals
03 p0391 A69-13241

Mutual RF interference between satellite and terrestrial telecommunications microwave relay system at shared frequencies
03 p0392 A69-13242

Economic importance of European communications satellite system development
03 p0535 A69-13583

European regional satellite communication systems, discussing EUROVISION TV program broadcasting and multiple access telephony
03 p0395 A69-13585

Cooperation between U.S. and Europe in communication satellite programs
03 p0535 A69-13591

Intelsat application satellites, considering economy and global telecommunication
03 p0535 A69-13592

Ghost project for gathering weather data by balloons and transmission of data to central data processing stations by satellite
03 p0520 A69-13621

Low noise broadband parametric amplifier for communication satellite ground stations
03 p0406 A69-13733

Low degree earth gravity harmonics effect on 12 and 24 hour orbits of high altitude communications satellites
04 p0592 A69-14661

European launch vehicle development program, discussing economic limitations and employment possibilities
04 p0665 A69-14808

Electronic counterrotating antennas, developing turning model of antenna group of telecommunications satellite
04 p0578 A69-15065

Aeronautical service satellites, considering communications, surveillance for navigation, traffic control, collision avoidance and search and rescue, weather and border control functions
04 p0666 A69-15295

Economic and technical advantages and disadvantages of satellite telecommunications, discussing Telstar intercontinental TV transmission and Soviet Molniya system
04 p0662 A69-15328

Domestic satellite communication system model for greatest possible amount of traffic using Saturn 5 propulsion systems, multibeam antennas, synchronous repeater platforms, etc
04 p0561 A69-15447

Optimum spacing of communication satellites on inclined circular synchronous orbits, applying figure 8 packing schemes
04 p0562 A69-15458

Aeronautical satellite communications, discussing results with NASA ATS-1 satellite
05 p0790 A69-16721

French and German cooperative program Project Symphonie to develop telecommunications satellite for radio and TV broadcasting
05 p0830 A69-16817

Earth orbiting communication satellites, discussing multiple access by stations and use of higher frequencies
06 p0885 A69-16856

Soviet Orbita communication satellite system network operation, design and technical and economic aspects
06 p0886 A69-17043

Molniya 1 communication satellite using elliptical orbit to provide radio, telephone and TV service [UN PAPER 68-95771]
06 p1013 A69-17044

Quality control for TV transmissions via communication satellites, considering transmission accuracy improvement and error measurement automation [UN PAPER 68-95773]
06 p0886 A69-17047

Satellite telecommunications, discussing Australian experience, ground stations location, national network and international cooperation [UN PAPER 68-95286]
06 p0886 A69-17066

Project Symphonie, discussing stationary communication satellite, coverage, frequencies and characteristics
06 p0886 A69-17072

Communication satellites application to domestic live TV, telephone and data communication and long distance telecommunication in Canada [UN PAPER 68-95501]
06 p0887 A69-17075

Satellite educational TV capabilities, applications and planning [UN PAPER 68-95355]
06 p0887 A69-17078

Adaptive control of reflective satellite communication system
06 p0887 A69-17356

Communication satellites in synchronous equatorial orbit for two types of educational TV, discussing picture quality, modulation, power, bandwidth and system costs
06 p1017 A69-17624

Canadian domestic satellite system requirements to extend existing terrestrial communications systems to improve coverage, capacity, flexibility and cost factors
06 p1043 A69-17832

Space communication, discussing global network of Intelsat satellites ground facilities, regional switching, RF channels, etc
06 p0890 A69-17860

Communication satellites attitude control and stabilization due to antenna beam pointing, with future systems forecast, discussing exchange, distribution and collection systems
07 p1228 A69-18339

Traveling wave tubes for Symphonie Communication Satellite, discussing design, performance and efficiency
07 p1095 A69-18429

Tunnel diode amplifiers for amplifying weak microwave signals, discussing low noise wideband preamplifier for communication satellites
07 p1099 A69-18464

Predictor determining future position of TDMA/Time Division Multiple Access/ synchronous satellite communications system satellite from previously received bursts
07 p1076 A69-18553

Sensitivity problems in receiving microwave signals from communications satellite at deep space distances, considering noise factors
07 p1077 A69-18669

Satellite TV broadcast application for communication and education, discussing costs and benefits in single and multimission combinations
07 p1244 A69-18678

World satellite telecommunications network, discussing recommendations with reference to signal transmission, acoustic echoes, etc
07 p1079 A69-18942

Communication satellite system design by use of baseband equation relating SNR after detection to CNR at detector input
07 p1085 A69-19180

Satellite communications history covering passive and active satellites and Communication Satellite Act impact
07 p1085 A69-19182

Lincoln experimental satellites, discussing transition to UHF bands and orbital launching
07 p1087 A69-19630

Transponders for communication satellites, discussing design constraints, reliability and transmission capacity increase
08 p1279 A69-19905

Intelsat 2 satellite structural design for Apollo communications
08 p1408 A69-19907

Communication satellites applied to broadcasting, considering point to point satellite link and distribution systems
08 p1272 A69-19925

Large aperture low noise aerial design for satellite communication earth stations, discussing expected performance of 85-ft antenna at 4 GHz
08 p1279 A69-19956

Satellite communication requirements for UK defense establishment, describing SKYNET system
08 p1272 A69-19957

Multiple access techniques in civil satellite communications systems, noting proposed digital time and frequency division methods
08 p1272 A69-19959

Communication satellite ground test programs, discussing structural, electrical integration, thermal control and antenna pattern models for simulation tests
08 p1409 A69-19962

Regulatory content of international agreements concerning communication satellites problems
08 p1422 A69-20584

Reliability effect on operating costs of satellite communications system ground stations, calculating annual cost of channel with continuous time carry-over
08 p1276 A69-20586

Self focusing linear array for communication satellites, evaluating radiated field taking into account mutual coupling between elements
08 p1289 A69-20970

Communication satellite systems role in world telecommunication network, discussing traffic type, volume and routing, earth stations location and capacities and orbit selection
09 p1449 A69-21271

Experimental communication satellites Score, Courier, Telstar, Relay, Syncom, Intelsat 1 and Molniya 1, discussing equipment, results, and ATS program
09 p1608 A69-21272

Signal interference criteria in considering frequency sharing between communication satellite systems and terrestrial radio services
09 p1449 A69-21273

Frequency modulation methods and multiple access for communication satellite systems, considering bandwidth for space station transponder
09 p1449 A69-21274

Preamplifier applications compared in active communication satellite systems for frequency division multiplex telephony and for TV
09 p1449 A69-21275

Multiple access in communication satellite systems for achieving maximum flexibility of interconnection between earth stations
09 p1450 A69-21276

Carrier energy dispersal in communication satellite telephony and TV systems, noting attendant RF bandwidth increase as function of distortion
09 p1450 A69-21277

Maximum horizontally radiated power of earth stations in any 4-kHz band for multichannel telephony and TV using satellites
09 p1450 A69-21278

Earth station antennas for communication satellite service, discussing design, fabrication, main lobe gain, side and back lobe suppression and noise performance
09 p1461 A69-21281

Earth station antenna radiation patterns for studying mutual interference effects between radio relay stations and communication satellite earth stations
09 p1461 A69-21282

Communication satellite system design for operation with frequency bands above 10 GHz, noting wideband communication
09 p1450 A69-21284

Structure of quasi-linear and wideband satellite transponders, discussing possible improvements
09 p1609 A69-21619

Communication satellite power utilization optimized by matching final amplifiers to solar cell array [AIAA PAPER 68-437]
09 p1442 A69-21990

Detectability parameter for measuring performance of multiple and random access satellite communication system using PN codes
09 p1457 A69-22460

Scintillation fading of VHF beacons on synchronous satellites, noting amplitude fluctuation depth and rate
09 p1457 A69-22461

INTELSAT for design, construction, launching and maintenance of global communication satellites, noting transponders
09 p1457 A69-22466

Domestic satellite system for carrying maximum traffic by full use of rocket technology including Saturn 5 type propulsion systems, antennas, frequencies, etc
09 p1458 A69-22467

Synchronous and near synchronous satellites for communication systems, discussing stationkeeping and low thrust propulsion
09 p1458 A69-22468

Commercial communication satellite earth station at Australia, noting antenna, autotracking capability, preamplifiers, and computer for control and monitor functions
09 p1458 A69-22469

Low noise wideband amplifier system for commercial satellite communication ground terminal receiver, noting cryogenically cooled parametric amplifier
09 p1458 A69-22470

Satellite technology for government and defense communications systems, noting effects of rainfall attenuation, weather and solar interference on performance and reliability
12 p2028 A69-25932

Technological feasibility of satellite based global data relay service for small users
12 p2028 A69-25949

Traveling wave tube for European communication satellite power amplifiers, showing nonlinear distortions dependence on RF input/output power and helix voltage
[AIAA PAPER 68-430] 12 p2041 A69-26786

Antenna circular array for synchronous communications satellites, discussing directional patterns, supergain ratio, element spacing, etc
13 p2225 A69-27184

Instructional broadcast satellites programming for time cost reduction, discussing frequency allocation, interference and ground station design
13 p2381 A69-27373

Earth TV pictures from Molniia 1 communication satellite, showing advantages of high orbit over low orbit photography for global weather analysis and forecasting
13 p2292 A69-27729

Satellite networks for air traffic control and aircraft communications in North Atlantic
13 p2296 A69-27831

Nonlinear distortions in TWT for communication satellites applications, discussing relationship with efficiency
13 p2232 A69-28060

Communication satellite frequency and time divisions multiple access problem, detailing microwave multiplexers design
14 p2417 A69-29688

Communications mission of Symphonie project and satellite communications subsystem design
15 p2562 A69-30084

COMSAT thermal vacuum chamber specification configurations, discussing chamber orientation, vacuum and roughing systems, pumping mechanism, wiring, installation, testing, etc
15 p2587 A69-30393

Dioscures project for worldwide telecommunications, air traffic control and navigation by satellites, discussing technical, operational and economic characteristics
16 p2749 A69-31601

Demand assigned frequency division multiple access-PCM system designed by COMSAT for satellite communication
16 p2749 A69-31602

Bipropellant propulsion systems using Aerozine 50 and nitrogen tetroxide for Symphonie telecommunications satellite
16 p2828 A69-31733

Project Symphonie German-French communication satellite mission and technical data
16 p2868 A69-32055

Electrophysiological /electrospinalchogram/ medical data transmission via satellite from France to U.S. for real time computer processing
16 p2746 A69-32070

Ammonia jet device to stabilize telecommunication satellites consisting of electric heating element, ejection nozzle and thermal screens
17 p3018 A69-33236

Time function multiplex system for simultaneous communication via satellite between number of stations, considering transmission capacity decrease due to hard limiting amplifier
17 p2919 A69-33320

Satellite system TDM techniques and prototype equipment capable of combining 12 unrelated start-stop and synchronous telegraph channels
17 p2920 A69-33420

Bearing system for mechanically despun antenna in spin stabilized communications satellite, offering greater directional stability, lower weight and power losses
17 p2978 A69-33431

Satellite systems for air traffic control, navigation, communications and telemetry in view of regulations of frequency allocations
18 p3103 A69-35089

Educational TV coverage extension via synchronous satellites to areas of limited coverage, emphasizing South American countries
19 p3268 A69-36163

Laser and quasi-laser pulse modulation technique for global satellites telemetry system
19 p3272 A69-36257

Communication satellites equipment and techniques, considering global network, satellite design, millimeter wave systems, etc
19 p3275 A69-36314

Commercial satellite communication ground station at Arvi, India, discussing system design, operation and international standards
19 p3275 A69-36412

Nationwide TV system using synchronous communication satellite proposed for India, discussing antenna, modulation, multiplexed channels and educational aspects
19 p3275 A69-36413

Research satellite, commercial satellite, lunar spacecraft and military satellite missions, discussing Intelsat, Comsat, Early Bird, MOL and ESRO space program
19 p3432 A69-36750

ITU space communication projects, discussing frequency registration, progress reports from member countries and committees, UN resolutions, communication satellites, etc
19 p3456 A69-36821

Satellite telecommunication systems coordination, discussing transformation feasibility of consortium or international organ into international organization
20 p3637 A69-37120

Juridical norms defined by Madrid, Belgrade and Washington conferences regulating exploration and utilization of extraterrestrial bodies and space, considering satellite communications networks
20 p3638 A69-37123

International cooperation regarding space telecommunication systems, discussing INTELSAT and INTERSPUTNIK roles in achieving international coordination and equality
20 p3638 A69-37125

Global communication satellite system with 12 to 16 hour period equatorial orbit, discussing satellite daily switchings, motions relative to earth, etc
20 p3497 A69-38189

Satellite Airborne Communications /STAIRCOM/ design constraints
20 p3497 A69-38314

Tactical Satellite Communications /Tacsat/ cost reduction, discussing jamming avoidance and mitigation, communications security, capacity increase and spectrum conservation
20 p3497 A69-38315

Geostationary satellite orbit used for communication satellites, noting ultimate limit of channels as related to separation angles between satellites
21 p3673 A69-38757

Frequency assignment methods for Intelsat 2 and 3 communication satellites
[AIAA PAPER 68-454] 21 p3674 A69-39226

Technical and economic factors of program to provide communications services via satellite facilities in continental U.S.
[AIAA PAPER 68-412] 21 p3678 A69-39762

Multiple access techniques of SSB-PM and PCM-PM frequency translation for satellite communication system, comparing performance characteristics
21 p3678 A69-39807

Communication satellites with regard to international arrangements for fruitful exploitation noting COSMAT, INTELSAT, European and international developments
22 p4052 A69-40276

Synchronous communications satellite launch constraints for fixed time or node, noting application to IDCSP/A mission and sun angle, occultation and transfer orbit
[AIAA PAPER 68-445] 22 p4036 A69-40543

Spacecraft phase array designed for use on synchronous communication satellite, discussing low structural weight packaging and unfurling problems and helix approach
22 p3915 A69-40705

German ground station radio communications via Intelsat satellites, discussing transmitting facilities, TV picture and sound signals, etc
22 p3902 A69-41249

Communication satellite technology application to overlay network linking nationwide data machines for business mail service with virtually instantaneous delivery at low cost
23 p4117 A69-41669

Monopulse, high power, three channel antenna feed system design for communication satellites, noting orthogonal polarization of transmit and receive functions
23 p4120 A69-41750

RFI effects of earth based emitters on operation of geosynchronous satellites for data relay from near earth orbiting satellites, noting frequency assignments
23 p4120 A69-41757

Communication satellite systems using hydrazine engine thrust for trajectory correction, discussing trajectory deviations causes and ERNO engine design
[DGLR-69-013] 23 p4203 A69-42152

TDMA/PCM system for communication tests via Applications Technology Satellites, discussing time synchronization and bit and frame coherency
23 p4129 A69-42510

Multichannel time division multiple access system for communication satellite networks, considering PSK modems, PCM codes and channel capacity
23 p4129 A69-42511

Communication subsystem design of Defense Communication Satellite Program /DCSP/ for background information, noting repeater with toroidal pattern antenna
23 p4131 A69-42537

UHF satellites for mobile, broadcast and low cost services, discussing bandwidth expansion, interference effects, ground linking, UHF partition, satellite antenna sizes, etc
[AAS PAPER 69-333] 24 p4282 A69-42872

Remote manipulator spacecraft system for refurbishing synchronous communication satellite, emphasizing compatibility with standard shroud Titan 3C launch vehicle
24 p4297 A69-43041

Communication satellites european development, discussing economic and technological problems, stressing color TV and SHF/FM transmission, compared to conventional ground station transmission
24 p4393 A69-43133

COMMUNICATION SYSTEMS U TELECOMMUNICATION

COMMUNICATION THEORY

Exponential distributions in Markov chain models for communication channels, considering error free runs of tropospheric systems
01 p0027 A69-10267

Linear random processes including law of large numbers, covariance estimation and linear to normal process relationship
01 p0029 A69-10555

Narrow band normal steady state random processes applied to signal dispersion by extended oscillating body, obtaining statistical characteristics
02 p0206 A69-11602

Book on communication systems covering signal design, video signals, communication satellites and threshold decoding techniques
03 p0383 A69-12867

Array radar technology development offering multifrequency operations from common aperture
03 p0388 A69-13182

Pseudonoise generator producing controllable repetitive random signal patterns used to evaluate instrumentation system
03 p0403 A69-13188

Multimode propagation communications system /MMPCS/ utilizing digital computer to implement intermittent system
03 p0389 A69-13191

Extension of results of one dimensional representation theory treating nonGaussian processes as perturbations of log normal process to higher dimensions
03 p0392 A69-13248

Wide signal and noise statistics range to determine noise rejection characteristics of communication system used for single path and diversity reception
03 p0394 A69-13376

Gain from communications operation at maximum usable frequency estimated on basis of long range ionospheric prediction technique adapted to computer
03 p0421 A69-13377

Symmetric M-ary signaling scheme, considering given calls signal vector transmission through communication channel
05 p0720 A69-16297

Book on introduction to random signals and communication theory covering signal analysis, analog and digital data transmission, information theory, etc
06 p0887 A69-17144

Energy fluxes statistical distribution produced by random and regular energy sources
07 p1076 A69-18510

Signal multiplexing within linear algebra framework permitting use of orthonormality in receiver construction without orthonormal functions generation in multiplexer
07 p1078 A69-18830

Satellite communication requirements for UK defense establishment, describing SKYNET system
08 p1272 A69-19957

Error probability for transmission of one of M orthogonal, equally likely, equal energy signals over generalized incoherent channel

09 p1452 A69-21314

Intermittent feedback channel for transmitter using orthogonal signals, noting smaller error probability and improved communication reliability

09 p1452 A69-21315

Round trip delay effect on probability of error in uncertainty feedback communication systems operating at channel capacity

09 p1453 A69-21322

Book on communication theory principles covering Fourier transformation, signal transmission, electromagnetic noise, amplitude, phase, frequency and pulse modulation, etc

09 p1454 A69-21801

Noise factor of two port in terms of various sets of noise parameters and source immittances, giving table for conversion formulas

09 p1455 A69-21897

Pattern recognition as part of statistical communication theory, using Karhunen-Loeve expansion to minimize root-mean-square errors, showing application to handwritten numerals

09 p1461 A69-22292

Error correction of digital data with cyclic codes and probability function set extended to Bose-Chaudhuri-Hocquenghem codes and P super M codes

10 p1655 A69-23529

Reliability behavior of information transmission between transmitter-receiver pair in network of erasure channels without decoding and recoding at nodes

10 p1657 A69-23865

Radio wave propagation in unstable inhomogeneous medium with space-time dispersion, showing adiabatic compression or expansion of wave packet spectrum

10 p1658 A69-23955

Narrow band normal steady state random processes applied to signal dispersion by extended oscillating body, obtaining statistical characteristics

11 p1835 A69-24709

Limitations of N-port concept in microwave technology, proposing definitions to avoid contradictions

11 p1841 A69-25624

Optimal communication by signal feedback link between transmitter and receiver based on optimum control and dynamic programming

12 p2046 A69-26060

Focusing factor in stratified medium with refractive index depending exponentially on height

12 p2029 A69-26100

Book on elements of detection and signal design covering transmitter optimization for coherent and noncoherent digital communication systems, statistical decision theory, radar detection, etc

12 p2033 A69-26867

Wide signal and noise statistics range to determine noise rejection characteristics of communication system used for single path and diversity reception

14 p2410 A69-28826

Gain from communications operation at maximum usable frequency estimated on basis of long range ionospheric prediction technique adapted to computer

14 p2433 A69-28827

Electrical engineering, Volume 3, communications, covering special theories, systems components, telecommunication, electroacoustics, digital and analog computers and programming

15 p2568 A69-30619

Lagrange expansion theorem for shielded surface waves, obtaining modal functions and power flows

16 p2750 A69-31947

Neumann-Lommel formula generalization for obtaining Bessel functions product sums illustrated with FM wave distortion calculation in multichannel system

18 p3101 A69-34625

Problem-oriented languages in man-computer intercommunication

18 p3106 A69-34658

Man-computer speech communication, discussing model and aspects of acoustics, phonetics, linguistics, language training, physiology, psychology, bionics, etc

18 p3107 A69-35099

Book on statistical communication and applications to radio and radar systems technology to provide guidelines for design decisions

19 p3267 A69-35900

Cross correlation and probability metric in coded sequential detection telemetry system, giving optimum parameters, overflow and error probabilities using computer simulations

19 p3273 A69-36266

High index frequency modulated waveform spectrum analysis including upper bound on approximation error to avoid fallacy of Woodward theorem [IEEE PAPER 68-TP-74-COM]

19 p3276 A69-36485

Representation theory of signal detection in non-Gaussian noise environments applied for improved near optimum system performance [IEEE PAPER 69-TP-10-COM]

19 p3277 A69-36488

Energy criteria inconsistency in evaluating frequency band changes attributed to simultaneous narrowing and broadening of different signal power bands

19 p3278 A69-36716

Optimum signals for high resolution radar and communication systems, using transmitter waveform design of autocorrelation and cross correlation functions

23 p4132 A69-42545

COMMUNITIES

NT MOUNTAIN INHABITANTS

Space broadcasting possibilities and problems, considering home reception and group participation at community centers

[UN PAPER 68-95287] 01 p0028 A69-10497

Urban noise control over transportation systems including aircraft and highway traffic operating beyond local noise ordinance purview

14 p2541 A69-29157

Airport noise control responsibility for airport and community planners using perceived noise level, noise and number index and community annoyance index as planning criteria

14 p2541 A69-29506

Aircraft noise abatement oriented toward compatibility between airports and adjacent metropolitan environments, analyzing results for theoretical and actual airports

[AIAA PAPER 69-800] 19 p3453 A69-35593

Joint noise effect on real estate value, discussing market survey, insulation and navigation easement costs and litigation damages

[AIAA PAPER 69-802] 19 p3288 A69-35594

Geostationary satellite TV broadcasting to small contiguous areas with separate programs, discussing communication distribution problems

22 p3902 A69-41252

COMMUTATION

Optical commutation to permit multifield monitoring and recording with one sensor by employing high resolution imaging fiber optics elements feeding common focusing lens

06 p0926 A69-17678

Feedback systems analysis, considering single phase and polyphase coupled and uncoupled commutation networks in forward loop and linear transfer function feedback loop

08 p1295 A69-19853

COMMUTATORS

NT DECOMMUTATORS

Miniature telemetry systems for gun launched projectile instrumentation and ejection payloads, noting voltage controlled oscillators, commutators and VHF FM transmitters

10 p1654 A69-23280

Rapid low level commutator for temperature measuring circuit with thermocouples, discussing construction and performance

11 p1884 A69-24758

Brushless DC motor with commutation control by magnetic position sensor scanned at HF

12 p2017 A69-26894

COMPACTING

Compaction kinetics in continuous quasi-viscous medium having plastic flow material under applied load, discussing hot pressing of nichrome powders

04 p0618 A69-15389

Properties of electrolytic and reduced titanium powders and sinterability of porous compacts

05 p0782 A69-16795

Mathematical analysis of compaction process for powder mixtures of different metals assuming known characteristics of components

15 p2641 A69-31182

Explosive compacting of aluminum powder, describing operational and experimental techniques, compacts hardness and density, mass production feasibility, etc

16 p2793 A69-31790

Compactability dependence of Fe, Co and Ni powders with Zr, Nb and Mo carbide additives on pressure, carbide content and lubricant

22 p3970 A69-40634

Optimal conditions for extrusion compacting of hard alloy mixtures plasticized with paraffin, determining

plasticizer content, upsetting, pressure and temperature

22 p3956 A69-40635

COMPACTNESS

U VOID RATIO

COMPARATORS

Wide range linear delay circuit with compensated bootstrap circuit generating linear ramp waveform and regenerative Schmitt trigger comparator

01 p0041 A69-10241

Gunn effect application in fast logic circuit devices including comparators, adder and shift register circuits

01 p0042 A69-10438

Multiinput sine comparators graphical analysis and design considerations, emphasizing semiconductor circuit providing quadrilateral polar characteristic on impedance plane

12 p2039 A69-26350

COMPARISON

Application of modern stability theory to solution of practical problems by means of comparison theorems, demonstrating effectiveness of method

03 p0467 A69-13747

Multiple cues in paired comparisons, discussing mathematical model of psychological process in information extraction and combination

21 p3664 A69-38970

COMPARTMENTATION

U COMPARTMENTS

COMPARTMENTS

NT AIR LOCKS

NT AIRCRAFT COMPARTMENTS

NT ANECHOIC CHAMBERS

NT COMMAND MODULES

NT PRESSURE CHAMBERS

NT PRESSURIZED CABINS

NT SPACECRAFT CABINS

NT TEST CHAMBERS

NT VACUUM CHAMBERS

Glutamic acid metabolism compartmentation in brain cortex demonstrated in vitro, using isotopic labeling

18 p3096 A69-35172

COMPASSES

U GYROCOMPASSES

U MAGNETIC COMPASSES

COMPATIBILITY

Plastic material requirements for semiconductor device encapsulation noting electrical compatibility, mechanical and environmental protection and costs

02 p0270 A69-12161

Large scale electronic systems configuration compatibility concept, discussing modular line replaceable units /LRU/ assigned set of numbers

08 p1322 A69-21154

Compatibility effects of automatic test equipment on avionic hardware design

11 p1865 A69-25070

High temperature compatibility of Mo, W, Nb and Ta as canning materials with high melting point and formation energy filling materials

14 p2463 A69-29219

Metal matrix compatibility of metal coated graphitized, silicon carbide and boron fibers, discussing fiber weakening processes

[ASM PAPER W9-20.1] 21 p3751 A69-38670

COMPENSATION

Stability contours for sampling and delay effects analysis in analog/digital hybrid simulation loops, considering compensation quality over simulated system natural modes

21 p3680 A69-39609

COMPENSATORS

Hologram chromatic aberration compensation by two lens system

01 p0080 A69-10430

Stationary Babinet compensator for measuring longitudinal solar magnetic fields by means of fringes introduced in spectroheliograms

11 p1880 A69-24433

Feedback controller compensator for invariant linear systems having unstable modes

12 p2054 A69-26517

Time delay errors compensation methods in analog-digital computation loops, finding digital scheme inferior to analog

15 p2572 A69-30618

Ellipsometric dimensions calculations with aid of laser radiation, stressing formulas for compensator and polarizer assemblies

15 p2636 A69-31474

- Moldable plastic shim material for structural airframe components, discussing application requirements
19 p3319 A69-35551
- Adaptive compensation to minimize human task in continuous manual control system using various models
20 p3482 A69-37721
- Programmable digital compensator for single high performance control loop servomechanisms
21 p3688 A69-39704
- Nonlinear compensator characteristics determination for modifying compensated system output signal under various disturbances with inputs subjected to white noise
21 p3688 A69-39862
- Babinet compensator with birefringent wedges made of stress frozen photoelastic material rather than quartz
22 p4042 A69-40442

COMPENSATORY TRACKING

- Roll-motion cues for man-vehicle control in compensatory tracking task with disturbance input
10 p1650 A69-23879
- Human information processing rates during one and two axis compensatory tracking tasks with secondary auditory task
10 p1650 A69-23880

COMPETITION

- Competition and aeronautical progress in aircraft industry, examining costs and effects of government limits on Boeing 707 and Douglas DC-8
03 p0536 A69-14110
- Competition and aeronautical progress in aircraft industry, examining costs and effects of government limits on Boeing 707 and Douglas DC-8
11 p2004 A69-24372
- Structure and scoring method for judging alternatives in contract selection
20 p3640 A69-38023

COMPILATION [COMPUTERS]

U COMPILERS

COMPILE PROGRAMS

U COMPILERS

COMPILERS

- Book on FORTRAN computer programming language
06 p0891 A69-17364
- Abbreviated Test Language for Avionics Systems /ATLAS/ as standard compiler input language for commercial airline automatic test equipment /ATE/
11 p1842 A69-25064
- Universal test equipment compiler /UTEC/ built for use with languages designed to control automatic test equipment
11 p1842 A69-25066

COMPLETENESS

- Completeness of Biot solution in theory of thermoelasticity, discussing Mindlin theorem and Boussinesq-Papcovich solution
07 p1236 A69-19470
- Completeness theorem for integrodifferential operator to establish Schwarzschild criterion for stability of gaseous masses
14 p2470 A69-28902

COMPLEX NUMBERS

- Dynamic polarizability at imaginary frequencies, deriving upper and lower variational bounds with functionals containing trial functions
01 p0122 A69-10284

COMPLEX VARIABLES

- NT AIRY FUNCTION
- NT ANALYTIC FUNCTIONS
- NT BESSEL FUNCTIONS
- NT CONFORMAL MAPPING
- NT CONJUGATES
- NT ELLIPTIC FUNCTIONS
- NT ENTIRE FUNCTIONS
- NT EXPONENTIAL FUNCTIONS
- NT GAMMA FUNCTION
- NT HANKEL FUNCTIONS
- NT HARMONIC FUNCTIONS
- NT HYPERBOLIC FUNCTIONS
- NT HYPERGEOMETRIC FUNCTIONS
- NT LEGENDRE FUNCTIONS
- NT LOGARITHMS
- NT MATHIEU FUNCTION
- NT NONHOLONOMIC EQUATIONS
- NT ORTHOGONAL FUNCTIONS
- NT RATIONAL FUNCTIONS
- NT SINGULARITY [MATHEMATICS]
- NT SPHERICAL HARMONICS

- Book on approximate representation of regular functions of complex variable, discussing Faber polynomials, best approximation theorems, etc
01 p0104 A69-10616

- Stresses in infinite elastic plate containing rigid rectangular inclusion subject to uniform stress field, using complex variable method and Schwartz-Christoffel conformal mapping
02 p0348 A69-12796

- Stress state of circular cylindrical shell subjected to uniform inward radial line load along generator solved by closed form particular integral, discussing convergence
02 p0349 A69-12797

- Eigenvector approximation of complex matrix by inverse iteration, giving Algol 60 program
03 p0455 A69-13371

- Dirichlet problem deviation from Bitsadze system with Noetherian properties, giving Hausdorff normal solvability conditions for inhomogeneous problem
03 p0456 A69-13603

- Levinson duality theorem for linear programs in complex space proved on basis of duality theorem for linear programming in real space
04 p0623 A69-14947

- Ground influence on Helmholtz flow in presence of plate perpendicular to stream, reducing problem to mixed Volterra problem in complex half plane
04 p0590 A69-15221

- Plane thermal stress distribution determined around holes under steady temperature distribution, using complex variable approach
05 p0836 A69-15877

- Electrical impedance of semiconductor supporting two waves contains entire complex transcendental function with complex parameter and infinity of zeros in left half z plane
07 p1196 A69-18268

- Complex variable theory usefulness in investigating existence and uniqueness of solutions for boundary values in partial differential equation
07 p1173 A69-18731

- Complex variable theory solution of eigenvalue problem governing elastic stability of thin elastic plate subjected to hydrostatic in-plane compression
09 p1615 A69-21921

- Linear thin shell theory in complex dependent variable form for determining fourth order partial differential equations, considering elastic shells with edge loads
11 p1978 A69-24811

- Integral representation for Wiener Hopf factorization of functions of complex variables for numerical processing of radiation problems
11 p1851 A69-24998

- Optimal control of multivariable complex systems through multilevel /hierarchical/ structure, discussing coordination problems
12 p2049 A69-26082

- Convergence of Bubnov-Galerkin method in complex separable Hilbert space, proving theorems for sufficient conditions
12 p2123 A69-26607

- Parametric variations method for solving nonlinear algebraic and transcendental equations, determining number of solutions in complex space
12 p2123 A69-26608

COMPLEXITY

U TASK COMPLEXITY

COMPLIANCE [ELASTICITY]

U MODULUS OF ELASTICITY

COMPONENT RELIABILITY

- Schmitt trigger current-voltage characteristic for determining switching behavior and switching point temperature, examining formulas and equivalent circuits
01 p0039 A69-10171

- IR optics for indicating dynamic mechanical component reliability via surface temperature variations
01 p0085 A69-10295

- Nondestructive testing of brazed liquid propellant rocket engine components and assemblies, describing radiographic, ultrasonic, thermographic, and leak test methods
01 p0085 A69-10534

- Mathematical model constructed for behavior of multicomponent system subject to cannibalization
01 p0086 A69-10651

- In-flight and flight line checkout techniques for foreign object damage to jet engines
01 p0056 A69-11055

- Steel selection for heat treated parts, discussing strength and hardness, service conditions, carbon content, quenching, cost, etc
01 p0101 A69-11397

- Guaranteed estimations of system reliability for systems with incomplete element reliability data
02 p0251 A69-11652

- Planar transistor reliability test results noting failure rate, stability and effect of temperature
03 p0402 A69-13006

- Book on laws of failures in technical equipment with emphasis on quantitative description and practicality of reliability theory, discussing redundancy problems
03 p0433 A69-13009

- Beryllium reflector distortion in Plum Brook Reactor due to neutron embrittlement and gas formation, noting material surveillance, replacement, etc
03 p0465 A69-13131

- Reliability system design, emphasizing circuit design analysis, failure drifts and component failure modes by use of computer programs /ECAP, CIRC and IMAG/
04 p0608 A69-15224

- Laws of wear and average life, noting application to electric connector reliability
04 p0579 A69-15320

- Reliable information storage in memories designed from unreliable components
04 p0569 A69-15455

- Reliable computation in computing systems designed from unreliable components, considering two models for component malfunctions
04 p0569 A69-15456

- Test equipment for rapid automatic checkout and evaluation of automatic flight control systems on commercial and jet transport aircraft
05 p0742 A69-15883

- Spacecraft terminal dry heat sterilization procedures for minimal time and temperature conditions, using simple geometric configuration of spacecraft for thermal analysis
05 p0712 A69-15942

- Recovery and long term reliability of Si p-n-p transistors subject to gamma radiation, using military specifications for failure
06 p0976 A69-16878

- Nondestructive technique to measure residual and working stresses in machine parts, using specially designed circuit
06 p0926 A69-17497

- Engineering designs and hardware required for low risk flight of long duration manned space stations
06 p1007 A69-17601

- Solder joint cracking in discrete component assemblies, discussing cracking mechanism and crack elimination methods
07 p1140 A69-19102

- Fiber reinforced plastic and metallic composites for longevity and endurance of materials at high temperatures and extreme loads, discussing alumina whiskers
07 p1167 A69-19290

- Wind tunnel rain erosion testing of components of aircraft or missiles flying at high speed
07 p1117 A69-19534

- Fail-safe goals, design criteria, analytical methods and test procedures to achieve reliable damage tolerant dynamic rotating parts for V/STOL and helicopter transports
07 p1237 A69-19569

- Transponders for communication satellites, discussing design constraints, reliability and transmission capacity increase
08 p1279 A69-19905

- Thermal stabilization and ethylene oxide effect on spaceborne electronic component sterilization and decontamination
08 p1283 A69-20266

- Components production process effect on reliability based on values and functional relations of internal parameters, noting influence on accelerated testing
08 p1319 A69-20346

- Operational reliability of manual and automatic flight control systems and components and current safety standards
08 p1255 A69-20720

- Microcircuit components and microelectronic systems reliability assessment including short term testing, noting digital systems, packaging, production controls, etc
08 p1291 A69-20984

- Postselection estimation of component reliability in multicomponent systems, considering cases of binomial and exponential distributions of random variables
08 p1322 A69-21099

- Computerized simulation of time dependent reliability of multicomponent system based on statistical model of component breakdown
08 p1277 A69-21100

- Computer programs for systems statistical reliability characteristics using reliability tests and time to failure data, giving optimal breakdown probability functions
08 p1322 A69-21101

Assessing cost effectiveness of reliability and quality of semiconductor products, using mathematical models
08 p1292 A69-21102

Reliability of individual components of multicomponent systems under variable loads, using asymptotic distribution of minimal values
08 p1322 A69-21103

Failure distribution functions based on Eyring component aging model, including failure probability density function for Weibull and gamma type distributions
08 p1322 A69-21104

Electronic components reliability tests, determining correlation between material quality and failure
08 p1293 A69-21109

Process control data in acceptance procedures for high reliability electronic components, discussing supplier and user cooperation
08 p1293 A69-21110

Reliability distribution parameters for electronic components, determining time and tolerance dependence of reliability
08 p1293 A69-21114

Failure mechanism in high-voltage semiconductor diodes explained by effect of reverse voltage pulses, considering design reliability
08 p1294 A69-21116

Reliability in microelectronics estimated from failures expected during lifetime, describing various test methods
08 p1294 A69-21121

Triodes reliability for space application, emphasizing RH 7 C used during Mariner 4 expedition
08 p1295 A69-21122

Stochastic model for calculating expected component failures in transient state from Weibull distribution failure data for first generation
09 p1504 A69-22149

Space guidance and control system components, noting control moment gyro, actuator, brushless DC motor, electrically supported gyro and laser gyro
09 p1500 A69-22434

Elastoplastic stress in notch as cause of decreased lifetime of aircraft components, analyzing stress reversal and displacement during takeoff and landing
09 p1620 A69-22576

Electroexplosive element design for safe reliable devices in liftoff and space environment, considering stray electric currents, RF fields and electrostatic discharges
10 p1752 A69-23022

Argas test loop as model for MHD power plant study, discussing component testing including channel preionization and relaxation experiments
10 p1673 A69-23478

State probabilities of finite stochastic queueing system for calculating equipment reliability parameters
10 p1664 A69-23693

Spacecraft electronic components design, environmental and reliability criteria including weight and power
11 p1843 A69-24340

Electronic systems and component reliability in space, considering electric parameter variation effects
11 p1848 A69-24867

Value engineering and component/products improvement incentive contract clauses role in defense product quality improvement
13 p2383 A69-28100

Electron fractography used in machine parts failure analysis to detect internal and surface cracks, forging defects, stress corrosion, fluid leakage sources, etc
13 p2269 A69-28182

Crack initiation prediction in high temperature components subjected to arbitrary thermal-mechanical cycling
13 p2365 A69-28252

Material selection criteria for low cycle fatigue resistance in components design determined from tensile test and incremental step test curves
[ASME PAPER 69-DE-59] 14 p2461 A69-28852

Thermionic converter components reliability under mechanical load and failure models, showing probabilistic nature of failures
14 p2400 A69-29227

Flight worthiness of mishandled electronic equipment, analyzing fragility and performance of shock exposed components and connections
15 p2576 A69-30362

Equipment testing, discussing collaboration between government agencies and independent environmental testing laboratories
15 p2720 A69-30398

Cost effectiveness of test selection when statistical distribution of load and strength are known, presenting

curves for equally dispersed normal parameters distribution
15 p2720 A69-30401

Viggen computer development, stressing reliability towards aircraft vibrations
15 p2577 A69-30620

Reliability of electronic components for space - Conference, Grenoble, November 1968
15 p2622 A69-30816

Space equipment reliability, discussing manufacturing defects, design faults, component failures, maintenance, overloads, accidents and operating errors
15 p2624 A69-30817

Spacecraft electronic component reliability policy based on preferential lists, selection programs and component management
15 p2624 A69-30818

Satellite circuit assembly reliability achievement by high reliability components, redundancy and optimal utilization
15 p2624 A69-30819

Management and scientific computer reliability difference, considering circuits, component assembly, software, maintenance, etc
15 p2624 A69-30821

Space electronic component reliability, considering suppliers and laboratory-workshop partnership
15 p2624 A69-30822

Short term plan of European electronic component selection for ESRO satellite without established guaranteed failure rate
15 p2624 A69-30823

Planar bipolar transistors degradation under thermal and ionizing radiation stresses, analyzing surface recombination currents of silica films and silica-silicon interfaces
15 p2625 A69-30826

Mass-produced silicon transistors reliability, presenting tables and curves of lifetime tests
15 p2626 A69-30833

Unitary sorting influence on reliability of planar transistors subjected to irradiation recovery cycles and scaled stresses
15 p2626 A69-30834

Electronic components reliability by failure rates and drift behavior, assuming probabilities product rule and exponential law of life distribution
15 p2626 A69-30835

Reliability control of 1/4-W resistors of tin oxide on glass substrate manufactured in quantity
15 p2627 A69-30837

Passive components reliability subjected to ionizing radiation for families, types, batches and individuals
15 p2627 A69-30838

Screening techniques for semiconductor devices, considering component classification with respect to population strength distribution
15 p2627 A69-30840

Production line requirements for MOS and IC, considering high reliability at minimum cost for space applications
15 p2627 A69-30841

Transistors and IC reliability for memory control evaluated by Concerto subprograms
15 p2627 A69-30842

Ceramic condensers with very high reliability mass produced for Concerto program, describing component characteristics and production methods
15 p2627 A69-30844

Metal film resistor reliability for conventional and space use, outlining guidelines for fabrication and quality control
15 p2628 A69-30847

Computer aided design /CAD/ of component selection for circuit optimization applied to circuit performance and sensitivity calculations
15 p2628 A69-30849

Complex systems reliability, describing uses of computer programs in analysis of circuit design, component failure modes and faults due to drifts
15 p2572 A69-31042

Failure analysis techniques in electronic component reliability laboratory, discussing electrical and physical tests to detect weaknesses in manufacturing and design
15 p2722 A69-31133

Long life repairable equipment reliability and mean time between failure with limited life components and material in normal life maintenance environment
15 p2581 A69-31134

Electronic component life test sampling plans based on lognormal distribution and instantaneous failure rate or hazard rate criterion
15 p2630 A69-31137

Space vehicle subcontracted components reliability attainment, discussing reliability process specifications, motivation, product reliability and feedback programs
15 p2723 A69-31139

High reliability space system electronic parts control program to assure success of unmanned space missions
16 p2793 A69-31714

Concorde propulsion and ejection systems reliability, testing reheating duct, primary nozzle, secondary assembly, etc
16 p2837 A69-32072

Automatic nonrepairable control elements reliability evaluated statistically with differentiable lifetime distribution function
16 p2764 A69-32199

Remote disassembly and inspection methods for evaluating NRX-AG reactor components performance [AIAA PAPER 69-511]
16 p2810 A69-32712

Engine and components reliability, discussing design stage and programming [AIAA PAPER 69-476]
16 p2795 A69-32771

Scanning electron microscopy to study device failure and performance, discussing limitations and progress
17 p2936 A69-32890

Aircraft turbines mechanical parts reliability tests, discussing examples of blade fatigue rupture and rotor disk fatigue
17 p3020 A69-33347

Data inaccuracy used for calculating forecasts of reliability analyzed by Monte Carlo simulation
17 p2937 A69-33389

Maximum helicopter level flight speed loads spectrum shape and severity related to rotor component fatigue design strength [AHS PAPER 372]
17 p3059 A69-33516

Helicopter flight loads spectra data compared on statistical basis to establish component service lives [AHS PAPER 301]
17 p2901 A69-33548

Reliable structural joints and attachments design for components fabricated from nonmetallic refractory brittle materials, discussing departures from conventional practices
17 p3061 A69-33569

Soviet book on reliability of semiconductor radio devices of flight vehicles covering failures through production errors, power source instability, environment induced changes, etc
18 p3108 A69-34350

Spacecraft and aircraft components failure analysis for ensuring high reliability of final products
18 p3143 A69-34483

Reliability tasks vs product reliability, discussing differences in effectiveness and management programming
18 p3143 A69-34484

Physics of Control program for electronic devices reliability, discussing qualified parts, chemical, physical and electrical properties, parameter ranges, specifications and corrective action
18 p3143 A69-34488

Semiconductor life potential evaluation based on electrical parameters measurements at various voltages over wide temperature range
18 p3144 A69-34489

Radiation resistant devices for minimizing neutron and gamma radiation effects on military electronic components, discussing selection features and sampling lot sizes
18 p3144 A69-34491

Mechanical failure technology, describing programs of government coordinated Mechanical Failure Working Group /MFWG/
18 p3144 A69-34492

Beam lead sealed junction transistor and integrated circuits reliability, describing test conditions and failure mechanisms
18 p3145 A69-34497

Epoxy encapsulated transistors reliability, data from long term maximum rated life and accelerated tests
18 p3145 A69-34498

Prefailure detection of unreliable electronics parts from random samples of received parts lots, noting cost reductions
18 p3146 A69-34508

OGO program failure rate analysis with respect to cost, schedule and performance tradeoffs, considering component and systems design and reliability, prelaunch feedback, etc
18 p3207 A69-34519

Lunar Orbiter Parts Program for selection and control of electronic and electrical parts, discussing reliability and flight failures
18 p3207 A69-34520

Computer program and component part models for nonlinear DC circuit simulation at various temperatures 18 p3108 A69-34525

Statistical testing techniques using small sample size at low component levels to predict product performance 18 p3117 A69-34528

Equipment maintainability demonstration technique, discussing simulation, repair time rates mathematical distribution, range and limits 18 p3117 A69-34530

Glass encased electronic components with conformal coatings, considering glass breakage at low temperature 19 p3281 A69-35547

Signature analysis diagnostic methods for reliability tests involving final product checkout and early fault detection 19 p3322 A69-35574

Holographic interferometry for nondestructive testing of aircraft materials, discussing applications to quality control 19 p3322 A69-35576

System reliability evaluation based on failure analysis illustrated with examples covering initial requirement through parts production monitoring and control 19 p3454 A69-35782

Microwave equipment reliability considered in terms of various subsystems and components, showing carefully formulated and executed test program as essential 19 p3282 A69-35785

Gas turbine components life prediction, using Weibull distribution and Bayes theorem to estimate probability of crack initiation 19 p3394 A69-36004

Environmental testing of space hardware, discussing failure detection by thermal vacuum tests and mechanical signature analysis 19 p3430 A69-36009

Reliability measurements based on maintenance records, considering human factor and life limiting and random chance design 19 p3327 A69-36013

Reliability study of launch support equipment, presenting failure data for mechanical and electromechanical components 19 p3295 A69-36023

Mechanical components life or cycles to failure probability distributions determined by Monte Carlo method, comparing theory with aircraft engine parts field data 19 p3327 A69-36031

Time-dependent failures of components subjected to fatigue loading analyzed for reliability prediction 19 p3437 A69-36032

Environment effect on scientific and telecommunication equipment mounted on exploratory probe during Venus atmosphere entry for acceleration loading in design 19 p3431 A69-36037

Bayesian reliability demonstration tests for predetermining sample size producer and consumer risks for equipment with exponential and binomial failure distributions 19 p3327 A69-36039

Computer program using system simulation and Monte Carlo techniques to assess turbojet engine compressor disk reliability, discussing maintenance policy and engine design effects 19 p3394 A69-36042

FM radioaltimeter for Concorde aircraft, describing autocorrelation and automonitoring device, signal characteristics, reliability, etc 19 p3315 A69-36699

Hazard and renewal rate and bathtub curves for electronic equipment reliability, noting single and multiple probability densities 20 p3504 A69-37070

Component hazard rate distribution functions from unit time and failure analysis, noting confidence statements and simulation studies 20 p3548 A69-37158

Onboard computer reliability, discussing missile computers and maintenance procedures 20 p3503 A69-37400

C-5A transport modular valve design for improved maintenance and high reliability due to manifold-cartridge arrangement 20 p3466 A69-38178

MIL-STD-781B reliability tests with standard based on exponential distribution for equipment exhibiting constant failure rate, noting sampling 20 p3551 A69-38289

Encapsulation effects on piece parts in high density package, considering unexpected part failures elimination in Lunar Module Signal Conditioning Electronic Assembly 22 p3910 A69-39953

Techniques to control, measure and assure reliability of electronics systems and equipment, emphasizing Thorndike chart and Molina tables 22 p3953 A69-40026

Reliability testing and parts screening of electronic systems for best parts selection 22 p3953 A69-40029

Safety and failure of components - Conference, Brighton, England, September 1969 24 p4397 A69-42767

Gas turbine engine problem causing component failures, considering alternative replacement strategies 24 p4318 A69-42774

Engineering components service failures involving fatigue crack propagation, analyzing causes 24 p4398 A69-42775

Component reliability effect on airline operation of VC 10 aircraft, investigating failure modes and maintenance 24 p4318 A69-42776

Management role in ensuring products and components quality and reliability, analyzing failure reasons 24 p4416 A69-42778

High reliability of solenoid and pressure regulating valves under long duration space missions, considering design, tests and controls [AAS PAPER 69-238] 24 p4319 A69-42854

Equipment reliability determination from relations for efficiency characteristics of stochastic queueing system with finite number of sources having Markov character 24 p4287 A69-43129

Microelectronics test program consisting of four reliability screening levels based on Mil-Std 883 24 p4287 A69-43205

COMPONENTS

Passive circuit components electrical properties at HF using equivalent circuit 08 p1283 A69-20135

Bubble leak testing of components to understand effects of gas and liquid viscosity, surface tension, pressure differential and temperature 09 p1503 A69-21391

Subcontractors documentation coordination system for Mississippi Test Facility, identifying end items for maintenance and spares provisioning 18 p3118 A69-35063

State variables with delta functions for electrical network with discontinuously variable components, discussing application to parametron 19 p3287 A69-36763

COMPOSITE MATERIALS

NT CERMETS

NT LAMINATES

NT METAL MATRIX COMPOSITES

NT REINFORCED PLASTICS

NT THREE DIMENSIONAL COMPOSITES

NT WHISKER COMPOSITES

Mass or energy transfer in reinforced media, discussing components characteristics and role of diffusion processes 01 p0173 A69-10079

High temperature magnetic analysis of metallurgical structure of high strength steels and composites, including phase transformation and matrix grain structure 01 p0093 A69-10111

Highly oriented graphite crystallites in pyrographites and composite materials, discussing preparation and anisotropy ratios in physical properties 01 p0102 A69-10978

Composite material mechanical failure due to detachment of microfiber ends from elastic matrix while under tension 01 p0171 A69-11259

Fiber-fiber interaction effect on stress distribution and tensile strength of discontinuous aligned fiber composites 01 p0171 A69-11261

Elastoplastic stress-strain behavior of concentric composite cylinders under uniaxial tension using analytical model, predicting transverse stresses during axial loading 01 p0171 A69-11263

Thermal stresses near spherical inclusion in elastic matrix with uniform heat flow 01 p0171 A69-11264

Ribbon reinforcements in composite materials noting stiffness properties 01 p0172 A69-11265

Quantitative determination of phenolic content in composite materials by pyrolysis gas chromatography method 01 p0025 A69-11267

Elastic properties of epoxy resins, deriving relation by considering different shear properties in tension and compression 01 p0103 A69-11268

Diffusion zones in filament reinforced metal matrix composites, using metallographic technique 01 p0103 A69-11269

Stress transfer from loaded matrix to single fiber in composite materials determined by series and step formulations 01 p0172 A69-11271

Critique of paper on thermal conductivity of composite materials by long wave method 01 p0172 A69-11272

Off-axis test for hard orthotropic composite materials, discussing fixture design to reduce shear coupling effect 01 p0103 A69-11273

Reinforcing glass fiber fillers in thermoplastic commercial products, noting applicability to high speed fabrication by injection molding processes 02 p0269 A69-11794

Fracture process in composite films of stressed tetrafluoroethylene and fluorinated ethylene propylene 02 p0270 A69-12368

Composite tensile-failure modes, discussing failure load prediction, experimental data and statistical analysis of stress concentration effects [AIAA PAPER 68-173] 02 p0347 A69-12514

Time dependent viscoelastic stress distribution in two phase composite material, using plane stress model for approximation 02 p0348 A69-12540

Metal composite materials, discussing strengthening mechanism for inclusion of high elastic coefficient and creep limit fibers in weak ductile matrices 02 p0268 A69-12750

Fabrication of Cu-W composites with discontinuous fibers based on sintering and rolling 03 p0444 A69-13349

Composite main rotor blade for Sud-Aviation SA-330 helicopter consisting of steel spar/epoxy-glass envelope [SAE PAPER 68-0693] 03 p0366 A69-13444

Fiber-matrix interfacial bond function and bond strength role in fiber composites mechanical behavior 03 p0450 A69-13881

Elastohereditary characteristics of composite materials with random inhomogeneities based on Volterra principle 04 p0667 A69-14263

Radiation processed wood-plastic materials produced by impregnating natural wood with liquid monomer followed by ionizing radiation induced polymerization 04 p0605 A69-14582

VTOL aircraft materials for improved lightness, durability and cost, noting Be alloys, filamentary composite materials and future problems 05 p0702 A69-15962

Mechanical and physical properties and cryogenic wear tests performed on composite materials, considering NERVA cryogenic turbopump bearing retainer development [ASME PAPER 68-WA/LUB-10] 05 p0768 A69-16133

Flow stress of iron wire reinforced aluminum alloy composites [ASME PAPER 68-WA/MET-10] 05 p0780 A69-16150

Statistical model for tensile fracture of parallel fiber composites based on stress criterion for crack propagation [ASME PAPER 68-WA/RP-7] 05 p0783 A69-16159

Boron carbide continuous filaments preparation and properties, discussing use in resin and metal composites [ECS PAPER 210] 05 p0783 A69-16236

Glass, boron and graphite filament wound resin composites and liners for cryogenic pressure vessels 05 p0785 A69-16488

Cryogenic mechanical properties of epoxy resins and glass/epoxy composites 05 p0785 A69-16491

Composites reinforcement with single crystal flakes of aluminum diboride 05 p0785 A69-16581

Metal matrix composites - ASTM Conference, Boston, June 1967
06 p0938 A69-16940

Metal matrix composites highest potential for future use and development of filament-matrix compatibility in relation to high temperatures
06 p0939 A69-16941

Lattice strains in matrix phase of aluminum-boron and copper-tungsten composites measured by X ray diffraction
06 p0939 A69-16944

Metal matrix composites compression microstrain behavior, analyzing continuous fiber composites of magnesium-boron and copper-tungsten
06 p0939 A69-16945

Diffusion bonded aluminum-boron composite material, discussing mechanical, metallographic and radiographic properties
06 p0939 A69-16946

Plastic yielding and strain distribution in Al reinforced with stainless steel wires determined by electron microscopy
06 p0940 A69-16947

Micromechanics of boron filament reinforced aluminum composites
06 p0940 A69-16948

Aluminum-silica fiber reinforced metal composite, discussing mechanical behavior and effect upon engineering applications
06 p0940 A69-16949

Aluminum-stainless steel wire reinforced metal matrix composites, analyzing strain hardening and plastic deformation
06 p0940 A69-16950

Fatigue performance of composites consisting of W or Mo helical coils embedded in Cu matrix, discussing evaluation from microstructural behavior
06 p0940 A69-16951

Delamination effects on strength degradation of filament wound composites
06 p0946 A69-17126

Controlled microstructures of eutectic aluminum-copper aluminides produced for mechanical properties studies
06 p0942 A69-17227

Metal fiber reinforced ceramic matrix composites, discussing model system, bond strength, loading and elastic properties
06 p0946 A69-17528

Fiberglass reinforced plastic bottoms design for integration with cylindrical shells, discussing design, shapes and boundary value problems
06 p1025 A69-17685

Statistical theory of material strength with application to composite materials reinforced with whiskers and continuous fibers
[AIAA PAPER 69-123] 06 p1028 A69-18142

Incremental complementary energy method of stress analysis of orthotropic nonlinear materials having different behavior in tension and compression
[AIAA PAPER 69-119] 06 p1028 A69-18159

Initial geometric imperfections effect on buckling and postbuckling behavior of laminated composite cylindrical shells under axial compression, considering reinforcing fiber orientations
[AIAA PAPER 69-93] 06 p1029 A69-18194

High strength carbon fibers development and applications in reinforced composite materials and aerospace industry
06 p0947 A69-18236

Two phase self lubricating composite materials for high temperature, detailing impact strength, friction and wear tests
[IME PAPER 12] 07 p1137 A69-18560

Compressive strength of boron fiber-epoxy matrix composite, noting matrix support of fibers against buckling
07 p1170 A69-18713

Critical axial load for elastic instability of unidirectional equally spaced fibers in plane of composite plate and buckling modes
07 p1232 A69-18714

Stress concentration factors for composite body of two isotropic elastic phases in plane strain in plane of composite parameters
07 p1170 A69-18716

Fiber geometry and partial debonding effects on bond stress distributions around single rigid fiber in infinite elastic plate subject to tensile stress
07 p1170 A69-18717

Cylindrically orthotropic hollow cylinder elastic properties determination using experimental test for production of stress and strain states and end effects
07 p1232 A69-18718

Plane anisotropic rectangular plates with various boundary conditions, analyzing stability, natural frequencies, mode shapes and displacement under lateral loads
07 p1232 A69-18719

Sign conventions definition and importance for shear stress and strain analysis in laminated anisotropic composite materials, noting role in studying response
07 p1170 A69-18720

Technique for compressive mechanical behavior of viscoplastic nonlinear composites, discussing rate dependence and one dimensional stress-strain time properties
07 p1159 A69-18721

Statistical computations of elastic moduli of macroscopically isotropic particulate composites, discussing porosity and elastic properties of materials made by sintering
07 p1159 A69-18722

Anodizing effect on flexural properties of Al-aluminum oxide sandwich composites, emphasizing properties of oxide coatings as function of thickness
07 p1159 A69-18723

Axial loading of unidirectional composite with hexagonal array of isotropic circular filaments generalized for filament anisotropy, discussing matrix elastic modulus and Poisson ratio
07 p1170 A69-18724

Directional solidification of multicomponent metal alloys for matrix in fiber reinforced composites, using monovariant eutectic reactions
07 p1166 A69-19145

Fiber reinforced plastic and metallic composites for longevity and endurance of materials at high temperatures and extreme loads, discussing alumina whiskers
07 p1167 A69-19290

Elastic constants of composite materials by dispersion relation of sound waves for long wavelength, assuming periodicity in three dimensional rectangular lattice
07 p1236 A69-19457

Fabrication and processing techniques, tooling concepts and quality control for composite materials used in large aircraft, discussing honeycomb and sandwich structures
[ASM PAPER D8-25.4] 07 p1172 A69-19670

Yielding of matrix material and cell size of substructure relationship to dry abrasion resistance of SAP type aluminum alloy at room temperature
08 p1319 A69-19995

Fiber-metal matrix composites fabrication, applications, mechanical properties and powder metallurgy
08 p1332 A69-20204

Development of materials in aerospace structures and propulsion systems, discussing superelastic alloys, graphite fibers, composites, refractory metals and processing techniques
08 p1332 A69-20306

Translunar cracks in laminated graphite filament composites, noting effect of thermal stresses due to cooling
08 p1337 A69-20483

Susceptibility of high modulus graphite and boron fiber epoxy composites to lightning damage, noting degradation by pulse current
08 p1338 A69-20486

High modulus and high strength carbon fibers and composites, discussing mechanical properties and interlaminar shear strength
08 p1338 A69-20488

Filament winding process variables effect on carbon or fiberglass reinforced composites, determining mechanical properties
08 p1338 A69-20489

Fracture energy of unidirectional laminated composites related to diameter, debonding energy and strength of reinforcing filaments
08 p1414 A69-20493

Tensile characteristics of discontinuous unidirectional fiber reinforced glass-epoxy composites and filament wound material, discussing alignment and interfacial bonding
08 p1339 A69-20496

Nondestructive testing methods application to fiber-bonded composites, noting X ray diffraction, radiography and ultrasonics
08 p1339 A69-20498

Thermoelastic properties of particulate, filamentary and layered composites, summarizing Soviet theoretical and experimental work
08 p1339 A69-20500

Matched metal molding of short graphite fiber composites
08 p1339 A69-20502

Plastic composite reinforcements with boron, silicon carbide, graphite, single crystal alumina and laminating resins, discussing properties and fabrication
08 p1340 A69-20503

Shop-ready high modulus carbon and fiberglass composite reinforcement system, stressing effect of modulus fibers amount in laminate
08 p1340 A69-20508

Mechanical properties of cast epoxy resins correlation with corresponding composites strength under static and dynamic fatigue stressing
08 p1340 A69-20510

Composite materials based on carbon and boron filaments, discussing application in turbine blades, propeller and helicopter rotor blades and airframe components
08 p1341 A69-20601

Mechanical properties of ceramic material consisting of pure silica matrix reinforced by carbon fibers
08 p1341 A69-20700

Cylindrically deformed fiber reinforced material, obtaining kinematics and constitutive equations
08 p1418 A69-21002

Thermal stress field under uniform heat flow due to elliptical elastic inclusion for anisotropic case
08 p1418 A69-21003

Failure criteria for predicting filamentary composite strength under uniaxial and combined stresses from properties and fabrication process considerations
09 p1611 A69-21479

Composite materials and alloys for jet turbine components in 1970s, discussing anticipated temperatures and material properties
09 p1523 A69-22061

Boron and graphite fibers role in composites cost feasibility in 1970s
09 p1524 A69-22067

Boron-epoxy composites applications and properties, comparing strength to weight and stiffness to weight ratios with aluminum, titanium and beryllium
09 p1529 A69-22068

Development and fabrication of fiber-resin and fiber-metal composites, discussing application to aerospace technology
09 p1524 A69-22069

Four point flexure, ring flexure and NOL ring tension tests for evaluation of composite material mechanical properties
09 p1499 A69-22308

Fatigue behavior of composite disk modified from previously evaluated boron epoxy reinforced titanium compressor disk
09 p1619 A69-22323

Prepreg based on S glass with HTS finish and B staged epoxy resin, discussing tensile strength and moisture exposure
09 p1530 A69-22327

Automatic fabrication process for boron reinforced composite structures, concerning orienting and laminating jet flap skins
09 p1507 A69-22329

Magnesium boron composite fabrication by diffusion bonding and liquid metal infiltration, obtaining minimized property variations and high strength to density ratios
09 p1507 A69-22332

Subscale aircraft fuselage section fabricated with lightweight graphite fiber/epoxy resin composite material
09 p1509 A69-22341

Bonded Al-B metal matrix composite materials hot press fabrication and design, discussing temperature pressure time cycles and honeycomb sandwich structures
09 p1510 A69-22351

Ferromagnetic composite materials for microwave absorption and shielding over frequency band 0.3 to 10.0 GHz
09 p1510 A69-22352

Whisker metal matrix composite fabrication, discussing aligned whisker distribution without degrading strength or fracturing and detailing extrusion process
09 p1511 A69-22361

Graphite fiber electroplating with nickel on continuous basis for ribbon like continuous flexible twist free yarn
09 p1512 A69-22362

Pyrolytic carbon felt composite development and properties, measuring and tabulating mechanical, thermal and ablation properties
09 p1530 A69-22364

Materials, processing and testing variables effects on mechanical properties determined for metal matrix composites

[ASME PAPER 69-GT-23] 09 p1527 A69-22496

Titanium-boron composites for gas turbines, mechanical properties and service life in high temperature environment

[ASME PAPER 69-GT-1] 09 p1527 A69-22510

Static and dynamic strength tests and modulus data for graphite fiber/epoxy composite yarn, noting ply winding and dimensions

[ASME PAPER 69-GT-114] 09 p1531 A69-22520

Unidirectionally solidified eutectic composite of Al and Cu-Al intermetallic, noting tensile properties at room and high temperatures

10 p1708 A69-22995

Polymeric composites mechanical energy dissipation dependence on dimensions of interfacial region between matrix and filler phases, considering particle size and strain magnification

10 p1794 A69-23037

Pulse echo ultrasonic nondestructive testing of C-5 adhesive bonded aluminum composites with multiple bond lines

10 p1698 A69-23047

Cosserat continuum and elasticity models of dynamics of composite materials, analyzing dispersive longitudinal waves

10 p1798 A69-23148

Torsional vibrations of composite elastic orthotropic cylinders, including cylindrical shells and isotropic composite cylinder

10 p1800 A69-23243

Superconducting magnets steady state stability improvement by using composite conductors

10 p1746 A69-23634

Rubber modified thermoplastics structure and mechanical properties, emphasizing stress concentration around composite particles and crazing role in creep and fracture

10 p1716 A69-23985

Electroplating solutions test for filament winding and electroforming process used in fabricating fiber reinforced metal composites

11 p1890 A69-24337

Elastic waves propagation in inhomogeneous composite media, considering coefficient of structural stress concentration

11 p1972 A69-24649

Reinforced metals properties and applications including fibers and lamination, notch sensitivity, brittle fracture, failure and heat resistance characteristics

11 p1904 A69-24898

Varying diameter anisotropic composite shafts torsion based on strain and stress functions

11 p1982 A69-24975

Unidirectional fibrous materials stability, finding characteristic equation in form of infinite determinant by solving three dimensional stability of reinforcing fibers in binder

11 p1985 A69-25172

Shim joints design for composite material structural members reinforcement in joint region, considering weight factor

[AIAA PAPER 68-341] 11 p1987 A69-25369

Graphite and B filament-epoxy resin composites application to aeroelastic scaled dynamic models, analyzing weight savings, fabrication and component stiffness

11 p1990 A69-25508

Fiber reinforced materials shear and tensile strength effect on stress-strain state of composite materials machine parts, considering design requirements

11 p1907 A69-25680

Fabricable materials with low plastic deformation for gas turbine components, noting strength vs temperature for alloys, fiber composites and ceramics

[IME PAPER 8] 12 p2147 A69-25791

Composite materials for aerospace applications, discussing high modulus filaments, structural and non-structural design considerations, nondestructive testing techniques, etc

12 p2111 A69-25852

Heat resistant composites, discussing composition, properties and high temperature behavior, plastic materials, reinforcement filaments, whiskers and test methods

12 p2117 A69-25855

Fiber reinforced space vehicle combustion chambers and cryogenic fuel tanks, discussing design and elastomechanical problems

12 p2176 A69-25860

Book on design procedures for modern fibrous composites emphasizing stiffness properties and calculations, covering laminates orthotropic lamina, etc

12 p2179 A69-26238

Stress distribution in elements of unidirectionally fiber reinforced composite materials analyzed as function of fiber content and fiber-matrix elastic properties

12 p2180 A69-26263

Book on ceramic fibers and fibrous composite materials as structural reinforcements covering dynamic testing of fine filaments and whiskers, material characterization, etc

12 p2118 A69-26340

Thin multiple layer superinsulation protection against reentry heat, discussing composite design considerations and refractory materials selection

12 p2060 A69-26817

Composite materials consisting of brittle inorganic glass matrix with metallic or inorganic crystal microspheres, noting strength and elasticity

12 p2115 A69-26830

Stress distribution in matrix of unidirectionally fiber reinforced composite subject to shrinkage and normal transverse load, using three dimensional photoelastic analysis

12 p2189 A69-27162

Elastic deformation of cord reinforced compressible thin sheet and rectangular cuboid solved using linear stress strain law and strain tensor nonlinear components

13 p2359 A69-27262

Effective tensors of elastic moduli and yielding of composite materials, considering multiparticle interactions and use of equilibrium and incompatibility equations

13 p2360 A69-27382

Fiber polymer composite flexible insulating materials properties and applications stressing synthetic organic fibers

13 p2286 A69-27989

Finite control volume approach to shock Hugoniot in unidirectional fiber reinforced composite, computing shear force along matrix-fiber interface

[AIAA PAPER 69-359] 13 p2366 A69-28292

End constraints and length/width ratio influence on composites off axis tensile tests, considering rigid clamping with/without end rotation

13 p2286 A69-28667

Short fiber composites flow orientation in system of high volume glass fibers in epoxy resin measured by glass rheometer

13 p2287 A69-28670

Boron nitride coated boron reinforced metal matrix composites, discussing continuous liquid infiltration, fiber-matrix reactions and heat treatment

13 p2283 A69-28671

Shrinkage stresses in two phase materials, analyzing stress distribution in epoxy inclusions in plasticized matrix during curing by photoelastic method

13 p2371 A69-28675

Dielectric constants of nonconducting composite suspensions of spheres and parallel cylinders in terms of filler particles, matrix and volume fraction

13 p2287 A69-28677

Oriented composites obtained from organic system under various directional solidification conditions

13 p2287 A69-28680

Theoretical compression strength of reinforced materials determined assuming material components differing elasticity moduli

14 p2532 A69-28973

Tungsten alloy fiber reinforced nickel base alloy composites stress-rupture strength, oxidation and impact resistance for high temperature turbojet engine buckets

14 p2462 A69-29010

Composite airframe structural joint design and weight considerations for boron and glass fiber reinforced plastic materials

[ASM PAPER W9-23.1] 14 p2535 A69-29448

Organic and inorganic fabric reinforcements effects on thermal properties of composites noting thermal conductivity, diffusivity, specific heat constants and temperature ranges

15 p2642 A69-30466

Hot pressed molybdenum disulfide-nickel composite film friction and wear tests in air and face seal configuration

[ASLE FICFS PREPRINT 23] 15 p2620 A69-30491

Torsion of composite prismatic rod consisting of three different isotropic materials with two interfaces converging on cross section contour corner point

15 p2707 A69-30579

Tissue-type fiberglass reinforced material properties as prototype of continuous anisotropic hereditary elastic media

15 p2642 A69-30584

Heat resistant fiber composites produced by oriented eutectic crystallization in Co and Ni quaternary alloys [ONERA-TP-710]

16 p2799 A69-31765

Optical measuring methods of cross sections and mechanical properties of heat resistant fiber reinforced materials

16 p2803 A69-31804

Biaxial stress strain properties of graphite base refractory composites noting fracture strength predictions [AIAA PAPER 68-337]

16 p2803 A69-32150

Ceramic phase reinforcement of metals and alloys, discussing interfacial energies, binding forces and elastic stress fields [ONERA-TP-661]

16 p2802 A69-32204

High strength fibers and composite materials for structural design, considering anisotropy and low ultimate tensile strain

16 p2802 A69-32380

JT8D turbofan engine composite fan blades design and fabrication methods using aluminum-Borsic fiber, noting direct and indirect weight reduction [AIAA PAPER 69-465]

16 p2842 A69-32698

Composition effect on tensile and flexural moduli of composites containing randomly distributed fibrous strands, establishing strength-composition relationships

17 p2991 A69-32960

Composite modified cast-double-base rocket propellants with large proportions of metallic fuel and oxidizer, discussing application rocket propulsion

17 p3017 A69-33349

Sliding friction and wear properties of metal ceramic composites applied to aircraft brakes

17 p2987 A69-33375

Nondestructive tests for glass filament wound composites void content, considering test methods and mechanical properties prediction role

17 p2979 A69-33656

Filamentary composites elastic constants calculation extended to hexagonal symmetry by long waves method

17 p3061 A69-33666

Composite materials behavior studies for structural applications, using macroscopic and microscopic phenomenological approach

18 p3154 A69-34607

Composite and structured material forms combination for obtaining high performance and low cost

18 p3161 A69-34608

Composite polymers thermophysical properties at thermal destruction temperatures, noting increased heating rate effect on kinetic curves

18 p3161 A69-34696

Metal alloys mechanical properties summary for cryogenic applications, considering fracture and thermal behavior, cryogenic structures fabrication and composites applicability

18 p3158 A69-35416

Composite material applications in space vehicle structures, noting strength and stiffness of boron fibers in plastic or metal matrices

19 p3340 A69-35502

Beryllium wire reinforced Al composites, discussing layup techniques and coated filament advantages

19 p3340 A69-35508

Mechanical properties and thermal aging of laminated specimens of collimated B monofilament reinforced composites preimpregnated with polyimide resin

19 p3354 A69-35514

High modulus graphite epoxy composite material laminates fabricated and tested, correlating filament strength variation effect with composite tensile strength

19 p3354 A69-35518

Fiber reinforced carbon and graphite with application to reentry and propulsion systems and high temperature gas turbines, noting three dimensional woven quartz

19 p3354 A69-35519

Composite ceramic armor systems for airborne vehicles and personnel, air cushion vehicles and ground troops, discussing weight and contour forming advantages

19 p3355 A69-35525

Thermal and mechanical properties UV of diazidophosphoridines, carbodiimides and phosphorus amide epoxies resins composites for use in environmental extremes

19 p3356 A69-35528

Pyrolytic graphite coated composite as nozzle throat material for high energy metalized solid propellant motors

19 p3357 A69-35539

Ultrasonic nondestructive testing technique for fatigue induced damage location and criticality in filament wound fiberglass cylinders, correlating damage to residual life

19 p3322 A69-35577

Boron nitride and boron nitride composite under high temperatures in air and vacuum for various time periods, discussing thermal shock and oxidation resistance

19 p3359 A69-36208

Structural aerospace materials development with emphasis on Be and Ti alloys, discussing material combinations and composites

19 p3345 A69-36319

High temperature materials for aerospace and spacecraft applications, considering carbon/carbon composites, oxides, carbides, fibers and ablative systems

19 p3346 A69-36320

Jet engine compressors and fans, combustors, turbines and composite materials in evaluating thrust-weight ratio, engine size, weight and life, etc

19 p3395 A69-36322

Photoelastic model methods for two and three dimensional investigations of microstresses in composite materials

20 p3565 A69-36940

Geometry effects on stresses in discontinuous composite materials, studying fiber spacing, failure and discontinuities size and nature

20 p3565 A69-36942

Composites for weight sensitive aerospace vehicles including reentry vehicles and V/STOL aircraft, considering costs, fracture toughness, corrosion resistance, etc

20 p3565 A69-37291

Transverse stiffness and strength of unidirectional fiber-reinforced composites determined as function of fiber volume content, using finite element method and stress functions

20 p3623 A69-37354

Strength characteristics of high performance fibers and application to reinforced composite materials noting whiskers, polycrystalline and vitreous fibers

20 p3567 A69-37748

Random arrays representing random filament packing of actual composite materials, discussing effects on transverse stiffness

20 p3626 A69-37758

Elastic constants of composite containing parallel cylindrical fibers, discussing disturbance in stress field

20 p3626 A69-37759

Composite laminates in cylindrical bending, discussing classical laminated plate theory limitations by comparing boundary value problems to corresponding theory of elasticity solutions

20 p3626 A69-37760

Reinforcement unbonding onset in composite materials determined by continuous dynamic moduli and damping measurements of tensile specimens

20 p3511 A69-37761

Superposition principle extended for wave propagation in composite materials /nonhomogeneous elastic media/

20 p3627 A69-37765

Hugoniot prediction for shock moving along longitudinal direction of unidirectional fiber reinforced composite

20 p3627 A69-37768

Nonlinear oscillations of rectangular plates of composite materials by Berger approach and Reissner variational principle, noting rotary inertial and transverse shear deformation

20 p3627 A69-37771

Buckling loads of homogeneous anisotropic plates of composite materials with simply supported boundary conditions, noting Kirchhoff-Love nondeformable normal hypothesis

20 p3628 A69-37776

Composite materials application in aerospace industry, discussing boron and carbon filament properties, epoxy resins, etc

20 p3563 A69-37930

Graphite fiber reinforced graphite composites fabrication, discussing spray forming and physical and mechanical properties [ASM PAPER W9-20.4]

21 p3730 A69-38671

Collection of papers on composite engineering laminates covering mechanics, fiber reinforced plastics, sandwich construction, metal-clad products and flame sprayed coatings

21 p3752 A69-38930

Composites elastic behavior, considering stress-strain in anisotropic lamina, composite plates and shells theory, thermal stresses and buckling for improving heterogeneous structures design

21 p3836 A69-38931

Stainless steel cladding of metals to combine desirable properties into composite, describing bonding, product types and treatment

21 p3745 A69-38937

Carbon fiber reinforced materials applications in aerospace industry, discussing long term potential and applications in F-5 aircraft

21 p3732 A69-38989

Model of isotropic polycrystal generalized to composite materials including mechanical mixtures, calculating macroscopic constants in heat conduction, diffusion and elasticity

21 p3752 A69-39193

Hypersonic parachute structural design using nylon ribbon, glass fiber heat shield and ablative coating construction [AIAA PAPER 68-963]

21 p3647 A69-39230

Polyurethane foam composites for low heating rate thermal protection, noting astroquartz fiber additive effect on performance

21 p3753 A69-39236

Filament wound composites for structures, discussing fabrication, properties and aerospace applications

21 p3753 A69-39496

Boron and carbon reinforced composite materials aerospace structural application, discussing weight savings, components structural design and connection and load input problems

22 p4038 A69-39908

Reinforcement effect on stress relaxation and creep in hereditary elastic materials, assuming integral shear modulus operator with exponential kernel

22 p4045 A69-40744

B composite materials in helicopter development, including B and C filament production and B filament applications

22 p3971 A69-40899

Loading rate effects on fracture characteristics of unidirectional fiber reinforced materials, discussing fiber-resin interface strength

22 p3974 A69-41212

Large elastic deformations of isotropic materials by deflection of composite parallelepiped composed of elastic incompressible materials, applying Rivlin solutions

22 p4048 A69-41277

Chromium composites mechanical properties, studying effects of alloying with spinel and magnesium oxides

23 p4177 A69-41672

Low density polybenzimidazole composites as ablative heat shields, discussing arc-heated wind tunnel tests of linear and crosslinked structures

23 p4179 A69-41715

Boron fiber reinforced composite materials in aircraft structures, comparing rigidity with glass fiber plastics and weight gains

23 p4179 A69-42155

Carbon fiber composites in construction of rocket motor cases, pressure vessels and support structures, including carbonization for ablation and insulation applications

23 p4180 A69-42158

Overall elastic moduli evaluation for solid composite materials comprising matrix of homogeneous elastic materials embedded with cylindrical shape inclusions

24 p4396 A69-42731

Residual stress measurement in steels and composite materials by X ray diffraction, discussing specimen preparation, diffractometer alignment, elastic modulus determination, etc

24 p4331 A69-42736

Photothermoelastic investigation of thermal stress concentrations around circular cavities and inclusions in two dimensional composite models

24 p4396 A69-42739

Law of mixture governing creep strength of composite materials reinforced unidirectionally by continuous filaments, taking into account fibers and matrix viscoelastic properties

24 p4400 A69-43054

Static mechanical strength of syntactic foam tested by generating failure conditions based on combined biaxial and triaxial stress [ASME PAPER 69-APMW-24]

24 p4336 A69-43095

Dispersive pulse propagation in laminated composites compared with theoretical predictions for timing and amplitude of oscillations [ASME PAPER 69-APMW-22]

24 p4401 A69-43097

Initially sharp plane pressure pulse propagation through linear elastic composite material, determining wave front shape change and stresses behind front [ASME PAPER 69-APMW-11]

24 p4401 A69-43103

Carbon fibers and resin composites used as rocket motor systems ablative liners and structures, noting role in motor weight reduction

24 p4336 A69-43210

Redesigned Al wing structure using B-epoxy composite applied to pressurized fuel carrying section, including material, fabrication and test data

24 p4323 A69-43418

Aircraft structure fabrication combining unidirectional strength and stiffness of B composite with metal, including test and weight/ cost data

24 p4323 A69-43419

Postcured low void content graphite fiber reinforced polyimide resin composites fabrication including shear, flexural and tensile strength data

24 p4337 A69-43446

Molded fiber composites in aerospace components applications, considering weight, stiffness, production and cost

24 p4326 A69-43448

Potting material reinforcing honeycomb structures for fastener installation prior to bonding face sheets to core, noting mechanical properties

24 p4326 A69-43466

Composite and metal tubes compared to determine properties for various loadings [AIAA PAPER 68-340]

24 p4405 A69-43653

Composite media elastic moduli upper and lower bounds determination using variational principles to characterize displacement and stress in time harmonic deformation

24 p4406 A69-43701

COMPOSITE PROPELLANTS

Beryllium propellants for space applications, considering composite solid propellant with powdered Be as fuel

02 p0303 A69-11763

Rocket engine combustion mechanism of ammonium perchlorate composite propellants

03 p0532 A69-13002

Strain dependent modulus and Poisson ratio behavior of CTPB propellant, performing stress relaxation tests

04 p0646 A69-15510

Burning rate of composite propellant with gamma irradiated ammonium perchlorate, noting enhancement at atmospheric pressure

04 p0647 A69-15519

Extinction by depressurization of AP composite solid propellants theory to predict rate of pressure decrease required to achieve flameout

06 p0983 A69-18102

Low pressure deflagration limit dependence on strand size in terms of cross section dimensions for composite ammonium chlorate propellant

06 p0983 A69-18162

One dimensional lattice model for heterogeneous explosive detonation, discussing hot spots, grain burning ignition time, ignition site types and RDX detonation [WSCIPAPER 68-30]

07 p1240 A69-18357

Strong electrostatic fields effects on burning rates of double base and composite propellants [WSCIPAPER 68-24]

07 p1241 A69-18366

Burning rate catalysts mechanism and location in composite propellant combustion at high pressure

09 p1622 A69-21954

Nonmetalized composite propellant solid phase heterogeneities effect on oscillatory combustion, inducing coherent burning rate oscillations with external pressure oscillations

09 p1622 A69-22085

Solid propellant rockets, discussing composite and double base propellants and use of polymers

11 p1941 A69-25588

Polyester/ammonium perchlorate combustion, determining degradation rate by loss in weight method at different intervals

13 p2324 A69-28234

Solid fuel ignition with gaseous oxygen in presence of copper chromate and other catalysts

16 p2829 A69-31913

Chemical processing for manufacture of solid propellant motors, discussing mixing, casting and curing of composite propellants

16 p2829 A69-31992

Solid propellants steady state combustion with emphasis on heterogeneous propellants

16 p2829 A69-31995

Thermal layer theory of composite propellant combustion leading to minimum steady state burning rate under ideal thermal conditions
[WSCI PAPER 69-5] 16 p2830 A69-32346

Composite solid propellant burning rate by solving energy equation, yielding heat release, flame thickness and standoff distance
[WSCI PAPER 69-7] 16 p2830 A69-32348

IR spectrometric analysis of flames of composite rocket propellants, maintaining diffusion flames between surfaces of decomposing ammonium perchlorate and fuel source
[WSCI PAPER 69-10] 16 p2831 A69-32350

Linear pyrolysis of thermoplastics during combustion of composite solid propellants and ammonium perchlorate solid propellant deflagration mechanism studied by loose granule analog
[WSCI PAPER 69-16] 16 p2831 A69-32354

Doped recrystallized ammonium perchlorate effects on composite propellant burning rates
[WSCI PAPER 69-18] 16 p2831 A69-32356

Composite solid propellant combustion using differential scanning calorimeter and mechanical model of steady state combustion
[AIAA PAPER 69-504] 16 p2833 A69-32679

Composite propellants high pressure burning stability with various binders and oxidizers, showing ammonium perchlorate oxidized formulations susceptibility to instability
[AIAA PAPER 69-438] 16 p2834 A69-32704

Composite modified cast-double-base rocket propellants with large proportions of metallic fuel and oxidizer, discussing application rocket propulsion
17 p3017 A69-33349

Li-F-H tripropellant study, discussing injection method variations and thrust chamber configuration effects on characteristic velocity efficiency and heat flux measurement
24 p4362 A69-43128

COMPOSITE STRUCTURES
NT LAMINATES

Unsteady heat flow in finite composite hollow circular cylinder using inverse method of eigenfunction expansion / method of finite integral transformation/
01 p0175 A69-10230

Elastomeric bearings for support of heavy loads and accommodation of oscillatory motions, considering molded type for helicopter tail rotor
01 p0085 A69-10406

Directional solidification and composite structures, discussing structure changes effect on mechanical properties
03 p0449 A69-13877

Statistical energy approach for analyzing steady state vibration distribution in composite structures in terms of energy balances
04 p0675 A69-14687

Dynamic shear stresses at interface of embedded thin elastic filament and elastic matrix after subjecting filament to concentrated longitudinal line load
05 p0831 A69-15577

Elastic stability of three dimensionally reinforced composite cylindrical shells
[AIAA PAPER 69-122] 06 p1029 A69-18216

Stress concentration factors for composite body of two isotropic elastic phases in plane strain in plane of composite parameters
07 p1170 A69-18716

Stress-strain relationship of composite bars consisting of single glass fiber with thin metal coating layer and under axial load
07 p1235 A69-19385

Mechanical properties of cast epoxy resins correlation with corresponding composites strength under static and dynamic fatigue stressing
08 p1340 A69-20510

Two layer cylindrical shells stability under external pressure, assuming nonuniform shell rigidity
08 p1419 A69-21180

Automatic fabrication process for boron reinforced composite structures, concerning orienting and laminating jet flap skins
09 p1507 A69-22329

Plane deformation in nonorthotropic body composed of various anisotropic cylinders with different elastic constants
10 p1799 A69-23156

Composite shell carrying capacity under general load, studying closing shape between laminate layers, transverse contraction, supporting layers thicknesses ratio, etc
12 p2176 A69-25851

Fabrication, machining and contouring of boron-epoxy composite for sandwich type aircraft structure,

noting F-5 supersonic fighter main landing gear strut door
12 p2103 A69-26826

Buckling loads for anisotropic fiber reinforced composite plates with strong bending membrane coupling terms
12 p2186 A69-26840

Buckling and postbuckling equilibrium behavior of fiber reinforced cylindrical shell under uniform axial compression
12 p2187 A69-26843

Boron filament wound composite structures fabrication noting physical properties
14 p2455 A69-29413

Approximate analytic solution to transient response of infinitely long cylindrical shell surrounded by viscoelastic medium, discussing composite and elastic shells
[AIAA PAPER 68-351] 16 p2871 A69-31877

Equations in series form to describe composite beams behavior under nonuniform torsion
18 p3211 A69-34343

Fiber distribution in oriented fiberglass reinforced plastics, noting statistically isotropical distribution and use for regular structure model
18 p3162 A69-35355

Optimal structure model of fiberglass reinforced materials with polymer matrix, obtaining strength utilization coefficient dependence on length/ diameter ratio
18 p3162 A69-35356

Military storage and environment effects on strength of filament wound glass reinforced epoxy structures, tested on plastic motor case and pressure vessels
19 p3321 A69-35567

Tape placement machines to fabricate composite high modulus filamentary tape reinforced aerospace structures, anticipating future generations evolution into automatic control
19 p3323 A69-35584

Titanium monocoque fuselage reinforced by composite boron filaments in polyimide resin matrix tested for SST applications, noting weight savings over all titanium structure
[AIAA PAPER 69-763] 19 p3329 A69-36298

Elastoplastic state of composite structures with applicability of elasticity law and yield conditions illustrated by reinforced plate under plane stress
19 p3444 A69-36808

Storage and loss moduli measurement for laminated glass fiber reinforced epoxy composite beams, discussing moduli prediction
20 p3627 A69-37763

Composites elastic behavior, considering stress-strain in anisotropic lamina, composite plates and shells theory, thermal stresses and buckling for improving heterogeneous structures design
21 p3836 A69-38931

Composite laminated glass structures employed to improve safety characteristics of glass or to achieve special optical properties
21 p3752 A69-38934

Composite or sandwich construction design based on employing all available materials and setting up requirements for mechanical and physical properties
21 p3836 A69-38935

Al-B composite aircraft structure fabrication, discussing wingspan segment, resistance spot welding, hot forming of joggles, etc
[AIME PAPER S69-1] 21 p3732 A69-39471

Filament wound composites for structures, discussing fabrication, properties and aerospace applications
21 p3753 A69-39496

Wave trains of incident pulse diffraction in thin composite rod determined by transmission and reflection coefficients of plane waves at plane interfaces
21 p3845 A69-39677

Transient temperature response of cylindrical composite energy storage devices with thermal conductivity, density and specific heat independent of temperature
22 p3868 A69-40132

Axisymmetric vibrations of semiinfinite cylindrical shell constructed of fiber reinforced composite layers, obtaining frequency equation from equations of motions
22 p4044 A69-40559

Interlaminar shear stresses in cross-ply three ply symmetric laminated composite plate, analyzing interlaminar stress distribution under simple tension
24 p4399 A69-43052

Geometric dispersion of transient stress waves in linearly elastic laminated composite based on sinusoidal modes
[ASME PAPER 69-APMW-20] 24 p4401 A69-43098

Composite-to-metal joints design and fabrication, using carbon yarn in epoxy matrix for missile interstage application
24 p4323 A69-43426

High modulus carbon filament composite structural elements for missile interstage application, showing weight savings
24 p4325 A69-43444

Adhesive bonded joints for glass resin composite sandwich helicopter structures, describing aircraft applications
24 p4403 A69-43462

COMPOSITE WRAPPING

Boron filaments reinforced epoxy aircraft landing gear structure prototype, discussing development, fabrication, and testing
09 p1508 A69-22340

Nondestructive tests for glass filament wound composites void content, considering test methods and mechanical properties prediction role
17 p2979 A69-33656

High modulus filament wound composites used for propellant and pressurization tanks, discussing overwrap and liner permeability, porosity, weight, etc
19 p3354 A69-35513

Tape placement machines to fabricate composite high modulus filamentary tape reinforced aerospace structures, anticipating future generations evolution into automatic control
19 p3323 A69-35584

COMPOSITES
U COMPOSITE MATERIALS
COMPOSITION [PROPERTY]

NT ATMOSPHERIC COMPOSITION
NT ATMOSPHERIC MOISTURE
NT ATOM CONCENTRATION
NT BODY COMPOSITION [BIOLOGY]
NT CARBON DIOXIDE CONCENTRATION
NT CHEMICAL COMPOSITION
NT CONCENTRATION [COMPOSITION]
NT GAS COMPOSITION
NT IONOSPHERIC COMPOSITION
NT LUNAR COMPOSITION
NT METEORITIC COMPOSITION
NT METEOROID CONCENTRATION
NT MOISTURE CONTENT
NT PLANETARY COMPOSITION
NT PLASMA COMPOSITION

Composition of continental crust based on material balance and rare earth estimates of shales, discussing ocean floor and mantle derived rocks
08 p1309 A69-20939

Energy band gap variation as function of composition in In-Ga-P semiconductor crystals
19 p3390 A69-36553

Porosity and composition effects on thermal conductivity of glass fiber reinforced plastics, noting tests of multilayer textolite sheets
22 p3973 A69-40747

COMPRESSED AIR

Compressed air in aircraft manufacture, discussing versatility in production and testing of Concorde 002
02 p0253 A69-12069

COMPRESSIBILITY

Nitrogen compressibility and thermodynamic functions up to 10,000 atm pressure and 400 C
01 p0175 A69-10366

Electron fluid compression coefficient from simultaneous measurement and correlation of absolute magnitudes of ion acoustic wave potential and accompanying plasma density perturbation
03 p0475 A69-13148

Space-time hypersurfaces representations of shock waves of relativistic MHD, discussing compressibility role in proving consistency with relativistic theory
11 p1928 A69-25246

Network method for stability of thin nonlinearly elastic compressible material plates, noting difference operators for rigidly clamped plates
23 p4230 A69-42003

COMPRESSIBILITY EFFECTS

Ti for high temperature use in supersonic aircraft, noting compressibility limit on maneuvering load factor and cooling by H
02 p0192 A69-11891

Rapid uniform expansion of spherical cavity in compressible elastic-plastic solid, obtaining similarity solution
03 p0528 A69-13798

- Inhomogeneous dielectric filling to simulate curvature in model earth-ionosphere waveguide
05 p0732 A69-16346
- Stability loss of shells of revolution under effect of axial compression and radial pressure with no restrictions on generatrix curvature, using strain energy method
06 p1021 A69-17179
- Numerical values for cylindrical antenna admittance in uniaxial plasma, considering plasma compressibility and vacuum sheath
06 p0965 A69-17513
- Compressibility parameters role in pressure distribution derived for radial laminar compressible fluid flow between two disks
07 p1121 A69-19321
- Book on fluid mechanics fundamentals and applications covering incompressibility and compressibility effects, viscosity, hydrostatics, aerostatics, one dimensional, potential, turbulent flow and boundary conditions
07 p1121 A69-19376
- Grain-size refinement of beryllium castings and extrusions after compression in pressure chamber, determining effect on ductility
08 p1330 A69-20013
- Two dimensional flat geometry for initial solar flare development stage, discussing tearing mode energy source for solar flares and plasma compressibility effects
09 p1583 A69-22757
- Turbulent flow problems, discussing hot-wire techniques, viscosity effect, compressibility surface curvature, turbulent boundary layers, heat transfer, etc
11 p1871 A69-25017
- Rotating mirror streak cameras in quantitative measurements of extreme compressions by shock waves, analyzing spatial and temporal resolving power
12 p2084 A69-26151
- Elastic deformation of cord reinforced compressible thin sheet and rectangular cuboid solved using linear stress strain law and strain tensor nonlinear components
13 p2359 A69-27262
- Lubricant compressibility effect on spiral groove gas bearing load carrying capacity [ASME PAPER 68-LUBS-33]
13 p2266 A69-27274
- Multirecompression heater for pure airflow tests of ballistic vehicles and hypersonic aircraft [AIAA PAPER 69-332]
13 p2242 A69-28268
- Gas compressibility influence on laminar to turbulent boundary layer transition determined using Taylor hydrodynamic finite perturbation model
14 p2389 A69-28974
- Dynamic programming method applied to Cauchy problem of large deflections in compressed rods, using recurrent functional equations
14 p2533 A69-28988
- Lifting surface theory for cascade of blades in subsonic shear flow, determining blade surface pressure distribution, distinguishing shear and uniform flow compressibility effects
16 p2731 A69-31592
- Inertia, compressibility and viscous friction effects on dynamic response of long fluid line, constructing models
16 p2771 A69-32066
- Compressibility of material in stability problems of elastoplastic plates and shells
16 p2875 A69-32292
- Three dimensional potential surface flow past rotor blade in hover, accounting for compressibility and blade element theory limitations [AHS PAPER 324]
17 p2895 A69-33537
- Computer calculation of adiabatic expansion of air, allowing for specific heat ratio and compressibility factor changes
24 p4244 A69-43088
- COMPRESSIBLE BOUNDARY LAYER**
- Compressible and incompressible laminar boundary layer with constant wall shear stress, using initial profiles
02 p0233 A69-12535
- Similar solutions of boundary layer equations for compressible model fluid adjacent to wall, discussing velocity overshoot dependence on wall temperature
03 p0413 A69-13013
- Laminar compressible viscous boundary layer with arbitrary external pressure distribution, using implicit multiplace difference method
04 p0591 A69-15294
- Compressibility transformation theory extended for turbulent boundary layer, involving mass transfer with/without chemical reactions [AIAA PAPER 69-161]
06 p0912 A69-18045
- Separation of subcritical and supercritical compressible turbulent boundary layers under strong pressure gradients using method based on integral equations [AIAA PAPER 69-34]
06 p0912 A69-18077
- Nonsimilar laminar boundary layer solutions with negative pressure gradient compared to experimental boundary layer velocity profiles, momentum and displacement thicknesses [AIAA PAPER 69-35]
06 p0913 A69-18094
- Analytical model for compressible MHD boundary layers formulated by transport equations for turbulent fluctuations of species mass density, velocity and temperature
08 p1366 A69-20786
- Von Karman flow changes due to unsteady heat transfer from rotating disks impulsively changing temperatures, particularly steady state and response time
08 p1422 A69-20996
- Similarity solutions for laminar compressible boundary layer with reverse flow, considering various wall/stagnation temperature ratios
15 p2591 A69-30907
- Analytical expressions validity for skin friction in compressible turbulent boundary layer over wide range of Reynolds numbers and heat transfer conditions
16 p2771 A69-31926
- Compressible laminar boundary layer equations solutions for nonunit Prandtl number by direct numerical integration
16 p2772 A69-32173
- Adiabatic compressible turbulent boundary layer equations for two dimensional and axisymmetric flows, discussing methods of solution based on eddy viscosity formulation [AIAA PAPER 69-687]
17 p2955 A69-33470
- Compressible hypersonic turbulent boundary layers solution by finite difference method, relating mixing length to velocity profile shape factor [AIAA PAPER 69-684]
17 p2955 A69-33474
- Adiabatic compressible turbulent equilibrium boundary layer integral method analysis extended to study nonequilibrium laminar flows, deriving dissipation integrals, presenting numerical solutions [AIAA PAPER 69-689]
17 p2955 A69-33481
- Magnetic field effects on rotating cone compressible boundary layer at zero angle of attack, describing changes in drag coefficient, torque and velocity profiles [AIAA PAPER 69-721]
17 p2892 A69-33484
- Favorable pressure gradient effect on compressible two dimensional supersonic turbulent boundary using temperature and pressure probes and shear balance [AIAA PAPER 69-685]
17 p2956 A69-33489
- Compressible laminar boundary layer behind shock or thin expansion wave past moving flat plate solved by transforming governing equations into Blasius equation
24 p4305 A69-43596
- Laminar sublayer thickness in compressible turbulent boundary layers with and without heat transfer
24 p4306 A69-43724
- COMPRESSIBLE FLOW**
- NT HYPERSONIC FLOW
- NT MAGNETOHYDRODYNAMIC FLOW
- NT SUBSONIC FLOW
- NT SUPERSONIC FLOW
- NT TRANSONIC FLOW
- Gas combustion stability with respect to one dimensional perturbations, considering flow compressibility stabilizing effect
01 p0174 A69-10107
- Kernel function applied to compressible fluid flow computation for linear procedure to determine subsonic flow patterns
01 p0058 A69-10225
- Compressible relativistic flow in subsonic, transonic and supersonic regimes, noting pressure coefficient variations
01 p0007 A69-11203
- Implicit finite difference scheme to integrate unsteady boundary layer equations for compressible gas
03 p0416 A69-13656
- Sufficient conditions for stability of compressible atmospheric flows for rigid lid types of upper boundary condition
03 p0417 A69-13796
- Turbulent front structure of axisymmetric compressible wake at supersonic speeds, measuring intermittency factor distribution
03 p0419 A69-13949
- Second order difference scheme for calculation of plane or rotational compressible flow, investigating stationary flow as asymptotic limit of unsteady flow [ONERA-TP-652]
03 p0419 A69-14111
- Series solutions for compressible and incompressible flows at low Reynolds number, including axisymmetric and MHD Stokes flow
04 p0587 A69-14609
- Unsteady compressible laminar boundary layer flow over insulated or isothermal flat plate moving with arbitrary time variant velocity in viscous fluid
04 p0588 A69-14715
- Dynamic behavior of series and parallel flow thrust-balance systems for compressible and incompressible flow, using analog computer simulation
04 p0647 A69-15521
- Three dimensional boundary layers, extending Prandtl independence principle to laminar compressible flow over convex body
05 p0743 A69-15556
- Similar solutions for laminar boundary layer formed by convective and compressible flows
05 p0751 A69-16643
- Hyperbolic double waves found in compressible flow problems, presenting method of plotting all waves and determining geometrical characteristics
05 p0751 A69-16646
- Combustion in compressible turbulent mixing flows, discussing mixing facility, experimental results and numerical analysis [WSCI PAPER 68-28]
06 p0969 A69-17794
- Unstationary characteristics method applied to numerical computation of steady compressible flow around airfoil [ONERA-TP-630]
07 p1049 A69-18413
- Steady conical compressed flows in nonaxisymmetric ring nozzles characterized by discontinuities
07 p1120 A69-18989
- Irrational plane subsonic flow of compressible fluid about obstacle, reducing problem to integration of linear partial differential equation with boundary conditions
09 p1480 A69-21735
- Compressible gas flow problem in point body gravitational field solved with reference to sun and interstellar gas
09 p1577 A69-21769
- Three dimensional compressible potential flow in curved circular duct analyzed by perturbation method
11 p1867 A69-24607
- Flat decelerating cascades boundary layer in compressible flow during change in axial flow-density ratio and upstream turbulence
11 p1818 A69-24639
- Turbulent boundary layer velocity distributions in uniform/accelerated compressible flow over flat plate, using change of variables based on mixing length formula [ONERA-TP-693]
11 p1867 A69-24752
- Laminar compressible subsonic boundary layer flow on symmetrical cylinder bounded by circular arcs noting zero/nonzero angle of attack
12 p2062 A69-26272
- Different pressure and deflection measurements coherence in vortex flows verified assuming radial equilibrium conditions
12 p2012 A69-26362
- Diffusion-stabilized difference schemes for inviscid compressible flow equations in conservation form for arbitrary number of space dimensions
12 p2062 A69-26624
- Internal flows of compressible fluids with heat transfer in accelerating nozzles and constant area ducts, simplifying equations by assuming one dimensional flow
12 p2012 A69-26790
- Influence coefficients for compressible flow processes involving area, friction and total temperature changes
12 p2063 A69-26799
- Construction and calibration of combined temperature and pressure probe for compressible flow
13 p2242 A69-28226
- Laminar to turbulence transition in submerged and bounded jets, using schlieren visualization for compressible flow and birefringent visualization for incompressible flow
14 p2428 A69-28876
- Stagnation region dimensionless pressure effect on flow pattern, boundary conditions and oscillation mechanism in compressible flow through nozzle in circular duct
15 p2549 A69-31220

Compressible shear flow linear theory applied to transonic flow past thin airfoil, determining pressure distribution, discussing compressibility effects of nonuniform Mach number

16 p2731 A69-31593

Compressible flow over finite porous plate in supersonic stream with massive injection over surface analyzed using inviscid vortical flow model

16 p2770 A69-31884

Steady inviscid compressible flow past wavy wall with simulated ablation, studying reflections effect on relationship between surface pressure and wall geometry

16 p2770 A69-31909

Chemical reactions in compressible turbulent mixing flows, analyzing flow characteristics, rate equation and Reichardt theory [AIAA PAPER 69-537]

16 p2747 A69-32701

Simple waves in compressible isentropic flows of inviscid nonheat-conducting gas free of shock waves

18 p3121 A69-34534

Higher order boundary layer theory development from Prandtl simplification of Navier-Stokes equations to successive approximations for incompressible and compressible flows

18 p3123 A69-34923

Three dimensional laminar boundary layer on conical body of revolution in low Reynolds number compressible fluid flow

19 p3241 A69-36762

Heat transfer to compressible laminar jet flowing along flat wall, obtaining distributions of temperature, wall shearing stress, heat transfer rates and jet thicknesses [ASME PAPER 69-FLCS-30]

20 p3516 A69-37979

Computer solutions for nonlinear partial differential equations governing compressible flow patterns with shocks, using Lagrange coordinates

20 p3569 A69-38212

Multistep axisymmetrical supersonic exit cones optimum geometry design diagram based on external oblique and normal compression shock

21 p3785 A69-39104

Coaxial turbulent compressible gas jets propagation, discussing mass buildup data in coaxial jets

21 p3645 A69-39847

Laminar boundary layer in steady compressible gas flow past plane wing profile, studying surface temperature and suction effects

23 p4058 A69-41709

Subsonic compressible flow at two dimensional inlets, analyzing field representation, boundaries, surface configuration and optimal wedge

23 p4060 A69-41915

Nonlinear finite-amplitude instability of two dimensional compressible laminar wake flows, using Fourier expansion and Landau equation

24 p4245 A69-43357

COMPRESSIBLE FLUIDS

Lifting wing profiles in uniform transonic compressible fluid flow calculated by analog method, noting hodograph method simplification

02 p0187 A69-11536

Plane shock wave interaction with elastic shallow spherical shell in compressible fluid, formulating equations of motion

02 p0339 A69-11977

Asymptotic laminar boundary layer in compressible gas in presence of normal and tangential velocity components at body surface

02 p0231 A69-12138

Taylor column existence in compressible atmosphere, discussing baroclinicity and stratification effects in earth and Jupiter atmospheres

02 p0326 A69-12697

Similar solutions of boundary layer equations for compressible model fluid adjacent to wall, discussing velocity overshoot dependence on wall temperature

03 p0413 A69-13013

Stagnation pressure losses of adiabatic flow of compressible fluids through abrupt area expansion and contraction in subsonic range, discussing base pressure [ASME PAPER 68-WA/FE-46]

05 p0750 A69-16113

Interaction between supersonic jet and counterflow of ideal compressible fluid

05 p0751 A69-16501

MHD aligned flow of compressible fluid past slender body in wind tunnel

06 p0861 A69-17719

Dense gas effects in free piston hypersonic wind tunnel, discussing Longshot facility, free piston cycle, reservoir conditions decay and hypersonic nozzle flow [AIAA PAPER 69-169]

06 p0907 A69-18188

Permissible nonthermal convection modes in planetary interiors derived from conservation equations for self gravitating homogeneous nonrotating compressible fluid spheres

07 p1213 A69-18611

Convection in planetary interiors produced by combined thermal and nonthermal mechanisms, noting self gravitating homogeneous nonrotating compressible fluid spheres

07 p1214 A69-18613

Stability of motion of spherically symmetric mass of compressible gas with constant space density in absence of gravitational field

07 p1215 A69-18706

Linearized unsteady nonequilibrium flows produced by unsteady motion of thin foil or circular cylindrical shell in compressible gas

07 p1119 A69-18738

Theory of unsteady one dimensional motion of ideal compressible fluid, discussing equation of state

07 p1119 A69-18750

Group analysis of MHD equations, determining group properties of motion equations of compressible fluid, obtaining invariant solutions

07 p1191 A69-18994

MHD flow of compressible conducting fluid around cylindrical body with quasi-aligned magnetic field and velocity

07 p1194 A69-19350

Coupled wave equation solution based on spectral resolution for longitudinal components of electric and magnetic fields when source currents are present in compressible anisotropic plasma

08 p1274 A69-20031

Plane electromagnetic wave reflection and transmission by semiinfinite moving compressible plasma fluid, noting interaction of transmitted H wave

08 p1360 A69-20097

Two dimensional steady flow of finitely conducting compressible fluid subjected to magnetic field with two zero components

08 p1369 A69-20843

Axisymmetric oscillations of two spherical shells with noncoinciding centers of curvature immersed in compressible or incompressible fluids

11 p1875 A69-25467

Hamilton principle for inviscid compressible fluid in Euler coordinates, analyzing shortcomings found in variational principles and model in Lagrangian coordinates

11 p1875 A69-25483

Invariant transformation of Euler equations of motion for plane steady flows of perfect compressible fluid

11 p1877 A69-25739

Navier-Stokes equations for compressible gas, generalizing viscous channel flow of heat conducting gas to slip flow of rarefied gas

12 p2061 A69-25887

Boussinesq approximation for compressible fluids, discussing perturbation pressure and velocities and vertical scale motions

12 p2061 A69-26013

Controllable motions of compressible homogeneous isotropic solids, anisotropic solids and fluids with memory under constant body force

12 p2189 A69-27118

Viscous heat conducting compressible fluid response to abrupt change in circular cylinder angular velocity at stable temperature distribution, considering Boussinesq approximation

13 p2245 A69-27378

Compression forces during interaction of colliding shock waves in compressible fluid medium, discussing linear and nonlinear problems

13 p2246 A69-27523

Computer program for compressible fluid flows with space and time dependent variables, discussing hyper-velocity impact [AIAA PAPER 69-353]

13 p2365 A69-28286

Equations of motion of compressible fluid with non-zero resistivity near thin foil, solving supersonic and subsonic flow by Fredholm integral equations

13 p2200 A69-28360

Ideal compressible fluid motion and heat transfer, noting convective heat transfer intensification with increased twisting velocity of flow

13 p2251 A69-28559

Rigid obstacle unsteady motion in compressible fluid with load applied to surface layer, deriving numerical solution of pressure expansion

14 p2430 A69-29480

Two dimensional adiabatic transverse normal modes of inviscid compressible uniformly rotating fluid, discussing harmonic wave propagation in opposite directions and rotation effects

14 p2431 A69-29581

Compressible gas MHD steady one dimensional flow in electric and magnetic fields

14 p2500 A69-29905

Plane shock wave interaction with elastic shallow shell in compressible fluid, formulating equations of motion

15 p2704 A69-30262

Flush electrostatic probe edge effect, considering Couette flow of weakly ionized compressible gas past discontinuous wall potential

15 p2653 A69-30912

Book on mechanics of deformable media covering fluid and solid mechanics and applications to irrotational flows of compressible and incompressible fluids

16 p2813 A69-32789

Vortex diffusion in viscous compressible fluid approximated by linear differential equations

17 p2957 A69-33714

Resonance effects in finite hollow cylinder immersed in ideal compressible fluid and exposed to compression wave

18 p3215 A69-34567

Computer implementation of Bergman solution to initial value problem for partial differential equation of compressible fluid flow

18 p3164 A69-34614

Linear oscillations of sphere in compressible viscous fluid with slip at surface, noting drag variation

19 p3297 A69-35836

Laminar flow of viscous compressible fluid with density dependent on temperature, calculating steady state Navier-Stokes equations using vector function

19 p3297 A69-35852

Compressible fluid two dimensional supersonic and one dimensional unsteady flows similarities shown graphically, discussing hodograph-speedgraph relationship

19 p3300 A69-36777

Statistical equations for compressible gas, discussing turbulent quantities separated into fluctuating and macroscopic parts

19 p3300 A69-36784

Laminar flow of compressible viscous gas in channels of variable cross section

20 p3457 A69-37089

Homogeneous compressible fluid sphere with axisymmetric magnetic field, analyzing oscillations and stability using variational principle

20 p3605 A69-37822

Computation method of hydrodynamic blade cascade for compressible fluid and variable channel width by stream function

20 p3460 A69-37972

Unsteady boundary layer flows of compressible fluid over semiinfinite flat plate, discussing heat transfer rate

20 p3518 A69-38318

Compressible fluid flow characteristics in turbomachine stage, discussing simplified radial equilibrium method as basis for design

21 p3643 A69-38457

Blowing effect on surface friction coefficient and heat transfer in turbulent boundary layer in compressible fluid with pressure gradient

21 p3643 A69-38636

Small amplitude acoustic waves propagating in compressible fluid with parallel shear flow and within constant gravitational field

21 p3772 A69-39241

One dimensional flow of perfect compressible relativistic fluids, obtaining expression showing wave velocity dependence on relativistic speed of sound

22 p3931 A69-40711

Boundary layer effects in turbulent spiral vortex flow of compressible fluid in supersonic centrifugal compressor, discussing flow geometry, using momentum integral method

23 p4152 A69-42109

Two dimensional diverging flow of ideal compressible fluid past slender profile, using Prandtl-Glauert rule and linearized equation

24 p4243 A69-42584

Compressible fluid unsteady flow past deformable surface, constructing metric for surface and obtaining metric tensor coefficients

24 p4243 A69-42586

Compressible gas flow into cavity of various volumes in presence of supercritical pressure gradients

24 p4298 A69-42587

Dynamic pressure response of viscous compressible fluids in rigid tubes with dead ended volume termination, testing Ibrall theorem as function of Stokes number

24 p4301 A69-43287

COMPRESSING

Megagauss magnetic field generation methods, discussing high explosives, initial field, flux compression, capacitor discharges and applications
01 p0115 A69-10049

Thermodynamic cycle and optimum conditions of electric power source of MHD generator in combination with thermocompressor
09 p1435 A69-21592

Rapid decompression and recompression in stapedectomized cat, noting fibrous tissue response in middle ear at reconstructions utilizing polyethylene struts on gelfoam
14 p2406 A69-29292

Compression molding of molecular salt-like intermediate Pyrrone powders by two pressure method, noting volatiles elimination
14 p2469 A69-29415

Thermocompression joints strength measured using friction test, centrifuging and microtensile tests
15 p2573 A69-30081

Attainable signal compression coefficient in recirculator and relation to recirculator ring parameters, noting feedback coefficient stability
17 p2931 A69-33907

Laminar recompression behavior downstream of stagnation point behind hypersonic slender body, obtaining finite difference numerical solutions for near wake flow field
[AIAA PAPER 69-713]
18 p3085 A69-34417

COMPRESSION BUCKLING

U BUCKLING

COMPRESSION LOADS

NT AXIAL COMPRESSION LOADS

NT IMPACT LOADS

Strength analysis of cylindrical shells with rib and ring reinforcement under compression loads using network method
01 p0164 A69-10083

Elastic properties of epoxy resins, deriving relation by considering different shear properties in tension and compression
01 p0103 A69-11268

Eccentric compression in elastic domain for rigid homogeneous structural elements, considering traction and stress
02 p0341 A69-12258

Compressed cylindrical shell stability analyzed on basis of axisymmetric equilibrium form, noting dependence on mechanical characteristics and geometry
04 p0667 A69-14265

Dead-end microcracks stress fields, studying positive /tensile/ and negative /compressive/ nature dependence on crack size
04 p0674 A69-14548

Elastic rod buckling under dynamic longitudinal compression load, determining critical load
04 p0679 A69-14926

Circular plate elastic stability under unidirectional compression, using Rayleigh-Ritz- Timoshenko method to determine buckling load
04 p0683 A69-15515

Fatigue crack growth in notched samples of aluminum alloy subjected to cyclic compressive loading, noting residual tensile strength at notch root
[ASME PAPER 68-WA/MET-16]
05 p0838 A69-16154

Metal matrix composites compression microstrain behavior, analyzing continuous fiber composites of magnesium-boron and copper-tungsten
06 p0939 A69-16945

Three dimensional compression problem for two elastic bodies in contact, determining contact pressure distribution by iteration procedure on computer
06 p1026 A69-18014

Thermal insulating characteristics of low conductance interstitial materials under compressive loads, noting carbon paper and wire screens
[AIAA PAPER 69-25]
06 p1036 A69-18072

Compressive strength of boron fiber-epoxy matrix composite, noting matrix support of fibers against buckling
07 p1170 A69-18713

Two layer cylindrical shells stability under external pressure, assuming nonuniform shell rigidity
08 p1419 A69-21180

Failure modes in fiberglass reinforced epoxy laminates subjected to compression loadings, discussing cracks formation and delamination at glass-resin interface
09 p1529 A69-22305

Histogram approximation of plastic deformation of metals, analyzing tube under internal load and sandwiched layer compression
10 p1793 A69-22850

Nodal lines shape in individual flats for long plates in combined shear and compression with sinusoidal edge rotations in longitudinal direction
11 p1983 A69-25137

Buckling of long flat panel in combined compression and shear with sinusoidal edge moments and support on two edges and on point supports
11 p1984 A69-25138

Rectangular aluminum alloy rods carrying capacity under compression loads applied eccentrically to rod ends
11 p1986 A69-25326

Plane stress state in plate with different glide moduli during tension and compression, considering axisymmetrical deformations
12 p2178 A69-26003

Sinusoidal tension and compression radial support system for large solid disk primary mirror, noting pivot design and pad bonding adhesive
12 p2057 A69-26413

Postcritical deformations of thin conical elastic shells hinged along edges under external pressure using Pogorelov method for cylindrical shells
12 p2181 A69-26609

Finite plane deformations theory extended to incompressible materials with logarithmic change of volume proportional to pressure
12 p2181 A69-26613

Compression forces during interaction of colliding shock waves in compressible fluid medium, discussing linear and nonlinear problems
13 p2246 A69-27523

Beryllium single crystals c axis compression behavior at three purity levels under hydrostatic pressures
13 p2279 A69-27760

Elastoplastic cylindrical shell instability determination under axial compression applied to inelastic solids
13 p2363 A69-28124

Stress and strain fields for circular rubber ring under diametrical compression between flat plates, using moire, large strain analysis and photoelastic verification
14 p2531 A69-28884

Materials and structural failures under short time compressive loadings, showing structural response to tensile stresses produced by rarefaction waves
15 p2639 A69-30364

Minimum vibration frequency and compressive force for freely supported rectangular, triangular and circular plates simulated on analog computer
15 p2708 A69-30665

Annealed aluminum rods dynamically compressive impact loading used to study longitudinal plastic waves propagation velocity
15 p2709 A69-30677

Reinforced cylindrical shell stability under external compression load by pressurized air, determining critical pressure
15 p2715 A69-31204

Transverse free vibration of slender cantilever subjected to compressive follower force
16 p2871 A69-31899

Elastic spheroidal shell of revolution under external pressure described by buckling and postbuckling theory
16 p2874 A69-32162

Machine for testing vibration stability of polymer samples subject to tension or compression, noting stability of plastic during vibration lower than during static loading
17 p2972 A69-33043

Machine for testing high temperature creep under variable tensile-compressive stress while maintaining specimen stability, noting discrepancy between creep strains in heat resistant alloy
17 p3054 A69-33044

Tension-torsion-compression load testing machine of technological possibilities and accuracy
[ONERA-TP-596]
17 p2945 A69-33065

Plane wave propagation due to combined compressive and shear stresses in half space, assuming elastoplastic material
[ASME PAPER 69-APM-12]
18 p3213 A69-34388

Critical stresses and crack development near holes in compressed elastic plate
18 p3218 A69-34603

Spherical shells axisymmetric equilibrium properties under uniformly distributed external compression
18 p3224 A69-35318

Initial deflection effect on elastic cylindrical shell stability under compression, finding critical load by determining limiting point in successive loading
18 p3224 A69-35319

Thin brittle plastic shells mechanical properties differing under tension and compression described by solving differential equations in successive approximation
18 p3224 A69-35327

Elastic stability of sandwich materials in microvolume under compressive force analyzed using three dimensional linearized equations for small subcritical strains
18 p3226 A69-35374

Flat rectangular plates large deflection due to uniform lateral pressure and compressive edge loading analyzed through partial differential equations, difference equations and computer program
20 p3620 A69-37000

Stress analysis of circular elastic plate buckling under radial compression, noting Kirchhoff hypothesis influence on critical value of thickness-to-radius ratio
21 p3834 A69-38722

Nonlinear stability of shallow elliptical paraboloidal dome under uniformly distributed compression, solving by Bubnov-Galerkin method on computer
21 p3838 A69-39186

Dynamic stress concentrations and rigid body response of cylinder imbedded in elastic medium subjected to compressional wave
21 p3840 A69-39300

Stability loss of beams analyzed under compression allowing for various creep conditions in loading and unloading regions, calculating time to failure
22 p4039 A69-39917

Compressed rectangular beam stability under different creep conditions, deriving relation between creep time and initial deflection
22 p4039 A69-39918

Contact stability of hollow cylinder compressed between parallel planes measured optically, compared to approximation of elasticity theory
23 p4162 A69-41416

Postbuckling analysis by equilibrium solutions of conservative system near critical point, considering stability failure in elastic structure under increasing load
24 p4396 A69-42730

Shallow spherical sandwich shells critical buckling loads using differential pressure method
24 p4396 A69-42734

COMPRESSION TESTS

Uniaxial strain static and gas gun compression tests result compared for syntactic foam
02 p0345 A69-12295

Orthotropic fiberglass/epoxy faced honeycomb aircraft type sandwich structure elastic properties by edgewise compression test
24 p4403 A69-43443

COMPRESSION WAVES

Granite compressional wave velocity and electrical resistivity variations with depth, explaining discrepancy between in situ and laboratory measurements on dry samples
02 p0241 A69-11806

High speed compression waves, rarefaction waves and gas interface regions position and velocity measurement in shock tube by sensing electrical impedance
03 p0428 A69-13104

Strain rate and temperature effect on flow stress of 7075 aluminum bars
03 p0443 A69-13120

Planetary long waves behavior in atmospheric models, explaining unsteady components by means of filtered equations
03 p0459 A69-13274

Detached lunar compression wave, noting positive evidence from solar wind flux and direction measurements near lunar wake
05 p0824 A69-16251

Compressional and shear wave velocities vs porosity for sintered perlitic bricks
06 p1000 A69-17009

Steady compression waves properties in relaxing gases found independent of thermodynamic behavior and relaxation process
10 p1631 A69-22893

Shadow zone diffraction of plane step function compressional wave by circular cavity, using Friedlander wave front approximations
13 p2368 A69-28347

Planetary long waves behavior in atmospheric models, explaining unsteady components by means of filtered equations
14 p2472 A69-28782

Compression waves observed ahead of luminous discharge plasma below Mach 12-15 in electric shock tube, describing shock structure by blast wave theory
16 p2768 A69-31664

Ion energy distribution function and density profile in strong implosion wave generated by theta pinch discharge, investigating compression wave in deuterium

17 p3013 A69-33821

Resonance effects in finite hollow cylinder immersed in ideal compressible fluid and exposed to compression wave

18 p3215 A69-34567

Rod buckling under impact load, discussing compression strain wave front propagation

18 p3217 A69-34580

Stressed state analysis in dynamic brittle breakdown wave front of compression waves propagating in brittle rod under longitudinal impact

18 p3217 A69-34592

Piston driven shock tube at Kyoto University with performance tests results, investigating compression processes, shock speed and flow duration time

22 p3928 A69-41046

COMPRESSIVE STRENGTH

Controlled microstructures of eutectic aluminum-copper aluminides produced for mechanical properties studies

06 p0942 A69-17227

Short cylinder of perfectly plastic Coulomb yield conditions compressed between rigid plates, discussing cylinder-plate interface frictions, angles of internal friction and cohesion

08 p1410 A69-19890

Failure criteria for predicting filamentary composite strength under uniaxial and combined stresses from properties and fabrication process considerations

09 p1611 A69-21479

Compressive behavior of uniaxial filament reinforced epoxy tubes for aerospace structures, using hand layup method with Teflon mandrel and sleeve

09 p1508 A69-22339

Compressive and tensile creep of metals, discussing compressive stress, void nucleation, barreling specimen shape and platen lubrication

12 p2175 A69-25836

Theoretical compression strength of reinforced materials determined assuming material components differing elasticity moduli

14 p2532 A69-28973

German monograph on yttrium addition effects on tension and compression behavior of Nb and Mo at high temperature in vacuum

17 p2990 A69-33570

Temperature and pressurization effects on tensile and compressive properties of polycrystalline arc-cast W

18 p3154 A69-34273

Stiffened integrally formed panel stability evaluation based on compression structural efficiency and manufacturing costs

[AIAA PAPER 69-760]

19 p3434 A69-35660

Creep buckling strength reduction of aircraft compression structure, discussing initial eccentricity and loading mode effects on supersonic aircraft operation mode

21 p3842 A69-39308

COMPRESSOR BLADES

Acoustic resonance excitation in axial flow compressor annulus by wake shedding from blades

01 p0142 A69-10058

Aircraft gas turbine compressor parts erosion tests

01 p0099 A69-11058

Blade natural frequency distribution around rotor and mechanical coupling between blades effects on flexing amplitudes under forced vibration

[ASME PAPER 68-WA/GT-3]

05 p0837 A69-16139

Holographic interferometry, determining mechanical vibration amplitudes of compressor and turbine blades and airframe panel

[SAE PAPER 690265]

07 p1130 A69-18313

Diffusion bonding parameters for producing hollow Ti-Al compressor blades, discussing surface preparation, postboud heat treatment quality control and mechanical properties

[ASME PAPER 69-GT-46]

09 p1513 A69-22484

Incompressible two dimensional potential flow analysis with compressibility effects for thick highly cambered multibodies in cascade, noting slotted compressor blade performance

[ASME PAPER 69-GT-6]

09 p1432 A69-22507

Semiacuator disk method for boundary layers and velocity of stall flutter cascade blades vibrating in transient mode, considering nonstall flutter

11 p1818 A69-25028

Gas turbine centrifugal compressor design considerations for impellers and diffusers, including blade

loading and pressure gradients determination and aerodynamics

[IME PAPER 1]

12 p2146 A69-25790

Lifting surface theory for cascade of blades in subsonic shear flow, determining blade surface pressure distribution, distinguishing shear and uniform flow compressibility effects

16 p2731 A69-31592

Radial blade tip clearance effect on isentropic efficiency and air delivery in axial flow compressor with allowance for casing deformations and rotor displacements

16 p2837 A69-32004

Supersonic compressor blade sections performance prediction near maximum pressure ratio and efficiency by analyzing flow processes

[AIAA PAPER 69-522]

16 p2843 A69-32711

Blade length effects on performance of flow straightener vanes influenced by secondary flow, noting high deflection and low aspect ratio

17 p2896 A69-33606

Near resonant oscillations of warped turbine or compressor blades, discussing stress-strain relations

17 p3064 A69-33918

Damping, fatigue and optimal heat treatment of Cr-Ni steel for compressor blades operating at temperatures up to 500 K

17 p2990 A69-33933

Static tensile stresses effect on energy dissipation in alloys used in compressor blades found dependent on composition and heat treatment

17 p2991 A69-33934

Cantilever blades tangential vibrations effect on damping characteristics measured by free vibration excitation and static hysteresis loop

17 p3065 A69-33935

Boron fiber reinforced Al matrix composite material for high performance aircraft gas turbine engine compressor blading

[AIAA PAPER 68-1037]

20 p3586 A69-37153

Potential flow interaction effects between blade rows in axial flow compressor stage, emphasizing inlet guide vane-rotor interaction

21 p3643 A69-38439

Gas turbine compressor blade buckling during blade fabrication by hydraulic pellet jet technique eliminated by controlling working pressure of jet

21 p3731 A69-38879

Precision of gas turbine compressor blade positioning devices during machining, analyzing causes of inaccuracies

21 p3731 A69-38880

Compressor type cascade experiments to find closest possible traverse position to blade trailing edge

22 p3859 A69-40065

Discrepancy between theoretical and experimental coefficients of friction losses on blades of centrifugal compressor impeller wheels, using lattice theory

23 p4058 A69-41727

COMPRESSOR EFFICIENCY

Radial blade tip clearance effect on isentropic efficiency and air delivery in axial flow compressor with allowance for casing deformations and rotor displacements

16 p2837 A69-32004

Compressor surge effect on mixed compression inlet flow from numerical solution of one dimensional unsteady inviscid flow equations in variable area duct

[AIAA PAPER 69-484]

16 p2841 A69-32682

Jet engine compressor stalls in-flight investigation up to Mach 2 on F-111A by pressure sensors, noting steady state distortion role

[AIAA PAPER 69-488]

16 p2843 A69-32706

Supersonic compressor blade sections performance prediction near maximum pressure ratio and efficiency by analyzing flow processes

[AIAA PAPER 69-522]

16 p2843 A69-32711

Diffuser for high performance centrifugal compressors based on discrete pipe drillings

[ASME PAPER 68-GT-38]

19 p3240 A69-36420

COMPRESSOR ROTORS

Radial blade tip clearance effect on isentropic efficiency and air delivery in axial flow compressor with allowance for casing deformations and rotor displacements

16 p2837 A69-32004

Centrifugal compressor impeller disk design, considering stress analysis for shielding portion profile determination to satisfy equal strength condition

17 p3057 A69-33193

COMPRESSORS

NT CENTRIFUGAL COMPRESSORS

NT SUPERCHARGERS

NT SUPERSONIC COMPRESSORS

NT TRANSONIC COMPRESSORS

NT TURBOCOMPRESSORS

Compressor to inlet distortion tolerance design techniques for gas turbine compressors, noting rotor matching, blade chord length, blade geometry, etc

[ASME PAPER 69-GT-115]

09 p1572 A69-22525

Fluidic compressor bleed control unit for TF-30 jet engine to prevent stall at low rpm operation

10 p1753 A69-23559

Isentropic compression tube with piston compressor for producing hypervelocity test flows, noting shock speeds

[AIAA PAPER 69-334]

13 p2249 A69-28270

Multiple function combination probe design for compressor and turbine air flow research

16 p2766 A69-31917

Hypersonic test equipment and programs at CEAT /France/, describing compressor, wind tunnels and several experiments

16 p2766 A69-32071

Jet and compressor noise, discussing noise suppression techniques and engineering applications

[AIAA PAPER 68-550]

17 p3022 A69-34019

Glass fiber filled polytetrafluoroethylene materials for piston seals in high pressure oil-free reciprocating air compressors, discussing manufacturing and non-destructive tests

19 p3323 A69-35579

Oil-free linear motor resonant piston gas compressor, hermetically sealable to handle radioactive and dangerous gases

[ASME PAPER 69-FE-36]

20 p3466 A69-37996

COMPTON EFFECT

Transformation of differential mean and current densities and anisotropy of cosmic ray particles and photons observed in frames of reference relative to each other with isotropic flux

05 p0817 A69-16651

Stimulated Compton effect for energy transfer between relativistic electrons and radio photons in quasi-stellar objects

05 p0828 A69-16652

Diffuse cosmic X radiation flux and intensity law, noting inverse Compton effect of electrons on 3K black body radiation

05 p0817 A69-16714

Electron momentum density in diamond, graphite and carbon black from Compton profile measurement by X ray scattering vector

06 p0982 A69-18233

Stimulated Compton scattering for laser action, noting voltage tunability and gain at far IR wavelengths

[IEEE PAPER S-9]

07 p1154 A69-19081

Inverse Compton effect and universal black body radiation from less energetic radio photons of galactic and metagalactic origin

08 p1381 A69-19786

Cosmic gamma ray generation by Compton scattering in discrete sources, applying formulas to M87, Crab Nebula, M82, Cen A, Ngc 1275, and Cas A

08 p1377 A69-20053

Cosmological implications of diffuse X ray background, noting Compton black body process effect on isotropic cosmic X rays

09 p1578 A69-22152

Inverse compton scattering of far IR background radiation proposed as explanation of high energy gamma ray flux

09 p1580 A69-22296

Electromagnetic wave buildup by induced Compton effect as possible radio emission source, considering data for quasars and pulsars

11 p1957 A69-24402

Cosmic ray showers electron, positron and photon energy distribution functions calculated, considering positron annihilation, Compton effect and relativistic electrons formation

13 p2303 A69-28413

Energy transfer during fast electrons and photons interactions, indicating Compton energy losses related to space X ray and gamma radiation sources

15 p2676 A69-30953

Thermodynamic Green function for Compton scatter cross section of photons by electrons in hot plasma

15 p2664 A69-31479

Metagalactic electrons inverse Compton effect on relict radiation to interpret cosmic isotropic X radiation entire energy spectrum

16 p2847 A69-31800

Center to limb variation of solar hard X ray bursts, suggesting inverse Compton effect and bremsstrahlung from anisotropic electrons

17 p3023 A69-33055

Induced Compton scattering of plasma and electromagnetic waves under astrophysical conditions, discussing HF radio emission spectra from cosmic objects and quasar
20 p3607 A69-38035

Compton profile from single crystal of LiH measured with X ray scattering, noting valence- electron momentum distribution role
22 p3993 A69-40730

Electromagnetic wave buildup by induced Compton effect as possible radio emission source, considering data for quasars and pulsars
24 p4391 A69-43792

COMPUTATION
NT ORBIT CALCULATION
Collection of papers on computational fluid dynamics
01 p0061 A69-10916

Matrix computation operations devoid of sense and relevancy arising in interdisciplinary problems
11 p1910 A69-25522

COMPUTER COMPONENTS
NT CONTROL UNITS [COMPUTERS]
Computer systems definition, terminology and functional description, discussing engineering problems, flow charts, programming and techniques
04 p0563 A69-14515

Superconductors, discussing properties and materials for magnets, power systems, radiation detectors, HF devices and computer elements
04 p0642 A69-14584

Dual processor checkout system providing isolation of malfunctioning unit from memory and ensuring decision making by operative unit
04 p0568 A69-15361

Error analysis methods for inherent errors in analog, digital and linkage equipment of typical hybrid computer configuration
05 p0725 A69-16472

Typewriter keyboard computer system with CRT display having closed circuit TV link contents of file to add, delete or change information
06 p0891 A69-17204

Digital computer circuit design book covering requirements of circuit for digital logic and memory functions and physical properties of components
06 p0892 A69-17869

Microelectronics for digital adaptive controls, discussing digital filter design and chips required in fabrication
09 p1474 A69-22453

Complex electronic systems optimum redundant element content determination for ensuring adequate supply
14 p2426 A69-29422

Linear analog computing elements realizing voltage transfer function with poles and zeros independently controlled, basing method on dummy variable technique
14 p2422 A69-29551

Management and scientific computer reliability difference, considering circuits, component assembly, software, maintenance, etc
15 p2624 A69-30821

Quality control of high volume microelectronic circuit assembly of military computer emphasizing preventive action
15 p2580 A69-31129

Fluid amplifier with sudden widening applied to various computer tasks, utilizing for detection and measurement of viscosity, temperature and sonic or rotational velocity
17 p2903 A69-33010

Gunn effect theory and applications, discussing field domains in semiconductors, excited oscillations measurement, oscillators design, computer elements, etc
18 p3183 A69-35160

Onboard spacecraft computer design, programming and operation based on dual bussing system
20 p3500 A69-37384

Integrated logic circuits assembly for digital computers, considering high density, mechanical environment, reliability, accessibility and costs
20 p3505 A69-37401

COMPUTER DESIGN
Semiautomatic computer for determining torsional oscillation natural frequency in multimass in-line systems
01 p0035 A69-10596

Book on error detecting logic for digital computers covering error detection codes, logic circuits, checkers in data paths, etc
02 p0212 A69-11453

Hybrid computers, discussing analog and digital devices combination and distinction between use of computer for general purpose computation and control purposes
02 p0212 A69-11997

Onboard SDP-3 computer data system core for IMP spacecraft, considering payload
03 p0400 A69-13243

Aerospace digital computer design, discussing influence of data trends and reliability techniques
03 p0401 A69-14181

Limited speech recognition system /LISPER/ simplifies recognition by computer designed as research vehicle and pattern recognition system
04 p0565 A69-15338

Graphics system using computer configuration connected by conventional voice lines, noting hardware and components
04 p0566 A69-15343

Design and implementation of executive system for hybrid simulation, discussing requirements placed upon digital computer and operating software
04 p0567 A69-15350

MOS GP computer suitable for navigation applications
04 p0568 A69-15357

Semiconductor memory units, considering bipolar, p channel MOS and complimentary MOS chip technologies
04 p0569 A69-15362

Chronological development and future trends in high speed logic and memory hardware technology and implementation
04 p0569 A69-15366

Reliable information storage in memories designed from unreliable components
04 p0569 A69-15455

Reliable computation in computing systems designed from unreliable components, considering two models for component malfunctions
04 p0569 A69-15456

Nonreplicative self repairing control, describing prototype computer construction for testing feasibility
04 p0569 A69-15457

Special purpose computer for implementing programmable digital filter used in sampled data control systems
04 p0569 A69-15462

Digital computer interface systems design for simulation, control, instrumentation and data processing, discussing hybrid computer linkages
05 p0723 A69-16195

General purpose satellite computer, discussing on-board processor /OBP/ design, memory, central unit, input/output and software
05 p0725 A69-16710

Integrated automatic data processing system /NEC-TAR/ performance and operation
05 p0726 A69-16765

Typewriter keyboard computer system with CRT display having closed circuit TV link contents of file to add, delete or change information
06 p0891 A69-17204

Digital computer circuit design book covering requirements of circuit for digital logic and memory functions and physical properties of components
06 p0892 A69-17869

Gunn effect diodes application to ultrafast pulse electronic circuitry for computer logic
07 p1089 A69-18244

Single purpose analog computer with analog and hybrid elements for calculating Nyquist diagrams for feedback circuits
08 p1278 A69-20397

Analog video processor in omnidirectional radar system for flight safety, discussing construction, transistorization and circuitry
08 p1276 A69-20605

Decision oriented automatic data processing systems design, noting quantity and quality of upward directed information to management
08 p1423 A69-20733

Collection of papers on applications of microelectronics to aerospace equipment, noting design and reliability of circuits and computers
[AGARDOGRAPH-114] 08 p1291 A69-20981

Electrical design of low cost, highly maintainable general purpose computer optimized with respect to product of power and speed
[AGARDOGRAPH-114] 08 p1278 A69-20988

Complex digital computers designed for Apollo spacecraft missions, discussing construction techniques
[AGARDOGRAPH-114] 08 p1279 A69-20990

OMNITRAC general purpose airborne digital computer with permanent memory of 4096 words of 23 bits, noting modular construction
10 p1659 A69-22845

Sample data reduction methods combined in special purpose computer for measuring ablation in reentry vehicle heat shields
10 p1660 A69-23290

Solid logic technology /SLT/ computer circuits, discussing IBM 360 computer reliability, failure analysis information retrieval, SLT module and failure rate
11 p1843 A69-24341

Computer design for booster/satellite control, discussing systems reliability, low power and tradeoffs
11 p1843 A69-25320

Computer reliability by development and methodical employment of self repair techniques
12 p2034 A69-25941

Digital computer redundancy, analyzing triple modular redundancy in Saturn vehicles and quad design in primary processor and data storage for OAO
12 p2034 A69-26567

Electrical engineering, Volume 3, communications, covering special theories, systems components, telecommunication, electroacoustics, digital and analog computers and programming
15 p2568 A69-30619

Viggen computer development, stressing reliability towards aircraft vibrations
15 p2577 A69-30620

Third generation computer reliability including preparation and test of integrated logic circuits
15 p2626 A69-30832

Collection of papers on RCA computer design
16 p2756 A69-32554

Flight command computer for V/STOL aircraft, discussing design concepts, operating modes, displays, etc
[AHS PAPER 313] 17 p3001 A69-33543

Electronic computers for avionics system design in terms of technology, performance and cost, discussing reliability prediction and failure rate data
17 p2976 A69-34058

NDC-1070 solid state computer design featuring TTL, MSI and hybrid circuits, offering memory capacity flexibility and rapid maintainability
17 p2933 A69-34060

Patch panel programmed DDA computer having MHz iteration rate and 35 bit usable word length, discussing system design and demonstration model
17 p2934 A69-34073

Electromagnetic compatibility /EMC/ hardware design, discussing NDC 1060 computer configuration, requirements and service environment
17 p2947 A69-34136

Fluidic pressure ratio computing device based on two free jets interaction principle, describing prototype system design and analysis, electronics and overall error
18 p3133 A69-34309

IMP-1 experiment, describing design and applications of SDP-3 computer
19 p3280 A69-36265

Vibration phenomena analysis by transfer function computer, discussing precision spectrum analyzers
20 p3498 A69-37003

Onboard satellite computer design and programming language criteria, considering cost, reliability, weight, volume and energy requirements
20 p3499 A69-37379

Missile-borne and satellite-borne computers analogies, comparing design, operational conditions and functional requirements
20 p3500 A69-37380

Onboard aircraft computer design criteria, considering adaptability, maintainability, reliability, cost, prototype delivery time, weight and volume
20 p3500 A69-37381

Spacecraft onboard processor for digital filtration and data compression, discussing prototype design, construction, sample memory, weight memory, arithmetic unit and programmer
20 p3500 A69-37383

Onboard spacecraft computer design, programming and operation based on dual bussing system
20 p3500 A69-37384

SDP-3-A general purpose stored program computer designed for small scientific spacecraft onboard data system, noting computerized simulation
20 p3500 A69-37385

Swedish satellite onboard computer for particle experiment, discussing functional design based on buffer unit for experimental data
20 p3501 A69-37386

Onboard data processor design for Swedish satellite to study spatial and temporal variations of auroral particles

20 p3501 A69-37387

Onboard satellite computer for project Roseau experiments for magnetosphere study, discussing program switches, monitors and data compilers

20 p3501 A69-37388

Roseau satellite onboard computer systems design, emphasizing simulator and assembly programs for real time operation verification

20 p3501 A69-37389

Data handling system design for large astronomical satellite /LAS/, discussing spacecraft configuration, basic aims, program functions, subsystems, signal flow, flight repair, etc

20 p3501 A69-37390

Microminiature Elliott MCS 920 M digital computer for inertial guidance of CECLES-ELDO launcher, discussing construction, code, interrupt, guidance system and functions

20 p3501 A69-37391

Microminaturized digital computers for missiles and aircraft, discussing characteristics, environmental conditions and transformation possibility for use in satellites

20 p3502 A69-37392

Computer organization design employing distributed processor to provide general purpose computing while taking advantage of large scale integration

21 p3856 A69-39133

Dual role core /Ducor/ memory system with unique core stack assembly feature to achieve cost reduction and structural integrity for severe environmental conditions

22 p3903 A69-39950

Interactive experimenter computer system software and hardware design considerations based on astronaut-machine/experimenter question-answer interactions

[AIAA PAPER 69-953] 22 p3904 A69-40335

Fail-soft operation in array processor with cellular redundancy, discussing cellular autonomy, long life and ultrareliability

[AIAA PAPER 69-965] 22 p3906 A69-40346

Self testing and repairing /STAR/ aerospace computer for automatic maintenance of unmanned interplanetary spacecraft

[AIAA PAPER 69-966] 22 p3906 A69-40347

Digital data systems fault detection and isolation, describing diagnostic programs and hardware

[AIAA PAPER 69-967] 22 p3906 A69-40348

Spaceborne stored program computer design for OAO-C, noting auxiliary command storage, spacecraft monitoring and malfunction reporting, etc

23 p4132 A69-41736

SDP-3 small serial computer for engineering experiment on IMP spacecraft, discussing design modifications to improve performance

23 p4133 A69-41737

Modular data acquisition and processing system, describing input unit, checkpoint selection scanner, analog-digital converter, limit indicator, etc

23 p4167 A69-42459

F-111D computer complex to provide selective functional redundancy and flexibility to accommodate mechanization changes

[AIAA PAPER 68-837] 24 p4285 A69-43719

COMPUTER GRAPHICS

NT DATA PROCESSING TERMINALS

NT DIGITAL COMPUTERS

NT ERROR DETECTION CODES

NT PLOTTERS

Computer graphics technique for reducing photographic data from optical device to replace time consuming visual methods

18 p3134 A69-34373

Computer graphics engineering applications in line drawing displays for industry, including design programs and color TV flight simulation

18 p3106 A69-34659

Micromation and micrographics, discussing nonimpact printing in computer avoiding output imbalance by high speed microfilm recorder

18 p3234 A69-35059

Lockheed C-130 Hercules modified as STOL aircraft studied in laboratory by computerized simulation and graphics techniques for pilot view during landing

18 p3092 A69-35466

CRT graphic display/plotter for small digital computers, describing device operation, control and applications

21 p3679 A69-39608

EEG patterns computerized spatio-temporal display technique using CRT and motion picture camera

21 p3668 A69-39864

Interactive graphics system for rocket vehicle trajectory simulation and performance analysis

[AIAA PAPER 69-954] 22 p3905 A69-40336

Man-computer interactive Terminal Interface System /TITS/ compatible for programming graphics, character scopes and typewriter using FORTRAN

[AIAA PAPER 69-955] 22 p3905 A69-40337

COMPUTER PROGRAMMING

NT ASSEMBLER ROUTINES

NT LANGUAGE PROGRAMMING

NT ON-LINE PROGRAMMING

NT SYMBOLIC PROGRAMMING

Dynamic programming methods to avoid dimensionality problem arising in solution of boundary value problems by digital computer

01 p0103 A69-10006

Piecewise analysis of large structures, showing incompatibility of minimum computer storage and minimum number of multiplication requirements through bandwidth schemes

01 p0169 A69-10637

Representation for computer storage of contour map data for searching problem involving determination of aircraft ground track

01 p0036 A69-10704

JFIP computer language /Jet Propulsion Laboratory FORTRAN language with Intervals Preprocessor/ for extending FORTRAN 4 to utilize subroutines performing interval arithmetic

01 p0036 A69-10710

Finite f function computation by d/r circuit, discussing computation time

01 p0105 A69-10734

FORTRAN Deductive System to find solutions to theorem proving problems, discussing computer implementation

01 p0037 A69-10806

Digital computer systems design optimization based on operational experience in development of Saturn S-IC stage Automatic Test and Checkout System

03 p0400 A69-13233

Collection of Soviet articles on computer methods and programming covering fluid flow by numerical methods

03 p0362 A69-13649

Survey of papers on computer calculation of two and three dimensional gas flows, emphasizing method of characteristics and finite difference techniques

03 p0363 A69-13657

Open and closed path orthogonal analysis for structural network

03 p0526 A69-13735

Nonlinear aerodynamic problems of plane and asymmetric flows solved by digital computer, using modified Monte Carlo method

03 p0364 A69-13921

CASSANDRE language in computer simulation

03 p0401 A69-14178

Book on dynamic programming basic theory and standard computational algorithm and applications to optimization in diverse fields

04 p0563 A69-14652

Optimized formula for MacAdam color differences with modification in weighting of chromaticity and lightness, discussing Fortran IV computer programs development

04 p0564 A69-14883

Computer programming of satellite orbit tracking angles for automatic picture transmission receiving stations

04 p0558 A69-14917

Two dimensional elementary transformation for obtaining eigenvalues, considering programming aspects for computing characteristic roots of matrix

04 p0624 A69-14967

Algorithm for calculating discrete Fourier transform by computer

04 p0565 A69-15336

Arbitrary factor technique to derive fast Fourier transform, evaluating recursive properties of trigonometric functions

04 p0565 A69-15337

SALEM programming system developed for digital simulation of systems described by partial differential equations

04 p0565 A69-15340

TAF /time and frequency/ code written in FORTRAN language for computing steady state, frequency and time response from nonlinear simultaneous differential equations

04 p0565 A69-15341

Iterative solution of continuous-time-discrete-space /CTDS/ equations as approach to hybrid computation of certain partial differential equations

04 p0567 A69-15348

Hybrid executive development based on digitally oriented software, explaining assembly language routines

04 p0567 A69-15351

Interpretive Checkout Test Language /CTL/ designed in near English form for aerospace checkout tasks

04 p0569 A69-15364

Electrical circuits time domain analysis, describing method for computer solution of circuit equations

05 p0737 A69-15766

Multilevel modeling structure for interactive computer graphic design, discussing conversational display manipulation program and interconnection with analysis program

05 p0724 A69-16381

Programming technique using quaternion parameters for error reduction in simulation of spinning rigid body

05 p0724 A69-16469

Computer-analyzer system for nuclear chemistry, noting advantage of on-line data acquisition and analysis coupled with time sharing economy

05 p0725 A69-16584

On-line ground flight test data processing system

05 p0725 A69-16757

Book on FORTRAN computer programming language

06 p0891 A69-17364

Automation of meteorological fields analysis using computer

07 p1175 A69-18677

Book on computer calculation of structures covering programming, computer language, mathematical aspects of structural analysis, matrix computation, etc

07 p1233 A69-19349

Energy deposits from decay of tritium incorporated into bacteria, using computer simulation for radiation dose distribution

07 p1068 A69-19490

Discrete ordinate difference equations of radiative transfer for slab using invariant method, noting storage and computing time advantages

07 p1183 A69-19623

Sparse matrix scheme for computer analysis of structures, introducing term searching factor as efficiency guide for matrix routines

07 p1089 A69-19723

Computer program reliability enhancement, discussing significance of underestimation

08 p1278 A69-19845

Stochastic model for real time on demand weather predictions using REEP /regression estimation of event probabilities/ equations in Markov chain

08 p1345 A69-20299

Trajectory calculation of unguided meteorological rocket by digital computers and by equations of motion, discussing wind influence on ceiling and horizontal ranges

08 p1409 A69-20457

Soviet literature on coding theory and applications, stressing contributions to nonSoviet specialists

09 p1460 A69-21393

Multistep integration formulas treated as transfer system to examine properties in frequency domain for selection in digital simulation programs

09 p1460 A69-21417

Black arrow rocket vehicle flight path computer programming, discussing geographical restrictions on design

09 p1593 A69-21616

Time dependent procedure for axisymmetric transonic nozzle flows, programming governing equations for high speed computer

09 p1431 A69-21974

Man in loop computer facility for programmers to check out flight programs in simulated space flight environment

[AIAA PAPER 69-324] 09 p1479 A69-22384

Computer aided circuit design programs combining technical engineering skills with building block programs

10 p1659 A69-23141

Electronic circuit analysis by computer programming including system and program commands, network data, output control, discussing steady state circuit programming

10 p1659 A69-23143

Computer generated holograms using binary transmittance for wave fronts and three dimensional images construction

10 p1697 A69-23869

Matrix Computer for solution of algebraic and integrodifferential equations in linear and nonlinear

statics and dynamics, considering mechanical vibration problems
[ASME PAPER 69-VIBR-12] 10 p1806 A69-24167

Pneumatic diode function generator for simulating nonlinear control systems, discussing operating characteristics and programming methods 11 p1858 A69-24580

Computer processed pictures including transformation of graphical material, picture generation from data or abstract rules, discussing procedures, instrumentation, color and applications 11 p1842 A69-24588

Thin conical elastic shell stress-strain state calculated by computer for arbitrary thicknesses and loading conditions, considering temperature and edge forces effects 11 p1981 A69-24943

Flexible control module for real time automated checkout requiring programming by personnel with strong software background 11 p1843 A69-25072

Free vibration of discretely stiffened cylindrical shells with arbitrary end conditions programmed for digital computer, considering flexure, extension, torsion and nonsymmetric stiffener cross section 11 p1992 A69-25521

Digital computer analysis of multivariable control system in frequency domain, using operational array technique programming method 12 p2046 A69-26064

Computer program in ALGOL for computing satellite ephemerides applicable to satellites with direct or retrograde motion observed in Northern or Southern Hemispheres 12 p2159 A69-26448

Linear programming algorithms for optimal structural weight design 12 p2181 A69-26566

Digital computer methods for weak pulsars search using radio noise picked by telescopes 12 p2172 A69-27169

Parallel processing in system of computers with identical output, including probability graph for algorithm 13 p2224 A69-27426

Solar eclipses phases and elements calculation by Fortran language computer, using least squares method 13 p2336 A69-27447

Cosmic ray observation data automatic recording, presenting coding system for reading into computer 13 p2327 A69-27609

Turbulence measurement, considering handling and storage of data 13 p2263 A69-28148

Subroutines for computing characteristics of electromagnetic radiation scattered by absorbing and homogeneous sphere employing logarithmic derivative method 14 p2412 A69-29283

Monograph on reduction of satellite data using fixed stars covering ALGOL programming for computing satellite direction from photographic model 14 p2446 A69-29286

Computer based data handling and display for relating remote sensor signals to ground truth information derived from aerial photographs 14 p2416 A69-29534

Economical computer techniques for numerically integrated finite elements, creating 96 element square matrix 15 p2711 A69-30873

Lidar data obtained at Hamilton AFB, Calif., computer analyzed for lidar operational utility, determining cloud ceiling and visibility for aircraft landing operations 15 p2651 A69-30895

Nondeformable closed contour spatial gear kinematics using matrix tensor method suitable for computer programming 15 p2713 A69-31020

Computer analysis of EEG recording, presenting model studies under rest and performance conditions 15 p2560 A69-31232

Book on three dimensional flow of ideal gases past smooth bodies, emphasizing utility of finite difference methods 16 p2771 A69-32003

Approximation of vector linear differential equations with slowly varying matrix coefficients on time sharing computers, noting modeling possibilities 17 p2996 A69-33879

Computational approaches in applied mechanics - ASME Conference, Chicago, June 1969 18 p3105 A69-34657

Problem-oriented languages in man-computer intercommunication 18 p3106 A69-34658

Extremum disturbance analysis and optimum performance and design problems for structural and mechanical dynamic systems, basing solutions on linear, nonlinear and dynamic programming 18 p3106 A69-34663

Electronic data processing facilitating engineering design development work, including computer programming 18 p3106 A69-34838

Operational missile flight program validation plan noting mission analysis, computer programming, program preparation and performance prediction 19 p3279 A69-35955

Block structures and indirect addressing, discussing SNOBOL modifications and naming constraints 19 p3280 A69-36207

Computer program for numerical integration of chemical reaction rate equations behind steady state hydrogen-oxygen shock wave 19 p3451 A69-36366

Onboard spacecraft computer design, programming and operation based on dual bussing system 20 p3500 A69-37384

Electronic computer for processing observational data from pilot balloons, utilizing algorithms of values in programming for accuracy and time saving 20 p3572 A69-37700

Computer programming procedures in automatic control of hole boring processes for aircraft components 21 p3731 A69-38881

Transfer matrix symmetry about secondary diagonal in vibration analysis useful for computer programming 22 p4040 A69-39938

Programming aspects of computer uses in civil engineering, stressing engineer-coder communication via flow diagrams 22 p3903 A69-40138

Coding aspects of computers use in civil engineering, discussing language selection, program partitioning and storage use 22 p3903 A69-40139

Man-computer interactive Terminal Interface System (ITIS/ compatible for programming graphics, character scopes and typewriter using FORTRAN [AIAA PAPER 69-955] 22 p3905 A69-40337

SIMUPOL /Simulation Procedure Oriented Language/ system for hardware description and architecture and interface requirements of digital processor [AIAA PAPER 69-960] 22 p3905 A69-40341

Programming and checkout of computer for Edo inertial guidance system, including flight simulation and autopilot tests [AIAA PAPER 69-961] 22 p3978 A69-40342

Airline economics long term trends requiring management tools for cost control, operations simulation and monitoring, computer use and information data processing [SAE PAPER 690414] 23 p4241 A69-41641

Programmable data handling and telemetry systems for scientific satellites, noting system checkout, spacecraft integration, software and ground data processing 23 p4132 A69-41735

Integrated civil engineering system (ICES/ and structural design language /STRUDL/ programming and operating characteristics, including computer run example 23 p4134 A69-42146

Formulas for discriminant and regressive weather analysis for computer calculations under operational weather forecasting conditions 23 p4184 A69-42490

Tree codes for memoryless time discrete sources with bounded fidelity criterion 24 p4284 A69-42720

Memory gradient algorithm for reducing computing time by minimizing quadratic function of unconstrained variables compared with Fletcher-Reeves algorithm 24 p4340 A69-42957

Basic task archetypes in man-computer problem solving including detection, planning, optimization, designing, etc 24 p4274 A69-43019

COMPUTER PROGRAMS

NT APPLICATIONS PROGRAMS [COMPUTERS]
NT ASSEMBLER ROUTINES
NT COMPILERS
NT SUBROUTINES

Spacecraft illumination by reflected solar radiation calculated by computer method 01 p0151 A69-10576

Book on advanced linear programming computing techniques covering algebraic theory and construction of computer programs 01 p0035 A69-10701

Three leveled computer program library compiled for numerical analysis 01 p0036 A69-10709

Engine inlet thermal anticing analysis, detailing computer programs to determine air flow velocity, water impingement and thermal requirements 01 p0055 A69-11045

Electromagnetic wave path emitted by artificial satellites across anisotropic ionosphere due to geomagnetic field determined by computer program 01 p0068 A69-11115

Stellar brightness attenuation in atmosphere, determining extinction factor using computer calculations 01 p0157 A69-11192

Computer program for calculating density distribution of deviation of F 2 layer critical frequency from median value 02 p0239 A69-11692

Soviet book on kinematics of inertial navigation systems covering systems classification, equations derivation and computer algorithms for error analyses 02 p0278 A69-11793

Computer solution of forced torsional oscillation equations for periodic coupled machine system with viscous dampers 02 p0338 A69-11893

Geophysical theory and computers - Conference, University of Trieste, September 1967 02 p0242 A69-12005

Satellite digital video data analyzed by two dimensional filter computer technique, discussing biomedical applications 02 p0213 A69-12155

Collisionless computer model performing gravitational experiments with two dimensional galaxy 02 p0322 A69-12271

Computer study of collisionless self gravitating system using two dimensional model, obtaining gravitational field by solving Poisson equation 02 p0322 A69-12272

Computer models of one dimensional stellar problems, discussing fast relaxation of unsteady state to Fermi-Dirac distribution and slow relaxation to thermal equilibrium 02 p0323 A69-12274

Radar cross sections for arbitrary bodies calculated with computerized ray optics method taking into account depolarization 02 p0209 A69-12332

Multiprocessing system simulation using GPSS /General Purpose Simulation System/ model 02 p0213 A69-12492

Missile radar cross section based on modeling from simple forms, noting computer program 03 p0384 A69-12910

Stored program control for polynomial data compression in telemetry application 03 p0400 A69-13220

Radiation sensor PCM data processing by computer to detect radiation level using data decorrelation, data normalization and threshold test 03 p0400 A69-13313

Parametric analysis of life support systems developing scaling laws adapted to computer solutions, discussing manned orbital missions [SAE PAPER 680746] 03 p0379 A69-13438

Systems analysis application to determination of C-5 effectiveness noting loading, productivity and effectiveness analysis computer programs [SAE PAPER 680729] 03 p0379 A69-13440

Dipole model of geomagnetic field in terms of spatial distribution of vertical component, discussing computer program for calculating rectangular components 03 p0424 A69-13544

Analog sampled data simulator using field effect transistors and single value of holding capacitor for covering sample frequency variation 03 p0405 A69-13600

Numerical computer results applied to supersonic flow of perfect gas past staggered cones 03 p0363 A69-13659

Applications of electronic computers in construction - Conference, Weimar, June-July 1967 03 p0525 A69-13734

Computerized solution of three dimensional problems of elasticity theory using Ritz method 03 p0527 A69-13743

Two dimensional problem of elasticity by numerical solution, outlining program for computer 03 p0527 A69-13750

Computer program for electromagnetic wave metal shielding evaluation 03 p0398 A69-13901

Computer method calculating stressed state of elliptical bottom of cylindrical pressure vessel based on differential bending equations for shell of revolution 04 p0668 A69-14275

Computer programs for engineering analysis, design and simulation, presenting point selection program for curve plotting 04 p0563 A69-14516

Digital computer program for gas bearing analysis, discussing Reynolds equation and numerical approximations 04 p0604 A69-14518

Computer solution of Cauchy problem of ordinary differential equations in form of Taylor series 04 p0622 A69-14624

Numerical integration of elliptic mixed boundary value problem in region with curved boundary programmed in FORTRAN for general linear second order partial differential equation 04 p0625 A69-15287

Space oriented programming languages and compilers for translating languages, discussing software generating tools under development for space missions 04 p0564 A69-15297

Algorithm for simultaneous nonlinear equations solution on computer, noting quadratic convergence for convex space 04 p0565 A69-15335

Computer controlled photometric telescope, describing star setting, photometric measurements and data processing 04 p0602 A69-15380

Special purpose computer for implementing programmable digital filter used in sampled data control systems 04 p0569 A69-15462

Stored program computer for small scientific spacecraft, noting program and data memory capacities 04 p0569 A69-15472

Partial differential equations solution using analog, digital and hybrid computers, discussing heat transfer in parallel flow exchanger 05 p0723 A69-15705

Digital computer solution of Laplace equation using dynamic relaxation method to introduce dynamic terms into basic equation 05 p0697 A69-15713

Book on computer evaluation of mathematical functions, discussing errors, square and cube root, Chebyshev polynomials, approximation, rational function, asymptotic expansions, etc 05 p0723 A69-15955

Computer programming language for three dimensional geometry at symbolic level, noting use for placement problems 05 p0724 A69-16382

Three dimensional computer graphic modeling program, discussing SIGHT and LEGER programs 05 p0724 A69-16383

Computer programs and analysis methods for digitalization of continuous feedback network in missile control systems 05 p0725 A69-16470

Flight test data reduction on time sharing general purpose computer, noting hardware link between airborne equipment and computer 05 p0726 A69-16758

Square loop magnetic core model for computer aided circuit transient analysis 06 p0899 A69-16888

Satellite actinometric data computerized reduction in U.S.S.R., examining computer program features [UN PAPER 68-95763] 06 p0916 A69-17038

Processing TV cloud data monitored by Molniya I and Meteor meteorological satellites, discussing computer interpretation of TV photographs [UN PAPER 68-95759] 06 p0950 A69-17060

Random search and multiple integral based Monte Carlo method for computer solution of nonlinear aerodynamic problems 06 p0858 A69-17334

Characteristic impedance of rectangular waveguide computation curve explained on basis of computer program for cascade of transmission line sections 06 p0897 A69-17490

Optimum control problems solved numerically on computer, noting multivalence of extremal solutions and application to orbital transfer in central gravitational field 06 p0903 A69-17539

Space vehicle trajectory optimization using computerized step by step steepest descent to minimum cost, considering cost gradient vs control 06 p1006 A69-17570

M-20 digital computer program designed for calculating statistical characteristics of signals from IR TV scanning system of Cosmos 122 meteorological satellite 06 p0929 A69-17980

Soviet collection of papers on dynamics and strength of machines 06 p1026 A69-18013

Optimal computer calculation procedure for medium thickness anisotropic laminar plates with shear applied to rectangular and hinged plates 06 p1026 A69-18015

Computer program for axisymmetrically deformed shells of revolution and combinations of such shells 06 p1026 A69-18019

Stress distribution in shallow spherical shell with smooth cornered rectangular hole or biperiodically arranged set of holes, using computer program 06 p1027 A69-18020

Computer solution of incompressible two dimensional time dependent Navier-Stokes equations for oscillating body with rectangular boundaries [AIAA PAPER 69-185] 06 p0914 A69-18135

Fluid flow longitudinal temperature profiles for inclusion in heat transfer computer program [AIAA PAPER 69-30] 06 p1038 A69-18174

Computer program for predicting temperature distribution and heat transfer through coated and uncoated window systems of aerospace vehicles [AIAA PAPER 69-28] 06 p1038 A69-18178

Specular reflection computer program utilizing virtual image technique to determine reflection characteristics of enclosed diffusely emitting surface [AIAA PAPER 69-65] 06 p1040 A69-18215

Finite kinetics calculations by computer programs to generate reactions among prescribed reactants [WSCI PAPER 68-54] 07 p1072 A69-18314

Ignition pressure transient for solid propellant rockets predicted by computer program [WSCI PAPER 68-35] 07 p1203 A69-18352

NERVA transfer functions evaluation by computer data processing, using Fourier algorithm [IEEE PAPER 2B-2] 07 p1179 A69-19187

Complex transmission and reflection coefficients of dielectric film with permittivity gradient computed by modified Runge-Kutta method, noting plasma diagnostics application 07 p1194 A69-19334

Heuristic Dendral program to mechanize inductive inference in organic chemistry to determine isomers in chemical compounds 07 p1075 A69-19484

Computer programmed momentum theory for induced flow field of helicopter rotor in forward flight [AIAA PAPER 69-224] 07 p1052 A69-19562

Computer aided design program for testing equivalent circuits of bipolar transistors in static regime under various polarization conditions 08 p1280 A69-19972

Digital method for quantitative study of carrier circulation phenomena in semiconductors, noting Algol program and continuously polarized p-n junction 08 p1280 A69-19973

Controlled charge models for computer calculation of electronic circuits, discussing tunnel diode static characteristics and equivalent transistor circuits 08 p1280 A69-19975

MOS transistor equivalent circuit for computer aided calculations with IMAG I program, noting versatility of model 08 p1280 A69-19978

Computer aided automatic drawing of printed circuits, including design and manufacture of films for engraving 08 p1296 A69-19979

Fortran 4 program for computation of equilibrium compositions of gas mixtures at high temperatures 08 p1278 A69-20154

OMEGA airborne navigational computers, discussing earth ellipticity and phase variations problems for signal conversion into latitude and longitude coordinates 08 p1347 A69-20778

Digital computer method for Navier-Stokes equation in prototype cavity flow problems, noting applications to biharmonic problems 08 p1305 A69-20831

Computer programs for systems statistical reliability characteristics using reliability tests and time to failure data, giving optimal breakdown probability functions 08 p1322 A69-21101

Low thrust mission analysis techniques and computer programs, discussing electric propulsion 09 p1585 A69-21208

Predesign and mission analysis software capability for sizing, design, fabrication and developmental testing of flight hardware for electrically propelled interplanetary spacecraft 09 p1585 A69-21210

Smoothing data stability by least squares method, noting applicability to computer processing at random sequences 09 p1532 A69-21754

Specialized mathematical machine for expanding matrix determinants and solving combinatorial problems, discussing symbolic circuit 09 p1460 A69-21782

Linearized radio circuits frequency characteristics calculations using digital computers, noting system nodes number influence on computer rate 09 p1472 A69-21783

Computer program for continuous attitude determination for spin stabilized OGO-C satellite after malfunction of attitude control system, calculating angle between high rate data periods 09 p1610 A69-21987

Spacecraft onboard checkout systems and design of ground support equipment and software, noting adaptive dynamic analysis and maintenance /ADAM/ concept [AIAA PAPER 69-307] 09 p1478 A69-22382

Finite difference method computer programs for calculation of velocities and streamlines on blade to blade surface of revolution of turbomachine [ASME PAPER 69-GT-48] 09 p1432 A69-22495

Digital computer programs for aerodynamics of subsonic gas turbine combustion systems applicable to incompressible flow with specified flow boundaries, noting vortices distribution 09 p1573 A69-22621

Structural reliability tests using photoelasticity and associated techniques, discussing computer methods, materials research, etc 09 p1479 A69-22734

ATS satellite distorted photographs conversion into normal and Mercator projections, using computer programs 10 p1689 A69-22945

Waveguide Y circulator electrodynamic parameters by design algorithm and computer programs 10 p1661 A69-23108

Book on RCA computer applications covering computer programming, differential equations and basic time sharing, circuit analysis, microwave solid state power sources, etc 10 p1659 A69-23140

SNODE /spectra numerical ordinary differential equations/ computer program for solving differential equations and integration with basic time sharing system 10 p1659 A69-23142

Computer implemented analysis of aeroelastic stability for elapsed data reduction time, discussing frequency modes and digital filters 10 p1634 A69-23274

Computer controlled data acquisition and control system /DACS/ for wind tunnel applications, describing system and programs 10 p1673 A69-23286

Computer program for onboard medical checkups of spacecraft crews during extended space flights, discussing tests and intervals 10 p1649 A69-23505

Integration routines performance used in dynamic systems simulation by digital programs, comparing speed, accuracy and convenience 10 p1661 A69-23854

Flux density of quasars 3C 270 and 3C 278 at 40 cm determined by digital computer with point source program 11 p1954 A69-24383

Real time electronically scanned radar control using digital computer with input and output conversion for information handling, noting interface equipment 11 p1834 A69-24544

Gaussian summation for ion implantation profile control in semiconductors, describing computer program selecting optimum energies to fit predetermined profiles 11 p1857 A69-24546

Computer program for analysis of linear microwave multipoint circuit by means scattering matrix equivalent 11 p1858 A69-24572

Computer program for processing actinometric data transmitted from Cosmos 122 satellite 11 p1913 A69-24831

Computer program for interpreting IR cloud pictures from Cosmos 122 satellite based on potential function method

11 p1884 A69-24833

Computer program for electron and proton fluxes impinging on spacecraft, performing computation for Van Allen belts and solar flares

11 p1949 A69-24863

Physical data representation by approximation formulas for computer processing, considering polynomials, rational and spline functions and error curves

11 p1842 A69-24904

Constraint theory for analysis of mathematical models to alleviate software problems associated with simulation of complex large scale systems

11 p1858 A69-24936

Computer controlled flight line tester performing automatic real time testing of aircraft avionics systems on flight line or hanger

11 p1864 A69-25060

Computer controlled testing of commercial aircraft avionics systems for automatic, semiautomatic and manual operation to perform repair and calibration tasks

11 p1864 A69-25061

Hardware and software as single entity in small scale programs, describing English language oriented program code of Controller /Programmer/ Evaluator

11 p1864 A69-25062

Electronic module testing with integrated hardware/software system, noting module test console and manual capabilities

11 p1864 A69-25065

Hardware-software interface defined for design of computer controlled test system, discussing criteria for designing economical systems

11 p1842 A69-25071

Airborne computer controlled data acquisition system for real time fault detection and isolation in avionics

11 p1843 A69-25082

Monograph on computer aided air traffic control systems design, discussing air navigation, man-machine relations, equipment requirements, programs, plan position color display, etc

11 p1914 A69-25085

Least squares iterative program, deriving orbits for O binaries HD 93403 and HD 135240

11 p1963 A69-25257

SNR measurement with time interval counter and computer, discussing accuracy

11 p1839 A69-25299

Carrier to interference ratio /CIR/ between desired path and every other path within predetermined range in microwave system calculated by computer

11 p1840 A69-25312

Computer techniques application to radio engineering functions related to system performance, layout engineering, frequency coordination and administration, discussing decision parameters interrelationship

11 p1840 A69-25313

Dynamic unified structural analysis method in computer program, calculating stiffness matrix to obtain natural frequencies and mode shapes

11 p1987 A69-25367

Complex structure least weight optimization for specific frequency by computerized modification of existing member cross sectional properties

11 p1989 A69-25494

Digital program containing Eulerian formalism for multiple interconnected rigid members applied to gravity gradient stabilized satellite with flexible booms

11 p1989 A69-25502

Integrated computerized reliability monitoring program for detecting aircraft systems and components performance trends and optimizing cost, utility and response

12 p2055 A69-25972

Digital computer-aided reliability engineering methods for electronic equipment design and analysis

12 p2037 A69-25973

Time optimal controls for multivariable linear systems by computer programming of iterative calculations /Neustadt and fast convergence methods/

12 p2050 A69-26090

Computer program for model stellar envelopes of red supergiants with extended atmospheres

12 p2156 A69-26218

Computer program solving for station coordinates and dynamical parameters at Smithsonian Astrophysical Observatory from optical data, laser range and range rate

12 p2068 A69-26428

Computer programs for linear systems fault isolation, discussing technique theory and limitations

12 p2040 A69-26568

Linear two dimensional partial differential equations solved by Laplace transforms on analog computer

12 p2123 A69-26717

Nonlinear structure undergoing arbitrary load history including temperature variations solved by computerized force and subordinated step procedure

12 p2185 A69-26823

Computer program for worldwide analysis of mean hourly values of field components into constituent fields and associated ionospheric current systems

12 p2074 A69-26958

Self adjusting digital computer method for two dimensional gravitational anomalies

12 p2076 A69-27088

Computer determination of symbolic state equations for nonlinear circuits using FORTRAN notation

12 p2055 A69-27097

Computer method for solution of Banachiewicz graph analytic equivalent for parabolic orbits determination, noting geocentric distances variation

13 p2336 A69-27448

Computer program for obtaining information from stationary time series using Chree method of superposed epochs for processing unlimited data and epochs

13 p2225 A69-27617

Soviet book on automated information retrieval systems covering computer languages, search in complex ordered codes, translation from Russian into computer language, etc

13 p2225 A69-27933

Regional boundaries in control-parameter space constructed by computer algorithm, involving parameter vibration direction changes in parameter plane

13 p2225 A69-27967

Laminar boundary layer studies by finite difference computer program for Mach numbers up to 15

13 p2248 A69-28173

Two dimensional flow through nonuniform gauze by computerized analysis based on linearized theory

13 p2248 A69-28174

Thermal behavior of space vehicle window systems predicted by mathematical analysis and computer methods for heat transfer through glass

13 p2378 A69-28215

Matrix eigenvalues for nonlinear simultaneous algebraic equations, discussing computer program for numerical integration

13 p2289 A69-28227

Computer program for compressible fluid flows with space and time dependent variables, discussing hypervelocity impact

13 p2365 A69-28286

Meteorological problems in Italy analyzed by digital computer program through numerical integration of atmospheric models to provide weather forecasts

13 p2295 A69-28651

Computer program for calculating density distribution of deviation of F 2 layer critical frequency from median value

13 p2258 A69-28723

Computerized calculation of likelihood coefficients for identifying steady random processes against background noise, minimizing mean risk of erroneous solution

14 p2410 A69-28818

Automatic search-free optimization by sensitivity functions, deriving algorithms by Q factor and discrepancy extrapolation

14 p2425 A69-28823

COHORT-II Monte Carlo computer program written in Fortran IV to model radiation shielding problems

14 p2417 A69-29004

Complex structures lumped weight and inertia parameters automatic computation based on finite weight element method, using SCOWL computer program

14 p2533 A69-29025

Computer program for STV-F9 satellite communication parameters, using ELDO forecasting values as input data

14 p2530 A69-29689

Quasi-uniform pseudorandom numbers program transmitter statistical characteristics suited for solving problems by Monte Carlo method

15 p2572 A69-30336

Computer codes describing nuclear weapons effects associated with X ray transport, neutron transport and X ray interactions with material, fireball, blast environments, etc

15 p2652 A69-30381

Polygonal approximation to functional equation solution by using search algorithms, listing FORTRAN IV programs

15 p2644 A69-30424

FORTRAN program for calculation of magnitude and phase of digital filter transfer functions and power spectra of periodic waveforms

15 p2567 A69-30612

Spacecraft illuminance by reflected solar radiation calculated by computer method

15 p2691 A69-30746

Nova outburst dynamics investigation by time dependent hydrodynamics computer program including energy transport by radiation and convection

15 p2692 A69-30769

Transistors and IC reliability for memory control evaluated by Concerto subprograms

15 p2627 A69-30842

Microslip between concentrated contacts and design charts for maximum pressure, closing-in of contacting bodies and optimized shapes, giving computer programs

15 p2629 A69-30903

Plasma instabilities due to anisotropic velocity distributions computer analyzed to study nonlinear phenomena and validity limits of linear theory

15 p2661 A69-30920

Complex systems reliability, describing uses of computer programs in analysis of circuit design, component failure modes and faults due to drifts

15 p2572 A69-31042

Fast Fourier transform algorithm for low storage capacity computer programs

15 p2572 A69-31092

Literal algebra /SPASM/ computer program critical verification of Kozai short period lunar perturbations, discussing errors

15 p2699 A69-31381

Computerized finite element waveguide analysis for determining propagating modes and cut-off frequencies

16 p2760 A69-31942

Aircraft noise assessment, discussing computer programmed formula, noise contours and duration calculation, with appendices presenting engine noise characteristics, air and ground attenuation, etc

16 p2735 A69-32021

Multistage rocket trajectories optimized by second order numerical technique and digital computer program, considering coasting, vacuum flight and transition times

16 p2857 A69-32154

Computer programs for space engineering analytical and scientific computation using digital computers

16 p2756 A69-32555

Surface state density determination as function of surface potential in MIS capacitors, discussing MIS capacitance method theory and computer programs

16 p2827 A69-32556

Prebreakdown currents measurement in H and N for deducing ionization coefficients via Townsend and Lucas equations respectively, noting validity by digital computer technique

16 p2815 A69-32574

Statistical analysis of Brewer-Mast electrochemical soundings of vertical ozone distribution for developing computer programs of climatological behavior

16 p2786 A69-32632

FORTRAN computer program for quality control and calculation of total ozone measurements and lamp tests for Dobson ozone spectrophotometer

16 p2787 A69-32644

Saturn 5 S-IC stage propulsion performance, using engine parameters from telemetry rather than accelerometer data, analyzed by iterative techniques and computer program

16 p2839 A69-32672

Turbulent heat and mass diffusion in catalytic reactors for hydrazine decomposition, developing computer program to calculate temperature and reactant concentration distributions

16 p2846 A69-32768

Digital computer program for physiological measurements, outlining interpolation of mathematical functions describing signals time variations

17 p2912 A69-32941

Equipment- and program-type methods for solving automatic digital control systems synthesis problems, evaluating efficiency based on accuracy

17 p2933 A69-33120

Computer calculation of kinetic characteristics of normal flame propagation during gas combustion, constructing physical model and differential equation system

17 p3069 A69-33138

Numerical integration of Eole satellite attitude equations compared with results obtained by analog simulation or hybrid computation

17 p3048 A69-33232

Transient thermal analysis of space radiators excluding finite difference equations, noting computer adaptability and time saving
[AIAA PAPER 69-615]

17 p3070 A69-33261

Thermal contact resistance measurement at various ambient pressures compared with theoretical predictions with each parameter analyzed over interface by computer program
[AIAA PAPER 69-629]

17 p3073 A69-33299

Flow field of two dimensional nozzle exhausting to vacuum, describing computer program based on BGK equation and plotting exhaust region density, temperature and velocity
[AIAA PAPER 69-658]

17 p2893 A69-33490

Life cycle maintenance costs reduction in aerospace industry by computers, describing on-line and off-line test systems

17 p2979 A69-33649

Direct lift controller design for aircraft approach and landing by computer program based on Kalman linear state regulator theory

17 p2902 A69-34027

Patch panel programmed DDA computer having MHz iteration rate and 35 bit usable word length, discussing system design and demonstration model

17 p2934 A69-34073

Software remechanization of conventional hyperbolic LORAN for two passive closed loop one way direct range measurements to individual LORAN transmitters

17 p3002 A69-34079

Pressurized cylindrical shell creep analysis by elastic procedure extension using computer program

17 p3067 A69-34211

Saturn software configuration accounting and reporting system for document change and information retrieval

18 p3105 A69-34269

Book on operational meteorological information processing by computers, discussing synoptic and aerological data, automatic data processing in operational numerical forecasting, etc

18 p3105 A69-34332

Reliability engineering methods for software programs with emphasis on real time computation, describing SSD Exhibit 61-47 documentation

18 p3105 A69-34524

Computer program and component part models for nonlinear DC circuit simulation at various temperatures

18 p3108 A69-34525

Computer graphics engineering applications in line drawing displays for industry, including design programs and color TV flight simulation

18 p3106 A69-34659

Quadratic programming method for equations of elastic perfectly plastic solid applied to stress distribution in plate torsion and bending

18 p3218 A69-34661

Finite element analysis of nonlinear elastoplastic material-geometric behavior problems, describing computer program and incremental stiffness matrices

18 p3219 A69-34664

Computer quadratic method of evaluating ray propagation data for estimating inhomogeneous media properties

18 p3172 A69-34667

Time sharing remote computer station allowing on-spot data processing and output answers, formulating best-fit equation representing statistical data
[SAWE PAPER 799]

18 p3107 A69-34860

Solid propellant rocket motor predictive design by correlating performance and weight statistics via computer program
[SAWE PAPER 775]

18 p3184 A69-34873

Computer program for weight and center of gravity tolerance data for assembly aerospace vehicle
[SAWE PAPER 734]

18 p3221 A69-34892

Computer aided design analysis program to provide weight and sizing data for entry spacecraft
[SAWE PAPER 797]

18 p3208 A69-34903

Computer programs determining gaseous properties and aerodynamic characteristics for missiles, reentry vehicles and spacecraft at angles of attack

18 p3107 A69-35068

Multistage systems high reliability design, describing branch and bound computer method for optimal resource allocation of redundant components

18 p3148 A69-35081

Man-computer speech communication, discussing model and aspects of acoustics, phonetics, linguistics, language training, physiology, psychology, bionics, etc
18 p3107 A69-35099

Computer program to predict spectra from electronic transitions of diatomic molecules and atoms, noting line intensity distribution by Voigt profile

18 p3177 A69-35239

Modified Newton-Raphson methods for preliminary orbit determination, showing fast convergence and short computation times

19 p3397 A69-35613

Takeoff and landing analysis digital computer program /TOLA/ developed by Air Force Flight Dynamics Laboratory for quantitative performance analysis
[AIAA PAPER 69-810]

19 p3289 A69-35630

Digitized video cloud picture data from ESSA satellite, discussing mesoscale archive and computer products including time averages and composites

19 p3279 A69-35810

Variational method for computer calculation of supercritical bending of thermoelastic uniformly loaded circular plates, determining Ritz parameter influence on accuracy

19 p3434 A69-35829

Rapid Targeting Procedures computer program for optimized orbital payload and associated launch vehicle targeting data with one submittal and minimum user intervention
[AAS PAPER 68-148]

19 p3402 A69-35951

Impulsive orbit transfer optimization using accelerated gradient program based on Newtonian algorithm for digital computer method

19 p3402 A69-35956

Computer program using system simulation and Monte Carlo techniques to assess turbojet engine compressor disk reliability, discussing maintenance policy and engine design effects

19 p3394 A69-36042

Atmospheric slant path molecular absorption and emission from band model methods, discussing computer program prediction capabilities

19 p3375 A69-36052

Computer program designing multiplex taper to minimize FM/FM telemetry system carrier threshold SNR, examining noise behavior of multiplex system stages for system performance

19 p3273 A69-36275

Balmer and Ca II /K/ line profiles computed by program based on model atmospheres, comparing computed and observed data for F stars

19 p3426 A69-36578

Finite element method in stress analysis for axisymmetric rotors design, describing computer program and applications

19 p3445 A69-36826

Computer iteration accelerator based on modified Aitken process, noting application to vectors

20 p3498 A69-36950

Digital computers standard programs for astronomical problems

20 p3596 A69-37317

Worldwide cloud cover simulation procedure providing data for computer simulation of earth oriented space missions, describing computer program using Monte Carlo mission simulation

20 p3573 A69-38120

Computer solutions for nonlinear partial differential equations governing compressible flow patterns with shocks, using Lagrange coordinates

20 p3569 A69-38212

Three dimensional X ray pictures of flaws shape and location in various materials

20 p3551 A69-38311

Mathematical models and solution techniques for calculating optimal elastoplastic structures by computer, discussing methods for displacements preceding plastic failure

21 p3831 A69-38414

Computer experiment on 9000 particle plasma to test temporal echo theoretical prediction

21 p3777 A69-38713

Shooting method difficulties in boundary value problem numerical solutions using computer programs to integrate differential equations

21 p3755 A69-38753

Digital computers used in error calculation in calibration curves of turboengines and other pneumatic devices

21 p3724 A69-39100

Numerical procedure for structural systems analysis, discussing computer application to hydrodynamic, electric, magnetic, thermodynamic, elastostatic and elastodynamic problems
[AIAA PAPER 67-955]

21 p3839 A69-39216

Computer programs for design data, examining program complexity, reliability and availability, design data sheets, etc

21 p3732 A69-39304

Computerized aircraft structural analysis system, adopting finite element technique /direct stiffness method/ based on COSMOS system

21 p3842 A69-39307

Stress analysis of thin axisymmetric shells by plane frame analysis program, noting stiffness matrix for conical shell element

21 p3843 A69-39312

Finite element relaxation method for computing stress distribution in thin walled structure, considering computer program, storage and solving time

21 p3843 A69-39313

Computer program for eccentric geocentric satellite orbits evolution, discussing atmospheric drag, earth oblateness and solar radiation effects
[AIAA PAPER 69-928]

21 p3808 A69-39357

Spacecraft control systems with computer command redundant jets for linear and angular pulses, relating configuration design to level-of-redundancy and task dimension
[AIAA PAPER 69-845]

21 p3822 A69-39375

Computer program /TACTICS/ for simulating three vehicles simultaneous motion in space, considering interceptor-target guidance and intercept trajectories
[AIAA PAPER 69-890]

21 p3678 A69-39415

Computer controlled automatic radar for survey through 360 degrees in azimuth and zero to 60 degrees in elevation

21 p3677 A69-39566

Computer routines for approximations of thermochemical properties of gas mixtures, using JANAF /Joined Army Navy Air Force/ tables of combustion systems

21 p3670 A69-39591

Computer program for generation of test patterns for multiterminal devices and networks

21 p3679 A69-39604

Network analysis for systems application program /NASAP/ in FORTRAN for batch and on-line analysis of electronic circuits

21 p3856 A69-39662

Computer program for satellite APT geographical grid production, discussing latitude-longitude intersections transformation to Cartesian coordinates

21 p3718 A69-39749

Documentation aspects of computer programs use in civil engineering, describing maintenance, users and operators manuals

22 p3904 A69-40140

Digital computer program for determining alveolar and capillary blood gas compositions corresponding to ventilation-perfusion values, considering dissolved oxygen and inert gas exchange

22 p3875 A69-40230

Mission analysis and trajectory simulation /MATTS/ program, discussing computer controls, modular design, integration evaluation
[AIAA PAPER 69-939]

22 p3904 A69-40322

Computerized algorithm facilitating automatic synthesis of time invariant linear compensation for highly complex multiloop control systems
[AIAA PAPER 69-941]

22 p3917 A69-40324

Automated programmed instruction /API/ for training backup interceptor control personnel to conduct air defense operations
[AIAA PAPER 69-956]

22 p3905 A69-40338

NASA computer language CLASP coordinated with evolution of SPL /Space Programming Language/ for aeronautics and space programming
[AIAA PAPER 69-957]

22 p3905 A69-40339

Machine independent telemetry oriented language /MITOL/ to develop computer programs for real time and postflight telemetry data processing

22 p3905 A69-40340

System safety in aerospace software including ground checkout software, command and control software and onboard programs
[AIAA PAPER 69-962]

22 p3905 A69-40343

Fail-soft operation in array processor with cellular redundancy, discussing cellular autonomy, long life and ultracellularity
[AIAA PAPER 69-965]

22 p3906 A69-40346

Self testing and repairing /STAR/ aerospace computer for automatic maintenance of unmanned interplanetary spacecraft
[AIAA PAPER 69-966]

22 p3906 A69-40347

Computerized simulation for performance evaluation of System/4 Pi-EP multiprocessor for use in aerospace vehicle

22 p3907 A69-40353

Software support package for aerospace digital computer emulation, consisting of symbolic assembly program and interpretive simulator program and subprogram [AIAA PAPER 69-974] 22 p3907 A69-40354

Computerized solid rocket motor nozzle design with computer program providing weight, envelope and performance values for vehicle optimization studies [AIAA PAPER 69-975] 22 p3999 A69-40355

Support software costs reduction for launch vehicle systems by implementing computer techniques to provide requisite data [AIAA PAPER 69-978] 22 p4052 A69-40358

Computer optimization of spacecraft optical coatings for temperature control, using finite element analysis and matrix inversion [AIAA PAPER 69-979] 22 p4050 A69-40359

Computer system functional requirements for autonomous Martian surface roving vehicle, emphasizing vehicle motion control system [AIAA PAPER 69-980] 22 p3907 A69-40360

Software/hardware interface testing of real time system, including possible improvements to computer program management flow 22 p3908 A69-40364

Digital computer system for navigation, landing, fire control, monitoring and checkout aboard Saab 37 Viggen aircraft handling attack, reconnaissance and fighter missions [AIAA PAPER 69-985] 22 p3908 A69-40365

Horizontal Situation Display /HSD/ map computer mechanization transforming earth location to X, Y coordinates for Lambert conformal projection [AIAA PAPER 69-987] 22 p3908 A69-40367

Spherical lunar coordinates for arbitrary moment of time calculated by digital computer using Brown lunar motion theory 22 p4024 A69-40611

Meteorological data real time processing for automatic weather analysis and prognosis, program used and computer output charts 22 p3977 A69-40732

Flight training using digital simulators, including maneuver analysis for TWA 707 program 22 p3928 A69-41137

Frequency response of control systems analyzed by digital computer using operational arrays, noting extensions to time response and root locus computation 22 p3909 A69-41255

Stored program decommutation techniques involving small core storage elements insertion into data path between decommutator equipment and computer 23 p4133 A69-41749

Digital computer program for determining flight vehicle telemetry antenna performance from ground test readings 23 p4133 A69-41754

Flexible format generator for manned spacecraft data management system designed with memory for data sampling formats, emphasizing software counters and power strobing 23 p4133 A69-41762

Computer program for natural oscillations of plates and shells, deriving differential equations of motion for thin elastic shell by variational method 23 p4230 A69-42004

NASA structural analysis /NASTRAN/ program applied to large radio telescopes, discussing static and dynamic analysis, problem formulation, finite element method, etc 23 p4232 A69-42145

DENDRAL program used to construct all possible acyclic structural isomers of C, H, N and O 23 p4114 A69-42214

Space power systems analysis, using computer program to correlate systems characteristics with mission parameters for automated satellite repair vehicle and space stations 23 p4068 A69-42240

Pu-238 isotope organic Rankine cycle system analyzed for one year manned space station, using modified H-521 Space Power computer program 23 p4188 A69-42264

Book on matrix-computer methods in engineering covering matrix algebra and calculus, computer programming, Fourier transforms, etc 23 p4234 A69-42421

N-terminal parent networks with symmetry constraints derived for nonredundant one port configurations through combinatorial functions test patterns, using computer algorithm 23 p4134 A69-42524

Automatic analysis and classification of images stored on 35-mm film using CRT flying spot scanner with computer control and memory 24 p4286 A69-42744

Adaptive cost equations in computer programs supporting launch vehicle long range planning, based on launch vehicle anticipated usage [AAS PAPER 69-164] 24 p4392 A69-42815

Optimal control computing method applied to minimal time flight profile optimization 24 p4383 A69-42954

Computerized spectral analysis of vibrational frequency due to elastic waves in isotropic hollow spherical shells [ASME PAPER 69-APMW-8] 24 p4402 A69-43106

General purpose computer program for synthesis of multivariable systems decoupled by state feedback 24 p4294 A69-43307

Rectangular dielectric waveguide propagation modes, describing computer analysis based on electromagnetic field expansion in circular harmonics series terms 24 p4288 A69-43330

Electronic scanning and correlation techniques for terrain sensing required in automatic stereoperception 24 p4316 A69-43566

Computer program determination of barreling effect on strength of ring and stringer stiffened shells designed to support axial compression loads 24 p4405 A69-43671

Flux density of quasars 3C 270 and 3C 278 at 40 cm determined by digital computer with point source program 24 p4389 A69-43773

**COMPUTER SIMULATION
U COMPUTERIZED SIMULATION**

COMPUTER STORAGE DEVICES

NT ACCUMULATORS [COMPUTERS]
NT CORE STORAGE
NT DELAY LINES [COMPUTER STORAGE]
NT SHIFT REGISTERS

MOSFET drivers for low current memory fabricated in 64 unit monolithic strips, discussing driver performance data 01 p0039 A69-10172

Piecewise analysis of large structures, showing incompatibility of minimum computer storage and minimum number of multiplication requirements through bandwidth schemes 01 p0169 A69-10637

Gradual memory system for noise reduction in adaptive control system 02 p0212 A69-12606

Statistical linearization of nonlinear memory type elements with stationary Gaussian input, applying Wiener method to one class of problems 03 p0409 A69-13005

Holographic laser type memory with bulk storage capacity and short readout time 03 p0428 A69-13116

Design and principles of operation of SHF electron-optical multiply stable storage elements with dynamic attributes of states 03 p0441 A69-13982

ASTRE programming language applicability to maximum memory information treatment in aerial navigation 03 p0401 A69-14180

Ferrite core temporary storage unit with 500 nsec cycle time 04 p0564 A69-15222

Large scale integration and batch-fabricated processing of logic and storage elements for fourth generation computer, discussing partitioning design 04 p0567 A69-15355

Semiconductor memory units, considering bipolar, p channel MOS and complementary MOS chip technologies 04 p0569 A69-15362

Chronological development and future trends in high speed logic and memory hardware technology and implementation 04 p0569 A69-15366

Reliable information storage in memories designed from unreliable components 04 p0569 A69-15455

Stored program computer for small scientific spacecraft, noting program and data memory capacities 04 p0569 A69-15472

Semiconductor standard memory circuits, discussing arrays and density 06 p0894 A69-17202

Metal oxide semiconductor random-access memories, discussing large scale integration and static and dynamic circuits chip size 06 p0894 A69-17203

Multichannel pulse height analyzer with memory, small size and low power consumption for application to satellites [IEEE PAPER 3C-6] 07 p1135 A69-19200

Flip-flops built with complementary symmetry MOS, discussing power, noise and load stability due to n and p channel series transistors 07 p1113 A69-19766

Trigonometric and arithmetic functions for reducing size of MOS read-only memories to reduce required bit count, discussing cost, structure and applications 07 p1089 A69-19778

Gunn effect memory loop in pulse diodes consisting of two Gunn diodes connected in series 08 p1279 A69-19912

Automatic plasma needle arc fusion welding for computer memory arrays and miniature electronic devices 09 p1511 A69-22355

Gunn diode operating to VHF range with coaxial line to generate rectangular waves and to function as memory element 09 p1467 A69-22587

FET memory element charge storage two layer model for thin film dielectrics noting charge/discharge times 10 p1742 A69-22947

Associative holographic memories, discussing recall systems, logic circuits, etc 10 p1697 A69-23868

Large capacity holographic memory design based on page organization concept, considering lens parameters and hologram size 11 p1886 A69-25041

Dynamic multistable analog integrator capable of prolonged retention of integration, giving differential equation of device 13 p2224 A69-27427

Square matrices decomposition into orthogonal and triangular matrices products for computer storage applications 13 p2290 A69-28485

Ferrite core storages characteristics with rectangular hysteresis loop for digital control units, discussing optimal selection method 14 p2418 A69-29145

Fast Fourier transform algorithm for low storage capacity computer programs 15 p2572 A69-31092

NDC-1070 solid state computer design featuring TTL, MSI and hybrid circuits, offering memory capacity flexibility and rapid maintainability 17 p2933 A69-34060

Integrated nonvolatile read-write memory with addressing using variable threshold field effect transistor including cell operation, channel shielding and circuit 17 p2942 A69-34120

Airborne digital computers techniques in avionics stressing memory design, packaging, reliability and maintainability 18 p3106 A69-34846

Memory matrices sensitivity to laser beams with various emission power densities, considering matrices of thin metal layers on transparent base 19 p3335 A69-36198

Analog device to compute running ten minute average and store latest ten minute peak of unipolar data input for wind speed sensors 19 p3312 A69-36278

Computer memory with digit wire magnetic circuit /torus/, discussing capacity, access and output 20 p3503 A69-37402

Wire type memory model for satellite onboard computers, discussing nondestructive readout, power requirements, marginal temperatures, material and volume 20 p3503 A69-37403

Computer memory reduction through Fortran higher level language, discussing tradeoff between costs saved and additional logic hardware [AIAA PAPER 69-963] 22 p3905 A69-40344

Photochromic film behavior under high power argon ion laser excitation studied for display and computer memory applications, using excitation model 23 p4173 A69-41629

Flexible format generator for manned spacecraft data management system designed with memory for data sampling formats, emphasizing software counters and power strobing 23 p4133 A69-41762

Memory gradient algorithm for reducing computing time by minimizing quadratic function of unconstrained variables compared with Fletcher-Reeves algorithm
24 p4340 A69-42957

COMPUTER SYSTEMS PROGRAMS

NT ASSEMBLER ROUTINES

NT INPUT/OUTPUT ROUTINES

NT OPERATING SYSTEMS [COMPUTERS]

Dynamic Automated Reporting Technique /DART/ system for on-line conversational information storage and retrieval for use in large programs management
18 p3107 A69-35095

Closed Loop Ionogram Processor /CLIP/ on-line computer processing system for ionospheric data [AIAA PAPER 69-952]
22 p3904 A69-40334

Mariner Mars 1969 spacecraft real time test support system and recorded data analysis including routing to printers, CRT displays and incremental plotters [AIAA PAPER 69-982]
22 p3907 A69-40362

Digital computer systems for automating machine parts design main metal cutting operations, emphasizing optimal instrument usage, reliability, digital algorithm language and economics
23 p4169 A69-41952

COMPUTERIZED DESIGN

Nonlinear programming for optimal circuits design, discussing search method of ACOP /Automatic Circuit Optimization Program/
01 p0035 A69-10067

Microwave transistor amplifier computerized design, discussing wide bandwidth and flat in-band gain response optimization on high dielectric substrates
01 p0040 A69-10194

Algorithms for linear system of first order differential equations, emphasizing equations associated with computer oriented circuit design
01 p0036 A69-10708

Computer analysis of linear active nontime varying circuits by two graph topological approach based on Binet-Cauchy theorem
01 p0037 A69-11349

Computer stress analysis may result in automated designs, emphasizing finite element technique
02 p0341 A69-12153

Exact expressions for rates of change of eigenvalues and eigenvectors to facilitate computerized design of complex structures
02 p0347 A69-12532

Breadboard chip for use in computer aided design and analysis of integrated circuits, describing components and application to differential amplifiers
03 p0402 A69-13008

Hypersonic lifting body optimization under single and combined constraints of volumetric efficiency, heating and skin friction, using numerical search routine [AIAA PAPER 68-1157]
03 p0362 A69-13557

Computer program for electromagnetic wave metal shielding evaluation
03 p0398 A69-13901

Damping factor automatic determination by use of second derivatives of residuals for damped least squares method of optical design
04 p0630 A69-14295

Collection of papers on engineering applications of digital computers, examining programming, numerical methods and design and simulation problems
04 p0563 A69-14514

Computer programs for engineering analysis, design and simulation, presenting point selection program for curve plotting
04 p0563 A69-14516

Boeing/Vertol Hybrid Facility for solving engineering problems in V/STOL design and research
04 p0567 A69-15352

Device and logic/system designers and design aids integration area using MOS arrays
04 p0568 A69-15356

Simulation design of multiprocessing system to provide air traffic control capabilities through use of real time operations
04 p0629 A69-15365

Multilevel modeling structure for interactive computer graphic design, discussing conversational display manipulation program and interconnection with analysis program
05 p0724 A69-16381

Three dimensional computer graphic modeling program, discussing SIGHT and LEGER programs
05 p0724 A69-16383

Program to study interactive graphic display console systems use for solving mechanical design problems involving plate cam and follower mechanisms
05 p0724 A69-16384

Integrated circuit interconnection patterns computerized design, discussing automatic laser mask-making control
06 p0931 A69-17199

Computer tape controlled pulsed externally excited gas laser mask making machine with micropositioning coordinate table for integrated circuit fabrication
06 p0931 A69-17200

Aircraft aerodynamic characteristics determination from numerical computer solution of supersonic gas flow past blunt body with broken generatrix
06 p0859 A69-17582

Control system analysis and synthesis by means of generalized root-locus method on digital computer
07 p1114 A69-18291

Remote terminal computer for rotary-wing vehicles design, discussing programming language, engineer-computer interface and applications
07 p1052 A69-18868

Computer aided circuit design by singular imbedding, beginning with prespecified topology and undetermined elements
07 p1115 A69-19148

Book on computer calculation of structures covering programming, computer language, mathematical aspects of structural analysis, matrix computation, etc
07 p1233 A69-19349

Computer graphics and manufacturing, discussing man computer system for transformation of blueprint to numerically controlled machine tape with no time delay
07 p1089 A69-19741

Finding and representing graphically intersections of double curvature surfaces with planes within scope of digital computer design
08 p1278 A69-19921

Computer aided design methods for electronics and logic systems, noting linear circuits and one dimensional transistors
08 p1278 A69-19970

Computer aided design methods for electronic and mechanical materials, discussing basic concepts and problems
08 p1278 A69-19971

Computer aided design program for testing equivalent circuits of bipolar transistors in static regime under various polarization conditions
08 p1280 A69-19972

Computer aided automatic drawing of printed circuits, including design and manufacture of films for engraving
08 p1296 A69-19979

Structural iterative design convergence to minimum weight proved by dual linear programming, discussing global convergence and convergence rate
08 p1413 A69-20351

Iterative Chebyshev approximation for computerized network design by linearizing original nonlinear programming
08 p1299 A69-21170

Filter design using transformed frequency variables suitable for computer programs
08 p1300 A69-21172

Equations adaptable to computer for RLC circuits containing linear and nonlinear n-terminal networks derived by nodal method
09 p1472 A69-21779

Computer aided circuit design programs combining technical engineering skills with building block programs
10 p1659 A69-23141

Pseudodynamic programming for optimizing design of correlator supersynthesis antenna arrays used for radio source tracking
10 p1663 A69-23420

Graphic electronic visualization equipment for computerized design
10 p1660 A69-23795

Digital design techniques for electronic equipment including measuring instruments, generators, synthesizers, etc
10 p1664 A69-23796

Computerized design techniques for microwave components using diodes, detailing X band parametric amplifier
10 p1661 A69-23874

Computer simulation application to electronic systems, discussing design, performance optimization, implementation and environmental effects
11 p1843 A69-25319

Computer aided design of linear multivariable control systems applied to VTOL aircraft stability augmentation
12 p2013 A69-26068

Computerized design of optimal direct lift controller for aircraft and aerodynamic surfaces, using Kalman linear state regulator theory
12 p2014 A69-26765

Computer aided design - Conference, University of Southampton, England, April 1969
12 p2034 A69-27095

Computer simulation program for design and evaluation of digital Doppler processor, analyzing performance limitation due to quantization and white noise
12 p2035 A69-27096

Computer driven graphical techniques for aerospace design and analysis [ASME PAPER 69-DE-27]
14 p2454 A69-28854

Computerized design of inhomogeneous transformers with cascaded quarter wave sections
14 p2423 A69-29762

Computer aided design /CAD/ of component selection for circuit optimization applied to circuit performance and sensitivity calculations
15 p2628 A69-30849

Microwave strip transmission line, discussing evolutionary improvements, computerized design, materials, semiconductors, packaging, reliability, etc
15 p2721 A69-31074

Analog computer for design of control systems used in nonnuclear testing of nuclear rocket engine components and subsystems
15 p2589 A69-31289

Automation of wiring diagrams and printed circuit conductor patterns by computerization
15 p2632 A69-31520

Optical computerized design procedure for Ritchey-Chretien corrector, combining ray deviation error function and third order aberration design techniques
17 p2972 A69-33087

Turbine blade cooling emphasizing economics, service life and computerized calculations
17 p3020 A69-33352

Direct lift controller design for aircraft approach and landing by computer program based on Kalman linear state regulator theory
17 p2902 A69-34027

Aircraft generator weight in relation to system performance requirements, using digital computer to study generator design
17 p2904 A69-34087

Computer aided design of machines with custom LSI arrays, describing error detection procedures and MOS logic circuits
17 p2942 A69-34121

Computerized Markov effectiveness models of repairable and nonrepairable complex aerospace systems
18 p3195 A69-34527

Computerized analysis and design of nonlinear servomechanisms, using describing functions technique
18 p3110 A69-34672

Algorithm for minimum weight structures automated design, coupling strain energy criteria with linear interpolation search technique to cover stress and displacement constraints [SAWE PAPER 798]
18 p3219 A69-34861

Computer-aided design application to mass property engineering, describing repetitive mathematics functions, design information retrieval and display, automated synthesis, etc [SAWE PAPER 795]
18 p3107 A69-34863

Computer aided design analysis program to provide weight and sizing data for entry spacecraft [SAWE PAPER 797]
18 p3208 A69-34903

Finite element techniques of structural analysis for missile and space structures, including Apollo computerized analysis and structural optimization
19 p3438 A69-36324

Information theory, circuit optimization and computer aided design in radio wave information transmission
19 p3286 A69-36432

Computer-algorithm elements required for engineering design and invention problems including design requirements, selection of spaces for variables using computerized heuristics, etc
19 p3280 A69-36666

Computerized optimization and testing of aerospace vehicle designs, describing simulation techniques, algorithm and computer selection, display devices, etc
20 p3498 A69-37292

Computerized design parameters for realizable over-driven bimode varactor frequency doubler based on charge-voltage relationship at break point
20 p3505 A69-37299

Aerodynamic optimal shaping by multivariable search technique, comparing results with variational solutions for airfoil profiles
20 p3459 A69-37527

Computer programs for design data, examining program complexity, reliability and availability, design data sheets, etc
21 p3732 A69-39304

Computerized optimization of flexible booster autopilot design, considering criteria for stability margins, closed loop roots and structural load relief
[AIAA PAPER 69-875] 21 p3823 A69-39401

Computer program for generation of test patterns for multiterminal devices and networks
21 p3679 A69-39604

Handbook of electronic packaging including rigid and flexible printed wiring, soldering and mechanical interconnections, bonding, computer and military applications, etc
22 p3911 A69-40046

Computerized solid rocket motor nozzle design with computer program providing weight, envelope and performance values for vehicle optimization studies
[AIAA PAPER 69-975] 22 p3999 A69-40355

Automated design system producing wire format data for cabling avionics subsystems of light attack aircraft
[AIAA PAPER 69-976] 22 p3912 A69-40356

Computerized crewstation geometry evaluation and design optimization using 23-pin-joint man-model
[AIAA PAPER 69-977] 22 p3892 A69-40357

Germanium microwave backward diodes optimum design and performance prediction through computer calculation for important parameters
22 p3916 A69-41224

Digital computer systems for automating machine parts design main metal cutting operations, emphasizing optimal instrument usage, reliability, digital algorithm language and economics
23 p4169 A69-41952

Computerized evaluation of elastic deformations of 100 m parabolic reflector designs for Max Planck Institute radio telescope, outlining supports and dish structure
23 p4148 A69-42122

Large paraboloidal reflector antenna computerized structural design, detailing framing, steering control, support structure, etc
23 p4231 A69-42135

Integrated civil engineering system /ICES/ and structural design language /STRUDL/ programming and operating characteristics, including computer run example
23 p4134 A69-42146

Computerized design of potassium vapor turbine with supersaturation effects compared with equilibrium flow turbine design
23 p4187 A69-42251

Minimization algorithm for switching systems synthesis, describing design of mass spectrometer curve function generator and autonomous shift register
23 p4146 A69-42535

COMPUTERIZED SIMULATION
NT ANALOG SIMULATION
NT DIGITAL SIMULATION

Gunn generator efficiency dependence on diode and regime parameters using computer model
01 p0042 A69-10319

Digital simulation models for continuous systems determined by direct search minimization
01 p0036 A69-10706

Monte Carlo simulation procedure synthesizing probability distributions of reliability parameters with individually exponential components
01 p0036 A69-10707

Areas of expectation for single radar automatic tracking of flying objects derived on basis of equation of circle in polar coordinates
01 p0035 A69-11296

Multieingine Martian soft lander guidance and control system design with single engine failure accommodation based on six degrees of freedom computer simulation
02 p0277 A69-11740

Computer solution of six degrees of freedom flight equations, discussing advantages of using flight path axes for translational equations of motion
02 p0212 A69-11998

Heat transfer in pyrolytic graphite analyzed by hybrid computer simulation
02 p0353 A69-12387

Multiprocessing system simulation using GPSS /General Purpose Simulation System/ model
02 p0213 A69-12492

Multichannel digital data compression simulation, discussing algorithms, buffer queue control, identification coding and system performance measurements
02 p0213 A69-12814

Radar return signal generation for computer simulations of airborne radar systems, using digital computer program for time varying radar backscatterer
03 p0429 A69-13199

VLF system simulation for evaluating digital communications systems operating in presence of additive atmospheric noise
03 p0390 A69-13205

Diurnal variation of variation coefficient of F 2 critical frequency for steady and unsteady primary ionizing fluxes simulated on computer
03 p0423 A69-13516

Cardiovascular system simulation using computer models transport and perturbation methods
03 p0380 A69-13855

CASSANDRE language in computer simulation
03 p0401 A69-14178

Computer simulations defining conditions to produce series operation of Gunn effect diodes
04 p0573 A69-14340

Collection of papers on engineering applications of digital computers, examining programming, numerical methods and design and simulation problems
04 p0563 A69-14514

Computer programs for engineering analysis, design and simulation, presenting point selection program for curve plotting
04 p0563 A69-14516

Digital computers in space flight simulation and vehicle performance optimization, examining mission analysis
04 p0652 A69-14519

Design and implementation of executive system for hybrid simulation, discussing requirements placed upon digital computer and operating software
04 p0567 A69-15350

NASA-Ames hybrid simulation software systems, subsystems and implementation
04 p0567 A69-15353

Colliding waves synchronization and stability in angular gas laser by electronic simulation
05 p0770 A69-15645

Digitally controlled flight systems simulators, noting design improvements over conventional trainers
05 p0742 A69-15884

Baird-Hitchcock iterative method analog computer simulation by steepest descent
05 p0723 A69-15933

Digital computer interface systems design for simulation, control, instrumentation and data processing, discussing hybrid computer linkages
05 p0723 A69-16195

Collection of papers on computerized simulation covering dynamic modeling of ideas and systems
05 p0724 A69-16467

Programming technique using quaternion parameters for error reduction in simulation of spinning rigid body
05 p0724 A69-16469

Simulation in design of automated flight test data system
05 p0743 A69-16759

Combined neutron degradation and gamma induced effects on closed loop system simulated by SECURE program
06 p0899 A69-16889

Runway development for increased airport capability, discussing computer simulation model of airport operations
06 p0906 A69-17166

Recursive formulas for numerical evaluation of real convolution integral for simulation of control systems and electrical networks on digital computer
06 p0947 A69-17250

Digital computer motion pictures generation for ground controlled intercept simulation
06 p0906 A69-17397

Department of Defense Gravity Experiment /DODGE/ attitude stabilization simulation with time-lag magnetic damping
06 p1014 A69-17584

Digital computer simulation of nonlinear redundant structure variables including thermal influence, creep and arbitrary loads
[AIAA PAPER 69-120] 06 p1028 A69-18166

Space radiator dynamic model for predicting outlet temperature transient response to environmental variations
[AIAA PAPER 69-29] 06 p1039 A69-18205

Digital computer methods and numerical techniques to evaluate temperature distributions in spacecraft structures, discussing thermal modeling
[SAE PAPER 690199] 07 p1239 A69-18301

Hybrid simulation study of satellite attitude control system to replace momentum wheels and gas jets by commandable gravity gradient boom
07 p1227 A69-18335

Hydrogen-air supersonic combustion at low densities, discussing laboratory computer simulation based on boundary layer concepts and finite rate chemistry
[WSCI PAPER 68-29] 07 p1240 A69-18358

Computer simulations, comparing self adaptive /neutron/ control of spacecraft energy allocation subsystem to programmed control
07 p1058 A69-18389

Computer model of Gunn diode, discussing operations under pulse bias voltage and in resonator
07 p1097 A69-18449

Metal fatigue simulation by Monte Carlo method, showing programmed fatigue tests in form of life distribution functions
07 p1233 A69-19314

Optimum approach and departure paths for VTOL aircraft simulated by hybrid computer under constraints
[AIAA PAPER 69-209] 07 p1178 A69-19570

Analog computer modeling of human systemic arterial tree, based on lump parameter circuit approximation
07 p1072 A69-19727

Computer simulation on engines dynamic behavior covering thrust transfer functions, time behavior and engine and fuel controller operation
08 p1301 A69-20167

Computerized objective analysis of meteorological variables based on weight determination involving autocorrelations
08 p1345 A69-20309

Computerized simulation of time dependent reliability of multicomponent system based on statistical model of component breakdown
08 p1277 A69-21100

Particle free path estimates for axisymmetric high specific impulse plasma accelerators, discussing collisionless plasma simulated by computer
[AIAA PAPER 69-278] 09 p1593 A69-21233

Digital computer simulation and analysis of control loops for ion thruster control
[AIAA PAPER 69-239] 09 p1564 A69-21240

Maintenance process simulation for engine and major components to provide routine material usage forecast and policies
09 p1503 A69-21802

Computer study of analytical model of boundary layer transition from laminar to turbulent flow
[AIAA PAPER 68-38] 09 p1482 A69-21945

Thermogravimetric plastics analysis data applied as constants to degradation kinetics equations used in charring-ablator digital computer programs
09 p1529 A69-22312

Apollo/Saturn V automatic checkout test verification and debug program using real time computer simulation with digital space vehicle system model
[AIAA PAPER 69-321] 09 p1478 A69-22378

Sunde model of troposcatter channel as transmission medium in computer simulation of adaptive digital communication scheme for selective fading channels
09 p1458 A69-22471

Computer simulation of unbiased digital recording composed of sequential computations intended for various bit densities
[IEEE PAPER 3.3] 09 p1461 A69-22562

Glass covered microwire technology to realize RC element, analyzing equivalent element errors by simulating irrational transfer functions
09 p1476 A69-22677

Gunn diode field distribution with distributed capacitance electrode analyzed with one dimensional computer simulation
09 p1470 A69-22789

Simulation to correlate integrated logistic support recommendations for dynamic analysis of planned logistic network
10 p1668 A69-22975

Mass and velocity distribution of interstellar clouds from Oort model simulated by Monte Carlo method on computer, predicting rogue cloud existence
10 p1779 A69-23608

Hybrid simulation of transport lag with variable time delay, noting dynamic range limitations due to digital computer processing and memory capacity
10 p1661 A69-23852

Constraint theory for analysis of mathematical models to alleviate software problems associated with simulation of complex large scale systems
11 p1858 A69-24936

Apollo Range Instrumented Aircraft (ARIA)/telemetry antenna system for trajectory tracking, discussing computer program for simulation of behavior
11 p1840 A69-25309

Computer simulation application to electronic systems, discussing design, performance optimization, implementation and environmental effects
11 p1843 A69-25319

Dynamic stability of elastic beam type structures, using electronic simulation based on finite element approach
11 p1886 A69-25344

Automated Structural Analysis Procedure employing Displacement Method of Matrix analysis applied to validation studies of various finite elements for wing structures
12 p2184 A69-26809

Computer simulation models for prediction of individual and crew performance in man machine environments
12 p2026 A69-27087

UHF transistor small signal internal behavior, using computer simulation for deriving current gain alpha locus, current gain and f sub T
13 p2227 A69-27241

NOL hypervelocity launcher heat transfer and erosion analysis by experiment and computer simulation [AIAA PAPER 69-336]
13 p2242 A69-28272

High energy inelastic particle collisions observed at high altitude station, using Monte Carlo computations for nucleon-nucleon collision model
13 p2330 A69-28374

NASA manned aerospace simulation techniques and equipment as used at Ames Research Center, noting applications to various types of manned vehicles [ASME PAPER 69-DE-56]
14 p2427 A69-28844

Time domain method for hybrid simulation to compute interchannel distortions due to linear transducers in FM systems
14 p2417 A69-29556

Direct simulation Monte Carlo method for hypersonic rarefied gas flow past solids, modeling on digital computer
14 p2390 A69-29580

Analog computer simulation of helicopter dynamics after main and tail rotor blades partial loss, showing banking and controllability
14 p2393 A69-29744

Noise fluctuations transport in convergent flow crossed field electron guns using Monte Carlo method for two dimensional computerized gun simulation
15 p2572 A69-30031

Computer model for avalanche transit time diode oscillator with single and double resonant circuit
15 p2577 A69-30615

Equipment life cycle costs computer simulation for design and changes evaluation, including maintenance analysis example
15 p2723 A69-31138

Time and space on-line simulation of analog, digital and hybrid block diagram systems
16 p2755 A69-31709

Cross correlation methods for determining systems time domain response adapted to communications channel evaluation, discussing computer simulation of on-line testing
16 p2750 A69-31757

Global satellite communication networks design by computer simulation, discussing politicoeconomic interface problems, ground stations, atmospheric factors, system optimization, etc
16 p2750 A69-31852

Scintillation index determination, discussing data reduction methods, standard test records, calibration at stations with modest equipment and simulation on digital computer
16 p2751 A69-32105

Colliding waves synchronization and stability in anular gas laser by electronic simulation
16 p2798 A69-32502

Helicopter engine dynamic analysis, discussing modeling techniques, rotor responses and turbine speed control simulations and transition from mathematical models to hardware components [AHS PAPER 332]
17 p2946 A69-33531

Helicopter fire control systems evaluation by computer model for hit probability and impact point sensitivity to various parameters [AHS PAPER 316]
17 p2933 A69-33540

Analog signal processing concepts based on models simulating mechanical function of ear cochlea
17 p2911 A69-34092

Computer simulation model for Saturn 5 prelaunch system reliability analysis, using Bayesian techniques
18 p3207 A69-34529

Computer simulation of numerical fluid dynamic problems for compressible and incompressible flows, noting Marker and Cell method
18 p3106 A69-34665

Physiological processes computer simulation with aorta modeling as example, noting difficulties and major problems
18 p3098 A69-34669

Air Transport Total In-Flight Simulator-707/AT/TIFS-707/ concept for pilot training, stressing airframe and major flight systems [SAWE PAPER 747]
18 p3118 A69-34884

Computerized prediction of RF instrumentation system signal margins for missile flight tests based on trajectory and range balance equation
18 p3103 A69-35097

Lockheed C-130 Hercules modified as STOL aircraft studied in laboratory by computerized simulation and graphics techniques for pilot view during landing
18 p3092 A69-35466

Aircraft Economic Design Evaluation (AEDE)/ computerized model to estimate aircraft design performance differences economic impact to carriers [AIAA PAPER 69-814]
19 p3289 A69-35626

Computerized air combat simulation with comparison of analog and digital approaches, noting Air to Air Combat/Fort Worth [AIAA PAPER 69-811]
19 p3289 A69-35629

Fatigue life testing apparatus with computerized simulation of random load maxima and minima, describing rotating bend test application
19 p3434 A69-35777

DC 10 aircraft reliability program, discussing passenger attractiveness, dispatch reliability, maintenance cost, flight safety and computer simulation for reliability engineering
19 p3248 A69-36027

Computerized system-safety fault trees, discussing drawing, configuration control and simulation program
19 p3280 A69-36029

Modified Monte Carlo model applied to computerized meteorite orbit evolution, simulating secular perturbations by imposing sinusoidal variation on orbital elements
19 p3414 A69-36117

Precompression automatic wild point rejection from sampled telemetry data for data compressors evaluated by digital computer simulation
19 p3273 A69-36263

Aircraft simulation, discussing flight simulation, real time computer assembly operation, computer- auxiliary interfaces, etc
19 p3296 A69-36707

Computerized optimization and testing of aerospace vehicle designs, describing simulation techniques, algorithm and computer selection, display devices, etc
20 p3498 A69-37292

Roseau satellite onboard computer systems design, emphasizing simulator and assembly programs for real time operation verification
20 p3501 A69-37389

Spacecraft discrete automatic control system computerized simulation, discussing logic elements, applications to design, etc
20 p3502 A69-37393

Onboard computer and environment simulation for real time programs development, discussing instructions analysis, variables extraction and values and peripheral components
20 p3502 A69-37395

Roseau onboard computer simulation by IBM 360, discussing use of assembly language and FORTRAN
20 p3502 A69-37396

Onboard navigation digital computer simulation to verify calculation principle and logic units during design and construction
20 p3502 A69-37398

Double binary PSK system digital computer simulation for satellite communications, investigating filter and limiting effects on performance in error probability terms
20 p3492 A69-37705

Worldwide cloud cover simulation procedure providing data for computer simulation of earth
20 p3492 A69-37705

oriented space missions, describing computer program using Monte Carlo mission simulation
20 p3573 A69-38120

Eye chart determination and layout for digital transmission system by computer simulation
21 p3678 A69-38776

Real time servo driven simulator of human body in zero-g activity used to study self induced rotation and astronaut mobility under thruster forces
21 p3664 A69-39034

Simulation and display for radar ground-backscatter signatures by computer ray tracing, using model ionosphere containing realistic traveling disturbances
21 p3717 A69-39280

Computer program (TACTICS) for simulating three vehicles simultaneous motion in space, considering interceptor-target guidance and intercept trajectories [AIAA PAPER 69-890]
21 p3678 A69-39415

Stability contours for sampling and delay effects analysis in analog/digital hybrid simulation loops, considering compensation quality over simulated system natural modes
21 p3680 A69-39609

Computer simulation of radiation scattering of spherical nebula with central isotropic star, discussing proposed program and parameters
21 p3816 A69-39723

Simulation of passively stabilized satellites using in-line hybrid computer [AIAA PAPER 68-853]
21 p3680 A69-39758

Real time network support simulation allowing network configuration for nominal or perturbed trajectory for Saturn vehicles, applicable to any flight azimuth
22 p4020 A69-40319

Multispacecraft simultaneous simulation on hybrid computer using Encke perturbation method for translational motion and Hamilton quaternion method for inertial transformations [AIAA PAPER 69-937]
22 p4036 A69-40320

Mission analysis and trajectory simulation (MATS)/ program, discussing computer controls, modular design, integration evaluation [AIAA PAPER 69-939]
22 p3904 A69-40322

Real time digital computer hardware simulation of Apollo Telescope Mount (ATM)/ mission [AIAA PAPER 69-940]
22 p3919 A69-40323

Computerized simulation for performance evaluation of System/4 Pi-EP multiprocessor for use in aerospace vehicle
22 p3907 A69-40353

Software support package for aerospace digital computer emulation, consisting of symbolic assembly program and interpretive simulator program and subprogram [AIAA PAPER 69-974]
22 p3907 A69-40354

Software/hardware interface testing of real time system, including possible improvements to computer program management flow
22 p3908 A69-40364

Analog and digital computer elements combined in hybrid technique for aeronautic simulation
23 p4146 A69-41603

Mathematical model for information processing of biological memory as cybernetic system
23 p4110 A69-41982

Computer simulation of satellite electric power systems concerning solar array, thermal, battery and charge models for end-of-mission-life orbits
23 p4068 A69-42241

Analog computer simulation of single shaft Brayton cycle system dynamics, including startup and shutdown transients
23 p4071 A69-42280

Gravitational stress effect on heart and venous system, discussing digital computer model simulating pressure changes under head-up and down tilt
24 p4271 A69-42783

S-RETIC vertebrate command model, discussing computer simulation of reticular formation Golgi anatomy capable of habituation, conditioning, extinction, generalization and error discrimination
24 p4273 A69-42910

Computer made movies and time history plots for ion-dipole collisions involving polar molecules (CO, HCL and acetonitrile)
24 p4352 A69-43124

Quasi-optimum control law for aircraft landing control system design based on Friedland technique, evaluating effectiveness by computer simulation
24 p4253 A69-43280

COMPUTERS

NT AIRBORNE/SPACEBORNE COMPUTERS
NT ANALOG COMPUTERS
NT DIGITAL COMPUTERS
NT HYBRID COMPUTERS

NT IBM 360 COMPUTER
NT SEQUENTIAL COMPUTERS
NT SITE DATA PROCESSORS
NT UNIVAC COMPUTERS

Computing machinery - Conference, Las Vegas, August 1968

01 p0035 A69-10703

Probabilistic Information Processing System using men and machines to perform diagnostic information processing and to guide decision making

01 p0037 A69-10954

Human factors evaluation of computer based information storage and retrieval system using questionnaire and interview techniques

02 p0204 A69-12220

Information processing - AFIPS Conference, San Francisco, December 1968

04 p0568 A69-15358

Gas turbine engine development data system based on test stands subsystems and central computer

10 p1660 A69-23284

Matrix Computer for solution of algebraic and integrodifferential equations in linear and nonlinear statics and dynamics, considering mechanical vibration problems
[ASME PAPER 69-VIBR-12]

10 p1806 A69-24167

Electronic module testing with integrated hardware/software system, noting module test console and manual capabilities

11 p1864 A69-25065

Real time/process computer interface with electric power systems, discussing compatibility, reliability, etc, problems in connection with management and engineering personnel

11 p2004 A69-25302

Computer uses for air traffic control in Germany including flight plans and weather report data processing

15 p2650 A69-30230

Construction applications of electronic computers - Conference, Weimar, June-July 1967, Volume 1

21 p3831 A69-38413

Computers - Conference, Boston, May 1969, Volume 34

21 p3679 A69-39601

Computer selection for given automatic control system, considering efficiency criterion and operational constraints satisfaction

24 p4285 A69-42952

Human sciences contribution to man-computer interaction based on review of relevant human factors literature

24 p4273 A69-43015

Man-computer interaction problems for human factors research, considering conversational languages development and evaluation, use patterns and interaction modeling

24 p4274 A69-43016

COMSAT PROGRAM

Satellite communications history covering passive and active satellites and Communication Satellite Act impact

07 p1085 A69-19182

CONCAVITY

Heat transfer characteristics of single lines of circular air jets impinging on concave cylindrical surfaces, discussing nozzle target spacing effect
[ASME PAPER 68-WA/GT-1]

05 p0848 A69-16137

CONCENTRATION [COMPOSITION]

NT ATMOSPHERIC MOISTURE
NT ATOM CONCENTRATION
NT CARBON DIOXIDE CONCENTRATION
NT METEOROID CONCENTRATION
NT MOISTURE CONTENT

Saturation solubility of carbon in cobalt and nickel with respect to graphite determined by vapor transport experiments over large temperature range

01 p0092 A69-10060

Impurity concentration measurement for alloyed region of tunnel diode by determining Fermi level position

02 p0301 A69-12685

Turbulent mixing of scalar fields such as temperature or concentration noting fine structure, number and distribution of zero gradient points and minimal gradient surfaces

03 p0414 A69-13134

Lead isotope composition and concentrations of U, Th, Ra, total Pb and Pb 210 in recent volcanic rocks, noting disequilibrium due to chemical fractionations

04 p0593 A69-15011

HF inductive analyzer of concentrations of electrically conducting solutions and nonconducting mixtures

05 p0763 A69-15994

Experimental measurement of He and C isotope composition of cosmic radiation

05 p0817 A69-16709

Gold and iridium concentrations in meteoritic and terrestrial materials by neutron activation, discussing chondrules, meteoritic troilite and metallic spherules

08 p1404 A69-20918

Mineralizing metabolic wastes by catalytic oxidation of pyrolysis products, noting nutritive value of ash solutions for Chlorella cultivation

10 p1649 A69-23579

Excited cyanide molecules concentration in arc discharge determined from spectral bands absolute intensities during electron transition

15 p2654 A69-30080

Rocket observations of ozone concentration above 50 km by absorption spectroscopy, noting altitude dependence

15 p2603 A69-31397

Halon 1301/bromotrifluoromethane/ concentration for inerting Aerazine-50 spills or extinguishing fires, noting joint use of carbon dioxide and water

18 p3094 A69-35090

Molecular concentration-optical depth curves for combinations of two photospheric and two facular models, noting lines contrast dependence on dissociation energy

18 p3204 A69-35391

Aerated fuel spray effect on smoke reduction from high pressure ratio aircraft gas turbines engines, including smoke measurement and visibility

19 p3395 A69-36770

Adsorption kinetics in ternary mixture of nitrogen, methane and hydrogen, using concentration-time/breakthrough/ curves measurement on activated coconut shell charcoal
[NAS-NRC PAPER H-4]

22 p3981 A69-40629

Mixing length theory including eddies axial motion, discussing turbulent field of temperature or concentration

24 p4407 A69-42917

CONCENTRATORS

Computation and optimization of energy distribution over randomly oriented elements of radiation receiving surface of hollow collector of concentrator type solar device

09 p1442 A69-22534

Equatorial mounted solar energy concentrator efficiency compared to unconcentrated sunlight and artificial UV-visible light source in reducing Pb tetraacetate solution in acetic acid

16 p2736 A69-31814

Solar power concentrator-absorber system, discussing flux distribution in focal plane and cavity heater optimization

17 p3022 A69-33795

CONCENTRIC CYLINDERS

Elastoplastic stress-strain behavior of concentric composite cylinders under uniaxial tension using analytical model, predicting transverse stresses during axial loading

01 p0171 A69-11263

Heat transfer between concentric cylinders at different temperatures measured for argon, neon and helium

01 p0177 A69-11403

Accommodation coefficient effect on linearized heat transfer in rarefied gas between parallel plates and concentric cylinders

01 p0177 A69-11405

Coaxial cylindrical shells oscillation frequencies with interspace filled with incompressible liquid determined as functions of liquid level and interspace width

09 p1612 A69-21483

Viscous incompressible conducting fluid flow through porous coaxial nonconducting cylinders under radial magnetic field with pressure gradients functions of time

12 p2062 A69-26275

Hydromagnetic flow of viscous conducting fluids through porous coaxial cylinders in radial magnetic field solved by Laplace transform

12 p2135 A69-26276

Wave scattering from infinite line source by long convex cylinder, noting field prediction by geometrical diffraction theory

13 p2299 A69-28194

Neutral gas pressure in positive column plasma between two coaxial insulated cylinders as function of cylinders radii

14 p2490 A69-29036

Numerical approximation of Taylor vortices in viscous incompressible fluid flow between concentric rotating cylinders, using truncated eigenexpansions

15 p2593 A69-31518

One dimensional viscous magnetofluidynamic flow in annulus formed by concentric cylindrical electrodes, reducing problem to linear partial differential equation set

[AIAA PAPER 69-725] 17 p3012 A69-33493

Bessel function applied to unsteady axisymmetric problem of heat conduction in thermally controlled coaxial cylinders with different physical properties

19 p3448 A69-35981

Viscous fluid secondary flow stability between coaxial rotating cylinders, using nonlinear differential equations derived from equations of motion

19 p3299 A69-36391

Unsteady laminar MHD flow of electrically conducting viscous fluid between porous coaxial circular cylinders under radial magnetic field

20 p3581 A69-36912

Parameters of DC discharge between concentric cylinders calculated for plasma probes by pressure theory, noting ion neutral collisions and magnetic field effects

21 p3776 A69-38712

Air pressure wave forces on missile from silo wall motion resulting from close nuclear blast, using acoustic wave equation for concentric cylinder flow

21 p3691 A69-39765

Temperature field in system of coaxial cylinders by solving heat equation with corresponding initial and boundary conditions

21 p3855 A69-39855

CONCENTRICITY

Near free molecule heat transfer and density distribution between concentric spheres using BGM grid equation and Knudsen iteration technique

16 p2877 A69-31921

CONCORDE AIRCRAFT

Engine air intake design and development for Concorde aircraft, discussing design constraints
[AIAA PAPER 67-752]

01 p0006 A69-11014

Vertical flight path navigation requirements for supersonic aircraft based on computer simulated flights of Mach 2 Concorde

02 p0277 A69-11590

Concorde structural tests, discussing ground test program for simulating flight temperature and stress conditions at 2.6/2.7 station of wing-fuselage section

02 p0193 A69-11892

Wind tunnel pressure tests of Concorde air intake mockups in presence of aircraft wing and nose for Mach numbers 2, 2.2 and 2.35

03 p0361 A69-12879

Low pressure fuel system and turbine rotor blade temperature measurement method for Concorde Olympus 593 engine
[ASME PAPER 68-GT-63]

06 p0984 A69-17187

Concorde supersonic transport and Jaguar Military Strike/Trainer programs, discussing management and international cooperation

06 p1043 A69-17831

Concorde and Boeing supersonic transport overland sonic booms, discussing social, political and legal reactions

06 p0868 A69-17899

Solar flare in-flight radiation detection and warning system for Concorde SST, noting radiation hazards due to solar cosmic rays

07 p1131 A69-18551

Concorde testing program, detailing materials, structure, systems, engine, wind tunnel and flight tests

07 p1054 A69-19294

Concorde fuel management, discussing trim, fuel as coolant and booster pumps

07 p1057 A69-19705

Concorde equipment, summary of British companies activities in supplying components

07 p1057 A69-19706

Al alloys application to Concorde project and other aircraft structures, noting mechanical properties

08 p1335 A69-21141

Concorde SST industrial project in international cooperation and stage in transport history including supersonic boom, weight, fuel consumption rates and aerodynamic heating

12 p2013 A69-26356

Concorde SST turbojet engine integrated assembly consisting of air inlet, gas generator, reheater and convergent-divergent nozzle

12 p2147 A69-26357

Concorde design problems due to kinetic heating, aerodynamic characteristics, structure, equipment, modified delta wing planform, etc

12 p2012 A69-26358

Concorde SST equipment and systems noting microelectronics, automatic control, inertial navigation, headup displays, linear instruments and hydraulic systems

12 p2091 A69-26360

Concorde jet engine silencer concept and characteristics [AIAA PAPER 67-391]

12 p2148 A69-26759

Concorde thermal fatigue resistance tested by alternate heating and cooling cycles simulating supersonic flight profile

13 p2241 A69-28102

Optimal navigation system for supersonic Concorde aircraft, discussing in-flight and terminal navigation methods

14 p2480 A69-29859

Concorde aircraft and engine materials selection factors including mechanical properties of metals and nonmetals, corrosion resistance, service life, sealants, weight analysis, etc

15 p2639 A69-30464

Concorde aircrew seats design for electric operated tracking and lift, vertical movement accommodation seat and back tilt

15 p2553 A69-31167

Aircraft construction materials, discussing aluminum alloys use in Concorde project based on temperature tests, creep and fatigue properties and joint requirements

16 p2801 A69-31791

Aerodynamic problems in future civil aircraft design, emphasizing Concorde development possibilities, discussing VTOL intercity transport, subsonic swept wing and hypersonic aircraft, all-wing airbus, etc

16 p2732 A69-32023

Concorde propulsion and ejection systems reliability, testing reheating duct, primary nozzle, secondary assembly, etc

16 p2837 A69-32072

Franco-British aeronautical cooperation and Concorde development agreement of 29 November 1962

17 p3075 A69-32840

Concorde design, discussing planform, wing twist and camber, hypersustentation, kinetic heating, aeroelasticity, R and D, tests, etc

17 p2899 A69-33380

Self monitored subsystems in automatic flight control of Concorde, describing operation mode and landing display

17 p3003 A69-34196

Concorde aerodynamic design compromise between high and low speed requirements, kinetic heat problems and materials selection [AIAA PAPER 69-759]

19 p3245 A69-35661

FM radioaltimeter for Concorde aircraft, describing autocalibration and automonitoring device, signal characteristics, reliability, etc

19 p3315 A69-36699

Concorde Olympus 593 engines electronic control and adjustment devices

19 p3395 A69-36706

Concorde SST fire protection equipment, discussing fire and overheat detectors, fire extinguisher, crash fire protection, explosion suppression equipment, etc

19 p3256 A69-36864

Design concepts and principles of systems for monitoring of Concorde flight control actuators, considering servo control, control interconnections and control input system

20 p3467 A69-38190

Design criteria for Concorde SST servoflight control system reliability and safety

21 p3650 A69-39697

Commercial supersonic and subsonic air traffic growth forecast

22 p3862 A69-39934

Concorde structural tests emphasizing problems associated with thermal cycle, including fatigue test setup on complete airframe [RAES PAPER 16]

22 p4043 A69-40495

Design of Concorde wing for Mach 2 cruising speed including fuselage/wing relations, wing planform and landing edge camber, etc [RAES PAPER 18]

22 p3859 A69-40497

SNECMA thrust reverser system design on Concorde prototype, discussing performance, safety, airworthiness, operational requirements, reliability and maintenance [SAE PAPER 690412]

23 p4200 A69-41640

Concorde elvons sandwich construction to meet sonic environment, discussing core, adhesive, design and fabrication

24 p4403 A69-43429

CONCRETES

Maintenance practices for rigid concrete pavement of runways including joint and crack sealing and patching, considering necessary surface preparation and equipment

01 p0057 A69-11277

Direct plotting of vibrating wire strain gauge data for concrete structures, giving diagrams for grid and backing sheet scaling

08 p1312 A69-20104

CONDENSATES

Binary mixture condensation on cooled vertical plate, formulating predictive theory based on conservation laws and other physical principles [ASME PAPER 68-WA/HT-21]

05 p0847 A69-16124

Condensation and probe interference in planar expansion deflection nozzle measurements [AIAA PAPER 69-170]

06 p0863 A69-18059

Propellant condensation on surfaces near electric rocket exhaust, calculating particle arrival rates, backflow and desorption energies [AIAA PAPER 69-270]

09 p1565 A69-21252

Circumstellar grain compositions of stars with various O to C abundance ratios, calculating molecular equilibrium of condensates and gaseous compounds in stellar atmospheres

10 p1786 A69-24103

Stable homogeneous combustion of condensed substances /CS/, systematizing and analyzing elementary CS combustion models

13 p2379 A69-28454

Gas and polydispersed condensate parameters of nonequilibrium two phase flow in Laval nozzle, considering particle collisions and coagulation, energy exchange and momentum exchange

14 p2391 A69-29621

Condensation and probe interference in planar expansion deflection nozzle measurements [AIAA PAPER 69-170]

21 p3645 A69-39769

Adenylates condensation in protein-associated amino acids as clue to peptide bond synthesis within protocellular structures

22 p3895 A69-40048

CONDENSATION

Condensation-enhanced vaporization rates in nonisothermal systems, noting fume nucleation augmentation of rates into cooler environments

03 p0532 A69-13122

Motion of condensations within tail of comet Morehouse 1908 III from photographs

08 p1382 A69-19870

Electrostatic rocket exhaust condensation on spacecraft solar electric panels cover glasses, noting deleterious effects [AIAA PAPER 69-271]

09 p1569 A69-21874

Mass transfer during Cs condensation from moving vapor mixture containing Ar in water-cooled tube

15 p2718 A69-30998

Water vapor recondensation effect on structure of liquid particle flow into vacuum

16 p2769 A69-31869

Star formation in interstellar solid hydrogen clouds originating from cellular pressure created by hydrogen condensation onto interstellar grains

16 p2862 A69-32375

CONDENSATION TRAILS

U CONTRAILS

CONDENSER RADIATORS

U CONDENSERS [LIQUIFIERS]

U HEAT RADIATORS

CONDENSERS [LIQUIFIERS]

NT JET CONDENSERS

Condensing injector cycles internal efficiency for high velocity liquid metal flows in closed cycle MHD power plants

02 p0194 A69-11582

CONDENSING

NT FILM CONDENSATION

Imagery degradation by moisture condensation on thermal IR scanners optics during aircraft descent from higher to lower altitude

08 p1311 A69-19821

Boundary layer at tube wall behind shock wave propagating in gas-vapor mixture, analyzing condensation rate

09 p1480 A69-21591

Condensation kinetics in clouds, determining cloud spectrum evolution taking stochastic processes into account

10 p1722 A69-23972

Hetero-epitaxial germanium films on GaAs by germanium condensation from molecular beams in vacuum, obtaining p-type conductivity

11 p1938 A69-25033

Cloud and fog droplet spectra due to condensation of water vapor on nuclei solved by partial differential equation

12 p2126 A69-26017

Heats of condensation and vaporization of W, Re and Mo cathodes of thermoelectric converter with Cs arc for various output powers and Cs vapor pressure

12 p2017 A69-26544

Steam-water convergent condensing injector with supersonic inlet vapor, discussing axial pressure profiles and discharge pressure

13 p2372 A69-27486

Dropwise condensation, analyzing nucleation sites, growth, vapor capture, heat transfer rates and surface texture

13 p2376 A69-28143

Condensation kinetics in clouds, determining cloud spectrum evolution taking stochastic processes into account

21 p3760 A69-39658

CONDITIONED RESPONSES

U CONDITIONING [LEARNING]

CONDITIONING [LEARNING]

Physiological causes and prevention of motion sickness during space flight, emphasizing conditioned reflex, different analysors interactions and vestibular-vegetative changes during weightlessness

02 p0200 A69-12122

Classical and differential eyelid conditioning for truth or falsity of visually presented verbal statements

07 p1064 A69-18632

Instrumental reward experiment using concept learning paradigm with word-color compounds as stimuli

07 p1064 A69-18636

Classical and differential conditioning of eyelid response with correctness of solutions of arithmetic problems as discriminandum

07 p1064 A69-18637

High oxygen concentration effect on conditioned reflex and associated EEG responses to light flash in rabbits occurs in well defined sequences

07 p1065 A69-18976

High oxygen concentration effect conditioned reflex and associated EEG responses to light flash in rabbits occurring in well defined sequences

20 p3479 A69-38224

Cortical and thalamic evoked activities changes during sensory conditioning of freely moving cat

22 p3872 A69-40160

Anesthetized cats with electrodes in visual cerebral cortex, investigating simulation of conditioned alimentary reflexes in response to light signals by electric signals

22 p3885 A69-41066

Squirrel monkeys exposed to centrifugally generated artificial gravity trained to respond for food reinforcement at selected gravity levels

23 p4081 A69-41434

Fixed interval human performance control under various histories of conditioning and response cost conditions, considering effects of postreinforcement pauses

23 p4100 A69-41437

Hypoxia reaction elimination in human beings by repeated exposure to hypoxia, discussing nitrogen inhalation experiments and adaptive behavior of respiratory system

23 p4214 A69-41789

Continuous noise level effects on stabilized escape conditioning in male albino rats

24 p4262 A69-42948

CONDITIONS

U CHRONIC CONDITIONS

CONDUCTING

U CONDUCTION

CONDUCTING FLUIDS

Viscous electrically conducting fluid with aligned magnetic field flowing past flat plate at nonzero angle of attack

01 p0126 A69-10163

Plane MHD jets with variable conductivity, showing effective mixing length as function of distance

01 p0130 A69-10773

Growth rate of wave instability in conducting liquid jet in perpendicular electric field and accelerating under gravity

01 p0062 A69-11207

Instabilities for two highly conducting finite length streams in relative motion and coupled by transverse electric or longitudinal magnetic fields

01 p0062 A69-11208

Resistive spherical plasma expansion into external magnetic field noting magnetic stream function

01 p0132 A69-11211

Heat transfer of steady laminar flow of incompressible, viscous and electrically conducting fluid between parallel porous plates

02 p0289 A69-12235

Longitudinal short wave stability in conducting quasi-one dimensional gas flow, considering regions of high thermal emission

02 p0233 A69-12487

Diffusion in conduction process in dielectric fluids, discussing space charge limited current-voltage characteristics

03 p0415 A69-13140

Flow development around impulsively rotating dipole magnetized sphere in viscous incompressible conducting fluid, noting diffusing Alfvén waves and induced field

03 p0477 A69-13793

Coefficient of friction variations for MHD flow of electrically conducting liquid across porous medium under transverse magnetic field

03 p0480 A69-14112

Quasi-neutral, steady, inviscid and nonheat conducting flow of conducting gas with high magnetic Reynolds number in plane channel with transverse magnetic field

04 p0636 A69-14984

Transverse magnetic field effect on three dimensional nonisothermal lubrication layer of conducting gas at small magnetic Reynolds number

04 p0607 A69-14990

Steady longitudinal motion of insulating cylinder in conducting fluid, discussing analog between steady MHD and acoustic scattering

04 p0638 A69-15192

Flow of two conducting immiscible liquids between parallel porous moving plates under transverse magnetic field

05 p0743 A69-15600

Unsteady motion of ideally conducting gas flow in transverse magnetic field with allowance for gravitational forces

05 p0802 A69-15789

HF inductive analyzer of concentrations of electrically conducting solutions and nonconducting mixtures

05 p0763 A69-15994

MHD shock wave decay in one dimensional unsteady flow of ideal inviscid perfectly conducting compressible fluid subjected to transverse magnetic field

05 p0806 A69-16736

Steady two dimensional MHD flow of perfectly conducting fluid past nonconducting wedge with magnetic field orthogonal to flow velocity

06 p0964 A69-17244

Parametric instability of horizontal surface of ideally conducting or very high dielectric constant liquid in varying perpendicular electric field

06 p0957 A69-17542

Laminar heat transfer in electrically conducting fluids flowing in parallel plate channels [JPL-TR-32-1335]

06 p1033 A69-17555

MHD aligned flow of compressible fluid past slender body in wind tunnel

06 p0861 A69-17719

Steady rotation of insulating body of revolution in unbounded electrically conducting fluid permeated by applied axial magnetic field

07 p1190 A69-18814

Convection in conducting fluid filled cavities with variable wall temperature due to magnetic field, with results applicable to rheological systems

07 p1241 A69-18921

One dimensional flow of conducting inviscid compressible fluid in channel in presence of transverse fields, discussing steady velocity flows

07 p1191 A69-19014

Two dimensional flow of conducting fluid in channels with longitudinal transverse magnetic field and Hall effect, discussing gas motion equations linearization

07 p1192 A69-19015

Unsteady conducting incompressible viscous fluid flow past plate in magnetic field, analyzing surface friction reduction

07 p1192 A69-19018

Axisymmetric turbulent conducting fluid jet propagation in longitudinal magnetic field without induction

07 p1192 A69-19019

Laminar conducting wall jet injected in transverse magnetic field, analyzing partial differential equations obtained

07 p1192 A69-19020

Pulsation energy balance of turbulent jet of conducting fluid expanding in longitudinal magnetic field

07 p1192 A69-19021

Laminar flow of viscous conducting fluid between parallel walls in traveling magnetic field, using Hartmann number expansion

07 p1192 A69-19023

MHD flow of compressible conducting fluid around cylindrical body with quasi-aligned magnetic field and velocity

07 p1194 A69-19350

Free surface of electrically conducting liquid in gradually varied supercritical regime in horizontal rectangular channel

08 p1362 A69-20273

Vorticity behind shock waves in conducting gases when magnetic field is tangential or normal to shock surface using momentum equation

08 p1367 A69-20789

Linear perturbation theory to predict instability threshold conditions caused by electric field in poorly conducting liquid subject to vertical temperature gradient

08 p1352 A69-20790

Two dimensional steady flow of finitely conducting compressible fluid subjected to magnetic field with two zero components

08 p1369 A69-20843

Turbulent heat transfer in conducting fluid flow through circular tube in longitudinal magnetic field and constant wall heat flux, using Lyon relation

09 p1621 A69-21590

Lagrangian evolution criterion for electromagnetic conducting fluid and MHD flow, defining generalized fluxes and forces

10 p1727 A69-22904

Pyrotechnic circuit closer using jet to achieve conduction between hollow charge lining and coaxial electrode

10 p1635 A69-23031

Conical refraction of magnetosonic waves occurring when Alfvén waves propagate at speed of sound in conducting fluid in presence of constant uniform magnetic field

10 p1727 A69-23091

Numerical solution of MHD equations for boundary layer electrically conducting gas flow near flat plate when velocity distribution of external flow obeys power law

10 p1727 A69-23093

MHD fluid flow in rectangular duct with allowance for finite wall conductivity

10 p1727 A69-23098

Rotating disk induced viscous conducting fluid motion in axial magnetic field

10 p1727 A69-23099

Busbar effect on interaction between conducting fluid flow and traveling wave magnetic field created by long line with concentrated inductance and capacitance, deriving line gain

10 p1727 A69-23101

Sun-like alternating field generators, discussing dynamo theory of stellar and planetary magnetic fields based on nonmirror symmetrical turbulent motion in conducting fluid

10 p1782 A69-23703

Heat transfer in single phase medium at near critical static parameters

11 p1997 A69-24230

Turbulence formation in conducting liquid at increasing Reynolds numbers, discussing cause of spontaneous magnetic field appearance

11 p1955 A69-24392

Dispersion relation for internal gravity wave propagation across exponentially decreasing magnetic field in conducting fluid, noting atmospheric wave propagation in ionosphere

11 p1877 A69-24564

Motion equations for conducting paramagnetic fluid in magnetic field derived, including MHD equations and equation determining magnetic moment variation rates

11 p1932 A69-25465

Viscous incompressible conducting fluid flow through porous coaxial nonconducting cylinders under radial magnetic field with pressure gradients functions of time

12 p2062 A69-26275

Hydromagnetic flow of viscous conducting fluids through porous coaxial cylinders in radial magnetic field solved by Laplace transform

12 p2135 A69-26276

Electrohydrodynamic instability of incompressible conducting cylindrical viscous jet in external magnetic field, noting viscosity role in oscillation modes and growth rate

12 p2136 A69-26403

Steady state flow of viscous conducting liquid in inlet of channel with or without transverse magnetic field, emphasizing approach to Hartmann-Poiseuille patterns downstream

12 p2138 A69-26626

Incompressible conducting fluid turbulent flow velocity distribution in transverse magnetic field at small magnetic Reynolds numbers and constant MHD interaction frequency

13 p2246 A69-27498

Boundary value problem for one dimensional unsteady equations for inviscid conducting gas during transition processes in MHD duct

13 p2309 A69-28027

Conducting liquid boundary layer flow and heat flux on electrodes of MHD generator, including one dimensional flow outside boundary layer

13 p2309 A69-28028

Perturbations stabilization in electrically conducting fluid by distributed automatic control system, determining feedback operators via boundary value problem

13 p2311 A69-28105

Hydromagnetic waves propagation in finitely conducting fluid mass immersed in nonuniform inelastic field, using curvilinear coordinates based on lines of force

14 p2491 A69-29336

Coupled magnetoacoustic waves in conducting paramagnetic fluid in resonance region due to mechanical and magnetic motions, considering dissipation

14 p2492 A69-29609

Laser beam light pressure bending of incompressible liquid surface leading to beam self focusing in linear medium

14 p2461 A69-29674

Pressure drop fluctuations amplitude and frequency effect on channel resistance and magnetic field effect on fluctuations intensity in laminar conducting fluid flow

14 p2501 A69-29909

Entrainment of viscous electrically conducting liquid in long duct with narrow rectangular cross section and movable walls in magnetic induction field

16 p2816 A69-31606

Exact solution for motion of conducting solid of revolution rotating in infinite conducting viscous fluid, describing magnetic field

16 p2817 A69-31666

Temperature, velocity and density perturbation propagation as heat convection wave in viscoelastic thermally compressible heat conducting fluid, analyzing damping and frequency spectra

16 p2878 A69-31952

Linearized motion equations for conducting gas in magnetic and electric field solved for coaxial channel and free jet, assuming small Reynolds number and parallel flow

17 p3010 A69-33016

Conducting fluid incompressible flow in entrance of MHD channel by momentum integral method, permitting edge stress existence at boundary layer free stream interface [AIAA PAPER 69-724]

17 p2952 A69-33436

Conducting fluid and plasma rotation between concentric cylinders due to crossed fields, determining velocity distribution, induced magnetic field and kinetic energy [AIAA PAPER 69-726]

17 p3011 A69-33472

Unsteady motion of ideally conducting gas flow in transverse magnetic field with allowance for gravitational forces

18 p3181 A69-35040

Viscous electrically conducting fluid flow around thin profiles for equal Reynolds and magnetic Reynolds numbers, using Oseen method to linearize equations

18 p3124 A69-35285

Conducting medium steady one dimensional motions determined by assuming space-charged electric field interaction, considering electrohydrodynamic behavior of medium

18 p3181 A69-35315

Combined free and forced convection hydromagnetic flow and heat transfer of electrically conducting fluid subjected to temperature variations in vertical channel

19 p3380 A69-36304

Gravitational stability of infinite conducting fluid cylinder in axial magnetic field and surrounded by fluid of different density

19 p3380 A69-36483

Transport properties of liquid semiconductors, using model for liquid mercury with minimum state density

19 p3391 A69-36560

Level signaling device for high temperature conducting fluids, describing sensor construction and circuitry

20 p3536 A69-36980

Turbulent boundary layer of conducting fluids on dielectric plate in transverse magnetic field in presence and absence of pressure gradient

20 p3513 A69-37092

Incompressible electrically conducting fluid in presence of magnetic field and Coriolis forces, analyzing Rayleigh-Taylor instability by variational principles

20 p3577 A69-38195

Homogeneous dynamo in cylindrically symmetric volume with symmetrically moving fluid and large magnetic Reynolds number, demonstrating first and second approximations using Braginskii method

22 p3989 A69-40192

Kinematic dynamo waves, discussing excitation and maintenance of magnetic field by assumed motion of uniformly conducting fluid using small parameter and numerical methods

22 p3989 A69-40195

Homogeneous, viscous and electrically conducting fluid bounded at one end by infinite plane surface of rigid body vibrating relative to fluid body

22 p3991 A69-41036

Conducting fluid flow in spherical container in rotating magnetic field, calculating induced field velocity and inside and outside components

23 p4196 A69-41609

Hydrodynamic stability of conducting fluid in external magnetic field subject to attraction of external spherically symmetric gravitational field

23 p4213 A69-41717

Unsteady MHD conducting fluid flow in arbitrary ducts under transverse magnetic field, studying effects of pressure gradient impulsive change

24 p4359 A69-43678

Turbulence formation in conducting liquid at increasing Reynolds numbers, discussing cause of spontaneous magnetic field appearance

24 p4390 A69-43782

CONDUCTING MEDIA

U CONDUCTORS

CONDUCTION

Radiative heat transfer, discussing electromagnetic theory, transfer between surfaces and simultaneous conduction, convection and radiation

13 p3376 A69-28140

CONDUCTION BANDS

Gray tin band structure, noting Shubnikov-de Haas oscillations, transport properties, piezo-Hall effect, magnetoreflection and free carrier absorption

02 p0295 A69-11783

Conduction band anisotropy in n-type cadmium tin arsenides, analyzing galvanomagnetic tensor and distribution of isoenergetic surfaces for electrons

03 p0488 A69-13888

Light absorption in semiconductors with electron hole pair formation noting conduction and valence band

06 p0978 A69-16901

InAs solid solutions reflection spectra with CdTe, CdS, CdSe and ZnTe compounds, determining conduction bands

07 p1198 A69-18511

Energy separation and electrons effective mass ratio of conduction bands of tellurium doped GaSb obtained by free carrier Faraday rotation measurements

07 p1201 A69-19464

Conduction band anisotropy in n-type cadmium tin arsenides, analyzing galvanomagnetic tensor and distribution of isoenergetic surfaces for electrons

11 p1939 A69-25689

Solution for kinetic energy equation for organic semiconductors with narrow conduction band situated in strong electric field

12 p2144 A69-26673

P-type GaAs-Ge lasing on band to band or conduction band to acceptor impurity transitions or on both transitions simultaneously

13 p2270 A69-27193

Photoelectric characteristics of thin film CdS-CdTe heterojunction diodes, considering I-V illumination, spectral characteristics and conduction band continuity

13 p2230 A69-27882

Conduction band structure in GaSb noting temperature dependence

13 p2319 A69-27899

Amorphous semiconducting alloys single band model characteristics

15 p2667 A69-30199

Two donor levels and conduction properties of n-type semiconductors demonstrated by capacitance measurements of single crystal tungsten oxide in presence of electrolyte

16 p2825 A69-31609

External magnetic force and internal Coulomb force influence on carriers in conduction or valence band of semiconductor, considering H atom spectra

16 p2826 A69-31824

Laser emission theory for indirect band-band transitions, considering light absorption by free carriers in semiconductors with polar and unpolar scattering

19 p3332 A69-35873

Impurity levels in semiconductors with multiconduction bands, noting impurities influence on photoluminescence, laser action and Gunn effect

19 p3385 A69-36514

Electroreflection study of inversion asymmetry and warping induced interband magneto-optical transitions in InSb, employing low temperature electric field modulation technique

19 p3386 A69-36521

Magneto-optical constants and conduction band parameters of GaAs by coherent radiation at high temperatures, measuring Faraday rotation

19 p3386 A69-36522

Electron effective mass, density and mobility in α -Fe-doped degenerate GaSb-InSb single crystals

19 p3390 A69-36555

GaAs-GaP heterojunctions, analyzing continuous conduction band, capacitance and current-voltage characteristics, photoresponse and modulation effect

21 p3779 A69-38424

Transverse thermomagnetic EMF and Nernst-Ettingshausen coefficient in GaSb semiconductor with double conduction band and strong degeneracy of current carriers

21 p3783 A69-39558

Thermal EMF in cadmium arsenide specimens with various electron concentrations determined to verify parabolic subband structure of conduction band

22 p3993 A69-40607

CONDUCTION ELECTRONS

Nonlinear optical coefficients in group IV and III-V semiconductors, calculating contribution from conduction and core electrons

05 p0776 A69-16329

Absorption and amplification of sound in many valley semiconductors in strong electric field, noting dependence on electron heating and relaxation times

07 p1199 A69-18681

Quantum oscillations of magnetization, undamped magnetoplasma waves development and sound amplification by electron drift in crossed fields observed in semimetals

09 p1556 A69-21615

Electrons conduction and switching in noncrystalline semiconductors, discussing localized states and thermally activated hopping

11 p1938 A69-25239

Electron magnon interaction in ferromagnetic and antiferromagnetic semiconductors, showing conduction band and electron effective mass and magnetic moment dependences on temperature and spin direction

14 p2504 A69-28991

Thermal conduction by electrons in stellar matter, presenting opacity tables for H, He, C and red giant cores and solar composition

22 p4014 A69-40147

CONDUCTIVE HEAT TRANSFER

Stability of compound superconducting cables under conditions of controlled heat transfer from cable surface to liquid He

01 p0176 A69-10718

Alternating direction implicit (ADI) methods for solving parabolic heat conduction equation with variable coefficients in two and three space dimensions

01 p0106 A69-10987

Heat conduction in viscous fluid flows with large concentration of suspended solid particles

02 p0351 A69-12052

Gray radiation and conductive heat transfer in Oseen-like free mixing flow, computing temperature distribution by inversion integral

02 p0354 A69-12504

Heat conduction with change of phase in three dimensional melting and solidification problem under isotherm conditions and balanced energy at interface

02 p0354 A69-12548

Three dimensional unsteady heat conduction and temperature distributions in finite hollow circular cylinder under time dependent boundary conditions of second kind

03 p0530 A69-12861

Difference schemes for heat conduction analog simulation on electric integrators

03 p0410 A69-13300

Thermal contact rectangle with single side heat capacity, applying Fourier transform and Abel convergence tests

03 p0533 A69-13863

Composite heat transfer by conduction and radiation in nongray medium, outlining electronic computer program for numerical solutions

03 p0533 A69-13884

Theory of heat conduction with finite wave speeds for materials with memory

03 p0533 A69-13956

Controllable states of elastic heat conductors, analyzing deformations and temperature fields

03 p0529 A69-13957

Heat removal in multilayer superconducting devices, determining optimum number of layers

03 p0493 A69-14225

Constant thickness disk temperature field for inhomogeneous boundary conditions, considering roots of characteristic equations determination

04 p0685 A69-14498

Biot variational principle applied to combined conduction and radiation heat transfer

04 p0685 A69-14734

Thermal explosion in Poiseuille flow of reacting viscous fluid in infinite circular cylindrical channel or between two rotating infinite cylinders

04 p0686 A69-14986

Periodic solutions for linear and weakly nonlinear heat conduction equations, obtaining omega-periodic solutions for initial boundary value problems

04 p0625 A69-15109

Heat diffusion in cylinder with heat sources creating axisymmetric temperature distribution, using Gauss hypergeometric function and Meijer G-function

04 p0687 A69-15188

Energy transfer from radiating sphere to medium with molecular heat conduction

05 p0845 A69-15782

Nucleate pool boiling heat transfer data extended to relate effect of heating surface characteristics

05 p0847 A69-16125

Semidiscrete approximate solution by analog computer of inverse problem of transient heat conduction

05 p0848 A69-16127

Time independent solar wind equations applied to spherical symmetry and radial magnetic field at solar surface, noting thermal conductivity anisotropy

05 p0817 A69-16703

Whirling liquid hydrogen layer thermal and hydrodynamical conditions, noting application to cold neutrons source in high flux beam reactor

05 p0849 A69-16818

Conduction equations for conduction cooling of human body solved by finite difference method

06 p0880 A69-17088

Thermal nonequilibrium of unsteady adiabatic gas flow in nonheat conducting tube with open ends

06 p0911 A69-17813

Combined radiation and conduction heat transfer equation applied to temperature profile around opaque hollow sphere and in solid condensed gas layer

07 p1239 A69-18303

Heat conduction equation for convective flow applied to gunpowder combustion under harmonic pressure variation

07 p1241 A69-18708

Solar wind model including effects of rotation, magnetic fields and anisotropic heat conduction

08 p1380 A69-20643

Soviet book on theory of heat conductivity covering physical principles of transfer and boundary value problems

08 p1421 A69-20647

High temperature regions cooling as applied to solar flares, considering energy losses due to heat conduction, bremsstrahlung, line emission and recombination radiation

09 p1588 A69-21362

Radiative-conductive heat transfer in plane layer of gray heat conducting medium, solving energy equation
09 p1621 A69-21433

Convective MHD channel flow in vertical channel subjected to temperature and pressure gradients, discussing wall conductances effects on flow rate and heat transfer
09 p1545 A69-21441

Energy transfer in gases transmitting heat by interaction of thermal conduction and IR radiation
09 p1621 A69-21442

Conductive heat transfer between aerodynamically heated skin and barrel of Aerobee 150 sounding rocket telescope, noting effect of residual gas pressure
09 p1610 A69-22005

Kutta-Merson algorithm for converting partial differential equation for two dimensional unsteady state heat conduction to simultaneous ordinary differential equations
09 p1623 A69-22280

Equation for one dimensional heat conduction with nonlinear heat generation transformed from boundary to initial value problem
10 p1809 A69-23689

Emissivity of screened tube in presence of heat conducting connecting pieces between tube and screen
11 p1997 A69-24229

Electron-ion temperature relaxation near interface of two semiinfinite nonmagnetized different temperature plasmas brought into thermal contact
11 p1923 A69-24296

Cryogenic conductive heat transfer in solids, low temperature insulation and liquid-vapor interfaces, discussing boiling heat transfer, injection cooling and frost formation
11 p1998 A69-24461

Upper atmosphere response to time dependent heating based on approximate analytic solutions of heat conduction equation
11 p1878 A69-25151

Unsteady heating of fuel mixture in vertical cylindrical container with Arrhenius heat source, discussing heat conduction equations and wall temperature effects
11 p2001 A69-25192

Heat flux toward electrodes measured under high current discharge, showing conductive heat transfer and erosion effect
11 p1928 A69-25227

Unsteady heat conduction of semiinfinite thin rod with mobile end face, ideally insulated lateral surface and convective heat transfer on uninsulated portion
11 p2002 A69-25229

Aerodynamic heating of ELDO-A booster rocket, calculating flow field, heat transfer and conduction by method of characteristics and thermal models
11 p1966 A69-25433

Mathematical model for melting of finite paraffin slab based on method on numerical computer solution of heat conduction equations for thermal control devices
12 p2190 A69-26785

Viscous heat conducting compressible fluid response to abrupt change in circular cylinder angular velocity at stable temperature distribution, considering Boussinesq approximation
13 p2245 A69-27378

Analytical expressions for nonlinear partial differential equation of heat conduction in solids, giving temperature as function of time and location
13 p2372 A69-27434

Heat transfer and temperature distribution in thin fins with stochastic root temperature due to excitation by stochastic and Markov processes
[ASME PAPER 68-HT-35] 13 p2374 A69-27780

Combined conduction and radiation transfer equations solutions for absorbing-emitting gas, obtaining slip coefficient for diffusion solution correct boundary condition
13 p2374 A69-27784

Thermionic converter matched with solar cells analyzed for parabolic mirrors, assuming heat conduction power supply to cathode and uniform temperature distribution
13 p2209 A69-27970

Green function for boundary value problems of heat conduction equation constructed by heat potentials method
13 p2380 A69-28548

Asymptotic behavior of function in Cauchy problem solution for heat conduction, basing method on Laplace transform inversion formula
13 p2380 A69-28685

Heat conduction and Navier equations solved for temperature distribution and displacements in elastic solids, considering time dependent boundary conditions, body forces and heat generation
14 p2535 A69-29364

Solution methods for differential heat conduction equations, discussing methods of variable separation, Green function, thermal potentials, etc
14 p2539 A69-29456

Conduction solution to generalized nonlinear Benard problem showing existence of bifurcation and analyticity of convective motion
14 p2540 A69-29679

Green function construction for boundary value problems of heat conduction on rectilinear segment with dynamic boundaries, using integral equations
15 p2716 A69-30075

Periodic radial heat flux in infinite cylinder with varying heat sources, assuming time variable heat exchange on surface
15 p2717 A69-30575

Unsteady three dimensional heating of finite solid rectangular parallelepiped, deducing expressions for rectangle and slab
15 p2717 A69-30790

Thermoelastic stress in semiinfinite elastic medium due to discontinuous temperature distribution over free surface, solving associated heat conduction problem
15 p2712 A69-31006

Heat propagation in rod of two sections with different properties, formulating relevant boundary value problem, solving with Duhamel principle
15 p2718 A69-31066

Evaporation of liquid droplets from heating wall observed cinematographically, noting heat transfer by violent film boiling and conduction through thin vapor layer
15 p2718 A69-31117

Weakly damped transverse and thermal waves development and propagation in viscous heat conducting incompressible fluid under temperature and gravitational fields
15 p2718 A69-31168

Langrangian equations resulting from restricted variational principles corresponding to heat conduction problem derived for boundary condition inclusion
16 p2877 A69-31872

Simultaneous solution of continuity and heat conduction equations for ionospheric plasma consisting of electrons, atomic O ions and neutral gas species, discussing varying solar flux effects
16 p2849 A69-32082

Simultaneous solution of continuity and heat conduction equations for ionospheric electrons, ions and neutral species for studying F region magnetic storm behavior
16 p2775 A69-32083

Unsteady heat conduction equations for elliptic cylinder with convection solved by point matching
16 p2879 A69-32171

Variational problem formulated for boundary value problem of steady heat conduction with general boundary conditions
16 p2880 A69-32378

Thermal silicone grease type filler materials for heat transfer across bolted or clamped sheet metal surfaces in electronic equipment for space applications
16 p2794 A69-32560

Heat transfer in evacuated multilayer insulation by radiation and conduction, considering optically thin media separating reflective layers
[AIAA PAPER 69-607] 17 p3073 A69-33300

Radiative and conductive heat transfer in heated finite gaseous body with emphasis on collisional and radiative relaxation, noting cooling as two stage process
[AIAA PAPER 69-638] 17 p3073 A69-33311

Radiative and conductive heat transport mechanisms at cryogenic temperature applicable to thermal energy transport minimizing technique in containment system
17 p3074 A69-33680

Alternating direction iteration method for nonlinear systems of equations applied to steady state heat conduction problem with nonlinear boundary conditions
18 p3163 A69-34329

Lunar temperature prediction with emphasis on variable property models, noting assumptions about physical properties appearing in heat conduction equations
18 p3194 A69-34374

Exact analytic solution for thermal conductance of two dimensional eccentric constriction in dimensionless numbers
18 p3228 A69-34375

Orthonormalization methods applied to heat conduction, convection and radiation problems, noting digital computer programs modifications
18 p3229 A69-34662

High temperature regions cooling as applied to solar flares, considering energy losses due to heat conduction, bremsstrahlung, line emission and recombination radiation
18 p3197 A69-34752

Numerical methods using analog computer in linear one dimensional transient heat conduction
18 p3229 A69-34835

Energy transfer from radiating sphere to medium with molecular heat conduction
18 p3230 A69-35034

Flow viscosity and heat conduction effects on shock wave propagation in bent channel with weak Mach reflection
18 p3124 A69-35326

Bessel function applied to unsteady axisymmetric problem of heat conduction in thermally controlled coaxial cylinders with different physical properties
19 p3448 A69-35981

Heat conduction orientation anisotropy in linear amorphous high polymers due to uniaxial stretching, noting molecular weight distribution and temperature effects
19 p3359 A69-36443

Heat conduction in medium with phase transitions, solving one dimensional nonlinear problem by calculation of isotherms and reduction to Cauchy problem
19 p3453 A69-36838

Surface cavity profiles created by pulsed laser on Ti, Al, Cu, Pb and Zn, compared with isotherms computed from heat conduction models
20 p3552 A69-36917

Combined heat transfer by radiation and conduction in disperse media /thermal insulation/ described by system of nonlinear integrodifferential equations
20 p3631 A69-37097

Finite element discretization technique extended to time dependent processes emphasizing dynamics and heat conduction, discussing applications to aircraft transient response
20 p3575 A69-37204

Heat transfer mechanisms between fluidized beds and wall surfaces by application of film penetration theory of mass transfer, noting bubbling bed model
20 p3632 A69-37519

Heat conduction in thin layer near boundary surface of solid by approximating one dimensional conduction in half space with allowance for curvature
20 p3633 A69-38213

Temperature distributions and heat transfer in thermal entrance region for Hartmann liquid flows under constant pressure gradient between parallel electrically conducting walls at rest
21 p3847 A69-38442

Fourier heat equations functional corrections for determining temperatures of plate and cylinder heated simultaneously by radiation and convection
21 p3848 A69-38641

Effective thermal conductivity parallel to laminations and total conductance for combined parallel and normal heat flow in multilayer insulation
[AIAA PAPER 68-765] 21 p3853 A69-39763

Steady state digital-analog integrator for solving nonlinear heat conduction type equations
21 p3680 A69-39852

Vertical heat exchange flux model using heat conduction equation compensating for tropospheric and stratospheric radiation divergence, calculating diffusion coefficient
22 p3936 A69-40137

Variational principles equivalent to mixed problems for parabolic equations with initial boundary conditions, noting heat conduction theory
22 p3974 A69-40231

Heat flow in belt-type heat transport device allowing for conductive and mass transport effects, deriving expression for heat transfer capability
22 p4050 A69-40554

Heat conduction equation applied to thermospheric heating in auroral zone to account for local temperature and density variations, introducing horizontal transport mechanisms
22 p3941 A69-40717

Combined heat transfer calculations, considering moving radiating media and simultaneous convection or conduction
23 p4237 A69-41328

Thermal inertia index of semiconductor thermistor with one dimensional temperature field taking into account conductive heat transfer
23 p4163 A69-41556

Numerical solutions for time dependent boundary value problems governed by heat equation applied to transient heat conduction in irregularly shaped two dimensional regions
[ASME PAPER 69-HT-50] 24 p4410 A69-43521

Film-nucleate boiling transition for liquid nitrogen in vertical forced flow in electrically heated tube, discussing conduction model and agreement with visual experiment
[ASME PAPER 69-HT-26] 24 p4412 A69-43542

One dimensional numerical solution for steady state thermal behavior of trapezoidal profile annular fins transferring heat by conduction and radiation
[ASME PAPER 69-HT-6] 24 p4413 A69-43553

Lateral heat conduction and radiation along two parallel long plates separated by nonabsorbing dielectric with refractive index of unity
24 p4415 A69-43594

Heat conduction problems associated with radiant exchange in shells under discontinuous solar flux, considering spacecraft structures, illumination theory and astrophysics
24 p4416 A69-43689

CONDUCTIVITY METERS

NT ELECTRICAL CONDUCTIVITY METERS

Conductivity probe design for tenuous plasmas and ionized gases, discussing experimental confirmation of theoretical behavior
[AIAA PAPER 68-170] 09 p1496 A69-21936

Radiophase mapping utilizing VLF radio signals to detect conductive sheets and surface impedance of earth
12 p2075 A69-26982

CONDUCTORS

NT AIRCRAFT ANTENNAS
NT CASSEGRAIN ANTENNAS
NT DIPOLE ANTENNAS
NT DIRECTIONAL ANTENNAS
NT ELECTRIC CONDUCTORS
NT ELECTRIC CONNECTORS
NT ELECTRIC WIRE
NT ELECTROLYTES
NT EXPLODING WIRES
NT HELICAL ANTENNAS
NT HORN ANTENNAS
NT INERTIALESS STEERABLE ANTENNAS
NT ION EXCHANGE MEMBRANE ELECTROLYTES
NT LENS ANTENNAS
NT LOG PERIODIC ANTENNAS
NT LOG SPIRAL ANTENNAS
NT LOOP ANTENNAS
NT MICROWAVE ANTENNAS
NT MISSILE ANTENNAS
NT MOLTEN SALT ELECTROLYTES
NT MONOPOLE ANTENNAS
NT MONOPULSE ANTENNAS
NT MULTIPLE BEAM INTERVAL SCANNERS
NT OMNIDIRECTIONAL ANTENNAS
NT PARABOLIC ANTENNAS
NT PHOTOCONDUCTORS
NT RADAR ANTENNAS
NT RADIO ANTENNAS
NT RHOMBIC ANTENNAS
NT SLOT ANTENNAS
NT SPIRAL ANTENNAS
NT STEERABLE ANTENNAS
NT SUBREFLECTORS
NT SUPERCONDUCTORS
NT TWO REFLECTOR ANTENNAS
NT WAVEGUIDE ANTENNAS
NT YAGI ANTENNAS

Ground wave excited by dipole in conducting half space, discussing lateral wave character and optimum radiation angle
02 p0209 A69-12347

Electrodynamics of turbulent conducting media based on nonrelativistic MHD
03 p0479 A69-13972

Approximate solution of equations for boundary layer flow of conducting medium on insulating and electrode walls of MHD generator channel
06 p0871 A69-17914

Unsteady flow of viscous incompressible conducting fluid in MHD generator channel, discussing external circuit inductance and flow velocity during start-up
06 p0969 A69-17915

Moving conducting media velocity measurement using Reynolds number and electrical conductivity values, based on magnetic field distortion
10 p1731 A69-23435

High speed photography of W strip fracture, considering electric current effects and electric circuit interruption by fracture
12 p2113 A69-26195

Flat conductor cable technology, discussing design, manufacture, specifications, etc
[ASME PAPER 69-DE-8] 14 p2393 A69-28855

Pyroelectric conductor sensors permitting continuous measuring and recording of air inhaled during chosen time intervals
15 p2559 A69-31230

Acceleration waves propagation in nonlinear conducting thermoelastic solid, treating homogeneously deformed and undeformed media
16 p2873 A69-32060

Electromagnetic wave scattering from conducting bodies of arbitrary shape and electromagnetic properties
17 p2918 A69-33002

Integral equation method for electromagnetic scattering by perfectly conducting obstacles modified for volume scattering regions involving disparities in dielectric constant, permeability or conductivity
17 p2930 A69-33890

Penumbra current distribution in plane electromagnetic waves diffraction by conducting cylinder, obtaining transient solution for impulsive excitation, discussing time harmonic problem
[AFRL-69-0038] 18 p3100 A69-34232

Electromagnetic induction in concentric thin shell-enclosed solid conducting sphere immersed in varying electromagnetic field
[AFRL-69-0082] 18 p3101 A69-34803

Conductor material thermal conductivity contribution to self similar explosion in strong magnetic field, determining critical field strength
22 p3982 A69-41019

Coil under alternating current interacting with laminated conducting structure, giving recurrence formula for calculating deflector voltage
24 p4296 A69-42653

CONES

NT ABLATIVE NOSE CONES
NT CIRCULAR CONES
NT CONICAL BODIES
NT NOSE CONES
NT ROCKET NOSE CONES
NT SLENDER CONES

Numerical computer results applied to supersonic flow of perfect gas past staggered cones
03 p0363 A69-13659

Stress distribution and spring rates in cantilever cone ring combination
[ASME PAPER 68-WA/DE-3] 05 p0839 A69-16168

Asymptotic solutions for transverse oscillations of wedge and cone by virtual displacements principle, considering nonlinear law of elasticity and energy dissipation
11 p1975 A69-24762

Refractory cone models made of copper and Co coated Be for force tests in high enthalpy hypersonic arc tunnels at high simulated attitudes
12 p2059 A69-26796

Supersonic flow past cone in presence of blowing normal to cone surface, calculating flow field parameters behind conical shock wave
15 p2548 A69-31175

Subliming ablation effects on boundary layer transition for cones in hypersonic flow, discussing Reynolds numbers measured in wind tunnel tests
[AIAA PAPER 68-40] 16 p2732 A69-31881

Monograph on forces exerted by air during yawing motion of sharp cones in supersonic and hypersonic flows by semilinear method
20 p3460 A69-37919

CONFERENCES

Human factors in aviation - Conference, Los Angeles, June 1968
01 p0010 A69-10448

Photochemistry and radiation chemistry - Conference, Natick, Massachusetts, April 1968
01 p0024 A69-10617

Chemical vapor deposition of refractory metals, alloys and compounds - Conference, Gatlinburg, Tennessee, September 1967
01 p0096 A69-10640

Exploding wire - Conference, Boston, October 1967
01 p0116 A69-10654

Computing machinery - Conference, Las Vegas, August 1968
01 p0035 A69-10703

Applied magnetism - IEEE Conference, Washington, D.C., April 1968
01 p0045 A69-10712

Environmental effects on aircraft and propulsion systems - Conference, Bordentown, New Jersey, October 1968
01 p0055 A69-11043

Life sciences and space research - COSPAR Conference, London, July 1967
01 p0016 A69-11073

Cryogenic engineering - Conference, Brighton, England, May 1968
01 p0056 A69-11144

Temperate latitude sporadic E origin and structure - Conference, Vail, Colorado, June 1968
01 p0069 A69-11156

Cause and structure of temperate latitude sporadic E - Conference, Vail, Colorado, June 1968, Volume 2
01 p0072 A69-11169

Atmospheric optics - Conference, Pulkovo, U.S.S.R., November-December 1965 and December 1966
01 p0073 A69-11181

Metal corrosion in atmosphere - ASTM Conference, Boston, June 1967
01 p0100 A69-11350

Powders and explosives - Conference, Brussels, September 1966
02 p0301 A69-11519

Space projections - Conference, Denver, July 1968, Volume 2
02 p0332 A69-11734

Space projections - AIAA-AAS Conference, Denver, July 1968, Volume 3
02 p0226 A69-11755

Maritime and aeronautical developments - Conference, Paris, April 1967
02 p0192 A69-11886

Applied mechanics - Conference, Laval University, Quebec, May 1967
02 p0339 A69-11984

Geophysical theory and computers - Conference, University of Trieste, September 1967
02 p0242 A69-12005

Fluidics - Conference, London, November 1968
02 p0194 A69-12070

Vacancies and interstitials in metals - Conference, Julich, West Germany, September 1968
02 p0267 A69-12185

N body gravitational problem - Conference, Paris, August 1967
02 p0322 A69-12267

Mechanical behavior of materials under dynamic loads - Conference, San Antonio, September 1967
02 p0342 A69-12277

Voyage to planets - Conference, Washington, D.C., March 1967
02 p0323 A69-12301

Plasma astrophysics - Conference, Varenna, Italy, July 1966
02 p0328 A69-12780

Space projections - Conference, Denver, July 1968, Volume 1
02 p0330 A69-12801

Propulsion - Conference, Paris, October 1967
03 p0494 A69-12887

Cosmic rays - Conference, Calgary, Canada, June 1967
03 p0497 A69-12928

Nonlinear optics - Conference, Novosibirsk, U.S.S.R., June 1966
03 p0435 A69-13034

Space age communication, use of satellites by mass media - UNESCO Conference, Paris, December 1965
03 p0534 A69-13132

Beam-foil spectroscopy - NASA Conference, University of Arizona, November 1968, Volume 1
03 p0470 A69-13160

Beam foil spectroscopy - NASA Conference, University of Tucson, November 1967, Volume 2
03 p0507 A69-13168

Electronics and aerospace systems - IEEE Conference, Washington, D.C., September 1968
03 p0385 A69-13176

Space systems use for planetary geology and geophysics - Conference, Boston, May 1967
03 p0509 A69-13390

Space radiation biology - NASA Conference, Berkeley, September 1965
03 p0370 A69-13476

Applications of electronic computers in construction - Conference, Weimar, June-July 1967
03 p0525 A69-13734

Glass fiber reinforced plastics - Conferences, Freudenstadt, West Germany, October 1968
03 p0453 A69-13819

Physical and mechanical properties of surfaces and interfaces - Conference, Raquette Lake, New York, August 1967
03 p0448 A69-13867

Prevention of and protection against accidental explosion of munitions, fuels and other hazardous mixtures - Conference, New York, October 1966
04 p0644 A69-14467

Dynamics of structured solids - ASME Conference, New York, December 1968
04 p0675 A69-14684

Stochastic problems in control - Conference, Ann Arbor, June 1968
04 p0581 A69-14693

Plastics in electronic packaging - Conference, Binghamton, New York, October 1968
04 p0620 A69-14953

Information processing - AFIPS Conference, San Francisco, December 1968
04 p0564 A69-15334

Information processing - AFIPS Conference, San Francisco, December 1968
04 p0568 A69-15358

Subsonic aeronautics - Conference, New York, April 1967
05 p0699 A69-15541

Spacecraft propulsion - ELDO Conference, Paris, October 1967
05 p0791 A69-15593

Work hardening - Conference, Chicago, November 1966
05 p0777 A69-15752

Nonlinear physics - Conference, Munich, June-July 1966
05 p0792 A69-15767

Systems science and cybernetics - IEEE Conference, San Francisco, October 1968
05 p0741 A69-15801

Astronomy - Conference, Prague, August 1967
05 p0820 A69-15834

Sterilization techniques for instruments and materials as applied to space research - COSPAR Conference, London, July 1967
05 p0711 A69-15934

Electrical insulation - IEEE Conference, Los Angeles, December 1968
05 p0730 A69-16240

Cryogenic properties of polymers - NASA/Case Conference, Cleveland, April 1967
05 p0784 A69-16485

Solid state physics - Conference, Alta Lake, British Columbia, August-September 1967
05 p0809 A69-16552

Aeronautic electronics - Conference, Washington, D.C., September 1968
05 p0789 A69-16716

Aerospace instrumentation - Conference, Cranfield, Beds., England, March 1968
05 p0765 A69-16747

Air safety - Conference, Dallas, April 1968
06 p1040 A69-16834

Space science and technology - Conference, London, February 1968
06 p0997 A69-16852

Nuclear and space radiation effects - IEEE Conference, University of Montana, July 1968
06 p0973 A69-16861

Metal matrix composites - ASTM Conference, Boston, June 1967
06 p0938 A69-16940

Survival and personal equipment - Conference, San Diego, October 1968
06 p0877 A69-16952

Astronomy - Conference, Nuremberg, September 1968
06 p0998 A69-16967

Thermal problems in biotechnology - ASME Conference, New York, December 1968
06 p0879 A69-17084

Materials research - Conference, Tokyo, September 1967
06 p0941 A69-17120

Cosmic rays, elementary particle physics and astrophysics - Conference, Aligarh, India, December 1967
06 p0986 A69-17268

Adaptive processes - IEEE Conference, University of California, Los Angeles, December 1968
06 p0899 A69-17350

Circuit and system theory - Conference, University of Illinois, October 1968
06 p0901 A69-17394

Mass motions in solar flares - Conference, Anacapri, Italy, June 1968
06 p0992 A69-17426

Special ceramics - Conference, Stoke-on-Trent, Staffs., England, July 1967
06 p0946 A69-17527

Astrodynamics, guidance and control - Conference, Belgrade, September 1967, Volume I
06 p1004 A69-17560

Spacecraft systems, education - Conference, Belgrade, September 1967
06 p1015 A69-17596

Propulsion and reentry - Conference, Belgrade, September 1967
06 p0859 A69-17625

Life in spacecraft - Conference, Belgrade, September 1967
06 p0881 A69-17642

Aeronautics - Conference, Beverly Hills, September 1968
06 p0866 A69-17658

Fiber optics - Conference, Baltimore, April 1968
06 p0958 A69-17674

Error correcting codes - Conference, University of Wisconsin, May 1968
06 p0890 A69-17861

Cybernetic problems in bionics - Conference, Dayton, May 1966
07 p1069 A69-18380

Microwave and optical generation and amplification - Conference, Hamburg, September 1968
07 p1090 A69-18420

Geochemistry and cosmology - Conference, Prague, August 1968
07 p1212 A69-18546

Refractory metal alloys metallurgy and technology - Conference, Washington, D.C., April 1968
07 p1164 A69-18790

Nondestructive testing of welds - Conference, Chicago, January-February 1967
07 p1139 A69-18794

Physical sciences - USAF Conference, Albuquerque, June 1967
07 p1181 A69-18927

Telemetering - Conference, Los Angeles, October 1968
07 p1079 A69-19092

Nuclear science - IEEE Conference, Montreal, October 1968
07 p1179 A69-19184

Magnetosphere - Conference, Boston College, June 1967
07 p1207 A69-19351

Electromagnetic windows - Conference, University of Paris, September 1967
07 p1108 A69-19507

Physics of electronic and atomic collisions - Conference, Leningrad, July 1967
07 p1186 A69-19651

Heat and mass transfer - Conference, Minsk, May 1968
07 p1243 A69-19732

Astrophysics, solid state physics, plasma physics and lasers - Conference, Bologna, October 1967
08 p1387 A69-20216

Automation and instrumentation - Conference, Milan, November 1968, Volume I
08 p1296 A69-20301

Air safety - Conference, Seattle, July 1968
08 p1315 A69-20449

Plastics - Conference, Washington, D.C., February 1969
08 p1336 A69-20478

Solar particles and radiation - Conference, Kiel, October 1968
08 p1379 A69-20531

Maritime and aeronautical engineering - Conference, Paris, May 1968
08 p1255 A69-20652

Origin and distribution of elements - Conference, Paris, May 1967
08 p1398 A69-20892

Signal processing arrays - Conference, Dusseldorf, July 1966
08 p1287 A69-20957

Electrochemical generators for space applications - Conference, Paris, December 1967
08 p1258 A69-21034

Reliability in electronics - Conference, Budapest, October 1968, Volume A
08 p1321 A69-21098

Reliability in electronics - Conference, Budapest, October 1968, Volume D
08 p1292 A69-21105

Reliability in electronics - Conference, Budapest, October 1968, Volume B
08 p1293 A69-21111

Space sciences - USAF Conference, Albuquerque, June 1968
08 p1423 A69-21123

Electric propulsion - AIAA Conference, William-sburg, March 1969
09 p1584 A69-21201

Space systems and radio astronomy - Conference, Geneva, September-October 1968
09 p1448 A69-21268

Space systems and radioastronomy - Conference, Geneva, September-October 1968, Part 2
09 p1450 A69-21285

Meteorology - Conference, Berlin, September 1968
09 p1534 A69-21512

Thermionic conversion - Conference, Framingham, Mass., October 1968
09 p1436 A69-21806

Aerospace material investigation and fabrication techniques - Conference, Cocoa Beach, November 1968
09 p1504 A69-22301

Spacecraft electronics - Conference, Chicago, December 1968
09 p1465 A69-22433

Fatigue strength research - Conference, Darmstadt, West Germany, May 1968
09 p1619 A69-22570

Combustion in advanced gas turbine systems - Conference, Cranfield, Bedfordshire, England, April 1967
09 p1624 A69-22611

Vortex fluidic devices - Conference, Philadelphia, January-February, 1967
09 p1443 A69-22736

Solar system plasmas and X ray astronomy - Conference, Adelaide, Australia, August 1968
09 p1581 A69-22742

Cosmic ray physics - Conference, Novosibirsk, U.S.S.R., August-September 1967
10 p1754 A69-22810

Applied mathematics and mechanics - Conference, Prague, April 1968
10 p1675 A69-22874

Technology and education - Conference, Los Angeles, September 1968
10 p1668 A69-22971

Pyrotechnic and explosive elements in space systems - Conference, Tarbes, France, July 1968
10 p1748 A69-23003

Depressed metabolism - Conference, Washington, August 1968
10 p1641 A69-23116

Mechanics of generalized continua - Conference, Freudenstadt and Stuttgart, August and September 1967
10 p1798 A69-23146

Fundamentals of aerospace instrumentation - ISA Conference, Boston, June 1968, Volume I
10 p1690 A69-23224

Instrumentation in the aerospace industry - Conference, Boston, June 1968, Volume 14
10 p1670 A69-23245

MHD electrical power generation - Conference, Warsaw, July 1968, Volume 1, Closed cycle MHD with gaseous working fluids
10 p1729 A69-23433

MHD electrical power generation - Conference, Warsaw, July 1968, Volume 2, Closed cycle MHD with gaseous working fluid
10 p1735 A69-23464

Acoustical holography - Conference, Huntington Beach, California, December 1967, Volume I
10 p1694 A69-23540

Laboratory astrophysics - Conference, Lunteren, Netherlands, September 1968
10 p1780 A69-23670

Physicochemical methods of corrosion testing - Conference, Frankfurt am Main, April 1968
10 p1712 A69-23818

Power sources - U.S. Army Conference, Atlantic City, May 1968
10 p1639 A69-23990

Cryogenic Technology - Conference, Chicago, June, 1967
10 p1810 A69-24014

Holography - Conference, San Francisco, May 1968
11 p1881 A69-24675

Tube techniques - IEEE Conference, New York, September 1968
11 p1847 A69-24740

Theory of thin shells - Conference, Copenhagen, September 1967
11 p1977 A69-24801

Calculation of radiation doses in space - Conference, Toulouse, France, February 1968
11 p1947 A69-24854

Automatic support systems for advanced maintainability - IEEE Conference, St. Louis, November 1968
11 p1863 A69-25059

Space electronics, telemetry, antennas, computers - IEEE Conference, Cocoa Beach, Florida, November 1968
11 p1837 A69-25288

Structures, structural dynamics, materials and aerelasticity - ASME-AIAA Conference, New Orleans, April 1969
11 p1988 A69-25492

Welding - ASME-AISI Conference, Detroit, October 1968
12 p2100 A69-25825

Medical investigation of aviation accidents - Conference, Washington, D.C., September 1966
12 p2021 A69-25837

Reliability-quality control - Conference, Buffalo, May 1968
12 p2100 A69-25845

Astronautics - Conference, Braunschweig, West Germany, October 1968, Volume 3, Strength, material, methods of construction
12 p2176 A69-25850

Astronautics - Conference, Braunschweig, West Germany, October 1968, Volume 2, Energy sources
12 p2014 A69-25862

Astronautics - Conference Braunschweig, West Germany, October 1968, Volume 1, Flight control and electronics
12 p2127 A69-25870

Reliability-quality control - Conference, Ontario, April 1969
12 p2101 A69-25969

Precision electromagnetic measurements - IEEE Conference, Boulder, June 1968
12 p2037 A69-26046

Multivariable control systems - Conference, Duesseldorf, October 1968, Volume 2
12 p2045 A69-26058

Multivariable control systems - Conference, Duesseldorf, October 1968, Volume 1
12 p2046 A69-26069

Multivariable control systems - Conference, Duesseldorf, October 1968, Supplement
12 p2051 A69-26092

High speed photography - Conference, Stockholm, June 1968
12 p2080 A69-26135

Electrohydrodynamics - Conference, Cambridge, Mass., March-April 1969
12 p2135 A69-26397

Large astronomical mirrors support and testing - Conference, Tucson, December 1966
12 p2055 A69-26406

Physics of metal films - Conference, Kiev, October 1966
12 p2143 A69-26456

Physics of magnetosphere - Conference, Washington, D.C., September 1968
12 p2071 A69-26734

Structures, structural dynamics and materials - AIAA-ASME Conference, New Orleans, April 1969
12 p2183 A69-26807

Metal fatigue mechanisms - Conference, Brno, Czechoslovakia, June 1968
12 p2116 A69-26911

Remote sensing of environment - Conference, University of Michigan, Ann Arbor, April 1968
12 p2094 A69-26974

Unsteady phenomena in galaxies - Conference, Biurakhan, Armenian SSR, May 1966
12 p2161 A69-27015

Human behavior simulation - NATO Conference, Paris, July 1967
12 p2024 A69-27079

Computer aided design - Conference, University of Southampton, England, April 1969
12 p2034 A69-27095

Evaluation of wear testing - ASTM Conference, San Francisco, June 1968
13 p2265 A69-27230

Human ecology in space flight - USN-NASA Conference, Princeton, October 1965, Volume 3
13 p2213 A69-27266

Electricity from MHD - Conference, Warsaw, July 1968, Volume 5, Open-cycle MHD
13 p2284 A69-27468

Electricity from MHD - Conference, Warsaw, July 1968, Volume 3, Closed cycle MHD with liquid-metal working fluids
13 p2203 A69-27474

Microwaves - IEEE Conference, Detroit, May 1968
13 p2228 A69-27667

Plastics for electrical insulation - Conference, New York, January 1967
13 p2285 A69-27982

Physical and physicochemical properties of ferrites - Conference, Minsk, Belorussian SSR, 1967
13 p2319 A69-27991

Vacuum and thin film - Conference, Pittsburgh, October-November 1968
13 p2298 A69-28003

Electricity from MHD - Conference, Warsaw, July 1968, Volume 4, Open cycle MHD
13 p2308 A69-28021

Relays - Conference, Oklahoma State University, April 1969
13 p2230 A69-28042

Vacuum - Conference, Manchester, England, April 1968, Part 1
13 p2240 A69-28076

Vacuum equipment and systems - Conference, Manchester, England, April 1968, Part 2 vacuum - Conference, Manchester, England, April 1968, Part 2
13 p2262 A69-28082

Society of American Value Engineers Conference, San Diego, April 1969
13 p2382 A69-28092

Metallography - Conference, Denver, November 1968
13 p2280 A69-28154

Cosmic ray physics - Conference, Novosibirsk, U.S.S.R., August-September 1967
13 p2328 A69-28367

Physics, mathematics, mechanics - Conference Moscow, December 1964
13 p2300 A69-28430

Environmental studies - Conference, Paris, March-April 1969
13 p2214 A69-28587

Geophysics - Conference, Naples, May 1967
13 p2255 A69-28646

Philosophical problems of Einstein theory of gravitation and relativistic cosmology - Conference, Kiev, June 1966
14 p2482 A69-28856

Aviation and astronautics - Conference, Tel-Aviv and Haifa, March 1969
14 p2429 A69-29011

Noise as public health hazard - Conference, Washington, D.C., June 1968
14 p2541 A69-29149

Thermionic electrical power generation - Conference, Stresa, Italy, May 1968
14 p2394 A69-29172

Plastics engineering - Conference, Chicago, May 1969
14 p2469 A69-29411

Electronics - Conference, Rome, March 1969
14 p2422 A69-29685

Corrosion - Conference, Cleveland, March 1968
14 p2465 A69-29929

Statistical mechanics - Conference, Kyoto, September 1968
14 p2487 A69-29986

Solar-terrestrial physics, Solar aspects - IQSY/COSPAR Conference, London, July 1967, Part 1
15 p2672 A69-30005

Temperature measurements - Conference, Hawthorne, California, April 1969
15 p2606 A69-30151

Fatigue design procedures - Conference Munich, June 1965
15 p2705 A69-30355

Man and environment - Conference, Anaheim, California, April 1969
15 p2584 A69-30356

Lubrication - Conference, Atlantic City, October 1968
15 p2622 A69-30604

Magnetism and magnetic materials - IEEE and AIP Conference, New York, November 1968
15 p2668 A69-30683

Reliability of electronic components for space - Conference, Grenoble, November 1968
15 p2622 A69-30816

Heat transfer - AIChE/ASME Conference, Philadelphia, August 1968
15 p2718 A69-31114

Quality control - ASQC Conference, Los Angeles, May 1969
15 p2721 A69-31119

Test measurement - Conference, New York, October 1968
15 p2612 A69-31267

Instrumentation - ISA Conference, New York, October 1968
15 p2615 A69-31286

Instrumentation - ISA Conference, New York, October 1968
15 p2553 A69-31293

Nondestructive testing - Conference, Montreal, May 1967
15 p2630 A69-31502

Cyclohexane and benzene anodic oxidation at fuel cell electrodes, noting cathodic desorption products as function of potential and reactant [ECS PAPER 330]
15 p2562 A69-31540

Light metals - Conference, Leoben, Austria, June 1968
16 p2799 A69-31774

Physics of solids in intense magnetic fields - Conference, Chania, Crete, July 1967
16 p2826 A69-31819

Tactical rocket propulsion - Conference, La Jolla, California, April 1965
16 p2836 A69-31991

Aerospace medical association - Conference, San Francisco, May 1969
16 p2742 A69-32008

Radar meteorology - Conference, Dolgo-Prudnaya, U.S.S.R., April 1966
16 p2805 A69-32263

Electrochemical generators for space applications - Conference, Paris, December 1967
16 p2736 A69-32405

Reliability physics - IEEE Conference, Washington, D.C., December 1968
17 p2935 A69-32886

Creep - Conference, Saclay, Essonne, France, June 1967
17 p2984 A69-32903

Exobiology, Search for extraterrestrial life - AAS-AAAS Conference, New York, December 1967
17 p2907 A69-32967

Dimensioning and strength calculations - Conference, Budapest, October-November 1968
17 p3051 A69-32975

Short range transport - Royal Aeronautical Society Conference, London, May 1969
17 p2897 A69-33206

Satellite attitude control and stabilization - Conference, Paris, October 1968
17 p3045 A69-33219

Viscous drag reduction - Conference, Dallas, September 1968
17 p2950 A69-33247

Birds as pests - Conference, London, September 1967
17 p2898 A69-33362

Cryogenic technology applications - Conference, Chicago, June 1968
17 p3006 A69-33679

Clear air turbulence and detection - Conference, Seattle, August 1968
17 p2998 A69-33732

Astronomical Society of Australia - Conference, Sydney, December 1968
17 p3039 A69-33799

Plasma physics and controlled nuclear fusion research - Conference, Novosibirsk, U.S.S.R., August 1968, Volume 1
17 p3012 A69-33817

Plasma physics and controlled nuclear fusion research - Conference, Novosibirsk, U.S.S.R., August 1968, Volume 2
17 p3014 A69-33826

Electromagnetic waves - Conference, Stresa, Italy, June 1968
17 p2922 A69-33832

Ionospheric studies - Conference, Alma-Ata, U.S.S.R., September 1965
17 p2965 A69-33977

Technology and social progress - ASS Conference, Washington, D.C., March 1968
17 p3076 A69-34039

Commercial utilization of space - Conference, Dallas, May 1967
17 p3041 A69-34043

Aerospace electronics - IEEE Conference, Dayton, May 1969
17 p2939 A69-34056

Lunar physics and chemistry - IAA Conference, Belgrade, September 1967
18 p3112 A69-34234

Photogrammetry - Conference, Washington, D.C., March 1969
18 p3133 A69-34334

Advanced space experiments - AAS Conference, Ann Arbor, September 1968
18 p3192 A69-34359

Space exploitation for experimental research - AAS Conference, Dedham, Mass., May 1968, Volume 24
18 p3193 A69-34367

High temperature and short duration flows - Conference, Freiburg University, West Germany, April 1967
18 p3114 A69-34444

Reliability - Conference, Chicago, January 1969
18 p3140 A69-34476

Computational approaches in applied mechanics - ASME Conference, Chicago, June 1969
18 p3105 A69-34657

Circuits and systems - Conference, Pacific Grove, California, October-November 1968
18 p3109 A69-34671

Space, technology and society - Conference, Cocoa Beach, Florida, March 1969, Volume 2
18 p3233 A69-35055

Space, technology and society - Conference, Cocoa Beach, Florida, March 1969, Volume 1
18 p3234 A69-35070

Figure of earth and refraction - Conference, Vienna, March 1967
18 p3131 A69-35194

Aerodynamics of rotary wing and V/STOL aircraft - Conference, Buffalo, June 1969
18 p3087 A69-35216

Aerodynamics of rotary wing and V/STOL aircraft - Conference, Buffalo, June 1969, Volume 2, Wind tunnel testing, New concepts in rotor control
18 p3088 A69-35226

Polymers in high performance applications - Conference, London, June 1969
18 p3150 A69-35420

Materials and processes for aerospace applications in 70s - Conference, Los Angeles, April-May 1969
19 p3315 A69-35501

Space flight optimization - Conference, Liege, Belgium, June 1967
19 p3398 A69-35662

Photovoltaics - IEEE Conference, Pasadena, November 1968
19 p3249 A69-35678

Instrumentation in aerospace simulation facilities - Conference, Farmingdale, New York, May 1969
19 p3289 A69-35714

Materials research - Conference, Kyoto, September 1968
19 p3342 A69-35771

Failure analysis - IEEE Conference, Philadelphia, May 1969
19 p3281 A69-35781

Space navigation - Conference, Houston, April 1969
19 p3368 A69-35789

Reliability and maintainability - Conference, Denver, July 1969
19 p3324 A69-35999

IR technology - Conference, Ann Arbor, June 1969
19 p3309 A69-36051

Meteorite research - Conference, Vienna, August 1968
19 p3403 A69-36072

High and medium energy molecular beams - Conference, Cannes, July 1969
19 p3375 A69-36171

Forbidden transitions in stellar spectra - Conference, Liege, Belgium, June 1968
19 p3420 A69-36211

Telemetry - IEEE Conference, Washington, D.C., April 1969
19 p3268 A69-36237

Gas dynamics of explosions - IAA Conference, Brussels, September 1967
19 p3448 A69-36351

Radio science - Conference, Ottawa, August 1969
19 p3276 A69-36425

Numerical weather prediction - Conference, Tokyo, November-December 1968
19 p3362 A69-36496

Physics of semiconductors - Conference, Moscow, July 1968, Volume 1
19 p3384 A69-36513

Semiconductor physics - Conference, Moscow, July 1968, Volume 2
19 p3387 A69-36540

Applied mechanics - Conference, Waterloo, Ontario, Canada, May 1969
19 p3374 A69-36655

Fluid power - Conference, London, September 1968
19 p3255 A69-36710

Stress corrosion cracking - Conference, Columbus, Ohio, September 1967
19 p3347 A69-36883

Space law - Conference, New York, October 1968
20 p3634 A69-37102

Heat resistant coatings - Conference, Leningrad, May 1966
20 p3559 A69-37357

Onboard computers on rockets and satellites - Conference, Paris, December 1968
20 p3498 A69-37377

Life sciences and space research on biological effects of radiation in space - COSPAR Conference, Tokyo, May 1968
20 p3474 A69-37612

Imaging radars - Conference, University of Michigan, July-August 1969
20 p3488 A69-37631

Fundamentals of remote sensing - Conference, University of Michigan, July 1969
20 p3493 A69-37734

Small rocket instrumentation techniques - COSPAR Conference, May 1968
20 p3541 A69-37790

Space research - COSPAR Conference, Tokyo, May 1968
21 p3698 A69-38334

Construction applications of electronic computers - Conference, Weimar, June-July 1967, Volume 1
21 p3831 A69-38413

Atmospheric emissions - NATO Conference, Norway, July-August 1968
21 p3705 A69-38482

Cosmic ray studies - Conference, Bombay, November 1968
21 p3788 A69-38811

Scientific results from Ariel 3 satellite - Conference, London, April 1968
21 p3716 A69-39254

Stress analysis - Conference, London, March 1968
21 p3840 A69-39301

IEEE Conference - San Antonio, April 1969
21 p3676 A69-39437

Electricity from MHD - Conference, Warsaw, July 1968, Volume 6
21 p3777 A69-39477

Acrospace and marine corrosion technology - Conference, Los Angeles, July 1968
21 p3747 A69-39484

Stellar mass loss - Conference, Trieste, September 1968
21 p3812 A69-39520

Computers - Conference, Boston, May 1969, Volume 34
21 p3679 A69-39601

Guidance and control in space - Conference, Warsaw, June 1969
21 p3825 A69-39628

Guidance and control in space - Conference, Warsaw, June 1969
21 p3825 A69-39635

Guidance and control in space - Conference, Warsaw, June 1969
21 p3766 A69-39644

Reducing cost of space transportation - AAS Conference, Washington, D.C., March 1969
21 p3856 A69-39686

General and applied physics - Conference, Alma-Ata, U.S.S.R., May 1967
21 p3853 A69-39841

Minor element effects on Ni alloy weldability - Conference, Houston, October 1967
22 p3966 A69-39878

Electronic packaging and production - Conference, Anaheim, February 1969 and Philadelphia, June 1969
22 p3909 A69-39941

Solar physics and hydromagnetics - Conference, Sopot, Poland, September 1966
22 p4009 A69-39982

Reliability testing - Conference, Anaheim, April 1969
22 p3952 A69-40021

Extraterrestrial matter - Conference, Argonne, Illinois, March 1968
22 p4011 A69-40083

Physics applications to earth and planetary interiors - NATO Conference, Newcastle-upon-Tyne, England, March-April 1967
22 p4015 A69-40172

Lasers and mechanical engineering - Conference, London, November 1968
22 p3960 A69-40234

World airport planning - Conference, London, September 1969
22 p3925 A69-40424

Earth observations from balloons - Conference, Washington, D.C., February 1969
22 p3864 A69-40803

Electronic measurement and control in industry - Conference, Budapest, 1969
22 p3915 A69-40934

Color aerial photography - Conference, New York, June 1969
22 p3948 A69-40985

Air safety - Conference, Anaheim, October 1968
22 p3866 A69-41127

Ferroelectricity - Conference, Riga, May 1968
22 p3994 A69-41155

Geochemistry of tektites - Conference, Corning, New York, April 1969
23 p4209 A69-41340

Aerodynamics of rotary wing and V/STOL aircraft - Conference, Buffalo, June 1969, Volume 3
23 p4057 A69-41369

Thermionic conversion - IEEE Conference, Framingham, Mass., October 1968
23 p4064 A69-41718

Telemetry - Conference, Washington, D.C., September 1969
23 p4117 A69-41734

Aviation and space medicine - Conference, Oslo, August 1968
23 p4103 A69-41783

Structural technology for large radio and radar telescope systems - Conference, Cambridge, Mass., October 1967
23 p4147 A69-42120

Electromagnetic compatibility - IEEE Conference, Asbury Park, New Jersey, June 1969
23 p4140 A69-42215

Energy conversion - Conference, Washington, D.C., September 1969
23 p4064 A69-42236

Physics - Conference, Trieste, June 1968, Volume 1, Condensed matter, plasma physics, turbulence, quantum optics, statistical mechanics, astrophysics, quasars, pulsars, gravitation theory and cosmology
23 p4216 A69-42310

Equatorial aeronomy - Conference, Ahmedabad, India, February 1969
23 p4159 A69-42422

Communications - IEEE Conference, Boulder, June 1969
23 p4127 A69-42500

Plasma instabilities in astrophysics - Conference, Monterey, October 1968
24 p4377 A69-42681

Circadian rhythms in nonhuman primates - Conference, Atlanta, July 1968
24 p4259 A69-42701

Safety and failure of components - Conference, Brighton, England, September 1969
24 p4397 A69-42767

Man machine systems - IEEE Conference, Cambridge, England, September 1969
24 p4273 A69-43014

Meteorology and geophysics - Conference, Hamburg, April 1968
24 p4344 A69-43144

Materials in space technology - Conference, Bristol, England, April 1969
24 p4332 A69-43206

Automatic control - Conference, Boulder, August 1969
24 p4289 A69-43267

Structural ceramics and testing of brittle materials - U.S. Army Conference, Chicago, March 1967
24 p4333 A69-43337

Aerospace medicine - Conference, Amsterdam, September 1969
24 p4263 A69-43369

Aircraft Structures and Materials Application - Conference, Seattle, September 1969
24 p4321 A69-43416

Solar flare and space research - COSPAR Conference, Tokyo, May 1968
24 p4369 A69-43603

CONFIDENCE LIMITS

Undetected defects and false alarm probabilities for automatic test equipment, emphasizing quality and confidence limits

03 p0428 A69-13187

Statistical relations for best value, standard deviation and confidence limits for engineering data, noting weighted least squares polynomial for fitting [ASME PAPER 68-WA/PTC-1]

05 p0768 A69-16192

Monte Carlo digital computer simulations, considering sample sizes and confidence intervals in multinomial output

10 p1661 A69-23853

Minimum test error probability test limits for known test equipment and signal tolerances, developing semi-graphically single equation for calculation

11 p1865 A69-25079

Confidence limits determined for damping parameter of complex stationary Gaussian Markov process

11 p1910 A69-25700

Weapon systems integrated testing, determining test quantities as function of subsystems utilizing Neyman-Pearson confidence levels

15 p2619 A69-30400

System estimation methods compared for rational boundaries of lower confidence limit, discussing variables/attributes error propagation

15 p2722 A69-31135

Partial prior information utilization via confidence intervals for mean time to failure of exponential reliability model

19 p3360 A69-36038

Sequential Bayes procedure demonstrating mean time to failure exceeding acceptable value with given confidence coefficient

19 p3327 A69-36040

Bayesian confidence limits for systems reliability, considering exponential and unspecified life distribution subsystems

19 p3328 A69-36041

Mean time between failures/MTBF for component, equipment or system subjected to total unit test hours at various confidence levels

21 p3684 A69-39700

CONFIGURATION MANAGEMENT

Configuration management, establishing uniform and mutually supporting methods of configuration identification, control and accounting for systems and equipment

12 p2192 A69-25849

Book on industrial control engineering covering mathematics, semiconductor devices, feedback amplifier theory, closed loop systems, frequency response diagrams

12 p2051 A69-26244

Configuration management for managing technical requirements defining systems, system equipment or individual equipment and changes, discussing implementation procedures

20 p3640 A69-38021

CONFIGURATIONS

Substructure optimization in structural synthesis, minimizing number of cells for configuration parameter [AIAA PAPER 69-121]

06 p1027 A69-18069

Large scale electronic systems configuration compatibility concept, discussing modular line replaceable units/LRU/assigned set of numbers

08 p1322 A69-21154

Coronal open helmet streamer configurations, noting minimum temperature requirement for constriction to true geometrical throat

09 p1598 A69-22177

Diffuse configuration factors between small plane and large sphere by unit sphere method, presenting limiting cases

24 p4351 A69-43683

CONFINEMENT

Human behavior during stressed underground confinement, discussing adaptation processes

01 p0020 A69-10757

Isolation effects on higher nervous activity, motor and vegetative reactions, muscular strength and emotional state

03 p0377 A69-14202

Microbiological influence on astronauts efficiency during and after long space flights, stressing simulated microclimates and confinement effects on flora

18 p3097 A69-35304

CONFLUENCE

U CONVERGENCE

CONFORMAL MAPPING

Plane subcritical flow past lifting aerofoil analyzed using conformal mapping and difference scheme on annular mesh inside circle

06 p0859 A69-17470

Conformal mapping of regions with corners and large curvatures of boundary curves onto unit circle with digital computer, considering airfoil

10 p1724 A69-22880

Conformal mappings for solving boundary value problems in elasticity and plasticity theories for regions having singular points

11 p1973 A69-24662

Polynomial coefficients multiplication by weighted damping factors for increased conformal mapping and boundary value problems solutions accuracy for doubly connected regions

12 p2178 A69-25998

Conformal transformation reducing transverse thermal resistance of cylinder of revolution to thermal resistance of semiinfinite medium

12 p2190 A69-26292

Plane problems of elasticity theory solved numerically using conformal mapping

18 p3219 A69-34709

Horizontal Situation Display/HSPD map computer mechanization transforming earth location to X, Y coordinates for Lambert conformal projection [AIAA PAPER 69-987]

22 p3908 A69-40367

CONGESTION

Chronic congestive heart failure in dogs compared to pulmonary system, discussing effect on cardiac lymphatics

23 p4078 A69-41364

CONGRUENCES

Nonholonomic congruences of trihedrons in metric theory of straight line complex

03 p0457 A69-13865

CONICAL BODIES

NT SLENDER CONES

Force law determining impact processes of pyramidal and conical body penetration into smooth surface of rigid plastic metals

02 p0337 A69-11615

Turbulent boundary layer growth, pressure distributions and surface shear stresses on yawed semiangle cone [AIAA PAPER 68-98]

02 p0190 A69-12526

Blunt and conical body optimum heat shield shapes for Jupiter atmospheric entry, noting shallow flight path [AIAA PAPER 68-1150]

03 p0520 A69-13565

Soviet book on hypersonic flow past truncated cones at various angles of attack with allowance for physicochemical equilibrium transformations

03 p0362 A69-13633

Boundary layer transition measurements on flight tests of experimental 22 degree conical reentry vehicle with Be heat shield and graphite nose [AIAA PAPER 68-1152]

03 p0362 A69-13648

Three dimensional boundary layers on cones at small angle of attack, presenting numerical solutions with heat transfer effects for wind tunnel model [ASME PAPER 68-WA/PTM-24]

04 p0541 A69-14389

Cone tip blunting effect on cone local laminar heat transfer rate noting cone configuration, semivertex cone angle and Mach number

04 p0542 A69-14721

Blunt cone hypersonic roll damping derivative, using Mach number distribution and graphical integration

04 p0542 A69-14739

Truncated solid cones plastic yielding under quasi-static and dynamic axial loads at various strain rates

04 p0682 A69-15301

Hypersonic laminar and transitional heat transfer rate distribution on spherically blunted cones

05 p0696 A69-15707

Ablation surface patterns and resulting roll torques and roll behavior of hypervelocity vehicles [AIAA PAPER 69-180]

06 p1036 A69-18051

Flow measurements in near wake of 7 degree half angle cone at free stream Mach number 4.3, noting pressure measurements [AIAA PAPER 69-186]

06 p0863 A69-18068

Experimental and numerical nonequilibrium shock layer around cones in hypersonic pure oxygen flows with simultaneous rotational, vibrational and dissociation relaxation [AIAA PAPER 69-136]

06 p0864 A69-18141

Three dimensional hypersonic steady flow around blunt and pointed cones at nonzero angles of attack calculated by method of characteristics [AIAA PAPER 69-187]

06 p0865 A69-18176

Dynamic stability derivatives of large angle blunted conical spacecraft near transonic speed in simulated Mars environment for various angles of attack [AIAA PAPER 69-104]

06 p1019 A69-18210

Quasi-plane stress in rotating disks of unconventional profile emphasizing conic shaped disk analysis in terms of hypergeometric series

07 p1235 A69-19444

Elastic cone stresses due to axial force at point on axis, solving problem in terms of convergent integrals

08 p1415 A69-20689

Transition of hypersonic boundary layers on conical body using shock tunnel, obtaining surface heat transfer distributions [AIAA PAPER 68-39]

09 p1482 A69-21943

Base pressure fluctuations behind cone in supersonic gas flow, noting complicated superposition of harmonics associated with various factors

09 p1431 A69-22237

Short multiconical TE sub 01 mode X band taper for connecting two different diameter circular waveguides

09 p1468 A69-22604

Laminar boundary layer separation and heat transfer on zero incidence cone at hypersonic speed, noting wall temperature and Reynolds number effects

09 p1433 A69-22609

Spherically blunted 15 degree semivertex angle cone flow field parameters at Mach 8.6, measuring pitot pressure and shock shape

11 p1818 A69-25143

Numerical integration of equations for three dimensional laminar boundary layer on sharp elliptical cones in supersonic flow of ideal gas, discussing heat exchange

11 p1821 A69-25477

Axissymmetric vibration modal properties/frequencies and mode shapes/ of thin conical shell frustums, considering dimensional and boundary condition influences

11 p1992 A69-25519

Radiation field from sources on conical surface using Green functions

13 p2223 A69-28569

Axissymmetric supersonic gas flow with attached shock wave past cone, calculating flow parameters between body and shock wave

17 p2890 A69-33123

Surface pressure and heat transfer over blunt conical body in hypersonic flow with uniform mass addition of various gases [AIAA PAPER 69-716]

17 p2891 A69-33463

Magnetic field effects on rotating cone compressible boundary layer at zero angle of attack, describing changes in drag coefficient, torque and velocity profiles [AIAA PAPER 69-721]

17 p2892 A69-33484

Supersonic aerodynamic characteristics of flared cones with various flare angles studied by schlieren photography, showing geometrical parameters influence on flow patterns

19 p3239 A69-36387

Three dimensional laminar boundary layer on conical body of revolution in low Reynolds number compressible fluid flow

19 p3241 A69-36762

Reentry cones with mass and configuration asymmetries, studying nonlinear aerodynamic characteristics by wind tunnel and full scale flight tests [AIAA PAPER 69-867]

21 p3823 A69-39393

Dynamic stability derivatives of large angle blunted conical spacecraft near transonic speed in simulated Mars environment for various angles of attack

22 p4036 A69-40550

Deployable cross log periodic dipole/LPD/ array on conducting cone as potential application to spacecraft or missile requiring frequency independence in VHF-UHF band

22 p3913 A69-40693

Frictionless supersonic and hypersonic flow of ideal gas of constant specific heat past cone with deformed axis at zero angle of attack

23 p4058 A69-41579

Edge diffracted fields by conical body frustums evaluated, including equivalent currents for caustic regions

23 p4136 A69-41583

Supersonic free stream flow past finite conical body with subsonic surface gas injection

23 p4059 A69-41884

Second order differential equations of supersonic flows past bodies at small angles of attack, showing linearized characteristics method applicability for conical nose

24 p4243 A69-42581

Boundary layer separation zones in laminar, transition and turbulent fluid flows past conical bodies with widening skirts

24 p4245 A69-43481

Intense heat exchange narrow zones on blunted semicone surfaces in hypersonic gas flows ascribed to large Reynolds numbers
24 p4246 A69-43494

CONICAL FLARE
U CONES

CONICAL FLOW
Self similar solutions uniqueness of three dimensional laminar boundary layer equations for conical flow determined by supplementary conditions derived from flow pattern
02 p0233 A69-12572

Time independent flow of highly rarefied neutral gas past finite cone at zero angle of attack with freestream, noting molecular distribution function
04 p0541 A69-14712

Test of similarity theory of leading edge vortices above slender wings in subsonic conical flow
04 p0543 A69-14820

Conical diffuser/exit duct performance and model for estimating energy losses, discussing inlet flow and Reynolds number
[ASME PAPER 68-WA/FE-45]
05 p0698 A69-16112

Lift drag ratio for conical sector with V-shaped wing at zero incidence
06 p0858 A69-17340

Three dimensional flow field of incompressible fluid with purely axial development in conical ducts and turbomachines
09 p1480 A69-21597

Numerical integration of equations of three dimensional laminar boundary layer in conical flow, using integral relation method
09 p1430 A69-21789

Angle of attack and Reynolds number effect on hypersonic flow past circular cone, obtaining shock wave shape
[ONERA-TP-692]
11 p1818 A69-24751

Heat transfer for incompressible inviscid fluid flow in cone, expressing solution in terms of dimensionless numbers
13 p2375 A69-27788

Conical flow past cruciform wing-body and tail-body systems, considering various positions of leading edges with respect to Mach cone
15 p2548 A69-31002

High order conical motions past cruciform wing-body and tail-body systems, reducing problem to flow past cruciform wing
15 p2548 A69-31023

Streamline flow of ideal stable gas with constant ratio of specific heats around conical body with arbitrary taper, determining flow velocity components
16 p2732 A69-32126

Aerodynamic characteristics of sphere and blunt cone in highly rarefied gas flow, noting molecular collision effect
18 p3086 A69-34708

Wing tunnel and theoretical studies of hypersonic wall flow on cone, considering static pressure and convection heat flux density effects
19 p3241 A69-36759

CONICAL NOZZLES
Navier-Stokes equations solution applicable to source type low Reynolds number flow through conical nozzles
09 p1482 A69-21976

High enthalpy air flow in hypersonic conical nozzle, calculating chemical and thermodynamic nonequilibrium effects with computer program
09 p1433 A69-22610

Turbulent boundary layer laminarization in conical nozzle flow, measuring velocity profiles and friction coefficient
[JPL-TR-32-1407]
16 p2732 A69-31894

Inlet thermal boundary layer thickness effect on conical nozzle heat transfer and boundary layer determined by operating nozzle with cooled/uncooled inlet
[AIAA PAPER 69-474]
16 p2881 A69-32780

Laminar boundary layers in low density supersonic and hypersonic conical and axisymmetric nozzles, treating displacement, transverse curvature, velocity slip and temperature jump
[AIAA PAPER 69-653]
17 p2954 A69-33458

Pulsating flow analysis in finite and infinite conical nozzles under sinusoidal pressure disturbances
[ASME PAPER 69-APM-16]
18 p3214 A69-34392

Convergent conical nozzles discharge coefficient calculated as function of operation mode and nozzle geometry
24 p4364 A69-43074

Boundary layer and heat transfer measurements for turbulent boundary layer laminarizing in conical nozzle flow with wall cooling
[ASME PAPER 69-HT-56]
24 p4303 A69-43538

Uniform flow and wall boundary layer growth measurement in conical nozzle of reflected shock tunnel operating at high enthalpy conditions
24 p4247 A69-43575

CONICAL SHELLS
Critical points separating stable and unstable branches of equilibrium curve of nonlinear elastic systems, discussing flexible shallow conical shell in temperature field
02 p0341 A69-12256

Buckling of electroformed thin conical shells under hydrostatic pressure, proving theory for cones of large taper ratio
02 p0347 A69-12515

Conically bent plate cross section distortion analysis employing von Karman large deflection theory, noting effect of tapering
[ASME PAPER 68-APM/Y]
04 p0670 A69-14402

Elastic noncircular orthotropic conical shell stress-strain state, obtaining differential equations reducible to integrodifferential equations solvable by iteration
04 p0673 A69-14494

Approximate expressions for displacement state of orthotropically reinforced conical thin walled shell, finding stiffness matrix by numerical integration
05 p0835 A69-15829

Critical axisymmetric loads for instability in orthotropic multilayer conical shells obeying Hooke law under axial compression or external pressure
05 p0840 A69-16198

Steady state frequency response of conical and cylindrical shells under lateral excitation
06 p1021 A69-17147

Yield point for simply supported conical shell loaded through central boss at vertex
06 p1023 A69-17375

Post-wrinkling nonlinear behavior of conical shell of revolution subjected to bending loads
[AIAA PAPER 69-90]
06 p1027 A69-18074

Variational method for safety limits of perfectly plastic simply supported conical sandwich shells subjected to uniform internal pressure and obeying Mises yield criterion
08 p1416 A69-20702

Stress-strain problem of geometrically nonlinear conical shell subjected to creep, giving method for complex deformation solution
09 p1612 A69-21497

Buckling of cylindrical and conical sandwich shells with fiberglass/epoxy facings and aluminum honeycomb cores
[AIAA PAPER 68-294]
09 p1616 A69-21942

Free vibrations in axisymmetrically loaded orthotropic circular conical shells with longitudinal and circumferential stiffening based on linearized theory, considering shear deformation and inertia
11 p1969 A69-24327

Stiffener geometry and spacing effects on buckling of axially compressed cylindrical and conical shells
11 p1979 A69-24815

Thin conical elastic shell stress-strain state calculated by computer for arbitrary thicknesses and loading conditions, considering temperature and edge forces effects
11 p1981 A69-24943

Thin elastic conical shells asymmetric deformation under stresses and strains, deriving asymptotic solution
11 p1983 A69-25090

Bending theory for truncated multilayer anisotropic conical shells, defining relations between displacements and external forces
11 p1984 A69-25141

Surface wave patterns of truncated conical shells with free edges attributed to mechanical properties
12 p2178 A69-26002

Postcritical deformations of thin conical elastic shells hinged along edges under external pressure using Pogorelov method for cylindrical shells
12 p2181 A69-26609

Creep stresses and displacements in conical membrane shells at small angle of attack to supersonic flow field, discussing temperature distributions
13 p2364 A69-28205

Collapse pressure of flush cylindrical nozzle axisymmetrically intersecting conical pressure vessel for rigid plastic shells
15 p2704 A69-30289

Eigenvalues of truncated orthotropic shells of revolution with degenerate poles and various rigidities and geometries
16 p2873 A69-32133

Anisotropic conical shells free vibrations analyzed by Galerkin and operator-matrix methods, neglecting transverse shear deformation and rotatory inertia effects
16 p2874 A69-32165

Free vibrations of thin truncated circular conical shell and reinforcing rings and stringers, determining resonant frequencies for stiffened and unstiffened configurations
17 p3051 A69-32955

Frequency and mode shapes of conical shell free oscillations related to shell parameters and boundary conditions
17 p3058 A69-33201

Test stand for free oscillations frequencies and mode shapes of truncated conical shells of revolution with clamped edges and one free edge
17 p3058 A69-33202

Cylindrical and conical panels dynamic responses to time varying load distributions, using trigonometric series coupled with finite difference methods
[ASME PAPER 69-APM-22]
18 p3214 A69-34396

Cantilever truncated conical shell stability under tensile stresses solved by strain energy technique
18 p3216 A69-34574

Limiting equilibrium of variable thickness shallow spherical and conical shells of revolution under axisymmetric loads, assuming rigid plastic shell material
18 p3225 A69-35370

Structural analysis of thin walled conical shell with variable external loading and Winkler-base elastic filler, using linear differential equation with variable coefficients
19 p3436 A69-35846

Elastic closed and truncated conical shell stability with initial deflections under dynamic critical loading
21 p3834 A69-38716

Lift coefficients of idealized tunnel type ram wing consisting of truncated semiconical shell computed by lifting surface theory
22 p3860 A69-40819

Statics of axisymmetric deformation of cylindrical and conical shells of revolution of moderate thickness under uniformly and nonuniformly distributed loads
23 p4226 A69-41705

Algorithm for stress analysis of structurally orthotropic conical and cylindrical shells, resolving first order differential equations
23 p4229 A69-42000

Truncated conical sandwich shell suspended in free-free condition measured and analyzed for vibrational characteristics
23 p4235 A69-42462

Collapse load of shallow conical shells clamped at base and loaded through finite rigid boss, using Tresca yield condition for sandwich shell
23 p4236 A69-42496

Buckling of truncated conical shells under torsion with various boundary conditions, applying Galerkin method to estimate critical load and wave number
24 p4395 A69-42715

Longitudinal elastic waves produced in truncated hollow Al cone due to steel spheres impact
[ASME PAPER 69-APMW-15]
24 p4401 A69-43101

CONICS
U ELLIPSES
U HYPERBOLAS
U PARABOLAS

CONJUGATES
Micropulsations at magnetoconjugate points in Arctic and Antarctic, noting diurnal and seasonal variations and latitude dependence
01 p0068 A69-11112

World maps highlighting differences in geomagnetic field at conjugate localities
02 p0245 A69-12737

Spatial and temporal conjugacy of visual auroras during magnetically quiet periods
05 p0753 A69-16247

Magnetic activity dependence of VLF emission properties at magnetically conjugate points
06 p0920 A69-17735

Conjugate gradient and Davidson-Fletcher-Powell methods applied to nonlinear optimization problems
09 p1474 A69-22442

Geomagnetic fluctuations positive and negative correlations at conjugate pair stations Syowa base and Reykjavik
10 p1681 A69-22806

Conjugated gradient components of optimization criterion in automatic control determined by applying sensitivity method to computation
11 p1857 A69-24367

Elliptic boundary value problem for differential equation and pseudodifferential boundary conditions, obtaining Green formula from formulated conjugate problem

12 p2121 A69-26200

Auroral phenomena observations at magnetically conjugate regions including luminous aurora, riometry of auroral radio absorption, balloon-measured X rays and magnetic disturbances

21 p3708 A69-38493

Spatial gradient and amount of auroral radio absorption measured by riometers at magnetically conjugate and closely spaced stations

22 p3934 A69-39966

Conjugate points along lightlike geodesics in general theory of relativity, deriving existence from vector field matrix properties and Ricci curvature

23 p4213 A69-41724

Differential games derived for conjugate-point necessary conditions and definitions for minimum and maximum problems

24 p4340 A69-42959

CONJUGATION

Conjugate echoes in Alouette 2 topside sounder ionograms explained by multiple reflections between conjugate points of field line, noting magnetospheric waveguides role

08 p1274 A69-20045

CONNECTIONS

U JOINTS [JUNCTIONS]

CONNECTIVE TISSUE

U CARTILAGE

U COLLAGENS

U MARROW

CONNECTORS

NT UMBILICAL CONNECTORS

Precision coaxial connectors, giving IEEE standard mechanical, electrical and environmental specifications for general precision connectors using coplanar butt joints

02 p0222 A69-12757

Foldable tubular connection application to expandable lattice structure, analyzing cross sectional distortions

06 p1024 A69-17608

Glass vacuum systems grease free assembly method using heat shrinkable polyolefin sleeve tubing connector for compression of O ring joints

08 p1320 A69-20529

Short multiconical TE sub 01 mode X band taper for connecting two different diameter circular waveguides

09 p1468 A69-22604

U ELECTRIC CONNECTORS

CONOIDS

U CONICAL BODIES

CONSERVATION

U WATER RECLAMATION

CONSERVATION EQUATIONS

Conservation equations for steady incompressible flow in variable area duct with mass transfer at walls simplified by linearizing inertial and convective terms

03 p0413 A69-13011

Permissible nonthermal convection modes in planetary interiors derived from conservation equations for self gravitating homogeneous nonrotating compressible fluid spheres

07 p1213 A69-18611

Gas segregation in positive column of DC discharge due to axial ion motion analyzed using conservation equation

08 p1361 A69-20145

Conservative system /with two degrees of freedom/ motion in plane harmonic force field with potential satisfying Laplace equation, discussing graphic trajectory construction

11 p1920 A69-25745

Boundary layer equations describing momentum, energy and mass concentration conservation in axisymmetrical turbulent jet flame solved for Lewis number unity in von Mises plane

13 p2379 A69-28455

Spherical symmetric unsteady conservation equations describing transient burning of volatile fuel droplets, obtaining time dependent fuel and heat distribution in flow field

14 p2537 A69-29016

Mach disk and Riemann wave location, size and strength in underexpanded jet flows, proposing model for conservation equation satisfaction

[AIAA PAPER 69-665] 17 p2954 A69-33460

Plane light wave propagation in homogeneous isotropic medium with fluctuating dielectric constant

using perturbation theory and integrating energy conservation law

18 p3173 A69-35127

CONSERVATION LAWS

Energy transport in atmosphere studied by considering sphere in isotropic fluid in infinite field without gravity, using first law of thermodynamics

01 p0067 A69-11032

Conservation laws of energy and linear momentum in general relativity formulated, noting application to radiating gravitational systems

01 p0121 A69-11286

Total conserved momentum-energy of electromagnetic interaction of system of point charges in Wheeler-Feynman theory, noting mass defect of connected system

04 p0631 A69-15058

Interaction between point charges in Wheeler-Feynman electrodynamics, noting impossibility of deducing momentum and energy conservation from variational principle

04 p0631 A69-15059

Local creation of mass in steady state universe as source of static field energy propagating away at speed of light

09 p1601 A69-22212

Matrix formulation of electromagnetic field equations and nonlinear conservation laws for measurable quantities

10 p1725 A69-24049

Hydrodynamic equations and conservation laws for nonviscous fluid in postNewtonian approximation of Brans-Dicke theory applied to gaseous mass dynamic instability

10 p1789 A69-24130

Charge bunching approach for gravitational hydrodynamic instability of infinite uniform self gravitating system in translational motion, using conservation laws

11 p1961 A69-25105

Existence theorems for hyperbolic genuinely nonlinear systems of conservation laws, studying Cauchy problem

11 p1909 A69-25163

Isotropic and anisotropic dust cosmological models density perturbation growth, considering angular momentum conservation in expanding universe

13 p2343 A69-27619

Newman-Penrose formalism for conserved quantities in general relativity, giving group theoretic interpretation

14 p2486 A69-29450

Energy release efficiency in gravitational collapse, estimating rest energy fraction from energy conservation, neutron star stability and spherically symmetrical systems collapse considerations

16 p2853 A69-31594

Conservation laws in general relativity, discussing Noether theorem, Bianchi identities, superpotential, Einstein-Klein theorem, momentum method and outgoing radiation

16 p2813 A69-32362

Critical review of Deriugin theory of scattering from rough lamellar surfaces using separation of variables method, discussing energy conservation violation

17 p2930 A69-33885

Conservation theorems for energy and mean circulation in inviscid rotating fluid, noting inertial wave spectrum continuity

18 p3121 A69-34550

Conservation laws and Liapunov stability of free rotation of rigid body about principal axes derived from kinetic energy and angular momentum

19 p3397 A69-35612

Integro-interpolation difference schemes for gas dynamic equations system satisfying laws of mass, momentum, energy conservation and energy balance

23 p4151 A69-41527

CONSOLES

U REMOTE CONSOLES

CONSOLIDATION

Shrinkage and heat release of polyglycol malcinate binder during gamma radiation consolidation compared with thermochemical consolidation

12 p2117 A69-25991

CONSTANTS

NT BOHR MAGNETON

NT GRAVITATIONAL CONSTANT

NT GRUNEISEN CONSTANT

NT SOLAR CONSTANT

Conversion of Woolard theory coefficients of tidal irregularity of earth rotation to new system of constants

09 p1484 A69-21383

Maxwell theory basis of special theory of relativity, discussing universal length constant

11 p1920 A69-25562

Torkington progressive rigidity model with successive minimum requirements relation to diagonal matrix elements of molecular force constants

17 p3068 A69-34230

Conversion of Woolard theory coefficients of tidal irregularity of earth rotation to new system of constants

18 p3127 A69-34771

OH emission source in constellation Canis Major discovered with interferometer in October 1968, noting nearby IR object

09 p1591 A69-21448

Relative element abundances in Cyg, Her and Boo atmospheres, calculating curves of growth by Planck gradient method for stellar spectra

14 p2519 A69-29356

Star chains around Eta Carinae, discussing nonrandom real groupings and probability criteria using ADH red sensitive plate without filter

16 p2856 A69-31931

Photoelectric observations of W Ursae systems, including observed and computed times of minimum light and period change

16 p2863 A69-32399

BetaCrB atmospheric microturbulence velocity, ionization and excitation temperatures, electron pressure and abundances determined by spectrophotometer

16 p2864 A69-32592

MK system spectral types determination for B, A and F type stars from slit spectrograms near NGC 2264

23 p4211 A69-41487

Proper motions and spectroscopic data of bright members of II Per and I Lac associations analyzed to determine expansion age

23 p4221 A69-42385

CONSTITUTIONAL DIAGRAMS

U PHASE DIAGRAMS

CONSTRAINTS

Optimum control with respect to minimum fuel and power consumption involving constraints based on Kuhn-Tucker conditions and saddle point theorem

02 p0223 A69-11564

Nonlinear programming of optimization of parameters and control functions of dynamic systems

03 p0408 A69-12974

RLC two terminal bridge network synthesis, considering two reactances, three resistances and constraints

09 p1464 A69-22291

Weight minimizing of circular disk subjected to behavioral and side constraints, considering resonance frequency of vibration and tolerances

[ASME PAPER 69-VIBR-1]

10 p1700 A69-24159

Constraint theory for analysis of mathematical models to alleviate software problems associated with simulation of complex large scale systems

11 p1858 A69-24936

Panel flutter under loads along profile, evaluating constraints dynamic characteristics by Hamilton principle

15 p2712 A69-31001

Acceleration injury noting water immersion effect on cat lung due to intense body vibration, suggesting restraint as practical solution

17 p2913 A69-33009

Scientific satellites structural design problems, considering limitations imposed by weight, layout, environmental conditions, mission and manufacture

18 p3208 A69-34792

Aircraft performance optimization using computationally oriented strategy for handling state variable inequality constraints

[AIAA PAPER 69-812] 19 p3243 A69-35628

Motion equations of holonomic system of elastic bodies subjected to scleronomic, ideal and statically determinate constraints, using Green tensor

19 p3374 A69-36584

Constraint restoration in holonomic and non-holonomic problems involving system of algebraic or transcendental equations or first order differential equations
19 p3361 A69-36758

1967 Space Treaty peaceful activities definition, suggesting explicit provisions regarding treaty province, enforcement machinery and implementation
20 p3636 A69-37112

Satellite Airborne Communications /STAIRCOM/ design constraints
20 p3497 A69-38314

Normalized hodographic mapping for constrained trajectory families, discussing mapping concepts, information content and applications
[AIAA PAPER 69-924] 21 p3809 A69-39362

Synchronous communications satellite launch constraints for fixed time or node, noting application to IDCSP/A mission and sun angle, occultation and transfer orbit
[AIAA PAPER 68-445] 22 p4036 A69-40543

Extremal trajectory formulations for state variable inequality constrained optimization problems, forming augmented functional
23 p4182 A69-41907

Tiltable conventional radio telescopes possibilities of passing gravitational limit for diameter and shortest wavelength, discussing dead load
23 p4231 A69-42138

N-terminal parent networks with symmetry constraints derived for nonredundant one port configurations through combinatorial functions test patterns, using computer algorithm
23 p4134 A69-42524

Slack variable to transform optimal control problem with scalar inequality constraint on state variables into unconstrained problem of higher dimension
24 p4291 A69-43270

Ionization rate limiting processes behind strong shock waves in pure N, plotting electron density profile diagrams
24 p4302 A69-43367

CONSTRUCTIONS

Exact analytic solution for thermal conductance of two dimensional eccentric constriction in dimensionless numbers
18 p3228 A69-34375

Coronary vessel lumen changes under oligemic hypotension resulting from circulating blood volume decrease in anesthetized cats, discussing constrictory coronary vessel responses
23 p4084 A69-41470

CONSTRUCTION

Cobalt base alloy for construction in high temperature corrosive environment, discussing mechanical properties, oxidation and corrosion resistance and phase stability
01 p0095 A69-10546

Construction practice for hot-mix bituminous pavements covering production, composition, application and quality control
01 p0057 A69-11276

Construction of large parabolic antennas for radio astronomy and satellite communication, noting dimensional accuracy, directional precision and dynamical behavior
09 p1476 A69-21650

Construction techniques for lightweight mirrors for secondaries, considering optical finishing and thermal expansion
12 p2058 A69-26420

Construction applications of electronic computers - Conference, Weimar, June-July 1967, Volume I
21 p3831 A69-38413

CONSTRUCTION MATERIALS

Structural weight fraction factor analysis leading to improvements in materials and structures
[AIAA PAPER 68-331] 01 p0011 A69-11021

Constitutive equations for dynamic material behavior permit consideration of large deformations in direct manner
02 p0343 A69-12286

Engineering glass manufacturing, properties and applications in buildings, vehicles, lamp and electronic devices, etc
04 p0619 A69-14585

Handbook of techniques in high pressure research and engineering, discussing construction materials, design and construction methods, measuring techniques, etc
07 p1137 A69-18412

Dynamic stability of thin flat plates and applications in ship and aircraft deck construction, studying dynamic buckling for rectangular plate
08 p1415 A69-20665

Lunar soil as building material and extraction of water, oxygen and rocket propellants from lunar materials for lunar colony needs
13 p2352 A69-27907

Thermosetting adhesives properties and structural applications in aircraft, space and automotive use, discussing polymer systems, moisture, surface preparation, aging, etc
14 p2468 A69-29340

Heterocyclic-aromatic organic polymer adhesives used for high temperature structural purposes, discussing processing, testing, formulating and impact on basic research
14 p2469 A69-29346

Mg alloys applications to construction, discussing strength-to-weight ratio of cast and wrought alloys
16 p2801 A69-31787

Aircraft construction materials, discussing aluminum alloys use in Concorde project based on temperature tests, creep and fatigue properties and joint requirements
16 p2801 A69-31791

Civil aircraft projected development regarding materials and structures, discussing new components and fuel contribution to weight and metals and composites for replacing Al
16 p2872 A69-32024

Cellular carbon castings fabrication by carbonization of polyurethane polyfurfuryl alcohol foam for high temperature applications, noting properties
17 p2992 A69-33373

Prestrained material plastic behavior experiments and deformation lines of influence analysis, noting importance in cold working
17 p3067 A69-34146

Airport runway surface construction materials requirements, taking into account factors different from highway pavement
17 p2948 A69-34215

Metal alloys mechanical properties summary for cryogenic applications, considering fracture and thermal behavior, cryogenic structures fabrication and composites applicability
18 p3158 A69-35416

Static dynamic and damage tolerant strengths of advanced materials for VTOL aircraft with emphasis on Ti, cryoformed 301 stainless steels and filamentary composites
[AIAA PAPER 69-764] 19 p3433 A69-35658

Electron beam welding for fabrication of aircraft structures, discussing fatigue strength of Ti and Al alloys and marring and low alloy steels
[SBAC PAPER 12] 20 p3550 A69-37456

Conducting and insulating construction materials at high temperatures for MHD conversion nozzles, noting lifetimes
21 p3751 A69-38456

Loaded bipropellant liquid propulsion system sterilization studies on structural and nonmetallic materials suitability for use in oxidizer
[AIAA PAPER 68-631] 21 p3785 A69-39025

Mounting elements alloys relaxation characteristics at various temperatures, considering effects of scale factor and stress concentrations
23 p4169 A69-41419

Low temperature mechanical properties of structural materials for high energy propulsion systems, using low boiling point propellants as liquid hydrogen, fluorine and oxygen
23 p4177 A69-42159

Fuel cells construction materials selecting and optimizing techniques using diffusion block and differential corrosion concepts
23 p4075 A69-42299

Aircraft Structures and Materials Application - Conference, Seattle, September 1969
24 p4321 A69-43416

Fastener materials selection for high temperature aircraft structures, considering various physical properties influence
24 p4325 A69-43441

CONSULTING

1967 Space Treaty legal aspects of consultation, suggesting international permanent body setup for resolving technical and political matters
20 p3636 A69-37111

CONSUMPTION

U FUEL CONSUMPTION
U OXYGEN CONSUMPTION
U WATER CONSUMPTION

CONTACT LENSES

Contact lenses hazards during high altitude aircraft piloting analyzed via bubble development
23 p4106 A69-41806

CONTACT POTENTIALS

Electromagnetic waves parametric interactions during unsteady Josephson effect as function of wavelength ratio, magnetic field penetration and contact dimensions
02 p0293 A69-11464

Equations for pn junction behavior valid at impurity concentrations beyond nondegenerate range, noting contact potential and carrier density
11 p1938 A69-25306

Optimum metal contact stripe width for CW operation of GaAs junction lasers bonded on copper heat sink
16 p2796 A69-31698

Ion beam sputtering, evaporation and electrical degradation of Al contacted Si solar cells observed in high temperature cyclic tests
19 p3250 A69-35686

Electrochemically passivated Ti/Pd/Ag contacts for Si solar cells tested in humidity stress and temperature cycling
19 p3250 A69-35687

Geometrical model for surface contact area, noting influence of nonlimitations on friction coefficient in elastic deformation
19 p3329 A69-36494

CONTACT RESISTANCE

Contact resistance of In or In-Ga on CdS single crystals
03 p0487 A69-13638

Electrical conductivity of high resistance epitaxial semiconducting films measured by three probe method
04 p0597 A69-14538

Subject classification bibliography for thermal contact resistance
[ASME PAPER 68-WA/HT-18] 05 p0847 A69-16122

Elastic contact between two parallel cylinders with rough surfaces noting contact area, spots and stress distribution
06 p1023 A69-17373

Gunn effect for cathode contacts with interface resistance, developing contact characteristic boundary condition concept for explaining cathode fall and other phenomena
07 p1199 A69-18649

Presprayed metal films influence on visibility and contact resistance of GaAs prior to fusing in Sn, In and lead contacts
10 p1748 A69-24214

Thermoelectric power generators energy output efficiency, discussing thermal and electric contact resistances influence for optimizing parameters
12 p2016 A69-26364

Contact between cylindrical surfaces in thermionic converters, determining thermal resistance and pressure in contact area
14 p2400 A69-29216

Thermal contact resistance measurement at various ambient pressures compared with theoretical predictions with each parameter analyzed over interface by computer program
[AIAA PAPER 69-629] 17 p3073 A69-33299

Terminal characteristics of composite superconductor, taking into account heat transfer to coolant, interface thermal contact resistance and superconductor size
17 p3007 A69-33792

Gold/polycrystalline cadmium selenide film contact found ohmic in darkness and barrier in light, noting potential distribution, electron concentration and energy gap
19 p3384 A69-36480

Metal semiconductor contact resistance determination from measuring voltage drop in current passing through contact and second metallic contact
21 p3780 A69-39046

Electrical sliprings assembly development with low dynamic resistance and long lifetime for space simulation testing, noting wear rate of rings and brushes
[AIAA PAPER 69-1035] 22 p3925 A69-40402

Thermal isolation characteristics of low conductance interstitial materials determined, using test apparatus of axially loaded radiation shielded cylindrical column in vacuum
[AIAA PAPER 68-31] 23 p4239 A69-41889

Potentiometer transient contact resistance determined as function of contacts physical parameters
23 p4166 A69-41996

CONTACTORS

Contactors for helium in dilution refrigerator mixing chamber, discussing design and thermal resistance determination
09 p1493 A69-21429

CONTACTS [ELECTRIC]
U ELECTRIC CONTACTS
CONTAINERS

Containerized freight, discussing means of transport, methods of distribution, suitable aircraft for carriage, economic and social effects and combined air-water-land transport

02 p0228 A69-11887

Aged boric acid coated silica reaction vessels, showing reduced surface effects and high reproducibility in oxidation reactions

02 p0205 A69-12322

CONTAINMENT
U NUCLEAR REACTOR CONTROLCONTAMINANTS
NT RADIOACTIVE CONTAMINANTS
NT TRACE CONTAMINANTS

Chlorine as indicator of terrestrial contamination in iron meteorites, using neutron activation analysis and metallographic observation

08 p1405 A69-20923

Hydrogen laser operation time reduction attributed to hydrocarbon formation on inner surface of storage flask, promoting atomic hydrogen recombination

15 p2634 A69-30942

CONTAMINATION
NT FUEL CONTAMINATION
NT SPACECRAFT CONTAMINATION

Salt water stress corrosion cracks morphology in titanium alloy, discussing crack propagation, brittle nature and chloride contamination effect [SAE PAPER 680642]

03 p0444 A69-13458

Ultrahigh vacuum electron microscope using differential sputter ion pumps to obtain low contamination environment

04 p0599 A69-15016

Microorganism viability in rocket engine combustion environments used to determine probability of biological contamination of Mars by Voyager missions

05 p0714 A69-15949

Split-seam process for inserting sterile objects into isolated sterile environment without contamination as method for sterile spacecraft repair

05 p0714 A69-15950

Mars contamination with terrestrial microorganisms, considering possibility of waste materials ejection from manned orbital vehicles

05 p0714 A69-15951

Microbiological surface sampling methods, noting role in detecting contamination on eating utensils, blankets, sheets, etc

05 p0715 A69-15982

Pollution control forecast, contamination control specialist and systems approach

08 p1265 A69-19808

Tritium contamination reduction in small ion accelerators for neutron production, discussing pumping problems and vacuum systems

12 p2059 A69-26499

Barbados airborne dust collections showing metal fragments and black magnetic spherules contaminants from handling, discussing deep sea cosmic spherules and zodiacal cloud

12 p2075 A69-26964

Earth contamination by returned lunar or Martian material, discussing extraterrestrial biota survival on earth

13 p2210 A69-28467

Avionics clean room workshops, discussing turbulent and laminar flow rooms and contamination monitoring of controlled environment facility

16 p2767 A69-32369

Gas particle concentrations on moon due to solar wind, surface emissions and atmospheric contamination by lunar operations and rocket motor products

18 p3189 A69-34236

Microbial contamination release from impact-fractured solids, examining bacterial spores growth in fractured methyl methacrylate plastic for application to space exploration

20 p3475 A69-37614

Soviet book on fluid contamination influence on aircraft hydraulic systems operational reliability covering friction, particle size, filtration, etc

21 p3649 A69-39530

CONTINENTS
NT AFRICA
NT AUSTRALIA
NT EUROPE
NT NORTH AMERICA
NT SOUTH AMERICA

Economic and scientific reasons for using artificial satellites to establish continental geodetic network, noting continental displacements and terrestrial pole motion observations

[UN PAPER 68-07445] 06 p0917 A69-17069

Circadian rhythms characteristics of healthy human beings as reference standards for comparing investigation data from different continents

23 p4083 A69-41457

CONTINUITY [MATHEMATICS]

Upper semicontinuity of subsolutions of second order elliptic partial differential equations in divergence form with discontinuous coefficients

02 p0270 A69-11548

Integral prediction method for arbitrary continuous function on right hand side of nonhomogeneous linear differential equation with constant coefficients

03 p0455 A69-13022

Stokes phenomenon, considering continuity solution of differential equations across Stokes lines

07 p1174 A69-19220

Tricomi theorem extension concerning intermediate value property of continuous real valued functions of real variable

09 p1533 A69-22797

Theorem for necessary and sufficient condition for continuity of Chebyshev operator

10 p1718 A69-22875

Continuity of optimal control of nonlinear plant, noting search time

21 p3686 A69-38884

CONTINUITY EQUATION

Exponential approximation with piecewise linear error criteria for continuous function over interval

01 p0107 A69-11415

Infinite system of first order integral equations derived from Prandtl boundary layer equation and continuity equation

02 p0231 A69-12059

Algorithm for Navier-Stokes and continuity equations used to derive curvilinear coordinate system

04 p0564 A69-14858

Motion of vapor derived from solid material vaporization and subsequent heating by nonequilibrium continuum radiation, noting continuity equations and energy transfer

04 p0686 A69-14985

Continuity and momentum equations for cosmic ray gas particles in interplanetary region

06 p0992 A69-17379

Simultaneous solution of time-dependent momentum and continuity equations for ions and neutral air in midlatitude F 2 region conditions

07 p1123 A69-18818

Existence and uniqueness to boundary layer continuation problem based on flow equation for steady gas flow

10 p1679 A69-23569

Electron number density LF oscillations for ionized gas identified with periodic solutions to neutral and charged particle plasma continuity equations

11 p1925 A69-24315

Production source of ionization due to low energy electron influx and inclusion in ionospheric continuity equation, noting quiet ionosphere

12 p2066 A69-26112

Elliptic second order equation showing nonequivalent regularity conditions for Laplace and continuous coefficient equations

13 p2288 A69-27743

Simultaneous solution of continuity and heat conduction equations for ionospheric plasma consisting of electrons, atomic O ions and neutral gas species, discussing varying solar flux effects

16 p2849 A69-32082

Simultaneous solution of continuity and heat conduction equations for ionospheric electrons, ions and neutral species for studying F region magnetic storm behavior

16 p2775 A69-32083

Wind velocity and precipitation particle terminal fallspeeds component determination from continuity equation for data collected by Doppler radar

17 p2919 A69-33162

Transport properties of free turbulent mixing of subsonic coaxial streams by introducing environmental distributions in integrals of momentum, energy and species continuity equations [AIAA PAPER 69-681]

17 p2956 A69-33495

Canopy filling time for parachutes under infinite mass conditions, using continuum equation and parachute inflation concept [AIAA PAPER 68-12]

17 p2902 A69-34032

LF oscillations in electron number density of ionized deuterium, Ne and He identified from particle continuity equation

22 p3986 A69-40759

Midlatitude F region continuity equation solutions, including east-west electric field effects on electron density

22 p3941 A69-40917

CONTINUOUS NOISE

Continuous noise level effects on stabilized escape conditioning in male albino rats

24 p4262 A69-42948

CONTINUOUS RADIATION
NT MODULATED CONTINUOUS RADIATION

Continuous wave laser absolute power measurement by calorimeter consisting of wire wound in shape of cone

01 p0078 A69-10029

Continuous wave solid state lasers active elements temperature fields calculated by differential equations

01 p0089 A69-10105

Continuous nonresonant visible radiation from Ar ion laser by utilization of wide bore, wall stabilized gas discharges, noting long time frequency stability

01 p0091 A69-10815

Continuous laser beam power output meter based on wire resistance thermometry method

01 p0081 A69-10822

One dimensional expansion of laser beam, using pairs of prisms with continuous wave output

01 p0091 A69-10852

Free bounded continuum processes effect in nonequilibrium gases of finite continuous opacity, noting curves of growth for finite plane parallel layer emission lines

01 p0121 A69-10959

LF continuous wave rocket propagation in D region presented in terms of electron density profiles

01 p0076 A69-11232

Polarization of nightglow, line vs continuum

02 p0235 A69-11428

Continuous wave GaAs injection lasers operation at high temperatures shown possible by using available threshold current densities with suitable heat sink materials

02 p0255 A69-11710

Solar continuum intensity determination in middle IR, obtaining solar disk center brightness temperature measurement by comparison with black body model

02 p0318 A69-12041

Additive noise measurement in microwave power amplifiers under continuous wave and pulsed conditions

02 p0221 A69-12454

High power output CW laser oscillation measured at 4416 Å laser transition in Cd 2 using single isotope of Cd 114

02 p0259 A69-12653

Tunable optical parametric oscillator using argon laser CW output as pump and lithium niobate as nonlinear crystal

02 p0260 A69-12701

High power output from submillimeter continuous wave gas laser

04 p0609 A69-14289

Continuum radiation of quasars, adopting cosmological interpretation of red shift

04 p0648 A69-14565

Relaxation method for separation of continuous electron/ion recombination spectrum from electron spectrum in nonequilibrium gas discharge plasma

04 p0639 A69-15369

Emission continuum intensity of negative nitrogen ion in nitrogen and air plasmas

04 p0639 A69-15370

Continuous absorption of coefficient hydrogen-carbon plasma at 40,000 degrees K and 70 atm in 230-460 nm spectral range

04 p0639 A69-15371

Continuous radiation production in positive plasma column of inert gas considered as manifestation of plasma electrons bremsstrahlung from interaction with gas atoms

05 p0800 A69-15741

High power continuous and quasi-continuous wave UV generation by ADP and KDP crystals in argon-ion laser cavity [IEEE PAPER B-1]

05 p0773 A69-16308

Continuous UV noble gas ion lasers, noting small signal gain and power output limit at various current densities for strong lines [IEEE PAPER L-1]

05 p0775 A69-16321

Continuum position location and total line absorption in solar spectrum, using Houtgast high dispersion intensity measurements of UV region

05 p0828 A69-16611

Optical mean energy distribution of quasars, discussing red shift effects, significance of physical origin of optical continuum radiation and K-term magnitude determination

06 p0999 A69-16975

Radial electron concentration profile determination by spectroscopic examination of continuous plasma radiation of pulsed discharge in capillary

06 p0964 A69-17253

CW room temperature laser using lanthanum sodium molybdate crystals with positive trivalent Nd ion impurity

06 p0934 A69-17262

CW laser mode steady excitation and narrow bandwidth obtainable by highly stable pumping and stable temperature of active element

06 p0934 A69-17681

High power noble gas CW UV ion laser with W disk structure, showing continuous UV output limitation by optical degradation effects

06 p0936 A69-17900

Nonequilibrium low temperature plasma theory for ionization and particle distribution based on discrete and continuous spectra states, discussing electron distribution function

06 p0969 A69-17906

Radio source CP 1133 at 408 Mc, noting upper and lower limit to continuous emission between pulses

06 p1009 A69-17969

X band CW traveling wave tube developed for communications, ECM and plasma research, discussing design, performance and gain ripple diminution

07 p1094 A69-18425

Avalanche diode oscillators efficiency of continuous wave operation in transit time mode and high current multiresonant modes

07 p1098 A69-18456

Iodine IR laser, discussing CW emission obtained at various wavelengths and attributed to electronic transitions in atom

07 p1154 A69-19082

Gain enhancement effect of CO on carbon dioxide CW laser performance by accelerating relaxation of bending mode

07 p1155 A69-19088

Frequency modulation of CW mm-wave IMPATT diode oscillator with wide band tunability and related harmonic generation effects

07 p1106 A69-19146

Output and beat frequency of carbon dioxide laser with various resonator configurations realizing single mode operation

07 p1156 A69-19157

Solar photosphere model with two stream columnar representation of granulation for predicting continuous radiation field

07 p1217 A69-19238

Radiative opacity in stellar atmospheres, discussing effect of UV continuum on photospheric radiation field

07 p1221 A69-19393

Stimulated emission of water cooled CW Nd doped lanthanum fluoride at room temperature

08 p1323 A69-19945

Radiative capture of electrons by chlorine, bromine and iodine atoms in shock heated plasma seeded with sodium halides from absolute intensities in continuous emission

08 p1355 A69-20735

Passivated metal semiconductor IMPATT diode for microwave CW oscillation

08 p1286 A69-20862

CW helium-neon laser used to detect and measure vibration frequencies of uniform diffuse surfaces

09 p1515 A69-21430

Continuous signal over finite time intervals represented by impulse functions of linear channel

09 p1454 A69-21723

Continuous radiation spectrum of Taurus A in far IR using indium antimonide detector of Rollin type

09 p1597 A69-22156

Intensity distribution in principal mode of TEM oscillations at various gain amplification levels, plotting intensity distribution generated by argon ion CW laser

09 p1520 A69-22685

Pulsed and CW lasers glass crystals temperature fields determination, including tangential and axial thermal stresses

10 p1702 A69-23428

Self focusing of CW argon laser beam due to absorptive heating in crown glass, emphasizing time dependence of beam diameter as function of distance

10 p1706 A69-24009

Polarization observation of star BL Lac continuum by multichannel scanner, noting photoelectric UVB observations and identification with radio source

10 p1785 A69-24090

Dye lasers CW operation feasibility, showing sufficient quenching of rhodamine 6G triplet state by oxygen dissolved in methanol

11 p1893 A69-24344

Gas lasers coherence properties and availability for holography, discussing continuous power output of He-Ne, Ar and Kr ion lasers

11 p1895 A69-24680

High power CW carbon dioxide laser saturation and discharge conditions analyzed by rate equation

11 p1898 A69-25050

Far IR CW gas laser design for maximum output, discussing pulsed operation, wavelength measurement and radiation detection

11 p1898 A69-25051

High CW power K-band Gunn oscillators attained through control over doping level, profile and GaAs epitaxial layer thickness

12 p2036 A69-25907

Phase pulsations between normal frequencies and combination tones in CW gas laser output, analyzing observations by scanning interferometer

12 p2108 A69-26635

Pulsed or continuous radiation generated in laser having active element of neodymium glass fragments

12 p2109 A69-26715

Far IR and millimeter solar continuum, analyzing flatness of limb darkening curves and brightness temperature near minimum

13 p2341 A69-27591

Radio emission from high level transitions in hydrogen calculated by superposing emission lines on background continuum, using Gaunt factor for free-free emission

13 p2327 A69-27596

Quasi CW solid state doped lasers excited by pyrotechnic pump sources with potassium perchlorate oxidant and zirconium fuel, noting power to weight ratio

13 p2272 A69-28116

CW lasers based on composite yttrium fluoride type crystals, noting large number of intense emission bands

13 p2273 A69-28316

Contour maps of Milky Way continuum radiation at 1410 and 2650 MHz from low latitude survey, listing sources with estimates of flux density

14 p2526 A69-29772

Calorimeter for CW laser output power absolute measurement, discussing operation principles, structural features, circuit and accuracy

15 p2608 A69-30320

Activity in Crab Nebula from 200-inch continuum and polarization plates, discussing nature and motion of wisps

15 p2691 A69-30758

Optimum metal contact stripe width for CW operation of GaAs junction lasers bonded on copper heat sink

16 p2796 A69-31698

Zinc diffused GaAs avalanche diode high CW power and efficiency in normal mode

16 p2760 A69-32015

Relaxation method for separation of continuous electron/ion recombination spectrum from electron spectrum in nonequilibrium gas discharge plasma

16 p2822 A69-32116

Emission continuum intensity of negative nitrogen ion in nitrogen and air plasmas

16 p2822 A69-32117

Continuous absorption of coefficient hydrogen-carbon plasma at 40,000 degrees K and 70 atm in 230-460 mm spectral range

16 p2822 A69-32118

Si planar IMPATT diodes anomalous mode continuous wave UHF oscillations, noting DC density and DC/RF power conversion efficiency

17 p2934 A69-32846

Q switching of CW 337 mu maser, gain factor measurements for pulse discharges and data on saturation and time dependence

17 p2981 A69-33088

Information storage of multichannel analyzer of continuous and pulsed processes

17 p2939 A69-33900

Milky Way continuum radiation at 4170 MHz using parabolic antenna, mapping discrete sources concentration at galactic equator

18 p3200 A69-34996

Solid state CW laser frequency control during operation, discussing emission properties and laser applications

19 p3331 A69-35864

Mode coupling effects in CW gas ring lasers, considering excitation density pulsations, traveling waves dispersion, polarization, etc

19 p3334 A69-36046

Continuous IR radiation source using electrically heated Mo ribbon, comparing emission from V shape and flat portions

19 p3313 A69-36491

Markarian galaxies with strong UV continua, discussing emission spectra, red shift, absolute magnitudes, etc

19 p3426 A69-36577

Solar disk edge polarization rate determined by applying Feautrier method to transfer equations for polarized radiation

19 p3427 A69-36728

Gas mixtures CW gain characteristics at 337 mu as function of pressure, current, mixture and flow rate, considering HCN laser systems

20 p3552 A69-36995

Ionosphere absolute phase height measurement methods independent of virtual height, using fixed frequency CW emission and pulsed sounding

20 p3520 A69-37032

Continuous signal over finite time intervals represented by impulse functions of linear channel

20 p3488 A69-37459

Bistatic auroral backscatter communications conducted by recording CW transmissions from beacon transmitters to study radio aurora

21 p3709 A69-38498

Output power of CW lasers employing HCN and water vapor active medium

22 p3959 A69-39958

Type V continuum emissions from solar flares suggested as due to synchrotron radiation from protons spiraling in magnetic field, noting Type III emission

22 p4003 A69-40301

Xenon plasma continuous illumination sources design and operation for night and color aerial photography covering photogrammetric resource surveys, ground traffic, flight paths, etc

22 p3950 A69-41000

Carbitron locked oscillator with wide electronic tuning range, describing CW operation characteristics and application to ground station microwave transmitters

23 p4135 A69-41302

Xenon laser CW operation on unclassified spectral lines of high ionization states, using laser induced spectroscopy

23 p4172 A69-41399

Nitrogen-carbon dioxide-helium lasers CW operation at various pressures and N flow rates

23 p4173 A69-41496

Closed cycle gas cooling techniques for self contained CW kilowatt carbon dioxide laser, relating output power to flow velocity and input power

23 p4173 A69-41497

Intensity of optical pulses from CW GaAs injection lasers observed with fast sampling techniques

23 p4173 A69-41500

CONTINUOUS WAVE RADAR

Radar cross section laboratory, discussing experimental techniques, electromagnetic range and pulse, FM/CW and CW radars

03 p0385 A69-12912

Digital method to produce radar reflectivity from analog audio frequency Doppler data extracted from terrain echo signal of CW scatterometer radar

15 p2572 A69-31111

Aircraft electromagnetic position finding system based on Doppler shift of CW carriers

17 p3002 A69-34078

Millimeter wave pseudorandom coded CW meteorological radar for precipitation drop size spectrum analysis and cloud studies, discussing overall system design

23 p4115 A69-41531

CONTINUUM FLOW

Monte Carlo direct simulation for treating rarefied supersonic flows about bodies in transitional regime between continuum and free molecular flow

02 p0189 A69-12523

Argon flow characteristics in converging nozzle in continuum, slip and free molecular regimes

[ASME PAPER 68-WA/FE-9]

05 p0698 A69-16089

Basic frequencies of uniformly almost periodic solutions of differential equations extended, noting applications

05 p0698 A69-16089

- tion to orbit closures decomposition of almost periodic continuous flows
07 p1174 A69-18733
- Continuum flow boundary in freely expanding jet estimated from molecular mean free path and modulus of random motion mean velocity
10 p1679 A69-23425
- Boltzmann H theorem and related mathematical topics, noting applications to subsonic gas flow and continuum flow around and over body
11 p1870 A69-25008
- Argon flow characteristics in converging nozzle in continuum, slip and free molecular regimes [ASME PAPER 68-WA/FE-9]
14 p2390 A69-29445
- Gas visco seals performance analyzed for continuum flow regime, noting coefficient agreement with laminar flow analysis [ASLE FICFS PREPRINT 34]
15 p2621 A69-30494
- Hypersonic slender cone zero angle of attack drag in rarefied continuum and noncontinuum flow in shock tunnel, indicating body dimension influence in transition regime [AIAA PAPER 69-711]
17 p2891 A69-33445
- Strong shock wave structural model, considering near molecular beam, upstream hypersonic and downstream subsonic flows and beam-continuum conversion by collision
18 p3120 A69-34457
- Small continuum electrostatic probes calibration and operation in ionized plasma flow with sheath dimensions larger than boundary layer dimensions
19 p3304 A69-35719
- Gas dynamics in transition regime between continuum motion at high gas density and free particle motion at low density limit
19 p3300 A69-36658
- Comet heads gas dynamics, analyzing coma or head region as continuum source flow of dusty gas
19 p3428 A69-36807
- ### CONTINUUM MECHANICS
- Two dimensional structural model of micropolar continuum involving orientable points joined by extensible and flexible rods
01 p0169 A69-10810
- Linear stationary thermoelasticity equations for Cosserat continua, discussing static and kinematic conditions, anisotropy and centrosymmetric isotropy equations
02 p0336 A69-11557
- General theory of constitutive equations for rational mechanics of deformation and flow
02 p0341 A69-12251
- Thermodynamics of viscoplastic materials under dynamic loads within framework of continuum mechanics of materials with memory
02 p0343 A69-12281
- Viscoelastic materials thermomechanical behavior, discussing constitutive equation and derivation of stress tensor and entropy density from viscoelastic potential
02 p0344 A69-12294
- Thermodynamics of directed continuous media, discussing kinematics, equations of state, entropy inequality and material objectivity principle
02 p0354 A69-12611
- Nonlinear problems in mechanics of deformable media and qualitative analysis of properties of mathematical models of physical processes involved
03 p0467 A69-13749
- Stability margin difficulties in equilibrium application to continuum mechanics
03 p0418 A69-13816
- Thickness twist and face shear vibrations of laminated layer, determining frequencies from stress equations of motion, constitutive equations and boundary conditions [ASME PAPER 68-WA/APM-10]
04 p0668 A69-14392
- Book on continuum theory of inhomogeneities in simple bodies
05 p0833 A69-15727
- Mathematical theory for describing mechanical behavior of continuous media based on principle of determinism for stress
05 p0833 A69-15729
- Nonlinear field theories for continuum mechanics noting heat, kinematics, isotropic materials, viscometric flows, elastic bodies, thermodynamics and wave motion
05 p0792 A69-15768
- Models of continuous media with internal degrees of freedom based on Lagrangian variational principle
05 p0793 A69-15775
- Book on continuum mechanics covering elasticity, fluid mechanics, plasticity and viscoelasticity, emphasizing basic concepts
05 p0843 A69-16713
- Simple dipolar stresses, noting effect of antisymmetry on equations of motion and energy equation
06 p1022 A69-17239
- Unified methods based on dislocation theory for direct solution of problems pertaining to physical properties of metals
06 p0944 A69-17502
- Complementary variational principles for boundary value problems in continuum mechanics of solids, obtaining generalized Hamilton canonical formalism
07 p1232 A69-19173
- Thin rods and shells elastic analysis, using Cosserat continua for representing bodies in kinematics and balance and constitutive equations
07 p1234 A69-19382
- Minimum theorems in elastoplastic theory extended to continua for plastic strains governed by holonomic and nonholonomic stress-strain laws
07 p1235 A69-19442
- Linear analysis of strain in continua in terms of one-one correspondence, relative displacement and stretch dyadic
07 p1236 A69-19445
- Radiative transfer equation solution for spectral line formed in two dimensionally varying atmosphere extended to continuum radiation in inhomogeneous atmospheres
08 p1386 A69-20077
- Relativistic kinematics analog model for deformable continua, introducing deformation gradient and tensors
08 p1416 A69-20693
- Families of eigenfunctions concept for stress and strain tensors of proper motions in continuous isotropic medium, considering vortices and gradients
08 p1417 A69-20752
- Circle theorem extensions and applications to mechanics of continua, noting supersonic and subsonic compressible fluid flow
10 p1723 A69-22877
- Finite element concepts for continuum theory of shells, noting bilinear approximation for displacement and fundamental decomposition principle for large deflection
10 p1794 A69-22891
- Mechanics of generalized continua - Conference, Freudenstadt and Stuttgart, August and September 1967
10 p1798 A69-23146
- Cosserat continuum and elasticity models of dynamics of composite materials, analyzing dispersive longitudinal waves
10 p1798 A69-23148
- Stress concentration in Cosserat continua based on model of six elastic constants in linear isotropic and notch case
10 p1799 A69-23150
- Concentrated loads in elastic Cosserat continuum involving body moments and small deformations
10 p1799 A69-23151
- Dual continuum model of nonelastic processes in elasticity and dislocation theory, including incompatibility effects of interaction forces between structural elements
10 p1799 A69-23152
- Continuum theory of dislocations and internal stresses in generalized Cosserat continuum as theoretical model for crystals
10 p1799 A69-23153
- Continuum theory of dislocations and plasticity in crystals, analyzing stress fields in elastoplastic materials
10 p1799 A69-23154
- Modified Rayleigh-Ritz method for prediction of stress concentration in elastostatic problems for elastic continua, noting plate bending
11 p1969 A69-24413
- Damping properties of nonlinear viscoelastic solids with applications to vibrating continua, using Gauss principle of least constraints
11 p1970 A69-24605
- Linear two and three dimensional boundary value problems in mechanics of continua for multiply connected regions
11 p1972 A69-24651
- Continuum mechanics analysis of fractures and crack extension, discussing solids elasticity, plasticity, boundary value problems, etc
11 p1974 A69-24670
- Nonlinear theories of deformable surfaces as two dimensional generalized continua applied to elastic shells, emphasizing elastic Cosserat surface
11 p1978 A69-24805
- Continuum theory for thin elastic shells with local structural effects, emphasizing shell constituted by Cosserat material
11 p1978 A69-24809
- Analytical expressions for Gaussian constraint of continuum, using continuity conditions as equations of internal geometric couplings
11 p1984 A69-25170
- Transient dynamic response of linearly viscoelastic structures and continua, presenting finite element displacement formulation
11 p1993 A69-25528
- Plane surface finite area deformation tensors in continuum mechanics permitting separation of volume and shape changes in constitutive equations
11 p1994 A69-25603
- Computationally stable solution of finite element analysis of elastic-plastic response of nonlinear discrete structures loaded beyond yield load
12 p2185 A69-26819
- Crack growth and crack initiation in cylindrical specimens subject to low cycle strain controlled tension-compression induced fatigue, noting measurement techniques
12 p2188 A69-26914
- Relativistic kinematics of continuum motion by invariant derivatives of deformation measures, discussing rigid body motion in Born sense
12 p2189 A69-27116
- Continuum mechanics for brittle fracture analysis in metal structures, discussing plastic limit loads
13 p2275 A69-27228
- Laminar MGD electrode boundary layer of thermal nonequilibrium plasma from collisionless Langmuir sheath and continuum theories
13 p2310 A69-28031
- Elastic materials with particle interactions of finite range, establishing continuum field and constitutive equations from particle mechanics
13 p2371 A69-28674
- Linear elastic structural analysis for one, two and three dimensional continua [ASME PAPER 69-DE-13]
14 p2531 A69-28843
- Two fluid continuum theory of incoherent scattering extended to include unequal electron and ion temperatures, considering backscatter power dependency on collision frequencies
14 p2510 A69-28946
- Electromagnetic scatter from perturbed continuous medium, expressing problem in terms of periodic functions instead of conventional power series
14 p2414 A69-29513
- Variational principles of solid mechanics for finite element analysis of solid continua
15 p2705 A69-30429
- Couple-stresses effect on stress concentration of plate containing infinite row of holes, solving linear elastic problem in isotropic Cosserat continua for plate
15 p2708 A69-30640
- Book on continuum mechanics covering concepts of stress and strain, constitutive equations, field equations and boundary conditions in fluids and solids, elasticity, etc
17 p3005 A69-33323
- Mechanics and thermodynamics equations for two dimensional continua, discussing applications
17 p2994 A69-33391
- Quasi-static crack growth in viscous bodies analyzed by continuum mechanics, rheological models and energy equation, discussing fine structure
18 p3215 A69-34570
- Models of continuous media with internal degrees of freedom based on Lagrangian variational principle
18 p3173 A69-35028
- Dynamic reciprocity relationship for linear directed continuous viscoelastic media, using Stieltjes convolution
19 p3373 A69-36307
- Burger condition for distortion field of dislocation lines in continuous medium, considering arbitrary shape in arbitrary motion
19 p3439 A69-36477
- Book on continuum mechanics and hydrodynamics covering elasticity, plasticity, thermodynamics, solid and structural mechanics, aerodynamics and gas dynamics
19 p3441 A69-36771
- Solid and structural mechanics theories noting continuum mechanics role
19 p3443 A69-36776
- Body relations in continuum mechanics of solids, examining temperature influence varying in time and space
19 p3444 A69-36805

Analytic functions representation and application to theory of singular integral equations in continuum mechanics, noting Cauchy kernels and boundary value problems

19 p3361 A69-36813

Continuous particle media on basis of microstructure, discussing granular media deformation, elastic media dilatation, turbulent flow and dilute suspensions

19 p3446 A69-36833

Adjoint system for determining equilibrium stability of elastic continuum subjected to follower type surface tractions

19 p3446 A69-36835

Static theory of fibrous surface media based on continuum mechanics, neighboring fibers noninteraction principle and additivity of mechanical properties

19 p3447 A69-36858

Finite elements general theory applied to wave propagation, gas kinetics, nonlinear partial differential equations, continuum mechanics and fluid dynamics

20 p3567 A69-36948

Continuum mechanics of micropolar fluids and solids, discussing thermodynamical restrictions on elasticity and viscosity coefficients, deriving field equations and boundary conditions

20 p3624 A69-37582

Constitutive equations for homogeneous viscous fluid and Kelvin-Voigt viscoelastic solid in electromagnetic field, using linear irreversible thermodynamics and continuum mechanics

21 p3851 A69-39289

Internal interactions of continua and concept of thermal isolation, discussing second law of thermodynamics

22 p4050 A69-40450

Continuum fracture concept indicating essential surface energy interpretation difference in otherwise similar adhesive and cohesive failures

22 p3974 A69-40760

CONTINUUMS

Equations of state for continuous media, using variational principles within framework of relativity theory

12 p2131 A69-26972

Thin disk galactic models small oscillations, discussing frequency spectra and types of continua

18 p3196 A69-34551

Sunspot penumbra model in hydrostatic equilibrium accounting for continuum and Fraunhofer lines observations

22 p4019 A69-40290

Sunspot position in H alpha core relative to continuum, discussing height differences between H alpha core and continuum levels

22 p4019 A69-40291

CONTOURS

Iterative transfer of boundary values to fictitious contour in numerical solution of partial differential equations [ONERA-TP-646]

03 p0454 A69-12874

Titanium fuselage skin contouring to shallow compound curvature of supersonic aircraft by elastic draping, shot peen forming and cold stretching, discussing residual stresses

09 p1512 A69-22374

Maximum principle for infinitesimal deformations of convex surface with nonnegative Gaussian curvature, noting application to rotation and displacement diagrams

13 p2361 A69-27741

Holographic image range contouring produced by multifrequency emission from resonant output reflector in pulsed ruby laser cavity

20 p3540 A69-37733

Photogrammetric contours plotting from aerial color films

22 p3944 A69-40045

Automatic contour plotting for orthoprojector based on adjacent profiles and linear interpolation

22 p3951 A69-41248

Multiple index high contrast holographic contouring technique compared with analogous multiple frequency system

23 p4164 A69-41628

CONTRACT MANAGEMENT

Lithium-doped silicon solar cells development for radiation environments, discussing contractor functions, dopants, etc

19 p3251 A69-35692

C-5A transport aircraft airframes manufacture, discussing Lockheed profits, contract disputes and Cheyenne helicopter contract cancellation

20 p3640 A69-37355

Maintainability as design requirement in system specifications and contracts, noting MIL-STD-471 program of maintainability demonstration tests

20 p3551 A69-38268

CONTRACT NEGOTIATION

Human engineering program plans for Phase 3 of SST Development Program in accordance with airframe and engine contracts

01 p0019 A69-10451

Incentive contracts design covering cost estimates, technical performance, realistic programs and multiple incentive arrangements

09 p1626 A69-22776

Incentive provisions used by mutual agreement between purchaser and contractor for project management covering planning, control, financial, technical and personnel functions

09 p1626 A69-22777

Nuclear power plant licensing, discussing public safety considerations by AEC and applicant responsibility in assuring freedom from undue risk

10 p1723 A69-23398

Value engineering proposal costs sustained by maintenance and overhaul industry in government contract negotiations, discussing reimbursement and proposed central agency

13 p2383 A69-28099

Value engineering and component/products improvement incentive contract clauses role in defense product quality improvement

13 p2383 A69-28100

Systems engineering approach to aerospace product defects minimization, discussing scope, contract development, mainstream functions, component development, design data and subsystem integration

15 p2719 A69-30085

Procurement procedures in management planning, discussing document flow charts, contract negotiation, etc

15 p2719 A69-30314

Cost plus award fee contracting incentive system based on after fact evaluation of performance effectiveness

15 p2720 A69-30426

Avionic subsystems warranty costs estimates, considering reliability prediction and hardware recycling

18 p2322 A69-34506

Cost risk management procedure in defense industry contracting, including risk percent limits and identification in proposals, specifications relief, escalation clauses, etc

18 p2323 A69-34655

Optimized contracting for systems engineering management, discussing industry views, scope, application, depth, procurement and performance measurement

19 p3454 A69-36005

Structure and scoring method for judging alternatives in contract selection

20 p3640 A69-38023

CONTRACTORS

Construction practice for hot-mix bituminous pavements covering production, composition, application and quality control

01 p0057 A69-11276

Space vehicle subcontracted components reliability attainment, discussing reliability process specifications, motivation, product reliability and feedback programs

15 p2723 A69-31139

Aerospace programs cost analysis system, using contractors accounting records as data source [AAS PAPER 69-465]

24 p4416 A69-42801

CONTRACTS

Project management in complex research, discussing incentive contracting decision model and resources allocation

02 p0356 A69-12476

Federal government contracting, discussing legality of NASA service contracts

05 p0850 A69-15987

CONTRAILS

Rocket ejected vapor trails structure in lower atmosphere showing no evidence of atmospheric turbulence

15 p2602 A69-31393

CONTRAST

U IMAGE CONTRAST

CONTROL

Linear differential equations zero solution stabilization by control formed as linear combination of measured coordinates of object

03 p0408 A69-12972

Nonsteady coordinates of linear delay system determined from observable linear combination of phase coordinates

04 p0583 A69-15094

Matrix Riccati and matrix quadratic equations in problems of stochastic control and filtering

05 p0740 A69-16601

Control systems digital simulation based on coupling of prediction correction procedure with integration and differentiation procedure, discussing simulation errors

08 p1296 A69-20110

Space flight fuel consumption optimization as function of acceleration of nozzle control

10 p1666 A69-22919

Observability of phase state of nonlinear control system noting Liapunov function

13 p2238 A69-27742

Sensitivity function in time domain defined for control system design

13 p2238 A69-27936

Delta modulated control system model for determining oscillation modes at sampling instants

13 p2221 A69-27962

Asymptotic control theory for two point boundary value problems, considering Euler equation

14 p2425 A69-28904

Hamilton modified principle applied to nonlinear control problems including time delay, servosystem with ideal relay and liquid level control

15 p2583 A69-31304

Starting weight increments in aircraft designs having various structural features and dimensions

16 p2735 A69-32144

Soviet collection of papers on complex control systems covering discrete systems for random processes, self adaptive systems, linear system stability and stabilizing resonance shell

19 p3285 A69-35888

CONTROL BOARDS

Operator handedness effect on control display movement stereotypes

02 p0203 A69-12212

Aircraft instrument panel lighting color and intensity preference by pilots for taxiing, takeoff, cruising flight and landing

05 p0715 A69-16622

Aircraft instrument panel lighting, comparing red and white colors for general and peripheral vision

05 p0715 A69-16623

Design and performance of large vacuum system with central control desk to study plasma dynamics, discussing visual monitoring at desk

07 p1116 A69-18261

Control-display panels design for accurate response with electronic and mechanical equipment, showing display stimulus and control response correspondence in rectangular configuration arrangement

07 p1070 A69-18907

Displays and controls requirements in manned spacecraft to integrate man into vehicle system, noting man capability for task diversity

08 p1312 A69-19968

Control operation time found dependent on gloves, physical characteristics of control and type of required operation

10 p1648 A69-23180

Glove characteristics effects on manipulability, finding operation time differences between gloved and barehanded operation dependent on type of required control operation

10 p1648 A69-23181

Minimum dimensions of circular nondetent knobs mounted on concentric shafts in case of intolerable frequent inadvertent operation of adjacent coaxial knobs

17 p2916 A69-34005

Optimum knob crowding, measuring reach time, turning time, inadvertent touching and influence of knob spacing, diameter and configuration

17 p2916 A69-34006

CONTROL DATA (COMPUTERS)

Space vehicle data system synthesizer (SVDSS) for dynamic calibration of automatic control and checkout systems during prelaunch and countdown operations

21 p3680 A69-39633

CONTROL EQUIPMENT

NT CRYOSTATS

NT PRESSURE REGULATORS

NT SERVOAMPLIFIERS

NT SPEED REGULATORS

NT THERMOSTATS

Conditions for nonlinear control systems observability determined for use in identification procedure and in designing control unit

01 p0049 A69-10206

Soviet book on design of multidimensional automatic control systems, covering structural circuit synthesis and individual element characteristics

01 p0053 A69-10995

Modular three dimensional mockup technique for economizing and facilitating design of control and display equipment

02 p0202 A69-11953

Equalization of multiple electromagnetic shakers for environmental vibration testing, using analog computer [JPL-TR-32-1364]

02 p0229 A69-12374

Tracking conditions for observability of nonlinear controlled systems with smooth characteristics

03 p0409 A69-13069

Solid state power supplies for turbine control and instrumentation, discussing control system manufacturer requirements and reliability specifications

03 p0368 A69-13432

Self oscillating pulse relay control system investigated by approximate method for harmonic linearization of nonlinearities, noting external effects

03 p0410 A69-13684

Book on control systems theory and applications covering artificial intelligence, linear stochastic systems, trajectory decomposition, etc

04 p0581 A69-14567

Multivariable automatic control systems stability, discussing applicability of Nyquist theorem and alternate frequency criterion

04 p0581 A69-14601

Dynamics of single loop nonlinear sampled data systems with integrator, deriving equations of periodic motions and stability conditions by means of point transformations

04 p0583 A69-15135

Nonlinear phase locked automatic frequency control system dynamics, noting asymptotic stability of equilibrium state in whole

04 p0559 A69-15137

Steady state response of inertialess discrete multivariable extremal system with noise, noting stepwise search systems

04 p0583 A69-15139

Frequency controlled time delay network for broadband phased array antenna steering

04 p0580 A69-15469

Defect localization in complex plants applied to damage cause determination and economic criteria

05 p0767 A69-15765

Stabilization of steady motions of nonlinear controlled systems with two purely imaginary roots, using Liapunov stability theory

05 p0794 A69-15790

Fluidics research and development of control elements and components

05 p0704 A69-16003

Aircraft turbine engines operation and control, discussing technology, simulation and system developments

05 p0812 A69-16528

Book on electric elements and circuits for automatic control, discussing electric machines as control loop elements, stability criteria and synthesis, electric drives, etc

05 p0739 A69-16545

Pulsed control systems stability with frequency pulse modulation analyzed by Liapunov direct method

05 p0740 A69-16670

Thermal performance of pressure transducers, accelerometers, displacement transducers, resistance thermometers and control mechanisms for NERVA reactor

06 p0956 A69-16885

Clearing and blocking control over frequently overadjusted automatic equipment in precision machine and device construction

06 p0931 A69-17692

Self organizing trainable logical networks (TLN) as stable controllers in multiaxis vehicle control problem, reviewing TLN concepts and training theory

07 p1070 A69-18388

Control system utilizing digital and linear integrated circuits for low power testing of Pewee 1 reactor of Rover program [IEEE PAPER 28-6]

07 p1179 A69-19188

Book on feedback control theory for engineering and applied physics noting signal theory, servomechanisms, transfer functions, system stability and Nyquist diagrams

08 p1295 A69-19841

Operational reliability of manual and automatic flight control systems and components and current safety standards

08 p1255 A69-20720

Fluidic devices for closed loop control of gas turbines [AGARDOGRAPH-118]

08 p1258 A69-20956

Laser triggered spark gap and Pockels cells producing consistently repeatable controlled duration pulses

09 p1515 A69-21427

Space guidance and control system components, noting control moment gyro, actuator, brushless DC motor, electrically supported gyro and laser gyro

09 p1500 A69-22434

Nonlinear one element control system design based on correlation between responses of linear systems

09 p1475 A69-22537

Frequency domain stability criteria accuracy for application to fourth order nonlinear position control system

09 p1475 A69-22591

Vortex fluid devices in control systems, considering electrical, mechanical and hydraulic systems

09 p1443 A69-22740

Test stand final control element for fluid flow application, noting analog control valve with digital to analog conversion and digital actuator

10 p1671 A69-23259

Microelectronic data and remote control function transmission system for wind tunnel testing of aircraft dynamic response to gusts and turbulence

10 p1672 A69-23283

Computer controlled data acquisition and control system /DACs/ for wind tunnel applications, describing system and programs

10 p1673 A69-23286

Fluidic control technology compared to other control modes, describing fluidic functions and devices

10 p1636 A69-23402

High gain proportional and bistable fluidic amplifier design, noting high impedance role in pressure sensing and computer circuits in aircraft engine control

10 p1638 A69-23555

Human pilot adaptation in simulated multiloop VTOL hovering task with series loop closure model

10 p1650 A69-23878

Real time electronically scanned radar control using digital computer with input and output conversion for information handling, noting interface equipment

11 p1834 A69-24544

Digital data transmission techniques and complex instrumentation systems design noting control, identification, synchronism and error reduction

11 p1834 A69-24545

Parametric damping of oscillations in second order automatic control systems, taking into account control function constraints

11 p1857 A69-24556

Asymptotic method for single and multifrequency oscillations of quasi-linear control systems with distributed parameters and delayed time coordinate

11 p1916 A69-24766

Flexible control module for real time automated checkout requiring programming by personnel with strong software background

11 p1843 A69-25072

Initial conditions estimation problem for nonlinear system asymptotic stability and satisfaction of output constraints on state variables

11 p1909 A69-25290

Digitally controlled formant /spectral maximum/ generator for terminal analog speech synthesizer

11 p1852 A69-25292

Kozhevnikov optimality principle for optimum averaging of discontinuous stochastic control systems extended to include intensities of discontinuities

11 p1966 A69-25329

Parachute deployment load control by use of line ties from rocket sled tests

11 p1823 A69-25386

Spacecraft design for minimization of structure interaction with control system, noting susceptibility of extendible booms to solar environment

11 p1967 A69-25500

Tracking system for gain and time delay parameter measurements of compensatory control crossover model

12 p0222 A69-25930

Multivariable control systems - Conference, Duesseldorf, October 1968, Volume 2

12 p0245 A69-26058

Synthesis of multivariable control systems at minimal integral square quality functional

12 p0246 A69-26061

Digital computer analysis of multivariable control system in frequency domain, using operational array technique programming method

12 p0246 A69-26064

Computer aided design of linear multivariable control systems applied to VTOL aircraft stability augmentation

12 p0213 A69-26068

Multivariable control systems - Conference, Duesseldorf, October 1968, Volume 1

12 p0246 A69-26069

Liapunov functions applied to stability analysis of nonlinear multivariable direct and indirect control systems with time lags

12 p0248 A69-26079

Third order multivariable control systems calculation with linear differential equations describing plant for design and digital optimization

12 p0249 A69-26085

Multivariable control systems - Conference, Duesseldorf, October 1968, Supplement

12 p0251 A69-26092

Canonical representation of multivariable control system in state space using matrix of differential operators acting on vectors of input-output quantities

12 p0251 A69-26094

Digital differential analyzer as control element, analyzing performance limitations imposed by scaling constraints with canonical realization of transfer functions

12 p0253 A69-26509

Complete observability in linear time invariant systems decoupled via state-variable feedback, deriving sufficient conditions

12 p0253 A69-26514

Control signal correction in microwave ferrite modulators, eliminating losses due to screening effect of feeder

13 p2226 A69-27216

Relay control systems limit cycle calculations, comparing classical differential equation, Laplace transformation and state and phase space analysis methods

13 p2238 A69-27396

Control system for thin diffraction limited orbiting astronomical telescope mirror based on structural analysis of static deflections

13 p2261 A69-27951

Asynchronous finite state sequential nonlinear controller synthesis with few flip-flops for dynamic space vehicle systems

[AIAA PAPER 67-988]

13 p2225 A69-28201

Scientific satellite checkout system tests by manual, automatic and self test control

13 p2243 A69-28480

Conditions for nonlinear control systems observability determined for use in identification procedure and in designing control unit

14 p2424 A69-28742

Tracking conditions for observability of nonlinear controlled systems with smooth characteristics

14 p2424 A69-28751

In-core thermionic reactor space power plants stability and control criteria, comparing linear and nonlinear models

14 p2481 A69-29189

Analog computer for design of control systems used in nonnuclear testing of nuclear rocket engine components and subsystems

15 p2589 A69-31289

Test facility for qualification of satellite fairings jet-tisoning system, describing accelerating tower and recording and control instrumentation

16 p2765 A69-31739

Radar control system based on load waveform monitoring by coupled control and modulating circuits

16 p2753 A69-32439

Cost optimization of mixture ratio control systems for liquid propellant launch vehicles, considering open and closed loop systems

[AIAA PAPER 69-441]

16 p2870 A69-32775

Equipment- and program-type methods for solving automatic digital control systems synthesis problems, evaluating efficiency based on accuracy

17 p2933 A69-33120

Cooling system control system for astronaut thermal equilibrium and work output maximization during extravehicular space missions

[AIAA PAPER 69-617]

17 p2914 A69-33278

Fluidic system applications to turbojet propulsion control, thrust stabilization control, temperature sensing, normal shock sensing, pressure ratio sensing, supersonic air inlet control and flight control

17 p2904 A69-34070

- Learning control systems research and applications noting trainable controllers, reinforcement control, Bayesian estimation and stochastic approximation
18 p3112 A69-35093
- Apollo navigation, guidance and control systems in command module and lunar module, discussing inertial, optical and computer hardware operation
19 p3369 A69-35799
- Control circuits in nature and sensory information data processing in human work, including servomechanism of brain-muscle system
21 p3652 A69-38784
- Parameter optimization technique for aircraft control equipment design
22 p3919 A69-41051

CONTROL SIMULATION

- Hybrid computers, discussing analog and digital devices combination and distinction between use of computer for general purpose computation and control purposes
02 p0212 A69-11997
- Reciprocal variational formulation for optimal control, estimating difference between suboptimal system response and optimum
03 p0457 A69-13766
- Aircraft turbine engines operation and control, discussing technology, simulation and system developments
05 p0812 A69-16528
- M measurement optimal feedback control algorithm for stochastic discrete time systems, considering nonlinear plant, constrained controls, nonquadratic cost and simulations
06 p0902 A69-17402
- Digital computer simulation and analysis of control loops for ion thruster control
[AIAA PAPER 69-239] 09 p1564 A69-21240
- Pneumatic diode function generator for simulating nonlinear control systems, discussing operating characteristics and programming methods
11 p1858 A69-24580
- Hydraulic servo actuators load effect included in control loop actuator simulation
12 p2016 A69-26266
- Apollo Lunar Module Environmental Control System /LM/ECS/ steady state performance simulation techniques, discussing vacuum chamber data of LTA-8/LM-3
[AIAA PAPER 69-616] 17 p2903 A69-33307
- Thermal control system for AZUR research satellite, tabulating extreme flight temperatures and permissible temperature range from simulation test data
17 p2903 A69-33427
- Biosatellite attitude control systems design development and flight test results for payload perturbing effects, discussing simulation activity
18 p3210 A69-35094
- Fighter aircraft higher order control system dynamics effects on longitudinal handling qualities evaluated by in-flight simulator for role of pilot induced oscillations tendencies
[AIAA PAPER 69-768] 19 p3245 A69-35655
- Control system concept for axisymmetric supersonic inlet operation in mixed compression mode noting test results
[AIAA PAPER 68-581] 20 p3585 A69-37151
- Spacecraft discrete automatic control system computerized simulation, discussing logic elements, applications to design, etc
20 p3502 A69-37393
- Real time digital computer hardware simulation of Apollo Telescope Mount /ATM/ mission
[AIAA PAPER 69-940] 22 p3919 A69-40323

CONTROL STABILITY

- Multivariable PFM control system stability analysis using Liapunov function as Hermitian quadratic form
01 p0050 A69-10207
- Nonlinear negative definite feedback control systems governed by parabolic partial differential equation, deriving asymptotic stability
01 p0050 A69-10239
- Stochastic Luric type systems stability using Liapunov method
01 p0050 A69-10240
- Matrix procedures for stability of nonlinear control with nonlinearities, discussing system with three actuating elements
01 p0050 A69-10355
- Stability properties of discrete-continuous feedback control systems with signal dependent sampling
02 p0226 A69-12733

- Dynamic properties of electrohydraulic servomechanisms having variable structure analyzed by analog computer
03 p0368 A69-13686
- Multivariable self adaptive control system design using sensitivity methods, obtaining adaptation stability by Liapunov synthesis
06 p0900 A69-17352
- Absolute stability of dynamic control systems with single nonlinear element function of two feedback state variables, giving sufficient conditions
06 p0905 A69-17948
- Control systems stability under perturbations using time optimal control
07 p1115 A69-18514
- Control-display panels design for accurate response with electronic and mechanical equipment, showing display stimulus and control response correspondence in rectangular configuration arrangement
07 p1070 A69-18907
- Absolute stability of distributed control system with nonlinear elements of backlash type analyzed by distributed parameters method
07 p1115 A69-19758
- High speed stable system by combining hunting type control system without closed cycles designed for plant optimization with recycling type controller
07 p1116 A69-19759
- Laser control of French rocket head guidance system, discussing gyroscopic master, stellar or solar detectors, etc
09 p1518 A69-22162
- Root sensitivity of characteristic equation of linear automatic control system to system parameter changes applied to aircraft angular stabilization
10 p1666 A69-23610
- Parametric damping of oscillations in second order automatic control systems, taking into account control function constraints
11 p1857 A69-24556
- Control sets corresponding to desired stability behavior of controlled motion, giving theorem concerning differential inequality
11 p1910 A69-25412
- Mathematical model for initial conditions of asymptotically stable nonlinear control system to estimate region of acceptable motions
11 p1861 A69-25453
- Canonical transformations of unsteady control system motion equations, simplifying control process study and controller simulation on analog computer
12 p2045 A69-25960
- Perturbation theory of nonlinear control systems with periodic coefficients and small perturbation terms, exemplifying satellite attitude control
12 p2173 A69-26067
- Uncontrollable modes effect on transient/steady behavior and limit cycles characteristics of nonlinear multivariable control system
12 p2048 A69-26078
- Liapunov functions applied to stability analysis of nonlinear multivariable direct and indirect control systems with time lags
12 p2048 A69-26079
- Stability conditions for control systems consisting of linear multivariable stationary neutral plant and multivariable pulse frequency modulator, using Liapunov direct method
12 p2049 A69-26080
- Sampled data time optimal control of linear multivariable system based on determination of system state variables control time and minimum sampling intervals
12 p2050 A69-26088
- Stability of single output sinusoidal perturbation extremal control system with output lag, discussing stability boundary
12 p2052 A69-26384
- Feedback controller compensator for invariant linear systems having unstable modes
12 p2054 A69-26517
- Stability test for linear unit feedback control system with second order lag and dead time compensated by PIO controller
13 p2238 A69-27395
- Optimal controller design and transfer functions in linear stabilization systems subjected to unknown disturbances determined by variational calculus
13 p2259 A69-27425
- Stabilization of nonlinear control systems steady motions for two pairs of imaginary roots
13 p2298 A69-27745
- Multivariable PFM control system stability analysis using Liapunov function as Hermitian quadratic form
14 p2424 A69-28743

- Control systems synthesis for nonlinear plants with known Liapunov functions and constraints, considering stability
14 p2424 A69-28819
- Collection of soviet articles on vibrations and stability of devices, machines and control system elements
14 p2536 A69-29741
- PCM oscillator synchronization system stability, considering sampled model by digital nature of equipment
15 p2565 A69-30171
- Dynamic vibration effects on guidance and control systems performance determined from spectral densities, cross spectral densities and vibratory environment amplitude distributions
15 p2608 A69-30367
- Sinusoidal perturbation extremal control system stability, using harmonic balance principle to obtain periodic solutions of system differential equations
15 p2582 A69-30616
- Aircraft neutral stability empirical and mathematical aspects, considering control stabilization, damping and phugoid motion
15 p2551 A69-31012
- Gyro controlled rigid rotor dynamic stability studied for stoppable rotor operation, developing analytical expressions for determining stability boundary of constant and rotor speed gyros
[AHS PAPER 343] 17 p2899 A69-33508
- Multiple input and output nonlinear time invariant feedback system under almost constant inputs
17 p2944 A69-33743
- Solid state single unit digital control computer performing stability augmentation, pilot relief functions and generating minimum fuel flight paths for VTOL landing
17 p2934 A69-34075
- Autopilot for flight simulation of stability and control of pilot-airframe combined performance on reentry missions, using airborne analog computer for vehicle response
18 p3208 A69-35000
- Liapunov method applied to stability evaluation of multiparameter self adaptive nonsearch gradient servosystems
19 p3286 A69-35891
- Stability of interrelated linear dynamic control systems with distributed parameters evaluated by using differential equations
19 p3286 A69-35892
- Automatic control systems for plants with distributed parameters, discussing stabilizing resonance shell with space-time dispersion of controlled processes
19 p3372 A69-35893
- Gyrator stability and frequency behavior obtained by controlled sources selection
19 p3287 A69-36739
- Attitude control system for launch vehicles, providing commanded thrust vector angle proportional to desired angular displacement of acceleration vector
21 p3819 A69-39032
- Frequency domain and Liapunov instability criteria for attitude control system design of large booster, noting nonlinear feedback
[AIAA PAPER 69-853] 21 p3687 A69-39381
- Spacecraft wide angle attitude control system stability analysis, using air bearing table simulation
[AIAA PAPER 69-856] 21 p3823 A69-39384
- Clear air turbulence /CAT/ causes effect on aircraft control, discussing monitoring device and aircraft position maintenance under CAT conditions
22 p3977 A69-40007
- Existence theorem for linear stochastic systems optimal control described by differential equation with random coefficients, providing rms stabilization
22 p3917 A69-40116
- Automatic phase control system stability range determination in piecewise linear approximation and in presence of proportional integrating filter
22 p3918 A69-40956
- Book on systems stability with random parameters, considering linear and nonlinear control systems, with application to stochastic approximation
23 p4181 A69-41510
- Seam welding processes and power supply effects on control efficacy based on electrode displacement for Al-Mg alloys
24 p4319 A69-42919
- Optimum control synthesis for nonlinear plant subject to white noise perturbation, using integral estimates of phase coordinate functions
24 p4289 A69-42949
- Digital analysis of nonlinear control systems dynamic stability under small perturbations, using linearized differential equations
[IS-ERI-71] 24 p4285 A69-42984

Stability criteria for electrical interconnection in parallel operating valve controlled hydraulic servomotors applied to gimbaled system

24 p4256 A69-43310

Pulse modulated feedback system for satellite attitude control, analyzing relationship between physical parameters to ensure two pulse limit cycle oscillation stability

24 p4295 A69-43318

CONTROL SURFACES

NT AERIAL RUDDERS
NTAILERONS
NT ELEVATORS [CONTROL SURFACES]
NT ELEVONS
NT FLAPS [CONTROL SURFACES]
NT GUIDE VANES
NT HORIZONTAL TAIL SURFACES
NT JET FLAPS
NT JET VANES
NT LEADING EDGE SLATS
NT SPOILERS
NT TABS [CONTROL SURFACES]
NT TRAILING-EDGE FLAPS
NT WING FLAPS

In-flight measurement of shear, bending moment and torque on lifting or control surfaces and loads on nose and main landing gear

04 p0677 A69-14842

Aircraft gust alleviation system for minimizing weighted sum of normal acceleration and pitch rate response by limiting control surface deflections

09 p1434 A69-22279

Motion equations for dynamics of aircraft control surface controlled by autopilot with rigid feedback

16 p2809 A69-32134

Series 3 Skyvan design, describing controls, electric and electronics equipment, weather protection, environmental and fuel systems

17 p2906 A69-34194

Parametric approach for weight estimation of surface control systems of transonic and supersonic combat and subsonic transport aircraft [SAWE PAPER 812]

18 p3221 A69-34898

Duplex servomotor package sized for stabilator channel of F-4 aircraft providing compact integrated control surface positioning [AIAA PAPER 69-788]

19 p3249 A69-35640

Circulation control by blowing and application to stopped rotor aircraft, discussing data from model scale blade experiments

19 p3248 A69-36767

Simulated degrading environment effect on spacecraft thermal control surfaces subjected to plume heating during apogee firing and solar irradiation [AIAA PAPER 69-1024]

22 p3923 A69-40394

CONTROL UNITS [COMPUTERS]

Vibration/acoustics digitally controlled environmental testing, describing configuration and operation of control system and statistical requirements for noise generation

15 p2587 A69-30388

CONTROL VALVES

Vortex valve and angular rate sensor based on amplification of tangential velocity component of swirl achieved by control jet or rotation

05 p0746 A69-16006

Transistorized frequency detector for sensing system load changes affects speeds of control valves of prime movers

06 p0896 A69-17478

Large signal vortex amplifier analysis using load lines to evaluate series orifice and vortex flow control valve characteristics

10 p1639 A69-23558

Static and dynamic characteristics of pressure compensated oil-hydraulic flow control valves and relief valves with emphasis on linearized effects

19 p3256 A69-36713

Miniature hydraulic controls with emphasis on four-way directional control valve for space and cost problems

22 p3870 A69-41243

CONTROLLABILITY

Approximate boundary controllability for heat equation by considering temperature variation with time

01 p0173 A69-10008

Controllability of dynamic systems obtained by studying vector function increments along system trajectories

01 p0051 A69-10698

Hovercraft handling characteristics, seakeeping and maneuverability during English Channel operation

02 p0277 A69-11592

Rotary wing handling qualities, discussing analytical tools, design and IFR capabilities for high speed range

05 p0701 A69-15550

Lifting body entry vehicles in low speed flight test program for determining handling qualities, discussing M2-F2 glide flights

05 p0702 A69-15571

Invariant subspaces, controllability and observability of linear dynamic systems

05 p0740 A69-16597

Controllable gyration use in nonlinear network synthesis

05 p0735 A69-16620

Control system controllability under discontinuous control constraints, presenting optimal response rate linear system synthesis with continuous restriction on control function

09 p1475 A69-22670

Optimal control of time invariant uncontrollable linear systems, noting asymptotic stability

10 p1666 A69-23887

Canonical forms for observable and controllable linear time invariant systems by simultaneous transformations of system state and input and output vectors

12 p2048 A69-26075

Controllability of linear multivariable time invariant optimal systems with additive parameters using Kalman controllability definition, noting role of Pontryagin principle

12 p2050 A69-26086

Asymptotic controllability of linear system, giving stabilization procedures based on solutions to limiting differential equations

12 p2053 A69-26515

Controllability of stationary linear multivariable systems using frequency domain criterion with application to optimal control laws for minimum fuel and time control problems

12 p2054 A69-26519

Helicopter rotors with rigid blades performance from viewpoint of controllability and load distribution

13 p2201 A69-27295

Mission task performance oriented approach to winged helicopters flying and handling qualities, considering wings and horizontal stabilizers influence [AHS PAPER 360]

17 p2900 A69-33522

Performance capabilities and handling quality characteristics of aircraft equipped for in-flight thrust reversing [AIAA PAPER 68-880]

17 p2902 A69-34031

Handling-qualities rating data evaluation for low computation cost information, noting reliability estimation

21 p3664 A69-38968

Aircraft characteristics influence on longitudinal handling qualities during carrier approach from visual landings on moving base simulator [AIAA PAPER 69-894]

21 p3648 A69-39418

Controllability and linear closed-loop controls in linear periodic systems

22 p3917 A69-40572

Time-invariant multivariable linear systems, discussing structure theorem for controllable systems and application to decoupling problem

24 p4294 A69-43314

CONTROLLED ATMOSPHERES

NT CABIN ATMOSPHERES
NT INERT ATMOSPHERE
NT SPACECRAFT CABIN ATMOSPHERES

Rodents exposure to neon enriched atmosphere for three weeks in sealed recycling system, discussing body weight pregnancies and litter

01 p0019 A69-11342

Atmospheric exposure chamber design for small animals, discussing dynamic and recirculating operations and gas scrubbing system

04 p0584 A69-14678

Control and sampling in sterile rooms, noting worker introduction of contaminants

05 p0714 A69-15953

High bay clean room design with laminar air flow, discussing air filtration, sound attenuation, construction, illumination, etc

10 p1673 A69-23354

Hamsters responses to helium-oxygen and nitrogen-oxygen at ambient temperatures, comparing respiration rates, weights and body temperatures

10 p1646 A69-23564

Brittle fracture at high temperatures in titanium alloys using scanning electron beam microanalysis, noting reaction diffusion with atmosphere and grain boundaries destruction

10 p1713 A69-23823

EEG, EKG, respiratory motions and pulmonary ventilation recordings in study of carbon dioxide additions effect on human tolerance to hypoxic conditions

10 p1650 A69-23898

Molten high melting compounds obtained by arc furnace with consumable electrode and adjustable protecting atmosphere

12 p2055 A69-26264

Oxygen consumption and rectal temperature in male mice confined in nitrogen and helium diluted hyperoxic atmosphere at specific temperature and humidity ranges

17 p2906 A69-32932

Photosynthesis and respiration rate in vegetables in controlled temperature, humidity, illumination levels, carbon dioxide and oxygen contents

17 p2912 A69-32933

Forge to determine refractory metals formability and ductility at high temperature in protective pressure

17 p2945 A69-33419

EKG, EEG, pneumograms and X ray pictures showed no pathological effect after prolonged confinement in sealed chamber having artificial atmosphere with variable gas composition

22 p3892 A69-40284

CONTROLLED FUSION

Plasma physics and controlled nuclear fusion research - Conference, Novosibirsk, U.S.S.R., August 1968, Volume 1

17 p3012 A69-33817

CONTROLLED STABILITY

U CONTROL

U STABILITY

CONTROLLERS

NT SERVOMULTIPLIERS

NT SERVOMECHANISMS

NT SERVO MOTORS

Multilevel optimization techniques for dynamic systems control evaluated, developing second level Newton-Raphson controller

01 p0051 A69-10440

Sensitivity reduction in specific optimal control by use of dynamical controller

01 p0051 A69-10441

Algorithm minimaxing performance index and sensitivity of controller design with and without saddle point

02 p0224 A69-11966

Mathematical basis for designing controllers of time lag systems by approximately solving differential equations

03 p0408 A69-12973

Bit reduction in digital transfer functions with LF poles in sampled data systems using zero order hold function

04 p0584 A69-15464

Nonlinear operation of pulse control system by means of triple modulation

05 p0736 A69-15764

Human operator as optimal controller, proposing quadratic performance index used by operator in judgement of own performance in tracking task

06 p0903 A69-17407

Electronic controller with integrated circuits and inexpensive SCR as coupler or interface between card reader and frequency synthesizer designed for unattended operation

06 p0897 A69-17704

Optimization of control independent cost functions in multidimensional system with linear controllers

06 p0905 A69-17945

Control system analysis and synthesis by means of generalized root-locus method on digital computer

07 p1114 A69-18291

Semiautomatic gravity gradient stabilization system [SAGS] for active pitch control and semipassive roll/yaw control

07 p1228 A69-18342

Self organizing trainable logical networks [TLN/ as stable controllers in multiaxis vehicle control problem, reviewing TLN concepts and training theory

07 p1070 A69-18388

Fluidic component application to propellant tank pressurization and controller design [AIAA PAPER 68-629]

09 p1442 A69-21980

Adaptive control algorithm operating on-line to make discrete time adjustments in controller parameters of continuous time control system

09 p1474 A69-22441

Stationary controller design for linear time varying control systems with state variables not always accessible for feedback

09 p1474 A69-22443

Optimal controllers analytical design for closed loop systems with pure time delay in actuating mechanism using differential equations
12 p2045 A69-25959

Time optimal regulator problem with recoverability constraint as restriction on system state during control synthesis
12 p2052 A69-26504

Optimal stochastic controller synthesis theory applied to stabilizing and controlling orientation of rotating bodies in central gravitational fields
13 p2300 A69-28326

Optimal control theory applications for controllers not characterized by bang bang time responses using Pontryagin maximum principle
18 p3090 A69-34681

Algebraic equations for determination of controller parameters, noting a priori fixed roots of characteristic equation
21 p3723 A69-38887

Integrated sensor controllers for missile directional control, discussing test results for two different systems [AIAA PAPER 69-837]
21 p3761 A69-39368

Controllers design for reaction jet controlled aerospace vehicles, studying second order pitch- plane representation with actuator modeled as pure delay [AIAA PAPER 69-854]
21 p3822 A69-39382

On-off limit cycle controllers for reaction-jet controlled systems, investigating delay effects
24 p4291 A69-43271

Coefficient quantization in digital continuous time process controllers, applying results to nominal transfer function approximation
24 p4292 A69-43283

Stochastic fuel regulator problem investigated by optimal and self organizing techniques, emphasizing realizability of resulting controllers
24 p4292 A69-43284

CONVAIR MILITARY AIRCRAFT
U MILITARY AIRCRAFT

CONVAIR 990 AIRCRAFT
U CV-990 AIRCRAFT

CONVECTION
NT FORCED CONVECTION
NT FREE CONVECTION

Quasi-steady combustion model of fuel droplet with convection, including pressure effect [AIAA PAPER 69-147]
06 p1037 A69-18114

Solar supergranules and hydrogen convection zone analysis based on polytropic atmosphere convection physics
07 p1211 A69-18408

Magnetic fields of solar supergranulation convective cells based on electromagnetic induction equation, indicating bipolar sunspots occurrence
09 p1588 A69-21366

Solar neutrinos and convective core mixing on short time scale resulting in flux reduction
09 p1574 A69-21453

Dependence of convection in planetary interiors upon magnitude of Rayleigh number for rigid and free surfaces
12 p2155 A69-26208

Radiative heat transfer, discussing electromagnetic theory, transfer between surfaces and simultaneous conduction, convection and radiation
13 p2376 A69-28140

Convective instability by active stress, discussing composition dependent stress fields in continuous and mechanically isolated material and chemical to kinetic energy conversion
14 p2540 A69-29634

Optical depths of convection related to metal deficiency for main sequence and giant stars
14 p2527 A69-29946

Surface convection zone in atmospheres of global cluster and halo B stars determined to study He depletion efficiency
14 p2529 A69-29976

Stratified fluid flow past obstacle, considering steady inviscid flow with nonlinear convection and vertical acceleration
19 p3240 A69-36474

Numerical simulation of macrophysical and microphysical processes in convective cloud, including cloud geometry and equations describing dry and moist phases
19 p3362 A69-36497

CONVECTION CURRENTS
Radiative heat loss effect on atmospheric cellular convection, analyzing critical Rayleigh number and width to height ratio of cells
02 p0276 A69-12776

Convective clouds effect on large scale stratification, showing cumulus and cumulonimbus self amplifying convection as factor in tropical cyclogenesis
09 p1536 A69-22165

Relation between Rayleigh and dynamic Richardson numbers in atmospheric boundary layer in presence of cellular convection
09 p1491 A69-22709

Growth rates for convective disturbances propagation in atmosphere with linear entropy variation, noting WKB approximation
11 p1957 A69-24422

Cellular convection in horizontal gas layer analyzed for causes of vertical air circulation and effect of vertical temperature profile
13 p2291 A69-27725

Azimuthal electric currents generation by Coriolis forces in hot stars with intensive radial flows in convective zones
13 p2350 A69-27862

Convective-current instability in finite length plasma column, analyzing spectrum of unstable harmonics
13 p2314 A69-28441

Relation between Rayleigh and dynamic Richardson numbers in atmospheric boundary layer in presence of cellular convection
16 p2808 A69-32488

Physical model for IGY radio aurora data correlated with Brice magnetospheric convection model
18 p3125 A69-34231

Solitary waves in stratified polytropic atmosphere allowing for convection and disregarding viscosity and turbulence
18 p3167 A69-35338

Turbulence energy spectra in free atmosphere with convective layer surmounted by inversion layer, noting power law followed by velocity components
19 p3362 A69-36406

Benard convection cells analyzed by Boussinesq approximation and Schmidt-Liapunov method, obtaining bundary value problem branching solution
19 p3301 A69-36791

Convective momentum exchange in mesoscale gravity wave
20 p3522 A69-37350

Radar observations of convective pattern types in clear atmosphere consisting of thermal- and Benard-like convection cells
20 p3573 A69-38059

High latitude magnetospheric convection patterns determined from ionospheric current distribution using magnetic disturbance plots
21 p3709 A69-38503

Oscillatory convection, energy transport and structure of sunspots, suggesting fast changes in equilibrium conditions for magnetic reconstruction and solar flares origin
24 p4374 A69-43624

CONVECTIVE FLOW
Thin rigid radial wall effect on convective flow in heated rotating annulus
02 p0275 A69-12013

Plate temperature oscillation effects on forced convection laminar viscous incompressible MHD boundary layer flow from semiinfinite flat plate
02 p0288 A69-12143

Environmental temperature and water vapor increases associated with ascending thermals estimated by penetrative convection
03 p0460 A69-13340

Laminar flow of isotropic binary gas mixture in circular cylindrical tube with porous walls, determining concentration field variation with wall suction Reynolds number
05 p0744 A69-15618

Lunar history reexamination including added mantle convection and recent rocket data
05 p0825 A69-16303

Similar solutions for laminar boundary layer formed by convective and compressible flows
05 p0751 A69-16463

Simultaneous natural and forced convection flow around wall, analyzing perturbations of hydrodynamic elements due to obstacle
06 p1030 A69-17095

Mixing effect on solar neutrino fluxes, assuming solar convective core with rapid thorough mixing
06 p1001 A69-17192

Permissible nonthermal convection modes in planetary interiors derived from conservation equations for self gravitating homogeneous nonrotating compressible fluid spheres
07 p1213 A69-18611

Convection in planetary interiors produced by combined thermal and nonthermal mechanisms, noting self gravitating homogeneous nonrotating compressible fluid spheres
07 p1214 A69-18613

Heat conduction equation for convective flow applied to gunpowder combustion under harmonic pressure variation
07 p1241 A69-18708

Unsteady MHD convective flow with suction of viscous incompressible electrically conducting fluid above vertical porous wall, noting horizontal magnetic field effect
07 p1195 A69-19477

Stellar rotation braking due to mass loss from coronae through stellar wind based on calculation of acoustic energy generation from convective zone
08 p1396 A69-20644

Electroconvective instability produced by uniform electric field in poorly conducting fluid under stabilizing vertical temperature gradient, noting heat flow increase
08 p1352 A69-20791

Convective MHD channel flow in vertical channel subjected to temperature and pressure gradients, discussing wall conductances effects on flow rate and heat transfer
09 p1545 A69-21441

Momentum and energy transfers analogy in turbulent convection fluid flow emphasizing difficulties in case of liquid metals
09 p1480 A69-21687

Natural convective oscillatory three dimensional flow in cylindrical annuli, describing inception, amplitude, period and wavelength
09 p1481 A69-21902

Warm plasma addition to mirror confined hot plasma stabilizing convective loss cone mode
09 p1551 A69-22040

Temperature gradient in semiconvective region, examining molecular weight distribution in mixing due to overstability
09 p1596 A69-22057

Hydromagnetic laminar natural convection flow and heat transfer of nonNewtonian fluid between parallel electrically conducting walls
10 p1728 A69-23237

Statistical analysis of convective layer thickness and moisture content effect on convective cloud configurations, using satellite TV pictures
11 p1912 A69-24827

Physical structure of convective envelopes of population II main sequence stellar models by mixing length theory, emphasizing hydrogen molecule formation and pressure ionization
11 p1961 A69-25109

Convective drift and flute instabilities of plasma stabilized by exerting HF forces on electrons, determining required HF field amplitudes
11 p1932 A69-25538

Two dimensional convective flow stability for arbitrary Rayleigh numbers in horizontal layer, assuming large Prandtl number and free boundary conditions
11 p2003 A69-25657

Forced convection in atmospheric boundary layer above nonuniformly heated earth surface, noting roles of wind and stratification parameters
12 p2126 A69-26579

Solar wind induced magnetospheric convection for interpretation of geomagnetic storms, aurora and trapped particle belts, noting electric fields
12 p2073 A69-26749

Planetary mantles thermal and nonthermal convection model, solving sphere density variations and radial velocity components due to internal time-independent motions
13 p2344 A69-27644

Planetary interior convection analysis extended to include variable viscosity, heat source distribution, thermal expansion and diffusivity, etc
13 p2344 A69-27646

Cellular convection suppression by parallel vertical thermally conducting walls inserted into bottom-heated fluid, analyzing effect on critical Rayleigh number
13 p2374 A69-27782

Combined free and forced convection flows in parallel channel systems and in single channels, discussing metastable flow regimes, single phase laminar flows, etc
13 p2377 A69-28152

Benard convective flow as function of Rayleigh and Taylor numbers in thin variable rotating silicone oil layer determined by flow photographs
13 p2377 A69-28172

Temperature disturbance amplification in laminar natural convection boundary layer formed on vertical flat surface measured with hot-wire anemometers
14 p2430 A69-29575

Conduction solution to generalized nonlinear Benard problem showing existence of bifurcation and analyticity of convective motion
14 p2540 A69-29679

Convective and nonconvective two stream instability for hot plasmas, approximating equilibrium distribution function for given temperature by resonance functions
14 p2499 A69-29844

Protostars collapse and flare up computations, including radiative and convective energy flow terms in hydrodynamic equations of motion
15 p2680 A69-30206

Convective neutral stability in Schwarzschild- Harm model for evolution of stars with large masses
15 p2681 A69-30422

Stellar magnetic field generation by convective motions of surface layers of slowly rotating stars
15 p2688 A69-30559

Similar solution for free convective flow past vertical porous wall and unsteady flow past porous wall with dissipation term, using group transforms
15 p2592 A69-31010

Two dimensional laminar convection cells asymptotic behavior for high Rayleigh number, discussing Robinson and Pillow models for fluid between horizontal plates heated from below
16 p2767 A69-31588

Secondary flow consisting of longitudinal vortices superposed on convection flow on inclined plate, obtaining flow pattern through flow visualization
18 p3124 A69-35383

External natural convection flows, studying laminar instability, transition and turbulence in boundary layer flow
20 p3633 A69-37718

Heat transfer in curved channel as function of inlet configurations, obtaining Nusselt number equations for thermal and mixed convection and laminar flow
21 p3850 A69-38866

Membrane vibration problems for combined free and forced laminar convection through vertical ducts, obtaining expressions for velocity, temperature and Nusselt numbers
21 p3851 A69-38974

Solar oblateness observed by Dicke and Goldenberg as interaction between slow uniform rotation and turbulent convection
22 p4017 A69-40175

Semiconvection zone occurrence in massive stars determined by stability considerations
22 p4022 A69-40470

Forced convection liquid flow past heated flat plate with variable viscosity and thermal conductivity, analyzing velocity and temperature distribution in boundary layer
22 p4051 A69-40685

Plasma pause form in equatorial plane in presence of magnetospheric tail subsonic potential convective flow
22 p3942 A69-41103

Phenomenological sunspot model describing granules, supergranules, magnetic fields and photospheric convection
24 p4378 A69-42691

Natural convection flow, discussing initial instability of laminar flow, disturbance amplification and transition to turbulent flow
[ASME PAPER 69-HT-29] 24 p4411 A69-43531

Transition from turbulent to laminar regime as consequence of high heating rates for internal convective flow, noting roles of Nusselt numbers and friction factors
[ASME PAPER 69-HT-9] 24 p4304 A69-43559

Outer solar convection zone structure dependence on change of parameters in mixing length theory examined to construct model
24 p4387 A69-43634

Free convection flows about inclined infinite cylinders with isothermal surfaces
24 p4416 A69-43687

CONVECTIVE HEAT TRANSFER

Steady state problem of convective heat transfer in half space with boundary conditions of third kind
01 p0174 A69-10103

Convective heat transfer across fluid film limited by right sections of two parallel circular hollow steel cylinders
01 p0176 A69-11135

Heat transfer rates from high temperature spheres into subcooled liquid sodium during forced convection, noting surface vapor formation
[ASME PAPER 67-WA/HT-32]

02 p0351 A69-12202

Closed form solution of convective heat transfer to yawed concave hemisphere in free molecule flow
02 p0354 A69-12529

Large convective clouds in superheated air generated by static tests of Saturn 5 first stage
03 p0462 A69-14125

Free convective heat transfer in liquid filled spherical volume with constant thermal flux density at boundary
04 p0686 A69-14992

Forced convection heat transfer coefficient invariance to flow reversal in Stokes and potential streaming flows past isothermal particles of arbitrary shape
04 p0590 A69-15274

Natural convection heat transfer through enclosed horizontal layer of supercritical carbon dioxide, discussing flat plate configuration data
04 p0688 A69-15398

Thin foil heat flux sensor for radiative and convective heating rates over wide range and dynamic response, noting error mechanisms, calibration and accuracy
04 p0602 A69-15426

Free convective heat transfer of cylinder in rarefied gas yielding Nusselt number as function of Grashof, Prandtl and Knudsen numbers
05 p0846 A69-15904

Heat transfer through vertical plane layer for various Prandtl numbers, discussing velocity and temperature profiles and effects of aspect ratio, Grashof and Rayleigh numbers
[ASME PAPER 68-WA/HT-4] 05 p0846 A69-16115

Surface vibrations effect on forced convection heat transfer normal to cylinder, discussing convective coefficients dependence on Reynolds number
[ASME PAPER 68-WA/HT-5] 05 p0846 A69-16116

Counter rotating vertical vortices produced by corona discharge on heated flat plate under free convection conditions
[ASME PAPER WA/HT-9] 05 p0846 A69-16117

Small aircraft gas turbine regenerators employing heat pipes, noting excessive cost and weight
[ASME PAPER 68-WA/GT-7] 05 p0812 A69-16142

Natural convection heat transfer for incipient vapor formation in liquid H and N and for nucleate boiling of liquid H
[ASME PAPER 68-WA/PID-4] 05 p0848 A69-16165

Sensible heat exchange from Gemini and Apollo space suits determined in environmental test facilities, presenting data for heat flux distributions
06 p0880 A69-17089

Amount of flux carried by convection in late type stars, reevaluating drag role in mixing length theory
06 p1003 A69-17321

Impinging jet flames on furnace hearth, analyzing thermal boundary layer characteristics and convective heat transfer rates
06 p1035 A69-17933

Modified schlieren interferometer for quantitative investigation of free convection boundary layer temperature profiles
07 p1130 A69-18263

Equilibrium stability of horizontal layer of fluid in field of modulated temperature gradient having layer thickness greater than penetration depth of heat waves
07 p1241 A69-18696

Convection in conducting fluid filled cavities with variable wall temperature due to magnetic field, with results applicable to rheological systems
07 p1241 A69-18921

Radiative-convective heat transfer in gray gas plane layer blown into turbulent flow past permeable plate
07 p1242 A69-18991

Convection inhibition effects on premain sequence evolution of solar mass star, discussing largely radiative models
08 p1386 A69-20088

Convective heat exchange coefficients for human organism in aircraft surroundings under homogeneous temperature conditions, deriving acclimatization equations
[AGARDOGRAPH-111] 08 p1266 A69-20673

Transient free convection laminar boundary layer equations for heat transfer from vertical semiinfinite flat plate
08 p1305 A69-20842

Local heat transfer coefficients in oscillating turbulent boundary layer over flat plate
[ASME PAPER 69-GT-34] 09 p1623 A69-22490

Flow and heat transfer measurements for heated air in subsonic flow through contraction section connecting tube to conical section
[JPL-TR-32-1348] 10 p1809 A69-23194

Statistical theories of turbulence applied to thermal convection between infinite slippery plates at large Prandtl number
11 p1997 A69-24283

Convection heat transfer and flow in rotating bodies, discussing laminar, turbulent and mixed flow in cones and disks, spheres and cylinders
11 p1998 A69-24459

Forced heat convection in steady turbulent air flow in circular cross sectioned tubes, noting laminar sublayer in wall regions
11 p2000 A69-25096

Heat transfer and skin friction in convective and stagnation flow laminar film boiling in boundary layer flows with appreciable radiation
11 p1873 A69-25242

Model evolution of flow in fluid layer suddenly heated from below at Rayleigh number convection sufficient for turbulence
11 p1874 A69-25351

Wavelength of convective motions, discussing effects of lid heat conductivity on Rayleigh number
11 p2003 A69-25354

Voltage characteristics in MHD generator with water cooled segmented electrodes using potential probes, considering forced convection heat transfer
12 p2017 A69-27178

Heat transfer coefficients for carbon dioxide near thermodynamic critical point for flow through electrically heated duct, noting turbulent forced convection as mechanism
[ASME PAPER 68-HT-32] 13 p2373 A69-27769

Thermal radiation effects on laminar free convection boundary layer of vertical flat plate, studying absorbing and nonabsorbing gases
[ASME PAPER 68-HT-43] 13 p2373 A69-27772

Transient one dimensional temperature distribution determined for bodies with internal heat generation and nonlinear boundary condition, using Biot variational method
[ASME PAPER 68-HT-6] 13 p2374 A69-27775

Surface vibrations effect on forced convection heat transfer normal to cylinder, discussing convective coefficients dependence on Reynolds number
[ASME PAPER 68-WA/HT-5] 13 p2374 A69-27781

Triangular profile circular fins efficiency determined from differential equations solution governing temperature distribution
13 p2375 A69-27790

Free convection heat transfer from heated inclined flat plate in air, studying effects of angular positions
13 p2375 A69-27794

Heat convection mechanism in two phase autooscillatory system generalized to convective heat transfer in cloudy atmosphere
13 p2292 A69-27798

Convective heat transfer, discussing coordinate transformation, similarity analysis similitude and Meksyn integration of boundary layer equations
13 p2376 A69-28139

Benard convective flow as function of Rayleigh and Taylor numbers in thin variable rotating silicone oil layer determined by flow photographs
13 p2377 A69-28172

Thermal behavior of space vehicle window systems predicted by mathematical analysis and computer methods for heat transfer through glass
[AIAA PAPER 68-65] 13 p2378 A69-28215

Convective heat and mass transfer in binary turbulent vertical boundary layer
13 p2378 A69-28311

Heat and mass transfer coefficients in binary laminar boundary layer during natural convection, taking into account enthalpy and thermal diffusion effects
13 p2378 A69-28312

Analytical model for free convection heat transfer from vertical plates with nonhorizontal leading edges, discussing flow field
13 p2379 A69-28342

Ideal compressible fluid motion and heat transfer, noting convective heat transfer intensification with increased twisting velocity of flow
13 p2251 A69-28559

Outer convection zone of cool white dwarf by atmospheric models, using mixing length theory and abundances
14 p2529 A69-29982

Convective heat and mass transfer coupling in laminar hydrodynamic duct flow, obtaining values for

bulk and wall temperatures, transfer coefficients and rates, etc

15 p2716 A69-30004

Temperature, velocity and density perturbation propagation as heat convection wave in viscoelastic thermally compressible heat conducting fluid, analyzing damping and frequency spectra

16 p2878 A69-31952

Compressible turbulent accelerating boundary layer flow model for convective heat transfer from rocket combustion gases, noting heat flux

16 p2878 A69-32000

Convective heat transfer in centrifugal force field of cavity between two rotating disks in turbulent gas flow

16 p2837 A69-32139

Unsteady heat conduction equations for elliptic cylinder with convection solved by point matching

16 p2879 A69-32171

Ammonium perchlorate pyrolysis by convective surface heating, monitoring IR emission as measure of surface temperature

[WSCIPAPER 69-23] 16 p2832 A69-32361

Ammonium perchlorate linear pyrolysis by convective surface heating, discussing propellant deflagration models

[AIAA PAPER 69-501] 16 p2835 A69-32758

Temperature fluctuations in solar photosphere, noting transition from convective to radiative energy transport

17 p3040 A69-33810

Superposition method for predicting tube wall temperatures with gas property and heating rate axial variation, noting application to gas flow problems

18 p3227 A69-34315

Temperatures of radiantly heated sun and shade leaves of white oak measured in low speed wind tunnel, considering differences in convective heat dissipation

18 p3095 A69-34540

Orthonormalization methods applied to heat conduction, convection and radiation problems, noting digital computer programs modifications

18 p3229 A69-34662

Convective heat flux from nonisothermal surface by temperature superposition method with Spalding function as turbulent heat transfer coefficient, noting wall temperature

18 p3229 A69-34836

Asymptotic behavior of solution to parabolic equation for t approaching infinity, proposing asymptotic formula to Cauchy problem for heat conduction

18 p3231 A69-35310

Ablative materials thermal protection characteristics at low heating rates evaluated by convective heating tests, stressing polyurethane foam composite

19 p3357 A69-35536

Combined free and forced convection hydromagnetic flow and heat transfer of electrically conducting fluid subjected to temperature variations in vertical channel

19 p3380 A69-36304

Heat and mass transfer on vertical surface under combined free and forced convection, solving laminar boundary layer equations by stream function

19 p3453 A69-36844

Convection within moon as explanation of maria on near side, presence of mascons, etc

20 p3603 A69-37561

Thermal convection in horizontal fluid layer heated from below, with zero shear boundaries above and below, noting critical Rayleigh number measured value

20 p3518 A69-38234

Natural convective heat transfer to gas turbine rotor blade and thermal resistance of cooling system using centrifugal pump

21 p3785 A69-39103

Natural convection in rectangular cavity with nonuniform lateral surfaces temperature, using finite difference scheme with numerical analysis

21 p3855 A69-39853

Internally air cooled turbine blades and vanes emphasizing coolant aerodynamics, heat transfer and blade life, high temperature in jet engines, etc

[RAES PAPER 22] 22 p4000 A69-40500

Combined heat transfer calculations, considering moving radiating media and simultaneous convection or conduction

23 p4237 A69-41328

Mars atmosphere response to surface temperature changes by radiative and convective heating, noting strong solar control of mean wind distribution

23 p4212 A69-41614

Nonlifting blunt axisymmetric hypersonic shape determination to maximize pressure drag for given convective heat transfer, diameter and free-stream conditions

24 p4244 A69-42960

Barometric pressure affecting convective heat transfer from human body in air, deriving empirical formula as function of air density, speed and temperature

24 p4267 A69-43384

Convective thermal flux at stagnation point in multicomponent partially ionized gas injected flow past body, considering effective ambipolar diffusion coefficient

24 p4246 A69-43485

Rectangular fins arrangement on horizontal surfaces for optimum free convection heat transfer coefficient, considering fin weight, height and spacing effects

[ASME PAPER 69-HT-44] 24 p4409 A69-43517

Transverse curvature effect on laminar free convection heat transfer from vertical isothermal cylinders

[ASME PAPER 69-HT-G] 24 p4410 A69-43522

Heat transfer data for laminar, transition and turbulent natural convection boundary layers from water experiment on constant heat flux vertical plate

[ASME PAPER 69-HT-D] 24 p4410 A69-43525

Natural convection local heat transfer on constant heat flux inclined surfaces for water and air in laminar, transition and turbulent regimes

[ASME PAPER 69-HT-C] 24 p4410 A69-43526

Local Nusselt number beyond abrupt circular channel expansion tested for Reynolds numbers with air as working fluid

[ASME PAPER 69-HT-35] 24 p4411 A69-43532

Electric arc stabilization in crossed convective and magnetic fields, discussing column slanting relationship to widening near downstream electrode

[AIAA PAPER 68-709] 24 p4359 A69-43572

CONVERGENCE

Convergence theorems for perturbed Newton methods for solution of nonlinear equation systems, suggesting algorithm holding Jacobian matrix elements constant during iterations

01 p0106 A69-10988

Unstable minimization problem of functional, examining construction of sequences and stability

02 p0271 A69-11648

Convergence of Multhopp collocation method for numerical solution of linear singular integrodifferential equation, noting use in airfoil, propeller and elasticity theory

02 p0271 A69-12056

Discharge coefficients for Herschel type smooth venturimeters, analyzing influence of transport coefficients, convergence angles and contraction ratios

02 p0250 A69-12414

Convergence of Rayleigh-Ritz approximations to solution of elliptic boundary value problem applied to subsonic airfoil problem for 2D steady isentropic irrotational flow

03 p0361 A69-12846

Finite element method convergence introduced as general numerical technique related to Ritz method in structural analysis with digital computers

03 p0527 A69-13745

Convergence of optimal control for denumerable system of differential equations treated by functional-space decomposition

04 p0583 A69-15095

Difference iteration method for solving three dimensional Dirichlet problem presented as system of plane Dirichlet problems

05 p0787 A69-16457

Convergence of improper integral evaluated along solution of differential equation, noting use in asymptotic control theory

05 p0788 A69-16481

Convergence of Grammel and Galerkin methods allows use of modified Green function

06 p1020 A69-17132

Structural iterative design convergence to minimum weight proved by dual linear programming, discussing global convergence and convergence rate

08 p1413 A69-20351

Book on stochastic convergence covering infinite sequences of random variables, stochastic integrals and derivatives, characterization of normal distribution and Wiener process

08 p1343 A69-20443

Command inputs handling by linear optimal control theory, investigating Riccati matrix differential equation convergence

08 p1298 A69-20856

Converging solutions for imaginary admittance and current distribution in linear cylindrical antennas

08 p1295 A69-21165

Convergence extensions in quasi-linearization for optimal control, showing results for brachistochrone and reentry trajectory problems

09 p1590 A69-21414

Particular solutions in nonlinear two point boundary value problems, showing convergence for uncontrolled and controlled systems

09 p1531 A69-21416

Rate estimates of convergence of multidimensional central limit theorem for sequence of identically distributed independent random variables with third order finite moments

10 p1719 A69-23400

Finite difference approximation to degenerate Dirichlet problem, obtaining a priori estimate to prove convergence

10 p1719 A69-23517

Convergence of zeta function for flows and diffeomorphisms

10 p1720 A69-23639

Solution of confluence in three dimensional shock and detonation polars for spinning detonation

11 p2002 A69-25353

Convergence of Bubnov-Galerkin method in complex separable Hilbert space, proving theorems for sufficient conditions

12 p2123 A69-26607

Nonlinear control systems error signals convergence to steady states in frequency domain, applying step or ramp functions to single feedback system

13 p2237 A69-27188

Variational principle and convergence of finite element method based on stress distribution

13 p2368 A69-28349

Convergent solutions of inviscid solar wind equations in expansions form including dimensionless distance from sun

14 p2515 A69-29968

Localization and convergence of Fourier series for fundamental systems of functions of Laplace operator, including eigenfunctions and trigonometric systems

15 p2644 A69-30287

Rapid convergence algorithms as second variation methods for dynamic optimization problems

15 p2645 A69-31235

Optimum overestimate to obtain bound permitting use as convergence criterion for iterative process in orbital glider reentry trajectory optimization

[ONERA-TP-628] 16 p2805 A69-32332

Reflected shock waves behind tapered shock tube section indicated by shock wave detectors, microwave absorption and optical emission measurements

18 p3085 A69-34474

Convergence of discrete approximations of Navier-Stokes equations to solutions of corresponding differential equations

18 p3121 A69-34613

Convergence of methods of tangential parabolas and hyperbolas used in nonlinear equation solution with nondifferentiable operators

18 p3164 A69-34707

Convergence properties of finite difference approximations to solutions of Dirichlet problem for Poisson equation

18 p3164 A69-34840

Steepest ascent convergence improved in orbital glider reentry trajectories optimization problems, discussing bang-bang and cosine control-variable changes

19 p3398 A69-35666

Convergence rate estimates for singular perturbations solutions of linear elliptic boundary value problems

19 p3360 A69-35899

Algorithm for Chernousko local variation method during application to solution of variational problems involving nonadditive functionals, assessing convergence

20 p3513 A69-36990

Averaging methods applied to nonlinear equations in mechanics, discussing solution convergence estimation

20 p3576 A69-37440

Difference method for initial value problems in quasi-linear hyperbolic first order approximations extended to wider quasi-linear problems, assessing convergence

20 p3568 A69-37833

Discrete extremum problems solution convergence to optimal control continuous problem as functional optimal value and optimal control

21 p3684 A69-38430

Book on convergence in calculation of elastoplastically deformable aircraft structures and continua,

covering matrix displacement method and stepwise linearized computational technique

22 p4044 A69-40619

Visual stimuli initiating horizontal eye vergence movement in human subjects, noting cerebral conditions for convergence

22 p3881 A69-40859

Shock wave transient motion during passage through ducts in inviscid gas containing convergences, using characteristics method

23 p4153 A69-42398

CONVERGENT-DIVERGENT NOZZLES

Laval nozzle resistance as result of friction and under expansion of gas, noting flow and pressure recovery coefficients

03 p0361 A69-12967

Relaxation equations for oscillatory degrees of freedom of molecular supersonic binary gas flow in Laval nozzle, obtaining population inversion

07 p1118 A69-18540

Variable geometry intake and convergent-divergent nozzle design for supersonic aircraft, noting subsonic installations

08 p1253 A69-21164

Photometric methods for determination of H atom and hydroxyl radical concentrations in hot gases in convergent-divergent nozzles, noting Li/lithium hydroxide absorption

09 p1496 A69-21952

Pressure and temperature effects on electrical conductivity of dense plasma ejected from Laval nozzle

10 p1739 A69-23492

Thermodynamic atomization in MHD energy conversion through convergent-divergent nozzles, noting nozzle efficiency and droplet size

13 p2245 A69-27477

Air-water and steam-water flows in two phase Laval nozzles, measuring flow rates and temperature and pressure variation

13 p2245 A69-27481

Gas and polydispersed condensate parameters of nonequilibrium two phase flow in Laval nozzle, considering particle collisions and coagulation, energy exchange and momentum exchange

14 p2391 A69-29621

Continuous supersonic plasma wind tunnel obtained using magnetic Laval nozzle made by modification of Q device normal magnetic field configuration

15 p2589 A69-30909

Fluidic sensors for jet engine control, analyzing convergent divergent nozzles, vortex and acoustic oscillators for pressure and gas temperature measurements [AIAA PAPER 69-542]

16 p2843 A69-32699

Viscous convergent-divergent nozzle flow slender channel approximations, discussing roles of nozzle geometry, Reynolds number and wall temperature, calculating velocity, enthalpy, etc [AIAA PAPER 69-654]

17 p2894 A69-33502

Divergence losses of noncircular C-D nozzles based on approximation by spherical source flows

19 p3238 A69-35960

Hydrogen jet structure ejected into vacuum from Laval nozzle at supersonic velocity, considering separation point from diffuser wall

19 p3240 A69-36601

He and Ar arc-heated flows into reservoir and expansion in converging-diverging supersonic nozzles, considering flow equilibrium effect on heat transfer and enthalpy

20 p3631 A69-37198

Relaxation equations for oscillatory degrees of freedom of molecular supersonic binary gas flow in Laval nozzle, obtaining population inversion

21 p3693 A69-38692

Quasi-one dimensional analysis for nonequilibrium flow of dissociated diatomic gas through converging-diverging nozzle, discussing critical mass flow rate

22 p3927 A69-40583

Transonic expansion analysis applied to flow through convergent-divergent nozzles with small throat radius of curvature, noting coordinate system selection

23 p4060 A69-41906

CONVERGENT NOZZLES

Interactions between outer and inner jets behind maximum cross section of jet engine nozzle [ONERA-TP-600]

02 p0187 A69-11620

Nozzle geometry influence on argon plasma flow parameters in shock tube, discussing measurement data behind shock wave front

03 p0481 A69-14160

Argon flow characteristics in converging nozzle in continuum, slip and free molecular regimes [ASME PAPER 68-WA/FE-9]

05 p0698 A69-16089

Asymptotic boundary curves for two dimensional and axisymmetric incompressible irrotational flows into throat of convergent duct

10 p1680 A69-23893

Steam-water convergent condensing injector with supersonic inlet vapor, discussing axial pressure profiles and discharge pressure

13 p2372 A69-27486

Argon flow characteristics in converging nozzle in continuum, slip and free molecular regimes [ASME PAPER 68-WA/FE-9]

14 p2390 A69-29445

Boundary layers coalescence on plane convergent channel walls investigated with analytic formulas for velocity distribution, shear stress, layer thickness, etc

15 p2592 A69-31009

Velocity decay and heat transfer rates measurement in cylindrical wall jet formed by jet emerging through convergent nozzle

21 p3695 A69-38972

Liquid alumina particles agglomeration in convergent and throat region of nozzle leading to performance decrease by increasing velocity and temperature difference between phases

22 p4001 A69-40929

Convergent conical nozzles discharge coefficient calculated as function of operation mode and nozzle geometry

24 p4364 A69-43074

CONVERTAPLANES

U V/STOL AIRCRAFT

CONVERTERS

Equivalence and stability for negative impedance converter of bridge circuits by symmetrical amplifier design

09 p1467 A69-22559

Wave-mode converter with feed for omnidirectional antenna excitation, discussing H to E wave conversion, waveguides, emitter, etc

11 p1854 A69-25616

Resonance method determining spurious modes excitation in natural mode converter, discussing construction, application and mathematical correlation

11 p1856 A69-25630

Inductive converters accuracy calculation by statistical method based on probability theory

13 p2259 A69-27424

Tubes faults monitoring in three phase Graetz converter bridges by measuring voltage across DC smoothing inductor

15 p2575 A69-30180

Fluidic curved-wall electropneumatic converter optimization, presenting steady state, step and pulse mode responses for various positions and lengths of resistive heaters

15 p2553 A69-31298

Stabilized DC to DC converter advantages in output voltage, overall dimensions and efficiency for battery driven mobile equipment

16 p2765 A69-32443

MPD converters in pulsed and continuous modes, discussing inductive propulsion system

22 p3999 A69-39905

Modularized static AC and DC inverters and converters for aerospace electrical power conditioning systems, discussing circuit functions and performance tests

23 p4073 A69-42292

Three phase DC-AC inverter with low harmonic distortion, good efficiency and packaging capability, stabilizing frequency by crystal controlled clock oscillator

23 p4074 A69-42294

CONVOLUTION INTEGRALS

Proper digital filters devoid of transient response analyzed as extension of time invariant filters

02 p0213 A69-12815

Recursive formulas for numerical evaluation of real convolution integral for simulation of control systems and electrical networks on digital computer

06 p0947 A69-17250

Upper and lower bounds for feedback decoding and definite decoding minimum distances of binary convolutional codes

06 p0904 A69-17865

Fundamental solutions of initial value problems related to Euler-Poisson-Darboux equation generalized for radially symmetric case, developing convolution integrals

09 p1533 A69-22796

Unsteady surface and internal waves diffraction induced by source in ideal incompressible fluid, obtaining solutions in form of convolution and transfer functions

12 p2061 A69-25953

Convolution property of Hermitian transform for odd integral values of n

15 p2645 A69-30863

Algorithm for constructing random error correcting convolutional codes

24 p4284 A69-42723

Liapunov functionals for time delay systems by path integrals in state space, using convolution equations involving distributions with compact support

24 p4295 A69-43317

CONVOLUTIONS [MATHEMATICS]
U CONVOLUTION INTEGRALS

CONVULSIONS

Mice convulsions at varying hyperbaric oxygen pressures and carbon dioxide content correlated with decreasing brain alpha aminobutyric acid levels

19 p3257 A69-35972

Hyperbaric oxygen convulsions origin and site, studying pressure effect on brain electrical activity in rabbit by EEG

21 p3656 A69-38977

COOLANTS

NT ENGINE COOLANTS

NT ORGANIC COOLANTS

Concorde fuel management, discussing trim, fuel as coolant and booster pumps

07 p1057 A69-19705

COOLING

NT AIR COOLING

NT EVAPORATIVE COOLING

NT FILM COOLING

NT LIQUID COOLING

NT QUENCHING [COOLING]

NT RADIANT COOLING

NT REGENERATIVE COOLING

NT SUPERCOOLING

NT SURFACE COOLING

NT SWEAT COOLING

Transpiration and dissipation effects on heat eddy diffusivity over two dimensional plate in turbulent flow for various Prandtl numbers

01 p0178 A69-11410

Cooling rate effect during aging on heat resistance of forged blanks of nickel based chromium alloy

02 p0266 A69-12125

Electron emitter cooling and plasma heating of thermionic converters noting effects of plasma density, diode spacing, etc

03 p0368 A69-13127

Solid body surface temperature relation to heat flux during cooling by fluid flow solved on computer

07 p1241 A69-18923

Cooling requirements for high speed polytetrafluorethylene lubricated ball bearings operating in cold hydrogen gas, developing minimum gas flow rate equation

[ASLE PAPER 68-LC-2] 07 p1141 A69-19310

Weld mechanical properties of Ti-6Al-2Sn-4Zr-2Mo titanium alloy as function of cooling rate changes or transformation rate shifts resulting in wide range of hardnesses

08 p1318 A69-19965

High temperature regions cooling as applied to solar flares, considering energy losses due to heat conduction, bremsstrahlung, line emission and recombination radiation

09 p1588 A69-21362

Optimum cooling of homogeneous isotropic cylindrical body with constraints on magnitude of thermoelastic stresses

11 p1976 A69-24772

Induced stressing method for complex castings by controlled cooling during heat treatment applied to front frame of J-79 turbojet engine

13 p2269 A69-28184

Martensite transformation with fcc lattice in Ti alloys containing 5.9 percent Fe analyzed as function of cooling rate using X ray analysis

15 p2636 A69-30105

High temperature regions cooling as applied to solar flares, considering energy losses due to heat conduction, bremsstrahlung, line emission and recombination radiation

18 p3197 A69-34752

Ramsdorf meteorite chondrules and metal particles formation attributed to shock-induced partial melting and rapid cooling

19 p3409 A69-36088

Heat protection efficiency of plane surface in turbulent boundary layer behind tangential slots, comparing cooling effects of insulating gas films

20 p3631 A69-37095

Temperature and fluid distribution in porous solid subjected to large suction, convective heating and radiative cooling on one surface

20 p3514 A69-37225

Heated body cooling off study via temperature field isothermal lines visualization on TV screen
20 p3539 A69-37437

Orthopyroxenes cooling history, studying order-disorder transitions between ferrous iron and magnesium
20 p3523 A69-37518

Titanium strengthened high strength hot-rolled steels, discussing cooling rates leading to complete ferrite phase transformation
21 p3743 A69-38652

Melt cooling rates effect on supersaturated solid solutions in Al ternary systems
21 p3745 A69-38955

Mathematical modeling techniques applied to thermoelastic cooling for plate without clamping and mechanical loads, examining integrator schematic diagram
21 p3680 A69-39851

COOLING FINS

Heat transfer efficiency of triangular radiating fin in diathermal medium producing aerodynamic heating
02 p0354 A69-12490

Heat transfer and temperature distribution in thin fins with stochastic root temperature due to excitation by stochastic and Markov processes
[ASME PAPER 68-HT-35] 13 p2374 A69-27780

Triangular profile circular fins efficiency determined from differential equations solution governing temperature distribution
13 p2375 A69-27790

Seam welded U-type fin efficiency and effectiveness, studying effects of fin height, heat transfer coefficient and thermal resistance
19 p3452 A69-36371

Rectangular fins arrangement on horizontal surfaces for optimum free convection heat transfer coefficient, considering fin weight, height and spacing effects
[ASME PAPER 69-HT-44] 24 p4409 A69-43517

One dimensional numerical solution for steady state thermal behavior of trapezoidal profile annular fins transferring heat by conduction and radiation
[ASME PAPER 69-HT-6] 24 p4413 A69-43553

COOLING SYSTEMS

Nosetip cooling system based on discrete subsonic forward liquid injection through ablative nosetip opening of blunted reentry vehicle
[AIAA PAPER 68-1141] 03 p0532 A69-13559

Active cooling systems for high performance reentry vehicles in thermal and shear stress environments
[AIAA PAPER 68-1154] 03 p0533 A69-13669

Increasing vortex tubes energetic cooling efficiency for cooling aircraft components by using potential energy of gas emitted from tubes
04 p0684 A69-14488

Helium cryostat designed to operate under overload and vibrations and used for cooling onboard superconducting devices of Cosmos 140 satellite
04 p0585 A69-15407

Lithium metal spray structural cooling system for refractory materials
[AIAA PAPER 68-358] 04 p0688 A69-15509

Nuclear rocket engine exhaust gas cooling by injecting water jet eliminates need for secondary cooling
[AIAA PAPER 68-604] 04 p0591 A69-15516

GaAs injection diode laser cooled by closed cycle gas refrigeration system, noting time required to reach laser operating temperature
05 p0777 A69-16793

Conduction equations for conduction cooling of human body solved by finite difference method
06 p0880 A69-17088

Optimizing radiating system consisting of radially diverging conical heat removing projections attached to cooled isothermal sphere
06 p1033 A69-17603

High turbine inlet temperature technology using thermosiphon cooling for gas turbine, possibly doubling specific horsepower of aircraft
[SAE PAPER 690034] 07 p1203 A69-18311

Circulating liquid laser system using neodymium in selenium oxychloride, discussing cooling advantages and components
[IEEE PAPER M-70] 07 p1153 A69-19069

Liquid fuel rocket engine design for cooling by propellant counter flows
08 p1376 A69-20588

Personal cooling in inadequately air conditioned cockpits, considering dry air, air ventilated suits and liquid circulated tubes near skin
[AGARDGRAPH-111] 08 p1267 A69-20684

Radiation cooled MPD arc thruster design and performance, noting specific impulse relation to arc spoke rotation frequencies
[AIAA PAPER 69-245] 09 p1566 A69-21259

Turbine blade cooling research programs, discussing effects of increased trailing edge thickness and cooling air on turbine efficiency
[ASME PAPER 69-GT-15] 09 p1432 A69-22501

Cooled turbine performance evaluation methods, noting promise of analytical methods
[ASME PAPER 69-GT-63] 09 p1572 A69-22517

Ranque vortex tube as cooling device in MA-3 ventilating garment
09 p1447 A69-22550

Spray cooling techniques for thermal protection of aerospace structures including lithium spray cooling, vapor collection and condensation, etc
11 p1966 A69-24532

TWT heat pipe cooled depressed collector designed as compact heat transfer device and electrical insulator
11 p1847 A69-24746

High power TWT tube cooling in space vehicle, discussing thermal control system based on heat pipe radiator
11 p1847 A69-24747

Initial nonuniformity effect of temperature distribution in main stream on efficiency of cooling by air injection through slit or porous collar
11 p2002 A69-25338

Rocket propulsion devices classifications, discussing energy sources, propellants, performance, space vehicle applications, liquid propellant rockets, engines, selection criteria and cooling methods
11 p1943 A69-25587

Ablation cooling application to aerodynamic heat shielding, discussing various materials, sublimation, rocket probe ascents, satellites and experimental aircraft
12 p2011 A69-25854

Heat removal from laser ruby rod by Cu prism connected to cooling system, discussing limiting factors in heat transfer area size
12 p2108 A69-26592

Fluidic systems for automatic control of fuel supply to ramjet engine combustor, coolant rationing and distribution to engine structure and performance efficiency maintenance
14 p2508 A69-28875

Freons applications to radiation detector cooling, calculating specific volumes and compressibility factors for Freon 14
14 p2447 A69-29330

Spray oil cooling to reduce aircraft generator weight, enhance reliability and lengthen overhaul intervals
15 p2552 A69-30326

Solar simulator with 20 kw xenon lamps, discussing performance, versatility and problems with collectors, folding mirrors and cooling system
15 p2586 A69-30384

Water cooled split-flow probe measuring enthalpy of high temperature subsonic streams
15 p2614 A69-31275

NERVA engine cooldown system for emergency shutdowns using high pressure liquid H followed by gaseous H warmup and liquid N cooldown
[AIAA PAPER 69-512] 16 p2810 A69-31846

Heat pipes design for rocket engines cooling, discussing connections to space radiator and to heat rejection device and heat transfer capability
[AIAA PAPER 69-582] 16 p2839 A69-32668

Packed bed catalytic reactors cooling capacity in promoting endothermic reactions of hydrocarbon fuels, using computerized temperature and composition profiles
[AIAA PAPER 69-588] 17 p3071 A69-33265

Cooling system control system for astronaut thermal equilibrium and work output maximization during extravehicular space missions
[AIAA PAPER 69-617] 17 p2914 A69-33278

Turbine blades materials with emphasis on oriented solidification of eutectic alloys, discussing blades cooling by thermosiphons or ducts
17 p2978 A69-33334

Continuous mode operation in hypergolic bipropellant low thrust rocket motors, discussing high temperatures reached by combustion chamber walls and cooling solutions
17 p3019 A69-33335

Turbine blade cooling emphasizing economics, service life and computerized calculations
17 p3020 A69-33352

Technology trends in airbreathing propulsion, discussing noise control for subsonic jet transports, turbine blade cooling, etc
[AIAA PAPER 69-774] 19 p3244 A69-35648

Water injection cooling of exhaust gases during stage testing of NERVA engine, discussing exhaust duct con-

figuration and flow characteristics, spray nozzle geometry, etc
[AIAA PAPER 69-514] 19 p3372 A69-36301

Vortex flow air cooling system for lasers using vortex effect of gas separation, resulting in minimum weight and dimensions and high cooling efficiency
21 p3734 A69-38399

Active cooling systems for high performance reentry vehicles in thermal and shear stress environments
[AIAA PAPER 68-39016] 21 p3851 A69-39016

Electronic equipment environmental cooling by controlled airflow systems, reviewing systems designs, control problems, etc
22 p3954 A69-40035

Cooldown of vacuum insulated transfer lines using liquid N and H, discussing flow characteristics reproduction by digital computer program
[NAS-NRC PAPER I-1] 22 p4050 A69-40625

Heat pipe design for electron tubes cooling at various temperatures, including dielectric heat pipes and traveling wave tubes
[ASME PAPER 69-HT-25] 24 p4412 A69-43543

Heat pipe coupled to air cooled heat exchanger to cool high power airborne radio component by dissipating thermal load into ambient air
[ASME PAPER 69-HT-16] 24 p4413 A69-43552

Scramjet engine active cooling with regenerative system using superalloy heat exchangers and hydrogen fuel as coolant
[AIAA PAPER 68-1091] 24 p4365 A69-43725

COORDINATE SYSTEMS
U COORDINATES

COORDINATE TRANSFORMATIONS

Analytic photogrammetric determination of lunar control coordinates from Ranger photography
01 p0147 A69-10022

Equations of motion of satellite in rotating coordinate system, noting effects of precession and nutation on transformation of orbital elements
01 p0150 A69-10445

Algorithm for Navier-Stokes and continuity equations used to derive curvilinear coordinate system
04 p0564 A69-14858

Computer programming of satellite orbit tracking angles for automatic picture transmission receiving stations
04 p0558 A69-14917

Einstein equations solution in Gaussian coordinates describing particles gravitational fields including point particles
07 p1180 A69-18507

Coordinate transformations eliminating singularities in gravitational radius of Schwarzschild metric, noting local Lorentz transformations
08 p1351 A69-19952

Terminal optimal control problem for linear system having control criterion not dependent on all phase coordinates
12 p2045 A69-25965

Convective heat transfer, discussing coordinate transformation, similarity analysis similitude and Meksyn integration of boundary layer equations
13 p2376 A69-28139

Equations derived for radar image coordinate transition to geodetic coordinates in aerial surveying by side-looking airborne radar
15 p2596 A69-30574

Cosmic ray shower axis mean logarithmic distance from apparatus calculated by transforming shower recording frequency radial distribution to lin-log coordinate system
17 p3024 A69-33581

Coordinate transformation of Euler equations governing precession and nutation of self gravitating bodies of viscous fluid in inertial coordinates
21 p3797 A69-38539

Computer program for satellite APT geographical grid production, discussing latitude-longitude intersections transformation to Cartesian coordinates
21 p3718 A69-39749

Horizontal Situation Display /HSD/ map computer mechanization transforming earth location to X, Y coordinates for Lambert conformal projection
[AIAA PAPER 69-987] 22 p3908 A69-40367

COORDINATES
NT ASTRONOMICAL COORDINATES
NT CARTESIAN COORDINATES
NT GEOCENTRIC COORDINATES
NT GEODETIC COORDINATES
NT HYPERBOLIC COORDINATES
NT INERTIAL COORDINATES
NT INERTIAL REFERENCE SYSTEMS
NT LAGRANGE COORDINATES
NT PLANETOCENTRIC COORDINATES
NT POLAR COORDINATES

Analytical mechanics of chemical reactions, discussing natural collision coordinates for three dimensional reactions and exchange collisions for molecule and atom

01 p0123 A69-10681

Errors arising from inaccurate insertion of initial conditions in autonomous determination of coordinates of object moving along surface of spherical earth

02 p0281 A69-12137

Coordinates interpretation in Schwarzschild problem, projecting space of events by light beams onto Galilean system at infinity

03 p0506 A69-13090

Optimum addition of abscissas in quadrature formulas by expansion of abscissas equation in Legendre polynomials

03 p0455 A69-13372

Maximum probability technique for measuring angular coordinate with unknown signal and noise intensity

03 p0399 A69-14132

Local cross sections method for optimal control, considering control plant with variable control range and constraints on phase coordinates

07 p1115 A69-19003

Transient heat flow in isotropic solids by electrical analog modeling in orthogonal curvilinear coordinate system

09 p1477 A69-22241

B. L. coordinates for mapping geomagnetically trapped particles distribution computed by perturbation method, using perfect dipole as zero order approximation

11 p1949 A69-24861

Inertial navigation systems error analysis based on method of state variables

11 p1914 A69-25434

Motion of heavy body with gyroscope, using coordinate system to reduce problem to linear second order differential equation

11 p1920 A69-25746

Fundamental concepts of nonholonomic coupling and coordinates in nonholonomic mechanics

12 p2129 A69-25990

Coordinates interpretation in Schwarzschild problem, projecting space of events by light beams onto Galilean system at infinity

14 p2516 A69-28772

Transit forecast of terrestrial satellite moving through fixed coordinate line in assigned reference

16 p2859 A69-32221

Rayleigh criteria extension for boundary layers of rotationally symmetrical bodies with curved meridian, utilizing orthogonal coordinate system

19 p3298 A69-36309

Thomas wave equation in fluid mechanics, examining coordinates system with normal hyperbolic metric of universe tube having given signature

20 p3598 A69-37430

Space vehicle electronic attitude measurement method for reference coordinate and fixed coordinate systems based on rectangular coordinates of RF wave propagation directions

20 p3574 A69-37703

Mathematical formulation and error analysis of two rotor gyroorbit used in plotting orbital system of satellite coordinates

21 p3765 A69-39636

Spherical lunar coordinates for arbitrary moment of time calculated by digital computer using Brown lunar motion theory

22 p4024 A69-40611

Natural coordinates in finite element method, giving formulas for straight or curved element analysis and polynomial integration

23 p4182 A69-41901

Geographical position coordinates of radio operator determined by distance difference measurement using Loran and digital computer methods

23 p4186 A69-42027

Combined automatic control systems stability having principal coordinates related by loading equation

23 p4145 A69-42370

Optimal control parameters for gyroscopic devices with constrained phase coordinates obtained on analog computer by introducing equivalent phase coordinates system

24 p4317 A69-43708

COORDINATION

Component total task relationships, analyzing simple and sequential practice effects with aid of Melton Complex Coordinator

02 p0203 A69-12214

Arbitrary human motions coordination in reorganization phases determined during weightlessness for cyclographic analysis of adjustment time

07 p1065 A69-18979

Optimal control of multivariable complex systems through multilevel/hierarchical/ structure, discussing coordination problems

12 p2049 A69-26082

Motion coordination capacity of persons subjected to 40 days bed rest studied by dynamographic technique, discussing nature of slackening

17 p2906 A69-32937

Human motion coordination under acceleration followed by weightlessness during jet flights along Keplerian orbits, discussing initial disturbance and subsequent subsiding

17 p2907 A69-32938

Hand movements in water environment, weightlessness and normal gravity conditions, discussing inner coordinative structure and muscular efforts

17 p2915 A69-33385

Arbitrary human motions coordination in reorganization phases determined during weightlessness for cyclographic analysis of adjustment time

20 p3479 A69-38227

COPILOTS

U AIRCRAFT PILOTS

COPLANARITY

Theory of fatigue crack growth crystal in metals in terms of coplanar dislocation arrays extended to oblique slip planes, discussing orientation

01 p0168 A69-10344

Optimal transfer between coplanar orbits in Newtonian force field without intersecting circle boundaries

10 p1790 A69-24191

Coplanar impulsive transfers and second variation test, using maximum principle and Lagrangian multiplier technique for propellant expenditure minimization

19 p3400 A69-35676

COPOLYMERS

Permittivity and loss tangent of unsaturated styrene polyester copolymers at various temperatures and frequencies

[ONERA-TP-662]

04 p0621 A69-15114

Polymer structure effect on chemical resistance of reinforced plastics, sulfuric acid and sodium hydroxide corrosion of polyester resins and model copolymers

08 p1338 A69-20490

Electron beam radiation curing of mercaptan terminated butadiene-acrylonitrile liquid copolymers at ambient temperatures in air

09 p1512 A69-22368

Block tractable azomethine copolymers prepared by reaction of insoluble oligomers with monomers or of two different fusible oligomers, noting high thermal stability

13 p2217 A69-28317

Enzyme transitions in RNA polymerase state during unprimed synthesis of r/I-C/ copolymer, noting dimer-monomer pattern during lag phase

22 p3895 A69-40050

COPPER

Surface fatigue significance in sliding wear studied from damage on copper single crystal using electron microscope techniques

01 p0085 A69-10368

Liquid copper electrical conductivity temperature dependence at very high temperatures from magnetic diffusion and flux penetration measurements, noting exploding wires role

01 p0119 A69-10673

Specific heats of Cu, GaAs, GaSb, InAs and InSb measured over low temperature ranges

01 p0140 A69-11252

Solar copper abundance determined from measuring Cu 1 and 2 and resonance lines transition probabilities in electric arc emission under LTE conditions

02 p0204 A69-11456

Recombination effects in high resistivity Cu doped gallium arsenide single crystals determined by photoconductivity methods

02 p0294 A69-11627

Dynamic tensile stress-strain curves for annealed Al, Cu and Fe at constant strain rates, describing experimental method

03 p0524 A69-13065

Dislocations effect on decomposition rates of solid solutions of InAs and Au, Ag or Cu

03 p0484 A69-13283

Fatigue mechanism in fcc metals at ultrasonic frequencies, comparing microstructural changes in copper and alpha-brass

04 p0613 A69-14448

Pulse broadening in MHD copper vapor laser

07 p1149 A69-18904

Impurity atoms effects on Cu diffusion and solubility in GaAs, determining Hall coefficient temperature dependence and conductivity

07 p1199 A69-19009

Tensile deformation properties of copper single crystals strengthened by fine dispersions of BeO particles

08 p1334 A69-20575

Copper diffusion coefficient in undoped n-type gallium arsenide measured by ultrasonic method

09 p1555 A69-21471

Dislocation substructure near fatigue fracture surface during tensile mode crack growth in copper single crystals by transmission electron microscopy

10 p1797 A69-23079

Etch pits behavior during diffusion and rediffusion of copper in low dislocation crystals of gallium arsenide, demonstrating vacancy nature

11 p1937 A69-25029

Copper and aluminum fatigue in vacuum and ultrahigh vacuum, discussing effects of hydrogen, nitrogen and oxygen pressures

13 p2280 A69-28088

Copper diffusion coefficient in undoped n-type gallium arsenide measured by ultrasonic method

15 p2669 A69-30716

Lattice vibration theory of solid state diffusion for Cu including anharmonic effects formulated using equilibrium statistical mechanics, considering interacting phonon events

17 p3015 A69-32822

Heat transfer from cylindrical copper surface to liquid helium at 4 degrees K, discussing temperature fluctuations in nucleate boiling region

17 p3074 A69-33780

Materials integral hemispheric radiative capacity determination based on cooling rate of thin walled specimen in vacuum, considering stainless steel, Ni and Cu

18 p3156 A69-34698

Automatic electropolisher for copper disks

21 p3720 A69-38597

COPPER ALLOYS

NT BRASSES

NT BRONZES

NT MANGANIN [TRADEMARK]

Electron band structure of copper-nickel alloys, discussing thermoelectric properties, energy ranges and effect of alloying additions

02 p0301 A69-12765

Aluminum additive effects on copper-titanium alloy decomposition, discussing Guinier complexes, heterogeneous nucleation, plastic deformation and low temperature aging

11 p1905 A69-24922

Heat resistant Fe and Cu alloys creep index affected by temperature, testing time and specimen grain size

15 p2639 A69-30569

Sliding friction tests of Cu and Cu-Be alloy plates in contact with various alloy sliders in air and vacuum [ASLE PAPER 68-LC-5]

15 p2622 A69-30610

Friction effects on friction couples made of two different nonferrous alloys, discussing temperature regime difference effects on microgeometry and structure

15 p2629 A69-31027

Joints structure, phase and chemical composition in kinetics of titanium diffusion brazing with copper

22 p3958 A69-41203

COPPER COMPOUNDS

Thermal decomposition of ammonium perchlorate and ammonium perchlorate-copper chromite mixtures

02 p0304 A69-12312

Unidirectionally solidified eutectic composite of Al and Cu-Al intermetallic, noting tensile properties at room and high temperatures

10 p1708 A69-22995

Proton transfer mechanism of copper chromite catalyzed thermal decomposition of ammonium perchlorate, noting electron transfer

21 p3783 A69-38810

COPPER OXIDES

Temperature dependence of resistivity of zirconium oxide with copper oxide additions indicates suitability as heat sensitive resistor material in 300 to 1000 degree C range

16 p2827 A69-32482

COPPER SULFIDES

Impurity profiles and energy band diagram for cuprous sulfide-CdS heterojunction based on capacitance, Hall and electron microprobe measurements

03 p0368 A69-13075

- Copper sulfide-cadmium sulfide heterojunction model for photovoltaic effect, considering surface layer intrinsic absorption and CdS photoconductivity
19 p3250 A69-35683
- Photovoltaic effect at copper sulfide-cadmium sulfide heterojunction, studying depletion layer width, diffusion lengths and spectral response
19 p3382 A69-35684
- Resistivity, layer thickness, postbarrier heat treatment and impurity effects on cadmium sulfide-copper sulfide solar cell
19 p3250 A69-35685
- CORDIERITE**
Cordierite application to radomes for high velocity engines, discussing dielectric properties at microwave frequencies, mechanical properties, temperature control and fabrication
07 p1168 A69-19525
- CORDITE**
U COLLOIDAL PROPELLANTS
U DOUBLE BASE PROPELLANTS
- CORE FLOW**
Axisymmetric MHD flow in turbulence chamber at large Hartmann numbers studied for flow boundary layer effects
01 p0130 A69-10772
- Solar interior rotational angular velocity influence on solar oblateness, noting reduction by turbulent mixing
09 p1600 A69-22201
- Wall flows and wake laws validity analyzed by wall balance technique, considering boundary layers under perturbation and core flow restrictions
13 p2251 A69-28633
- Fluid dynamic simulation of gas core nuclear rocket chamber for separating light and heavy gas via centrifugal force produced by MHD-driven rotational flow [AIAA PAPER 69-727]
17 p3004 A69-33483
- Fluid velocities at earth core surface inferred from magnetic data, considering velocity constraints and diffusion contributions to secular change
18 p3129 A69-34951
- Diverging nozzle flow of gas mixtures containing solid or liquid particles analyzed by one dimensional approximation separately averaging boundary layer and flow core
19 p3298 A69-36389
- Operational characteristics of multiple arcjet wind tunnel for time varying mass flow rate programs, calculating isentropic core densities and velocities [AIAA PAPER 68-229]
22 p3927 A69-40541
- Axial and angular momentum flux, flow force and circulation to determine strength and structure of narrow rotating axisymmetric vortex and swirling core flows
24 p4298 A69-42598
- CORE STORAGE**
Ferrite core storages characteristics with rectangular hysteresis loop for digital control units, discussing optimal selection method
14 p2418 A69-29145
- Dual role core /Ducor/ memory system with unique core stack assembly feature to achieve cost reduction and structural integrity for severe environmental conditions
22 p3903 A69-39950
- CORES**
NT HONEYCOMB CORES
NT MAGNETIC CORES
NT REACTOR CORES
- Red giants limiting helium core mass dependence on total stellar mass and initial composition from stellar evolutionary models
02 p0327 A69-12710
- Lunar core electrical conductivity determination based on induced magnetic field arising from time varying interplanetary magnetic field associated with solar wind plasma
07 p1215 A69-18832
- Metal castings around ceramic cores for economic manufacture of jet engines
09 p1503 A69-21907
- Star counts in star cluster neighborhoods, obtaining ratios of corona radius to nucleus radius as function of cluster mass
11 p1951 A69-24246
- Postbuckling of filled circular cylindrical shell using Ritz energy method for load deformation relation, discussing stabilizing effect of core
22 p4038 A69-39895
- CORIOLIS EFFECT**
Universal vestibulometric chair for inducing irritation in tests involving vestibular analyzer interaction with other body functions
02 p0200 A69-11517
- Coriolis acceleration dosages applied in vestibulometric tests of male subjects inclined in rotating chair
05 p0710 A69-16521
- Coriolis stimulus effect during centrifugal g load on spatial orientation and accompanying stick performance
06 p0876 A69-18023
- Human vestibular and sensory reactions to rotation and rocking, Coriolis acceleration and vestibular reaction inhibition on ground test stand for effects of temporary weightlessness
07 p1062 A69-18586
- Vestibular-vegetative reactions during angular and Coriolis accelerations alternating with weightlessness, noting increased parasympathetic and sympathetic activity
07 p1062 A69-18587
- Overt motion sickness prevention by incremental exposure to Coriolis accelerations
07 p1067 A69-19425
- Coriolis acceleration in rotating environment, discussing origins and role in human existence in rotating space station
09 p1540 A69-21891
- Motion sickness studied with slow rotation room having controlled Coriolis accelerations, discussing oculogyral illusion, nystagmus, dizziness and neuromuscular incoordination
12 p2019 A69-26547
- Human nystagmic reaction variations due to simultaneous rotation of head and body, studying coriolis couple in horizontal semicircular canals
12 p2020 A69-26565
- Azimuthal electric currents generation by Coriolis forces in hot stars with intensive radial flows in convective zones
13 p2350 A69-27862
- Stratified rotating fluid time dependent motion characterized by stability frequency ratio and Coriolis parameter within quasi-geostrophic approximation
13 p2248 A69-28171
- Coriolis effect in rotating spacecraft simulation, discussing optokinetic reflex responses as function of head turning angle with spin axis
14 p2409 A69-29300
- Equations for gradually changing motion by differentiating momentum and energy equations with respect to abscissa noting wall resistance, viscosity, turbulence and Coriolis coefficients
15 p2593 A69-31489
- Coriolis acceleration dosages applied in vestibulometric tests of male subjects inclined in rotating chair
18 p3096 A69-34740
- Coriolis acceleration effect on vestibulo-vegetative and vestibulo-somatic reflexes of humans subjected to forward tilting, noting pulse and respiration rates
20 p3472 A69-37259
- Vestibular functions of humans subjected to Coriolis acceleration via prolonged rotation at different angular velocity rates
20 p3472 A69-37260
- Vestibular analyzer dynamic characteristics under Coriolis acceleration, measuring heart beat rate, arterial pressure, head bending aftereffects, etc
20 p3472 A69-37262
- Vestibulometric tests for flight surgeon appraisal of applicants in flying profession, comparing Coriolis forces cumulative load tests with conventional tests
20 p3481 A69-37278
- Incompressible electrically conducting fluid in presence of magnetic field and Coriolis forces, analyzing Rayleigh-Taylor instability by variational principles
20 p3577 A69-38195
- Human susceptibility to motion sickness under Coriolis acceleration during parabolic flight weightlessness
21 p3659 A69-39168
- Initialization technique for primitive forecast equations balancing Coriolis and pressure forces effects on atmospheric observations
24 p4344 A69-43065
- Inertial motions, equipotential surfaces and Coriolis forces on earth ellipsoid, discussing pendulum-like oscillations
24 p4346 A69-43156
- CORNEA**
Corneal greyish opaque arc as warning of atherosclerosis in flight crews
05 p0711 A69-16631
- Monomethylhydrazine /MMH/ toxic effects on cornea and blood aqueous barrier studied in vivo on dogs
09 p1447 A69-22547
- Rabbit corneal damage thresholds for Gaussian beams of carbon dioxide laser IR radiation at various exposure times
11 p1830 A69-24844
- Corneal epithelium chromosome rearrangements in gamma irradiated white adult mice, noting radiation dosage and duration
17 p2907 A69-32944
- Corneal stroma collagen fibrils and ground substance refractive indices, discussing corneal transparency and clouding
22 p3884 A69-40886
- CORNERS**
Downstream secondary circulation resulting from sharp bend in fully developed turbulent pipe flow, noting departure from twin circulatory flow
03 p0419 A69-13952
- Two dimensional supersonic rotational flow around convex corner solved using coordinate system consisting of left running characteristics and streamlines
05 p0697 A69-15722
- Network method for Dirichlet problem of Laplace equation in regions with rounded corners, noting polar and composite errors
12 p2123 A69-26730
- Diffraction and mirror analyses of right angle corner in overmoded waveguide for scattered modes, discussing transmission loss
13 p2234 A69-28426
- Turbulent boundary layer in corner, measuring velocities, wall shear and turbulent normal stresses by employing momentum integral and similarity analyses
14 p2431 A69-29576
- CORONA DISCHARGES**
U ELECTRIC CORONA
- CORONAGRAPHS**
Space observations of solar intermediate corona, discussing balloon and rocket experiments and limitation of ground based observations [AAS PAPER 68-217]
02 p0313 A69-11483
- Coronagraphic determination of hydrogen concentration in luminescence regions of ionized metals in lower chromosphere
03 p0420 A69-13086
- Coronagraphic determination of hydrogen concentration in luminescence regions of ionized metals in lower chromosphere
14 p2433 A69-28768
- Optical and mechanical systems of Wrocław Observatory Lyot type coronagraph for prominence observations in H alpha line
22 p3943 A69-39999
- Thermostatic electronic control device of birefringent filter in Wrocław Observatory coronagraph during prominence observations
22 p3943 A69-40000
- CORONARY CIRCULATION**
Coronary atherosclerosis in military pilot fatalities of aviation accidents, demonstrating irrelevance of amount of flying time and type of aircraft
03 p0376 A69-14080
- Reflex activity of single preganglionic sympathetic fibers during coronary occlusion in cats, discussing left third thoracic /T3/ ramus communicans
23 p4084 A69-41460
- Coronary vessel lumen changes under oligemic hypotension resulting from circulating blood volume decrease in anesthetized cats, discussing constrictory coronary vessel responses
23 p4084 A69-41470
- Noradrenalin release from hearts of open chest dogs given artificial respiration upon occlusion of left descending coronary artery
23 p4092 A69-42053
- Coronary circulation response to hyperoxia after vagotomy and combined alpha and beta adrenergic receptors blockade in anesthetized intact dog
23 p4096 A69-42088
- Pulsatile flow in coronary arteries simplified model compared with experiment in anesthetized dogs
23 p4098 A69-42103
- Sinus outflow relationship to oxygen content in anterior cardiac vein blood and right ventricle systolic pressure
23 p4098 A69-42105
- Frequency analysis of second heart sound splitting in patients with coronary artery disease assessed clinically and by phonocardiography
24 p4261 A69-42726
- Risk factors in coronary diseases modified to provide base for estimating achievable mortality magnitude reduction
24 p4262 A69-43059
- CORONAS**
NT ELECTRIC CORONA
NT SOLAR CORONA

Stellar rotation braking due to mass loss from coronae through stellar wind based on calculation of acoustic energy generation from convective zone
08 p1396 A69-20644

Acoustic energy generation for helium rich stars, discussing X ray radiation from helium star corona
08 p1380 A69-20645

Star counts in star cluster neighborhoods, obtaining ratios of corona radius to nucleus radius as function of cluster mass
11 p1951 A69-24246

Red dwarf star YZ CMi corona structure showing possible estimation of additional carried energy by shock waves after flare
17 p3043 A69-34166

Stellar atmospheres acoustic energy generation rate calculations, studying corona mass ejection effects on stellar rotation
21 p3813 A69-39521

Coronae around helium stars and X ray sources, calculating acoustic energy generation rates in convection zones
21 p3813 A69-39522

NT SOLAR PROTONS

Space X ray background measurements, considering relativistic electrons Compton emission and metagalactic gas bremsstrahlung as possible sources
01 p0147 A69-11310

Radiation accidents involving sudden brief exposure to penetrating radiation
03 p0374 A69-13502

F layer disturbance showing pronounced difference in corpuscular flux effect on day and nighttime ionosphere
03 p0512 A69-13517

Meteorological rocket measurement of corpuscular radiation intensity in upper atmosphere at various latitudes
05 p0814 A69-16052

Energy flux into earth thermosphere due to fast corpuscular neutrals arising from charge transfer collisions between solar protons and neutral interstellar H
05 p0817 A69-16654

Angular intensity distribution of corpuscular radiation in time independent geomagnetic field characterized by particle velocity distribution
07 p1210 A69-19619

Electromagnetic waves and photons coexistence, discussing wave mechanics and guidance of particles, photon guidance and corpuscular magnitudes, etc
08 p1351 A69-20117

Corpuscular radiation contributions to D layer ionization determined from intensity measurements
09 p1577 A69-21770

Winter polar mesosphere atomic-oxygen distribution by analyzing data concerning intensity and energy of corpuscular fluxes in auroras
12 p2070 A69-26690

Magnetospheric corpuscular fluxes night ionization role in E and D region, considering precipitation from outside, trapped and dumped particles of radiation belts
13 p2254 A69-28333

Cosmic ray penetrating component properties identical to muon component at mountain level, indicating baryon passive nuclear state nonexistence
13 p2331 A69-28400

High energy mu-mesons component of atmospheric cosmic ray showers by particle impact penetration using multiple underground ionization chambers
13 p2332 A69-28409

Comet scintillations and tail characteristics studied to obtain information on interplanetary flux field, magnetic fields and planetary structures
14 p2523 A69-29704

Corpuscular radiation intensity during geomagnetic disturbances measured during rocket flights at 50-100 km, discussing effects on lower ionospheric radio absorption
15 p2677 A69-31327

Multiple muon showers penetrating deep underground, discussing radial extent and occurrence frequency against multiplicity spectrum
15 p2678 A69-31485

Corpuscular radiation distribution function with trapped particles maximum density fixed in equatorial plane and reflection points vicinity of magnetic force line
19 p3396 A69-36630

Meteorological rocket measurement of corpuscular radiation intensity in upper atmosphere at various latitudes
20 p3591 A69-37962

Interplanetary proton and alpha particle radial gradients determined from Mariner data, considering Forbush decrease, particle solar origin, galactic cosmic radiation, etc
20 p3592 A69-38096

Corpuscular radiation indicated as ionization source in lower ionosphere from rocket sounding data, noting role in D region formation
21 p3787 A69-38352

Neutron flux measurements on Cosmos 53, discussing equipment and calculation of secondary neutrons due to bombardment of satellite components
22 p4003 A69-40274

Corpuscular radiation intensity measurements in upper atmosphere at midlatitudes by meteorological probe during geomagnetic storm, noting radio wave absorption
22 p4008 A69-41104

CORRELATION

NT ANGULAR CORRELATION

NT AUTOCORRELATION

NT CROSS CORRELATION

NT DATA CORRELATION

NT SIGNAL ANALYSIS

NT STATISTICAL CORRELATION

Modified admittance yielding Kubo admittance at nonzero frequencies, discussing transformation of correlations of Ising model
01 p0115 A69-10019

Generalized pair of space correlation and wave number spectrum functions applied to plasma electron density fluctuations and velocity fluctuations of background fluid
01 p0127 A69-10339

Regular and noise signal scattering by uneven surface determined by correlation functions, assuming monochromatic components scattering obeys Kirchhoff approximation
01 p0032 A69-10886

Time correlation of photons emitted by krypton gas discharge tube and helium-neon multimode laser
02 p0255 A69-11611

Approximation of correlation or transfer function obtained through exponential polynomial to determine stochastic process spectral density
03 p0409 A69-12976

Correlation of received signals with diversified angles of arrival due to scattering by turbulently excited ionosphere
03 p0399 A69-14129

Noise correlation effect on noise stability of diversity reception receiver with weighted coherent summation of signals
04 p0557 A69-14789

Ornstein-Zernike relation for homogeneous fluid relating direct and indirect correlation functions
04 p0591 A69-15435

Real shape of time correlation function computed from partially averaged data
05 p0786 A69-15924

Smith correlation of turbine stage efficiency for relating achievable efficiency to stage loading and flow factors used for total pressure loss coefficient data [ASME PAPER 68-WA/GT-5]
05 p0812 A69-16140

Expression derived for correlation function and power spectrum of bearing of set of point radiators, taking into account receiver internal noise
05 p0719 A69-16219

Electromagnetic wave scattering in ferromagnetic crystals with anisotropy, discussing correlation functions of characteristics fluctuations and magnetoacoustic resonance
05 p0809 A69-16547

Canonical correlations used to analyze relations between values of geopotential field
05 p0789 A69-16637

Black body radiation coherence properties characterization by stochastic Gaussian scalar potential correlation function
05 p0795 A69-16819

Sequences with small correlation functions as error correcting codes in word separation, synchronization and pulse compression systems
06 p0948 A69-17868

Sixth order correlations of laser beam fluctuations near threshold from delayed coincidence measurements with three photodetectors, noting time constants
07 p1144 A69-18252

Signal correlation functions measurement errors due to randomly fluctuating delay, investigating additive and multiplicative noise with periodic and random signals
08 p1296 A69-19923

Antenna tolerances theory, discussing illumination correlation function analytical evaluation for uniform and tapered illuminations
08 p1284 A69-20294

Coherent light fluxes detection, noting correlation characteristics of output signals of photomultiplier illuminated by multimode He-Ne laser
09 p1515 A69-21438

Correlation between responses of linear systems for transient input as performance criterion for servomechanisms
09 p1475 A69-22536

Geomagnetic fluctuations positive and negative correlations at conjugate pair stations Syowa base and Reykjavik
10 p1681 A69-22806

Correlation produced magnetoplasma mode in potassium confirmed by measurement of real part of surface impedance
10 p1728 A69-23168

Time correlation of photons emitted by krypton gas discharge tube and helium-neon multimode laser
11 p1895 A69-24718

Steady state and dynamic characteristics of linear plant with constant lag element based on correlation function moments
11 p1859 A69-24965

Relativistic coherence theory of black body radiation in transparent medium, deriving expressions for second order correlation tensors by phenomenological quantum electrodynamics
11 p1920 A69-25563

Correlation functions and spectral density of current fluctuations in weakly ionized plasma flows
11 p1934 A69-25715

Polarity coincidence correlation method due to random processes state characterization applied to man machine systems
12 p2022 A69-25931

Regular and noise signal scattering by uneven surface determined by correlation functions, assuming monochromatic components scattering obeying Kirchhoff approximation
12 p2031 A69-26650

Correlation spectrometer for air pollution surveillance from airborne and spaceborne platforms, noting scanning satellite system for continuous global coverage
12 p2096 A69-26981

Time correlation functions for wind vectors and components at various altitudes over Moscow in winter and summer
13 p2294 A69-27856

Correlation functions of fluctuations in electrical characteristics of nonequilibrium electron gas during scattering, determining spectral densities and populations by kinetic equation Green function
13 p2314 A69-28445

Canonical correlations used to analyze relations between values of geopotential field
14 p2472 A69-28793

Microstresses and distortions in quasi-isotropic solid bodies under strain evaluated by correlation functions
14 p2531 A69-28806

Statistical description of geomagnetic field as random vector field, presenting correlation functions from empirical estimates from geomagnetic charts
14 p2437 A69-29062

Light emission intensity correlation functions associated with LF oscillations in beam plasma discharge
14 p2498 A69-29814

Interferometer for measuring electric fields spatial correlation function at camera aperture, describing

laser light coherence measurements after propagation through turbulent atmosphere
15 p2653 A69-31164

Book on correlation theory of statistically optimal systems covering linear continuous, discrete, nearly optimal, nonlinear, decision element and adaptive systems
16 p2764 A69-32114

Radio wave single scattering at particles randomly grouped in space, showing correlation function of water content fluctuations in scattered field in clouds
16 p2807 A69-32267

Amplitude distribution and correlation functions of signals reflected from precipitations at various polarizations of waves emitted and received
16 p2807 A69-32269

Optimal linear mean square filtering for piecewise linear correlation functions
17 p2933 A69-33621

Rarefied gases transfer coefficients stochastic process calculation models, comparing results with correlation functions derived from transport equation
18 p3121 A69-34710

Optical imaging with partially coherent nonthermal light, discussing correlation function propagation, transfer functions, spatial Fourier analysis, weak visibility and matrix form
19 p3372 A69-35907

Spectral density of outgoing radiation in 0.6-0.8 micron frequency range, noting reflected radiation and cloud fields correlation functions
19 p3366 A69-36672

Positive and negative correlations in F 2 layer perturbations observed by network of paired conjugate ionospheric stations at low latitude
20 p3521 A69-37050

Eulerian correlation functions representation of wind variations in analytic form by three parameter function, noting field diagram
20 p3571 A69-37507

Range-Doppler data processing of radar echoes from spread targets, considering quadratic filter theory, emphasizing received signal correlation functions
20 p3490 A69-37648

Normalized SNR of aperture antennas determined in terms of random signal and noise fields correlation functions
20 p3494 A69-37845

Dispersion and correlation function for atmospheric transparency due to water vapor from statistical model of absorption bands and effective mass
21 p3759 A69-39113

CORRELATION COEFFICIENTS

Light field inside deep layers of turbid medium illuminated by narrow beam, discussing beam deviations inside medium, deviation dispersions and correlation coefficient
02 p0274 A69-11449

Longitudinal correlation lengths in grid turbulence air flow transport subjected to planar deformation measured from energy spectra of velocity fluctuations
02 p0192 A69-12626

Multichannel communication received signals irregular components, discussing signal phase and amplitude fluctuations correlation coefficients
03 p0394 A69-13519

Diversity antenna continuous short wave radio signal envelope distribution, autocorrelation functions, damping rate and cross correlation coefficients
03 p0394 A69-13522

Correlation coefficient between frequency diversified signals amplitudes estimated by approximation for two beam short wave radio channels
04 p0560 A69-15401

Correlation coefficients, comparing galactic X ray sources distribution with classical cepheids, old novae, planetary nebulae and Wolf-Rayet stars
12 p2171 A69-27155

Distribution function of multiple correlation coefficient for various sampling volumes and various numbers of predictors calculated using Fisher formula
13 p2293 A69-27843

Correlation coefficient between changes in F 2 layer critical frequency and sporadic E layer maximum frequency
13 p2254 A69-28330

Correlation coefficients between radial components of interplanetary magnetic field and solar wind velocity from Mariner 5 data due to Alfvén waves
14 p2510 A69-28949

Error correction for correlation coefficient between satellite data of earth radiation intensity and satellite vision field shift
14 p2435 A69-29043

Correlation coefficient of light fluctuations measured in Ar plasma in positive column of glow discharge, noting ionization wave appearance at critical gas pressure
16 p2822 A69-32039

Strength margins for combined random stresses, discussing average crossing frequency of curve by Gaussian stationary random vector with correlation coefficients included
17 p3066 A69-34038

Jupiter red spot prominence correlation with Zurich sunspot number
17 p3045 A69-34185

Stimulated reflection experiment for correlation between coherent photon beams from independent lasers
18 p3153 A69-35292

Cross correlation coefficient for submillimeter monochromatic wave amplitude and phase fluctuations in turbulent atmospheric boundary layer
21 p3674 A69-39129

Correlation role in navigation satellite analysis noting reduction in ephemeris error effects
[AAS PAPER 68-145] 21 p3761 A69-39222

Quantum mechanical multitime correlation functions derivation and applications to laser theory
22 p3965 A69-41152

Solid cloud cover moisture content relation to outgoing thermal radiation, obtaining correlation coefficient and regression equations
23 p4184 A69-42488

CORRELATION DETECTION

Closed form solution for two input correlator processing gain with error function transfer characteristics and operating in Gaussian environment
03 p0403 A69-13253

Self adaptive systems stability analyzed using filter and correlation methods, considering higher harmonics at rectifier and synchronous detectors output
04 p0582 A69-14796

Group delay time for dispersive wave propagation velocity determined using correlation method
15 p2562 A69-30094

CORRELATORS

NT IMAGE CORRELATORS

Ultrasonic diffraction delay line operation interpretation as radar chirp signal correlator
01 p0026 A69-10072

Closed form solution for two input correlator processing gain with error function transfer characteristics and operating in Gaussian environment
03 p0403 A69-13253

Radar signal matched filters synthesis using linear digital filters and digital correlators noting role in radar detection
05 p0722 A69-16733

Space-frequency equivalence between monochromatic correlator interferometer using directional antennas and wideband correlator interferometer using isotropic antennas
07 p1132 A69-18917

Real time correlator in periodic signal extraction from noise background, discussing multichannel sampler as special case of cross correlation extraction
11 p1837 A69-25094

Optical correlator for radar signal processing based on filtering first order diffracted light and integration on photomultiplier
12 p2028 A69-25911

Analog correlator performance interpreted as output SNR dependence on input signals and integrating system characteristics, covering filters and finite time integrators
14 p2413 A69-29485

Correlation protected ILS implementing conventional ILS with no operational restrictions on air traffic control, taking into account changing terminal conditions
22 p3978 A69-39963

CORROSION

NT CAVITATION CORROSION

NT FUEL CORROSION

NT INTERGRANULAR CORROSION

NT SCALE [CORROSION]

NT STRESS CORROSION

Metal corrosion in atmosphere - ASTM Conference, Boston, June 1967
01 p0100 A69-11350

Steel corrosion by iodine noting effects of water and oxygen
03 p0444 A69-13310

Aluminum corrosion by fungi isolated from jet fuel system with predominance of Cladosporium resinace, noting protective coatings
04 p0616 A69-14765

Aluminum corrosion by fungus culture isolated from jet fuel system
06 p0941 A69-17123

Sulfite ion influence on pitting corrosion of stainless steels in sodium chloride solution
07 p1167 A69-19343

Corrosion - Conference, Cleveland, March 1968
14 p2465 A69-29929

Corrosive wear due to atmospheric O in sliding metal systems, noting oxidation rate relation to wear rate and activation energy
[ASLE PAPER 68-LC-11] 15 p2622 A69-30605

Electrode potentials of pure metals, Ni-Cr and Ni base alloys in molten salts applied to corrosion studies
17 p2990 A69-33650

Electrode potential measurements for corrosion study of metals and alloys in aqueous solutions, molten salts and gaseous atmospheres
18 p3150 A69-35412

Hydrogen effect on embrittlement of Cr-Ni stainless steel from viewpoint of corrosion cracking, using reverse bending apparatus
19 p3358 A69-35774

Aerospace and marine corrosion technology - Conference, Los Angeles, July 1968
21 p3747 A69-39484

Hydrogen fluoride corrosive effects in cryogenic propellant, emphasizing contamination by particulate matter from corrosion products
21 p3783 A69-39486

Failure analysis of corrosion products in hybrid thin film circuits, discussing detection technique, instrumentation and results
22 p3911 A69-39955

Corrosion of Ni through porous Au plate in humid sulfur dioxide atmospheric environments, analyzing product deposits and contact properties
23 p4176 A69-41534

CORROSION PREVENTION

Corrosion control, discussing corrosive concentration cells, coatings and sacrificial systems of protection, deep corrosion, corrosion augmented stress, forgings and titanium corrosion testing
01 p0093 A69-10148

Corrosion problems associated with electromagnetic shielding gaskets noting galvanic corrosion, corrosion prevention and insulation of gasket from mating surface
05 p0779 A69-15979

Chemical conversion coatings and low temperature enamels preventing corrosive attack on beryllium parts in environments containing moisture, chloride ions and/or high temperature oxidizers
07 p1169 A69-19762

Aircraft design, fabrication and finish techniques taking into account aircraft integral fuel tank corrosion due to contaminants associated with microbiological debris
[NACE PAPER 49] 08 p1320 A69-20599

EMI-RFI knitted wire mesh gasket for corrosion prevention, noting use of moisture tight seal
09 p1523 A69-21895

Fretting fatigue prevention in Al alloys, noting strength reduction due to fretting
09 p1526 A69-22148

Refractory alloys electrodes used for surface coating Ti alloys by electric spark method, studying microhardness and wear resistance
10 p1711 A69-23339

Aircraft integral fuel tanks corrosion causes and prevention, discussing microorganisms, maintenance and cleaning procedures, anticorrosive additives, etc
12 p2013 A69-25946

Additions of dialkyl and diaryldithiophosphates of Ba, Ca, Zn, Pb and Ni as antioxidants and corrosion inhibitors for hydrocarbons
12 p2027 A69-27091

Chemical corrosion of zirconia-based refractories in MHD generators, considering thermal cycling and shock, seed migration and prevention
13 p2284 A69-27469

Book on oxidation and shielding of beryllium in gas media for nuclear and aircraft technology
13 p2280 A69-27927

Corrosion mechanism in high temperature Nb-Zr/Li and Ta/Li heat pipes and heat transfer measurements, noting oxygen content of wall material
14 p2462 A69-29203

- Aluminum corrosion in ethylene glycol-water systems, discussing protection mechanisms of adsorption-type inhibitors and additives effects on corrosion rate
14 p2466 A69-29932
- Stannate immersion process for reduction of magnesium-steel couples galvanic corrosion, discussing bath operating limits
14 p2466 A69-29933
- Stress corrosion preventative metal-pigmented paints for titanium alloys, discussing chemicals added to increase cathodic potential
14 p2469 A69-29936
- Stress corrosion cracking prevention by shot peening, considering aircraft industry applications
14 p2466 A69-29937
- Corrosion at polymeric film-metal substrate interfaces, noting roles of film properties, bond strengths and primer coats
14 p2466 A69-29938
- Corrosion prevention in beryllium, testing conversion coatings and low fired porcelain enamels under various humidity and temperature conditions
14 p2466 A69-29939
- Corrosive wear by atmospheric air and moisture under nonsufficing conditions, noting control by dry nitrogen blanketing and oil additives
[ASLE PAPER 68-LC-10] 15 p2622 A69-30608
- Protective coatings of oxygen-free high melting point Si compounds and silicate binder, noting chemical stability in corrosive media
20 p3566 A69-37371
- Austenitic stainless steels nonreproducible passivating tendencies, determining electrochemical and corrosion characteristics, discussing critical anodic current density role
20 p3562 A69-37750
- Fuselage corrosion effect on structure and skin of older aircraft with emphasis on pressurized aircraft
21 p3646 A69-38392
- High strength steel landing gear components corrosion protective finishes, discussing paint over bare steel, porous Cd plating and vacuum deposited Cd
21 p3743 A69-38730
- Stress corrosion cracking prevention by selection of material, stress relief, compressive stresses introduction, protective coatings and by simulated accelerated tests
21 p3748 A69-39490
- Galvanic corrosion prevention measures for airframe fasteners, discussing crevice sealants, primers, zinc chromate, cadmium and aluminum coatings
22 p3957 A69-40825
- Aircraft fastener corrosion control with emphasis on surrounding joint and structure, discussing test programs, Al coatings, etc
24 p4334 A69-43442
- CORROSION RESISTANCE**
NT OXIDATION RESISTANCE
- Corrosion of steel surfaces in contact with molybdenum disulphide noting influence of high humidity, milling and inhibitors
01 p0094 A69-10367
- Cobalt base alloy for construction in high temperature corrosive environment, discussing mechanical properties, oxidation and corrosion resistance and phase stability
01 p0095 A69-10546
- Permissible JP-5 fuel sulfur content effect on hot corrosion of protective coated Ni-base superalloys in marine environment, noting atmospheric sea salt role
01 p0141 A69-11059
- Titanium-base alloys resistance to atmospheric corrosion based on weight change measurements and tensile tests after multiyear exposures
01 p0100 A69-11351
- Zirconium corner of Zr-Al-Cr system phase diagram within concentration limits from 1350-700 C, considering corrosion resistance
02 p0262 A69-11842
- Fe, Ni and Cr influence on corrosion resistance and mechanical properties of Zr-Cu-Mo system alloys
02 p0263 A69-11853
- Aluminum alloy with lithium and magnesium noting mechanical properties and electrical and corrosion resistance
03 p0443 A69-13026
- Fatigue and corrosion fatigue properties of aluminum alloys, noting elastic modulus, cyclic loading strength, corrosion resistance, etc
03 p0443 A69-13027
- Corrosion rates and stress corrosion cracking sensitivity of explosively shocked austenitic stainless steels
03 p0444 A69-13308
- Gas turbine alloys composition role in high temperature corrosion resistance under high sulfur diesel fuel combustion
03 p0444 A69-13309
- Methods of protecting industrial steel against hydrogen corrosion at high temperatures and pressures including cladding, carbon additions, surface film coating, etc
04 p0613 A69-14432
- Heat treatment effects on stress corrosion cracking resistance of Al-Zn-Mg alloys, using cantilever loading in aqueous solution
04 p0617 A69-14933
- Pitting corrosion resistance improvement in austenitic stainless steels with added molybdenum through electroslog resmelting
05 p0781 A69-16499
- Titanium applications in metallurgy, galvanic technology and chemistry making use of corrosion resistant properties
07 p1161 A69-18767
- Corrosion resistance and mechanical properties of Ti-Mo alloy, developing processing methods for forgings, bars and sheets
07 p1163 A69-18781
- Czechoslovakian heat resistant iron-carbon-aluminum alloy Pyroferal, properties and applications
07 p1168 A69-19345
- Aluminum coatings compared with cadmium coatings for aerospace fasteners, discussing plating methods
[ASM PAPER D8-5.2] 07 p1142 A69-19663
- Polymer structure effect on chemical resistance of reinforced plastics, sulfuric acid and sodium hydroxide corrosion of polyester resins and model copolymers
08 p1338 A69-20490
- Sulfidation attack and structural stability of nickel-base superalloy
[SAE PAPER 690103] 09 p1522 A69-21556
- Beryllium base cermets corrosion resistance increased in moist carbon dioxide at 700 C
10 p1711 A69-23338
- Aluminum bonded structures corrosion resistance through adhesive primers and surface treatments
10 p1700 A69-24088
- Optimal processing parameters for producing ingots and semifinished products from corrosion resistant Ti alloys with added Mo
11 p1902 A69-24273
- Monograph on effect of nitrogen on precipitation behavior of austenitic chromium-nickel steel covering carbides, intermetallics, phase transportations, corrosion resistance, etc
11 p1902 A69-24369
- Corrosion resistance rate of duralumin sheet in aqueous superphosphate solutions dependence on concentration
12 p2113 A69-26124
- High strength steels, discussing ductility, austenite to martensite transformation for increased strain hardening rate and elongation and corrosion resistance
12 p2115 A69-26829
- Reinforced plastics corrosion resistance, showing dependences on coupling agent and chemical compatibility between resin and fibers
[ASME PAPER 69-DE-60] 14 p2467 A69-28853
- Titanium corrosion resistance data tabulated for various environments and chemicals including salt solutions, organic chemicals and ionizable fluoride compounds
14 p2466 A69-29931
- Concorde aircraft and engine materials selection factors including mechanical properties of metals and nonmetals, corrosion resistance, service life, sealants, weight analysis, etc
15 p2639 A69-30464
- Thermal stability of Hastelloy Alloy C-276 determined from time and temperature tests for corrosion and grain boundary precipitation
16 p2799 A69-31719
- Stress corrosion resistance of AlZnMgCu and AlZnMg alloys, discussing combinations of alloy composition, heat treatment and stable precipitation conditions
16 p2800 A69-31779
- Ti corrosion resistance improved in special environments by oxidizing agents heavy metal ions and alloying
16 p2802 A69-32436
- Metallurgy, properties and applications of Co-Ni-Mo-Cr ultrahigh strength alloy, discussing corrosion
18 p3154 A69-34307
- Polyurethane corrosion resistance in various liquids determined from changes in sample hardness, weight, volume and deformation
18 p3162 A69-35360
- Fuel resistant elastomers evaluated for seal compounds for low temperature capability, noting epichlorohydrin-ethylene oxide as promising sealant
19 p3356 A69-35534
- Exposure tests of corrosion resistant claddings for high strength Al alloys protection, finding higher purity alloy cladding superiority
19 p3322 A69-35571
- Abrasion and corrosion resistant Cr-Co-B cast alloys in aggressive media, concluding resistance is due to chromium boride and fine dendritic structure
19 p3347 A69-36742
- Singular factors affecting stress corrosion cracking resistance of Ti alloys in salt water and hot salt, finding immune single phase alloys
19 p3353 A69-36908
- Aluminum alloying additives effects on tungsten disilicide corrosion resistance, studying plasticity properties and oxidation rate
20 p3561 A69-37376
- Design and processing tradeoffs for preventing stress corrosion cracking in Al alloy aircraft structural forgings
[ASM PAPER W9-14.4] 21 p3729 A69-38657
- Fuel cells construction materials selecting and optimizing techniques using diffusion block and differential corrosion concepts
23 p4075 A69-42299
- Corrosion resistant bonding materials, discussing metal-to-metal adhesive primers, Al honeycomb core and foil finish
24 p4334 A69-43421
- RTV silicone rubber for corrosion control coatings, high strength adhesives and low density sealants in aircraft structures
24 p4338 A69-43457
- Protective coatings on Ni base superalloys for gas turbine engine blade and vane components for hot corrosion and oxidation resistance
[SAE PAPER 690480] 24 p4335 A69-43515
- CORROSION TESTS**
NT SALT SPRAY TESTS
- Corrosion control, discussing corrosive concentration cells, coatings and sacrificial systems of protection, deep corrosion, corrosion augmented stress, forgings and titanium corrosion testing
01 p0093 A69-10148
- Protective coatings for gas turbine engine components in marine environments, considering corrosion of diffuser, impeller, compressor case and turbine blades
01 p0099 A69-11057
- Corrosive characteristics of jet fuels near condensing water studied by weight loss method, using copper alloy plates
01 p0142 A69-11099
- Long term atmospheric corrosion test program for aluminum and magnesium base alloys, comparing tensile strength of exposed and control specimens
01 p0100 A69-11353
- Weathering tests on wrought aluminum alloys exposed at U.S. sites compared to British industrial atmospheric exposure results
01 p0101 A69-11354
- Aluminum corrosion and inhibition mechanisms in ethylene glycol/water solutions, using controlled powder immersion tests
02 p0265 A69-11895
- Polymeric film properties related to metal substrate interface corrosion, considering effects of stress concentration, surface cleanliness and adsorbed gases
02 p0265 A69-11896
- Aluminum corrosion characteristics immersed in ion-exchanged water with trace impurities, determining corrosion rates
04 p0617 A69-14932
- Galvanic corrosion couples of metals and alloys tested in liquid fluorine, determining corrosion rates for possible missile components application
06 p0944 A69-17854
- Aluminum coatings compared with cadmium coatings for aerospace fasteners, discussing plating methods
[ASM PAPER D8-5.2] 07 p1142 A69-19663
- Physicochemical methods of corrosion testing - Conference, Frankfurt am Main, April 1968
10 p1712 A69-23818
- Audio frequencies internal friction measurement of austenitic stainless steels subjected to heat treatment and corrosion, discussing time dependence and carbide precipitates morphology
10 p1713 A69-23819
- Carbide precipitation in stainless steels using metal foil and extraction replicas, discussing grain boundaries corrosion relation
10 p1713 A69-23820

Liquid sodium corrosive action on vanadium, niobium, titanium and zirconium involving oxygen exchange from liquid to solid metal phase and energy of formation
10 p1713 A69-23821

Potential testing methods for corrosion induced changes in materials, discussing mechanical properties, corrosion fatigue and cracking and creep
10 p1713 A69-23822

Oxygen effects in Type 316 stainless steel, Nb- Zr alloy liquid potassium system, discussing thermal convection and forced circulation loops and corrosion rates
12 p2112 A69-25943

Incipient stress corrosion damage detection in aluminum alloys, using Rayleigh wave attenuation
12 p2114 A69-26306

Nickel maraging steel polarization behavior in acidic solutions, noting corrosion potential dependence on pH
13 p2282 A69-28188

NOL hypervelocity launcher heat transfer and erosion analysis by experiment and computer simulation [AIAA PAPER 69-336]
13 p2242 A69-28272

Time and temperature effects on corrosion and structure of Hastelloy alloy C-276
14 p2466 A69-29930

Aluminum corrosion in ethylene glycol-water systems, discussing protection mechanisms of adsorption-type inhibitors and additives effects on corrosion rate
14 p2466 A69-29932

Failure mechanism for intergranular stress corrosion cracking of vacuum annealed unalloyed Ti in alcohol iodine solutions
16 p2798 A69-31717

Microbiological corrosion and degradation of aircraft metals and organic materials in fuel tanks
19 p3341 A69-35569

Cleaning, deoxidizing and chromating process effects on chromate coated Al, using salt spray corrosion tests
19 p3321 A69-35570

Exposure tests of corrosion resistant claddings for high strength Al alloys protection, finding higher purity alloy cladding superiority
19 p3322 A69-35571

Cyclic stress frequency on mild steel corrosion fatigue tests, showing strength dependence on potential and stress current
19 p3342 A69-35775

Fatigue strength tests of steels simulating boiler installation operating conditions, reproducing corrosion characteristics of water
19 p3347 A69-36741

Cobalt and Co alloys oxidation, sulfidation and hot corrosion data, summarizing characteristics of films and scales formed
20 p3562 A69-37751

Commercial Co base superalloys oxidation and hot corrosion resistance under controlled environments, examining role of various alloying elements [ASM PAPER D8-21.5]
20 p3564 A69-38134

Temperature, applied stress and pressurization effects on materials corrosion by liquid F and F containing oxidizers
21 p3748 A69-39485

Impurities effect on corrosion of fluorine containing propellant oxidizer systems, noting aqueous and anhydrous hydrogen fluoride corrosion
21 p3784 A69-39487

Impurities effect on corrosivity of nitrogen tetroxide with tank construction metals, Al, stainless steel and Ti-Al-V alloy, noting temperature aging and concentration
21 p3748 A69-39488

Chemical and thermal behavior of materials corrosion in propellant exhaust gases with analysis of reactions involving hydrogen, nitrogen, water, carbon dioxide, etc
21 p3784 A69-39489

Forged corrosion in aqueous salt environment at various temperatures in unstressed and stressed conditions, considering Be usability in turbomachinery
21 p3749 A69-39493

Corrosion kinetics in metals using electrochemistry, stressing polarization techniques
21 p3749 A69-39494

Nondestructive testing for aerospace corrosion, discussing light, penetrants, X rays, sound, ultrasounds, electrical conductivity, magnetic reaction and radiation backscatter methods
21 p3733 A69-39495

Burner rig hot corrosion test facility for evaluating Ni-Co alloys used in gas turbine engines operating in marine environment
22 p3928 A69-40673

Fuel cells construction materials selecting and optimizing techniques using diffusion block and differential corrosion concepts
23 p4075 A69-42299

Dynamic hot corrosion rig test for operating environment and alloy composition effect on sulfidation attack during gas turbine fuel combustion
23 p4150 A69-42448

Thermochemical analysis of hot corrosion during sulfidization-oxidation of superalloy gas turbine engine components using Pourbaix method
23 p4178 A69-42449

Notch effect on corrosion fatigue behavior of high strength Al alloy under bending and direct stresses
24 p4330 A69-42553

CORRUGATED PLATES

Plane wave scattering from modulated corrugated structures, obtaining reflection coefficients for multimode propagation
01 p0033 A69-10973

Characteristic equation for corrugated surface wave line loaded with uniformly spaced thin metallic disks excited in E mode, considering spacing and groove depth
12 p2028 A69-25899

Laminated critical rate dampers consisting of ring shaped thin corrugated steel plates inserted between bearing and rotor, showing dependence on static load
17 p3066 A69-33945

Pure plastic bending of wide strip, determining stress strain state and plastic strain energy during constrained bending, noting application to corrugated panels
19 p3324 A69-35833

CORRUGATED SHELLS

Propagation modes in corrugated cylindrical waveguides determined by imposing nonisotropic surface reactance boundary condition at corrugated walls
08 p1284 A69-20295

Corrugated cylindrical waveguides used as hybrid mode feeds for reflector antennas
15 p2575 A69-30175

Corrugated conical horn used as antenna feed, studying modes in horn and associated radiation patterns by spherical hybrid functions analysis
15 p2575 A69-30176

Plane wave scattering by multimode corrugated structure with H mode incidence, revealing theoretically scattering resonance as P type Wood anomalies
17 p2925 A69-33844

CORRUGATING

Corrugated impedance antennas synthesized, using model in impedance surface form
04 p0577 A69-14786

CORTICES

Cortical responses by transient sensory stimulation of fingers EEG recorded, obtaining isomorphism between psychological and neurophysiological events
22 p3876 A69-40262

Rhesus monkeys visual responses recorded before and after unilateral striate lesions, optic tract section and inferotemporal lesions
22 p3876 A69-40263

CORTI ORGAN

Cortical auditory-evoked response during eye movement in cats, discussing relation to central mechanism
17 p2911 A69-34171

Astronaut vestibular and motor analyzer functions during flight and simulation tests, discussing illusory space orientation and role of cortical dynamics
20 p3469 A69-37241

CORTICOSTEROIDS

NT ALDOSTERONE

NT CORTISONE

Sonic boom effect on corticosteroid level in human blood, noting no changes
03 p0378 A69-14209

Corticosteroid and catecholamine metabolism change in rabbits during sharp limitation of motor activity
12 p2021 A69-26973

CORTISONE

Aldosterone and hydrocortisone introduced into bladders of adrenalectomized dogs to restore sodium metabolism contributing to normal water-salt homeostasis
21 p3656 A69-38965

CORUNDUM

U ALUMINUM OXIDES

COSINE

U TRIGONOMETRIC FUNCTIONS

COSMIC DUST

NT INTERPLANETARY DUST

NT ZODIACAL DUST

Frequency occurrence of small particles in meteor showers, discussing fragmentation and cosmic erosion as primary effects in small particle development
01 p0154 A69-10872

Meteorite structure and origin, discussing cosmic dust analysis and collection, Tungusk silicate-magnetite spherules, asteroid collisions and meteorite ages
01 p0159 A69-11367

Meteoric dust composition of Tungusk meteorite noting angular and spherical particles
01 p0160 A69-11386

Rotation and orientation of cosmic dust particles due to collisions with interstellar gas particles
03 p0511 A69-13420

Accretion rate of cosmic dust estimation from cosmogenic aluminum-26
03 p0514 A69-13935

Optical method of sounding cosmic matter penetrating into upper atmosphere by analyzing twilight phenomena
04 p0594 A69-15246

Diamond dust as major component of interstellar dust to explain observed properties
05 p0828 A69-16662

Cosmic dust concentration in interplanetary space near earth, noting suitability of satellite observation
06 p0999 A69-16971

Galactic dust layer spatial structure and relation to brightness of Milky Way based on analysis of photoelectric color excesses in Aql and Cyg stars
09 p1590 A69-21381

Far IR source in galactic center detected at 100 microns, noting thermal emission of interstellar dust grains as possible mechanism
09 p1603 A69-22264

Radio telescopic survey for OH emission at 1667 MHz in interstellar dust clouds for catalog compilation, tabulating results
09 p1603 A69-22267

Interstellar reddening material distribution within 2500 parsecs of sun, noting concentration in galactic plane, spiral arms and cloud complexes
10 p1773 A69-22961

Interstellar dust alignment mechanisms investigated by Monte Carlo model, discussing grain velocity maintenance by radiation pressure and effects of magnetic constraint on charged grain trajectory
10 p1781 A69-23675

Interstellar dust distribution ideas to explain observed variability in starlight polarization and similar phenomena
10 p1785 A69-24050

Color excess and 21 cm line intensity of RR Lyrae stars at high latitudes, confirming correlation between dust and atomic hydrogen
12 p2063 A69-25808

Isotropic and anisotropic dust cosmological models density perturbation growth, considering angular momentum conservation in expanding universe
13 p2343 A69-27619

Cosmic dust role in determining structure and dimensions of Galaxy
14 p2527 A69-29897

Milky Way structure, discussing dust bridge and density of absorbing matter between spiral arms of Sagittarius and Carina Cygnus
15 p2683 A69-30514

Neutral hydrogen in dark dust clouds in 21 cm line, showing hydrogen excesses and deficiencies
15 p2691 A69-30763

Time variation of altitude distribution of cosmic dust layer in upper atmosphere by Pandora II collector using inflight shadowing technique
15 p2698 A69-31353

MHD of interstellar gas-dust medium, analyzing gas-dust flow and gas-dust shock waves in magnetic fields
16 p2823 A69-32590

Galactic dust layer spatial structure and relation to brightness of Milky Way based on analysis of photoelectric color excess in Aql and Cyg stars
18 p3198 A69-34769

Ion and electron fluxes and drag force dependence on electrostatic charge and velocity of interstellar dust particle
19 p3425 A69-36562

Comet heads gas dynamics, analyzing coma or head region as continuum source flow of dusty gas
19 p3428 A69-36807

- Translating Tolman problem of cosmic dust motion into centrally symmetrical reading system, showing relativistic and Newtonian motion laws coincidence
20 p3594 A69-37079
- Cepheus light attenuation curve explained by applying polymodal particle size distribution, obtaining interstellar dust density
20 p3608 A69-38048
- Spectra of peculiar S zero galaxy NGC 7625 with irregular dust distribution, discussing central spheroid rotation and mass
20 p3610 A69-38142
- Galaxy NGC 3593 with large amounts of interstellar dust, calculating galactic mass and central density
20 p3610 A69-38143
- Irregular galaxy NGC 3077 with interstellar dust, measuring velocity field by spectroscopy
20 p3610 A69-38144
- Excitation temperatures and OH microwave line optical depths measured for dust clouds, discussing optical absorption lines and LF radio absorption
20 p3611 A69-38147
- Fe-Ni unmelted and unablated micrometeorites number at earth surface calculated, using space density of interplanetary particles and micrometeoritic theory
20 p3614 A69-38251
- Satellite measurements of small particles near-earth space density compared with chemical estimates of terrestrial cosmic material, suggesting particles origin in meteoroid ablation
21 p3701 A69-38342
- Electrostatically accelerated iron spheres interaction with thin metal and nitrocellulose foils to develop detectors for cosmic dust collection and recording
21 p3719 A69-38344
- Piezoelectric microphone sensor flown on rocket for recording micrometeoritic impacts during noctilucent cloud display, determining cosmic dust particles flux
21 p3793 A69-38348
- Optical method for upper atmosphere cosmic dust detection, emphasizing twilight luminance origin from light scattering
21 p3702 A69-38349
- Spherically symmetrical T models of dust matter yielding method for obtaining maximum total mass effect in general relativity theory different from Friedman closed model
21 p3803 A69-38994
- Diffuse galactic radiation intensity and distribution from photoelectric measurements compared with radiative transfer calculations using various interstellar dust models
22 p4013 A69-40096
- Evolutionary dynamic model for H II region produced by massive stars within dense dust-laden clouds, discussing grain sputtering and time scales
22 p4025 A69-40646
- Radiation transfer in circumstellar dust envelopes, considering thin and opaque clouds
22 p4027 A69-40655
- Galactic mass model and interstellar dust scattering data used to examine high latitude nebulae illumination possibility by integrated galactic light
22 p4033 A69-41059
- Stellar and diffuse galactic radiation intensity observations to obtain albedo values of interstellar dust particles
22 p4034 A69-41112
- Strong IR millimeter wave emission from galactic center due to interstellar dust grains resembling semiconductor structure
23 p4215 A69-42115
- Seyfert galaxies IR radiation attributed to dust grains thermal emission of energy absorbed from galactic nucleus
24 p4374 A69-43741
- Hydrogen gas role in galaxy formation, estimating quantity needed to dissipate gas cloud contraction energy, discussing formation mechanics of molecular hydrogen
15 p2680 A69-30204
- Diatomic hydrogen abundance evolution in uniform medium, discussing photodissociation effects and galactic evolution
15 p2680 A69-30205
- Neutral hydrogen high velocity clouds as possible extragalactic objects in Local Group not contracted to galactic dimensions or densities
15 p2694 A69-30785
- Optimization techniques for stellar kinetic theory problems, discussing kinematics distribution function, cosmic gas dynamics, interstellar matter, etc
15 p2695 A69-31004
- Cosmic helium origin, discussing evidence for big bang, galactic synthesis and stellar thermonuclear burning theories
16 p2853 A69-31598
- Equilibrium and stability of axisymmetric gaseous polytropes in toroidal magnetic fields, calculating harmonic oscillations by virial tensor method
21 p3797 A69-38534
- Galactic hydrogen distribution, discussing velocity field, spiral structure, symmetry, layer shape, ionization, spectra, etc
21 p3810 A69-39503
- Thermal balance of intergalactic gas, discussing plasma energy losses due to He emission and reverse Compton electron scattering and rapid cooling effect
24 p4389 A69-43771
- ### COSMIC NOISE
- Sudden cosmic noise absorption in ionosphere confirms relationship with solar chromospheric flares
02 p0306 A69-11667
- Far IR background due to superposition of IR galaxies, noting galaxies contribution to extragalactic radio background
02 p0308 A69-12128
- Large amplitude Pc 1 events at College, Alaska, noting more ionospheric cosmic noise absorption accompanying large events
02 p0244 A69-12397
- Cosmic microwave background radiation measurement, discussing measurement techniques for antenna temperature at microwave frequencies
02 p0210 A69-12431
- Earth velocity through 3 K cosmic background radiation, measuring velocity by determining anisotropy of radiation
03 p0511 A69-13475
- Polar auroral region cosmic radio noise absorption bays diurnal variations attributed to drift of electrons captured in magnetosphere
03 p0423 A69-13520
- Ariel 3 receiver for measuring galactic noise spectrum, discussing loop antenna use with swept receiver, false terrestrial signals, etc
03 p0404 A69-13581
- Frequency time displays of geomagnetic pulsations at Kiruna revealing Pc 1 pulsations accompanied by cosmic noise absorption /CNA/ and X ray enhancements
03 p0425 A69-14024
- Meter and decimeter solar radio bursts and sudden cosmic noise observed at Ahmedabad, India
03 p0518 A69-14259
- Cosmic X ray background production mechanisms
05 p0814 A69-15848
- Cosmic radio noise absorption in ionosphere, discussing diurnal, seasonal and longer variations of integral absorption
06 p1008 A69-17727
- Cosmic radio noise brightness distribution in Southern Hemisphere at 10.02 MHz, noting spectra of sources observed
07 p1206 A69-19272
- Cosmic radio noise intensity measurements by ATS 2 satellite-borne radiometer
07 p1224 A69-19715
- Cosmic microwave background variations produced by nonthermal gravitational radiation, imposing limits on equivalent mass density
08 p1398 A69-20773
- Antenna noise temperature at earth station due to rain on radomes, solar and cosmic noise, noting SNR degradation
09 p1461 A69-21283
- Extraterrestrial cosmic emissions responsible for background noise of communications engineering, discussing factors affecting frequency sharing with other services
09 p1586 A69-21294
- Solar cosmic ray event of July 7 1966, noting sudden cosmic noise absorption reduction and particle absorption domination start at 0120 UT
10 p1768 A69-23771
- Sudden cosmic noise absorption /SCNA/ in polar cap during July 7, 1966 solar proton flare, estimating SCNA latitudinal distribution and protons magnetic cut-off boundary
10 p1770 A69-23907
- Nonthermal cosmic radio emission spectral index angular variations during scanning of sky by receiver antenna, analyzing dependence on galactic latitude
10 p1784 A69-23940
- Auroral cosmic noise absorption relationship to auroral geomagnetic disturbances, investigating absorption diurnal distribution
12 p2071 A69-26706
- IR astronomy and cosmology, considering cosmic microwave background and isotropic radiation significance in distant IR
13 p2342 A69-27601
- Sudden cosmic noise absorption in ionosphere confirming relationship with solar chromospheric flares
13 p2334 A69-28698
- CNA and geomagnetic pulsations observed by ground based instruments in southern auroral region occurring near geomagnetic noon, noting electron precipitation role
15 p2597 A69-30697
- Cosmic radio emission absorption during IQSY at 24.6 MHz, relating diurnal variation of absorption and geomagnetic index F scatter occurrence
17 p2968 A69-33992
- Lower ionospheric effective electron collision number from cosmic noise recordings and radio wave absorption data obtained by vertical sounding rocket
20 p3528 A69-37679
- Cosmic radio background noise spectrum near north galactic pole based on Radio Astronomy Explorer satellite experiments
23 p4219 A69-42375
- ### COSMIC PLASMA
- Partial maser effect in recombination lines of hydrogen atoms in nebular plasma due to overpopulation of energy levels at thermodynamic equilibrium
01 p0148 A69-10042
- Electromagnetic waves trajectory distortion in moving plasma due to additional time delay noting propagation of pearl pulsations, whistling atmospherics and proton whistlers
01 p0068 A69-11114
- Formation mechanism for heterogeneous structure of interplanetary plasma based on plasma instability from temperature anisotropy
02 p0314 A69-11638
- Two fluid MHD equations in form of nonlinear ion waves with magnetic vector
04 p0662 A69-15244
- Polarization tensor variation due to Faraday effect and differential absorption of ordinary and extraordinary waves for radiation propagating in magnetoactive cosmic plasma
05 p0805 A69-16650
- Interplanetary plasma flow simulation around earth magnetosphere and planets not considering initial conditions influence
09 p1577 A69-21768
- Radio astronomical investigations of small scale inhomogeneity motion and dimensions in interplanetary plasma, using observations of 3C 48 scintillations in 1967
10 p1782 A69-23711
- Interplanetary plasma subsequent to July 7, 1966 flare monitored by detectors on Pioneer 6 and Explorer 33
10 p1783 A69-23775
- Interplanetary plasma measurements by Luna, Mars 1, Zond 2 and Venera 3 probes, including solar plasma flux energy spectra diagram
13 p2336 A69-27354
- Plasma viscosity relation to stellar magnetic fields generation, taking into consideration angular momentum transfer
15 p2700 A69-31492
- Proton concentrations, magnetic field strength and temperatures distribution in interplanetary plasma flows as function of latitudinal distance from center of active region
20 p3594 A69-37020
- Laboratory experiments applicability to interplanetary plasma physics, describing simulations of solar wind interactions, magnetosphere, collisionless shock waves, etc
22 p4028 A69-40689
- ### COSMIC RADIO WAVES
- #### U EXTRATERRESTRIAL RADIO WAVES

COSMIC RAY ALBEDO

- Splash albedo flux measurement, using Cerenkov counter telescope surrounded by anticoincidence shield
06 p0989 A69-17278
- Splash and return albedo electrons in cosmic ray electron spectrum between 12 Mev-1 Gev measured by high altitude balloon flight
22 p4005 A69-40510
- Cosmic ray albedo neutron decay /CRAND/ source for trapped protons, showing disagreement with intensities in inner zone measured on OV1 2 spacecraft
22 p4005 A69-40512

COSMIC RAY SHOWERS

- Distance between measurement equipment and extensive air showers axis varied as function of particles number and number of hit
01 p0144 A69-10749
- Cosmic rays extensive air showers from interaction of particles with nuclei of elements in atmosphere
01 p0144 A69-10752
- Cosmic ray air shower distribution from Crab Nebula, M87, M82, quasars, X ray sources and recent supernovac
02 p0308 A69-12597
- Underground search for massive strongly interacting cosmic ray particles, using shower selecting extension array and interaction detecting telescope
02 p0310 A69-12831
- Extensive air showers at sea level, presenting experimental data for muon and electron numbers spectra
03 p0498 A69-12937
- Extensive air showers due to interaction of high energy particles with atmosphere, discussing astrophysics, cosmology and fundamental particle physics
03 p0498 A69-12938
- Muons in EAS, single unaccompanied muons, underground muons and experiments involving neutrinos
03 p0499 A69-12946
- Geiger-Muller counter telescopes in conjunction with core selectors for studying geomagnetic effect of extensive air showers
03 p0430 A69-13303
- Gamma ray fluxes from pulsating radio sources, using detection of Cerenkov light generated by energetic particles in atmosphere
03 p0513 A69-13772
- Extensive air shower radio pulse polarization, using log periodic EW- and NS-arm antennas
04 p0595 A69-15425
- Astrophysical aspects of primary energy spectrum deduced from shower size spectra and high energy interactions of extensive air showers
06 p0990 A69-17298
- Low energy muons and nuclear active particles measured with extensive air showers array composed of scintillation detectors, spectrometer and Geiger counters
06 p0990 A69-17299
- Extensive air shower high energy muons measurements noting energy spectrum, lateral spread and dependence on shower size
06 p0990 A69-17300
- Extensive air showers characteristics based on models of high energy interactions of nucleons and pions with air nuclei
06 p0990 A69-17301
- Simultaneous parallel penetrating muons observed in multiplate cloud chambers, obtaining information about sea level muons interactions and EAS
06 p0991 A69-17304
- High energy pure photon showers in cosmic ray emulsions in relation to production of magnetic pole-antipole pairs
06 p0996 A69-17883
- Muon component of extensive cosmic ray showers, discussing effect of multiplicity of secondary particles created by high energy nuclear interactions
07 p1207 A69-19325
- Arrival time distribution and energy content of extensive air shower at large core distances, discussing photon energy spectra and Monte Carlo calculation
07 p1186 A69-19410
- Cosmic ray composition and nuclear interactions at very high energies, comparing results of Monte Carlo simulations with various experimental data
12 p2149 A69-26475
- Charged primary cosmic rays responsible for relative intensities of muon-poor extensive air showers at mountain and sea levels
12 p2152 A69-27099
- Chemical composition of nuclear active particle component of primary cosmic rays in extensive air showers
13 p2326 A69-27464

- Angular distribution of penetrating shower particles produced in nuclear interaction of cosmic rays with C, Sn, Cu and Pb
13 p2330 A69-28381
- Nuclear active particles energy in extensive air showers measured with ionization calorimeter, noting discrepancy attributed to ionization bursts
13 p2331 A69-28387
- Asymmetrical showers in interaction of high energy nuclear active particles with atomic nuclei, estimating target particle mass
13 p2303 A69-28391
- Nuclear active cosmic ray component energy spectrum determined from calorimetric ionization burst measurements, discussing nuclear particle interactions absorption coefficients
13 p2331 A69-28393
- Primary particle energy and extensive air shower electron density relationship derived from vertical spectral profiles
13 p2331 A69-28396
- Proton initiated nuclear cascade in atmosphere calculated using Monte Carlo method, relating electron number to primary proton energy
13 p2331 A69-28397
- High energy electron photon cascades event recorded with X ray photography, discussing origin in related atmospheric cosmic ray showers component subgroups
13 p2331 A69-28398
- Baryon passive nuclear state nonexistence indicated by above and below ground calorimetric telescope method of nuclear cascade observation
13 p2331 A69-28401
- Stable particles heavier than nucleons in extensive cosmic ray showers detected by delayed coincidences relative to shower electron photon component
13 p2331 A69-28402
- High energy muons energy spectrum in extensive cosmic ray showers from spectrum study of ionization bursts due to penetrating component
13 p2332 A69-28403
- High energy ionization bursts in cosmic ray showers electron photon component, obtaining bursts power spectrum and component energy dependence
13 p2332 A69-28404
- Extensive cosmic ray showers structure at sea level, using multiple hodoscopic counters and control system
13 p2332 A69-28405
- Sea level fluctuations of electron-photon, muon and active nuclear components of extensive cosmic ray showers determined, obtaining shower parameters
13 p2332 A69-28406
- Radio emission of atmospheric cosmic ray showers observed with multiple wideband half wave dipole antenna system, obtaining radiation spatial distribution
13 p2332 A69-28407
- Half wave dipole antenna operational factors analyzed for RF radiation spatial power distribution from atmospheric cosmic ray showers
13 p2332 A69-28408
- High energy mu-mesons component of atmospheric cosmic ray showers by particle impact penetration using multiple underground ionization chambers
13 p2332 A69-28409
- Cosmic ray showers components relationships, analyzing superhigh energy nuclear cascade development, discussing components distribution function at constant proton energy
13 p2332 A69-28410
- Primary particles energy determined by probability distribution functions of cosmic ray showers characteristics, using Monte Carlo computerized calculation
13 p2332 A69-28411
- Cosmic ray chain reaction particles energy spectrum determination in heavy media, discussing cascade parameter application in showers development
13 p2303 A69-28412
- Cosmic ray showers electron, positron and photon energy distribution functions calculated, considering positron annihilation, Compton effect and relativistic electrons formation
13 p2303 A69-28413
- Electron photon cascades energy dependence on primary particle energy determined in lead by various instruments
13 p2304 A69-28418
- High energy electrons producing electromagnetic cascades in electron photon showers in lead measured by scintillation detectors
13 p2332 A69-28419
- HF emission spectra of radio pulses from cosmic ray showers confirming Dublin group observations
13 p2333 A69-28471

- Lateral density distribution of muon component in central region of extensive air showers, using Lodz analyzer
15 p2677 A69-31481
- Three dimensional Monte Carlo calculations for hadronic component of extensive air showers using semiempirical model high energy nuclear interactions
15 p2678 A69-31482
- Ground level muon density of extensive air showers related to threshold energy and zenith angle for primary particles
15 p2678 A69-31483
- Frequency of multiple muons from extensive air showers as function of zenith angle, noting mean transverse momentum and density spectrum
15 p2678 A69-31484
- Multiple muon showers penetrating deep underground, discussing radial extent and occurrence frequency against multiplicity spectrum
15 p2678 A69-31485
- Electromagnetic muon-nucleon interaction explanation for observed horizontal air showers, reexamining shower data in view of triplet particles
15 p2678 A69-31498
- Near horizontal air showers relationship to direct muon production and heavy triplet particles of unit charge, discussing nuclear interactions and muon bremsstrahlung
15 p2678 A69-31499
- Earth atmosphere effect on cosmic ray variations, considering relation between extensive air showers and cosmic ray spectrum
16 p2851 A69-32381
- Cosmic ray shower axis mean distance from apparatus determined by measuring muon to charged particles densities ratio
17 p3024 A69-33580
- Cosmic ray shower axis mean logarithmic distance from apparatus calculated by transforming shower recording frequency radial distribution to lin-log coordinate system
17 p3024 A69-33581
- UHF radio pulses from zenith associated with extensive air showers, estimating threshold energy of scintillation trigger system
21 p3792 A69-39613
- Radio pulse emission from ionized disk of cosmic ray extensive air showers, noting importance of charge separation in geomagnetic field and selective positron absorption
21 p3792 A69-39614
- Monte Carlo methods for electromagnetic showers simulation, noting electron track length distribution in Pb glass absorber
22 p4007 A69-41057
- Air showers muon threshold energies deep underground as function of zenith angle, discussing nucleon-air-nucleus collision parameters variation effect
23 p4207 A69-42497
- Integral energy loss spectrum of extensive air showers recorded by Haverah Park 50-m array
23 p4207 A69-42499
- Quark mass and charge interpretation during particle track photographic analysis of air shower cores by delayed expansion Wilson cloud chamber
24 p4383 A69-42945
- Galactic X ray flux from H I region low energy cosmic ray nuclei, studying electron capture effects on line intensities
24 p4367 A69-43048
- Cosmic ray pions and muons anomalous measurements above 1000 Gev explained by medium-strong contact interaction between protons
24 p4353 A69-43194

COSMIC RAYS

- NT PRIMARY COSMIC RAYS
- NT SECONDARY COSMIC RAYS
- NT SOLAR COSMIC RAYS
- Cosmic radiation interactions with living viruses, considering X ray effects and optimal radiation dosage for cancer cell destruction
01 p0013 A69-10157
- Electron production rate and density created by galactic and solar cosmic rays in lower D region, considering ionization for PCA
01 p0063 A69-10426
- Energetic cosmic radiation in deep mines, giving hypothesis of new particles more effective than muons
01 p0144 A69-10444
- Soviet investigations of solar and cosmic electromagnetic and charged particle radiations by balloon, rocket and satellite measurements
01 p0145 A69-10945

13-day cycle variation in cosmic radiation intensity confirmed by Vercelli method, giving values of amplitudes and correlation coefficients among variations
01 p0145 A69-11031

Cosmic ray neutron integrated flux measurements up to 350 km for energies to 15 Mev, determining neutron leakage flux
01 p0146 A69-11223

Cosmic radio emission at 1.68 MHz measured by Cosmos 142 satellite, discussing receiver, antenna and radiation temperature
01 p0158 A69-11322

Preatmospheric meteorite size determination from distribution of radioactive isotopes resulting from nuclear reactions produced by cosmic rays, discussing error sources
01 p0159 A69-11375

Second harmonic cosmic ray daily variation, discussing density gradient model with particle diffusion along field direction
02 p0305 A69-11422

Leptonic quarks with various charges in cosmic rays, determining upper limit of flux in underground measurements
02 p0306 A69-11547

Cosmic ray propagation in interplanetary space taking into account reverse effect on solar wind, deriving integrodifferential equation
02 p0306 A69-11657

Solar and galactic cosmic rays measurement data to investigate variation in time of relations between cosmic rays modulation amplitude and solar activity variations
02 p0306 A69-11658

Coupling coefficients of global and vertical fluxes of charged cosmic ray component in stratosphere measured by radiosondes
02 p0306 A69-11659

Book on cosmic radiation origin and expansion of universe, covering astrophysical reasons for electric charging of galaxies in range of galactic and metagalactic dimensions
02 p0315 A69-11713

Cosmic ray meson diurnal anisotropies direction calculated on basis of subtracted diurnal vectors
02 p0306 A69-11730

Charts summarizing daily solar phenomena, cosmic rays, geomagnetic variation, ionosphere, radiowave propagation and airglow observations in Japan
02 p0315 A69-11732

Pulsar CP 1133 high energy gamma ray emission, using atmospheric Cerenkov detection technique for high energy neutral cosmic rays
02 p0307 A69-11823

Elementary particles and cosmic radiation, discussing current state of knowledge and observational techniques
02 p0307 A69-11907

Radioactive decay of neutral pions generated in metagalactic cosmic ray interactions as source of high energy isotropic gamma rays observed by OSO-3
02 p0308 A69-12092

Cosmic rays properties and sources, considering origin in supernovae, galaxies, quasars and unknown sources
02 p0308 A69-12158

Galactic Jupiter Probes investigating Jupiter atmosphere and emissions and deep space cosmic radiation
02 p0324 A69-12303

Cosmic rays - Conference, Calgary, Canada, June 1967
03 p0497 A69-12928

Metagalactic cosmic rays, galactic halo and sources of cosmic rays in Galaxy, noting models, electron component of cosmic rays and evolutionary cosmology
03 p0497 A69-12929

Cosmic ray origins, considering hard protons, X rays, gamma rays, very soft protons, background radiation, charged particles and neutrinos
03 p0497 A69-12932

Galactic cosmic ray modulation by interplanetary magnetic fields, discussing compatibility of several models with experimental data
03 p0498 A69-12933

Atmospheric temperature and water vapor variations and seasonal environmental changes effects on cosmic ray neutron and meson monitor counting rates
03 p0498 A69-12936

High energy strong interaction theory in cosmic ray physics, discussing Regge model, fireball production and quark problem
03 p0469 A69-12940

High energy interactions used to estimate energy of individual cosmic rays
03 p0498 A69-12941

High energy cosmic ray research facility at mountain altitudes, noting nucleon-proton interactions, particle identification and momentum analysis
03 p0499 A69-12942

Balloon flown High Altitude Particle Physics Experiments /HAPPE/ for research on high energy cosmic rays and particle interactions
03 p0499 A69-12943

High energy cosmic ray particles observed with SEZ-14 instrument aboard Proton 1 and 2 satellites
03 p0499 A69-12944

Ultrahigh energy interactions working model, suggesting interpretation of cosmic ray experimental data on basis of Aleph plus Pionization model
03 p0499 A69-12945

Large area proportional counter for cosmic ray design, construction and specifications
03 p0427 A69-12979

Cosmic ray and solar wind properties, discussing solar wind measurements, interplanetary magnetic field and solar wind sounding by cosmic rays
03 p0500 A69-13355

Heavy cosmic ray particles effect in manned space flight, noting results of deuteron microbeam experiment
03 p0373 A69-13494

Cosmic rays intensity increase due to meteor showers noting maximum solar activity effects
03 p0500 A69-13509

Galactic cosmic rays energy modulation spectrum in interplanetary space, showing influence of solar wind velocity and diffusion coefficient dependence
03 p0501 A69-13527

Automatic recording device for cosmic ray bursts utilizing information time delay to allow detailed initial period study
03 p0430 A69-13545

Cosmic ray solar diurnal variations for nucleonic component, discussing differential response functions
03 p0501 A69-13751

Cosmic ray meson component solar diurnal variation calculations noting amplitude, average deflection angle and dependence on zenith angle of arrival
03 p0501 A69-13752

Cosmic X ray sources resolved against diffuse background radiation lying close to galactic plane
03 p0501 A69-13767

Extraterrestrial background gamma radiation /0.3-2 Mev/ observations used to derive upper limits for cosmic ray protons and CNO nuclei in interstellar space
03 p0501 A69-13934

Cosmic ray time variation and anisotropies near earth, discussing galactic and solar cosmic rays, trajectories in geomagnetic field, etc
03 p0504 A69-14236

Meter and decimeter solar radio bursts and sudden cosmic noise observed at Ahmedabad, India
03 p0518 A69-14259

Amplitude and phase of cosmic ray meson diurnal variation, noting less variation in neutron diurnal variation
04 p0648 A69-14374

Cosmic ray intensity after solar flare shown greater than during quiet periods from balloon data at Murmansk and Mirnyi
04 p0648 A69-14375

Atmospheric, geomagnetic and interplanetary effects on cosmic ray flow, noting anisotropy and diurnal variation phase and amplitude averages
04 p0649 A69-14683

Moving isotropic black body radiation, discussing effect on energy flux and earth velocity measurement through 3K cosmic background radiation
04 p0649 A69-15150

Cosmic ray intensity increase of January 28, 1967, noting pressure corrected hourly data and lack of association with visible solar flare
04 p0649 A69-15442

Cosmic X ray background production mechanisms
05 p0814 A69-15848

High energy proton and neutron fluxes and spectra from nuclear emulsion stacks on Cosmos satellites, calculating cosmic radiation doses
05 p0814 A69-16051

Solar modulating function form changes resulting in hysteresis near solar minimum
05 p0815 A69-16249

Cosmic ray electron flux and energy spectrum from balloon data obtained at Palestine, Texas, monitoring proton flux periodically
05 p0815 A69-16250

Cosmic ray propagation, discussing interstellar matter effect on composition and diffusion effect necessary to study radiation models
05 p0816 A69-16361

Galactic magnetic field estimation obtained from cosmic ray electron spectrum and radio data
05 p0828 A69-16612

Transformation of differential mean and current densities and anisotropy of cosmic ray particles and photons observed in frames of reference relative to each other with isotropic flux
05 p0817 A69-16651

Experimental measurement of He and C isotope composition of cosmic radiation
05 p0817 A69-16709

Gamma ray production and high energy electrons in cosmic radiation
05 p0817 A69-16712

Diffuse cosmic X radiation flux and intensity law, noting inverse Compton effect of electrons on 3K black body radiation
05 p0817 A69-16714

Celestial X ray sources astronomy, discussing emission mechanism in 2 to 100 keV range and balloon observations in Cygnus and Taurus constellations
05 p0817 A69-16715

Low energy diffuse cosmic X radiation, considering adequacy of single exponent power law spectrum [ISAS-428]
06 p0986 A69-17024

Upper limit estimated for anomalous interaction between cosmic muons with greater than 100 BeV energy
06 p0986 A69-17246

Cosmic rays, elementary particle physics and astrophysics - Conference, Aligarh, India, December 1967
06 p0986 A69-17268

Cosmic radiation propagation in interstellar space, discussing differential kinetic energy spectra of protons, He, C and O nuclei and Fe
06 p0988 A69-17269

Cosmic ray propagation model, considering determination of He interstellar spectrum and amount of matter traversed at low energies
06 p0988 A69-17270

Lithium, Be, B and fluorine nuclei in cosmic radiation, discussing nature of spectra
06 p0988 A69-17271

Spectra analysis of proton and He nuclei having different charge-to-mass ratios to obtain information on solar modulation and injection spectra
06 p0988 A69-17272

Interstellar flux of heavy and superheavy nuclei calculated, assuming nuclei injection with source spectrum similar to M nuclei
06 p0988 A69-17273

Permanent magnet and nuclear emulsion for measuring He nuclei momentum spectra up to 100 gy rigidity
06 p0989 A69-17277

Solar neutron production and propagation to earth, discussing particle detectors
06 p0989 A69-17281

Production rates of nuclides measured in stack of glass plates under proton irradiation for calculating cosmic ray production rates in stone meteorites
06 p0989 A69-17283

Transistorized multichannel pulse height analyzer and recording system for balloon-borne cosmic ray payloads, discussing performance capacity
06 p0924 A69-17284

Cellulose nitrate sheets applicability in detecting cosmic ray relativistic heavy nuclei, considering etchable tracks
06 p0924 A69-17286

Modulation of galactic cosmic rays due to electromagnetic conditions of interplanetary space, considering time variations and Parkers model
06 p0989 A69-17287

Galactic cosmic rays anisotropies due to density gradient perpendicular to ecliptic plane studied, using diurnal and semidiurnal component and intensity deficiency
06 p0990 A69-17289

Cosmic ray daily variations relationship to geomagnetic activity, sector structure of interplanetary magnetic field and sunspot activity
06 p0990 A69-17291

27-day cosmic ray intensity variations related to solar wind velocity nonuniformity due to longitudinal distribution of coronal active regions
06 p0990 A69-17292

Large area scintillation telescopes with cubic geometry, measuring cosmic rays intensity from vertical and slant directions

06 p0925 A69-17296

Multiplicity of secondary neutrons counted by IGY neutron monitor detecting cosmic radiation

06 p0925 A69-17297

Cosmic ray magnetic spectrograph for measurement of momentum spectrum, charge ratio and specific ionization of muons, discussing magnetic and scattering displacement

06 p0925 A69-17302

Isotropic background cosmic X ray flux measurements using low latitude balloon to minimize atmospheric background, obtaining hard solar X ray flux upper limits

06 p0992 A69-17311

Cosmic ray electron energy spectrum compared with galactic radio noise for estimating galactic magnetic field

06 p0992 A69-17377

Continuity and momentum equations for cosmic ray gas particles in interplanetary region

06 p0992 A69-17379

Cosmic radiation and hibernation physiopathology of human organism, noting beryl as radiation resisting agent in spacecraft design

06 p0874 A69-17645

Metastable helium abundance in interstellar and intergalactic space, inferring low energy cosmic ray concentration

06 p1010 A69-17973

Cosmic X rays, gamma rays and electron production under astrophysical conditions, noting potential use in supernova and quasar research

07 p1204 A69-18391

Cosmic ray astrophysics, discussing chemical composition, energy spectrum and galactic sources

07 p1205 A69-18909

Local interstellar electron spectrum limits from measurements of cosmic ray electrons, nonthermal galactic radio emission and solar modulation effects

07 p1206 A69-19269

Balloon observations of cosmic X ray sources in Cygnus and Crab Nebula, discussing data application to energy spectra analysis

07 p1210 A69-19716

Black body cavity radiation distribution as seen by observer in arbitrary uniform motion with respect to radiation mass center

08 p1380 A69-19784

Cosmic gamma radiation with energies above 100 Mev in southern sky, discussing results of balloon-borne spark chamber flight

08 p1377 A69-19787

Cosmic gamma ray generation by Compton scattering in discrete sources, applying formulas to M87, Crab Nebula, M82, Cen A, Ngc 1275, and Cas A

08 p1377 A69-20053

Cosmic ray deuteron and He 3 secondary origin and determination of cosmic ray path length and residual interplanetary field modulation

08 p1378 A69-20066

Earth internal magnetic field effects on cosmic ray measurements, dipole approximation and effect of external sources

08 p1378 A69-20219

Solar activity modulation of galactic cosmic rays with more than 1 Gev energy

08 p1378 A69-20224

Long term modulation of cosmic rays by solar activity explained by Parker solar wind model, noting confirmation by direct satellite measurements

08 p1379 A69-20533

Cosmic ray Li, Be and B nuclei measurements, analyzing differential energy spectra, L-M ratio, atmospheric and solar modulation

08 p1380 A69-20638

Discrete source hypothesis for interpreting high energy cosmic gamma ray measurements obtained by OSO-3 spacecraft

08 p1380 A69-20699

Cosmic ray negatron and positron spectra using balloon-borne magnetic spectrometer, obtaining absolute solar modulation of positron flux

08 p1380 A69-20728

Nuclear particle plastic dielectric track detectors to record distribution of fissionable and heavy elements in nature and cosmic radiation

08 p1401 A69-20899

Meteorites radiogenic and cosmic ray exposure ages, orbits and parent bodies, discussing H and L group chondrites

08 p1405 A69-20928

Chemical effects of solar wind and cosmic protons on solid bodies in space, discussing possible relation to origin of life

08 p1407 A69-20935

Fluorescer-photomultiplier mobile telescope for measurement of vertical cosmic ray intensity and equator points in atmosphere

09 p1493 A69-21420

Cosmic gamma ray spectra from metagalactic proton-antiproton annihilation

09 p1574 A69-21459

Approximate solution of nonlinear differential equation describing interaction between galactic cosmic rays and solar wind, obtaining four domains

09 p1575 A69-21524

Cosmic ray intensity temperature dependence in stratosphere and anisotropy in interplanetary space determined from measurements over Arctic and Antarctic regions

09 p1575 A69-21542

Cosmic ray particle behavior in interplanetary medium, solving model equation for cosmic ray diffusion in cloud of outgoing scattering centers

09 p1575 A69-21598

Cosmic ray intensity diurnal variations from super neutron monitor observations, discussing anisotropy resulting from reduced intensity in gardenhose direction in ecliptic plane

09 p1576 A69-21706

Lunar photon leakage spectrum due to photons from capture and inelastic scattering of neutrons by galactic cosmic rays

09 p1597 A69-22088

Cosmological implications of diffuse X ray background, noting Compton black body process effect on isotropic cosmic X rays

09 p1578 A69-22152

Solar extreme UV, soft and hard solar X rays, cosmic X rays and gamma rays, cosmic ray particles and near earth visible radiation observed by OSO-3

09 p1578 A69-22167

Solar and cosmic X rays observed by OSO-C, stressing galaxy M 87 upper limits and Lupus XR-1 power law spectral form

09 p1578 A69-22171

Hard solar and cosmic X rays measured with satellite-borne telescope, considering flux and time variations

09 p1579 A69-22173

Galactic cosmic ray scattering and energy loss through solar wind interaction

09 p1580 A69-22202

Radio recombination lines of galactic hydrogen as sensitive test for low energy cosmic ray existence in interstellar medium

09 p1580 A69-22273

Compton scattering of microwave radiation on cosmic ray electrons proposed as mechanism generating 100 Mcv cosmic gamma rays

09 p1580 A69-22295

Inverse compton scattering of far IR background radiation proposed as explanation of high energy gamma ray flux

09 p1580 A69-22296

Renormalizable weak interaction mechanism for generation of high energy muons from Tev cosmic rays in upper atmosphere

09 p1581 A69-22530

Solar modulation of galactic cosmic rays, discussing disagreements between convection diffusion theory and observation

09 p1581 A69-22744

Anomalous Forbush decrease observations in November 1960 demonstrating cosmic ray flux anisotropy near earth

09 p1582 A69-22753

Diffuse cosmic X ray background measured during balloon flight with actively shielded and collimated detector

09 p1584 A69-22767

Solar activity influence on cosmic ray intensity 11 year variation, taking into account heliolatitudinal movement of sunspot regions in solar cycle as evidence of density gradient

10 p1754 A69-22802

Daily observational results of solar phenomena, cosmic rays, geomagnetic variations, ionosphere, radio wave propagation and airglow arranged according to solar rotation number

10 p1771 A69-22808

Cosmic ray physics - Conference, Novosibirsk, U.S.S.R., August-September 1967

10 p1754 A69-22810

Cosmic ray variations as means of studying solar wind characteristics and interplanetary medium

10 p1755 A69-22811

Quasars and explosive processes in galaxies as cosmic ray sources in expanding universe, studying relation between galactic and metagalactic cosmic rays

10 p1756 A69-22815

Cosmic charged particle acceleration in electromagnetic field described by vector and scalar potentials, constituting plane electromagnetic wave propagating along z axis

10 p1756 A69-22816

Cosmic ray induced radioactivity in lunar surface and meteorites calculated together with cosmic ray intensity variations

10 p1756 A69-22817

Satellite data on galactic cosmic ray variations near magnetosphere and in interplanetary space, discussing Forbush decreases

10 p1756 A69-22819

Cosmic rays origin, measurements of energy spectrum and stellar diurnal variations

10 p1757 A69-22823

Interplanetary magnetic fields characteristics and magnetic inhomogeneities spectra from cosmic ray variation studies used to obtain scattering mean free path

10 p1757 A69-22824

Solar wind and galactic magnetic field buffer layer, analyzing cosmic rays effect and space-time distribution

10 p1757 A69-22825

Superhigh energy cosmic ray interaction with neutrinos in universe, shape of cosmic ray spectrum and universe development

10 p1757 A69-22826

Cosmic ray anisotropy and diurnal density variation, analyzing influence of interplanetary magnetic field and subsonic solar wind

10 p1757 A69-22828

Forbush decreases spectra in low energy region from satellite measurements of neutron and hard component of cosmic rays

10 p1758 A69-22829

Cosmic ray electrons and gamma quanta at lower atmosphere recorded with balloon equipment, plotting vertical profiles of electron energy spectra

10 p1758 A69-22830

Galactic cosmic ray modulation and solar activity analyzed on basis of cosmic ray measurement in stratosphere

10 p1758 A69-22832

Cosmic ray anisotropy relation to scattering and sectorial structure of interplanetary magnetic field using neutron monitor data

10 p1758 A69-22834

Cosmic ray intensity variations by spectrographic method, noting geomagnetic effects

10 p1759 A69-22836

Electron production rates variations in lower ionosphere cosmic ray related to meteorological, geomagnetic and cosmic conditions

10 p1759 A69-22839

Cosmic ray absorption and modulation in lower ionosphere at midlatitudes, considering 11 year variations, Forbush effects and solar radiation on electron concentration

10 p1759 A69-22840

Solar activity effect on interplanetary electromagnetic field according to cosmic ray modulation data, noting ineffective correlation and solar wind effects

10 p1759 A69-22841

Cosmic ray modulation by solar wind, discussing anisotropic diffusion during propagation through interstellar magnetic field

10 p1759 A69-22842

Solar activity and 19 to 24 day variations in cosmic ray intensity

10 p1759 A69-22843

Asymmetrical solar wind volume variations of magnetic inhomogeneities and cosmic ray absorption in earth atmosphere, including barometric coefficients of neutron component

10 p1760 A69-22844

Phase equilibrium and dynamics of gas volume heated by cosmic rays and cooled by radiation

10 p1760 A69-23136

High energy cosmic radiation using Conversi detectors, noting design and internal efficiency

10 p1693 A69-23296

Cosmic protons interaction with interplanetary plasma, analyzing beam energy loss due to excitation of longitudinal electrostatic oscillations

10 p1760 A69-23617

Low energy cosmic ray intensity increase on July 7, 1966 registered with high latitude neutron monitors
10 p1766 A69-23762

Time dependence, anisotropy and spectral composition of cosmic radiation generated during series of flares during July 5-20, 1966 by Pioneer 6 observations
10 p1768 A69-23769

Forbush decrease associated with July 7 1966 proton event from cosmic ray intensity variation measurements by neutron monitors
10 p1768 A69-23774

Low energy particles during solar proton flare and effects on magnetosphere, cosmic ray intensity, ionosphere and geomagnetic activity
10 p1768 A69-23786

Interplanetary magnetic field sectoral structure effect on diurnal cosmic ray intensity and geomagnetic field, noting field direction influence
10 p1769 A69-23905

Algorithm for determining readings dispersion during cosmic ray recording, considering cosmic rays variability, statistical nature and instrument errors
10 p1770 A69-23906

Coupling coefficients for integral charged component of cosmic rays determined from measuring azimuthal geomagnetic effect on rays observed in crossed telescopes
10 p1770 A69-23925

Interstellar gas model based on calculations of heating by low energy cosmic rays, noting gravitational compression to form clouds
10 p1770 A69-24095

Stochastic and ergodic aspects of magnetic lines of force, discussing cosmic ray diffusion in interplanetary magnetic field
10 p1770 A69-24111

Stochastic model of interstellar magnetic field to account for observed cosmic ray mean life
10 p1771 A69-24112

Low energy cosmic rays and plasma turbulence in heating and ionizing interstellar gas, discussing acceleration and galactic sources
11 p1945 A69-24380

Cosmic ray cut-off energy for synchronous satellites computed by trajectory tracing method using magnetospheric model
11 p1949 A69-24860

Biological effects of cosmic ionizing radiation in supersonic commercial aircraft at high altitudes, showing spatial distribution based on balloon experiments
11 p1830 A69-24865

Laboratory simulation methods for cosmic nuclear radiation, discussing dosimetry methods
11 p1862 A69-24875

Radiation dose and radioactive isotopes induced in astronaut body by cosmic rays of various energies
11 p1831 A69-25463

Cosmic radiation origin in terms of sudden injection of particles in time, momentum and space, considering statistical fluctuations role in observed spectrum
12 p2148 A69-26206

Radio emission of fast cosmic ions by plasma wave conversion to electromagnetic waves, using nonlinear mechanism in turbulent plasma
12 p2149 A69-26209

X ray polarization from Sco X-1, noting spurious instrumental polarization due to cosmic ray anisotropy using X ray polarimeter
12 p2149 A69-26315

Inelastic interactions between Tev cosmic particles and light element nuclei, describing design and operation of measuring apparatus and derivable data
12 p2093 A69-26583

Cosmic radiation recorder designed for use onboard satellite to measure intensity space-time distribution under geomagnetic effect
12 p2094 A69-26697

Solar-terrestrial environment, discussing mathematical development of solar wind, satellite measurement, magnetic storms, aurora and cosmic rays
12 p2161 A69-26941

Cosmic rays during 11-year solar cycle, short term variations and radial gradient based on Luna, Zond and Venera probes and Cosmos observations
13 p2326 A69-27351

Cosmic ray propagation theory for steady streaming along magnetic field and down cosmic ray density gradient, noting MHD wave generation by anisotropy
13 p2326 A69-27569

Cosmic X ray background measurements and Crab Nebula observation during sounding rocket flight
13 p2326 A69-27570

Cosmic ray observation data automatic recording, presenting coding system for reading into computer
13 p2327 A69-27609

Cosmic ray physics - Conference, Novosibirsk, U.S.S.R., August-September 1967
13 p2328 A69-28367

High energy particle collisions, calculating inelastic interactions between cosmic nuclei
13 p2330 A69-28370

Four dimensional momenta transfer during high energy cosmic ray particle collisions, comparing various collision models
13 p2330 A69-28375

Wilson chamber and ionization calorimeter determination of cosmic ray particle-carbon nuclei interaction energy characteristics
13 p2330 A69-28379

Pionization cross sections at 100 gev for interactions of cosmic ray neutrons and pions with C and Pb nuclei
13 p2330 A69-28382

Inelastic interaction cross sections of nuclear active cosmic ray particles with atomic Fe and Pb in 100 to 1000 gev range
13 p2330 A69-28384

Cosmic ray postinteraction nuclear active particle energy spectrum measurements with ionization calorimeter, noting energy underrating
13 p2331 A69-28392

Nuclear active cosmic ray component particle energy spectrum and nuclear cascade avalanches curves, using ionization calorimeter with Pb absorber
13 p2303 A69-28399

Cosmic ray penetrating component properties identical to muon component at mountain level, indicating baryon passive nuclear state nonexistence
13 p2331 A69-28400

Cosmic ray muons energy and angular distribution measurements, obtaining curve with respect to projection angles
13 p2332 A69-28420

Cosmic ray muons angular distribution measuring device for determining pion/kaon ratio
13 p2332 A69-28421

Cosmic ray particles with fractional charge at sea level searched by scintillation counters with spark chambers, estimating quark flux intensity
13 p2333 A69-28425

Cosmic rays suggested as origin of interstellar grain alignment, discussing galactic central radiation, gas collisions and isotropic bombardment
13 p2333 A69-28469

Cosmic ray propagation in interplanetary space taking into account reverse effect on solar wind, deriving integrodifferential equation
13 p2333 A69-28688

Solar and galactic cosmic rays measurement data used to investigate variation in time of relations between cosmic rays modulation amplitude and solar activity variations
13 p2333 A69-28689

Coupling coefficients of global and vertical fluxes of charged cosmic ray component in stratosphere measured by radiosondes
13 p2334 A69-28690

Cosmic ray equators from trajectory tracing procedure for computing vertical cut-off rigidities with two different geomagnetic field simulations compared to experimental equators
14 p2511 A69-28961

Muonic component diurnal wave trains at 70 mwe during cosmic ray decreases, discussing Forbush decay as result of shock front advance
14 p2511 A69-28962

Cosmic ray intensity preceding Forbush effects as function of chromospheric flares solar longitude and solar wind velocity
14 p2512 A69-29044

Relativistic solar proton propagation fluctuation effects in interplanetary magnetic field during cosmic ray intensity increase
14 p2512 A69-29045

Cosmic ray angular distribution spectrum and interplanetary magnetic field properties determined from semidiurnal cosmic ray variations data
14 p2512 A69-29046

Geomagnetic cut-off influence on charged particle dynamics in geomagnetic field, applying charged particle motion theories to magnetosphere fields
14 p2513 A69-29099

Rocket-borne scintillation spectrometer for cosmic photon radiation
14 p2449 A69-29566

Frequency distribution of sudden cosmic ray intensity increases, considering Forbush phenomenon
14 p2514 A69-29773

Annihilation gamma ray spectra from equilibrium spectra of secondary galactic positrons
14 p2514 A69-29948

Cosmic ray intensity during solar cycles, considering minima relationship to Bartel index maxima and solar wind modulation theory
14 p2515 A69-29967

Cosmic ray observations on synoptic scale, discussing equipment and programs of IQSY world array of monitor stations
15 p2673 A69-30012

Cosmic ray intensity underground measurements, discussing solar modulation processes, sidereal day variations and interplanetary magnetic field influence
15 p2673 A69-30013

IQSY low energy galactic and solar cosmic ray observations made by various satellites and space probes, including hydrogen and helium energy spectra
15 p2673 A69-30014

Cosmic ray variation theory, presenting data on coupling of solar activity with large scale characteristics of solar wind during 11-year cycle
15 p2673 A69-30015

Quark detection in cosmic rays at sea level using scintillation counter and streamer chamber system
15 p2674 A69-30308

Galactic cosmic rays and Alfvén waves interaction, considering gyration frequency resonance, wave growth, Fokker-Planck equation and diffusion model
15 p2675 A69-30761

Low energy positrons in cosmic radiation due to beta decay of carbon, nitrogen and oxygen isotopes, estimating positron fluxes and energy spectra
15 p2676 A69-30887

Interstellar hydromagnetic waves due to streaming cosmic rays indicated by pulsar scintillations studies
15 p2676 A69-30889

Relative motion of 3 K cosmic background radiation with covariant photon equilibrium distribution
15 p2657 A69-31494

Interstellar cloud models, considering gas pressure, cosmic ray flux, magnetic field values, etc.
16 p2853 A69-31599

Low velocity heavy mass particle detection in sea level cosmic radiation, assuming deuterons
16 p2846 A69-31600

Metagalactic electrons inverse Compton effect on relic radiation to interpret cosmic isotropic X radiation entire energy spectrum
16 p2847 A69-31800

Azimuthal particle distribution expressions for analyzing cosmic ray jets
16 p2849 A69-32045

Book on cosmic ray variations and solar activity during IQSY covering energy spectrum, outer space radiation, magnetosphere, etc.
16 p2849 A69-32052

Solar wind speed transverse variation effect on cosmic ray intensity at earth analyzed using mathematical model
16 p2849 A69-32088

Cosmic ray second harmonic daily variations explainable by symmetrical gradient rising away from solar equatorial plane
16 p2850 A69-32304

Approximate solution of nonlinear differential equation describing interaction between galactic cosmic rays and solar wind, obtaining four domains
16 p2851 A69-32519

Cosmic ray intensity temperature dependence in stratosphere and anisotropy in interplanetary space determined from measurements over Arctic and Antarctic regions
16 p2851 A69-32537

Cosmic ray electron spectrum data obtained by balloon flights, showing electron flux reduction above 500 Mev with increasing solar activity
16 p2851 A69-32566

Earth motion relation to cosmic background radiation excess determined from radiometer study of galactic radiation
17 p3022 A69-32864

Cosmic X rays diffused component absolute intensity measurement using rotating collimator borne on sounding rocket, noting flat spectrum and Sco X-1 intensity variation
17 p3023 A69-33068

High energy cosmic ray muon charge ratios at large zenith angles measured as function of momentum by using spectrometer
17 p3023 A69-33321

Cosmic ray particle Pb nucleus interaction energy transfer to electron photon cascade in first inelastic collision, noting dependence on particle energy
17 p3008 A69-33387

European highly eccentric orbit satellite /HEOS/ cislunar probe to explore interplanetary space for mag-

netic fields, cosmic radiation, solar wind and earth shock wave

17 p3050 A69-33397

Cosmic ionizing radiation effects on electronic elements operation based on radiation and matter interaction principles

17 p2937 A69-33583

Interstellar H I regions and clouds heating and ionization by low energy cosmic rays from quantitative models, noting pressure equilibrium role

17 p3038 A69-33726

Cosmic ray heavy nucleus ends flux by nuclear emulsions for balloon flights at various atmospheric depths

17 p3025 A69-34219

Cosmic X rays diffuse component possible origin, discussing galactic gamma ray flux and disagreement with measured isotropy

18 p3185 A69-34275

Cosmic ray propagation equilibrium model for rays origin and storage in galaxy, considering energy dependence of nuclei relative abundances

18 p3185 A69-34276

Cosmic ray intensity short term stochastic variations in solar system related to turbulent solar wind day-to-day variations

18 p3186 A69-34300

Hard cosmic radiation hypothesis for Newton gravitation law for neighboring bodies, obtaining gravitational energy quanta and propagation velocity relationship

18 p3172 A69-34627

Cosmic ray diurnal anisotropy variations, correlating component annual means with magnetic activity

18 p3186 A69-34934

Cosmic ray approach directions computation for high latitude stations, discussing results for low rigidity galactic cosmic rays and solar corpuscular events detection

18 p3187 A69-34940

Low energy cosmic ray density in Galaxy due to pulsar PSR 0833-45 caused by mass ejection

18 p3187 A69-34995

Source requirements for cosmic radiation origin model, noting fluctuations in momentum changing process

18 p3188 A69-35005

Photodisintegration of ultrahigh energy cosmic rays by universal radiation field, analyzing implications on origin and propagation time

18 p3188 A69-35006

Source position of cosmic ray diurnal anisotropy relative to ecliptic plane from neutron monitor data at Mawson and Churchill stations

18 p3189 A69-35441

Be 7 stability in galactic cosmic radiation, noting lifetime dependence on electron density around nucleus

18 p3189 A69-35482

Cosmic ray produced radionuclides and rare gas isotopes from Saint-Severin meteorite surface, showing relative Kr spallation mass yields dependence on cosmic ray energy spectra

19 p3410 A69-36093

Cosmic ray produced radionuclides P 32, Cl 36, Ar 37 and Ar 39 determined in separate mineral phases of meteorites, emphasizing ratios in metals

19 p3410 A69-36094

Radiation ages of bronzite chondrites, amphoterite and hypersthene from cosmic ray activities

19 p3412 A69-36102

Cosmic ray produced Be 10 in iron meteorites for terrestrial age determination, considering Cl 36 and rare gas analysis

19 p3412 A69-36104

Meteoritic cosmic ray exposure time from method based on spallogenic Ar 36/Ar 38 ratio, noting impracticality for exposures longer than 5 million years

19 p3418 A69-36138

Proton satellites measurements reconciliation with diurnal stellar variation data and cosmic rays origin models

19 p3396 A69-36621

OGO-F neutron monitor for measuring cosmic ray neutron flux near earth, locating sensor on boom to minimize spacecraft produced neutrons

19 p3314 A69-36678

Cosmic rays sudden intensity increases during proton flares of 28 January 1967 and 7 July and 2 September 1966, plotting proton density vs pressure

20 p3587 A69-37045

Pulsars cosmic ray mass and charge spectra analyzed for evidence of neutron star origin

20 p3588 A69-37487

Meteorite minerals as detectors for studying fossil record of cosmic ray nuclei, emphasizing feldspars and pyroxenes

20 p3590 A69-37568

Biological effects of cosmic radiation on crewmen and protection measures, noting ground radiobiological and medical hygienic investigations

20 p3478 A69-37628

Cosmic radio emission absorption in D, E region and in F 2 layer above and below electron concentration maximum from vertical ionospheric sounding 1959 over Moscow

20 p3590 A69-37676

High energy proton and neutron fluxes and spectra from nuclear emulsion stacks on Cosmos satellites, calculating cosmic radiation doses

20 p3591 A69-37961

Cosmic protons and high energy heavy nuclei interaction with radiation in expanding universe, including estimates of light radiation influence on cosmic ray spectra

20 p3591 A69-38034

Twenty year wave in diurnal anisotropy component of galactic cosmic rays arriving at earth from asymptotic direction east of sun interpreted as magnetic reconnection

20 p3592 A69-38098

Diurnal variations in cosmic ray intensity from observations by inclined meson telescopes scanning equatorial plane

20 p3593 A69-38109

Anisotropy of relativistic cosmic ray electrons, considering electron exposure time to synchrotron effects, energy loss from inverse Compton effect, etc

20 p3593 A69-38145

Cosmic X ray background spectral measurement from rocket flight near geomagnetic pole

21 p3787 A69-38351

Charged particle acceleration in interplanetary plasma from analysis of cosmic ray intensity increases accompanied by SC magnetic storms and Forbush effects

21 p3788 A69-38587

Cosmic ray studies - Conference, Bombay, November 1968

21 p3788 A69-38811

Cosmic rays composition, origin, acceleration and propagation, describing two component models

21 p3789 A69-38814

Meteoritic compositions used to determine prehistoric cosmic rays composition and energy spectrum

21 p3789 A69-38815

Cosmic ray propagation from experimental data on cosmic ray nuclei

21 p3789 A69-38816

Interstellar matter, considering objects size, solar wind structure, galactic parameters, magnetic fields and cosmic ray heating

21 p3802 A69-38819

Galactic radio emission and magnetic field strength and structure, using radio surveys to obtain information on cosmic rays

21 p3790 A69-38820

Cosmic ray electron role in energetics of solar flares, stellar flares and explosions, galactic eruptions and quasars

21 p3790 A69-38823

Galactic gaseous disk dynamics, considering interstellar gas behavior and cosmic ray-magnetic field instability

21 p3802 A69-38824

Diurnal variations of cosmic ray neutrons corrected for barometric and temperature effects by harmonic analysis

21 p3791 A69-38840

Cosmic ray electron recorder for measuring intensity, energy spectrum and angular distribution of electron fluxes within specific energy range

21 p3724 A69-39074

Cosmic ray muons for calibrating dE/dx counter used in particle identification by determining cosmic particles distribution as function of energy losses due to ionization

21 p3724 A69-39075

Cosmic radiation altitude profiles, giving tabulation of counting rates obtained by SPARMO flights at different locations

21 p3791 A69-39253

Harrison primordial inhomogeneity postulate concerning baryon numbers distribution in universe, precluding possibility of considering cosmic rays bulk as universal

21 p3810 A69-39469

Galactic cosmic rays, discussing chemical composition, isotopic separation, proton and alpha particles energy spectra, propagation, interactions, etc

21 p3791 A69-39502

Galactic nuclei as collapsed old quasars from dynamics of gas cloud collection in galactic nucleus, discussing cosmic radiation emission from synchrotron mechanism

21 p3815 A69-39610

Sayan Sun Observatory experimental equipment, discussing instruments for solar observation, earth currents measurement and cosmic ray neutron components recording

22 p3943 A69-39997

Chemical composition of galactic and solar cosmic rays, discussing differences from universal cosmic abundances, using Cerenkov counters, emulsions, etc

22 p4002 A69-40090

Cosmic ray electrons component measurements at balloon altitudes with electron spectrometers

22 p4002 A69-40091

Cosmic ray neutron studies of atmospheric nucleon component equilibrium and flux fluctuations at atmosphere top

22 p4002 A69-40092

Cosmic radiation exposure of passengers and crew in supersonic transport at high altitude

22 p4002 A69-40093

Radiocarbon natural production by cosmic ray neutrons, utilizing proportional counters filled with N atmospheres

22 p4003 A69-40095

Geomagnetic disturbances and cosmic ray storm of 25-26 May 1967 caused by McMath plage region 8818, noting Forbush decreases and ring current effect

22 p4004 A69-40307

Cosmic ray proton cut-off increase at high latitudes during magnetospheric substorms, using balloon time observations of nuclear gamma ray flux

22 p4005 A69-40509

Splash and return albedo electrons in cosmic ray electron spectrum between 12 Mev-1 Gev measured by high altitude balloon flight

22 p4005 A69-40510

Cosmic gamma rays spectrum from neutral pions production and decay in metagalactic cosmic ray p-p collisions, deriving models based on Einstein general relativity theory

22 p4006 A69-40641

Pitch angle distribution of cosmic ray electrons in decreasing magnetic field for waves in ionized plasma, noting anisotropy due to synchrotron radiation

22 p4006 A69-40642

Cosmic X ray bremsstrahlung due to collisions of suprathermal protons with ambient electrons, giving clue about diffuse sky background of X rays

22 p4006 A69-40643

Cosmic ray diurnal phase and amplitude variations determined using superimposed records of cosmic ray stations inside limited rigidity region

23 p4204 A69-41481

Cosmic ray anisotropy direction during periodic intervals determination, noting application to event of December 1957

23 p4204 A69-41482

Geomagnetic disturbances relations to cosmic ray diurnal variation phase and amplitude, including Forbush decreases

23 p4204 A69-41483

Day-to-day variability of daily variation of cosmic ray intensity during quiet solar activity period using high latitude neutron monitor data

23 p4204 A69-41484

Radiometer for measurement of cosmic rays at 200-400 km altitudes range by satellites, presenting block diagram of radiation detector units

23 p4165 A69-41732

Cosmic ray detectors design for medium, low and very low energy events on IMP-1 spacecraft, noting PCM format

23 p4118 A69-41738

Biological effects by cosmic ray heavy ions and solar flares, using direct correlation between damages caused and trajectories

23 p4089 A69-41831

Outer anisotropic galactic cosmic particle flux distortion in interplanetary space, analyzing scattering in solar wind by isotropic diffusion equations

23 p4205 A69-41837

Cosmic ray flux intensity increases, discussing effects of solar wind, corpuscular flux velocity and interplanetary magnetic field

23 p4205 A69-41838

- Cosmic radio emission anomalous absorption measurements during PCA following July, August, September 1966 proton flares 23 p4156 A69-41845
- Anomalies of isotropic cosmic ray secular variations at high latitudes based on supermonitor neutron data 23 p4206 A69-41854
- Errors due to neutron counter radioactivity in cosmic rays nucleon measurements analyzed in reducing readings to barometric pressure 23 p4206 A69-41855
- Day-to-day changes of cosmic ray diurnal variation measured on meson and neutron components, showing relationship with interplanetary magnetic field 23 p4206 A69-42012
- Low energy galactic cosmic ray spectrum determined from ionization rate per hydrogen atom, correlating peak intensity with stellar particle emission high energy portion 24 p4365 A69-42608
- Fire hose instability growth rate in relativistic plasma with anisotropic pressure, discussing importance to cosmic ray liberation and isotropization at galactic halo 24 p4376 A69-42660
- IMP 4 satellite measurements of cosmic ray electrons in interplanetary space compared to predictions of electron intensity from interstellar proton-electron collisions 24 p4365 A69-42667
- Cosmic rays properties and dynamical effects in Galaxy disk including origin, lifetime, magnetic field instability, etc 24 p4366 A69-42695
- Transient sources of cosmic rays, discussing possible time variable intensity and momentum spectrum of Galaxy 24 p4367 A69-43006
- Equations governing cosmic ray modulation and approximate equations valid at high and low energies 24 p4367 A69-43169
- Cosmic ray electron energy spectrum and intensity measurements indicating time variations attributed to solar modulation effects 24 p4367 A69-43175
- Isotropic cosmic X rays measured by balloon-borne scintillation telescope, discussing agreement with electron energy spectral distribution 24 p4368 A69-43185
- Diffuse cosmic X rays from Compton collisions between galactic leakage electrons and extragalactic background photons to verify microwave blackbody radiation properties 24 p4368 A69-43202
- Soft cosmic X ray background flux from rocket observations on 21 September 1968 from White Sands, discussing flux origins 24 p4368 A69-43220
- Low energy cosmic rays and plasma turbulence in heating and ionizing interstellar gas, discussing acceleration and galactic sources 24 p4375 A69-43770
- COSMOGONY**
U COSMOLOGY
COSMOLOGY
- Stellar evolution, discussing stellar structure, pre- and post-main sequence evolution, solar system origin, supernovae, white dwarfs, variable stars and close binaries 01 p0148 A69-10046

- Nonquadrupole nature of cosmological radio emission intensity distribution demonstrated for anisotropic homogeneous cosmological models without flat space 04 p0662 A69-15238
- Cometary origin of meteorites, discussing and rejecting origin from recent asteroidal collisions 05 p0818 A69-15588
- Energy definition in relativity for steady state universes, particularly Schwarzschild universes 05 p0792 A69-15683
- Intergalactic continuum study showing universe behavior like black body with 2.7 K radiation temperature, noting cosmological and cosmogonic importance 05 p0827 A69-16593
- Elementary composition and origin of primary cosmic rays, discussing space techniques for observation of components 05 p0818 A69-16816
- Existence of cosmic time functions based on stable causality condition / absence of closed timelike or null curves in Lorentz metric/ 06 p0957 A69-17471
- Complex distribution of quasar red shift interpreted as due to two simple distributions of cosmological and gravitational red shift 06 p1009 A69-17968
- Cosmology, discussing big bang and steady state models, arrow of time, red shift/distance relation, background radiation, etc 07 p1210 A69-18390
- Cosmological model describing relation between red shift and magnitude of quasars 07 p1211 A69-18406
- Geochemistry and cosmology - Conference, Prague, August 1968 07 p1212 A69-18546
- Soviet book on relativistic astrophysics covering evolution and structure of universe with reference to galaxies, stars, quasars, relativity theory, gravitation theory, etc 07 p1216 A69-18960
- Red shifts and intrinsic powers of radio galaxies and quasars, discussing local luminosity distribution, function of sources and cosmology 07 p1206 A69-19270
- Origin of galaxies, discussing initial conditions of formation including density, kinematic and composition inhomogeneities, time effect, etc 07 p1218 A69-19280
- Cosmological models with antipole, determining models consistent with spatial distribution of quasars and radio galaxies 07 p1219 A69-19284
- Plane symmetric perfect fluid cosmological model derived from class I considerations, evaluating scalar invariants for line element 07 p1222 A69-19586
- Relativistic cosmological models with radiation and matter, analyzing conversion from radiation-like models to dust-like models 07 p1222 A69-19587
- Commensurability among pairs of mean motions of natural satellites of major planets and hypothesis of tidal evolution of satellite systems 07 p1223 A69-19638
- Commensurability among pairs of mean motions of satellites of major planets and power law relation for orbital periods of satellites 07 p1224 A69-19639
- Neutral hydrogen distribution and dynamics in galaxies, discussing observations by spectrographic transit telescope, data processing and profiles 07 p1224 A69-19711
- Critical density ratio concept introduced into cosmological models for matter concentration into galaxies in expanding universe 08 p1381 A69-19794
- Primordial magnetic field effects on spatially homogeneous cosmological models with anisotropic Euclidean metric 08 p1383 A69-20049
- Galactic angular momentum of rotation, applying rotation theory to gravitational instability model of galactic formation 08 p1383 A69-20050
- Isotropic Newtonian cosmological models symmetry shown to have velocity distribution obtainable from solution of Vlasov equation 08 p1386 A69-20073
- Relativistic astrophysics, discussing quasar phenomenology, red shift cosmology and relationship with galaxies 08 p1388 A69-20222
- Evolutionary cosmological models, relevant observational cosmology, quasar red shift, cosmic black body radiation, cosmic He abundance and universe temperature history 08 p1388 A69-20223
- Metagalaxy stationary model in terms of relativity theory, investigating radiation pressure balancing of gravitation as imaginary situation 08 p1389 A69-20263
- Two gravitational fields theory of gravitation in general relativity for flat universe, discussing gravitational wave propagation 08 p1390 A69-20276
- Quasars optical and electrical properties, distance, nature and role in cosmology 08 p1390 A69-20377
- Origin and distribution of elements - Conference, Paris, May 1967 08 p1398 A69-20892
- Nucleosynthesis in stars and early stage expanding universe, considering related nuclear reactions, helium abundances and kinematics of stars in Galaxy 08 p1357 A69-20893
- Galaxy formation from elements primeval abundance viewpoint stressing initial helium abundance 08 p1400 A69-20894
- Plutonium-244 existence in early solar system concluded from relative abundance ratios of excess meteoritic heavy Xe isotopes 08 p1401 A69-20900
- Rotation effect on homogeneous gravitating systems stability, noting lack of unity in approaches to cosmogony by various authors 09 p1589 A69-21372
- Poincare recurrence theorem applicable to collapsing gravitational system with particles velocity dispersion other than zero 09 p1593 A69-21567
- Lipshits-Khalatnikov law applicability to early stages anisotropy of cosmological expansion and relic emission 09 p1593 A69-21568
- Theoretical models describing quasi-stellar objects and radio galaxies, noting objects locality, semilocality and cosmological distances 09 p1594 A69-21693

Quasar red shifts due to cosmological and gravitational factors, assuming correlation of QSO intrinsic luminosity with gravitational red shift values
09 p1597 A69-22151

Cosmological implications of diffuse X ray background, noting Compton black body process effect on isotropic cosmic X rays
09 p1578 A69-22152

Globular cluster origin as gravitationally bound gas clouds before galaxy formation from primeval fireball model
09 p1599 A69-22192

Early evolution of universe related to present upper bound of primordial black body gravitational radiation temperature
09 p1601 A69-22210

Absorption red shifts in quasi-stellar source due to dead galaxies in cosmologically flat model of universe
09 p1602 A69-22228

Variable gravitational number kappa, discussing effects on cosmology
09 p1603 A69-22270

Galaxies and galactic clusters regarded as particles in kinetic theory of cosmology, discussing distribution function choice and red shift
09 p1605 A69-22410

Bolometric luminosity-red shift relations of Friedmann dust universes corrected for inhomogeneities, using locally inhomogeneous Swiss cheese models
09 p1605 A69-22411

Brans-Dicke gravitation theory effects on solar evolution and neutrino flux, discussing solar luminosity
09 p1605 A69-22415

Characteristic length constant in open cosmological model of large scale properties of real space-time, noting relation to other constants
09 p1608 A69-22528

Cosmology, reviewing Friedman and Lemaitre model, big bang model, primeval fireball hypothesis for residual black body radiation and galactic origin theories
09 p1608 A69-22715

Primordial solar system chemical composition for studies of origin and evolution, compiling solar composition data
09 p1608 A69-22745

Universe rotation from observations of microwave background and using closed universe model
10 p1771 A69-22851

Homogeneous anisotropic cosmological models of pancake and cigar forms, discussing quasars and emission time effects on red shift and luminosity distance
10 p1771 A69-22856

Rocket IR astronomy in support of big bang hypothesis, considering photoelectric detectors and instrument system
10 p1772 A69-22868

X ray universe, considering contribution of X ray astronomy to phenomena of big bang, supernovae, neutron stars, exploding galaxies, etc
10 p1760 A69-22869

Galactic discontinuity near longitude 140 degrees attributed to stars deficiency in anticenter quadrant or interstellar cloud obscuration
10 p1776 A69-23215

Solid hydrogen condensation on graphite grains for microwave background, discussing hydrogen grain promotion of galactic and stellar formation
10 p1776 A69-23216

Einstein cosmological field equations solved after subjecting electromagnetic null field metric tensor to Einstein gravitational field equations, noting coordinates significance
10 p1778 A69-23406

Zero point energy, evolutionary cosmology, negative kinematic pressure and space curvature, assuming physical vacuum as ground state of Bose field
10 p1780 A69-23649

Book on relativity and cosmos, space and time in physics, astronomy and cosmology covering theoretical and empirical research
10 p1784 A69-24019

Radio sources log N-log S diagram, red shifts and luminosity functions in zero cosmological constant and Lemaitre type Friedmann universes
10 p1789 A69-24134

Radiation probability of transmission through intervening galaxy and screening of quasar emission in universes with positive cosmological constant
10 p1790 A69-24135

Rb-Sr and other radioactive isotopes cosmochemistry in solar system, analyzing age of elements and r process
11 p1955 A69-24393

Red shift hypothesis postulated on perfect cosmological principle and uniqueness of electromagnetic wavelength measurements, showing agreement with astronomical data
11 p1961 A69-25108

Book on stellar, galactic and nucleosynthetic evolution covering nuclear, Fermi, electromagnetic and gravitational interactions roles
11 p1964 A69-25413

Test particle classical dynamics in closed expanding universe, discussing Newtonian inertial mass decrease and canonical methods for determining momentum, velocity and energy
11 p1920 A69-25561

Space flight research programs including stellar and biological evolutions and environmental control
12 p1255 A69-26005

Stellar evolution model for primeval He abundance in population II stars in globular clusters for big bang confirmation
12 p1256 A69-26228

Quasars and radio-quiet objects numbers and properties, discussing red shifts interpretation by cosmological, gravitational and Doppler theories
12 p1261 A69-26937

Cosmogonic nature of galactic nuclei activity, emphasizing streamers ejection and new formations in galaxies
12 p1263 A69-27016

Isotropic 3 K black body radiation implications for hot cosmological model, formation of galaxies, existence of superdense bodies and density nonuniformity during prestellar stage
12 p1267 A69-27047

Galactic formation by massive matter cloud passage through antimatter cloud, discussing radio sources genesis
12 p1270 A69-27064

Statistical tests for cosmological hypothesis for origin of absorption lines in spectra of quasars, considering red shifts
13 p2334 A69-27307

Book on astrophysics and stellar astronomy covering stellar radiation, binary and variable stars, positions, magnitudes, galaxies, cosmologies, etc
13 p2337 A69-27463

IR astronomy and cosmology, considering cosmic microwave background and isotropic radiation significance in distant IR
13 p2342 A69-27601

Einstein theory of space and time analyzed with emphasis on inertial systems
13 p2297 A69-27633

Philosophical problems of Einstein theory of gravitation and relativistic cosmology - Conference, Kiev, June 1966
14 p2482 A69-28856

Rigid space concept in gravitation theory, discussing reference systems with nonrigid and rigid background
14 p2484 A69-28863

Space-time interpretation of static Einstein universe model and Friedmann space with variable positive curvature
14 p2484 A69-28865

Asymmetry causes on cosmogonic scale in view of symmetry in small space-time regions /microworlds/ determinable within framework of Einstein theory
14 p2516 A69-28866

Unlimited extrapolation into infinity to determine ranges of applicability of theories in relativistic cosmology noting paradoxes
14 p2516 A69-28867

Galactic formation in Lemaitre universe from statistically probable density fluctuations, using perturbation theory and Newtonian cosmology
14 p2520 A69-29373

Book on New Cosmos covering classical astronomy concepts, stellar astrophysics and galaxies
14 p2522 A69-29684

Extragalactic background radiation intensity in isotropic world models as function of universe thermal history
14 p2514 A69-29769

Lunar origin theories, considering moon/earth mass ratio, earth-moon system angular momentum deficiency and differential volatilization in earth
14 p2527 A69-29882

Low density Friedmann universe models with non-zero cosmological constant and long ages, deducing galaxy evolution rates from magnitude-red shift relations
14 p2527 A69-29944

Closed space cosmological model, discussing complex singularity behavior
15 p2680 A69-30200

Extragalactic research to solve problems in cosmological and cosmogonic theory, including relativistic cosmology and observations
15 p2681 A69-30436

Einstein equations solution for empty space without singularities containing metric, with closed homogeneous space type hypersurfaces expanding anisotropically
15 p2690 A69-30732

Hydrogen recombination in hot universe model, discussing emission of energetic quanta
15 p2690 A69-30734

Expanding isotropic universe with cosmological constant, noting stability for rotational perturbations and gravitational and sound waves
15 p2690 A69-30735

Relativity theorems applied to collapsing stars and expanding universe noting limitations of general relativity from prediction of singularities
15 p2694 A69-30854

Galaxies formation from superstars ascribed to superstar instabilities
15 p2696 A69-31151

Newtonian invariant mechanics, giving inertial interpretation of gravitation and Hubble expansion of universe
15 p2654 A69-31214

Inertial systems in homogeneous isotropic expanding universe model, giving expression for line element accounting for Hubble effect
15 p2654 A69-31495

Mathematical solutions of Einstein cosmological equations for radiation universe, discussing model limitations for universes older than 5-6 billion years
15 p2700 A69-31496

Cosmic helium origin, discussing evidence for big bang, galactic synthesis and stellar thermonuclear burning theories
16 p2853 A69-31598

Possible existence in universe of large number of difficult-to-observe particles with zero rest mass left over from superdense phase
16 p2814 A69-31801

Monograph on creation and evolution of physico-theoretical concepts of space, time and matter
16 p2812 A69-32110

Stellar system stability for corresponding stable barotropic gaseous system, discussing Schroedinger operator role
16 p2862 A69-32374

Cosmology and geophysics relationships using initial and boundary conditions concept
16 p2864 A69-32451

Irregular dwarf galaxies as source of faint objects in close galactic groups
16 p2864 A69-32597

Water bag spherically symmetrical universe model, discussing system stability, distribution function representation and polytrope equivalency
16 p2866 A69-32813

Particle production by gravitational fields in universe via quantum field theory, considering cosmological models
17 p3008 A69-33003

Asteroidal jet streams from Hirayama family Flora, difficult to reconcile with exploded planet view
17 p3030 A69-33070

Meteorite origin theory limitations from microscopic examination and microprobe analyses of chondrules in unequilibrated meteorites
17 p3034 A69-33585

Corrections to previous papers on extragalactic gamma rays, discussing effects on various cosmological models
17 p3025 A69-34168

Aligned galaxies, discussing possible formation by consecutive explosive ejections of new galaxies from parent galaxy
17 p3044 A69-34175

Heavy nuclei origin based on empirical abundance distribution, discussing stellar, galactic and cosmic events for nuclear genesis
17 p3009 A69-34190

Lunar origin, geological composition and water existence controversies from data gathered by various lunar probes
18 p3196 A69-34631

Rotation effect on homogeneous gravitating systems stability, noting lack of unity in approaches to cosmogony by various authors
18 p3198 A69-34761

General relativity theory applicability to cosmology, Einstein principle of equivalence and contradicting arguments of relativistic cosmology
18 p3200 A69-34997

Fluctuations evolution in density perturbations analyzed to obtain free fall and free expansion universe models, showing no difference between expanding and static Newtonian universes

18 p3203 A69-35347

Planetary cosmogony problems involving protoplanetary cloud origin, matter condensation, planets formation and moon origin, noting iron content in chondrites

18 p3205 A69-35437

Hydrogen atom excess charge creating universe repulsive force in analyzing cosmological gravitational contraction in terms of Newtonian mechanics

18 p3206 A69-35469

Cosmological model based on inertia and relativity principles, considering scalar gravitational and electrostatic potential, light velocity, gravitational interaction and observed galactic red shift

18 p3206 A69-35470

Primitive solar nebula physical model considered under angular momentum conservation in collapsing fragment

19 p3406 A69-36074

Meteorite data in planetary cosmogony, discussing iron meteorite ages, Xe retention in chondrites and synchronism of sun and protoplanetary cloud forming

19 p3406 A69-36075

Solar system matter evolutionary beginning traced to chemical elements synthesis by considering radioactive decay irreversible processes

19 p3406 A69-36076

Heat generation in meteorites by radioactive isotopes generated by early solar proton irradiation prior to solar system solidification

19 p3411 A69-36098

Boundary conditions for theory of solar system origin, discussing planetary atmospheres, surfaces, magnetic fields, composition and early solar wind

19 p3419 A69-36209

Physical characteristics of young planetary nebulae and nuclei, discussing classification of objects II 4997, M 3-27 and M 1-2

19 p3423 A69-36226

Spiral galaxy linear diameter relation to luminosity applied to Virgo galactic clusters, noting effect on distance modulus and Hubble constant

19 p3427 A69-36652

Soviet book on cosmos and hypotheses covering origin and physical characteristics of earth, moon, Venus and Mars

20 p3596 A69-37234

Thomas wave equation in fluid mechanics, examining coordinates system with normal hyperbolic metric of universe tube having given signature

20 p3598 A69-37430

Cosmic matter density and velocity in expanding universe with negative curvature within Einstein-Friedman theory

20 p3599 A69-37472

Cosmological constant and elementary particle theory

20 p3606 A69-38013

Universal hydrogen distribution, discussing atomic hydrogen needed to close universe

20 p3610 A69-38140

Gas in H II regions and associated stars radial velocities correlation and systematic difference suggesting relationship between nebulae and stars

20 p3611 A69-38150

Quasars observations interpretation, discussing red shift origin, gravitational collapse, lifetime, distribution, cosmological aspects, etc

21 p3802 A69-38825

Radio source counts from cosmological standpoint, discussing terrestrial location relative to quasars

21 p3802 A69-38828

Harrison primordial inhomogeneity postulate concerning baryon numbers distribution in universe, precluding possibility of considering cosmic rays bulk as universal

21 p3810 A69-39469

Quasi-stellar objects identification, distribution, emission lines interpretation, energy distribution, absorption spectra, radio properties, etc

21 p3811 A69-39515

Soviet book on cosmogony, discussing nonstationary objects in universe, superdense bodies, solar system, explosion processes in universe, stellar evolution, etc

21 p3813 A69-39525

Soviet collection of papers on universe covering history and development of astronomy, solar system, minor planets, comets, shooting stars, extraterrestrial civilizations, etc

21 p3814 A69-39531

Density fluctuations in universe during early stages, using hot big bang cosmological model

21 p3814 A69-39571

Book on high energy astrophysics covering violent stellar phenomena, radio galaxies, quasars, pulsars, cosmic rays origin, mystery neutron stars, etc

22 p4008 A69-39900

Gravitational constant secular change from considering relativistic cosmology and galactic structure, deriving equations of Newtonian cosmology

22 p4017 A69-40173

Variable gravitational constant hypothesis, theories of gravity and gravity laws for earth interior, solar motion, cosmological problem and earth orbit

22 p4017 A69-40174

Dirac cosmological principle of nuclear decay compared to Rutherford theory with respect to radioactive ages of terrestrial rocks and meteorites

22 p4017 A69-40176

Fractionation mechanisms in early phases of planetary evolution sought to explain abundance problem in terrestrial planets

22 p4018 A69-40185

Strategy for exploration of inner solar system leading to origin and history, detailing lunar exploration program

22 p4022 A69-40449

Time symmetric electrodynamics for various cosmological models, discussing position and negative space curvature

22 p4022 A69-40469

Nonexistence of second order clustering of galaxies and relationship to gravitational cut-off, relativistic cosmologies and red shifted light by exponential decay of photon energy

22 p4024 A69-40579

Free-free intergalactic absorption at LF as function of red shift for uniform zero pressure cosmological models

22 p4025 A69-40640

Universe expansion model, integrating Einstein gravitation equations with cosmological constant lambda to interpret Hubble effect

22 p4029 A69-40756

Cosmological constant closed relativistic universe, showing constant-observational data inconsistency

22 p4029 A69-40757

Extraterrestrial objects composition in defining cosmic abundance curve, including solar and meteoritic data

22 p4032 A69-40982

Primordial He 3 and deuterium production from magnetic effects during nucleosynthesis epoch of big bang cosmologies

22 p4035 A69-41210

Steady state cosmology for classical and quantum electrodynamics in local vicinity, deriving Lorentz-Dirac equation from variational principle

23 p4215 A69-42116
